5 LÜRSSEN NEW 28 METRE TYPE (WHSIC)

BC 10001-10002 BC 20001-20003

Displacement, tons: 85 full load
 Dimensions, feet (metres): 92.5 x 21.7 x 4.6 (28.2 x 6.6 x 1.4)
 Main machinery: 2 MTU 16V 396 TE94 diesels; 2,955 hp(m) (2.14 MW) sustained; 2 shafts
 Speed, knots: 40. Range, n miles: 1,100 at 30 kt
 Complement: 11 (3 officers)
 Guns: 2-7.62 mm MGs
 Radars: Surface search; Furuno FR 8731. I-band

Comment: First pair built in Germany and delivered between May 1999 and November 1999. Last three built by PT Pal Surabaya and delivered between September 1999 and November 1999. Aluminium construction

BC 10001 5/1999, Lürssen / 0080034

BC 20001 9/1999, PT Pal / 0075857

COAST AND SEAWARD DEFENCE COMMAND

Notes: (1) Established in 1978 as the Maritime Security Agency to control the 200 mile EEZ and to maintain navigational aids. Comes under the Military Sea Communications Agency. Some craft have blue hulls with a diagonal thick white and thin red stripe plus KPLP on the superstructure. In addition to the craft listed there are large numbers of small harbour boats. (2) There are also a number of civilian manned vessels used for transport and servicing navigational aids.

2 DISASTER RESPONSE SHIPS (WPSO)**ARDA DEDALI ALUGARA**

Measurement, tons: 530 gross
 Dimensions, feet (metres): 196.8 × 26.2 × 10.5 (60.0 × 8.0 × 3.2)
 Main machinery: 2 MTU 16V4000 M60 diesels; 2 shafts; cp props
 Speed, knots: 19.3. Range, n miles: 3,000 at 17 kt
 Complement: To be announced
 Radars: Surface search/navigation: To be announced

Comment: Built by Niigata Shipbuilding & Repair Inc., a wholly owned subsidiary of Mitsui Engineering & Shipbuilding Co., *Arda Dedali* delivered to the Directorate General of Sea Communication (DGSC) on 27 January 2005. *Alugara* delivered in mid-2005. The ships are designed to undertake disaster relief operations and are equipped to deal with accidents at sea, including rescue and firefighting, and counter-pollution tasks. The ships are likely to be deployed in the Malacca/Singapore Strait region.

**ALUGARA** 6/2005, *Ships of the World* / 1153202**5 KUJANG CLASS (WPB)****KUJANG 201 PARANG 202 CELURIT 203 CUNDRIK 204 BELATI 205**

Displacement, tons: 162 full load
 Dimensions, feet (metres): 125.6 × 19.6 × 6.8 (38.3 × 6 × 2.1)
 Main machinery: 2 AGO SACM 195 V12 CZSHR diesels; 4,410 hp(m) (3.24 MW); 2 shafts
 Speed, knots: 28. Range, n miles: 1,500 at 18 kt
 Complement: 18
 Guns: 1–12.7 mm MG.

Comment: Built by SFCN, Villeneuve la Garenne. Completed April 1981 (*Kujang* and *Parang*), August 1981 (*Celurit*), October 1981 (*Cundrik*), December 1981 (*Belati*). Pennant numbers are preceded by PAT.

**CUNDRIK** 11/1998, *van Ginderen Collection* / 0052368**4 GOLOK CLASS (WSAR)****GOLOK 208 PANAN 207 PEDANG 208 KAPAK 209**

Displacement, tons: 190 full load
 Dimensions, feet (metres): 123 pp × 23.6 × 6.6 (37.5 × 7.2 × 2)
 Main machinery: 2 MTU 16V 652 TB91 diesels; 4,610 hp(m) (3.39 MW) sustained; 2 shafts
 Speed, knots: 25. Range, n miles: 1,500 at 18 kt
 Complement: 18
 Guns: 1 Rheinmetall 20 mm

Comment: All launched 6 November 1981. First pair completed 12 March 1982. Last pair completed 12 May 1982. Built by Deutsche Industrie Werke, Berlin. Fitted out by Schlichting, Travemünde. Used for SAR and have medical facilities. Pennant numbers preceded by PAT.

**KAPAK** 11/1998, *van Ginderen Collection* / 0052367**15 HARBOUR PATROL CRAFT (WPB)****PAT 01–15**

Displacement, tons: 12 full load
 Dimensions, feet (metres): 40 × 14.1 × 3.3 (12.2 × 4.3 × 1)
 Main machinery: 1 Renault diesel; 260 hp(m) (191 kW); 1 shaft
 Speed, knots: 14
 Complement: 4
 Guns: 1–762 mm MG

Comment: First six built at Tanjung Priok Shipyard 1978–79. Four more of a similar design built in 1993–94 by Mahalaya Utama Shipyard and delivered from 1995.

**HARBOUR PATROL CRAFT TYPE** 11/1998, *van Ginderen Collection* / 0052368**1 BUOY TENDER (ABU)**

Name	No	Builders	Commissioned
JADAYAT	–	Niigata Shipbuilding and Repair	10 Oct 2003

Measurement, tons: 858 grt
 Dimensions, feet (metres): 186.7 × 36.0 × 11.5 (56.9 × 11.0 × 3.5)
 Main machinery: 1 diesel, 985 hp (735 MW); 1 shaft
 Speed, knots: 10.5
 Complement: 45
 Radars: Navigation: I-band.

Comment: Funded by the Nippon Foundation through the Malacca Strait Council.

**JADAYAT** 7/2004, *Ian Edwards* / 1040696**NAVAL AUXILIARY SERVICE**

Notes: This is a paramilitary force of non-commissioned craft. They have KAL pennant numbers. About 24 vessels operate in the eastern Fleet and 47 in the western Fleet, and three belong to the Naval Academy. In addition, the Baruna Jaya ships listed under Survey Ships are also part of the NAS.

**NAS CRAFT** 4/1999, 0080035**65 KAL KANGEAN CLASS (COASTAL PATROL CRAFT) (WPB)**

Displacement, tons: 44.7 full load
 Dimensions, feet (metres): 80.4 × 14.1 × 3.3 (24.5 × 4.3 × 1)
 Main machinery: 2 diesels; 2 shafts
 Speed, knots: 18
 Guns: 2 USSR 25 mm/80 (twin), 2 USSR 14.5 mm (twin) MGs.

Comment: Ordered from Tanjung Uban Navy Yard in about 1984 and completed between 1987 and 1996. Numbers are uncertain. Have four figure pennant numbers in the 1101 series.

**KAL KANGEAN 1112** 10/1998, *Trevor Brown* / 0506008

6 CARPENTARIA CLASS (COASTAL PATROL CRAFT) (WPB)

201-208

Displacement, tons: 27 full load
Dimensions, feet (metres): 51.5 x 15.7 x 4.3 (15.7 x 4.8 x 1.3)
Main machinery: 2 MTU 8V 331 TC92 diesels; 1,770 hp(m) (1.3 MW) sustained; 2 shafts
Speed, knots: 29
Range, n miles: 950 at 18 kt
Complement: 10
Guns: 2—12.7 mm MGs
Radars: Surface search: Decca; I-band.

Comment: Built 1976-77 by Hawker de Havilland, Australia. Endurance, four to five days. Transferred from the Navy in the mid-1980s to the Police and now with the Naval Auxiliary Service

CARPENTARIA 203 8/1995, van Ginderen Collection 0080036

ARMY

Notes: The Army (ADRI) craft have mostly been transferred to the Military Sealift Command (Logistic Support).

27 LANDING CRAFT LOGISTICS (LCL)

ADRI XXXII-LVIII

Displacement, tons: 580 full load
Dimensions, feet (metres): 137.8 x 35.1 x 5.9 (42 x 10.7 x 1.8)
Main machinery: 2 Detroit 6-71 diesels; 348 hp(m) (260 kW) sustained; 2 shafts
Speed, knots: 10
Range, n miles: 1,500 at 10 kt
Complement: 15
Military lift: 122 tons equipment

Comment: A variety of LCL built in Tanjung Priok Shipyard 1979-82. Details are for Adri XL. XXXI sank in February 1993.

ADRI XXXIII 10/1999, David Boey / 0080037

POLICE

Notes: The police operate about 85 craft of varying sizes including 14 Bango class of 194 tons and 32 Hamilton water-jet craft of 7.9 m, 234 hp giving a speed of 28 kt. Lürssen type (619-623) are identical to Customs craft. Five Polish-built Kutiang class 36 m patrol craft with pennant numbers 638-642 and three Japanese built 27 m patrol craft with pennant numbers 648-650 entered service in 2007

POLICE 622 8/1995 0080038

POLICE 642 4/2007, J Cislak / 1170185

2 OFFSHORE PATROL CRAFT (PBO)

Name	No	Builders	Commissioned
BISMA	520	Astilleros Gondan, Castropol	May 2003
BALADEWA	521	Astilleros Gondan, Castropol	June 2003

Dimensions, feet (metres): 200.2 x 32.5 x 8.5 (61.0 x 9.9 x 2.6)
Main machinery: 2 MTU 12V 595TE 90 diesels, 8,700 hp (6.5 MW)
Speed, knots: 22. **Range, n miles:** 3,500 at 12 kt
Helicopters: Platform for one medium

Comment: Primary role Search and Rescue.

BISMA 5/2003, Astilleros Gondan / 0569211

Country Overview

Formerly a constitutional monarchy ruled by a shah, The Islamic Republic of Iran was established in 1979. With an area of 636,296 square miles, it is situated in the Middle East and is bordered to the north by Armenia, Azerbaijan and Turkmenistan, to the west by Iraq and Turkey and to the east by Afghanistan and Pakistan. It has a 1,318 n mile coastline with the Gulf, the Gulf of Oman and the Caspian Sea. The capital and largest city is Tehran. The principal Caspian ports are Bandar-e Anzali and Bandar-e Turkeman while those in the Gulf include the oil-shipping facilities on Kharg Island, Khorramshahr, Bandar-Khomeini and Bandar-Abbas on the strategic Strait of Hormuz. Territorial Seas (12 n miles) are claimed. An EEZ (200 n miles) has been claimed but the limits have not been defined.

Headquarters Appointments

Commander of Navy:
 Rear Admiral Habibollah Seyyari
Head of IRCG(N) (Sepah):
 Rear Admiral Morteza Saffari

Personnel

2009: 18,000 Navy (including 2,000 Naval Air and Marines), 20,000 IRGCN

Bases

Persian Gulf: Bandar Abbas (MHQ and 1st Naval District), Boushehr (2nd Naval District and also a Dockyard), Kharg Island, Qeshm Island, Bandar Lengeh
 Indian Ocean: Chah Bahar (Bandar Beheshti) (3rd Naval District and forward base)
 Caspian Sea: Bandar Anzali (4th Naval District)
 Pasdaran: Al Farsiyah, Haileh, Sirri, Abu Musa, Larak

Coast Defence

Three Navy and one IRGCN brigades with many fixed installations and command posts. Approximately 100 truck-mounted C 802 and 80 CSSC-3 (Seersucker) Chinese SSMs in at least four sites. The indigenously developed Ra'ad cruise missile and C-701 Kosak may be based at launching bases under construction at Bandar Abbas, Bandar Lengeh, Boushehr and Bandar Khomeini.

Mines

Stocks of up to 3,000 mines are reported including Chinese EM 52 rising mines

IS

Iran

5 + (1) YONO (IS 120) CLASS (MIDGET SUBMARINES) (SSM)

Displacement, tons: 115 surface; 123 dived
Dimensions, feet (metres): 95.1 x 9.0 x 8.2 (29.0 x 2.75 x 2.5)
Main machinery: Diesel-electric
Speed, knots: To be announced
Complement: 32
Torpedoes: 2-21 in (533 mm) tubes.
Sonars: To be announced

Programmes: Little is known about these submarines whose existence was first noted in February 2004. If indigenously built, as has been claimed, this would represent a significant technological development. It is more likely that another country, possibly North Korea, has been involved in the project. The first three submarines are known as *Qadir* 1, 2 and 3 and are likely to be employed in shallow areas of the Gulf such as the Strait of Hormuz. A fourth was launched on 28 November 2007 and a fifth on 27 November 2008. A sixth boat is reported to be under consideration.

YONO CLASS

3/2006 / 1164707

1 NAHANG CLASS (MIDGET SUBMARINES) (SSM)

Displacement, tons: To be announced
Dimensions, feet (metres): 82.0 x 7 x 7 (25.0 x 7 x 7)
Main machinery: To be announced
Speed, knots: To be announced
Complement: To be announced

Comment: Little is known about this submarine whose existence was noted April 2006. Dimensions are approximate. Whereas it was reported that perhaps two further boats were to be constructed, this is now considered unlikely. It is claimed that the submarine has been indigenously designed and built. The submarine is designed for shallow water operations and potential roles include acting as mothership to swimmer delivery vehicles. Sonars and torpedoes are not fitted

NAHANG CLASS

4/2006 / 1164701

8 SWIMMER DELIVERY VEHICLES (LDW)

Comment: On 29 August 2000, the first Iranian built Swimmer Delivery Vehicle (SDV) *Al Sabehat* 15 was launched at Bandar Abbas. The 8 m craft can accommodate a two-man crew and has the capability to carry three additional divers. It is well suited to coastal reconnaissance, Special Forces insertion/extraction and mining (it can carry 14 limpet mines) of ports and anchorages but not to open water operations. Four further craft have been reported and three of a different design have also been observed. The Hengam-class LSLs act as motherships

AL SABEHAT 15

4/2006 / 1164700

SDV (new type)

4/2006 / 1164699

FRIGATES

3 + 1 ALVAND (VOSPER MK 5) CLASS (FFG)

Name	No	Builders	Laid down	Launched	Commissioned
ALVAND (ex-Saam)	71	Vosper Thornycroft, Woolston	22 May 1967	25 July 1968	20 May 1971
ALBORZ (ex-Zaaf)	72	Vickers, Barrow	3 Mar 1968	25 July 1969	1 Mar 1971
SABALAN (ex-Rostam)	73	Vickers, Newcastle & Barrow	10 Dec 1967	4 Mar 1969	28 Feb 1972
JAMARAN	-	Bandar Abbas		28 Nov 2007	2009

Displacement, tons: 1,350 full load
 Dimensions, feet (metres): 310 x 36.4 x 14.1 (screws)
 (94.5 x 11.1 x 4.3)

Main machinery: CODOG (71, 72, 73), 2 RR Olympus TM2A gas turbines; 40,000 hp (29.8 MW) sustained; 2 Paxman 16YJCM diesels; 3,800 hp (2.83 MW) sustained; 2 shafts; cp props; 2 diesels (Jamaran); 20,000 hp (14.9 MW); 2 shafts

Speed, knots: 39 gas; 18 diesel; 28 (Jamaran)
 Range, n miles: 3,650 at 18 kt; 550 at 36 kt
 Complement: 125 (accommodation for 146)

Missiles: SSM: 4 China C-802 (2 twin) ①; active radar homing to 120 km (66 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.

Guns: 1 Vickers 4.5 in (114 mm)/55 Mk 8 ②; 25 rds/min to 22 km (12 n miles) anti-surface; 6 km (3.3 n miles) anti-aircraft; weight of shell 21 kg.
 2 Oerlikon 35 mm/90 (twin) ③; 550 rds/min to 6 km (3.3 n miles); weight of shell 1.55 kg.
 3 Oerlikon GAM-BO1 20 mm ④; 2 -12.7 mm MGs.

Torpedoes: 6 324 mm Mk 32 (2 triple) tubes ⑤

Countermeasures: Decoys: 2 UK Mk 5 rocket flare launchers.

ESM: Decca RDL 2AC; radar warning. Rascal FH 5 HF/DF.

Radars: Air/surface search: Plessey AWS 1 ⑥; E/F-band, range 110 km (60 n miles).

Surface search: Rascal Decca 1226 ⑦; I-band.

Navigation: Decca 629; I-band.

Fire control: Contraves Sea Hunter ⑧; I/J-band

IFF: UK Mk 10.

ALVAND

(Scale 1 : 900), Ian Sturton / 1335484

Sonars: Graseby 174; hull-mounted; active search, medium/high frequency.
 Graseby 170; hull-mounted; active attack; high frequency.

Programmes: The first three units were ordered from UK Shipyards on 25 August 1966. A fourth unit, has been under construction at Bandar Abbas, and sea trials are expected to start in 2009. Known as the *Mowj* project, the design is almost certainly very similar to the original Vosper Mk 5 design. The weapons and sensor fit is likely to include a 76 mm gun, four C-802 missiles and, possibly, SM 1 launchers. The ship is to have all diesel propulsion. The design includes a flight deck aft.

Modernisation: Major refits including replacement of 4.5 in Mk 5 gun by Mk 8 completed 1977. Modifications in 1988 included replacing Seacat with a 23 mm gun and boat

deavits with minor armaments. By mid-1991 the 23 mm and both boats had been replaced by GAM-BO1 20 mm guns and the SSM launcher had effectively become a twin launcher. In 1996/97 two of the class had the Sea Killer SSM replaced by C-802 launchers and a new communications mast fitted between the two fire-control radars. The third has been similarly modified. *Sabalan* appears to be fitted with Rica Screen air/surface search radar. Torpedo tubes which replaced the mortars in *Alvand* were probably taken from decommissioned Babr class.

Structure: Air conditioned throughout. Fitted with Vosper stabilisers.

Operational: *Sahand* sunk by USN on 18 April 1988. *Sabalan* had her back broken by a laser-guided bomb in the same skirmish but was out of dock by the end of 1990 and was operational again in late 1991. ASW mortars probably unserviceable. All are active.

ALVAND

1/2002 / 0569203

SABALAN

2/1998 / 0052971

CORVETTES

2 BAYANDOR (PF 103) CLASS (FS)

Name	No	Builders	Laid down	Launched	Commissioned
BAYANDOR (ex-US PF 103)	81	Levingstone Shipbuilding Co, Orange, TX	20 Aug 1962	7 July 1963	18 May 1964

Displacement, tons: 900 standard; 1,135 full load
Dimensions, feet (metres): 275.6 × 33.1 × 10.2
 (84 × 10.1 × 3.1)
Main machinery: 2 Fairbanks-Morse 38TD8-1/8-9 diesels;
 5,250 hp (3.92 MW) sustained; 2 shafts
Speed, knots: 20
Range, n miles: 2,400 at 18 kt; 4,800 at 12 kt
Complement: 140

Guns: 2 US 3 in (76 mm)/60 Mk 34 ●; 50 rds/min to 12.8 km
 (7 n miles); weight of shell 6 kg.
 1 Bofors 40 mm/60 (twin) ●; 120 rds/min to 10 km
 (5.6 n miles); weight of shell 0.89 kg
 2 Oerlikon GAM-BO1 20 mm ●; 2 – 12.7 mm MGs.

Weapons control: Mk 63 for 76 mm gun. Mk 51 Mod 2 for
 40 mm guns.

Radars: Air/surface search: Westinghouse SPS-6C ●;
 D-band; range 146 km (80 n miles) (for fighter).

Surface search: Racal Decca ●; I-band

Navigation Raytheon 1650 ●; I/J-band.

Fire control: Western Electric Mk 36 ●; I/J-band.

IFF. UPX-12B.

BAYANDOR

(Scale 1 : 900), Ian Sturton / 0506193

Sonars: EDO SQS-17A; hull-mounted; active attack; high frequency.

Programmes: Transferred from the USA to Iran under the Mutual Assistance programme in 1964.

Modernisation: Naghdi change of engines and reconstruction of accommodation completed in mid-1988. 23 mm gun and depth charge racks replaced by 20 mm

guns in 1990. Naghdi began a substantial modernisation programme in 2007. Upgrades are reported to include the replacement of the 76 mm gun with a modern weapon, installation of four C-802 missile tubes aft of the funnel and of Mk 32 torpedo tubes aft.

Operational: Milanian and Khanamaie sunk in 1982 during war with Iraq. Both remaining ships are very active. Sonars may have been removed.

BAYANDOR

2/1998 0052372

SHIPBORNE AIRCRAFT

Numbers/Type: 9 Agusta AB 204ASW/212.

Operational speed: 104 kt (193 km/h).

Service ceiling: 11,500 ft (3,505 m).

Range: 332 n miles (615 km).

Role/Weapon systems: Mainly engaged in ASW operations in defence of oil installations. Numbers are uncertain. Sensors: APS 705 search radar, dipping sonar (if carried). Weapons: ASW; two China YU-2 torpedoes. ASV; two AS 12 missiles.

AB 212 (Spanish colours)

3/2002, A Campanera / Rovira / 0579019

Numbers/Type: 9 Agusta-Sikorsky ASH-3D Sea King.

Operational speed: 120 kt (222 km/h).

Service ceiling: 12,200 ft (3,720 m).

Range: 630 n miles (1,165 km).

Role/Weapon systems: Shore-based ASW helicopter to defend major port and oil installations. Six are reported serviceable. Can be embarked in Kharg. Sensors: Selenia search radar, dipping sonar. Weapons: ASW; four A244/S torpedoes or depth bombs. ASV; trials of an anti-ship missile 'Fajr-Darya' are reported to have taken place. Capabilities not known but could be a development of Sea Killer.

SEA KING

3/1997 0012549

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Notes: (1) The Air Force also has up to six F-4 Phantoms equipped with C 80IK ASMs for the maritime role.

(2) Two F-27 Fokker Friendship aircraft are used in a utility MPA role.

(3) Two Dornier 228 are also in service but are reported not to be very active.

(4) The Iranian Air Force operates some 14 (plus 18 ex-Iraqi) Su-24 Fencer ground attack, some of which may be 'marinised' for an anti-ship role.

(5) An-140 transport aircraft are under licensed production at Esfahan. The first aircraft flew in January 2001. These are likely to be used as a multipurpose platform including replacement of the ageing P3F fleet.

(6) Approximately seven Harbin Y-12 utility aircraft are used for maritime patrol.

Numbers/Type: 6 Sikorsky RH/MH-53D Sea Stallion.

Operational speed: 125 kt (232 km/h).

Service ceiling: 11,100 ft (3,385 m).

Range: 405 n miles (750 km).

Role/Weapon systems: Surface search helicopter which could be used for mine clearance but so far has only been used for Logistic purposes. Can be carried on Hengam class flight deck. Sensors: Weather radar. Weapons: Unarmed.

Numbers/Type: 5 Lockheed C-130H-MP Hercules.

Operational speed: 325 kt (602 km/h).

Service ceiling: 33,000 ft (10,060 m).

Range: 4,250 n miles (7,876 km).

Role/Weapon systems: Long-range maritime reconnaissance role by Air Force which has a total of 23 of these aircraft. Sensors: Search/weather radar. Weapons: Unarmed.

Numbers/Type: 2 Lockheed P-3F Orion.

Operational speed: 410 kt (760 km/h).

Service ceiling: 28,300 ft (8,625 m).

Range: 4,000 n miles (7,410 km).

Role/Weapon systems: Air Force manned. One of the remaining two aircraft can be used for early warning and control duties for strikes. Replacements are being sought. Sensors: Search radar, sonobuoys. Weapons: ASW; various weapons can be carried. ASV; C-802 SSM.

P3F

12/2001, A Sharma 0526307

PATROL FORCES

Notes: (1) There are at least one 13 m (RIB 42SC), one 16.5 m (FB 55), two 12 m (FB 38), two 11 m (RIB 36) and two 16.7 m (RIB 55SC) craft used for maritime enforcement tasks. Designed by FB design of Italy, they are capable of 60-70 kt. Additional units to similar designs have been built in Iran.

(2) The test of a high-speed rocket-torpedo was announced on 2 April 2006. Known as Dalaam, the weapon appears to resemble the Russian Shkval which has a speed of 195 kt and a range of 3.75 n miles. Designed for close-quarter operations, the weapon may be fitted in some patrol craft.

Complement: 28 (3 officers)

Missiles: SSM, 4 China C-802, active radar homing to 120 km (66 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.
Guns: 2—30 mm/85 (twin) AK 230 2—23 mm/87 (twin).
Radars: Surface search: China SR-47A; I-band.
Navigation: China RM 1070A; I-band
Fire control: Rice Lamp Type 341; I/J-band.

Programmes: Negotiations for sale started in 1991 but were held up by arguments over choice of missile. Built at Zhanjiang Shipyard. First five delivered in September 1994 by transporter vessel, second batch in March 1996. Original pennant numbers 301-310. More may be built in Iran under licence.

Structure: The hull is a shortened version of the Chinese Huangfen (Osa 1) class but the superstructure has a lattice mast to support two I-band radars and there is a separate director plinth for the fire-control system. A twin 23 mm gun is fitted aft of the mast.

Operational: Manned by the Pasdaran. Renamed in approximately 2006.

SHAHID GOLZAM

4/2006 / 1164698

SHAHID ABSALAN

4/2006 / 1164697

13 KAMAN (COMBATTANTE II) CLASS (FAST ATTACK CRAFT—MISSILE) (PGGF)

Name	No	Builders	Commissioned
KAMAN	P 221	CMN, Cherbourg	12 Aug 1977
ZOUBIN	P 222	CMN, Cherbourg	12 Sep 1977
KHADANG	P 223	CMN, Cherbourg	15 Mar 1978
PEYKAN	P 224	Bandar Anzali, Iran	2004
JOSHAN	P 225	Bandar Anzali, Iran	2006
FALAKHON	P 226	CMN, Cherbourg	31 Mar 1978
SHAMSHIR	P 227	CMN, Cherbourg	31 Mar 1978
GORZ	P 228	CMN, Cherbourg	22 Aug 1978
GARDOUNEH	P 229	CMN, Cherbourg	11 Sep 1978
KHANJAR	P 230	CMN, Cherbourg	1 Aug 1981
NEYZEH	P 231	CMN, Cherbourg	1 Aug 1981
TABARZIN	P 232	CMN, Cherbourg	1 Aug 1981
DERAFSH	P 233	Bandar Anzali, Iran	2008

Displacement, tons: 249 standard; 275 full load
Dimensions, feet (metres): 154.2 x 23.3 x 8.2 (47 x 7.1 x 1.9)
Main machinery: 4 MTU 16V 538 TB91 diesels; 12,280 hp(m) (9.03 MW) sustained; 4 shafts
Speed, knots: 37.5
Range, n miles: 2,000 at 15 kt; 700 at 33.7 kt
Complement: 31

Missiles: SSM: 2 or 4 China C-802 (1 or 2 twin); active radar homing to 120 km (66 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer or 4 McDonnell Douglas Harpoon (2 twin), active radar homing to 40 km (22 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer or Standard SM1-MR box launchers (Gorz).

Guns: 1 OTO Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.7 n miles) anti-surface; 12 km (6.6 n miles) anti-aircraft, weight of shell 6 kg; 320 rounds
1 Breda Bofors 40 mm/70, 300 rds/min to 12 km (6.6 n miles); weight of shell 0.96 kg; 900 rounds. Some have a 23 mm or 20 mm gun in place of the 40 mm.
2—12.7 mm MGs

Countermeasures: ESM: Thomson-CSF TMV 433 Dalia; radar intercept.

ECM: Thomson-CSF Alligator; jammer.

Radars: Surface search/fire control: Signaal WM28; I/J-band.

Navigation: Racal Decca 1226; I-band.

IFF: UPZ-27N/APX-72.

Programmes: Twelve ordered in February 1974. The transfer of the last three craft was delayed by the French Government after the Iranian revolution. On 12 July 1981 France decided to hand them over. This took place on 1 August, on 2 August they sailed and soon after *Tabarzin* was seized by a pro-Royalist group off Cadiz. After the latter surrendered to the French in Toulon further problems were prevented by sending all three to Iran in a merchant ship. Further indigenously built craft have been developed for operations in the Caspian Sea. Known as the SINA 1 programme, the first vessel (*Paykan*) was launched on 29 September 2003, the second (*Joshan*) commissioned in 2006 and a third (*Derafsh*) in 2008. Additional units may be built.

Modernisation: Most of the class fitted with C-802 SSM in 1996-98. *Gorz* has been used for trials, first with Harpoon, and now with SM 1 launchers taken from the deleted Sumner class destroyers.

Structure: Portable SA-7 launchers may be embarked in some.

Operational: The original *Paykan* P 224 was sunk in 1980 by Iraq, *Joshan* P 225 in April 1988 by the US Navy. The new *Paykan* P 224, *Joshan* P 225 and *Derafsh* P 233 are based in the Caspian Sea.

GARDOUNEH (with Harpoon)

11/2001, Royal Australian Navy / 0520433

SHAMSHIR

4/2006 / 1164696

GORZ (with SM1)

12/2002 / 0569204

3 PARVIN (PGM-71) CLASS (LARGE PATROL CRAFT) (PC)

Name	No	Builders	Commissioned
PARVIN (ex-PGM 103)	211	Peterson Builders Inc	1967
BAHRAM (ex-PGM 112)	212	Peterson Builders Inc	1969
NAHID (ex-PGM 122)	213	Peterson Builders Inc	1970

Displacement, tons: 98 standard; 148 full load
Dimensions, feet (metres): 101 x 21.3 x 8.3 (30.8 x 6.5 x 2.5)
Main machinery: 8 GM 6-71 diesels; 2,040 hp (1.52 MW) sustained; 2 shafts
Speed, knots: 22
Range, n miles: 1,140 at 17 kt
Complement: 20
Missiles: SSM, 2 launchers.
Guns: 1 Bofors 40 mm/60. 1 GAM BO1 20 mm. 2—12.7 mm MGs.
Depth charges: 4 racks (8 US Mk 6).
Radars: Surface search: I-band.
Sonars: SQS-17B; hull-mounted active attack; high frequency.

Comment: The heavier 40 mm gun is mounted aft and the 20 mm forward to compensate for the large SQS-17B sonar dome under the bows. Mousetrap A/S mortar removed. Two units have been modified with two missile launchers (of unknown type). Two GAM BO1 20 mm guns are carried in this variant.

PARVIN CLASS (SSM variant) (Scale 1 : 400), Ian Sturton / 1186563

PARVIN 1/2002, A Sharma / 0528306

3 KAYVAN (CAPE) CLASS (LARGE PATROL CRAFT) (PB)

KAYVAN 201 (ex-61)	TIRAN 202 (ex-63)	MAHAN 204 (ex-64)
--------------------	-------------------	-------------------

Displacement, tons: 98 standard, 148 full load
Dimensions, feet (metres): 95 x 20.2 x 6.6 (28.9 x 6.2 x 2)
Main machinery: 24 Cummins NYHMS-1200 diesels; 2,120 hp (1.58 MW); 2 shafts
Speed, knots: 21
Range, n miles: 2,324 at 8 kt
Complement: 15
Guns: 1 Bofors 40 mm/60. 2 USSR 23 mm/80 (twin) 2—12.7 mm MGs.

Comment: Three patrol craft originally built by the US Coast Guard, Curtis Bay, Maryland in the 1950s were withdrawn from Iranian service in approximately 1995. It is reported that they have been refitted and recommissioned. Details are as for the craft in 1994 but it is likely that machinery and armament may now be different.

MAHAN (old number) 6/1975, Iranian Navy / 1293457

10 US MK III CLASS (COASTAL PATROL CRAFT) (PB)

Displacement, tons: 41.6 full load
Dimensions, feet (metres): 65 x 18.1 x 6 (19.8 x 5.5 x 1.8)
Main machinery: 3 GM 8V-71TI diesels; 690 hp (515 kW) sustained; 3 shafts
Speed, knots: 30
Range, n miles: 500 at 28 kt
Complement: 8
Guns: 1—20 mm GAM BO1. 1—12.7 mm MG.
Radars: Surface search: RCA LN66, I band.

Comment: Twenty ordered from Marinette Marine Corporation, Wisconsin, USA, the first delivered in December 1975 and the last in December 1976. A further 50 were ordered in 1976 to be shipped out and completed in Iran. It is not known how many were finally assembled. Six lost in the Gulf War, others have been scrapped. These last 10 are based at Boushehr and Bandar Abbas. Continue to be active.

US Mk III 5/1999, 0080041

10 PASHE (MIG-G-1900) CLASS (COASTAL PATROL CRAFT) (PBF)

Displacement, tons: 30 full load
Dimensions, feet (metres): 64 x 13.8 x 3 (19.5 x 4.2 x 0.9)
Main machinery: 2 MWM TBD 234 V12 diesels; 1,646 hp(m) (1.21 MW); 2 shafts
Speed, knots: 36
Complement: 8
Guns: 2—23 mm/80 (twin).
Radars: Surface search, I-band.

Comment: Building in Iran to a modified US Mk II design. Numbers uncertain. Pasdaran craft.

MIG-G-1900 1992, Iranian Marine Industries / 0080047

20 GHAEM (MIG-S-1800) CLASS (COASTAL PATROL CRAFT) (PB)

Displacement, tons: 60 full load
Dimensions, feet (metres): 61.3 x 18.9 x 3.4 (18.7 x 5.8 x 1.1)
Main machinery: 2 MWM TBD 234 V12 diesels; 1,646 hp(m) (1.21 MW); 2 shafts
Speed, knots: 18
Complement: 10
Guns: 1 Oerlikon 20 mm 2—7.62 mm MGs
Radars: Surface search, -band.

Comment: Assembled in Iran as general purpose patrol craft. Numbers uncertain. Pasdaran craft.

GHAEM CLASS 1996, Joolae Marine Industries / 0506299

15 PEYKAAP I (IPS 16) CLASS (COASTAL PATROL CRAFT) (PTF)

Displacement, tons: 13.75 standard
 Dimensions, feet (metres): 53.5 x 12.3 x 2.3 (16.3 x 3.75 x 0.7)
 Main machinery: 2 diesels; 2,400 hp (1.79 MW); surface piercing propeller
 Speed, knots: 52
 Complement: 3
 Guns: 1—12.7 mm MG
 Torpedoes: 2 lightweight

Comment: Up to 15 of this class in service with the Pasdaran. Built in North Korea, six craft were reported to have been delivered on 8 December 2002 on the Iranian freighter *Iran Meead*. An apparently stealthy craft whose unusual armament of 324 mm lightweight torpedoes suggest a ship-disabling role.

PEYKAAP I CLASS 4/2006 / 116469b

10 TIR (IPS 18) CLASS (COASTAL PATROL CRAFT) (PTF)

Displacement, tons: 28.1 standard
 Dimensions, feet (metres): 69.4 x 18.9 x 2.8 (21.1 x 5.8 x 0.9)
 Main machinery: 3 diesels; 3,600 hp (2.7 MW)
 Speed, knots: 52
 Complement: 6
 Guns: 1—12.7 mm MG.
 Torpedoes: 2—533 mm (unknown type)

Comment: Up to ten of this class in service with the Pasdaran. Built in North Korea, two craft were reported to have been delivered on 8 December 2002 on the Iranian freighter *Iran Meead*. Anti-surface ship role.

TIR and BOGHAMMAR 1/2006, RAAF / 1167756

3 GAHJAE CLASS (SEMI-SUBMERSIBLE CRAFT) (PTF)

Displacement, tons: 7 approx
 Dimensions, feet (metres): 49.2 x 9.8 x 2.3 (15.0 x 3.0 x 0.7)
 Speed, knots: 50 approx
 Torpedoes: 2 lightweight

Comment: Originally reported as the Taedong-C semi-submersible torpedo boat, three of these craft were reported delivered from North Korea on 8 December 2002 on the Iranian freighter *Iran Meead*. The stealthy design appears to be based on the Peykaap class inshore patrol craft on which the dimensions, which are speculative, are based. The concept of operations is likely to include a high speed surface approach to a target before submerging to a depth of about 3 m to conduct the attack phase using a snort mast.

GAHJAE CLASS (artist's impression) 10/2005 / 1151765

25 PEYKAAP II (IPS 16 MOD) CLASS (COASTAL PATROL CRAFT) (PTG)

Displacement, tons: 13.75 approx
 Dimensions, feet (metres): 55.8 x 12.3 x 2.3 (17.0 x 3.75 x 0.7)
 Main machinery: 2 diesels, 2,400 hp (1.79 MW), surface piercing propeller
 Speed, knots: 52 approx
 Missiles: 2 FL-10 launchers

Comment: Slightly larger versions of the torpedo-armed Peykaap I class armed with FL-10 or C-701 (Kosar) or C-704 (Nasr) missiles. Approximately 25 of this class in service with the Pasdaran. Probably built in Iran as a development of the original North Korean design.

PEYKAAP II 6/2008* / 1335384

3 KAJAMI CLASS (SEMI-SUBMERSIBLE CRAFT) (PTF)

Displacement, tons: 30 approx
 Dimensions, feet (metres): 68.9 x 7 x 7 (21.0 x 7 x 7)
 Speed, knots: 50 approx

Comment: Originally reported as the Taedong-B high-speed infiltration craft, two of these craft were reported delivered from North Korea on 8 December 2002 on the Iranian freighter *Iran Meead*. Little is known about the design of the craft except that its concept of operations is likely to include a high speed surface approach to a target before submerging to a depth of about 3 m to conduct the attack phase using a snort mast.

KAJAMI 6/2006 / 1164691

KAJAMI (submerged approach) (artist's impression) 10/2005 / 1151765b

15 TARLAN CLASS (INSHORE PATROL CRAFT) (PTF)

Displacement, tons: 8.5 standard
 Dimensions, feet (metres): 39.0 x 10.2 x 2.1 (11.9 x 3.1 x 0.65)
 Main machinery: 2 diesels; 1,320 hp (985 kW); 2 surface piercing propellers
 Speed, knots: 50
 Complement: 2

Comment: A new class of indigenously built inshore attack craft first reported in 2005. Design features include an aluminium, catamaran hull, probably adapted from a commercial craft, and a 1.5 m high pedestal in the after part of the vessel. This might support a wire/laser guided weapon similar to an Anti-Tank Guided Missile (ATGM). Numbers of craft are uncertain but are likely to increase.

TARLAN CLASS (under construction) 6/2007 / 1166572

6 US MK II CLASS (COASTAL PATROL CRAFT) (PB)

Displacement, tons: 22.9 full load
 Dimensions, feet (metres): 49.9 x 15.1 x 4.3 (15.2 x 4.6 x 1.3)
 Main machinery: 2 GM 8V-71TI diesels, 480 hp (343 kW) sustained; 2 shafts
 Speed, knots: 28. Range, n miles: 750 at 26 kt
 Complement: 8
 Guns: 2—12.7 mm MGs
 Radars: Surface search, SPS-6; I-band

Comment: Twenty-six ordered from Peterson, USA in 1976-77. Six were for the Navy and the remainder for the Imperial Gendarmerie. All were built in association with Arvandan Maritime Corporation, Abadan. The six naval units operate in the Caspian Sea. Of the remaining 20, six were delivered complete and the others were only 65 per cent assembled on arrival in Iran. Some were lost when the Iraq Army captured Koramshahr. Others have been lost at sea. Numbers uncertain.

US MK II 3/1996 0080043

9 C 14 CLASS (PTGF)

611-614 +5

Displacement, tons: 17 standard
Dimensions, feet (metres): 44.8, 45.1 MRL x 15.7 x 2.3 (13.65; 13.75 x 4.8 x 0.7)
Main machinery: 2 diesels; 2,300 hp (1.7 MW), 2 surface piercing propellers
Speed, knots: 50
Complement: 5
Missiles: SSM 4 FL-10 (2 twin) launchers
Guns: 1—20 mm, 1—12.7 mm MG
Weapons control: Optronic director.
Radars: Surface search, I-band.

Comment: There are two known variants of this catamaran-hulled class, the prototype of which was reported delivered in late 2000 and commissioned in 2001. Five missile-armed craft are operated by the Pasdaran. The type of missile has not been confirmed but is probably FL-10. Four (611-614) slightly longer (13.75 m) craft are fitted with MRL on the bridge roof and are operated by the navy. Further craft of both variants are likely.

C 14 (missile variant) 2001, China State Shipbuilding Corporation / 0098378

C 14 (MRL variant) 3/2006 / 1164690

30 BOGHAMMAR CRAFT (PBF)

Displacement, tons: 6.4 full load
Dimensions, feet (metres): 41.2 x 8.6 x 2.3 (13 x 2.7 x 0.7)
Main machinery: 2 Seatek 6-4V-9 diesels; 1,160 hp (853 kW); 2 shafts
Speed, knots: 46. Range, n miles: 500 at 40 kt
Complement: 5/6
Guns: 3—12.7 mm MGs, 1 RPG-7 rocket launcher or 106 mm recoilless rifle, 1-12-barrelled 107 mm rocket launcher (MRL)
Radars: Surface search; I-band.

Comment: Ordered in 1983 and completed in 1984-85 for Customs Service. Total of 51 delivered. Used extensively by the Pasdaran. Maximum payload 450 kg. Speed is dependent on load carried. They can be transported by Amphibious Lift Ships and can operate from bases at Farsi, Sirri and Abu Musa Islands with a main base at Bandar Abbas. Re-engined with Seatek diesels from 1991. There are also a further 10-11 m craft with similar characteristics. Known as TORAGH boats and manned by the Pasdaran and the Navy. Numbers approximate.

20 ASHOORA I (MIG-G-0800) CLASS (INSHORE PATROL CRAFT) (PBF)

Displacement, tons: 1.3 full load
Dimensions, feet (metres): 22.3 x 7.4 x 1.2 (6.7 x 2.3 x 0.4)
Main machinery: 2 outboards; 240 hp (179 kW)
Speed, knots: 40+
Complement: 4
Guns: Various, but can include 1-12-barrelled 107 mm MRL or 1—12.7 mm MG

Comment: Boston Whaler type craft based on a Watercraft (UK) design. Numerous indigenously constructed GRP hulls. Numbers uncertain. Manned by the Pasdaran and the Navy.

ASHOORA I 6/1988 / 0509014

RIVER ROADSTEAD PATROL AND HOVERCRAFT (PBR)

Comment: Numerous craft used by the Revolutionary Guard include:

Type 2: Dimensions, feet (metres): 22.0 x 7.2 (6.7 x 2.2); single outboard engine; 1-12.7 mm MG
 Type 3: Dimensions, feet (metres): 16.4 x 5.2 (5.0 x 1.6); single outboard engine; small arms.
 Type 4: Dimensions, feet (metres): 13.1-26.2 x 7.9 (4-8 x 1.6); two outboard engines; small arms.
 Type 5: Dimensions, feet (metres): 24.6 x 9.2 (7.5 x 2.8); assault craft.
 Type 6: Dimensions, feet (metres): 30.9 x 11.8 (9.4 x 3.6); single outboard engine; 1-12.7 mm MG.
 Dhows: Dimensions, feet (metres): 77.1 x 20 (23.5 x 6.1); single diesel engine; mine rails.
 Yunus: Dimensions, feet (metres): 27.6 x 9.8 (8.4 x 3); speed 32 kt.
 Ashoora II: Dimensions, feet (metres): 26.6 x 7.9 (8.1 x 2.4); two outboards; speed 42 kt; 1-762 mm MG.
 Kuch: Dimensions, feet (metres): 29.5 x 9.8 (9.0 x 3.0); two outboards; stern dock for jet ski.
 Jet Skis: RPGs

TYPE 4 6/2007 / 1166575

KUCH (with stern dock) 6/2007 / 1166576

20 MURCE (MIG-G-0900) CLASS (INSHORE PATROL CRAFT) (PBI)

Displacement, tons: 3.5 full load
Dimensions, feet (metres): 30.2 x 9.2 x 1.6 (9.2 x 2.8 x 0.45)
Main machinery: 2 Volvo Penta diesels; 1,260 hp (940 kW)
Speed, knots: 30
Complement: 3
Guns: 3—12.7 mm MGs, 1 RPG-7 rocket launcher or 106 mm recoilless rifle, 1-12-barrelled 107 mm rocket launcher (MRL).
Radars: Surface search; I-band.

Comment: Built by MIG, the unarmed variant has been produced in relatively large numbers since the mid-1990s. This approximate number of armed variant is believed to be in Pasdaran or naval service.

MURCE CLASS 6/2000, MIG / 0126375

10 KASHDOM II CLASS (INSHORE PATROL CRAFT) (PBF)

Displacement, tons: 17.5 approx
Dimensions, feet (metres): 52.5 x 9.8 x 3.6 (16.0 x 3.0 x 1.1)
Main machinery: 2 diesels; 2,400 hp (1.8 MW); surface piercing propeller
Speed, knots: 50 approx
Complement: 5
Guns: 1—23 mm, 1—12.7 mm MG

Comment: Probably a development of the C 14 class design, the catamaran-hulled inshore patrol craft. A MRL launcher may also be mounted on the cabin roof. Numbers are approximate.

KASHDOM II (artist's impression) 6/2008 / 1335383

10 MK 13 PATROL CRAFT (PTGF)

Displacement, tons: To be announced
Dimensions, feet (metres): 45.9 x 7 x 7 (14 x 7 x 7)
Speed, knots: To be announced
Missiles: SSM: 2 FL-10 launchers
Torpedoes: 2–324 mm tubes.

Comment: Approximately four new monohull patrol craft, possibly built in China, delivered in 2006. Armed with both anti ship missiles and torpedoes.

MK 13 CRAFT 6/2007 / 11665/4

3 SEWART CLASS (INSHORE PATROL CRAFT) (PBR)

MAHNAVI-HAMRAZ MAHNAVI-TAHERI MAHNAVI-VAHEDI

Displacement, tons: 9.1 approx
Dimensions, feet (metres): 40.0 x 12.1 x 3.3 (12.2 x 3.7 x 1.0)
Main machinery: 2 GM diesels, 348 hp (260 kW); 2 shafts
Speed, knots: 31 approx
Complement: 6
Guns: 1–12.7 mm MG

Comment: Surviving craft of about nine craft acquired from the US for the then Coast Guard in about 1953. Previously reported as having been decommissioned. Some were transferred to Sudan in 1975. Possibly based in the Caspian Sea

1 MIL 55 CLASS (INSHORE PATROL CRAFT) (PBF)

Displacement, tons: 15.3
Dimensions, feet (metres): 53.9 x 9.3 x 2.75 (16.43 x 2.85 x 0.84)
Main machinery: 2 Isotta Fraschini diesels; 2,400 hp (1.8 MW); surface piercing propeller
Speed, knots: 72 approx
Complement: 5

Comment: Designed by FB design of Italy. Delivered in 2003. Kevlar monohull fast inshore patrol craft for maritime law enforcement tasks.

MIL 55 4/2006 / 1164694

2 MIL 40 CLASS (INSHORE PATROL CRAFT) (PTF)

Displacement, tons: 6 approx
Dimensions, feet (metres): 42.3 x 8.7 x 2.7 (12.9 x 2.64 x 0.82)
Main machinery: 2 Isotta Fraschini diesels; 1,320 hp (984 kW); surface piercing propeller
Speed, knots: 62
Complement: 3

Comment: Designed by FB design of Italy. Delivered in 2002. Kevlar monohull fast inshore patrol craft for maritime law enforcement tasks. The craft can be equipped with a centrally mounted machine-gun forward or with two laterally mounted guns.

MIL 40 4/2006 / 1164693

AMPHIBIOUS FORCES

Notes: (1) Commercial LSLs have been built at Bandar Abbas. These include two 1,151 grt ships, *Chavoush* launched in December 1995 and *Chalak* in June 1996. (2) There are an unknown number of small Wing-In-Ground (WIG) vehicles, possibly for operations in the Caspian Sea. (3) Two indigenously built LCTs were launched on 28 May 2006. Construction is reported to have started in 2005. The 49 x 11.6 m craft are capable of transporting 800 tons of equipment. (4) The launch of a 50 m landing craft, *Liyan 110*, was announced in 2008. While described as a commercial craft, the vessel has military applications. In addition, a number of other landing craft are reported to be under consideration.

WIG 6/2004 / 1044357

4 HENGAM CLASS (LSLH)

Name	No	Builders	Commissioned
HENGAM	511	Yarrow (Shipbuilders) Ltd, Clyde	12 Aug 1974
LARAK	512	Yarrow (Shipbuilders) Ltd, Clyde	12 Nov 1974
TONB	513	Yarrow (Shipbuilders) Ltd, Clyde	21 Feb 1985
LAVAN	514	Yarrow (Shipbuilders) Ltd, Clyde	16 Jan 1985

Displacement, tons: 2,540 full load
Dimensions, feet (metres): 305 x 49 x 7.3 (93 x 15 x 2.4)
Main machinery: 4 Paxman 12YJCM diesels (*Hengam, Larak*); 3,000 hp (2.24 MW) sustained; 2 shafts. 4 MTU 16V 652 TB81 diesels (*Tonb, Lavan*); 4,800 hp(m) (3.38 MW) sustained, 2 shafts
Speed, knots: 14.5
Range, n miles: 4,000+ at 12 kt
Complement: 80
Military lift: Up to 9 tanks depending on size; 600 tons cargo; 227 troops; 10 ton crane

Guns: 4 Bofors 40 mm/60 (*Hengam and Larak*). 8 USSR 23 mm/80 (4 twin) (*Tonb and Lavan*). 2–12.7 mm MGs.
 1 BM-21 multiple rocket launcher
Countermeasures: Decoys: 2 UK Mk 5 rocket flare launchers
Raders: Navigation: Racal Decca 1229, I-band.
 IFF SSR 1520 (*Hengam and Larak*).
 Tacan: URN 25
Helicopters: Can embark 1 Sikorsky MH-53D

Programmes: Named after islands in the Gulf. First two ordered 25 July 1972. Four more ordered 20 July 1977. The material for the last two ships of the second order had been ordered by Yarrows when the order was cancelled in early 1979. *Tonb* carried out trials in October 1984 followed by *Lavan* later in the year and both were released by the UK in 1985 as 'Hospital Ships'
Structure: Smaller than British *Sir Lancelot* design with no through tank deck. Rocket launcher mounted in the bows.
Operational: Two LCVPs and a number of small landing craft can be carried. Can act as Depot Ships for MCMV and small craft and have been used to ferry Pasdaran small craft around the Gulf. The ships may also be used as training platforms for swimmer delivery vehicles.

TONB 6/2004 / 1044354

TONB 10/2004 / 1151271

378 Iran/Amphibious forces – Auxiliaries

3 IRAN HORMUZ 24 CLASS (LST)

FARSI 24 SARDASHT 25 SAB SAHEL 26

Displacement, tons: 2,014 full load
Dimensions, feet (metres): 239.8 × 46.6 × 8.2 (73.1 × 14.2 × 2.5)
Main machinery: 2 Daihatsu 6DLM 22 diesels, 2,400 hp(m) (1.76 MW); 2 shafts
Speed, knots: 12
Complement: 30 plus 110 borths
Military lift: 9 tanks, 140 troops

Comment: Built at Inchon, South Korea in 1985–86 and as with the Iran Hormuz 21 class officially classed as Merchant Ships. Have been used to support Pasdaran activities

IRAN HORMUZ 24

5/1999 / 00300149

6 KARBALA (MIG-S-3700) CLASS (LSL)

FOUQUE 101 HORMUZ 505 - 507
 QESHM 504 FORUR 506 - 508

Displacement, tons: 276 full load
Dimensions, feet (metres): 121.4 × 26.2 × 4.9 (37 × 8 × 1.5)
Main machinery: 2 MWM TBD 234 V8 diesels, 879 hp(m) (646 kW); 2 shafts
Speed, knots: 10
Range, n miles: 400 at 10 kt
Complement: 8
Military lift: 140 tons of vehicles

Comment: *Fouque* assembled in Iran by Martyr Darvishi Marine, Bandar Abbas. Launched in June 1998. Others of the class are in commercial service and more can be taken over by the Navy if required. Two others for the Navy were launched in September 1985 and a further three have also been reported.

KARBALA CLASS

1994, Iranian Marine Industries / 0080049

2 IRAN HORMUZ 21 CLASS (LST)

HEJAZ 21 KARABALA 22

Displacement, tons: 1,280 full load
Measurement, tons: 750 dwt
Dimensions, feet (metres): 213.3 × 39.4 × 8.5 (65 × 12 × 2.6)
Main machinery: 2 MAN V12V-12 5/14 or 2 MWM TBD 604 V12 diesels; 1,460 hp(m) (1.07 MW); 2 shafts
Speed, knots: 9
Complement: 12
Military lift: 600 tons

Comment: Officially ordered for 'civilian use' and built by Ravenstein, Netherlands in 1984–85. Both are manned by the Pasdaran. A local version is assembled as the MIG-S-5000 for commercial use. One was launched in mid-1995 at Boushehr and a second in 1997.

6 WELLINGTON (BH.7) CLASS (HOVERCRAFT) (UCAC)

101–106

Displacement, tons: 53.8 full load
Dimensions, feet (metres): 78.3 × 45.6 × 5.6 (skirt) (23.9 × 13.9 × 1.7)
Main machinery: 1 RR Proteus 15 M/541 gas turbine; 4,250 hp (3.17 MW) sustained
Speed, knots: 70; 30 in Sea State 5 or more
Range, n miles: 620 at 66 kt
Guns: 2 Browning 12.7 mm MGs.
Radars: Surface search: Decca 1226; I-band.

Comment: First pair are British Hovercraft Corporation 7 Mk 4 commissioned in 1970 71 and the next four are Mk 5 craft commissioned in 1974 75 Mk 5 craft fitted for, but not with Standard missiles. Some refitted in UK in 1984. Can embark troops and vehicles or normal support cargoes. The Iranian Aircraft Manufacturing Industries (HESA) is reported to be able to maintain these craft in service.

WELLINGTON MK V

4/2006 / 1164h/8

1 IRAN CLASS (HOVERCRAFT) (UCAC)

Displacement, tons: 10 full load
Dimensions, feet (metres): 48.4 × 25.3 × 15.9 (14.8 × 7.7 × 4.8)
Main machinery: 1 gas turbine
Speed, knots: 60

Comment: The first of a new Iran class was completed in March 2000 and is probably based on the old SRN-6 class on which the approximate dimensions are based. Reports suggest a military lift of 2 tons and 26 troops.

IRAN CLASS

6/2004 / 1044355

AUXILIARIES

Notes: (1) There is also an inshore survey vessel *Abnegor*
 (2) Two 65 ton training vessels of Kialas-C-Qasem class are reported to have commissioned mid-2000. There may be further craft. No other details are known.

4 KANGAN CLASS (WATER TANKERS) (AWT)

KANGAN 411 TAHERI 412 SHAHID MARJANI AMIR

Displacement, tons: 12,000 full load
Measurement, tons: 9,430 dwt
Dimensions, feet (metres): 485.6 × 70.5 × 16.4 (148 × 21.5 × 5)
Main machinery: 1 MAN 7L52/55A diesel, 7,385 hp(m) (5.43 MW) sustained; 1 shaft
Speed, knots: 15
Complement: 14
Cargo capacity: 9,000 m³ of water
Guns: 2 USSR 23 mm/80 (twin). 2 – 12.7 mm MGs
Radars: Navigation: Decca 1229; I-band.

Comment: The first two were built in Mazagon Dock, Bombay in 1978 and 1979. The second pair to a slightly modified design was acquired in 1991–92 but may be civilian manned. Some of the largest water tankers afloat and can be used to supply remote coastal towns and islands. Accommodation is air conditioned. All have a 10 ton boom crane.

TAHERI

5/1989 / 0506013

12 HENDIJAN CLASS (TENDERS) (PBO)

HENDIJAN 1401	GAVATAR 1404	KALAT 1407	NAYBAND 1410
SIRIK 1402	MOOAM 1405	GENAVEH 1408	MACHAM
KONARAK 1403	BAHREGAN (ex-Geno) 1406	ROSTANI 1409	KORAMSHAHR

Displacement, tons: 460 full load
 Dimensions, feet (metres): 166.7 × 28.1 × 11.5 (50.8 × 8.6 × 3.5)
 Main machinery: 2 Mitsubishi S16MPTK diesels; 7,600 hp(m) (5.15 MW); 2 shafts
 Speed, knots: 25
 Complement: 15 plus 90 passengers
 Cargo capacity: 40 tons on deck; 95 m³ of liquid/solid cargo space
 Guns: 1—20 mm (sometimes fitted in patrol craft) 2—12.7 mm MGs.
 Radars: Navigation: Racal Decca or China RM 1070A; I-band.

Comment: First eight built by Damen, Netherlands 1988–91. Remainder built at Bandar Abbas under the MIG S-4700 programme. Last pair launched on 28 November 1995. Reports of three more being built may be caused by confusion with new corvettes. Various descriptions in the Iranian press as 'frigates' or 'patrol ships'; they are regularly used for coastal surveillance. One is used as a training ship. Pennant numbers in the 1400 series.

NAYBAND 6/2004 / 1044358

2 FLEET SUPPLY SHIPS (AORLH)

Name	No	Builders	Commissioned
BANDAR ABBAS	421	C Lühring Yard, Brake, West Germany	Apr 1974
BUSHEHR	422	C Lühring Yard, Brake, West Germany	Nov 1974

Displacement, tons: 4,673 full load
 Measurement, tons: 3,250 dwt; 3,186 gross
 Dimensions, feet (metres): 354.2 × 64.4 × 14.8 (108 × 16.6 × 4.5)
 Main machinery: 2 MAN 6L 62/55 diesels; 12,060 hp(m) (8.86 MW) sustained; 2 shafts
 Speed, knots: 20 Range, n miles: 3,500 at 16 kt
 Complement: 59
 Guns: 3 GAM-BO1 20 mm can be carried. 2—12.7 mm MGs.
 Radars: Navigation: 2 Decca 1226; I-band.
 Helicopters: 1 AB 212.

Comment: Bandar Abbas launched 11 August 1973, Boushehr launched 23 March 1974. Combined tankers and store-ships carrying victualling, armament and general stores. There are no RAS facilities. Telescopic hangar. Both carry 2 SA-7 portable SAM and 20 mm guns have replaced the former armament. Bandar Abbas damaged by an explosion in early 1989 but has been repaired.

BANDAR ABBAS 10/2004 / 1151276

1 SUPPORT VESSEL (AGG)

Name	No	Builders	Commissioned
HAMZAH (ex-Shahsavar)	802	NV Beela's Scheepwerven, Bolnes, Netherlands	1936

Displacement, tons: 530
 Dimensions, feet (metres): 176 × 25.3 × 10.5 (53.7 × 7.7 × 3.2)
 Main machinery: 2 diesels
 Missiles: 4 China C-802; active radar homing to 120 km (66 n miles) at 0.9 Mach; warhead 165 kg, sea skimmer
 Guns: 1—20 mm. 1—12.7 mm MG.

Comment: Former Imperial Yacht converted for support duties in the Caspian Sea. Armed with C-802 missiles.

HAMZAH 12/2006 / 1167429

6 DELVAR CLASS (SUPPORT SHIPS) (AEL/AKL/AWT)

DAYLAM (AWT) 424	CHARAK (AKL) 481
DELVAR (AEL) 471	CHIROO (AKL) 482
SIRJAN (AEL) 472	SOROO (AKL) 483

Measurement, tons: 890 gross, 765 dwt
 Dimensions, feet (metres): 210 × 34.4 × 10.9 (64 × 10.5 × 3.3)
 Main machinery: 2 MAN G6V 23.5/33ATL diesels; 1,560 hp(m) (1.15 MW); 2 shafts
 Speed, knots: 11
 Complement: 20
 Guns: 1 GAM-BO1 20 mm. 2 12.7 mm MGs.
 Radars: Navigation: Decca 1226; I-band

Comment: All built by Karachi SY in 1980–82. Delvar and Sirjan are ammunition ships. Dayer and Dilim water carriers and the other three are general cargo ships. The water carriers have only one crane (against two on the other types), and have rounded sterns (as opposed to transoms). Re-armed.

DAYLAM 5/2003, A Sharma / 0569202

CHARAK 10/1997 / 0012563

1 REPLENISHMENT SHIP (AORH)

Name	No	Builders	Commissioned
KHARG	431	Swan Hunter Ltd, Wallsend	5 Oct 1984

Displacement, tons: 11,064 light; 33,014 full load
 Measurement, tons: 9,367 dwt; 18,582 gross
 Dimensions, feet (metres): 679 × 86.9 × 30 (207.2 × 26.5 × 9.2)
 Main machinery: 2 Babcock & Wilcox boilers; 2 Westinghouse turbines; 26,870 hp (19.75 MW); 1 shaft
 Speed, knots: 21.5
 Complement: 248
 Guns: 1 OTO Melara 76 mm/62 compact. 4 USSR 23 mm/80 (2 twin). 2—12.7 mm MGs.
 Radars: Navigation: Decca 1229; I-band
 Tacan: URN 20.
 Helicopters: 3 Sea Kings (twin hangar).

Comment: Ordered October 1974. Laid down 27 January 1976. Launched 3 February 1977. Ship handed over to Iranian crew on 25 April 1980 but remained in UK. In 1983 Iranian Government requested this ship's transfer. The UK Government delayed approval until January 1984. On 10 July 1984 began refit at Tyne Ship Repairers. Trials began 4 September 1984 and ship was then delivered without guns which were subsequently fitted. A design incorporating some of the features of the British OI class but carrying ammunition and dry stores in addition to fuel. Inmarsat fitted.

Iraq

Country Overview

The Republic of Iraq was proclaimed in 1958 following a coup d'état. With an area of 188,754 square miles, it is situated in the Middle East and is bordered to the north by Turkey, to the east by Iran (with which it was at war 1980–88), to the west by Jordan and Syria and to the south by Saudi Arabia (with which it jointly administers the Neutral Zone) and Kuwait (which it invaded and occupied 1990–91 until expelled in the Gulf War 1991). It has a 31 n mile coastline with the Gulf. Baghdad is the capital and largest city. There are two ports on the Khawr Abd Allah Channel at Umm Qasr and Khawr al Zubayr. Territorial Seas (12 n miles) are claimed. An EEZ has not been claimed.

In the wake of the US-led occupation in March–April 2003, Iraq remained under coalition control until 30 June 2004 when full authority was handed over to an Iraqi Interim Government. Following elections on 30 January 2005, a new constitution was ratified by public referendum on 15 October 2005. This was followed by a general election on 15 December 2005 to elect a permanent Iraqi National Assembly. All naval coastal defence units, surface ships and aircraft were destroyed or disabled during the war and are unlikely to be resurrected. An oiler (*Agnadeen*) at Alexandria could be reclaimed but this is unlikely to be a high priority. The Iraqi Coastal Defence Force (ICDF), now known as the Iraqi Navy, was formally established at Umm Qasr on 30 September 2004. Key tasks include defence of the Khawr al Amaya (KAAOT) and Al Basra (ABOT) offshore oil terminals.

Headquarters Appointments

Commander Iraqi Navy:
Commodore Muhammed Jawad

Bases

Al Basra (Navy HQ), Khor Az Zubayr, Umm Qasr.

Personnel

2009 1,166 (176 officers) (including 400 naval infantry)

PATROL FORCES

Notes: (1) The force structure is to be augmented by the procurement of two Offshore Support Vessels (OSVs) and 15 patrol craft (PB). The OSVs, to be built to the ISD Malaysia P 570 design, are to be capable of acting as mother-ships for the PBs operating in the vicinity of offshore oil platforms. The PBs to be built to the ISD P 340 design, are to be capable of remaining at sea for 48 h.

(2) Plans to re-activate the two Assad-class corvettes, under care and maintenance at La Spezia since 1990, have been cancelled and the ships are likely to be sold or scrapped.

5 PREDATOR CLASS (INSHORE PATROL CRAFT) (PB)

P 101–105

Displacement, tons: To be announced
Dimensions, feet (metres): 88.9 × 9.2 × 5.9 (27.1 × 2.8 × 1.8)
Main machinery: 2 MTU 12V 396 TE742; 4,025 hp (3 MW)
Speed, knots: 32
Complement: 6
Guns: 1–7.62 mm MG

Comment: Built at Wuhan by Nanhua High-Speed Engineering Company and originally acquired in 2002. Maintained in dry-dock at Jebel Ali, UAE, until the first two were commissioned on 4 April 2004. Three further craft followed in May 2004. Acquisition and refit costs funded by the US. The craft were used initially for training of Iraqi personnel but are used increasingly for patrol duties as the navy develops. Based at Umm Qasr

8/2008*, Shaun Jones / 1335385

2 + 2 DICIOTTI CLASS (OFFSHORE PATROL VESSELS) (PBO)

Displacement, tons: 391
Dimensions, feet (metres): 175.2 × 26.6 × 6.6 (53.4 × 8.1 × 2.0)
Main machinery: 2 Isotta Fraschini V1716 T2 MSD diesels, 6,335 hp (4.7 MW); 2 shafts
Speed, knots: 23. **Range, n miles:** 2,100 at 16 kt
Complement: 38 (4 officers)
Guns: 1 OTO Melara 30 mm. 2–12.7 mm MGs. 4–7.62 mm MGs.
Radars: Surface search; E/F-band
Navigation: I-band

Comment: Contract signed with Fincantieri, Muggiano in September 2006 for the construction of four vessels for delivery June 2009–March 2010. Two to be built at Riva Trigoso and two at Muggiano. The steel-hulled design is based on Diciotti (mod Saettia) class vessels in service with the Italian Coast Guard and is generally similar to the ship supplied to Malta in 2005 but with a stern ramp for launching an 11 m RIB. The contract included a training and logistic support package and some additional ex-Italian Coast Guard craft.

DICIOTTI CLASS (Maltese colours)

10/2005, Air Squadron, AFM / 1133090

2 TYPE 200 (INSHORE PATROL CRAFT) (PBO)

– P 701 (ex-CP 247)

– P 702 (ex-CP 250)

Displacement, tons: 22
Dimensions, feet (metres): 49.2 × 14.4 × 5.2 (15.0 × 4.4 × 1.6)
Main machinery: 2 Isotta Fraschini D36-SS-6V diesels; 1,380 hp (1.0 MW); 2 shafts
Speed, knots: 31
Range, n miles: 350 at 31 kt
Complement: 7
Radars: Navigation; I-band.

Comment: Former Italian Coast Guard craft built by Navatecnica Anzio, 1977–81. Transferred to Iraq in 2006 as part of the contract to procure four Diciotti-class offshore patrol craft

4 TYPE 2010 (INSHORE CRAFT) (PBR)

– P 203 (ex-CP 2036)

– P 204 (ex-CP 2037)

– P 205 (ex-CP 2067)

– P 206 (ex-CP 2069)

Displacement, tons: 11
Dimensions, feet (metres): 41.0 × 11.8 × 4.3 (12.5 × 3.6 × 1.3)
Main machinery: 2 AIFO 8362SRM27 diesels, 550 hp (398 kW); 2 shafts
Speed, knots: 25
Range, n miles: 600 at 12 kt
Complement: 4
Radars: Navigation; I-band.

Comment: Former Italian Coast Guard craft built 1973–85 GRP construction. Transferred to Iraq in 2006 as part of the contract to procure four Diciotti-class offshore patrol craft. Others of the class have been transferred to Albania

26 DEFENDER CLASS (RESPONSE BOATS) (PBF)

Displacement, tons: 2.7 full load
Dimensions, feet (metres): 25.0 x 8.5 x 8.8 (7.6 x 2.6 x 2.7)
Main machinery: 2 Honda outboard motors; 450 hp (335 kW)
Speed, knots: 46
Range, n miles: 175 at 35 kt
Complement: 4
Guns: 1 12.7 mm M.G.
Radars: To be announced.

Comment: High-speed inshore patrol craft of aluminium construction and foam collar built by SAFE Boats International, Port Orchard, Washington. Acquired from the US government and delivered by early 2009. The new patrol craft are to be used for patrol of the Khor Abd Allah waterway.

DEFENDER CLASS (USCG colours)

10/2003, Frank Findler / 0572752

24 SEASPRAY ASSAULT BOATS (PB)

F 1-F 24

Displacement, tons: To be announced
Dimensions, feet (metres): 31.2 x 11.1 x 1.6 (9.5 x 3.4 x 0.5)
Main machinery: 2 Mercury outboards, 500 hp (375 kW)
Speed, knots: 50
Range, n miles: 450 at 17 kt
Complement: 5
Radars: Navigation: I-band.

Comment: 24 craft donated by the UAE government in 2005. Designed by Sea Spray Aluminium Boats.

ASSAULT BOAT

9/2008*, Jane's / Tim Fish / 1294/48

Ireland**AN SEIRBHIS CHABHLAIGH****Country Overview**

The Republic of Ireland comprises about five sixths of the island of Ireland. Situated west of Great Britain, the country consists of the provinces of Leinster, Munster, Connaught and three counties of the province of Ulster. The remaining six counties of Ulster form Northern Ireland, a constituent part of the United Kingdom. With an area of 27,136 square miles, the country has a 783 n mile coastline with the Atlantic Ocean and Irish Sea. Dublin is the capital, largest city and principal port. There is another major port at Cork. Territorial waters (12 n miles) are claimed. A 200 n mile Fishery zone has also been claimed.

Headquarters Appointments

Flag Officer Commanding Naval Service:
Commodore F Lynch

Bases

Haulbowline Island, Cork Harbour-Naval HQ. Base and Dockyard

Personnel

(a) 2009: 1,144 (189 officers)
 (b) Voluntary service
 (c) Reserves: 400 (one unit in each of the following cities: Dublin, Waterford, Cork and Limerick)

Fishery Protection

In late 2004 and early 2005, all ships were fitted with the new Lirguard system. This system incorporates the

previously separate functions of the database, GIS database display, Vessel Monitoring System (VMS) and legislation browser. This system will be updated several times daily by satellite link from the Fisheries Monitoring Centre (FMC) at Haulbowline. These will provide a near real-time display and analysis tool of fishing activity to allow more intelligent and efficient use of the ships in the Fishery Protection role. Research is also continuing into the incorporation of VMS data with data from Earth Observation (EO) technology.

Prefix to Ships' Names

LÉ (Long Éirennach = Irish Ship)

PATROL FORCES

Notes: The Naval Service Replacement Programme is for the replacement of all eight patrol ships by 2025. The P 21 class is the first to be replaced by 2012. A Request for Proposals (RfP) for one 130-140 m Extended Patrol Vessel (EPV) and two 80-90 m Offshore Patrol Vessels (OPV) was issued on 24 August 2007. The EPV is to have a flight deck and to be capable of carrying troops, vehicles and equipment while the OPVs are required for standard EEZ roles. The RfP contains an option for a second EPV and a third OPV, these may be considered as replacements for *Eithne* and/or for the *Peacock* class in about 2015. The *Roisin* class is expected to be replaced in about 2025. A contract for the first three vessels is expected in 2009 with a view to delivery by 2012.

1 EITHNE CLASS (PSOH)

Name	No	Builders	Laid down	Launched	Commissioned
EITHNE	P 31	Verolme, Cork	15 Dec 1982	19 Dec 1983	7 Dec 1984

Displacement, tons: 1,760 standard; 1,910 full load
Dimensions, feet (metres): 285 x 39.4 x 14.1
 (80.8 x 12 x 4.3)
Main machinery: 2 Ruston 12RKC diesels; 6,800 hp
 (5.07 MW) sustained; 2 shafts, cp props
Speed, knots: 20+; 19 normal
Range, n miles: 7,000 at 15 kt
Complement: 73 (10 officers)

Guns: 1 Bofors 57 mm/70 Mk 1; 200 rds/min to 17 km
 (9.3 n miles); weight of shell 2.4 kg.
 2 Rheinmetall 20 mm/20. 2-7.62 mm M.Gs.
 2 Wallop 57 mm launchers for illuminants.

Weapons control: Signaal LIOD director. 2 Signaal optical sights.

Radars: Air/surface search: Signaal DA05 Mk 4, E/F-band
 Surface search: Kelvin Hughes; E/F-band
 Navigation: 2 Kelvin Hughes; 6000A; I-band
 Tacan: MEL RRB transponder

Helicopters: Not routinely carried.

Programmes: Ordered 23 April 1982 from Verolme, Cork, this was the last ship to be built at this yard.

Structure: Fitted with retractable stabilisers. Closed circuit TV for flight deck operations. Satellite navigation and communications. CTD tactical displays.

Operational: Helicopter no longer operational. Two Delta 75 m inboard diesel RIBs fitted in addition to two 5.4 m RIBs in 2003. Long refit (SLEP) in 1998/99.

Navigation: Kelvin Hughes, I-band

NIAMH

9/2008, B Prézeln / 1335/91

Programmes: Contract for first ship signed on 16 December 1997 with 65 per cent of EU funding. Option on a second of class taken up on 6 April 2000.

Operational: Designated Large Patrol Vessel, the design is a modification of the Mauritius ship *Vigilant* but without

the hangar or flight deck. Two Delta 6.5 m and one Avon 5.4 m RIBs are carried. CTD tactical displays.

3 P 21 CLASS (OFFSHORE PATROL VESSELS) (PSO)

Name	No	Builders	Launched	Commissioned
EMER	P 21	Verolme, Cork	4 Aug 1977	16 Jan 1978
AOIFE	P 22	Verolme, Cork	12 Apr 1979	29 Nov 1979
AISLING	P 23	Verolme, Cork	3 Oct 1979	21 May 1980

Displacement, tons: 1,019.5
Dimensions, feet (metres): 213.7 × 34.4 × 14 (65.2 × 10.5 × 4.4)
Main machinery: 2 SEMT-Pielstick 6 PA6 L 280 diesels; 4,800 hp (3.53 MW); 1 shaft; bow thruster (*Aoife* and *Aisling*)
Speed, knots: 17. **Range, n miles:** 4,000 at 17 kt; 6,750 at 12 kt
Complement: 47 (6 officers)

Guns: 1 Bofors 40 mm/L 70; 300 rds/min to 12 km (8.5 n miles); weight of shell 0.88 kg
 2 GAM-B01 20 mm; 900 rds/min to 2 km.
 2–12.7 mm MGs, 2–7.62 mm MGs
Radars: Surface search: Kelvin Hughes I-band
Navigation: Kelvin Hughes Nucleus 6000A; I-band.

Modernisation: New search radars were fitted in 1994/95. CTD tactical display fitted
Structure: Stabilisers fitted. *Aoife* and *Aisling* are equipped with a bow thruster. Inmarsat SATCOM fitted.

Operational: *Emer* refitted in 1995, *Aoife* in 1996/97 and *Aisling* in 1997/98. Sonars have been removed

AISLING

6/2008, Frank Findler, 1335/90

AISLING

6/2008, Martin Mokrus / 1335789

2 P 41 PEACOCK CLASS (COASTAL PATROL VESSELS) (PSO)

Name	No	Builders	Commissioned
ORLA (ex-Swift)	P 41	Hall Russell, Aberdeen	3 May 1985
CIARA (ex-Swallow)	P 42	Hall Russell, Aberdeen	17 Oct 1984

Displacement, tons: 712 full load
Dimensions, feet (metres): 204.1 × 32.8 × 8.9 (62.6 × 10 × 2.7)
Main machinery: 2 Crossley SEMT-Pielstick 18 PA6 V 280 diesels; 14,400 hp(m) (10.58 MW) sustained; 2 shafts; auxiliary drive; Schottel prop; 191 hp(m) (133 kW)
Speed, knots: 25. **Range, n miles:** 2,500 at 17 kt
Complement: 39 (5 officers)

Guns: 1–3 in (76 mm)/62 OTO Melara compact; 85 rds/min to 16 km (8.6 n miles); weight of shell 6 kg
 2–12.7 mm MGs, 4–7.62 mm MGs.

Weapons control: Radamec 1500 optronic director (for 76 mm)
Radars: Surface search: Kelvin Hughes; I-band
Navigation: Kelvin Hughes Nucleus 5000A/6000A, I-band.

Programmes: *Orla* launched 11 September 1984 and *Ciara* 31 March 1984. Both served in Hong Kong from mid-1985 until early 1988. Acquired from UK and commissioned 21 November 1988. Others of the class acquired by the Philippines in 1997

Modernisation: New radars fitted in 1993. CTD tactical display fitted.
Structure: Have loiter drive. Displacement increased after building by the addition of more electronic equipment.

CIARA

6/2005, D Jones, Irish Navy 1133505

LAND-BASED MARITIME AIRCRAFT

Notes: Five civilian operated Sikorsky S-61 helicopters provide long-range SAR services. They are based at Dublin, Shannon, Waterford and Sligo.

Numbers/Type: 2 Casa CN-235 MP Persuader.

Operational speed: 210 kt (384 km/h)

Service ceiling: 24,000 ft (7,315 m).

Range: 2,000 n miles (3,218 km).

Role/Weapon systems: EEZ surveillance. First one delivered in June 1992 but returned to Spain in 1995. Two more delivered in December 1994. Sensors: Search radar Bendix APS 604(V)5, FLIR. Weapons: Unarmed

CN-235 MP

7/2003, Paul Jackson 0568896

AUXILIARIES

Notes: (1) In addition there are a number of mostly civilian manned auxiliaries including: *Seabhac* a small tug acquired in 1983; *Fainleog*, *David F* (built in 1962) and *Fiach Dubh* passenger craft, the last two taken over after lease in 1988 and the first in 1983; *Taite* a Dufour 35 ft sail training yacht bought in 1979 and an elderly training yacht *Creidne*. (2) *Granuaile* is an 80 m lighthouse tender with a helicopter flight deck forward operated by the Commissioners of Irish Lights. Launched on 14 August 1999 this ship replaced a previous vessel of the same name on 23 March 2000.

GRANUAILE

3/2000, Commissioners of Irish Lights / 0093593

Israel

HEYL HAYAM

Country Overview

Established in 1948, The State of Israel is situated on the eastern shore of the Mediterranean Sea and has borders to the north with Lebanon, to the north-east with Syria, to the east with Jordan and to the south-west with Egypt. It has coastlines with the Mediterranean (142 n miles) and with the Gulf of Aqaba (5 n miles) in the northern Red Sea. A land area of 8,463 square miles includes East Jerusalem and other territory (including Gaza Strip, the West Bank region of Jordan, the Golan Heights area of south-western Syria) annexed in 1967. Jerusalem is the largest city but, although claimed as the capital, is not so recognised by the United Nations. Many nations maintain embassies at Tel Aviv. Haifa is the principal port. Territorial seas (12 n miles) are claimed but an EEZ is not claimed.

Headquarters Appointments

Commander-in-Chief
Vice Admiral Eli Marom
Chief of Naval Staff:
Rear Admiral Noam Feig
Head of Naval Operations Command:
Rear Admiral Yochay Ben Yosef

General

Less than 5 per cent of Israeli defence budget is allocated to the Navy.

Personnel

2009
(a) 9,500 (880 officers) of whom 2,500 are conscripts.
Includes a Naval Commando of 300
(b) 3 years' national service for Jews and Druzes

Notes: An additional 5,000 Reserves available on mobilisation.

Haifa, Ashdod, Eilat
(The repair base at Eilat has a synchrolift)

Coast Defence

There are ten integrated coastal radar and electro-optical surveillance stations. These are to be converted to an unmanned, remote-controlled system employing a wideband communications network.

Prefix to Ships' Names

INS (Israeli Naval Ship)

SUBMARINES

3 + 2 DOLPHIN (TYPE 800) CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
DOLPHIN	–	Howaldtswerke/Thyssen Nordseewerke	7 Oct 1994	12 Apr 1996	27 July 1999
LEVIATHAN	–	Howaldtswerke/Thyssen Nordseewerke	13 Apr 1995	25 Apr 1997	15 Nov 1999
TEKUMA	–	Howaldtswerke/Thyssen Nordseewerke	12 Dec 1996	26 June 1998	25 July 2000
–	–	Thyssenkrupp Marine Systems	2007	2009	2012
–	–	Thyssenkrupp Marine Systems	2008	2010	2013

Displacement, tons: 1,640 surfaced; 1,900 dived
Dimensions, feet (metres): 188 × 22.3 × 20.3
(57.3 × 6.8 × 6.2)

Main machinery: 3 MTU 16V 396 SE 84 diesels; 4,243 hp(m)
(3.12 MW) sustained; 3 alternators; 2.91 MW; 1 Siemens motor; 3,875 hp(m) (2.85 MW) sustained; 1 shaft

Speed, knots: 20 dived; 11 snorkeling

Range, n miles: 8,000 at 8 kt surfaced, 420 at 8 kt dived

Complement: 30 (6 officers)

Missiles: SSM: Sub Harpoon; UGM-84C; active radar or GPS homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg. SAM: Fitted for Triton anti-helicopter system.

Torpedoes: 4 – 25.6 in (650 mm) and 6 – 21 in (533 mm) bow tubes. STN Atlas DM2A4 Seehecht; wire-guided active homing to 13 km (7 n miles) at 35 kt; passive homing to 28 km (15 n miles) at 23 kt; warhead 260 kg Total of 16 torpedoes and 5 SSMs. The four 650 mm tubes may be for SDVs, but could carry torpedoes if liners are fitted

Mines: In lieu of torpedoes.

Countermeasures: ESM: Elbit Timnex 4CH(V)2; intercept.

Weapons control: STN/Atlas Elektronik ISUS 90-1 TCS.

Radars: Surface search: Eita; I-band.

Sonars: Atlas Elektronik CSU 90; hull-mounted; passive/active search and attack.

Atlas Elektronik PRS-3; passive ranging

FAS-3; flank array; passive search

Programmes: In mid-1988 Ingalls Shipbuilding Division of Litton Corporation was chosen as the prime contractor for two IKL-designed Dolphin class submarines to be built in West Germany with FMS funds by HDW in conjunction with Thyssen Nordseewerke. Funds approved in July 1989 with an effective contract date of January 1990 but the project was cancelled in November 1990 due to pressures on defence funds. After the Gulf War in April 1991 the contract was resurrected, this time with German funding for two submarines with an option on a third taken up in July 1994. A contract for the construction of two further modified Dolphin class submarines was signed on 6 July 2006. The new submarines are to be about 10 m longer in order to incorporate air-independent propulsion. The boats are to be built at HDW and TNSW. Israel is to fund two thirds of the budget while the German government is

DOLPHIN

6/1999, Michael Nitz / 0080958

to fund the remaining third. Construction of the first boat is reported to have started in 2007 to meet a delivery date of 2012 but the construction timetable is speculative

Modernisation: Installation of air-independent propulsion in the first three boats is under consideration.

Structure: Diving depth, 350 m (1,150 ft). Similar to German Type 212 in design but with a 'wet and dry' compartment for underwater swimmers. Two Kollmorgen periscopes. Probably fitted for Triton anti-helicopter SAM system

Operational: Endurance, 30 days. Used for interdiction, surveillance and special boat operations. Development of

a submarine-launched cruise missile would complete the final part of a triad of nuclear deterrents. However, while Israel probably has the expertise and technology to deploy SLCM, little information exists to confirm or deny such a programme. Adaptation of the indigenous Delilah and Popeye groups of missiles is a possible option although encapsulation of the missile would pose a significant challenge. Painted blue/green to aid concealment in the eastern Mediterranean. Some other NT 37E torpedoes are embarked until full Seehecht outfits are available. The boats form Flotilla 7 based at Haifa

LEVIATHAN

4/2006, M Declerck / 1158549

jfs.janes.com

CORVETTES

Notes: A Request for Information was issued in September 2003 for the acquisition of up to three multimission corvettes. This programme was temporarily superseded in 2004 by a proposal to procure a 13,000 ton amphibious ship, but re-emerged as the priority due to budget realities. Plans for a SAAR 5+ design have been overtaken

by ambitions to join the US Navy's Littoral Combat Ship (LCS) programme. A two-year feasibility study to establish whether the LCS seaframe could serve as a basis for future Israeli surface combatants was launched in December 2005. This was followed by a Combat System Configuration phase which was launched in

September 2007. This is to examine the compatibility of Israeli-made combat systems with the LCS platform. The main focus is the requirement for a multifunction radar to integrate with the combat management system in addition to SM-2 or Barak 8 area missiles and Barak point defence system.

3 EILAT (SAAR 5) CLASS (FSGHM)

Name	No	Builders	Laid down	Launched	Commissioned
EILAT	501	Ingalls, Pascagoula	24 Feb 1992	9 Feb 1993	24 May 1994
LAHAV	502	Ingalls, Pascagoula	25 Sep 1992	20 Aug 1993	23 Sep 1994
HANIT	503	Ingalls, Pascagoula	5 Apr 1993	4 Mar 1994	7 Feb 1996

Displacement, tons: 1,075 standard; 1,295 full load

Dimensions, feet (metres): 278.9 x 39.0 x 10.5
(85.0 x 11.9 x 3.2)

Main machinery: CODOG; 1 GE LM 2500 gas turbine, 30,000 hp (22.38 MW) sustained; 2 MTU 12V 1163 TB82 diesels; 6,600 hp (m) (4.86 MW) sustained; 2 shafts, Kamewa cp props

Speed, knots: 33 gas; 20 diesels

Range, n miles: 3,500 at 17 kt

Complement: 64 (16 officers) plus 10 (4 officers) aircrew

Missiles: SSM: 8 McDonnell Douglas Harpoon (2 quad) launchers; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.

SAM: 2 Israeli Industries Barak I (vertical launch) 2 x 32 cells; command line of sight radar or optical guidance to 10 km (5.5 n miles) at 2 Mach; warhead 22 kg (see Operational).

Guns: OTO Melara 3 in (76 mm) M62 compact; 85 rds/min to 16 km (8.7 n miles); weight of shell 6 kg.

The main gun is interchangeable with a Bofors 57 mm gun or Vulcan Phalanx CIWS.

2 Sea Vulcan 20 mm CIWS; range 1 km.

Torpedoes: 6 - 324 mm Mk 32 (2 triple) tubes; Honeywell Mk 46; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg. Mounted in the superstructure.

Countermeasures: Decoys, 3 Elbit/Deseaver 72-barrelled chaff and IR launchers; Rafael ATC 1 towed torpedo decoy

ESM: Elisra NS 9003; intercept. Tadiran NATACS

ECM: 2 Rafael 1010; Elisra NS 9005; jammers.

Combat data systems: Elbit NTCCS using Elta EL/S-9000 computers. Reshet datalink.

Weapons control: 2 Elop MSIS optronic directors.

Radars: Air search: Elta EL/M-2218S; E/F-band

EILAT

(Scale 1 : 900), Ian Sturton / 1151070

Surface search: Cardion SPS-55; I-band.

Navigation: I-band.

Fire control: 3 Elta EL/M-2221 GM STGR; I/K/J-band

Sonars: EDO Type 796 Mod 1; hull-mounted; search and attack; medium frequency. Rafael towed array (fitted for)

Helicopters: 1 Dauphin SA 366G or Sea Panther can be carried.

Programmes: A design by John J McMullen Associates Inc for Israel Shipyards, Haifa in conjunction with Ingalls Shipbuilding Division of Litton Corporation which was authorised to act as main contractor using FMS funding. Contract awarded 8 February 1989. All delivered to Israel for combat system installation, first two completed in 1996 and last one in mid-1997. Major refits of these ships are reported to be under consideration. The option for a fourth SAAR 5 was not taken up and plans to procure a further five new ships (SAAR 5+) under similar FMS

funding are now unlikely to be taken forward in view of the requirement for multimission ships.

Structure: Steel hull and aluminum superstructure. Stealth features including resilient mounts for main machinery, funnel exhaust cooling, Radar Absorbent Material (RAM), NBC washdown and Prairie Masker Bubbler system. A secondary operations room is fitted aft. There are some flag capabilities. Plans to carry Gabriel SSMs have been scrapped because of topweight problems. The planned third MSIS director has not yet been seen on the platform aft of the air search radar.

Operational: Endurance, 20 days. The main role is to counter threats in shipping routes. ICS-2 integrated communications system. The position of the satellite aerial suggests that the SAM after VLS launchers are not used. Barak has still to be installed, because of lack of funds. For the same reason the normal Harpoon load may be reduced to four. Hanit damaged by missile attack off Lebanon on 14 July 2006. Repairs were completed on 6 August 2006. All three ships allocated to Flotilla 3.

EILAT

4/2006, M Declerck / 1158548

HANIT

12/2007, M Declerck / 0533767

SHIPBORNE AIRCRAFT

Numbers/Type: 7 Eurocopter AS 565SA Sea Panther.
Operational speed: 165 kt (305 km/h).
Service ceiling: 18,700 ft (5,700 m).
Range: 483 n miles (895 km).
Role/Weapon systems: Built by American Eurocopter in Texas. Three delivered by October 1998 with one more in 1999. Roles include reconnaissance, targetting and SAR. Sensors: Telephonics search radar; Elop MSIS for OTH. Weapons: Unarmed.

AS 565SB 6/2002, Adolfo Ortega Gil / 0567461

LAND-BASED MARITIME AIRCRAFT

Notes: (1) Army helicopters can be used including Cobras and Apaches.
 (2) Two C-130 aircraft used for maritime surveillance. There are also two EC-130 Elint aircraft.

Numbers/Type: 3 IAI 1124N Sea Scan.
Operational speed: 471 kt (873 km/h).
Service ceiling: 45,000 ft (13,725 m).
Range: 2,500 n miles (4,633 km).
Role/Weapon systems: Acquired in 1977. Air Force manned. Coastal surveillance tasks with long endurance, used for intelligence gathering. Sensors: Elta EL/M-2022 radar, IFF, MAD, Sonobuoys, and various EW systems of IAI manufacture.

SEA SCAN 6/1994, R A Cooper / 0503199

PATROL FORCES

Notes: (1) There are about 12 'Firefish' type fast attack boats in service with Special Forces.
 (2) A 50 ft (15.2 m) shallow draft Stealth craft was built in a Vancouver Shipyard and delivered in late 1998. A second, an Alligator craft, was completed by Oregon Iron Works, Portland in 1999 and painted dark green. Two diesels giving 35 kt and a Rafael optronic surveillance system are included. Crew of five.

8 + 2 SUPER DVORA MK III CLASS (PTFM)

830-835 +1
Displacement, tons: 72 full load
Dimensions, feet (metres): 89.9 x 18.7 x 3.6 (27.4 x 5.7 x 1.1)
Main machinery: 2 MTU 12V 4000 diesels, 2 Ameson ASD15 surface drives (830-835), 2 Rolls Royce Kamewa 63S11 waterjets (batch 2)
Speed, knots: 45
Range, n miles: 1,000 at cruising speed
Complement: 5
Guns: 1 Bushmaster 25 mm M242 chain gun. 1–20 mm. 2–7.62 mm MGs.
Weapons control: ELOP optronic director.
Radars: Surface search: I-band.

Comment: An order for six craft was made with IAI-Ramta on 13 January 2002. The first was delivered in July 2004 and entered service in November 2004. The second and third were delivered on 13 July 2005 and a further three on 18 September 2006. An option for another four craft was exercised in 2005. The first of these was delivered in November 2007 and the remainder are to enter service by late 2009.

SUPER DVORA III 4/2006, IAI RAMTA / 1130539

8 HETZ (SAAR 4.5) CLASS (FAST ATTACK CRAFT—MISSILE) (PGGM)

Name	Builders	Launched	Commissioned
ROMAT	Israel Shipyards, Haifa	30 Oct 1981	Oct 1981
KESHET	Israel Shipyards, Haifa	Oct 1982	Nov 1982
HETZ (ex-Nirit)	Israel Shipyards, Haifa	Oct 1990	Feb 1991
KIDON	Israel Shipyards, Haifa	1993	7 Feb 1994
TARSHISH	Israel Shipyards, Haifa	1995	June 1995
YAFFO	Israel Shipyards, Haifa	1998	1 July 1998
HEREV	Israel Shipyards, Haifa	2002	June 2002
SUFA	Israel Shipyards, Haifa	2002	Aug 2002

Displacement, tons: 488 full load
Dimensions, feet (metres): 202.4; 190.3 (Romat, Keshet, Hetz) x 24.9 x 8.2 (58.0, 61.7 x 7.6 x 2.5)
Main machinery: 4 MTU 16V 538TB93 or 4 MTU 16V 396TE diesels; 16,600 hp (12.2 MW); 4 shafts
Speed, knots: 31. **Range, n miles:** 3,000 at 17 kt; 1,500 at 30 kt
Complement: 53

Missiles: SSM: 4 McDonnell Douglas Harpoon ●; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.
 6 IAI Gabriel II (removed from some ships) ●; radar or optical guidance; semi-active radar plus anti-radiation homing to 36 km (19.4 n miles) at 0.7 Mach; warhead 75 kg.
SAM: Israeli Industries Barak I (vertical launch) ●; 32 or 16 cells in 2- or 4-8 pack launchers; command line of sight radar or optical guidance to 10 km (5.5 n miles) at 2 Mach; warhead 22 kg. Most fitted for but not with.
Guns: 1 OTO Melara 3 in (76 mm)/62 ●; 85 rds/min to 18 km (8.7 n miles); weight of shell 6 kg.
 2 Oerlikon 20 mm; 800 rds/min to 2 km.
 1 Rafael Typhoon 25 mm (Herev).
 1 General Electric/General Dynamics Vulcan Phalanx 6-barrelled 20 mm Mk 15 ●; 3,000 rds/min combined to 15 km anti-missile.
 2 or 4–12.7 mm (twin or quad) MGs.
Countermeasures: Decoys: Elbit/Deseaver 72-barrelled launchers for chaff and IR flares ●.
ESM/ECM: Eilsra NS 9003/5; intercept and jammer.
Combat data systems: IAI Reshet datalink.
Weapons control: Galileo OG 20 optical director; Elop MSIS optronic director ●.
Radars: Air/surface search: Thomson-CSFT-H-D 1040 Neptune ●; G-band.
Fire control: 2 Elta EL/M-2221 GM STGR ●; I/K/J-band.

Programmes: Hetz started construction in 1984 as the fifth of the SAAR 4 class but was not completed, as an economy measure. Taken in hand again in 1989 and fitted out as the trials ship for some of the systems installed in the Eilat class.

Modernisation: Romat and Keshet were modernised to same standard as Hetz in what was called the Nirit programme. The remaining craft were new build and some of these have been given names previously allocated to decommissioned/transferred SAAR 4s.
Structure: The CIWS is mounted in the eyes of the ship replacing the 40 mm gun. The eight pack Barak launchers are fully containerised and require no deck penetration or onboard maintenance. They are fitted aft in place of two of the Gabriel launchers where these are still fitted. The fire-control system for Barak is fitted on the platform aft of the bridge on the port side. Davit can be installed aft of the Gabriel missiles for special forces boats.

HETZ (Scale 1 : 600), Ian Sturton / 0126347

HEREV 4/2006, M Declerck / 1158547

KESHET 4/2006, M Declerck / 1158546

15 DABUR CLASS (COASTAL PATROL CRAFT) (PC)

850	853	864	868	902	906	910
851	860-862	865	873	905	909	

Displacement, tons: 39 full load
Dimensions, feet (metres): 64.9 × 18 × 5.8 (19.8 × 5.5 × 1.8)
Main machinery: 2 GM 12V-71TA diesels; 840 hp (627 kW) sustained; 2 shafts
 About 8 have more powerful GE engines.
Speed, knots: 19; 30 (GE engines) **Range, n miles:** 450 at 13 kt
Complement: 6/9 depending on armament

Guns: 2 Oerlikon 20 mm, 800 rds/min to 2 km.
 2—12.7 mm MGs. Carl Gustav 84 mm portable rocket launchers.
Torpedoes: 2—324 mm tubes. Honeywell Mk 46; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt, warhead 44 kg.
Depth charges: 2 racks in some.
Weapons control: Elop optronic director.
Radars: Surface search: Decca Super 101 Mk 3 or HDWS, I-band.
Sonars: Active search and attack; high frequency.

Programmes: Twelve built by Sewart Seacraft USA and remainder by Israel Aircraft Industries (RAMTA) between 1973 and 1977. Final total of 34. Likely to be phased out as new fast attack craft enter service.

Structure: Aluminium hull. Several variations in the armament. Up to eight of the class are fitted with more powerful General Electric engines to increase speed to 30 kt.

Operational: These craft have been designed for overland transport. Good rough weather performance. Portable rocket launchers are carried for anti-terrorist purposes. Not considered fast enough to cope with modern terrorist speedboats and some have been sold as Super Dvora commissioned. Two based at Eilat, remainder at Ashdod. In course of replacement by the Super Dvora III as they enter service and operational numbers are uncertain.

Sales: Four to Argentina in 1978; four to Nicaragua in 1978 and three more in 1996; six to Chile in 1991 and four more in 1995. Five also given to Lebanon Christian Militia in 1976 but these were returned.

DABUR

12/1998 / 0075807

2 RESHEF (SAAR 4) CLASS (FAST ATTACK CRAFT—MISSILE) (PTG)

Name	Builders	Launched	Commissioned
NITZHON	Israel Shipyards, Haifa	10 July 1978	Sep 1978
ATSMOUT	Israel Shipyards, Haifa	3 Dec 1978	Feb 1978

Displacement, tons: 415 standard, 450 full load
Dimensions, feet (metres): 190.6 × 25 × 8 (58 × 7.8 × 2.4)
Main machinery: 4 MTU/Bazán 16V 956 TB91 diesels; 15,000 hp (11.03 MW) sustained; 4 shafts
Speed, knots: 32 **Range, n miles:** 1,650 at 30 kt; 4,000 at 17.5 kt
Complement: 45

Missiles: SSM: 2-4 McDonnell Douglas Harpoon (twin or quad) launchers; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg
 4-6 Gabriel II; radar or TV optical guidance, semi-active radar plus anti-radiation homing to 36 km (20 n miles) at 0.7 Mach; warhead 75 kg
 Harpoons fitted with Israeli homing systems. The Gabriel II system carries a TV camera which can transmit a homing picture to the firing ship beyond the radar horizon. The missile fit currently varies in training boats-2 Harpoon, 5 Gabriel II.

Guns: 2 Oerlikon 20 mm; 800 rds/min to 2 km.
 1 General Electric/General Dynamics Vulcan Phalanx 6-barrelled 20 mm Mk 15; 3,000 rds/min combined to 1.5 km anti-missile.
 2—12.7 mm MGs.

Torpedoes: 6—324 mm (2 triple) tubes.
Countermeasures: Decoys: 1-45-tube, 4- or 6-24-tube, 4 single-tube chaff launchers.
ESM/ECM: Eltra NS 9003/5; intercept and jammer

Combat data systems: IAI Reshet datalink.

Radars: Air/surface search: Thomson-CSF TH-D 1040 Neptune; G-band; range 33 km (18 n miles) for 2 m² target.

Fire control: Selenia Orion RTN 10X; I/J-band.

Sonars: EDO 780; VDS; fitted in both ships.

Modernisation: Some of the class modernised to Nirit standards and transferred to the Saar 4.5 class. Gabriel III SSM did not go into production.

Sales: Nine built for South Africa in Haifa and Durban. One transferred to Chile late 1979, one in February 1981, and two more in June 1997. Two transferred to Sri Lanka in 2000.

13 SUPER DVORA MK I AND MK II CLASSES (FAST ATTACK CRAFT—GUN) (PTFM)

811-819 (Mk I)	820-823 (Mk II)
----------------	-----------------

Displacement, tons: 54 full load
Dimensions, feet (metres): 71 × 18 × 5.9 screws (21.6 × 5.5 × 1.8) (Mk I)
 82 × 18.4 × 3.6 (25 × 5.6 × 1.1) (Mk II)
Main machinery: 2 Detroit 16V-82TA diesels; 1,380 hp (1.03 MW) sustained; 2 shafts (Mk I)
 2 MTU 12V 396 TE94 diesels; 4,175 hp (3.07 MW) sustained; 2 ASD 16 drives (Mk II)
Speed, knots: 36 or 46 (Mk II)
Range, n miles: 1,200 at 17 kt
Complement: 10 (1 officer)

Missiles: SSM Hellfire; range 8 km (4.3 n miles); can be carried.
Guns: 2 Oerlikon 20 mm/80 or 1 Bushmaster 25 mm/87 Mk 96 or 3 Typhoon 12.7 mm (triple) MGs.
 2—12.7 or 7.62 mm MGs. 1—84 mm rocket launcher.

Depth charges: 2 racks.

Weapons control: Elop MSIS optronic director

Radars: Surface search: Raytheon; I-band.

Programmes: An improvement on the Dabur design ordered in March 1987 from Israel Aircraft Industries (RAMTA). First started trials in November 1988, and first two commissioned in June 1989. First 10 are Mk I. From 820 onwards the ships are fitted with more powerful engines for a higher top speed and surface drives which greatly reduce maximum draft. First Mk II commissioned in 1993.

Structure: All gun armament and improved speed and endurance compared with the prototype Dvora. SSM, depth charges, torpedoes or a 130 mm MRL can be fitted if required.

Operational: Two (Mk II) are based at Eilat, the remainder at Haifa. The 25 mm or 12.7 mm Gatling guns can be operated by joystick control from the bridge. Hellfire SSM is sometimes carried.

Sales: Six Mk I sold to Sri Lanka in 1988 and four to Eritrea in 1993. One Mk II to Sri Lanka in 1995 and three more in 1996. One to Slovenia in 1996 and a second in 1997. Two to India in 1997, with more building under licence in India.

3 + 2 SHALDAG CLASS (FAST ATTACK CRAFT—GUN) (PBF)

840 841 +1
Displacement, tons: 58 full load
Dimensions, feet (metres): 81.4 x 19.7 x 3.9 (24.8 x 6 x 1.2)
Main machinery: 2 Deutz 620 TB 18V or MTU 396 TE diesels; 5,000 hp(m) (3.68 MW); 2 LIPS or MJP water-jets
Speed, knots: 50
Range, n miles: 700 at 32 kt
Complement: 10
Guns: 1 Rafael Typhoon 25 mm, 1—20 mm.
Weapons control: ELOP compass optronic director Typhoon GFCS.
Radars: Surface search, MD 3220 Mk II; I-band

Comment: Order in January 2002 for two craft, with option for two further hulls, made from Israel Shipyards, Haifa. Details reflect those in Sri Lankan service and are thus speculative. Both delivered in late 2003. An option for a further three craft was exercised in 2005. The first of these was delivered in early 2008 and the other two are to enter service by late 2009.

SHALDAG CLASS 8/2005, *Jane's* / 0589534

3 STINGRAY INTERCEPTOR CLASS (PBF)

Displacement, tons: 10.5 full load
Dimensions, feet (metres): 39.4 x 14.5 x 2.9 (12 x 4.4 x 0.9)
Main machinery: 2 Caterpillar marine diesels; 2 shafts
Speed, knots: 35
Range, n miles: 300 at cruising speed
Complement: 5
Radars: Surface search; I-band

Comment: Catamaran design of GRP construction built by Stingray Marine of Durbanville, Western Cape and delivered in 1997 and 1998. Based at Eilat.

STINGRAY INTERCEPTOR 2000, *Stingray Marine* / 0104866

8 TZIRA (DEFENDER) CLASS (RESPONSE BOATS) (PBF)

Displacement, tons: 2.7 full load
Dimensions, feet (metres): 27.0; 31.0 (Batch 2) x 8.5 x 8.8 (8.2; 9.5 x 2.6 x 2.7)
Main machinery: 2 Honda outboard motors; 450 hp (335 kW)
Speed, knots: 46
Range, n miles: 175 at 35 kt
Complement: 4
Guns: 1—12.7 mm MG.
Radars: To be announced

Comment: High-speed inshore patrol craft of aluminium construction and foam collar built by SAFE Boats International, Port Orchard, Washington. Four delivered in September 2005. To be operated by the port-protection unit on border protection and counter-terrorism operations. The craft are two feet longer than those operated by the USCG. A further four Batch 2 craft, built to a lengthened 9.5 m design, were ordered on 9 March 2006

TZIRA CLASS 4/2006, *Richard Scott/NAVYPIX* / 1130534

1 RAFAEL PROTECTOR (UNMANNED SURFACE VEHICLE) (USV)

Displacement, tons: To be announced
Dimensions, feet (metres): 29.5 x ? x ? (9.0 x ? x ?)
Main machinery: 1 diesel; 1 waterjet propulsor
Speed, knots: 30+
Guns: 1 Mini-Typhoon stabilised 12.7 mm MG.
Weapons control: Toplite EO sensor pod

Comment: Developed jointly by Rafael and Aeronautics Defense Systems, Protector was first revealed in June 2003. It is an unmanned patrol craft based on an 9 m Rigid Inflatable Boat (RIB) with composite-materials superstructure that encloses the sensor pod, navigation radar, GPS antenna and gyro-stabilised inertial navigation system. Five video channels are used to transmit the outputs from the Toplite and two deck-mounted cameras back to a remote operator. The vessel also carries microphones and loudspeakers, allowing the operator to hail the crew of a suspicious vessel. With an endurance of about eight hours, it can be controlled by line-of-sight communications from ship or shore for various missions such as force protection, anti-terror surveillance and reconnaissance, mine warfare and electronic warfare. Several systems were earmarked to begin evaluation tests with the Israeli Navy but these were subsequently bought by Singapore in 2004. A series of IN operational evaluations began in 2005.

PROTECTOR 6/2005, *Rafael* / 1116232

AUXILIARIES

Notes: (1) Two new construction landing ships are required by the Navy to transport troops. No funds available. A Newport class Peoria LST 1183 was authorised for lease from the US but was sunk as a target in 2004.
 (2) A Ro-Ro ship *Quashet* is used as a training ship and for research and development. Built in Japan in 1979 and formerly used as a general purpose cargo ship.
 (3) Two former merchant ships *Nir* and *Naharya* are used as alongside tenders in Haifa and Eilat respectively
 (4) A 19 m Alligator class semi-submersible craft was reported delivered in 1998. It is likely to be used for special forces operations.

2 STOLLERGRUND CLASS (TYPE 745) (AG)

Name	No	Builders	Commissioned
BAT YAM (ex-Kalkgrund)	— (ex-Y 865)	Krögerwerft	23 Nov 1989
BAT GALIM (ex-Band)	— (ex-Y 867)	Krögerwerft	28 May 1990

Displacement, tons: 450 full load
Dimensions, feet (metres): 126.8 x 30.2 x 10.5 (38.6 x 9.2 x 3.2)
Main machinery: 1 Deutz-MWM BV6M628 diesel; 1,690 hp(m) (1.24 MW) sustained; 1 shaft; bow thruster
Speed, knots: 12. **Range, n miles:** 1,000 at 12 kt
Complement: 7 plus 6 trials personnel

Comment: Ex-German Navy trials and support vessels transferred to the Israeli Navy in December 2005. Both ships are fitted with I-band radars and an intercept sonar. Likely to be based at Haifa

BAT GALIM 12/2005, *Michael Nitz* / 1153206

1 ASHDOD CLASS (LCT)

Name	No	Builders	Commissioned
ASHDOD	61	Israel Shipyards, Haifa	1986

Displacement, tons: 400 standard; 730 full load
Dimensions, feet (metres): 205.5 x 32.8 x 5.8 (62.7 x 10 x 1.8)
Main machinery: 3 MWM diesels; 1,900 hp(m) (1.4 MW); 3 shafts
Speed, knots: 10.5
Complement: 20
Guns: 2 Oerlikon 20 mm

Comment: Used as a trials ship for Barak VLS. Based at Ashdod but refitted at Eilat in 1999. Operational status doubtful.

ASHDOD 3/1989 / 0080070

Italy

MARINA MILITARE

Country Overview

Italy is situated in southern Europe and comprises, in addition to the Italian mainland, the islands of Sardinia, Sicily, Elba and many smaller islands. Enclaves within mainland Italy are the independent countries of San Marino and Vatican City. With an area of 116,341 square miles, it is bordered to the north by France, Switzerland, Austria and Slovenia. It has a 2,700 n mile coastline with the Mediterranean, Ionian, Adriatic, Tyrrhenian Sea and Ligurian Seas. The capital and largest city is Rome while the principal ports are Genoa, Naples, Trieste, Taranto, Palermo and Venice. Territorial waters (12 n miles) are claimed but an EEZ has not been claimed.

Headquarters Appointments

Chief of Naval Staff:
Admiral Paolo la Rosa
Vice Chief of Naval Staff:
Rear Admiral Luigi Binelli Mantelli
Chief of Joint Military Intelligence:
Rear Admiral Bruno Branciforte
Chief of Procurement:
Engineer Vice Admiral Dino Nascetti
Chief of Technical Support:
Engineer Vice Admiral Alberto Gauzolino
Chief of Naval Personnel:
Vice Admiral Claudio de Polo

Flag Officers

Commander, Allied Naval Forces, Southern Europe (Naples):
Vice Admiral Maurizio Gemignani
Commander-in-Chief of Fleet (Rome):
Vice Admiral Giuseppe Lertora
Commander, Tyrrhenian Sea (La Spezia):
Vice Admiral Franco Paoli
Commander, Ionian Sea (Taranto):
Vice Admiral Gianmaria Faggioni
Commander, Adriatic Sea (Ancona):
Rear Admiral Mario Fumagalli
Commander, Sicily (Augusta):
Rear Admiral Andrea Toscano
Commander, Sardinia (Cagliari):
Commodore Ermengildo Ugazzi
Commander, High Seas Fleet (COMFORAL):
Rear Admiral Rinaldo Veri
Commander, Naval Group (COMGRUPNAVIT) (Taranto):
Commodore Ruggiero di Biase
Commander (1st Frigate Squadron) (Taranto):
Sandro Fabiani Latini
Commander, Naval Group (2nd Frigate Squadron) (La Spezia):
Captain Carlo Dardengo
Commander, MCM Forces (COMFORDRAG) (La Spezia):
Captain Guido Rando
Commander, Amphibious Force (COMFORSBARC) (Brindisi):
Commodore Claudio Confessore
Commander, Training Command (MARICENTADD) (Taranto):
Commodore Michele Saponaro
Commander, Coastal and Patrol Forces (COMFORPAT) (Augusta):
Commodore Roberto Camerini
Commander, Naval Air Arm (COMFORAER) (Rome):
Commodore Paolo Treu
Commander Submarine Force (COMFORSUB) (Taranto):
Captain Giovanni Ferini

Flag Officers—continued

Commander, Naval Special Forces (COMSUBIN) (La Spezia):
Commodore Giuseppe Cayo Dragone
Commander Coast Guard:
Vice Admiral Luciano Dassatti

Diplomatic Representation

Naval Attaché in Bonn:
Captain Fabio Ricciardelli
Naval Attaché in Peking:
Captain Roberto Gargiulo
Naval Attaché in London:
Commodore Francesco di Biase
Naval Attaché in Moscow:
Captain Gianpiero Bernadisi
Naval Attaché in Paris:
Captain Roberto Ivo
Naval Attaché in Washington:
Captain Maurizio Ertreo
Defence Attaché in Tokyo:
Commodore Giuseppe Piro

Bases

Regional Commands: La Spezia (Tyrrhenian Sea), Taranto (Ionian Sea), Ancona (Adriatic Sea), Augusta (Sicily), Cagliari (Sardinia).
Main bases (Major Arsenals/Naval Shipyards): Taranto, La Spezia
Secondary base (Minor Arsenal/Naval Shipyard): Augusta.
Minor bases: Brindisi.

Organisation

CINCNAV is responsible for all operational activities. There are six subordinate commands:
High-Sea Forces Command (COMFORAL) including all Major and Amphibious Ships. Based in Taranto with subordinated command COMGRUPNAVIT
Patrol Forces Command (COMFORPAT) Corvettes and OPVs. Based in Augusta.
Naval Air Command. Based at Santa Rosa, Rome.
Submarine Force Command. Based at Taranto
Mine Countermeasures Command. Based at La Spezia.
COMFORSBARC with San Marco Regiment, Carlotta (logistic) regiment and one assault boat group. Based at Brindisi.
Special Forces Command (COMSUBIN) Commandos and support craft. Based near La Spezia. Controlled directly by Chief of Naval Staff

Personnel

2009: 34,000 (4,150 officers) including 1,550 naval air and 2,100 naval infantry (amphib) National service has been terminated

Naval Air Arm

Catania (Fontanarossa): AB-212 (2nd), SH-3D (3rd)
Catania (Sigonella): Atlantic (41st)
La Spezia (Luni): AB-212 (1st), SH-3D (5th), EH-101 (5th), EH-101 (OEU)
Taranto (Grottaglie): AV-8B/TAV-8B (7th), AB-212 (4th), AB-212 (Amphib), SH-3 (Amphib)

Naval Infantry and Army Amphibious Units

A Landing Force Command was established in 1998 including a collaborative Spanish/Italian amphibious brigade (SIAF). Landing Force Command is based at Brindisi and comprises the San Marco assault regiment (two assault battalions), the Carlotta support regiment (one logistic and one training battalion) and a Landing Craft Group. The Amphibious assault air squadron has eight modified SH-3D and seven modified AB-212 helicopters.

The Italian Army operates an amphibious regiment named 'Serenissima' which is based at Venice. It is equipped with four LCM, six LCVP and 47 rigid raider and assault craft.

The 'National Projection Force' was established in June 2006. It consists of Navy assets, the Army 'Serenissima' amphibious regiment and selected (armarked) Army combat support units (two armoured cavalry squadrons, two combat engineering companies, two AA artillery batteries and a squadron of six A 129 attack helicopters). The first commitment of the force was in the Lebanon in 2006.

SUBMARINES

2 + 2 (1) TODARO (TYPE 212A) CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
SALVATORE TODARO	S 526	Fincantieri, Muggiano	Jan 2001	6 Nov 2003	29 Mar 2006
SCIRÈ	S 527	Fincantieri, Muggiano	Apr 2002	18 Dec 2004	19 Feb 2007
-	-	Fincantieri, Muggiano	2010	2013	2015
-	-	Fincantieri, Muggiano	2011	2014	2016

Displacement, tons: 1,490 surfaced, 1,700 dived
Dimensions, feet (metres): 187.0 × 23 × 19.7
 (57.0 × 7 × 6)

Main machinery: Diesel-electric; 1 MTU 16V 396 diesel; 4,243 hp(m) (3.12 MW); 1 alternator; 1 Siemens PEM motor, 3,875 hp(m) (2.85 MW); 1 shaft, Siemens/HDW PEM 9 fuel cell (AIP) modules, 306 kW

Speed, knots: 20 dived; 12 surfaced
Range, n miles: 8,000 at 8 kt surfaced
Complement: 27 (8 officers)

Torpedoes: 6—21 in (533 mm) bow tubes; water ram discharge; WASS Black Shark; wire (fibre-optic cable) guided, active/passive homing to 50 km (27 n miles) at 50 kt; warhead 250 kg. A 184 Mod 3 also carried. Total 12 weapons.

Mines: in lieu of torpedoes.

Countermeasures: Decoys: Fitted for CIRCE Torpedo countermeasures

ESM: EADS FL 1800U; Intercept.

Weapons control: Kongsberg MSI-90U TFCS.

Radars: Navigation: KH 1007; I-band.

Sonars: STN Atlas Elektronik DBQS-40; passive ranging and intercept; FAS-3 Flank and passive towed array STN Atlas Moe 3070, mine detection, active, high frequency.

Programmes: German design phase first completed in 1992 by ARGE 212 (HDW/TNSW) in conjunction with IKL. MoU signed with Germany 22 April 1996 for a common design. First pair ordered from Fincantieri in August 1997. First steel cut for first of class 19 July 1999, and for second in July 2000. Government approval to procure second pair was given on 21 April 2008 and a contract is expected

in 2009. Delivery of both boats is to be made by 2016. A fifth boat, to enter service in 2025, is projected.

Structure: Equipped with a hybrid fuel cell/battery propulsion based on the Siemens PEM fuel cell technology. The submarine is designed with a partial double hull which has a larger diameter forward. This is joined to the after end by a short conical section which houses the fuel cell plant. Two LOX tanks and hydrogen stored in metal cylinders are carried around the circumference of the smaller hull section. Italian requirements included a greater diving depth, improved external communications, and better submerged escape facilities. The final design is identical to the German submarines. Fitted with Zeiss search and attack periscopes.

Operational: Dived speeds up to 8 kt are projected, without use of main battery.

4 IMPROVED SAURO CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
SALVATORE PELOSI	S 522	Fincantieri, Monfalcone	24 May 1984	29 Dec 1986	14 July 1988
GIULIANO PRINI	S 523	Fincantieri, Monfalcone	30 May 1985	12 Dec 1987	11 Nov 1989
PRIMO LONGOBARDO	S 524	Fincantieri, Monfalcone	18 Dec 1991	20 June 1992	20 May 1994
GIANFRANCO GAZZANA PRIAROGGIA	S 525	Fincantieri, Monfalcone	12 Nov 1992	26 June 1993	12 Apr 1995

Displacement, tons: 1,476 (1,653, S 524-5) surfaced; 1,662 (1,862, S 524-5) dived

Dimensions, feet (metres): 211.2 (217.8 S 524-5) × 22.3 × 18.4 (64.4 (66.4) × 6.8 × 5.6)

Main machinery: Diesel-electric; 3 Fincantieri GMT 210.16 SM diesels; 3,672 hp(m) (2.7 MW) sustained; 3 generators; 2.16 MW; 1 motor; 3,128 hp(m) (2.3 MW); 1 shaft

Speed, knots: 11 surfaced; 19 dived; 12 snorting

Range, n miles: 11,000 at 11 kt surfaced; 250 at 4 kt dived

Complement: 51 (7 officers)

Torpedoes: 6–21 in (533 mm) bow tubes. 12 Whitehead A184 Mod 3; dual purpose; wire-guided; active/passive homing to 25 km (13.7 n miles) at 24 kt, 17 km

(9.2 n miles) at 38 kt; warhead 250 kg. Swim-out discharge.

Countermeasures: ESM: Elettronica BLD-727; radar warning; 2 aerials-1 on a mast, second in search periscope.

Weapons control: STN Atlas ISUS 90-20.

Radars: Search/navigation: SMA BPS 704; I-band; also periscope radar for attack ranging.

Sonars: Selenia Elisag IPD 70/S; linear passive array; 200 Hz-75 kHz; active and UWT transducers in bow (15 kHz).

Programmes: The first two were ordered in March 1983 and the second pair in July 1988

Modernisation: An upgrade programme included replacement of acoustic sensors, weapons control

system (STN Atlas ISUS 90-20) and communications. Work on all four boats was completed in late 2004.

Structure: Pressure hull of HY 80 steel with a central bulkhead for escape purposes. Diving depth, 300 m (985 ft) (test) and 600 m (1,970 ft) (crushing). The second pair has a slightly longer hull to give space for SSMs.

Periscopes: Kollmorgen; S 76 Mod 322 with laser range finder attack, S 76 Mod 323 with ESM-search. Wave contour snort head has a very low radar profile. All boats have anechoic tiles

Operational: Two Lital Mk 39 inertial navigation; Sepa autopilot. Endurance, 45 days. Service lives: 2016 (S 522 and S 523); 2020 (S 524 and S 525)

CAVOUR (ex-Andrea Doria)	C 550	Fincantieri Muggiano/Riva Trigoso	17 July 2001	20 July 2004	Apr 2009

Displacement, tons: 27,100 full load
Dimensions, feet (metres): 772.9 oa; 707.3 wl x 128 oa, 96.8 wl x 24.6 (235.6; 215.6 x 39, 29.5 x 7.5)

Flight deck, feet (metres): 721.8 x 111.5 (220 x 34)

Main machinery: COGAG: 4 GE/Fiat LM 2500 gas turbines; 118,000 hp(m) (88 MW) sustained; 2 shafts; cp props, bow and stern thrusters; 6 Wärtsilä 2.2 MW diesel generators and 2 Ansaldo Sistemi Industriali shaft generators

Speed, knots: 28. **Range, n miles:** 7,000 at 16 kt

Complement: 528 ship plus 168 air group plus 145 staff (CJTF or CATF/CLF) plus 325 marines (90 additional marines for short period) Total accommodation for 1,205

Military lift: (garage only): 100 wheeled vehicles or 60 armoured vehicles or 24 MBTs (Aniète) or mixture

Missiles: SAM: 32 (4-8 cell Sylver VLS) Aster 15; Inertial mid-course guidance; active radar homing to 30 km (16 n miles); at 3 Mach; warhead 15 kg.

Guns: 2 OTO Melara 3 in (76 mm)/62 Super Rapid, 120 rds/min to 16 km (8.7 n miles); weight of shell 6 kg. 3 OTO Melara KBA 25/80 mm.

Countermeasures: Decoys: 2 Breda SCLAR-H 20-barrel trainable chaff/decoy launchers.

TCM: 2 SLAT TCM launchers.

ESM: Thales Radar and Comms intercept

ECM: Thales Nettuno.

Combat data systems: 'Horizon' derivative flag and command support system. Links 11 and 16; provision for Link 22 Satcom

Weapons control: Galileo Avionica SASS optronic director 2 Alenia NA25XP

Radars: Long-range air search: SPS 798 (RAN-40L); D-band

Air search and missile guidance: Alenia Marconi EMPAR, G-band

CCA: SPN-41, J-band

Surface search: SPS-791 (RAN 30X/I); I-band

Fire control: 2 Alenia Marconi NA 25XP; I-band.

Navigation: SPN-753G(V); I-band

CCA: Finmeccanica SPN 720(V)5, I-band.

Tacan: SRN-15A.

Sonars: WASS SNA-2000 mine avoidance sonar (bow dome)

Fixed-wing aircraft: 8 AV-8B Harrier II or JSF

Helicopters: 12 EH-101 (fitted also for AB 212, NH90 and SH-3D).

Programmes: Following a study phase which included significant changes to the initial configuration of the Nuova Unità Maggiore (NUM) design, the Italian government placed a contract with Fincantieri in 2007 for the construction of a ship to replace *Vittorio Veneto* in 2007. Capabilities include afloat command, air and amphibious operations. The bow section of the ship was constructed at Muggiano and the centre and stern sections at Riva

CAVOUR

(Scale 1 : 1,800), Ian Sturton / 1167475

CAVOUR

12/2006, Giorgio Ghiglione / 1167417

Trigoso. The ship is to be joined, outfitted and tested at Muggiano. A second contract, for the development and supply of the combat system was signed with an AMS-led industrial group in October 2002.

Structure: The flight deck features six helicopter take-off spots, one spot for SAR, eight parking spots and a 12° ski jump. A notional air group includes 12 EH-101 helicopters and 8 AV-8B Harrier IIs. There is provision in the design to operate JSF and UAVs. The hanger/garage can accommodate various combinations of aircraft and vehicles (including MBT and trucks) There are two

30 ton lifts, one forward of the island and the other starboard side aft. Two Ro-Ro ramps are positioned aft and starboard side. Two 15 ton and one 7 ton lifts are fitted for ordnance and logistic needs respectively. The VLS silos for Aster are located on the port quarter and starboard bow. There is a 430 m² hospital facility

Operational: Sea trials started in 2006. The first year of operation, known as the Warranty Period, began in March 2008. This is to be followed by a four-month maintenance period and by combat system integration and certification during 2009.

Air/surface search: Selenia SPS-774 (RAN 10S) ●; E/F-band Surface search/target indication: SMA SPS-702 UPX, 718 beacon; I-band Navigation: ARPA SPN-753 G(V); I-band Fire control: 3 Selenia SPG-75 (RTN 30X) ●; I/J-band, range 15 km (8 n miles) (for Albatros) 3 Selenia SPG-74 (RTN 20X) ●; I/J-band; range 13 km (7 n miles) (for Dardo). CCA. Selenia SPN-728(V)1; I-band IFF: Mk XII Tacan. SRN-15A Sonars: Raytheon DE 1160 LF; bow-mounted; active search; medium frequency. Fixed-wing aircraft: 15 AV-8B Harrier II. Helicopters: 18 SH-3D Sea King or EH 101 Merlin helicopters (12 in hangar, 6 on deck). The total capacity is either 15 Harriers or 18 helicopters, but this leaves no space for movement. In practice a combination is embarked (see <i>Operational</i>). Programmes: Contract awarded 21 November 1977. The design work completed February 1980. Started sea trials 3 December 1984. Modernisation: A major C1 upgrade programme, completed in September 2003, has given the ship a Maritime Component Commander (MCC) capability. Improvements to the combat data system include a MCC data system and Link 16. SATCOM domes have replaced the TESEO launchers which have been removed. SHF SATCOM has been installed in the old positions of the chaff launchers while SCLAR-D chaff launchers have been installed on new sponsons aft and below the flight deck. Other work includes modernisation of the ESM/ECM equipment, replacement of the DE 1150F sonar with DMSS 2000 and the fitting of an electro-optic tracking device on the bridge roof in lieu of SPN-728 radar which has been removed. A major refit is planned 2013-15 although the scope of this is to be decided. <i>Garibaldi</i> has also been equipped to control RC-18 Predator UAV and to exploit its imagery. Structure: Six decks with 13 vertical watertight bulkheads. Fitted with 6.5° ski-jump and VSTOL operating equipment. Two 15 ton lifts 18 x 10 m (59 x 32.8 ft). Hangar size 110 x 15 x 6 m (361 x 49.2 x 19.7 ft). Hangar capacity is for 10 Harriers or 12 Sea Kings. Has a slightly narrower flight deck than UK <i>Invincible</i> class. Two MEN class fast personnel launches (capacity 250) can be embarked for amphibious operations or disaster relief. Operational: Fleet Flagship. Equipped for Joint Task Force command and control. The long-standing dispute between the Navy and the Air Force concerning the former's operation of fixed-wing aircraft (dating back to pre-Second World War legislation) was finally resolved by legislation passed on 29 January 1989. Embarked aircraft are operated by the Navy with the Air Force providing evaluation and maintenance. The carrier has operated in the assault role with seven SH-3D, four AB 212 and Army helicopters including six AB 205, three A 129 and two CH-47. First operational Harriers embarked for permanent duty in December 1994.</p>

Helicopters: 1 Augusta/Westland EH 101 Merlin ● or NH-90.

Programmes: Three-nation project for a new air defence ship with Italy, France and UK. Joint project office established in 1993. Memorandum of Understanding for joint development signed 11 July 1994. After UK withdrew in April 1999, an agreement was signed on 7 September 1999 between France and Italy to continue. Following a preliminary agreement on 2 August 2000, a Memorandum of Understanding was signed by the French and Italian Defence Ministries on 22 September 2000 for the joint development of the 'Horizon' destroyer. A Horizon Joint Venture Company was created by DCN/Thomson-CSF and Fincantieri/Finmeccanica on 16 October 2000. The first batch of two vessels for each country was ordered on 27 October 2000. Plans for a second batch of two ships have been cancelled.
Operational: *Andrea Doria* started sea trials in October 2008 and is to become fully operational in 2009. *Cairo Duilio* is expected to be commissioned in 2010.

FRANCESCO MIMBELLI (ex-Ardimentoso)	D 561	Fincantieri, Riva Trigoso/Muggiano	15 Nov 1989	13 Apr 1991	19 Oct 1993

Displacement, tons: 4,330 standard; 5,400 full load
Dimensions, feet (metres): 487.4 x 52.8 x 28.2 (sonar) (147.7 x 16.1 x 8.6)
Flight deck, feet (metres): 78.7 x 42.7 (24 x 13)
Main machinery: CODOG, 2 Fiat/GE LM 2500 gas turbines; 54,000 hp (40.3 MW) sustained; 2 GMT BL 230.20 DVM diesels; 12,600 hp(m) (9.3 MW) sustained, 2 shafts, cp props
Speed, knots: 31 (21 on diesels)
Range, n miles: 7,000 at 18 kt
Complement: 331 (25 officers)

Missiles: SSM: 4 or 8 OTO Melara/Matra Tesco Mk 2 (TG 2) (2 or 4 twin) (●); mid-course guidance; active radar homing to 160 km (86.4 n miles) at 0.9 Mach, warhead 210 kg, sea-skimmer. Mk 3 with radar/IR homing to 300 km (162 n miles); warhead 160 kg in due course.

A/S: OTO Melara/Matra Milas launcher; inertial guidance with command update to 55 km (29.8 n miles) at 0.9 Mach, payload Mk 46 Mod 5 or Mu 90 torpedo; 4 weapons (see Modernisation)

SAM 40 Raytheon Standard SM 1MR Block VI, Mk 13 Mod 4 launcher (●); command guidance; semi-active radar homing to 38 km (20.5 n miles) at 2 Mach. Selenia Albatros Mk 2 octuple launcher for Aspide (●), semi-active radar homing to 13 km (7 n miles) at 2.5 Mach; 16 missiles. Automatic reloading

Guns: 1 OTO Melara 5 in (127 mm)/54 (●); 45 rds/min to 23 km (12.42 n miles); weight of shell 32 kg. 3 OTO Melara 3 in (76 mm)/62 Super Rapid (●); 120 rds/min to 16 km (8.7 n miles); weight of shell 8 kg. 2—20 mm.

Torpedoes: 6—324 mm B-515 (2 triple) tubes (●). Honeywell Mk 46; anti-submarine, active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg. May be replaced by Whitehead Mu 90 in due course

Countermeasures: Decoys. 2 CSEE Sagaie chaff launchers (●). 1 SLO-25 Nixie anti-torpedo system.

ESM/ECM: Elettronica SLQ-732 Nettuno (●); integrated intercept and jamming system. SLC 705.

Combat data systems: Selenia Elsag IPN 20 (SADOC 2); Links 11 and 14. SATCOM.

Weapons control: 4 Dardo-E systems (3 channels for Aspide), Milas TFCS.

Radars: Long-range air search: Hughes SPS-52C; 3D (●); E/F-band.

Air search: Selenia SPS-768 (RAN 3L) (●); D-band. Air/surface search: Selenia SPS-774 (RAN 10S) (●); E/F-band.

Surface search: SMA SPS-702 (●); I-band.

Fire control: 4 Selenia SPG-76 (RTN 30X) (●); I/J-band (for Dardo).

Navigation: SMA SPN-748; I-band.

IFF: Mk X/XII Tecan SRN-15A.

Sonars: Raytheon DE 1164 LF-VDS; integrated bow and VDS; active search and attack; medium frequency (3.75 kHz (hull)); 7.5 kHz (VDS)

Helicopters: 2 AB 212ASW (●); SH-3D Sea King and EH 101 Merlin capable

Programmes: Order placed 9 March 1986 with Riva Trigoso. All ships built at Riva Trigoso are completed at Muggiano after launching. Names changed on 10 June 1992 to honour former naval heroes. Acceptance dates were delayed by reduction gear radiated noise problems which have been resolved

Modernisation: Milas ASW launchers fitted by late 2004. New sonar dome fitted in D 560 in 2000 increased draft by 1.5 m. A major 2-year upgrade is being undertaken in D 561 to be completed late 2009 and D 560 (starting in 2009). SPS-52C is to be removed. SPS-768 is to be replaced by AMS RAN-40L (SPS 798) (also fitted in Cavour); SPS-774 to be replaced by AMS RAN-21S (SPS-794).

FRANCESCO MIMBELLI (Scale 1 : 1,200), Ian Sturton / 06-69913

LUIGI DURAND DE LA PENNE 6/2004, John Brodie / 1044362

LUIGI DURAND DE LA PENNE 5/2004, B Sullivan / 1044363

SPS-702 to be replaced by SPN-753 ARPA, Dardo-E to be replaced by four new fire-control systems (Dardo-F with RTN-30X); Sagem IRST and new combat data system to be installed. Link 16 is also to be added while Tesco Mk 2 is to be upgraded to Mk 2/A configuration. **Structure:** Kevlar armour fitted. Steel alloys used in superstructure. Prairie Masker noise suppression system.

The 127 mm guns are ex-Audace class B turrets. Fully stabilised. Hangar is 18.5 m in length. **Operational:** It is likely that both ships will be reclassified as frigates once the SM-1 missile system is phased out in about 2015. The ships are expected to remain in service until about 2025.

FRANCESCO MIMBELLI 5/2003, A Sharma / 0570684

SAM: Selenia Albatros octuple launcher; 16 Aspide (Aspide); semi-active homing to 13 km (7 n miles) at 2.5 Mach, height envelope 15-5,000 m (49.2-16,405 ft); warhead 30 kg.

Guns: 1 OTO Molar 5 in (127 mm)/54 automatic (Molar 5); 45 rds/min to 23 km (12.42 n miles) anti-surface; 7 km (3.8 n miles) anti-aircraft, weight of shell 32 kg; fires chaff and illuminants.

4 Breda 40 mm/70 (2 twin) compact (Breda 40); 300 rds/min to 12.5 km (6.8 n miles) anti-surface; 4 km (2.2 n miles) anti-aircraft; weight of shell 0.96 kg.

2 Oerlikon 20 mm fitted for Gulf deployments in 1990-91. 2 Breda Oerlikon 25 mm/90 (twin) tested in Espero.

Torpedoes: 6-324 mm US Mk 32 (2 triple) tubes (Mk 32); Honeywell Mk 46; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

Countermeasures: Decoys: 2 Breda 105 mm SCLAR 20-tubed trainable chaff rocket launchers (SCLAR); chaff to 5 km (2.7 n miles); illuminants to 12 km (6.6 n miles). 2 Dagaie chaff launchers.

SLQ-25; towed torpedo decoy. Prairie Masker; noise suppression system

MAESTRALE

ESM: Elettronica SLR-4, intercept. ECM: 2 SLQ-D, jammers.

Combat data systems: IPN 20 (SADOC 2) action data automation; Link 11. SATCOM (SATCOM)

Weapons control: NA 30 for Albatros and 5 in guns. 2 Dardo (Dardo-F in F 572, F 573, F 577) for 40 mm guns. Galileo Avionica SASS IRST (F 572, F 573, F 577).

Radars: Air/surface search: Selenia SPS-774 SPS-794 (F 572, F 573, F 577) (RAN 10S (RAN 21S)) (RAN 21S); E/F-band. Surface search: SMA SPS-702 (SMA SPS-702); I-band.

Navigation: SMA SPN-703 (SPN-753 (F 572, F 573, F 577)); I-band.

Fire control: Selenia SPG-75 (RTN 30X) (SPG-75); I/J-band (for Albatros and 12.7 mm gun).

2 Selenia SPG-74 (RTN 20X) (SPG-74); I/J-band; range 15 km (8 n miles) (for Dardo).

IFF Mk XII

Sonars: Raytheon DE 1164; hull-mounted, VDS, active/passive attack; medium frequency. VDS can be towed at up to 28 kt. Maximum depth 300 m. Modified to include mine detection active high frequency.

Helicopters: 2 AB 212ASW (AB 212ASW)

Programmes: First six ordered December 1976 and last pair in October 1980. All Riva Trigoso ships completed at Muggiano after launch.

Modernisation: Hull and VDS sonars modified from 1994 to give better shallow water performance and a mine detection capability. A major upgrade is in progress. F 573 was completed in late 2006 and F 577 was completed in 2007 and F 572 in November 2008. F 571 is to follow. SPS-774 to be replaced by AMS RAN-21S (SPS-794). SPN-703 to be replaced by SPN-753 ARPA. Dardo to be replaced by two new fire-control systems (Dardo-F with RTN-30X), Galileo Avionica SASS IRST and new combat data system to be installed.

Structure: There has been a notable increase of 34 ft in length and 5 ft in beam over the Lupo class to provide for the fixed hangar and VDS, the result providing more comfortable accommodation but a small loss of top speed. Fitted with stabilisers.

Operational: A towed passive LF array may be attached to the VDS body. Aft A 184 torpedo tubes have been removed. F 571, F 572, F 573 and F 577 to remain in service until 2015-2018. F 570, F 574, F 575 and F 576 are to be decommissioned 2012-2015.

Displacement, tons: 2,208 standard; 2,525 full load
Dimensions, feet (metres): 371.3 x 37.1 x 12.1 (113.2 x 11.3 x 3.7)
Main machinery: CODLOG; 2 Fiat/GE LM 2500 gas turbines; 50,000 hp (37.3 MW) sustained; 2 GMT BL 230 20 M diesels; 7,900 hp(m) (5.7 MW) sustained; 2 shafts; LIPS cp props
Speed, knots: 35 turbines; 21 diesels
Range, n miles: 5,000 at 15 kt on diesels
Complement: 177 (13 officers)

Missiles: SSM: 8 OTO Melara Tesoo Mk 2 (TG 2) ●, mid-course guidance; active radar homing to 160 km (86.4 n miles) at 0.9 Mach; warhead 210 kg; sea-skimmer.
SAM: Selenia Etsag Aspide octuple launcher ●, semi-active radar homing to 14.6 km (8 n miles) at 2.5 Mach, warhead 39 kg, 8 reloads.
Guns: 1 OTO Melara 5 in (127 mm)/54 ●, 45 rds/min to 23 km (12.42 n miles) anti-surface; 7 km (3.8 n miles) anti-aircraft; weight of shell 32 kg.
 4 Breda 40 mm/70 (2 twin) compact ●, 300 rds/min to 12.5 km (6.8 n miles) anti-surface; 4 km (2.2 n miles) anti-aircraft; weight of shell 0.96 kg.
 2 Derlikon 20 mm can be fitted.
Countermeasures: Decoys; 2 Breda 105 mm SCLAR 20-tubed trainable ●, chaff to 5 km (2.7 n miles); illuminants to 12 km (6.6 n miles).
ESM/ECM: Selenia SLQ-747 (INS-3M); intercept and jammer.
Combat data systems: IFN 10 mini SADO action data automation; Link 11. SATCOM
Weapons control: 2 Etsag Mk 10 Argo with NA 21 directors for missiles and 5 in gun. 2 Dardo for 40 mm guns.
Radars: Air search: Selenia SPS 774 (RAN 10S) ●, E/F-band. Surface search: Selenia SPQ-712 (RAN 12 L/X) ●, I band. Navigation: SMA SPN-703; I-band.
Fire control: 2 Selenia SPG-70 (RTN 10X) ●, I/J-band; range 40 km (22 n miles) (for Argo).
 2 Selenia SPG-74 (RTN 20X) ●, I/J-band; range 15 km (8 n miles) (for Dardo)
 IFF, Mk XII.

Helicopters: 1 AB 212 ●.

Programmes: On 20 January 1992 it was decided to transfer the four ships built for Iraq to the Italian Navy. The original sale to Iraq was first delayed by payment problems and then cancelled in 1990 when UN embargoes were placed on military sales to Iraq. After several attempts by the Italian Defence Committee to cancel the project, finance was finally authorised in July 1993.

Modernisation: The details given are for the ships as modernised for Italian service. All ASW equipment removed, new combat and communications systems to Italian standards and a major upgrading of damage control and accommodation facilities. F 584 is unlikely to become the test platform for the 127/64 LW gun and Vulcano long-range guided munitions.

Operational: The first two commissioned with only machinery, damage control and accommodation upgraded. The weapon systems' changes were made during 1995. The last pair entered service fully modified. Official designation is Fleet Patrol Ships. *Granatiere* expected to be used as an interim Mine Command and Support Ship. F 582 and F 583 (expected to be decommissioned 2012-14) based at Taranto; F 584 and F 585 based at La Spezia.

 Thales TUS 4249 active/passive towed array.
 Mine avoidance sonar

BERGAMINI (GP variant)

(Scale 1 : 1,200), Ian Sturton / 1153004

Helicopters: 2 NH 90 or 1 NH 90 ● plus 1 EH 101.

Programmes: Agreement reached on 7 November 2002 for a 27 ship collaborative programme with France. The original Italian requirement was for 10 frigates with common hull and machinery in two variants. Four ASW and six GP (general purpose/land-attack) ships were to replace the Lupo and Maestrale classes. Contract for the first phase awarded on 16 November 2005 to Orizzonte Sistemi Navali (Fincantieri/Finmeccanica joint venture) for the construction of a first batch of two (1 GP, 1 ASW) ships. Plans to procure a second batch of four ships (1 GP, 3 ASW) were confirmed by the Italian government in 2008 but, following curtailment of the French programme, it is possible that plans for a third batch of four GP variants will be abandoned. Provisional

names for Batch 2 are: *Virginia Fasan; Luigi Rizzo; Alpino; Carabinieri*. There are no plans to acquire an AAW variant as Aster 15 and 30 can be fired from the A50 launcher.
Structure: The class has a conventional hull design. The main engine room contains the gas turbine and two diesel generators while the aft machinery space contains the motors. The Italian variants have a higher foredeck (an extra deck) than their French counterparts. Particular attention has been paid to signature reduction. The radar signature is expected to be comparable to that of the French La Fayette class while exhaust cooling measures are expected to achieve a comparatively low IR signature. Acoustic quietening is to be achieved by the rafting of engines and motors and the use of electric propulsion. The Italian variants are to be fitted with controllable pitch propellers.

CORVETTES

Notes: The future corvette programme is for six new ships to enter service 2018–2022. Outline requirements are for vessels of 2,000–2,500 tons displacement, 105–115 m length, 14–16 m beam, a speed of 30 kt and complement of 80 (accommodation for 120). A flight deck and hangar

to operate NH-90 or EH-101 helicopters is to be included. Main armament is to be a 76 mm Super-Rapid gun while the ships are also to have the capability to operate one 11 m and one 7 m RHIB. Propulsion is likely to be all-diesel in a CODAD arrangement. Other design features

are to include a reconfigurable deck, below the flight deck, for manned and unmanned craft, MCM vehicles, containerised mine laying and so on. Radar cross-section reduction measures are to be incorporated in a steel hull and composite superstructure.

8 MINERVA CLASS (FSM)

Displacement, tons: 1,029 light; 1,285 full load

Dimensions, feet (metres): 284.1 × 34.5 × 10.5 (86.6 × 10.5 × 3.2)

Main machinery: 2 Fincantieri GMT BM 230 20 DVM diesels; 11,000 hp(m) (8.1 MW) sustained; 2 shafts, cp props

Speed, knots: 24. **Range, n miles:** 3,500 at 18 kt

Complement: 106 (8 officers)

Missiles: SAM: Selenia Elsig Albatros octuple launcher (F 555–558) ●; 8 Aspide; semi-active radar homing to 13 km (7 n miles) at 2.5 Mach; height envelope 15–5,000 m (49.2–16,405 ft); warhead 30 kg. Capacity for larger magazine.

Guns: 1 OTO Melara 3 in (76 mm)/62 Compact ●; 85 rds/min to 16 km (8.7 n miles) anti-surface; 12 km (6.6 n miles) anti-aircraft; weight of shot 6 kg.

Torpedoes: 6—324 mm Whitehead B 515 (2 triple) tubes (F 555–558) ● Honeywell Mk 46, active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg. Being replaced by Whitehead Mu 90.

Countermeasures: Decoys: 2 Wallop Barricade double layer launchers for chaff and IR flares. SLQ-25 Nixie, towed torpedo decoy.

ESM/ECM: Selenia SLQ-747 intercept and jammer.

Combat data systems: Selenia IPN 10 Mini SADOX action data automation, Link 11, SATCOM.

DRIADE

Weapons control: 1 Elsig Dardo E system. Selenia/ Elsig NA 18L Pegaso optronic director ●. Elmer TLC system

Radars: Air/surface search: Selenia SPS-774 (RAN 10S) ●; E/F-band

Navigation: SMA SPN-728(V)2 ●; I-band.

Fire control: Selenia SPG-76 (RTN 30X) ●; I/J-band (for Albatros and gun).

Sonars: Raytheon/Elsig DE 1167; hull-mounted; active search and attack; 7.5–12 kHz.

Programmes: First four ordered in November 1982, second four in January 1987. A third four were planned, but this

plan was overtaken by the acquisition of the Artigliere class

Structure: The funnels remodelled to reduce turbulence and IR signature. Two fin stabilisers. The ships are not fitted for or with SSM

Operational: Omega transit fitted. Intended for a number of roles including EEZ patrol, fishery protection and Commanding Officers' training. SAM launchers and torpedo tubes removed from first four units which are likely to be dedicated to a training role. All based at Augusta, Sicily. The first four units are to be decommissioned in 2014–15 and the remainder by 2020.

SHIPBORNE AIRCRAFT

Notes: It is planned to procure up to 26 STOVL variants (F-35B) of the Joint Strike Fighter to enter service from about 2015.

Numbers/Type: 15/2 McDonnell Douglas AV-8B/TAV-8B Harrier II Plus.
Operational speed: 562 kt (1,041 km/h).
Service ceiling: 50,000 ft (15,240 m).
Range: 800 n miles (1,480 km).

Role/Weapon systems: Two trainers delivered in July 1991 plus 15 front line aircraft from 1994 to December 1997. Sensors: Radar derived from Hughes APG-65, FLIR, ALQ-164 ESM. Weapons: Maverick ASM, AMRAAM AIM-120B AAM; JDAM bombs and 25 mm cannon.

HARRIER PLUS

6/2005, Paul Jackson / 1153777

Numbers/Type: 22 Agusta/Westland EH 101 Merlin.
Operational speed: 180 kt (296 km/h).
Service ceiling: 15,000 ft (4,572 m).
Range: 550 n miles (1,019 km).

Role/Weapon systems: Primary anti-submarine role with secondary anti-surface and troop carrying capabilities. 16 ordered in October 1995 and approved in July 1997. Six delivered by mid-2002 and further 10 by June 2004. Total of eight for ASW/ASV, four for AEW and four amphibious support (ASH). Four further special operations aircraft ordered in 2002 for delivery 2005-06. Two additional ASV variants ordered in 2005. Sensors: APS-784 (ASW/ASV version), APS-717 (ASH version); Elradar HEW-784 (AEW version) radar, L3 HELRAS dipping sonar, Star Safire FLIR, ALR 735 ESM, ELT 156X ESM, Marconi RALM 1 decoys, Link 11, sonobuoy acoustic processor. Weapons: ASW: four Mk 46 or Mu 90 torpedoes. ASV: four Marte Mk 2/S ASM capability for guidance of ship-launched SSM.

EH 101

3/2008, Michael Nitz / 1335389

Numbers/Type: 1 NH Industries NH 90 NFH.
Operational speed: 157 kt (291 km/h).
Service ceiling: 13,940 ft (4,250 m).
Range: 621 n miles (1,150 km).

Role/Weapon systems: Two variants to replace the AB-212: 35 combat helicopters for ASW/ASV; 10 TTH utility/assault helicopters. First aircraft to be delivered in 2009. Sensors (ASW variant): Galileo Avionica ENR radar, Sagem DLOSP FLIR, L3 HELRAS dipping sonar, QTS-90 acoustic system processor. Weapons: Mu-90 torpedoes, Marte Mk 2/S ASM. TTH variant has no radar but is fitted with FLIR-111 navigation aid.

NH 90

3/2004, NHI / 0062373

Numbers/Type: 36 Agusta-Bell 212.
Operational speed: 106 kt (196 km/h).
Service ceiling: 17,000 ft (5,180 m).
Range: 360 n miles (667 km).

Role/Weapon systems: ASW/ECM/Assault helicopter; mainly deployed to escorts, but also shore-based for ASW support duties and nine used for assault. Five are for EW. To be replaced by NFH-90. Sensors: Selenia APS 705 (APS 707 in five Artigliere class aircraft) search/attack radar, Safire II EO turret (in some), AQS-13B dipping sonar or GUFO (not in Artigliere aircraft) ESM/ECM. Weapons: ASW; two Mk 46 torpedoes. Assault aircraft have an armoured cabin, no sensors and are armed with two 7.62 mm MGs and two 70 mm MRLs.

AB-212

6/2001, Adolfo Ortigueira Gil / 0578387

Numbers/Type: 24 Agusta-Sikorsky SH-3D/H Sea King.
Operational speed: 120 kt (222 km/h).
Service ceiling: 12,200 ft (3,720 m).
Range: 630 n miles (1,165 km).

Role/Weapon systems: ASW helicopter; embarked in larger ASW ships, including CVL; also shore-based for medium ASV/ASW in Mediterranean Sea; eight are fitted for ASV, 10 with ASW and EW equipment, six transport/assault. To be replaced by EH-101. Sensors: Selenia APS 705 search radar, AQS-13B dipping sonar, sonobuoys ESM/ECM. Weapons: ASW; four Mk 46 torpedoes. ASV; two Marte 2 missiles. Assault aircraft have armoured cabins, no sensors, and are armed with two 7.62 mm MGs.

SEA KING

6/2003, Adolfo Ortigueira Gil / 0570675

LAND-BASED MARITIME AIRCRAFT

Notes: (1) It is planned to procure up to eight Boeing P-8A Poseidon maritime patrol aircraft for entry into service in about 2015.

(2) It is planned to procure three Boeing 737 AEW Wedgetail aircraft (with option for one further) to be operated by a joint Navy/Air Force Squadron.

(3) One Agusta A 109 transport helicopter procured in 2002 for liaison duties.

(4) Five RQ-1B Predator are owned and maintained by the Italian Air Force. These can be controlled from the carrier *Giuseppe Garibaldi*.

Numbers/Type: 18 Bréguet Atlantic 1.
Operational speed: 355 kt (658 km/h).
Service ceiling: 22,800 ft (7,000 m).
Range: 4,855 n miles (8,995 km).

Role/Weapon systems: Air Force shore-based for long-range MR and shipping surveillance, wartime role includes ASW support to helicopters. Sensors: Thomson-CSF Iguane radar, ECM/ESM, MAD, sonobuoys; Marconi ASQ-902 acoustic system. Weapons: ASW; nine torpedoes (including Mk 46 torpedoes) or depth bombs or mines.

ATLANTIC

6/2005, Paul Jackson / 1153221

Numbers/Type: 15 Panavia Tornado IDS.
Operational speed: 2.2 Mach.
Service ceiling: 80,000 ft (24,385 m).
Range: 1,600 n miles (2,780 km).

Role/Weapon systems: Air Force swing wing strike and recce; part of a force of a total of 100 aircraft of which 15 are used for maritime operations based at Gioia de Colle. Sensors: Texas Instruments nav/attack systems. Weapons: ASV; four Kormoran missiles, two 27 mm cannon AD; four AIM 9L Sidewinder.

TORNADO IDS

8/2001, C Hoyle/Jane's / 0034970

400 Italy/Land-based maritime aircraft – Patrol forces

Numbers/Type: 3 Piaggio P-180 Avanti Maritime.

Operational speed: 260 kt (482 km/h)

Service ceiling: 39,000 ft (11,885 m)

Range: 1,195 n miles (2,213 km).

Role/Weapon systems: Maritime version of business aircraft. Two aircraft procured in 2002 for liaison duties since retrofitted with FLIR to conduct surveillance. Third aircraft ordered in 2005. Sensors: FLIR

P-180 MARITIME

7/2005, Massimo Anneti / 112/625

Numbers/Type: 4 EADS ATR-42.

Operational speed: 300 kt (556 km/h).

Service ceiling: 18,000 ft (5,485 m).

Range: 1,600 n miles (2,963 km)

Role/Weapon systems: Four aircraft ordered in 2005 for operation by the Navy in surveillance and SAR roles. Sensors: Airborne Tactical Observation and Surveillance System (ATOS), with two tactical consoles and one communication console; SV-2022 radar, Galileo EO/ST-23 FLIR, Elettronica ALR-733 ESM. Link-11 datalink, defensive suite with chaffs/flare launchers. Weapons: pod-mounted MG.

ATR-42

6/2005, Paul Jackson / 112/625

ORIONE	P 410	Fincantieri, Riva Trigoso	24 July 2002	1 Aug 2003

Displacement, tons: 1,520 full load

Dimensions, feet (metres): 290.0 x 40 x 15.1 (screws)
(88.4 x 12.2 x 4.6)

Main machinery: 2 GM Trieste-Wartsila W18-V 26 XIV diesels; 17,600 hp(m) (13.2 MW); 2 shafts, cp props, bow thruster

2 Wärtsilä 12V26X diesels (P 409-410), 11,585 hp (8.64 MW); 2 shafts; cp props; bow thruster

Speed, knots: 26 (22 kt for P 409-410)

Range, n miles: 3,500 at 14 kt

Complement: 60 (5 officers)

Guns: 1 Otobreda 3 in (76 mm)/62 compact (P 490-492 and P 409-410 (planned)) ●

1 Otobreda 3 in (76 mm)/62 Super Rapid (P 493).

2 Otobreda 25 mm/90 ●

Countermeasures: Decoys. Chaff launcher

ESM/ECM: Selenia SLO-747; intercept and jammer.

Combat data systems: AMS IPNS.

Weapons control: 1 optronic director ●

Radars: Surface search, SPS 791 (RAN-30X/1) ●; I-band

Fire control: SPG 76 (RTN 25X) ●; I/J-band.

Navigation: SPS 753 ●; I-band

Helicopters: 1 AB 212 ●; or NH90 in due course.

Programmes: Four (P 490-493) for the Navy, and two funded by the Ministry of Transport, manned by the Navy, but equipped with more simple command data systems for anti-pollution and SAR tasks.

Modernisation: A mid-life upgrade for P 490-493 is planned 2014-18. This is likely to include Davide 76 mm guided munitions

Structure: Stealth features in naval vessels include IR suppression and reduced radar cross-section. P 493 has a superstructure of composite material. P 409-410 appear to be less stealthy, have less powerful engines, no hangar and no countermeasures

Operational: All based at Augusta, Sicily

VEGA	P 404	Fincantieri, Muggiano	20 June 1989	24 Feb 1990	25 Oct 1990

Displacement, tons: 1,002 standard; 1,475 full load
Dimensions, feet (metres): 261.6 × 38.7 × 11.5
(79.8 × 11.8 × 3.5)

Flight deck, feet (metres): 72.2 × 26.2 (22 × 8)

Main machinery: 2 Fincantieri/GMT BL 230.16 M diesels,

7,940 hp(m) (5.84 MW) sustained; 2 shafts; LIPS cp props

Speed, knots: 20. Range, n miles: 3,300 at 17 kt

Complement: 85 (5 officers)

Guns: 1 OTO Melara 3 in (76 mm)/52; 60 rds/min to 16 km
(8.7 n miles); weight of shell 6 kg. Broda Oerlikon 25 mm/90.
2—12.7 mm MGs.

Weapons control: Argo NA 10.

Radars: Surface search: SMA SPS-702(V)2; I-band.

Nav gation: SMA SPN-748(V)2; I-band.

Fire control: Selenia SPG-70 (RTN 10X); I/J-band

Helicopters: 1 AB 212ASW

Programmes: Ordered in December 1986 for operations
in EEZ. Officially 'pattugliatori marittimi'. Funded by the
Ministry of Transport but all operated by the Navy.

Structure: Fitted for firefighting, rescue and supply tasks.
Telescopic hanger. The 20 mm guns were old stock taken
from deleted Bergamini class and have been replaced
by 25 mm guns. There is a 500 m³ tank for storing oil
polluted water.

Operations: All based at Augusta. To remain in service
until 2020.

(37.2 × 7.1 × 1.9)

Main machinery: 2 Isotta Fraschini M1712T2 diesels,

3,810 hp(m) (2.8 MW); 2 shafts

Speed, knots: 20. Range, n miles: 1,200 at 20 kt

Complement: 14 (2 officers)

Guns: 1 Oerlikon 20 mm/70. 2—7.62 mm MGs.

Weapons control: AESN Medusa optronic director to be fitted.

Radars: Surface search: 2 SPS-753B/C; F/I-band.

Comment: Ordered from Ortona Shipyard in December 1993
but the contract was then transferred to Coinaval Yards,
La Spezia in 1994 which caused inevitable delays and
construction did not start until 1995. An option on a fourth
of class, was taken up in February 1998 but shipbuilding
programme delayed launch until January 2001 when
it was transferred to Oromare shipyard for completion
which was further delayed by financial problems. Based
in Red Sea for Multinational Force Observer (MFO)
operations. To return to Adriatic on completion.

ESPLORATORE

3/2008, Giorgio Ghiglione / 1335467

AMPHIBIOUS FORCES

Notes: (1) Following the establishment of the National
Projection Force in 2006, two Amphibious Battle
Groups are to become operational in late 2008. Further
improvement to power projection capabilities forces, an
enhancement to amphibious lift, is under consideration.
The first step is the procurement of two 170 m LHDs of

16-18,000 tons to replace/supplement the present force.
To enter service in 2017 and 2022, broad capabilities are
to include accommodation for 450 troops, 1,000-1,200
lane-metres for vehicles, five landing spots on the flight
deck, a stern well-dock for four LCM and davits for three
LCVPs.

(2) A Ro-Ro ship MV *Major* built in 1984 is on long term
charter to the Army Mobility and Transport Command
6,830 tons displacement with 1,240 m of vehicle lanes. Can
carry 3,955 tons of cargo.

(3) There are also 54 Rigid Raider Craft in service with
Amphibious Forces.

2 PEDRETTI CLASS

(SPECIAL OPERATIONS SUPPORT CRAFT) (YDT)

Name	No	Builders	Commissioned
ALCIDE PEDRETTI	Y 499 (ex-MEN 213)	Crestitalia-Ameglia	23 Oct 1984
MARIO MARINO	Y 498 (ex-MEN 214)	Crestitalia-Ameglia	21 Dec 1984

Displacement, tons: 75.4 (*Alcide Pedretti*), 69.5 (*Mano Marino*) full load

Dimensions, feet (metres): 86.6 × 22.6 × 3.3 (26.4 × 6.9 × 1)

Main machinery: 2 Isotta Fraschini ID 36 SS 12V diesels; 2,840 hp(m) (1.94 MW) sustained;

2 shafts

Speed, knots: 25. Range, n miles: 450 (*Alcide Pedretti*), 250 (*Mano Marino*) at 23 kt

Complement: 8 (1 officer)

Radars: Navigation: I-band.

Comment: Both laid down 8 September 1983. For use by assault swimmers of COMSUBIN.
Both have decompression chambers. *Alcide Pedretti* has a floodable dock aft and is
used for combat swimmers and special operations, while *Mano Marino* is fitted for
underwater work and rescue missions. Based at Varignano, La Spezia. A similar but
more heavily equipped vessel serves with the UAE Navy.

ALCIDE PEDRETTI

9 MTM 217 CLASS (LCM)

MEN 217-222 MEN 227-228 MEN 551

Displacement, tons: 64.6 full load

Dimensions, feet (metres): 60.7 × 16.7 × 3 (18.5 × 5.1 × 0.9)

Main machinery: 2 Fiat diesels; 560 hp(m) (412 kW); 2 shafts

Speed, knots: 9

Range, n miles: 300 at 9 kt

Complement: 3

Military lift: 30 tons

Comment: First six built at Muggiano, La Spezia by Fincantieri. Three completed 9 October
1987 for *San Giorgio*, three completed 8 March 1988 for *San Marco*. Three more ordered
in March 1991 from Balzamo Shipyard and completed in 1993 for *San Giusto*. Others of
this class are also in service with the Army.

MEN 219 and 220

2000, M Anneti / 0104881

3 SAN GIORGIO CLASS (LPD)

Name	No	Builders	Laid down	Launched	Commissioned
SAN GIORGIO	L 9892	Fincantieri, Riva Trigoso	27 June 1985	25 Feb 1987	9 Oct 1987
SAN MARCO	L 9893	Fincantieri, Riva Trigoso	28 June 1986	21 Oct 1987	18 Mar 1988
SAN GIUSTO	L 9894	Fincantieri, Riva Trigoso	30 Nov 1992	2 Dec 1993	9 Apr 1994

Displacement, tons: 6,687 standard; 7,960 (8,000 *San Giusto*) full load

Dimensions, feet (metres): 449.5 (*San Giusto*); 437.2 × 67.3 × 17.4 (137; 133.3 × 20.5 × 5.3)

Flight deck, feet (metres): 328.1 × 67.3 (100 × 20.5)

Main machinery: 2 Fincantieri GMT A 420.12 diesels; 16,800 hp(m) (12.35 MW) sustained; 2 shafts; LIPS cp props, bow thruster

Speed, knots: 21. **Range, n miles:** 7,500 at 16 kt; 4,500 at 20 kt

Complement: 168 (12 officers), 167 (15 officers) (*San Giusto*)

Military lift: Battalion of 400 plus 30-36 APCs or 30 medium tanks, 2 LCMs in stern docking well, 3 (*San Giusto*) or 2 (*San Giorgio* and *San Marco*) LCVPs on sponsons, 1 LCPL

Guns: 1 OTO Melara 3 in (76 mm)/62 (Compact in *San Giusto*), 60 rds/min to 16 km (8.7 n miles); weight of shell 6 kg.

2 Breda Oerlikon 25 mm/90, 2—12.7 mm MGs.

Countermeasures: ESM: SLR 730; intercept.

ESM/ECM: SLQ-747 (*San Giusto*)

Combat data systems: Selenia IPN 20 (*San Giusto*) Marisat, SATCOM

Weapons control: Elsig NA 10.

Radars: Surface search: SMA SPS-702, I-band

Navigation: SMA SPN-748; I-band

Fire control: Selenia SPG-70 (RTN 10X), I/J-band

Helicopters: 3 SH-3D Sea King or EH 101 Merlin or 5 AB 212

Programmes: *San Giorgio* ordered 26 November 1983, *San Marco* on 5 March 1984 and *San Giusto* 1 March 1991. Launching dates of the first two are slightly later than the official launching ceremony because of poor weather and for the third because of industrial problems.

Modernisation: 25 mm guns replaced 20 mm from 1999. Modifications to *San Giorgio* include removal of the 76 mm gun, movement of LCVPs from davits to a new sponson, and lengthening and enlargement of the flight deck to allow two Merlin and two AB 212 to operate simultaneously on deck. Work completed in early 2003. Similar work on *San Marco* completed in March 2004. *San Giusto* has been fitted with an MCC data system to enable her to act as CJTF. *San Giusto* is to undergo a mid-life modernisation programme 2012-13.

Structure: Aircraft carrier type flight deck with island to starboard. Following modernisation, *San Giorgio* and *San Marco* have four landing spots, a stern docking well (20.5 × 7 m), 2 LCVPs on a port side sponson, a 30 ton lift and two 40 ton travelling cranes for LCMs. *San Giusto* is

SAN GIORGIO

8/2003, C D Yeylali / 0570661

SAN MARCO

6/2007, Ships of the World / 1166592

of similar design, but was 300 tons heavier on build to include extra accommodation, 3 LCVP sponsons and a slightly longer island. Bow doors and beaching capability removed from *San Marco* and *San Giorgio* in refit.

Operational: *San Marco* was paid for by the Ministry of Civil Protection, is specially fitted for disaster relief but

is run by the Navy. All are based at Brindisi and assigned to COMFORAL. One of the three ships carries out the annual Summer cruise for officer and petty officer cadets. *San Giorgio* and *San Marco* are expected to decommission in 2017 and 2022 respectively when replaced by new LHDs.

SAN GIUSTO

9/2004, John Brodie / 1044369

0 + 4 MODIFIED MTM 217 CLASS (LCM)

Displacement, tons: 34 standard; 65 full load

Dimensions, feet (metres): 64.0 × 16.7 × 3.0 (19.5 × 5.1 × 0.9)

Main machinery: 2 diesels, 2 shafts

Speed, knots: 9. **Range, n miles:** 300 at 9 kt

Complement: 3

Comment: Four new LCM under construction at Vittoria Shipyard, Adria. Slightly larger versions than MTM 217 class to accommodate latest army armoured vehicles. Ballistic protection fitted. Delivery expected from mid-2009.

17 MTP 96 CLASS (LCVP)

MDN 94-104

MDN 108-109

MDN 114-117

Displacement, tons: 14.3 full load

Dimensions, feet (metres): 44.9 × 12.5 × 2.3 (13.7 × 3.8 × 0.7)

Main machinery: 2 diesels; 700 hp(m) (515 kW); 2 shafts or 2 water-jets

Speed, knots: 29 or 22. **Range, n miles:** 100 at 12 kt

Complement: 3

Comment: Built by Technomatic Ancona in 1985 (two), Technomatic Bari in 1987-88 (six) and Technoplast Venezia 1991-94 (nine). Can carry 45 men or 4.5 tons of cargo. These craft have Kevlar armour. The most recent versions have water-jet propulsion which gives a top speed of 29 kt (22 kt fully laden). This is being backfitted to all GRP LCVPs.

MDN 101

10/2001, Chris Sattler / 01.80326

MINE WARFARE FORCES

Notes. Following a feasibility study completed by Intermarine in 2003, four new larger MCM vessels are planned to enter service in about 2020. The new vessels are to be faster than traditional MCM units, have a better signature reduction (acoustic, magnetic, IR and radar), longer range, and superior armament and countermeasures. The new MCMV is to be capable of operating as a platform for remotely controlled autonomous unmanned vehicles, capable of both minehunting and minesweeping. These are likely to be based on four types: Remus, Pluto Gigas, RHIB-based USV, Mi-Ki (Plutino) one-shot mine-destroyers.

12 LERICI/GAETA CLASS (MINEHUNTERS/SWEEPERS) (MHSC)

Name	No	Builders	Launched	Commissioned
LERICI	M 5550	Intermarine, Sarzana	3 Sep 1982	22 Mar 1985

MILAZZO	M 5552	Intermarine, Sarzana	4 Jan 1985	6 Aug 1985
VIESTE	M 5553	Intermarine, Sarzana	18 Apr 1985	2 Dec 1985
GAETA	M 5554	Intermarine, Sarzana	28 July 1990	3 July 1992
TERMOLI	M 5555	Intermarine, Sarzana	15 Dec 1990	13 Nov 1992
ALGHERO	M 5556	Intermarine, Sarzana	11 May 1991	31 Mar 1993
NUMANA	M 5557	Intermarine, Sarzana	26 Oct 1991	30 July 1993
CROTONE	M 5558	Intermarine, Sarzana	11 Apr 1992	19 Jan 1994
VIAREGGIO	M 5559	Intermarine, Sarzana	3 Oct 1992	1 July 1994
CHIOGGIA	M 5560	Intermarine, Sarzana	9 May 1994	19 May 1996
RIMINI	M 5561	Intermarine, Sarzana	17 Sep 1994	26 Nov 1996

Displacement, tons: 620 (697, *Gaeta* onwards) full load
Dimensions, feet (metres): 164 (172.1 *Gaeta*) x 32.5 x 8.6 (50 (52.6) x 9.9 x 2.6)
Main machinery: 1 Fincantieri GMT BL 230.8 M diesel (passage); 1,985 hp(m) (1.46 MW) sustained; 1 shaft; LIPS cp prop; 3 Isotta Fraschini ID 36 SS 6V diesels (hunting), 1,481 hp(m) (1.1 MW) sustained; 3 hydraulic 360° rotating thrust props, 506 hp(m) (372 kW) (1 fwd, 2 aft)
Speed, knots: 14, 6 hunting **Range, n miles:** 1,500 at 14 kt
Complement: 44 (4 officers) including 7 divers

Guns: 1 Oerlikon 20 mm/70
Countermeasures: Minehunting: 1 Plutogigas and 1 Pluto standard RoV; 1 SMIN Mk 2 and 1 Pluto Plus (*Gaeta* onwards); diving equipment and Galeazzi recompression chamber; Galeazzi Z1 two-man recompression chamber (*Gaeta* onwards)
Minesweeping: Oropesa Mk 4 wire sweep.
Combat data systems: Motorola MRS III/GPS Eagle precision navigation system with Datamat SMA

SSN-714V(3) automatic plotting and radar indicator IP-7113 Datamat SMA SSN-714 V(2) (*Gaeta* onwards).
Radars: Navigation: SMA SPN-728V(3); I-band
Sonars: FIAR SQQ 14(IT)VDS (lowered from keel forward of bridge); classification and route survey; high frequency.
Programmes: First four (*Lerici* class) ordered 7 January 1978 under Leggo Navale. Next six (*Gaeta* class) ordered from Intermarine 30 April 1988 and two more in 1991. The *Gaeta*-class ships are 2 m longer and are of an improved design. Construction of *Gaetas* started in 1988. The last pair delayed by budget cuts but re-ordered on 17 September 1992.
Modernisation: Improvements to *Gaeta* class include a better minehunting sonar system which was backfitted to the *Lerici* class in 1991. Other *Gaeta* upgrades include a third hydraulic system, improved electrical generators, Pluto Gigas ROV, a new type of recompression chamber, and a reduced magnetic signature. Modernisation of the eight *Gaeta* class is to be implemented 2010-2013.

Upgrades are planned to include replacement of SQQ-14 sonar with Thales 2093; a new combat data system Datamat 712(V)3; replacement of the SMIN Mk 2 ROVs with Plutogigas and provision of Plutino. Miki expendable mine neutralisation system. Some alterations to the superstructure will be required.
Structure: Of heavy GRP throughout hull, decks and bulkheads, with frames eliminated. All machinery is mounted on vibration dampers and main engines made of a magnetic material. Fitted with crane for launching RoVs and for diving operations.
Operational: Endurance, 12 days. For long passages passive roll-stabilising tanks can be used for extra fuel increasing range to 4,000 miles at 12 kt.
 Two *Lerici* class are likely to decommission in 2015 and the other two in 2020.
Sales: Four to Malaysia, two to Nigeria, two to Thailand and three to Finland. 12 of a modified design built by the US and six by Australia

LERICI 1/2008, Giorgio Ghiglione / 1335468

RIMINI 1/2008, Giorgio Ghiglione / 1335468

SURVEY AND RESEARCH SHIPS

1 SURVEY SHIP (AGORH/AGE/AGI)

Name	No	Builders	Commissioned
ELETTRA	A 5340	Fincantieri, Muggiano	2 Apr 2003

Displacement, tons: 3,180 full load
Dimensions, feet (metres): 305.1 × 49.9 × 12.1 (93 × 15.2 × 5.2)
Main machinery: Diesel electric; 2 Wartsila CW 12V 200 diesel generators; 5,750 kVA, 2 ABB motors; 4,023 hp (3 MW); 2 shafts; bow thruster
Speed, knots: 17. **Range, n miles:** 8,000 at 12 kt
Complement: 94 (12 officers)
Radars: Navigation; I-band.
Helicopters: Platform for one medium.

Comment: Ordered on 1 December 1999; construction started in March 2000 and launch on 24 July 2002. The design is derived from that of the NATO *Alliance* but is equipped as an intelligence collector. The propulsion system, based on two multi permanent magnet electric motors, is the first of its type to be fitted in a surface vessel.

ELETTRA 9/2008*, Giorgio Ghiglione / 1335470

1 SURVEY SHIP (AGSH)

Name	No	Builders	Commissioned
AMMIRAGLIO MAGNAGHI	A 5303	Fincantieri, Riva Trigoso	2 May 1975

Displacement, tons: 1,700 full load
Dimensions, feet (metres): 271.3 × 44.9 × 11.5 (82.7 × 13.7 × 3.5)
Main machinery: 2 GMT B 306 SS diesels; 3,000 hptm (2.2 MW); 1 shaft; cp prop; auxiliary motor; 240 hp(m) (176 kW); bow thruster
Speed, knots: 16. **Range, n miles:** 6,000 at 12 kt (1 diesel); 4,200 at 16 kt (2 diesels)
Complement: 148 (14 officers, 15 scientists)
Guns: 1 Breda 40 mm/70 (not fitted).
Radars: Navigation. SMA 3 RM 20; I-band.
Helicopters: Platform only.

Comment: Ordered under 1972 programme. Laid down 13 June 1973. Launched 11 October 1974. Full air conditioning, bridge engine controls, flume-type stabilisers. Equipped for oceanographical studies including laboratories and underwater TV. Two Qubit Trac V integrated navigation and logging systems and a Chart V data processing system installed in 1992 to augment the existing Trac 100-based HODAPS. Carries four surveying motor boats and up to two RHIBs. To be decommissioned 2012–13.

AMMIRAGLIO MAGNAGHI 7/2008*, Giorgio Ghiglione / 1335479

2 SURVEY SHIPS (AGS)

Name	No	Builders	Commissioned
ARETUSA	A 5304	Intermarine	10 Jan 2002
GALATEA	A 5308	Intermarine	10 Jan 2002

Displacement, tons: 415 full load
Dimensions, feet (metres): 128.6 × 41.3 × 8.2 (39.2 × 12.6 × 2.6)
Main machinery: Diesel electric; 2 Isotta Fraschini V170812 ME diesels; 2 ABB generators 1,904 hp(m) (1.4 MW); 2 shafts, Schottel props; 2 bow thrusters
Speed, knots: 13. **Range, n miles:** 1,700 at 13 kt
Complement: 29 (4 officers)
Guns: 2—7.62 mm MGs.
Radars: 2 Navigation; I-band.

Comment: GRP catamaran design. Ordered in January 1998. *Aretusa* launched 8 May 2000 and *Galatea* 7 June 2000. Fitted with Kongsberg EA 500 single-beam echo sounder, towed sidescan sonar and dynamic positioning system.

GALATEA 1/2004, Giorgio Ghiglione / 1044371

1 RESEARCH SHIP (AG/AGOR)

Name	No	Builders	Launched	Commissioned
RAFFAELE ROSSETTI	A 5315	Picchiotti, Viareggio	12 July 1986	20 Dec 1986

Displacement, tons: 320 full load
Dimensions, feet (metres): 146.3 × 25.9 × 6.9 (44.6 × 7.9 × 2.1)
Main machinery: 2 Fincantieri Isotta Fraschini ID 36 N 6V diesels; 3,520 hp(m) (2.55 kW) sustained; 2 shafts; cp props; bow thruster
Speed, knots: 17.5
Range, n miles: 700 at 15 kt
Complement: 17 (2 officers)

Comment: Five different design torpedo tubes fitted for above and underwater testing and trials. Other equipment for research into communications, surface and air search as well as underwater weapons. There is a stern doorway which is partially submerged and the ship has a set of 96 batteries to allow 'silent' propulsion. Operated by the Permanent Commission for Experiments of War Materials at La Spezia.

RAFFAELE ROSSETTI 4/2005, Giorgio Ghiglione / 1153247

1 RESEARCH SHIP (AG/AGE)

Name	No	Builders	Commissioned
VINCENZO MARTELLOTTA	A 5320	Picchiotti, Viareggio	22 Dec 1990

Displacement, tons: 340 full load
Dimensions, feet (metres): 146.3 × 25.9 × 7.5 (44.6 × 7.9 × 2.3)
Main machinery: 2 Fincantieri Isotta Fraschini ID 36 SS 16V diesels; 3,520 hp(m) (2.59 MW) sustained; 2 shafts; cp props; bow thruster
Speed, knots: 17. **Range, n miles:** 700 at 15 kt
Complement: 19 (2 officers)

Comment: Launched on 28 May 1988. Has one 21 in (533 mm) and three 12.75 in (324 mm) torpedo tubes and acoustic equipment to operate a 3-D tracking range for torpedoes or underwater vehicles. Like *Rossetti* she is operated by the Commission for Experiments at La Spezia.

VINCENZO MARTELLOTTA 9/2008*, Giorgio Ghiglione / 1335471

TRAINING SHIPS

Notes: (1) In addition to the ships listed the LPDs are used in a training role
 (2) There is a requirement for new training ships to replace the *Aragosta* class but the programme is not funded

1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Commissioned
AMERIGO VESPUCCI	A 5312	Castellammare	15 May 1931

Displacement, tons: 3,543 standard; 4,146 full load
Dimensions, feet (metres): 229.5 pp; 270 oa hull, 330 oa bowsprit × 51 × 22 (70; 82.4; 100 × 15.5 × 7)
Main machinery: Diesel-electric; 2 Fiat B 306 ESS diesel generators, 2 Marelli motors, 2,000 hp(m) (1.47 MW); 1 shaft
Speed, knots: 10. **Range, n miles:** 5,450 at 6.5 kt
Complement: 243 (13 officers)
Radars: Navigation 2 SMA SPN-748; I-band.

Comment: Launched on 22 March 1930. Hull, masts and yards are of steel. Sail area, 22,604 sq ft. Extensively refitted at La Spezia Naval Dockyard in 1973 and again in 1984. Used for Naval Academy Summer cruise with up to 150 trainees.

AMERIGO VESPUCCI 7/2004, Ships of the World / 1044364

1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Commissioned
PALINURO (ex-Commandant Louis Richard)	A 5311	Ch Dubigeon, Nantes	1934

Displacement, tons: 1,042 standard; 1,450 full load
 Measurement, tons: 858 gross
 Dimensions, feet (metres): 193.5 x 32.8 x 15.7 (59 x 10 x 4.8)
 Main machinery: 1 GMT A 230 6N diesel, 600 hp (447 kW); 1 shaft
 Speed, knots: 7.5
 Range, n miles: 5,390 at 7.5 kt
 Complement: 69 (6 officers)
 Radars: Navigation, SPN-748; I-band.

Comment: Barquentine launched in 1934. Purchased in 1951. Rebuilt in 1954-55 and commissioned in Italian Navy on 1 July 1955. Sail area, 1,152 sq ft. She was one of the last two French Grand Bank cod-fishing barquentines. Owned by the Armement Glâtre she was based at St Malo until bought by Italy. Used for seamanship basic training

PALINURO 10/2008*, Giorgio Ghiglione / 1335480

3 ARAGOSTA (HAM) CLASS (AXL)

ASTICE A 5379	MITILO A 5380	PORPORA A 5382
----------------------	----------------------	-----------------------

Displacement, tons: 188 full load
 Dimensions, feet (metres): 106 x 21 x 6 (32.5 x 6.4 x 1.8)
 Main machinery: 2 Fiat-MTU 12V 493 TY7 diesels; 2,200 hp(m) (1.62 MW) sustained; 2 shafts
 Speed, knots: 14
 Range, n miles: 2,000 at 9 kt
 Complement: 13 (2 officers)
 Radars: Navigation: BX 732; I-band.

Comment: Builders: CRDA, Monfalcone; *Astice*, Picchiotti, Viareggio; *Mitilo*, Costaguta, Voltri; *Porpora*. Similar to the late UK Ham class. All constructed to the order of NATO in 1955-57. Designed armament of one 20 mm gun not mounted. Originally class of 20. Remaining three converted for training 1986. *Porpora* used by the Naval Academy. *Astice* has a modified bridge structure. To be decommissioned in 2012.

ASTICE 1/2008*, Giorgio Ghiglione / 1335477

5 SAIL TRAINING YACHTS (AXS)

Name	No	Builders	Commissioned
CAROLY	A 5302	Baglietto, Varazze	1948
STELLA POLARE	A 5313	Sangermani, Chiavari	8 Oct 1965
CORSARO II	A 5316	Costaguta, Voltri	5 Jan 1961
CAPRICIA	A 5322	Bengt-Plym	1963
ORSA MAGGIORE	A 5323	Tencara, Venezia	1994

Comment: The first three are sail training yachts between 40 and 60 tons with a crew including trainees of about 16. *Capricia* is a yawl of 55 tons and was donated by the Agnelli foundation as replacement for *Cristoforo Colombo II* which was not completed when the shipyard building her went bankrupt. *Capricia* commissioned in the Navy 23 May 1993. *Orsa Maggiore* is a ketch of 70 tons.

STELLA POLARE 7/2007, Giorgio Ghiglione / 1166587

1 SAIL TRAINING SHIP (AXS)

ITALIA

Displacement, tons: 32 full load
 Dimensions, feet (metres): 61.0 x 9.2 x 7 (200.0 x 30.2 x 7)
 Main machinery: 1 diesel; 490 hp (358 kW)
 Complement: 10 plus 100 passengers

Comment: The world's largest brigantine donated by the Italian Yacht Club to the Italian Navy in 2008. The vessel has 1,300 m² of sails.

ITALIA 6/2008*, Annati Collection / 1335388

For details of the latest updates to *Jane's Fighting Ships* online and to discover the additional information available exclusively to online subscribers please visit jfs.janes.com

RESCUE VEHICLES

1 RESCUE SUBMERSIBLE

SRV 300

Displacement, tons: 27
Dimensions, feet (metres): 27.7 × 10.2 × 10.4 (8.46 × 3.13 × 3.17)
Main machinery: 1 electric motor; 27 hp (20 kW); 2 transverse/vertical thrusters; 27 hp (20 kW)
Speed, knots: 2.5. **Range, n miles:** 15 at 2 kt
Complement: 2

Comment: Free-swimming Submarine Rescue Vehicle (SRV) built by Drass Galeazzi Srl which entered service in 2005. The SRV can be launched and recovered in up to Sea State 3 from *Anteo* or a suitably equipped commercial or military 'mothership' equipped with a portable launch-and-recovery system. SRV 300 can mate at up to angles of 45° and is capable of rescuing groups of up to 12 at a time. Capable of reaching depths down to 300 m, the vehicle is equipped with an external manipulator and underwater television cameras

SRV 300

6/2008*, Italian Navy / 1305307

AUXILIARIES

Notes: (1) It is planned to replace *Stromboli* and *Vesuvio* with two new Logistic Support ships. The broad requirement is for double-hulled ships, to comply with MARPOL regulations, of about 18,000 tons displacement and capable of 20 kt. Equipped with two RAS fuel stations per side, one stern fuel station and one RAS solid station per side, the ships are to carry of the order of 6,400 cum F76 diesel, 1,500 cum F44 aviation fuel, 1,000 cum fresh

water, 300 tons of aviation and naval ordnance, 120 tons of provisions and spares and space for 12 TEU containers. There is to be a hangar for one EH-101 and a 20-bed hospital to provide role 2 medical support. The complement is to be approximately 165 with accommodation for over 200. An order is expected in 2012.

(2) Replacement of the submarine-rescue and deep-diving support capability by an Underwater Support Ship

is under consideration. The preferred solution to replace *Anteo* and the decommissioned *Proteo* is likely to be the lease of a purpose-built platform capable of acting as mother-ship for a submarine rescue system as well as support for deepwater divers and MCM. A contract is expected in 2009

1 ETNA CLASS (REPLENISHMENT TANKER) (AORH)

Name	No	Builders	Laid down	Launched	Commissioned
ETNA	A 5326	Fincantieri, RivaTrigoso	4 July 1995	12 July 1997	29 Aug 1998

Displacement, tons: 13,400 full load
Dimensions, feet (metres): 480.6 × 68.9 × 24.3 (146.5 × 21 × 7.4)
Flight deck, feet (metres): 91.9 × 68.9 (28 × 21)
Main machinery: 2 Sulzer 12 ZAV 40S diesels; 22,400 hp(m) (16.46 MW) sustained, 2 shafts, bow thruster
Speed, knots: 21
Range, n miles: 7,600 at 18 kt

Complement: 162 (14 officers) plus 81 spare
Cargo capacity: 6,350 tons gas oil; 1,200 tons JP5; 2,100 m³ ammunition and stores
Guns: 1 OTO Melara 76 mm/62. 2 Breda Oerlikon 25 mm/93.
Radars: Surface search: SMA SPS-702(V)3; I-band.
Navigation: GEM SPN 753; I-band.
Helicopters: 1 EH 101 Merlin or SH-3D or 2 AB 212.

Comment: Details revised in 1992 for an order 29 July 1994. Construction authorised on 3 January 1995. The main gun is not fitted, and the specification includes a CIWS on the hangar roof. Two RAS stations on each side. A similar ship has been built for Greece. A major upgrade to C⁴ capability has given the ship a Maritime Component Commander capability. A mid-life update is planned 2014–15.

ETNA

3/2008*, Michael Nitz / 1335381

2 STROMBOLI CLASS (REPLENISHMENT TANKERS) (AORH)

Name	No	Builders	Launched	Commissioned
STROMBOLI	A 5327	Fincantieri, Riva Trigoso	20 Feb 1975	20 Nov 1975
VESUVIO	A 5328	Fincantieri, Muggiano	4 June 1977	18 Nov 1978

Displacement, tons: 3,556 light, 8,708 full load
Dimensions, feet (metres): 423.1 × 59 × 21.3 (129 × 18 × 6.5)
Main machinery: 2 GMT C428 SS diesels; 9,600 hp(m) (7.06 MW); 1 shaft; LIPS cp prop
Speed, knots: 18.5. **Range, n miles:** 5,080 at 18 kt
Complement: 131 (10 officers)
Cargo capacity: 3,000 tons FPO; 1,000 tons dieso; 400 tons JP5. 300 tons other stores
Guns: 1 OTO Melara 3 in (76 mm)/62. 1–40 mm. 2–25 mm.
Weapons control: Argo NA 10 system.
Raders: Surface search. SMA SPQ-2; I-band.
Navigation: SMA SPN-748; I-band.
Fire control: Selenia SPG-70 (RTN 10X), I/J-band
Helicopters: Platform for 1 medium.

Comment: *Vesuvio* was the first large ship to be built at Muggiano (near La Spezia) since the Second World War and the first with funds under Legge Navale 1975. Beam and stern refuelling stations for fuel and stores. Also Vertrep. The two ships have different midships crane arrangements. Similar ship built for Iraq and laid up in Alexandria since 1986. 20 mm guns replaced by 25 mm from 2002. To remain in service until replaced by Logistic Support Ships from about 2014.

Name	No	Builders	Launched	Commissioned
ANTEO	A 5309	C N Breda-Mestre	11 Nov 1978	31 July 1980

Displacement, tons: 3,200 full load
Dimensions, feet (metres): 322.8 × 51.8 × 16.7 (98.4 × 15.8 × 5.1)
Main machinery: 2 GMT A 230.12 diesels, 5,000 hp(m) (3.68 MW); 2 motors; 6,000 hp(m) (4.41 MW); 1 shaft; 2 bow thrusters; 1,000 hp(m) (735 kW)
Speed, knots: 20. **Range, n miles:** 4,000 at 14 kt
Complement: 121 (including salvage staff)
Guns: 2 Oerlikon 20 mm/70 fitted during deployments.
Radars: Surface search: SMA SPN-751; I-band.
Navigation: SMA SPN-748; I-band.
Helicopters: 1 AB 212.

Comment: Ordered mid-1977. Comprehensively fitted with flight deck and hangar, extensive salvage gear, including rescue bell and recompression chambers. Carries four lifeboats of various types. Three firefighting systems. Full towing equipment. Carries midget submarine, *Usoi*, of 13.2 tons dived with dimensions 26.2 × 8.2 × 8.9 ft (8 × 1.9 × 2.7 m). Carries SRV 300 rescue vehicle, launched and recovered from the stern, and a McCann diving bell. An atmospheric diving suit or 'newsuit' can also be deployed. To be replaced by Underwater Support Ship in about 2012.

**ANTEO** 7/2007, Marco Ghiglione / 1170077**7 DEPOLI CLASS TANKERS (AOTL/AWT)**

ARMY

Notes: The following units are operated by the 'Serenissima Amphibious Regiment' in the Venice Lagoons area. EIG means Italian Army Craft and is part of the hull number. Four LCM (EIG 28-31), 60 tons; two LCVP (EIG 26, 27), 13 tons; four recce craft (EIG 32, 33, 48, 49), 5 tons; two command craft (EIG 208, 210), 21.5 tons; one rescue tug (EIG 209), 45 tons; one inshore tanker (EIG 44), 95 tons; one ambulance and rescue craft (EIG 142) and about 70 minor craft (ferries, barges, river boats, rigid inflatable raiders).

ARMY CRAFT

7/1993, van Ginderen Collection / 0375865

GOVERNMENT MARITIME FORCES

Notes: Consideration has been given to combine all these forces into one Coast Guard.

CUSTOMS (SERVIZIO NAVALE GUARDIA DI FINANZA)

Notes: (1) The force is operated by the Ministry of Finance but in time of war would come under the command of the Marina Militare. The force is organised into five air-naval task groups based at La Spezia, Cagliari, Taranto, Messina and Trapani. Each is composed of one command craft (Zere or Mazzei classes), six to nine FPS (Bigliani or Corrubia classes), three to four AB-412HP helicopters and up to two NH-500 helicopters. All the fixed-wing aircraft (12 P-166 (being upgraded to DP1 configuration) and three ATR-42) are based at Pratica di Mare within the Air Scouting Squadron. Other components include a technical-logistic support centre at Nisida and the Nautical Training Centre at Gaeta. There are a further 14 minor bases.

(2) In addition to the classes detailed, there is a large number of smaller (under 15 m) craft. These include: 30 V 5500 class (12.5 m); 18 V 5800 class (12.6 m); 26 VAI 200 class (9.9 m)

ATR-42

1 ANTONIO ZARA CLASS (PB)

Name	No	Builders	Commissioned
GIOVANNI DENARO	P 03	Fincantieri, Muggiano	20 Mar 1998

Displacement, tons: 340 full load
Dimensions, feet (metres): 167 x 24.6 x 8.2 (51 x 7.5 x 1.9)
Main machinery: 2 GMT BL 230 12 M diesels; 5,956 hp(m) (4.38 MW) sustained; 2 shafts
 4 MTU 16V 396 TB94 diesels; 13,029 hp(m) (9.58 MW) sustained; 2 shafts (P 03)
Speed, knots: 27, 35 (P 03)
Range, n miles: 3,800 at 15 kt
Complement: 33 (3 officers)
Guns: 1 or 2 Breda 30 mm/70 (single or twin), 2—7.62 mm MGs.
Weapons control: Selenia Pegaso or AESN Medusa (P 03) optronic director.
Radars: Surface search: Gemant 2 ARPA and SPN 749, I-band.

Comment: Similar to the Ratcharit class built for Thailand in 1976–79. First pair ordered in August 1987. Third ordered in October 1995 with more powerful engines and with a modified armament of a single 30 mm gun with a Medusa optronic director. All are fitted with an infra-red search and surveillance sensor (AMS SVIR). The first pair were decommissioned in 2007.

Comment: First eight built by Crestitalia and delivered from October 1987 to September 1992. Three more were ordered from Crestitalia/Intermarine in October 1994 and were delivered from December 1996 to April 1997. A fourth was delivered in late 1999. There are minor structural differences between Series I (G 80-81), Series II (G 82-87) and Series III (G 78-79, G 88-89). Ten series IV (G 116-125) craft ordered from Intermarine, Sarzana, for delivery in 2004-06. These include Kevlar armour and are fitted with a remote-control Breda 12.7 mm gun and 40 mm grenade launcher. All are being fitted with an infra-red search and surveillance sensor (AMS SVIR). A further five craft (G 126-130) are under construction. These are stretched versions to be delivered in 2009.

COAST GUARD (GUARDIA COSTIERA—CAPITANERIE DI PORTO)

Notes: This is a force which is affiliated with the Marina Militare under whose command it would be placed in an emergency. The Coast Guard denomination was given after the Sea Protection Law in 1988. The force is responsible for the Italian Maritime Rescue Co-ordination Centre (MRCC) in Rome and 13 sub-centres (MRSC). The SAR network consists of 109 stations, three air stations and one helicopter station. All vessels have red diagonal stripe painted on the white hull and many are armed with 7.62 mm MGs. There are some 10,500 naval personnel including 1,200 officers of which about half are doing national service. Ranks are the same as the Navy. In addition to the Saettia class (detailed separately), the following craft are in service. All have the prefix CP (Capitaneria di Porto):

- 1 SAR craft: *Giulio Inganni* CP 409 (205 tons); *Francesco Mazzinghi* CP 405, *Antonio Scialoja* CP 406, *Michele Lolini* CP 407, *Mario Grabar* CP 408 (136 tons), *Oreste Cavallari* CP 401, *Renato Pennetti* CP 402, *Walter Fachin* CP 403, *Gaetano Magliano* CP 404 (100 tons); CP 314-318 (45 tons).
- 2 Fast Patrol craft: CP 265-292 (54 tons), CP 261-264 (30 tons), CP 245-260 (22 tons), CP 454-456 (18.4 tons).
- 3 Inshore Patrol Craft: five craft CP 2201-CP 2205 (15 tons); 51 craft CP 2001-CP 2083 (9-15 tons); 20 craft CP 2084-CP 2103 (11.7 tons), 65 craft CP 506-CP 571 (7.5 tons); 8 craft CP 6002-CP 6021 (3.7 tons); 13 craft CP 801-CP 813 (9.1 tons); 25 craft CP 814-CP 824, CP 863-CP 871, CP 882-CP 883, CP 890-CP 892 (12.5 tons); 6 craft CP 829-CP 831, CP 836-CP 838 (12 tons); 48 craft CP 825-CP 828, CP 832-CP 835, CP 839-CP 862, CP 872-CP 881, CP 884-CP 889 (12 tons); 60 RHIB CG 20 class.
- 4 Aircraft include 14 Piaggio P 186 DL3-SEM and two ATR 42MP maritime patrol, 12 Giffon AB-412-CP helicopters and two AW 139 helicopters.
5. CP 451 is a 1,278 ton training ship (ex-US ATF *Bannock*); *Barbara* CP 452 (180 tons) is a former naval Range Safety patrol craft which recommissioned in late 1999
6. CP 210 and CP 211 are airboats used for SAR in the Venice Lagoon area.

6 SAETTIA CLASS (SAR)

Name	No	Builders	Commissioned
SAETTIA	CP 901	Fincantieri, Muggiano	Dec 1985
UBALDO DICCIOTTI	CP 902	Fincantieri, Muggiano	20 July 2002
LUIGI DATTILO	CP 903	Fincantieri, Muggiano	28 Nov 2002
MICHELE FIORILLO	CP 904	Fincantieri, Muggiano	7 Apr 2003
ANTONIO PELUSO	CP 905	Fincantieri, Muggiano	2 July 2003
ORAZIO CORSI	CP 906	Fincantieri, Muggiano	7 Feb 2004

Displacement, tons: 427 full load
Dimensions, feet (metres): 173.3 x 26.6 x 6.6 (52.8 x 8.1 x 2.0)
Main machinery: 4 Isotta Fraschini V1716T2MSD diesels; 12,660 hp (9.44 MW); 4 cp props, bow thruster
Speed, knots: 29. **Range, n miles:** 1,800 at 18 kt
Complement: 30 (2 officers)
Guns: 1 Oerlikon 20 mm/70.
Weapons control: Eurocontrol optronic sensor.
Radars: Surface search: SPN 753; I-band.

Comment: Details are for CP 902 906 which were ordered on 29 June 2000. CP 901 was built as an attack missile craft demonstrator by Fincantieri in 1984 and was later taken over by the Coast Guard on 20 July 1999. 30 tons lighter and with some structural differences, she is powered by 4 MTU 16V538 TB93 engines providing 17,598 hp and a top speed of 40 kt. She is armed with an Otobreda 25 mm gun. All the vessels form a 'Squadria' based at Messina, Sicily, whose role is fishery protection and immigration control.

ANTONIO PELUSO

10/2008, Giorgio Ghiglione / 1335483

POLICE (SERVIZIO NAVALE CARABINIERI)

Notes: (1) The Carabinieri established its maritime force in 1969 and has some 600 personnel. There are 172 craft in service or building which operate in coastal waters within the 3 mile limit and in inshore waters. Craft currently in service include: 23-800 class of 28 tons; 6-700 class of 15 tons; 22-600 class of 12 tons; 25 N 500 class of 6 tons; 3 S 500 class of 18 tons; 72-200 class of 2 tons. 28 minor craft and 30 RHIBs.

Most are capable of 20 to 25 kt except the 800 class at 35 kt.
 (2) The 700 class programme was cancelled after delivery of the first craft in 2006.
 (3) There is also a Sea Police Force of the State. All craft have POLIZIA written on the side. Vessels include 37 Squalo class of 14 tons, 4 Nelson class of 11 tons, 7 Intermarine class of 8.4 tons, 37 Crestalia class of 6 tons and 25 Aquamaster/Drago classes of 3 tons. Speeds vary between 23 and 45 kt.

809

11/2007, Marco Ghiglino / 1170072

Jamaica

Country Overview

Jamaica gained independence in 1962, the British monarch, represented by a governor-general, is head of state. The island country (area 4,244 square miles), third-largest of the Greater Antilles, is situated south of Cuba and has a 552 n mile coastline with the Caribbean Sea. Kingston is the capital, largest town and principal port. An archipelagic state, territorial seas (12 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has been claimed but the limits are not fully defined.

Headquarters Appointments

Commanding Officer Coast Guard:
 Commander Kenneth A Douglas

Personnel

(a) 2009: 241 (17 officers) Regulars
 (b) 32 (8 officers) Reserve Forces

Aviation

Seven helicopters (three Bell 412 and four Bell 407) are used for SAR and land operations. One Cessna 210M is used for liaison duties. Two Diamond DA 40 fixed-wing aircraft and one Bell 406B are used for training at the Flight Training School.

Bases

Headquarters: HMJS Cagway, Port Royal
 Bases: Discovery Bay, Pedro Cays, Port Antonio, Port Morant, Montego Bay and Black River.

1 HERO CLASS (PB)

Name	No	Builders	Commissioned
PAUL BOGLE	P 8	Lantana Boatyard Inc, FL	17 Sep 1985

Displacement, tons: 93 full load
Dimensions, feet (metres): 105 × 20.6 × 7 (32 × 6.3 × 2.1)
Main machinery: 3 MTU 8V 396TB93 diesels; 3,270 hp(m) (2.4 MW) sustained; 3 shafts
Speed, knots: 32
Complement: 20 (4 officers)
Guns: 1 Oerlikon 20 mm, 2 – 12.7 mm MGs.
Radars: Surface search: Furuno 2400; I-band.
Navigation: Sperry 4016; I-band.

Comment: Of all-aluminium construction, launched in 1984. *Paul Bogle* was originally intended for Honduras as the third of the Guardian class. Similar to patrol craft in Honduras and Grenada navies. Refitted in March 1998 at Network Marine, Louisiana and further refitted in 2004-05 by Damen Shipyards, Gorinchem.

PAUL BOGLE

6/1999, JDFCG / 0080126

4 DAUNTLESS CLASS (INSHORE PATROL CRAFT) (PB)

CG 121-124

Displacement, tons: 11 full load
Dimensions, feet (metres): 40 × 14 × 4.3 (12.2 × 4.3 × 1.3)
Main machinery: 2 Caterpillar 3208TA diesels; 870 hp (650 kW); 2 shafts
Speed, knots: 27
Range, n miles: 600 at 18 kt
Complement: 5
Guns: 1 – 7.62 mm MG (can be carried).
Radars: Surface search: Raytheon 40X; I band.

Comment: Delivered in September and November 1992, January 1993 and May 1994. Built by SeaArk Marine, Monticello. Aluminium construction. Craft of this class have been distributed throughout the Caribbean under FMS funding. Two craft were refitted during 2006.

CG 121

10/2000 / 0171383

4 FAST COASTAL INTERCEPTORS (PBF)

CG 134-137

Displacement, tons: 7.5 full load
Dimensions, feet (metres): 44.0 × 9.0 × 3.0 (13.4 × 2.75 × 0.9)
Main machinery: 3 Yanmar diesels, 945 hp (704 kW); Bravo X drives
Speed, knots: 45
Range, n miles: 600 at 25 kt
Complement: 4

Comment: Manufactured by Nor-Tech, Fort Myers, Florida. Composite and glass-fibre hull with V-bottomed hull. The first two donated by the US Southern Command in February 2008 and the second two in October 2008. Employed on counter drugs duties.

YAESHIO	SS 598	Kawasaki, Kobe	15 Jan 2002	4 Nov 2004	9 Mar 2006
SETOSHIO	SS 599	Mitsubishi, Kobe	23 Jan 2003	5 Oct 2005	28 Feb 2007
MOCHISHIO	SS 600	Kawasaki, Kobe	23 Feb 2004	6 Nov 2006	6 Mar 2008

Displacement, tons: 2,750 standard; 3,500 dived

Dimensions, feet (metres): 268 × 29.2 × 24.3
(81.7 × 8.9 × 7.4)

Main machinery: Diesel-electric; 2 Kawasaki 12V25S diesels, 5,520 hp(m) (4.1 MW); 2 Kawasaki alternators; 3.7 MW; 2 Toshiba motors; 7,750 hp(m) (5.7 MW); 1 shaft

Speed, knots: 12 surfaced, 20 dived

Complement: 70 (10 officers)

Missiles: SSM. McDonnell Douglas Sub-Harpoon; active radar homing to 130 km (70 n miles) at 0.9 Mach, warhead 227 kg.

Torpedoes: 6–21 in (533 mm) tubes, Type 89; wire-guided; active/passive homing to 50 km (27 n miles)/38 km (21 n miles) at 40/55 kt; warhead 267 kg and Type 80 ASW. Total of 20 SSM and torpedoes.

Countermeasures: ESM, NZLR-18; radar warning

Weapons control: SMCS type TFC5.

Radars: Surface search; JRC ZPS 6D; I-band.

Sonars: Hughes/OKI ZQQ 6; hull and flank arrays; active/passive search and attack; medium/low frequency. Towed array; passive search; very low frequency

SETOSHIO

9/2007*, Hachiro Nakai / 1305087

Programmes: First of a new class approved in the 1993 budget and then one a year up to FY03.

Structure: Fitted with large flank sonar arrays which are reported as the reason for the increase in displacement

over the Harushio class. Double hull sections forward and aft and anechoic tiles on the fin. A new type of deck casing and faired fin are other distinguishing features. Diving depth 650 m (2,130 ft).

MOCHISHIO

3/2008*, Hachiro Nakai / 1353106

KUROSHIO

7/2008*, Hachiro Nakai / 1353107

7 HARUSHIO CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
HARUSHIO	SS 583	Mitsubishi, Kobe	21 Apr 1987	26 July 1989	30 Nov 1990
NATSUSHIO	SS 584	Kawasaki, Kobe	8 Apr 1988	20 Mar 1990	20 Mar 1991
HAYASHIO	TSS 3606 (ex-SS 585)	Mitsubishi, Kobe	9 Dec 1988	17 Jan 1991	25 Mar 1992
ARASHIO	SS 586	Kawasaki, Kobe	8 Jan 1990	17 Mar 1992	17 Mar 1993
WAKASHIO	SS 587	Mitsubishi, Kobe	12 Dec 1990	22 Jan 1993	1 Mar 1994
FUYUSHIO	SS 588	Kawasaki, Kobe	12 Dec 1991	16 Feb 1994	7 Mar 1995
ASASHIO	TSS 3601 (ex-SS 589)	Mitsubishi, Kobe	24 Dec 1992	12 July 1995	12 Mar 1997

Displacement, tons: 2,450 (2,900, TSS 3601) standard; 3,200 (3,700, TSS 3601) dived

Dimensions, feet (metres): 252.6; 285.5 (TSS 3601) × 32.8 × 25.3 (77, 87 × 10 × 7.7)

Main machinery: Diesel-electric; 2 Kawasaki 12V25/25S diesels; 5,520 hp(m) (4.1 MW); 2 Kawasaki alternators; 3.7 MW; 2 Fuji motors; 7,200 hp(m) (5.3 MW); 1 shaft
4 Stirling engines (TSS 3601) Kockums V4-275R Mk 2; 348 hp (260 kW)

Speed, knots: 12 surfaced; 20 dived

Complement: 75 (10 officers); 70 (10 officers) (TS 3601)

Missiles: SSM: McDonnell Douglas Sub-Harpoon; active rader homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.

Torpedoes: 6–21 in (533 mm) tubes. Japanese Type 89: wire-guided (option); active/passive homing to 50 km (27 n miles)/38 km (21 n miles) at 40/55 kt; warhead 267 kg; depth to 900 m, and Type 80 ASW. Total of 20 SSM and torpedoes.

Countermeasures: ESM: NZLR-1, radar warning.

Radars: Surface search: JRC ZPS 6, I-band.

Sonars: Hughes/Okii ZQQ 5B, hull-mounted; active/passive search and attack; medium/low frequency.

ZQR 1 towed array similar to BQR 15; passive search; very low frequency.

Programmes: First approved in 1986 estimates end then one per year until 1992

Structure: The slight growth in all dimensions is a natural evolution from the Yuushio class and includes more noise reduction, towed sonar and wireless aerials, as well as anechoic coating. Double hull construction. *Asashio* had a slightly larger displacement on build and a small cutback in the crew as a result of greater systems automation for machinery and snorting control. The hull was extended in 2001 to accommodate an AIP module (Stirling engine) which was fitted by Mitsubishi, Kobe. Diving depth 550 m (1,800 ft).

Operational: A remote periscope viewer is fitted in *Asashio*. *Asashio* is an experimental submarine which has been used for testing of AIP propulsion.

NATSUSHIO

HELICOPTER CARRIERS

1 + 1 HYUGA CLASS (CVHG)

Name	No	Builders	Laid down	Launched	Commissioned
HYUGA	DDH 181	IHI Marine United, Yokohama	11 May 2006	23 Aug 2007	18 Mar 2009
-	DDH 182	IHI Marine United, Yokohama	30 May 2008	Aug 2009	Mar 2011

Displacement, tons: 13,500 standard; 18,000 full load
Dimensions, feet (metres): 646.3 x 108.3 x 31.8
 (1970 x 33.0 x 9.7)
Main machinery: COGAG, 4 LM 2500 gas turbines; 2 shafts
Speed, knots: 30
Range, n miles: 6,000 at 20 kt
Complement: 322 (+25 HQ staff)

Missiles: SAM: Raytheon Sea Sparrow RIM-162 ESSM; Lockheed Martin Maritime Mk 41 Mod 5 sixteen cell vertical launcher; semi-active radar homing to 18.0 km (9.7 n miles) at 3.6 Mach; warhead 38 kg, 64 missiles.
 A/S: Vertical launch ASROC.

Guns: 2 GE 20 mm/76 Sea Vulcan 20; 3 barrels per mounting; 1,500 rds/min. 2-12.7 mm MGs.
Torpedoes: 6-324 mm (2 triple) HOS-303 tubes
Countermeasures: Decoys. 4 Hycor Mk 137 sextuple RBOC chaff launchers
ESM/ECM: NOLQ-3C
Combat data systems: Link 16.
Radars: Air search/Fire control. Meico FCS-3; G/H/I-band
Navigation: JRC OPS-20C; I-band.
Sonars: Bow-mounted sonar. OQQ 21.
Helicopters: 3 SH-60K plus 7 SH-60K or 7 MCH-101

Programmes: Two new aviation capable ships to replace the Haruna class authorised in the FY01-05 and FY05-09 programmes. The first authorised in the FY04 budget and the second in the FY06 budget.
Structure: Broadly similar to the Spanish light carrier *Principe de Asturias* although not fitted with a ski jump and VSTOL capability. The flight deck has two lifts and four helicopter spots. The Mk 41 VLS launcher is situated on the starboard quarter.
Operational: To be capable of acting as Command Vessels.

DESTROYERS

2 ATAGO CLASS (DDGHM)

Name	No	Builders	Laid down	Launched	Commissioned
ATAGO	DDG 177	Mitsubishi, Nagasaki	5 Apr 2004	24 Aug 2005	15 Mar 2007
ASHIGARA	DDG 178	Mitsubishi, Nagasaki	6 Apr 2005	30 Aug 2006	13 Mar 2008

Displacement, tons: 7,700 standard; 10,000 full load
Dimensions, feet (metres): 540.1 × 68.9 × 20.3
 (164.9 × 21.0 × 6.2)
Main machinery: COGAG; 4 GE LM 2500 gas turbines;
 102,160 hp (76.21 MW) sustained; 2 shafts; cp props
Speed, knots: 30
Range, n miles: 4,500 at 20 kt
Complement: 309 (27 officers)

Missiles: SSM: 8 Mitsubishi Type 90 SSM-1B (2 quad) ●;
 active radar homing to 200 km (108 n miles) at 0.9 Mach;
 warhead 270 kg.

SAM: Raytheon Standard SM-2MR Block IIIB, FMC Mk 41 VLS,
 64 cells forward ● 32 cells aft ●; command/inertial guidance;
 semi-active radar homing to 187 km (90 n miles) at 2.5 Mach
A/S: Vertical launch ASROC; inertial guidance to 1.6-10 km
 (1-5.4 n miles); payload Mk 46 Mod 5 Nearip.

Guns: 1 United States Mk 45 Mod 4 5 in (127 mm)/62 ●;
 20 rds/min to 23 km (12.6 n miles); weight of shell 32 kg
 2 GE/GD 20 mm/78 Mk 15 Vulcan Phalanx Block IB ●;
 4,500 rds/min combined to 1.5 km.

Torpedoes: 6-324 mm (2 triple) HOS 302 tubes ● Honeywell
 Mk 46 Mod 5 Nearip; anti-submarine; active/passive
 homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

Countermeasures: Decoys. 4 Mk 36 SRBOC ● 6-barrelled
 Mk 36 chaff launchers; Type 4 towed torpedo decoy.
ESM/ECM: NOLO-2B ●

ATAGO

(Scale 1 : 1,500), Ian Sturton / 1167684

Combat data systems: Aegis NTDS with Link 11, AN/USC-42
 SATCOM.

Radars: Air search: RCA SPY 1D(V) ●; 3D; F-band.
 Surface search: JRC OPS-28E ●; G-band.

Navigation: JRC OPS-20; I-band.

Fire control: 3 SPG-62 ●, 1 Mk 2/21 ●, I/J-band.
 2 AN/UPS-2; J-band.

Sonars: SQS 53C bow sonar.

Helicopters: 1 Mitsubishi/Sikorsky SH-60J/K ●

Programmes: Two ships authorised in the FY01-05
 programme. The first authorised in the FY02 budget and
 the second in FY03 budget.

Structure: The upgrade from the Kongou class includes
 one hangar for embarked helicopters. The arrangement
 of vertical launchers is different to that of the Kongou
 class: there are 64 cells forward (rather than 29) and
 32 aft (61).

Operational: Atago sailed for sea trials on 17 May 2006.

ASHIGARA

3/2008, Hachiro Nakai / 1353110

ATAGO

6/2007, Ships of the World / 1305058

4 KONGOU CLASS (DDGHM)

Name	No	Builders	Laid down	Launched	Commissioned
KONGOU	DDG 173	Mitsubishi, Nagasaki	8 May 1990	26 Sep 1991	25 Mar 1993
KIRISHIMA	DDG 174	Mitsubishi, Nagasaki	7 Apr 1992	19 Aug 1993	16 Mar 1995
MYOUKOU	DDG 175	Mitsubishi, Nagasaki	8 Apr 1993	5 Oct 1994	14 Mar 1996
CHOUKAI	DDG 176	Ishikawajima Harima, Tokyo	29 May 1995	27 Aug 1996	20 Mar 1998

Displacement, tons: 7,250 standard; 9,485 full load
Dimensions, feet (metres): 528.2 x 68.9 x 20.3, 32.7 (sonar) (167 x 21 x 6.2, 10)
Main machinery: COGAG; 4 GE LM 2500 gas turbines, 102,160 hp (76.21 MW) sustained, 2 shafts; cp props
Speed, knots: 30
Range, n miles: 4,500 at 20 kt
Complement: 300 (27 officers)

Missiles: SSM: 8 McDonnell Douglas Harpoon Block 1B (2 quad) launchers; active radar homing to 92 km (50 n miles) at 0.9 Mach; warhead 227 kg.
SAM: Raytheon Standard SM-2MR Block IIIA, FMC Mk 41 VLS (29 cells) forward; Martin Marietta Mk 41 VLS (61 cells) aft; command/inertial guidance; semi-active radar homing to 167 km (90 n miles) at 2.5 Mach. Standard SM-3 Block 1A (DDG 173, 175, 176), command/inertial/GPS guidance and IR homing to 650 n miles (1,200 km) at 3 Mach. Total of 90 Standard and ASROC weapons.
A/S: Vertical launch ASROC; inertial guidance to 1.6-10 km (1-5.4 n miles); payload Mk 46 Mod 5 Nearthip.
Guns: 1 OTO Melara 5 in (127 mm) 54 Compact; 45 rds/min to 23 km (12.42 n miles); weight of shell 32 kg. 2 GE/GD 20 mm/76 Mk 15 Vulcan Phalanx Block 1B; 6 barrels per mounting, 3,000 rds/min combined to 1.5 km.
Torpedoes: 6-324 mm (2 triple) HOS 302 tubes; Honeywell Mk 46 Mod 5 Nearthip; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg
Countermeasures: Decoys: 4 Mk 36 SRBOC; 6-barrelled Mk 36 chaff launchers; Type 4 towed torpedo decoy.
ESM/ECM: Melco NOLQ 2; intercept/jammer
Combat data systems: Aegis NTDS with Link 11. SATCOM WSC-3/OE 82C; ORQ-1 helicopter datalink

KONGOU

(Scale 1 : 1,500), Ian Sturton / 0130381

Weapons control: 3 Mk 99 Mod 1 MFCS, Type 2-21 GFCS, Mk 116 Hitachi OYQ 102 (Mod 7 for ASW)
Radars: Air search RCA SPY 1D; 3D; F-band. Surface search JRC OPS 28D; G-band.
Navigation: JRC OPS-20; I-band.
Fire control: 3 SPG-62; 1 Type 2-21; I/J-band. IFF UPX 29
Sonars: Nec OQS 102 (SQS-53B/C) bow-mounted; active search and attack. Oki OQR 2 (SQR-19A (V)) TACTASS; towed array; passive; very low frequency.

Helicopters: Platform and fuelling facilities for SH-60J.

Programmes: Proposed in the FY87 programme; first one accepted in FY88 estimates, second in FY90, third in FY91, fourth in FY93. Designated as destroyers but these ships are of cruiser size. The combination of cost and US

Congressional reluctance to release Aegis technology slowed the programme down. The ships' names were last used by battleships and cruisers of the Second World War era.

Modernisation: These ships are undergoing an upgrade programme to include Aegis Baseline 3.6.1 and Standard SM-3 Block 1A missiles. Kongou was completed in 2007 and a successful SM-3 test-firing was conducted on 17 December 2007. Choukai completed upgrade in 2008 and Myoukou and Kirishima are to be completed in 2009 and 2011 respectively.

Structure: This is an enlarged and improved version of the USN Arleigh Burke with a lightweight version of the Aegis system. There are two missile magazines. OQS 102 plus OQR 2 towed array is the equivalent of SQC-89, Prairie-Masker acoustic suppression system.

Operational: As well as air defence of the Fleet, these ships contribute to the air defences of mainland Japan.

CHOUKAI

7/2008*, Hachiro Nakai / 1353112

MYOUKOU

4/2008*, Hachiro Nakai / 1353111

SUZUNAMI	DD 114	IHI Marine United, Yokohama	24 Sep 2003	26 Aug 2004	16 Feb 2006

Displacement, tons: 4,650 standard; 6,300 full load
 Dimensions, feet (metres): 495.4 x 57.1 x 17.4
 (151 x 17.4 x 5.3)

Main machinery: COGAG; 2 RR Spey SM1C gas turbines; 26,600 hp (19.9 MW) sustained; 2 GE LM 2500 gas turbines; 32,500 hp (24.3 MW) sustained; 2 shafts

Speed, knots: 30
 Complement: 176

Missiles: SSM: 8 Mitsubishi Type 90 SSM-1B (2 quad) ●; active radar homing to 150 km (81 n miles) at 0.9 Mach, warhead 225 kg.

SAM: Mk 41 VLS 32 cells ● Sea Sparrow RIM 162 ESSM (PIP); semi-active radar homing to 18 km (9.7 n miles) at 3.6 Mach, warhead 38 kg and VL ASROC; internal guidance to 1.6-10 km (1-5.4 n miles); payload Mk 46 Mod 5 Near tip

Guns: 1 Otobreda 5 in (127 mm)/54 ●; 45 rds/min to 24 km (12.42 n miles); weight of shell 32 kg.
 2 General Electric/General Dynamics 20 mm Phalanx Mk 15 CIWS ●; 6 barrels per mounting; 3,000 rds/min combined to 1.5 km

Torpedoes: 6—324 mm HOS-302 (2 triple) tubes ● Mk 46 Mod 5; anti-submarine, active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg

Countermeasures: Decoys: 4 Mk 36 SRBOC chaff launchers ● SLQ-25 Nixie towed torpedo decoy.

ESM/ECM: Nec NOLQ 3; intercept and jammer.

TAKANAMI CLASS

(Scale 1 : 1,200), Ian Sturton / 0080139

Combat data systems: OYQ-9 with Link 11, ORQ-1B helicopter data link ●
 Weapons control: Hitachi OYQ-103 ASW control system
 Radars: Air search: Melco OPS-24B ●; 3D; D-band.
 Surface search: JRC OPS-28D ●; G-band.
 Fire control: Two FCS 2-31B ●
 Navigation: DPS-20; I-band.
 Sonars: OQS-5, Bow-mounted; active search and attack; low frequency.
 OQR-2, towed array; passive search, very low frequency.

Helicopters: 1 Mitsubishi/Sikorsky SH-60J/K ●
 Programmes: First two approved in FY98, then one a year up to FY01
 Structure: Murasame class modified to fit a Mk 41 VLS, improved missile fire control and new sonar.

ARIAKE	DD 109	Mitsubishi, Nagasaki	18 May 1999	16 Oct 2000	6 Mar 2002

Displacement, tons: 4,550 standard; 6,200 full load
Dimensions, feet (metres): 495.4 × 57.1 × 17.1
 (151 × 17.4 × 5.2)

Main machinery: COGAG; 2 RR Spey SM1C gas turbines, 26,800 hp (19.9 MW) sustained; 2 GE LM 2500 gas turbines; 32,500 hp (24.3 MW) sustained; 2 shafts

Speed, knots: 30
Complement: 165

Missiles SSM: 8 Type 90 SSM-1B (Harpoon); active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.

SAM: Raytheon Mk 48 VLS 16 cells ● Sea Sparrow RIM-7P; semi-active radar homing to 16 km (8.5 n miles) at 2.5 Mach, warhead 38 kg.

A/S: Mk 41 VL ASROC 16 cells ●. Total of 29 missiles can be carried.

Guns: 1 Otobreda 3 in (76 mm)/62 compact ●; 85 rds/min to 16 km (8.6 n miles) anti-surface, 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg.

2 General Electric/General Dynamics 20 mm Phalanx Mk 15 CIWS ●; 8 barrels per mounting; 3,000 rds/min combined to 1.5 km.

Torpedoes: 6—324 mm HOS 302 (2 triple tubes ● Mk 46 Mod 5; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

Countermeasures: Decoys: 4 Mk 36 SRBOC chaff launchers ●. Type 4 towed torpedo decoy

ESM/ECM: Nec NOLQ 3; intercept and jammer.
Combat data systems: OYQ-9B with Link 11. ORQ-1 helicopter datalink ●

Weapons control: Hitachi OYQ-103 ASW control system.

Radars: Air search: Melco OPS-24B ●; 3D; D-band

Surface search: JRC OPS-28D ●; G-band

Fire control: 2 Type 2-31 ●

Navigation: OPS-20; I-band.

Sonars: Mitsubishi: OQS-5; hull-mounted; active search and attack; low frequency.
 OQR-1 towed array; passive search, very low frequency.

Helicopters: 1 SH-60J Seahawk ●.

Programmes: First one approved in FY91 as an addition to the third Aegis-type destroyer. Second approved in

MURASAME

(Scale 1 : 1,200), Ian Sturton / 0506235

INAZUMA

7/2008, Hiroshi Yamamoto / 1353165

FY92. Two more approved in FY94, two in FY95, one in FY96 and two in FY97. The programme was given added priority as the Kongou class was reduced to four ships because of the cost of Aegis.

Modernisation: DD 103, 108 and 109 converted to fire ESSM 2007-08. One further ship to be converted in 2009.

Structure: More like a mini-Kongou than an enlarged Asagiri class, with VLS and a much reduced complement. Stealth features are evident in sloping sides and rounded superstructure. Indal RAST helicopter hauldown.

Operational: ASROC missiles are not carried. *Kirisame* deployed to Indian Ocean in November 2001 to provide non-combatant support to US forces.

AKEBONO

6 ASAGIRI CLASS (DDGHM)

Name	No	Builders	Laid down	Launched	Commissioned
YUUGIRI	DD 153	Sumitomo, Uraga	25 Feb 1986	21 Sep 1987	28 Feb 1989
AMAGIRI	DD 154	Ishikawajima Harima, Tokyo	3 Mar 1986	9 Sep 1987	17 Mar 1989
HAMAGIRI	DD 155	Hitachi, Maizuru	20 Jan 1987	4 June 1988	31 Jan 1990
SETOGIRI	DD 156	Sumitomo, Uraga	9 Mar 1987	12 Sep 1988	14 Feb 1990
SAWAGIRI	DD 157	Mitsubishi, Nagasaki	14 Jan 1987	25 Nov 1988	6 Mar 1990
UMIGIRI	DD 158	Ishikawajima Harima, Tokyo	31 Oct 1988	9 Nov 1989	12 Mar 1991

Displacement, tons: 3,500 (DD 153-154), (3,550, DD 155-158) standard; 4,900 (DD 153-154) (4,950 DD 155-158) full load

Dimensions, feet (metres): 449.4 x 48 x 14.6 (137 x 14.6 x 4.5)

Main machinery: COGAG; 4 RR Spey SM1A gas turbines; 53,300 hp (39.8 MW) sustained; 2 shafts; cp props

Speed, knots: 30+

Complement: 220

Missiles: SSM: 8 McDonnell Douglas Harpoon (2 quad) launchers; active radar homing to 130 km (70 n miles); at 0.9 Mach; warhead 227 kg.

SAM: Raytheon Sea Sparrow RIM-7M Mk 29 (Type 3/3A) octuple launcher; semi-active radar homing to 16 km (8.5 n miles) at 2.5 Mach; warhead 38 kg; 20 missiles.

A/S: Honeywell ASROC Mk 112 octuple launcher; inertial guidance to 1.6-10 km (1-5.4 n miles) at 0.9 Mach; payload Mk 46 Mod 5 Neartip. Reload capability.

Guns: 1 Otobreda 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg.

2 General Electric/General Dynamics 20 mm Phalanx Mk 15 CIWS; 6 barrels per mounting; 3,000 rds/min combined to 1.5 km.

Torpedoes: 6 - 324 mm Type 68 (2 triple) HOS 301 tubes; Honeywell Mk 46 Mod 5 Neartip; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

Countermeasures: Decoys 2 Loral Hycor SRBOC 6-barrelled Mk 36 chaff launchers; range 4 km (2.2 n miles); 1 SLQ-25 Nixie or Type 4; towed torpedo decoy.

ESM: Nec NOLR 6C or NOLR B (DD 152); intercept.

ECM: Fujitsu OLT-3; jammer.

(Scale 1 : 1,200), Ian Sturton / 0012635

UMIGIRI

Combat data systems: OYQ-7B data automation; Link 11/14.

SATCOM. ORQ-1 helicopter datalink for SH-60J.

Radars: Air search: Melco OPS-14C (DD 151-154); D-band Melco OPS-24 (DD 155-158); 3D; D-band.

Surface search. JRC OPS-28C; G band (DD 151, 152, 155-158).

JRC OPS-28C-Y; G-band (DD 153-154)

Navigation: JRC OPS-20; I-band.

Fire control: Type 2-22 (for guns); Type 2-12E (for SAM) (DD 151-154); Type 2-12G (for SAM) (DD 155-158).

Tecan: ORN-6D (URN 25)

Sonars: Mitsubishi OOS 4A (III); hull-mounted, active search and attack; low frequency

QCR-1; towed array; passive search; very low frequency.

Helicopters: 1 SH-60J Seahawk

Programmes: DD 153-154 in 1984 estimates, DD 155-157 in 1985 and DD 158 in 1986

Modernisation: The last four were fitted on build with improved air search radar, updated fire-control radars and a helicopter datalink. Plans to fit the first four may have been postponed. Umigiri also commissioned with a sonar towed array which has been fitted to the rest of the class

Structure: Because of the enhanced IR signature and damage to electronic systems on the mainmast caused by after funnel gases there were modifications to the original design to help contain the problem. The mainmast is now slightly higher and has been offset to port. The forward funnel is also offset slightly to port and the after funnel to the starboard side of the superstructure. The hangar structure is asymmetrical extending to the after funnel on the starboard side but only to the mainmast to port. SATCOM is fitted at the after end of the hangar roof.

Operational: Beartrap helicopter hauldown system. Yamagiri (D 152) converted to training ship on 18 March 2004 and Asagiri (D 151) on 16 February 2005.

ASAYUKI	DD 132	Sumitomo, Uraga	22 Dec 1983	16 Oct 1985	20 Feb 1987

Displacement, tons: 2,950 (3,050 from DD 129 onwards) standard; 4,000 (4,200) full load

Dimensions, feet (metres): 426.4 x 44.8 x 13.8 (14.4 from 129 onwards) (130 x 13.6 x 4.2) (4.4)

Main machinery: COGOG; 2 Kawasaki RR Olympus TM3B gas turbines; 49,400 hp (36.8 MW) sustained; 2 RR Type RM1C gas turbines, 8,900 hp (74 MW) sustained; 2 shafts; cp props

Speed, knots: 30, 19 cruise

Complement: 195 (200, DD 124 onwards)

Missiles: SSM: 8 McDonnell Douglas Harpoon (2 quad) launchers; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.

SAM: Raytheon Sea Sparrow RIM-7M Mk 29 Type 3A launcher; semi-active radar homing to 18 km (8.6 n miles) at 2.5 Mach; warhead 38 kg; 12 missiles.

A/S: Honeywell ASROC Mk 112 octuple launcher; inertial guidance to 1.6-10 km (1-5.4 n miles) at 0.9 Mach, payload Mk 46 Mod 5 Nearthip.

Guns: 1 Otobreda 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg

2 General Electric/General Dynamics 20 mm Phalanx Mk 15 CIWS; 6 barrels per mounting; 3,000 rds/min combined to 1.5 km

Torpedoes: 6-324 mm Type 88 or HOS 301 (2 triple) tubes; Honeywell Mk 46 Mod 5 Nearthip; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

HATSUYUKI

(Scale 1 : 1,200), Ian Sturton / 0506301

Countermeasures: Decoys: 2 Loral Hycor SRBOC 6-barrelled Mk 36 chaff launchers; range 4 km (2.2 n miles)

ESM: Nec NOLR 6C; intercept.

ECM: Fujitsu OLT 3; jammer.

Combat data systems: OYO-5B action data automation.

SATCOM

Radars: Air search: Molco OPS-14B; D-band.

Surface search: JRC OPS-18C; G-band.

Navigation: JRC OPS-20; I-band

Fire control: Type 2-12 A; I/J-band (for SAM).

2 Type 2-21/21A; I/J-band (for guns).

Tacan: ORN-6C-Y (DD 122, 125 and 132); ORN-6C (remainder).

Sonars: Nec OQS 4A (II) (SQS-23 type); bow-mounted, active search and attack; low frequency

QGR 1 TACTASS (in some); passive; low frequency.

Helicopters: 1 SH-60J Seahawk

Modernisation: *Shirayuki* retrofitted with Phalanx in early 1992, and the rest of the class by 1995. *Matsuyuki* first to get sonar towed array in 1990 and *Hatsuyuki* in 1994, the others are being fitted. All of the class converted to carry Seahawk helicopters.

Structure: Fitted with fin stabilisers. Steel in place of aluminium alloy for bridge etc after DD 129 which increased displacement.

Operational: Canadian Beartrap helicopter landing aid. Improved ECM equipment in the last two of the class. Last of class *Shimayuki* converted to a training ship 18 March 1999

SHIRAYUKI

4/2008, Hachiro Nakai / 1353169

SETOYUKI

7/2008, Hachiro Nakai / 1353170

1 TACHIKAZE CLASS (DDGM)

Name	No	Builders	Laid down	Launched	Commissioned
SAWAKAZE	DDG 170	Mitsubishi, Nagasaki	14 Sep 1979	4 June 1981	30 Mar 1983

Displacement, tons: 3,950 standard; 5,200 full load
Dimensions, feet (metres): 469 × 47 × 15.1
 (143 × 14.3 × 4.6)
Main machinery: 2 Mitsubishi boilers; 600 psi (40 kg/cm²); 850°F (454°C); 2 Mitsubishi turbines; 80,000 hp(m); (44.7 MW); 2 shafts
Speed, knots: 32
Complement: 250

Missiles, SSM: 8 McDonnell Douglas Harpoon Block 1B; active radar homing to 92 km (50 n miles) at 0.9 Mach; warhead 227 kg HE.
SAM: Raytheon Standard SM-1MR Block VIA; Mk 13 Mod 4 launcher; command guidance; semi-active radar homing to 38 km (20.5 n miles) at 2 Mach; height envelope 45-18,288 m (150-60,000 ft); 40 missiles (SSM and SAM combined).
A/S: Honeywell ASROC Mk 112 octuple launcher; inertial guidance to 1.5-10 km (1-5.4 n miles) at 0.9 Mach; payload Mk 46 Mod 5 Neartip.
Guns: 1 or 2 FMC 5 in (127 mm)/54 Mk 42 automatic; 20-40 rds/min to 24 km (13 n miles) anti-surface; 14 km (7.6 n miles) anti-aircraft; weight of shell 32 kg
 2 General Electric/General Dynamics 20 mm Phalanx CIWS Mk 15; 6 barrels per mounting; 3,000 rds/min combined to 1.5 km
Torpedoes: 6—324 mm Type 68 or HOS 301 (2 triple) tubes; Honeywell Mk 46 Mod 5 Neartip; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.
Countermeasures: Decoys: 4 Loral Hycor SRBOC Mk 36 multibarrelled chaff launchers. SLQ-25 towed torpedo decoy
ESM: Nec NOLQ 1, intercept
ECM: Fujitsu OLT 3, jammer.
Combat data systems: OYQ-4 action data automation; Links 11 and 14. SATCOM
Weapons control: 2 Mk 74 Mod 13 missile control directors. US Mk 114 ASW control. GFCS-2-21 for gun.
Radars: Air search: Melco OPS-11C; 8-band. Hughes SPS-52C; 3D, E/F-band.
Surface search: JRC OPS-28; G-band
Navigation: JRC OPS-20; I-band.

SAWAKAZE (Scale 1 : 1,200), Ian Sturton / 0506074

SAWAKAZE 9/2008, Hachiro Nakai / 1353171

Fire control: 2 Raytheon SPG-51; G/I-band. Type 2 FCS; I/J-band.
Operational: Tachikaze decommissioned on 15 January 2007 and Asakaze on 12 March 2008.
Sonars: Nec OQS-3A (Type 66); bow-mounted; active search and attack; low frequency.

2 SHIRANE CLASS (DDHM)

Name	No	Builders	Laid down	Launched	Commissioned
SHIRANE	DDH 143	Ishikawajima Harima, Tokyo	25 Feb 1977	18 Sep 1978	17 Mar 1980
KURAMA	DDH 144	Ishikawajima Harima, Tokyo	17 Feb 1978	20 Sep 1979	27 Mar 1981

Displacement, tons: 5,200 standard; 7,200 full load
Dimensions, feet (metres): 521.5 × 57.5 × 17.5
 (159 × 17.5 × 5.3)
Main machinery: 2 IHI boilers, 850 psi (60 kg/cm²); 900 F (480°C); 2 IHI turbines; 70,000 hp(m) (51.5 MW); 2 shafts
Speed, knots: 31 (144); 32 (143)
Complement: 350; 360 (DDH 144) plus 20 staff

Missiles, SAM: Raytheon Sea Sparrow RIM-7M; Type 3 launcher; semi-active radar homing to 16 km (8.5 n miles) at 2.5 Mach; warhead 38 kg, 24 missiles.
A/S: Honeywell ASROC Mk 112 octuple launcher; inertial guidance to 10 km (5.4 n miles) at 0.9 Mach; payload Mk 46 Mod 5 Neartip.
Guns: 2 FMC 5 in (127 mm)/54 Mk 42 automatic; 20-40 rds/min to 24 km (13 n miles) anti-surface; 14 km (7.6 n miles) anti-aircraft; weight of shell 32 kg
 2 General Electric/General Dynamics 20 mm Phalanx Mk 15 CIWS; 6 barrels per mounting; 3,000 rds/min combined to 1.5 km
Torpedoes: 6—324 mm HOS 301 (2 triple) tubes; Honeywell Mk 46 Mod 5 Neartip; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg
Countermeasures: Decoys: 4 Mk 36 SRBOC chaff launchers. Prairie Masker; blade rate suppression system.
ESM/ECM: Melco NOLQ 1; intercept/jammer. Fujitsu QLR 98; intercept.
Combat data systems: OYQ-3B, Links 11 and 14. SATCOM.

SHIRANE (Scale 1 : 1,500), Ian Sturton / 1153010

Weapons control: Singer Mk 114 for ASROC and TFCS; Type 72-1A GFCS.
Radars: Air search: Nec OPS-12; 3D; D-band.
Surface search: JRC OPS-28; G-band.
Navigation: JRC OPS-20; I-band.
Fire control: Type 2-12; I/J-band. 2 Type 72-1A FCS; I/J-band.
Tacan: DRN-6C/6C-Y.
Sonars: EDO/Nec SQS-35(J); VDS, active/passive search; medium frequency. Nec OQS 101; bow-mounted; low frequency. EDO/Nec SQR-18A; towed array; passive; very low frequency.
Programmes: One each in 1975 and 1976 programmes.
Modernisation: DDH 143 refit in 1989-90. Both fitted with CIWS and towed array sonars by mid-1990. DDH 144 upgraded with Type 3 launcher to fire RIM-7M during 2003-04 refit at Mitsubishi, Nagasaki. DDH 143 similarly upgraded at IHI Yokohama in 2004.
Structure: Fitted with Vosper Thornycroft fin stabilisers. The after funnel is set to starboard and the forward one to port. The crane is on the starboard after corner of the hangar. Bear Trap helicopter hauldown gear.
Operational: Shirane badly damaged by a fire in December 2007 and repair plans are under consideration.

Helicopters: 3 SH-60J Seahawk

KURAMA 10/2006, Hachiro Nakai / 1040629

1 HARUNA CLASS (DDHM)

Name	No	Builders	Laid down	Launched	Commissioned
HIEI	DDH 142	Ishikawajima Harima, Tokyo	8 Mar 1972	13 Aug 1973	27 Nov 1974

Displacement, tons: 4,950 (5,050, DDH 142) standard, 6,900 full load

Dimensions, feet (metres): 502 × 57.4 × 17.1 (153 × 17.5 × 5.2)

Main machinery: 2 Mitsubishi (DDH 141) or IHI (DDH 142) boilers; 850 psi (60 kg/cm²); 900°F (480°C); 2 Mitsubishi (DDH 141) or IHI (DDH 142) turbines; 70,000 hp (51.5 MW); 2 shafts

Speed, knots: 31

Complement: 370 (360, DDH 141) (36 officers)

Missiles: SAM: Raytheon Sea Sparrow RIM-7M Mk 29 (Type 3A) octuple launcher ●; semi-active radar homing to 16 km (8.5 n miles) at 2.5 Mach; warhead 38 kg; 24 missiles.

A/S: Honeywell ASROC Mk 112 octuple launcher ●; inertial guidance to 1.6-10 km (1-5.4 n miles) at 0.9 Mach; payload Mk 46 Mod 5 Nearthip.

Guns: 2 FMC 5 in (127 mm) Mk 42 automatic ●; 20-40 rds/min to 24 km (13 n miles) anti-surface; 14 km (7.6 n miles) anti-aircraft; weight of shell 32 kg.
2 General Electric/General Dynamics 20 mm Phalanx Mk 15 CIWS ●; 6 barrels per mounting; 3,000 rds/min combined to 1.5 km.

Torpedoes: 6-324 mm HOS 301 (2 triple) tubes ●. Honeywell Mk 46 Mod 5 Nearthip; anti-submarine; active/passive homing to 11 km (5.9 n miles), at 40 kt; warhead 44 kg.

HARUNA

Countermeasures: Decoys: 4 Loral Hycor SRBOC Mk 36 multi-barrelled chaff launchers.

ESM/ECM: Melco NOLQ 1; Intercept/jammer Fujitsu OLR 9; intercept.

Combat data systems: OYQ-7B action data automation; Links 11 and 14; US SATCOM ●

Weapons control: 2 Type 2-12 FCS (1 for guns, 1 for SAM)

Radars: Air search: Melco OPS-11C ●, B-band.

Surface search: JRC OPS-28C/28C-Y ●, G-band.

Fire control: 1 Type 1A ●, I/J-band (guns).

1 Type 2-12 ●, I/J-band (SAM).

Navigation: JRC OPS-20; I-band.

IFF: YPA-2 YPX-3

Tacan: Nec ORN-6D/6C.

Sonars: Sangamo/Mitsubishi OQS 3; bow-mounted; active search and attack; low frequency with bottom bounce.

Helicopters: 3 SH-60J Seahawk ●.

Programmes: Ordered under the third five-year defence programme (from 1967-71).

Modernisation: DDH 142 received FRAM from 31 August 1987 to 30 March 1989 at IHI, Tokyo; included Sea Sparrow, two CIWS and chaff launchers.

Structure: The funnel is offset slightly to port. Fitted with fin stabilisers. A heavy crane has been fitted on the top of the hanger, starboard side.

Operational: Fitted with Canadian Beartrap hauldown gear.

Guns: 1 Otobreda 3 in (76 mm) Mk 62 compact ●; 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg

1 General Electric/General Dynamics 20 mm Phalanx CIWS Mk 15 ●; 6 barrels per mounting; 3,000 rds/min combined to 1.5 km

Torpedoes: 6-324 mm HOS 301 (2 triple) tubes ●. Honeywell Mk 46 Mod 5 Nearthip; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg

Countermeasures: Decoys: 2 Loral Hycor SRBOC 6-barrelled Mk 36 chaff launchers

ESM: Nec NOLR-8; intercept.

Combat data systems: OYQ-6. SATCOM

Weapons control: Type 2-21; GFCS

Radars: Air search: Melco OPS-14C ●, D-band.

Surface search: JRC OPS-28D (DE 233-234); JRS OFC-28C (remainder) ●; G-band.

Fire control: Type 2-21 ●

Sonars: Hitachi OQS-8; hull-mounted, active search and attack; medium frequency.
SQR-19A towed passive array in dual course.

Programmes: First pair of this class approved in 1986 estimates, ordered March 1987; second pair in 1987

ABUKUMA

(Scale 1 : 900), Ian Sturton / 05061/7

JINTSU

4/2008*, Hachiro Nakai / 13531/7

estimates, ordered February 1988; last two in 1989 estimates, ordered 24 January 1989. The name of the first of class commemorates that of a light cruiser which was sunk in the battle of Leyte Gulf in October 1944.

Structure: Stealth features include non-vertical and rounded surfaces. German RAM PDMS may be fitted later, although this now seems unlikely, and space has been left for a towed sonar array. SATCOM fitted aft of the after funnel

2 ISHIKARI/YUUBARI CLASS (FFG/DE)

Name	No	Builders	Laid down	Launched	Commissioned
YUUBARI	DE 227	Sumitomo, Uraga	9 Feb 1981	22 Feb 1982	18 Mar 1983
YUBETSU	DE 228	Hitachi, Maizuru	14 Jan 1982	25 Jan 1983	14 Feb 1984

Displacement, tons: 1,470 standard; 1,690 full load
Dimensions, feet (metres): 298.5 x 35.4 x 11.8
 (91.0 x 10.8 x 3.6)

Main machinery: CODOG; 1 Kawasaki/RR Olympus TM38 gas turbine; 24,700 hp (18.4 MW) sustained, 1 Mitsubishi/MAN 6DRV diesel; 4,700 hp (3.45 MW); 2 shafts; cp props

Speed, knots: 25
Complement: 95

Missiles, SSM: 8 McDonnell Douglas Harpoon (2 quad) launchers; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg

Guns: 1 Otobreda 3 in (76 mm) M62 compact; 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg. 1 General Electric/General Dynamics 20 mm Phalanx (unlikely to be fitted)

Torpedoes: 6—324 mm Type 68 (2 triple tubes); Honeywell Mk 46 Mod 5 Neartip; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

A/S mortars: 1—375 mm Bofors Type 71 4 to 6-barrelled trainable rocket launcher; automatic loading; range 16 km.

(Scale 1 : 900), Ian Sturton / 0506026

YUUBARI

Countermeasures: Decoys: 2 Loral Hycor SRBOC 6-barrelled Mk 36 chaff launchers; range 4 km (2.2 n miles).

ESM: Nec NOLR 6B; intercept

Combat data systems: OYQ-5.

Weapons control: Type 2-21 system for 76 mm gun.
Radars: Surface search: JRC OPS-28B/28-1; G-band Navigation: Fujitsu OPS-19B; I-band.

Fire control: Type 2-21; I/J-band

Sonars: Nec SQS-38J; hull-mounted; active/passive; medium frequency.

Programmes. The name *Yuubari* commemorates that of a light cruiser sunk in the Second World War

Structure: *Yuubari* and *Yubetsu* were slightly larger versions of *Ishikari* which was decommissioned in 2007.

YUUBARI

10/2006, Hachiro Nakai / 1040640

SHIPBORNE AIRCRAFT

Numbers/Type: 83/15 Sikorsky/Mitsubishi SH-60J/SH-60K (Seahawk).

Operational speed: 139 kt (257 km/h).

Service ceiling: 13,500 ft (4,090 m)

Range: 600 n miles (1,110 km)

Role/Weapon systems: ASW helicopter; started replacing HSS-2B in July 1991; built in Japan; prototypes fitted by Mitsubishi with Japanese avionics and mission equipment. Overall requirement for 103 aircraft. SH-60K are upgraded aircraft with an improved tactical data processing system. Sensors: Texas Instruments APS 124 search radar; sonobuoys plus datalink; Bendix AQS 18/Nippon HQS 103 dipping sonar, ECM, HLR 108 ESM. Weapons: ASW; two Mk 46 torpedoes or depth bombs. 2 Hellfire ASM (SH-60K)

SH-60K

10/2006, Hachiro Nakai / 1040641

Numbers/Type: 2/1 Agusta Westland/Kawasaki MCH 101/CH 101.

Operational speed: 150 kt (278 km/h).

Service ceiling: 15,000 ft (4,575 m).

Range: 610 n miles (1,129 km)

Role/Weapon systems: Based on the Agusta Westland EH-101. There are to be 11 MCH-101 AMCM and cargo carrying aircraft to replace the MH-53E. Three CH-101 are to replace the S-61A support aircraft deployed in the ice patrol ship.

MCH-101

11/2006, Japanese Navy / 1167169

LAND-BASED MARITIME AIRCRAFT

Notes: Aircraft type names are not used by the MSDF

Numbers/Type: 10 NAMC YS-11

Operational speed: 248 kt (459 km/h).

Service ceiling: 21,500 ft (6,580 m).

Range: 1,960 n miles (3,629 km).

Role/Weapon systems: First flew in 1962. Of 182 aircraft constructed, 10 remain in service. Of these, two YS-11EA are EW trainers while there are believed to be four YS-11B configured for Sigint operations. These are equipped with dorsal and ventral blade antennas and with radomes. These aircraft may be designated YS-11EL. Other variants include two YS-11FC flight checkers, a YS-11NT navigational trainer and YS-11C transport aircraft.

YS-11

9/2008*, Hachiro Nakai / 1353175

CH-101

9/2008*, Hachiro Nakai / 1353174

Numbers/Type: 95/5/1/3/5 Lockheed/Kawasaki P-3C/EP-3/UP-3C/UP-3D/OP-3C
Operational speed: 395 kt (732 km/h).
Service ceiling: 28,300 ft (8,625 m).
Range: 3,300 n miles (6,100 km).

Role/Weapon systems: Long-range MR/ASW and surface surveillance and attack. Most maritime surveillance is done by these aircraft. Sensors: APS-115 radar, ASQ-81 MAD, AQA 7 processor, Unisys CP 2044 computer, IFF, ECM, ALQ 78, ESM, ALR 66, sonobuoys. Weapons: ASW; eight Mk 48 torpedoes, depth bombs or mines, four underwing stations for Harpoon and ASM-1.

P-3C 9/2008*, Hachiro Nakai / 1353176

EP-3 9/2008*, Hachiro Nakai / 1353177

Numbers/Type: 6 Shinmeiwa US-1A Rescue.
Operational speed: 265 kt (491 km/h).
Service ceiling: 28,400 ft (8,655 m).
Range: 2,300 n miles (4,260 km).

Role/Weapon systems: Turboprop amphibian designed for maritime patrol and SAR missions. Crew of 12. Accommodation for 16 survivors or 12 stretchers.

US-1A 7/2008*, Hachiro Nakai / 1353115

Numbers/Type: 10 Sikorsky/Mitsubishi S-80M-1 (Sea Dragon) (MH53E).
Operational speed: 170 kt (315 km/h).
Service ceiling: 18,500 ft (5,640 m).
Range: 1,120 n miles (2,000 km).

Role/Weapon systems: Three-engined AMCM helicopter tows Mk 103, 104, 105 and 106 MCM sweep equipment; self-deployed. Weapons: Two 12.7 mm guns for mine disposal.

MH-53E 9/2008*, Hachiro Nakai / 1353104

Numbers/Type: 2 Kawasaki XP-1
Operational speed: 448 kt (830 km/h).
Service ceiling: 36,100 ft (11,000 m).
Range: 4,320 n miles (8,000 km).

Role/Weapon systems: The first test version of the XP-1 future maritime patrol aircraft was rolled out on 4 July 2007. The aircraft has been under full development since 2001 and is to replace the P-3C inventory in due course. The aircraft incorporates the world's first Fly-By-Light (FBL) system. The aircraft is to be equipped with new acoustic and radar systems. Following flight testing, the aircraft is to be delivered to the Ministry of Defence by the end of 2008. Up to 70 aircraft may be acquired.

XP-1 10/2008*, Ships of the World / 1353183

Numbers/Type: 3 Shinmeiwa US-2.
Operational speed: 300 kt (556 km/h).
Service ceiling: 28,400 ft (8,655 m).
Range: 2,500 n miles (4,630 km).

Role/Weapon systems: Following trials, two former experimental aircraft entered service in 2007. A further aircraft was authorised in the FY07 budget. The US-2 is an upgraded version of the US-1A and is designed for maritime patrol and SAR missions. Sensors: Thales Ocean Master radar.

US-2 12/2008*, Hachiro Nakai / 1353114

PATROL FORCES

6 HAYABUSA CLASS (PGGF)

Name	No	Builders	Launched	Commissioned
HAYABUSA	824	Mitsubishi, Shimonoseki	13 June 2001	25 Mar 2002

SHIRATAKA	829	Mitsubishi, Shimonoseki	8 Aug 2003	24 Mar 2004

Displacement, tons: 200 standard; 240 full load
Dimensions, feet (metres): 164.4 × 27.6 × 13.8 (50.1 × 8.4 × 4.2)
Main machinery: 3 LM 500-G07 gas turbines 16,200 hp (12.08 MW); 3 water jets
Speed, knots: 44
Complement: 18 (+3 staff)
Missiles: 4 Mitsubishi Type 90 SSM-1B; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.
Guns: 1 OTO Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.7 n miles) anti-surface; 12 km (6.6 n miles) anti-aircraft; weight of shd, 6 kg.
 2—12.7 mm MGs.
Countermeasures: Decoys: Chaff launchers.
ESM/ECM: NOLR-9B
Radars: Surface search: OPS-18-3; G-band
Fire control: Type 2-31C.
Navigation: OPS-20; I-band

Comment: First pair authorised in FY99 budget, second pair in FY00 and third pair in FY01. Single hull

OOTAKA 10/2008*, Hachiro Nakai / 1353116

1 PG 01 (SPARVIERO) CLASS (FAST ATTACK HYDROFOILS—MISSILE) (PTGK)

Name	No	Builders	Launched	Commissioned
MISAIRUTEI-SAN-GOU	823	Sumitomo, Uraga	15 June 1994	13 Mar 1995

Displacement, tons: 50 standard; 60 full load
Dimensions, feet (metres): 71.5 × 22.9 × 4.6 (21.8 × 7 × 1.4) (hull)
 80.7 × 23.1 × 14.4 (24.6 × 7 × 4.4) (foilborne)
Main machinery: 1 GE/IMI LM 500 gas turbine; 6,000 hp (3.72 MW) sustained; 1 pumpjet (foilborne); 1 diesel; 1 retractable prop (hullborne)
Speed, knots: 46; 8 (diesel). **Range, n miles:** 400 at 40 kt; 1,000 at 8 kt
Complement: 11 (3 officers)
Missiles: SSM: 4 Mitsubishi Type 90 SSM-1B (derivative of land-based system); range 150 km (81 n miles)
Guns: 1 GE 20 mm/76 Sea Vulcan; 3 barrels per mounting; 1,500 rds/min combined to 4 km (2.2 n miles)
Countermeasures: Decoys: 2 Loral Hycoor Mk 36 SRBOC chaff launchers.
ESM/ECM: NOLR-9B.
Combat data systems: Link 11
Radars: Surface search: JRC OPS-28-2; G band.
Navigation: JRC OPS-20; I-band

Comment: Classified as Guided Missile Patrol Boats. First two approved in FY90 and one more approved in FY92. The first two were decommissioned in 2008

PG 01 CLASS 7/2006, Hachiro Nakai / 1040645

AMPHIBIOUS FORCES

3 OOSUMI CLASS (LPD/LSTH)

Name	No	Builders	Laid down	Launched	Commissioned
OOSUMI	LST 4001	Mitsui, Tamano	6 Dec 1995	18 Nov 1996	11 Mar 1998
SHIMOKITA	LST 4002	Mitsui, Tamano	30 Nov 1999	29 Nov 2000	12 Mar 2002
KUNSAKI	LST 4003	Universal, Maizuru	7 Sep 2000	13 Dec 2001	26 Feb 2003

Displacement, tons: 8,900 standard; 14,000 full load

Dimensions, feet (metres): 584 × 84.6 × 19.7

(178 × 25.8 × 6)

Flight deck, feet (metres): 426.5 × 75.5 (130 × 23)

Main machinery: 2 Mitsui 16V42MA diesels; 26,000 hp(m)

(19.4 MW); 2 shafts; 2 bow thrusters

Speed, knots: 22

Complement: 135

Military lift: 330 troops; 2 LCAC; 10 Type 90 tanks or 1,400 tons cargo

Guns: 2 GE/GD 20 mm Vulcan Phaenx Mk 15 ● 6 barrels per mounting; 3,000 rds/min combined to 1.5 km.

Countermeasures: ESM/ECM.

Radars: Air search: Mitsubishi OPS-14C ●; C-band.

Surface search: JRC OPS-28D ●; G-band.

Navigation: JRC OPS-20; I-band

Helicopters: Platform for 2 CH-47J.

Programmes: A 5,500 ton LST was requested and not approved in the 1989 or 1990 estimates. The published

OOSUMI

(Scale 1 : 1,500), Ian Sturton / 0012652

design resembled the Italian San Giorgio with a large flight deck and a stern dock. No further action was taken for two years but the FY93 request included a larger ship showing the design of a USN LPH, although smaller in size. This vessel, with some modifications, was authorised in the 1993 estimates. A second of class approved in FY98 and third in FY99.

Structure: Through deck, flight deck and stern docking well make this more like a mini LHA than an LST, except that the ship is described as providing only 'platform and refuelling facilities for helicopters'.

2 YURA CLASS (LSU/LCU)

Name	No	Builders	Commissioned
YURA	LSU 4171	Sasebo Heavy Industries	27 Mar 1981
NOTO	LSU 4172	Sasebo Heavy Industries	27 Mar 1981

Displacement, tons: 590 standard
Dimensions, feet (metres): 190.2 x 31.2 x 5.6 (58 x 9.5 x 1.7)
Main machinery: 2 Fuji 6L275XF diesels, 3,250 hp(m) (2.39 MW); 2 shafts; cp props
Speed, knots: 12
Complement: 31
Military lift: 70 troops
Guns: 1 GE 20 mm/76 Sea Vulcan 20; 3 barrels per mounting; 1,500 rds/min combined to 4 km (2.2 n miles)
Radars: Navigation: Fujitsu OPS-9B; I-band.

Comment: Both laid down 23 April 1980. 4171 launched 15 October 1980 and 4172 on 12 November 1980.

YURA 8/2007, Hachiro Nakai / 1305095

2 YUSOUTEI CLASS (LCU)

Name	No	Builders	Commissioned
YUSOUTEI-CHI-GOU	LCU 2001	Sasebo Heavy Industries	17 Mar 1988
YUSOUTEI-NI-GOU	LCU 2002	Sasebo Heavy Industries	11 Mar 1992

Displacement, tons: 420 standard; 540 full load
Dimensions, feet (metres): 170.6 x 28.5 x 5.2 (52 x 8.7 x 1.6)
Main machinery: 2 Mitsubishi S6U-MTK diesels; 3,000 hp(m) (2.23 MW); 2 shafts
Speed, knots: 12
Complement: 28
Guns: 1 GE 20 mm/76 Sea Vulcan; 3 barrels per mounting; 1,500 rds/min combined to 4 km (2.2 n miles)
Radars: Navigation. OPS-9B/26; I-band

Comment: First approved in 1986 estimates, laid down 11 May 1987, launched 9 October 1987. Second approved in FY90 estimates, laid down 15 May 1991, launched 7 October 1991; plans for a third have been scrapped. Official names are LCU 01 and LCU 02.

YUSOUTEI-CHI-GOU 10/2008*, Hachiro Nakai / 1353119

6 LANDING CRAFT AIR CUSHION (LCAC)

AIR CUSHION-TEI (1-6) GOU LCAC 2101 2106

Displacement, tons: 100 standard; 180 full load
Dimensions, feet (metres): 88 oa (on cushion) (81 between hard structures) x 47 beam (on cushion) (43 beam hard structure) x 2.9 draught (off cushion) (26.8 (24.7) x 14.3 (13.1) x 0.9)
Main machinery: 4 Avco-Lycoming TF-40B gas turbines; 2 for propulsion and 2 for lift; 16,000 hp (12 MW) sustained; 2 shrouded reversible-pitch airscrews (propulsion); 4 double entry fans, centrifugal or mixed flow (lift)
Speed, knots: 40 (loaded)
Range, n miles: 300 at 35 kt, 200 at 40 kt
Complement: 5
Military lift: 24 troops; 1 MBT or 60-75 tons
Radars: Navigation: LN-66; I-band.

Comment: Built by Textron Marine, New Orleans for embarkation in LPDs. Approval for sale given by US on 8 April 1994. First two commissioned in March 1998, second two in March 2002 and third in February 2003. Cargo space capacity is 1,809 sq ft.

LCAC 2103 7/2008*, Hachiro Nakai / 1353170

10 LCM TYPE (LCM)

---------	------------	------------	---------	---------	---------	---------

Displacement, tons: 25 standard
Dimensions, feet (metres): 55.8 x 14 x 2.3 (17.0 x 4.3 x 0.7)
Main machinery: 2 Isuzu E120-MF6R diesels, 480 hp(m) (353 kW); 2 shafts
Speed, knots: 10
Range, n miles: 130 at 9 kt
Complement: 3
Military lift: 34 tons or 80 troops

Comment: Built in Japan. YF 2127-29 commissioned in March 1992, 2132 in March 1993, 2135 in March 1995, 2138 in March 1996 and 2141 in March 1997. YF 2150-51 are 50 ton vessels built by Yokohama Yacht and completed in March 2003. With a military lift of 100 tons they are capable of 16 kt.

YF 2135 10/2007, Hachiro Nakai / 1305095

2 YF 2150 CLASS LCM (LCM)

YF 2150-51

Displacement, tons: 50 standard
Dimensions, feet (metres): 121.4 x 22.0 x 11.2 (36.8 x 6.7 x 3.4)
Main machinery: 2 Mitsubishi S12R-MTK diesels; 3,000 hp (2.24 MW); 2 waterjets
Speed, knots: 16
Complement: 4
Military lift: 100 troops or 1 vehicle

Comment: Built in Japan by Universal, Keihin and commissioned on 19 March 2003.

YF 2150 10/2007, Hachiro Nakai / 1305096

MINE WARFARE FORCES

2 URAGA CLASS (MINESWEEPER TENDERS) (MSTH/ML)

Name	No	Builders	Launched	Commissioned
URAGA	MST 463	Hitachi, Maizuru	22 May 1996	19 Mar 1997
BUNGO	MST 464	Mitsui, Tamano	24 Apr 1997	23 Mar 1998

Displacement, tons: 5,650 standard; 6,850 full load
Dimensions, feet (metres): 462.6 x 72.2 x 17.7 (141 x 22 x 5.4)
Main machinery: 2 Mitsui 16V42MA diesels; 19,500 hp(m) (14.33 MW); 2 shafts
Speed, knots: 22
Complement: 160
Guns: 1 OTO Melara 3 in (76 mm)/62 compact (MST 464), 85 rds/min to 16 km (8.6 n miles); weight of shell 6 kg.
Mines: Laying capability; 4 rails (Type 3). 200 mines.
Radars: Air search OPS-14C; C-band.
Fire control: Type 2-23; I/J-band.
Navigation: JRC OPS 39C, I-band.
Helicopters: Platform for 1 MH-53E

Comment: First one authorised 15 February 1994 and laid down 19 May 1995; second authorised in FY95 and laid down 4 July 1996. Capable of laying mines, from four internal rails. Phalanx is planned to be fitted forward of the bridge and on the superstructure aft of the funnel.

URAGA 2/2008*, Hachiro Nakai / 1353171

3 YAEYAMA CLASS (MINESWEEPERS—OCEAN) (MSO)

Name	No	Builders	Launched	Commissioned
YAEYAMA	MSO 301	Hitachi Zosen, Kanagawa	29 Aug 1991	16 Mar 1993
TSUSHIMA	MSO 302	Nippon Koukan, Tsurumi	20 Sep 1991	23 Mar 1993
HACHIJYO	MSO 303	Nippon Koukan, Tsurumi	15 Dec 1992	24 Mar 1994

Displacement, tons: 1,000 standard; 1,200 full load
Dimensions, feet (metres): 219.8 x 38.7 x 10.2 (67 x 11.8 x 3.1)
Main machinery: 2 Mitsubishi 6NMU-TA1 diesels; 2,400 hp(m) (1.76 MW); 2 shafts; 1 hydrojet bow thruster; 360 hp(m) (257 kW)
Speed, knots: 14
Complement: 60
Guns: 1 JM-61 20 mm/76 Sea Vulcan; 3 barrels per mounting; 1,500 rds/min combined to 4 km (2.2 n miles).
Radars: Surface search: Fujitsu OPS-39B; I-band.
Sonars: Raytheon SQQ-32 VDS; high frequency; active.

Comment: First two approved in 1989 estimates, third in 1990. First laid down 30 August 1990, second 20 July 1990 and third 17 May 1991. Wooden hulls. Fitted with S 7 deep sea minehunting system, S 8 (SLQ-48) deep sea moored minesweeping equipment and ADI Dyad sweeps. Appears to be a derivative of the USN Avenger class. An integrated tactical system is fitted. Termination of the programme at three of the class suggests similar problems to US ships of the same class.

TSUSHIMA 7/2006, Hachiro Nakai / 1040651

2 NIJIMA CLASS (DRONE CONTROL SHIPS) (MCSD)

Name	No	Builders	Commissioned
OGISHIMA	MCL 726 (ex-MSO 668)	Hitachi, Kanagawa	19 Dec 1987
SAKUSHIMA	MCL 727 (ex-MSO 671)	Nippon Koukan, Tsurumi	18 Dec 1989

Displacement, tons: 440 standard; 510 full load
Dimensions, feet (metres): 180.4 x 30.8 x 8.2 (56 x 9.4 x 2.5)
Main machinery: 2 Mitsubishi 122C diesels; 1,440 hp(m) (1.08 MW); 2 shafts
Speed, knots: 14
Complement: 28
Guns: 1 GE 20 mm/76 Sea Vulcan 20; 3 barrels per mounting; 1,500 rds/min combined to 4 km (2.2 n miles).
Radars: Surface search: Fujitsu OPS-9B; I-band.

Comment: Both converted to act as Minesweeper Control Ship (MCLs) and equipped to operate SAM remote controlled drones. All minesweeping gear removed. *Ogishima* converted as MCL on 8 February 2006.

SAM 01-06
Displacement, tons: 20 full load
Dimensions, feet (metres): 59.1 x 20 x 5.2 (18 x 6.1 x 1.6)
Main machinery: 1 Volvo Penta TAMD 70D diesel; 210 hp(m) (154 kW); 1 Schottel prop
Speed, knots: 8. Range, n miles: 330 at 8 kt

Comment: First pair acquired from Karlskronavarvet, Sweden in February 1998 followed by two more in December 1998 and two more in 2000. Remotely controlled magnetic and acoustic catamaran sweepers operated by *Kamishima* and *Ogishima*.

SAM 02 2/2008*, Hachiro Nakai / 1353124

12 SUGASHIMA CLASS (MINEHUNTER (COASTAL)) (MHC)

Name	No	Builders	Launched	Commissioned
SUGASHIMA	MSC 681	NKK, Tsurumi	25 Aug 1997	16 Mar 1999
NOTOJIMA	MSC 682	Hitachi, Kanagawa	3 Sep 1997	16 Mar 1999
TSUNOSHIMA	MSC 683	Hitachi, Kanagawa	22 Oct 1998	13 Mar 2000
NAOSHIMA	MSC 684	NKK, Tsurumi	7 Oct 1999	16 Mar 2001
TOYOSHIMA	MSC 685	Hitachi, Kanagawa	13 Sep 2000	4 Mar 2002
UKUSHIMA	MSC 686	Universal, Keihin (Tsurumi)	17 Sep 2001	18 Mar 2003
IZUSHIMA	MSC 687	Universal, Keihin (Kanagawa)	31 Oct 2001	18 Mar 2003
AISHIMA	MSC 688	Universal, Keihin (Tsurumi)	8 Oct 2002	16 Feb 2004
AOSHIMA	MSC 689	Universal, Keihin (Kanagawa)	16 Sep 2003	9 Feb 2005
MIYAJIMA	MSC 690	Universal, Keihin (Tsurumi)	10 Oct 2003	9 Feb 2005
SHISHIJIMA	MSC 691	Universal, Keihin (Tsurumi)	29 Sep 2004	8 Feb 2006
KUROSHIMA	MSC 692	Universal, Keihin (Tsurumi)	31 Aug 2005	23 Feb 2007

Displacement, tons: 510 standard; 590 full load
Dimensions, feet (metres): 177.2 x 30.8 x 9.8 (54.0 x 9.4 x 3.0)
Main machinery: 2 Mitsubishi 6 NMU-TA1 diesels; 1,800 hp(m) (1.33 MW); 2 shafts; bow thrusters
Speed, knots: 14. Range, n miles: 2,500 at 10 kt
Complement: 45
Guns: 1 JM-61 20 mm/76 Sea Vulcan, 3 barrels for mounting, 1,500 rds/min combined to 4 km (2 n miles)
Combat data systems: AMS/NEC Neutis-M type MCM control system.
Radars: Surface search: Fujitsu OPS-39B; I-band.
Sonars: THALES Hitachi GEC Type 2093 VDS; high frequency; active.

Comment: First pair authorised in FY95, third in FY96, fourth in FY97, fifth in FY98, sixth and seventh in FY99, eighth in FY00, ninth and tenth in FY01, eleventh in FY02 and twelfth in FY03. Hull is similar to *Uwayima* but the upper deck is extended aft to provide more storage for mine disposal gear, and there are twin funnels. PAP 104 Mk 5 ROVs are carried and ADI Dyad minesweeping gear fitted.

NAOSHIMA 2/2008*, Hachiro Nakai / 1353122

2 + 1 HIRASHIMA CLASS (MINESWEEPERS/MINEHUNTERS—COASTAL) (MHSC)

Name	No	Builders	Launched	Commissioned
HIRASHIMA	MSC 601	Universal, Keihin (Tsurumi)	27 Sep 2006	11 Mar 2008
YAKUSHIMA	MSC 602	Universal, Keihin (Tsurumi)	26 Sep 2007	6 Mar 2009
TAKASHIMA	MSC 603	Universal, Keihin (Tsurumi)	25 Sep 2008	Mar 2010

Displacement, tons: 570 standard; 650 full load
Dimensions, feet (metres): 187 x 32.1 x 14.4 (57.0 x 9.8 x 4.4)
Main machinery: 2 Mitsubishi 6 NMU diesels; 2,200 hp (1.64 MW); 2 shafts; bow thrusters
Speed, knots: 14
Complement: 45
Guns: 1—20 mm Sea Vulcan.
Sonars: Hitachi ZQS 4; hull-mounted; high frequency.

Comment: First authorised in FY04 budget, second in FY05 budget and third in FY06 budget. Wooden hull. Equipped with S-10 minesweeping and disposal system.

HIRASHIMA 3/2008*, Hachiro Nakai / 1353123

0 + 2 IMPROVED HIRASHIMA CLASS (MINESWEEPERS—COASTAL) (MSC)

Name	No	Builders	Laid down	Launched	Commissioned
-	-	-	2009	2010	2012

Displacement, tons: 570 standard
Dimensions, feet (metres): 206.7 x 32.1 x 14.4 (63.0 x 9.8 x 4.4)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 14
Complement: To be announced
Guns: 1—30 mm (remote controlled).

Comment: A larger, improved version of the *Hirashima* class. FRP construction. First authorised in FY08 budget and second in FY09 budget.

10 HATSUSHIMA/UWAJIMA CLASS (MINEHUNTERS/SWEEPERS—COASTAL) (MHSC)

Name	No	Builders	Commissioned
AWASHIMA	MSC 670	Hitachi, Kanagawa	13 Dec 1989
UWAJIMA	MSC 672	Nippon Koukan, Tsurumi	19 Dec 1990
IESHIMA	MSC 673	Hitachi, Kanagawa	19 Dec 1990
TSUKISHIMA	MSC 674	Hitachi, Kanagawa	17 Mar 1993
MAEJIMA	MSC 675	Hitachi, Kanagawa	15 Dec 1993
KUMEJIMA	MSC 676	Nippon Koukan, Tsurumi	12 Dec 1994
MAKISHIMA	MSC 677	Hitachi, Kanagawa	12 Dec 1994
TOBISHIMA	MSC 678	Nippon Koukan, Tsurumi	10 Mar 1995
YUGESHIMA	MSC 679	Hitachi, Kanagawa	11 Dec 1996
NAGASHIMA	MSC 680	Nippon Koukan, Tsurumi	26 Dec 1996

Displacement, tons: 440 (490, MSC 672-680) standard; 520 (550 MSC 670-671) (570 MSC 672-680) full load

Dimensions, feet (metres): 180.4 (190.3, MSC 670 onwards) × 30.8 × 8.2 (9.5)

(55 (58.0) × 9.4 × 2.5 (2.9))

Main machinery: 2 Mitsubishi 6NMU-TAI diesels; 1,800 hp(m) (1.3 MW); 2 shafts

Speed, knots: 14

Range, n miles: 2,500 at 10 kt

Complement: 45

Guns: 1 JM-61 20 mm/76 Sea Vulcan 20; 3 barrels per mounting; 1,500 rds/min combined to 4 km (2.2 n miles)

Radars: Surface search: Fujitsu OPS-9 or OPS-39 (MSC 674 onwards); I-band.

Sonars: Nec/Hitachi ZQS 2B or ZQS 3 (MSC 672 onwards); hull-mounted; minehunting; high frequency.

Programmes: First ordered in 1976. Last two authorised in FY94. Because of the new sonar and mine detonating equipment vessels from MSC 672 onwards are known as the Uwajima class.

Structure: From MSC 670 onwards the hull is lengthened by 2.7 m in order to improve the sleeping accommodation from three tier to two tier bunks. Hulls are made of wood. The last pair has more powerful engines developing 1,800 hp(m) (1.32 MW)

Operational: Fitted with S 4 (S 7 from MSC 672 onwards) mine detonating equipment, a remote-controlled counter-mine charge. Four clearance divers are carried. Earlier vessels of the class converted to drone control or paid off at a rate of one or two a year.

MAKISHIMA

7/2008*, Hachiro Nakai / 1353125

0 + 1 SURVEY SHIP (AGS)

Name	No	Builders	Laid down	Launched	Commissioned
-	AGS 5106	Mitsui, Tamano	Dec 2008	June 2009	Mar 2010

Displacement, tons: 3,200 standard

Dimensions, feet (metres): 337.9 × 53.8 × 14.8 (103.0 × 16.4 × 4.5)

Main machinery: Diesel-electric; 2 shafts

Speed, knots: 16

Range, n miles: To be announced

Complement: 80

Radars: Navigation: I-band.

Comment: New survey ship authorised in FY07 budget

1 NICHINAN CLASS (SURVEY SHIP) (AGS)

Name	No	Builders	Launched	Commissioned
NICHINAN	AGS 5105	Mitsubishi, Shimonoseki	11 June 1998	24 Mar 1999

Displacement, tons: 3,300 standard; 4,500 full load

Dimensions, feet (metres): 364.2 × 55.8 × 14.8 (111 × 17 × 4.5)

Main machinery: Diesel-electric; 2 Mitsubishi S16U diesel generators; 3 motors, 3,600 hp(m) (2.7 MW); 2 shafts; bow and stern thrusters

Speed, knots: 18

Complement: 90

Comment: Authorisation approved in FY96. Combination cable repair and hydrographic survey ship. Equipped with one ROV

NICHINAN

8/2007, Hachiro Nakai / 1305104

1 SUMA CLASS (AGS)

Name	No	Builders	Launched	Commissioned
SUMA	AGS 5103	Hitachi, Maizuru	1 Sep 1981	30 Mar 1982

Displacement, tons: 1,180 standard; 1,700 full load

Dimensions, feet (metres): 236.2 × 42 × 11.1 (72 × 12.8 × 3.4)

Main machinery: 2 Fuji 6L275XF diesels; 3,000 hp(m) (2.24 MW); 2 shafts; cp props; bow thruster

Speed, knots: 15

Complement: 64 plus 5 scientists

Countermasures: ESM NOLR-6.

Radars: Navigation: OPS-20; I-band.

Comment: Laid down 24 September 1980. Carries an 11 m launch for surveying work.

SUMA

2/1999, Hachiro Nakai / 0080180

2 FUTAMI CLASS (AGS)

Name	No	Builders	Launched	Commissioned
FUTAMI	AGS 5102	Mitsubishi, Shimonoseki	9 Aug 1978	27 Feb 1979
WAKASA	AGS 5104	Hitachi, Maizuru	21 May 1985	25 Feb 1986

Displacement, tons: 2,050 standard; 3,175 full load

Dimensions, feet (metres): 318.2 × 49.2 × 13.8 (97 × 15 × 4.2)

Main machinery: 2 Kawasaki-MAN V8V22/30ATL diesels; 4,000 hp(m) (2.94 MW) (AGS 5102); 2 Fuji 8L275XF diesels, 3,250 hp(m) (2.39 MW) (AGS 5104); 2 shafts; cp props, bow thruster

Speed, knots: 16

Complement: 105 (95 AG 5104)

Radars: Navigation: JRC OPS-18-3; G-band.

Comment: AGS 5102 laid down 20 January 1978, AGS 5104 21 August 1984. Built to merchant marine design. Carry an RCV 225 remote-controlled rescue/underwater survey submarine. *Wakasa* has a slightly taller funnel.

FUTAMI

8/2008*, Hachiro Nakai / 1353176

SURVEY AND RESEARCH SHIPS

Notes: Survey ships are also included in the Coast Guard section

2 HIBIKI CLASS (OCEAN SURVEILLANCE SHIPS) (AGOSH)

Name	No	Builders	Launched	Commissioned
HIBIKI	AOS 5201	Mitsui, Tamano	27 July 1990	30 Jan 1991
HARIMA	AOS 5202	Mitsui, Tamano	11 Sep 1991	10 Mar 1992

Displacement, tons: 2,850 standard; 3,000 full load

Dimensions, feet (metres): 219.8 × 98.1 × 24.6 (67 × 29.9 × 7.5)

Main machinery: Diesel-electric; 4 Mitsubishi Stu diesels; 3,000 hp(m) (2.2 MW); 4 generators; 2 motors; 3,000 hp(m) (2.2 MW); 2 shafts

Speed, knots: 11 (3 towing)

Range, n miles: 3,800 at 10 kt

Complement: 40

Radars: Surface search: JRC OPS-16, G-band.

Navigation: Koden OPS-9; I-band.

Sonars: UQQ 2 SURTASS; passive surveillance.

Helicopters: Platform only.

Comment: First authorised 24 January 1989, laid down 28 November, second approved in FY90, laid down 26 December 1990. Auxiliary Ocean Surveillance (AOS) ships to a SWATH design similar to USN TAGOS-19 class. A data collection station is based at Yokosuka Bay using WSC-6 satellite data relay to the AOS.

HARIMA

4/2007, Hachiro Nakai / 1305102

1 KURIHAMA CLASS (ASE/AGE)

Name	No	Builders	Launched	Commissioned
KURIHAMA	ASE 6101	Sasebo Heavy Industries	20 Sep 1979	8 Apr 1980

Displacement, tons: 950 standard; 1,100 full load
Dimensions, feet (metres): 223 x 37.9 x 9.8 (screws) (68 x 11.6 x 3)
Main machinery: 2 Fuji 6S308 diesels; 2,600 hp(m) (1.94 MW); 2 shafts; 2 cp props; 2 auxiliary electric props; bow thruster
Speed, knots: 15
Complement: 40 plus 12 scientists
Radars: Navigation: Fujitsu OPS-9B, I-band

Comment: Experimental ship built for the Technical Research and Development Institute and used for testing underwater weapons and sensors.

KURIHAMA 5/2006, Hechiro Nakai / 1040618

1 ASUKA CLASS (AGEH)

Name	No	Builders	Launched	Commissioned
ASUKA	ASE 6102	Sumitomo, Uraga	21 June 1994	22 Mar 1995

Displacement, tons: 4,250 standard; 6,200 full load
Dimensions, feet (metres): 495.4 x 56.8 x 16.4 (157 x 17.3 x 5)
Main machinery: COGLAG; 2 IHI/GE LM 2500 gas turbines; 43,000 hp (31.6 MW); 2 shafts; cp props
Speed, knots: 27
Complement: 70 plus 100 scientists
Missiles: SAM: 8 cell VLS
Weapons control: Type 3 FCS
Radars: Air search: SPY-1D type; E/F-band.
 Air/surface search: Melco OPS-14C; D-band
 Surface search: JRC OPS-18-1; G-band
Fire control: Type 3; I/J-band.
Sonars: Bow-mounted; active search; medium frequency.
 Towed passive/active array in due course
Helicopters: 1 SH-60J Seahawk.

Comment: Included in the FY92 programme and laid down 21 April 1993. For experimental and weapon systems testing which started with the FCS 3 in 1996. The bow sonar dome extends aft to the bridge. The VLS system is on the forecastle. Surveillance and countermessures systems are also evaluated

ASUKA 8/2008, Hechiro Nakai / 1353127

RESCUE VEHICLES

2 RESCUE SUBMARINES (DSRV)

Displacement, tons: 40
Dimensions, feet (metres): 40.7 x 10.5 x 14.1 (12.4 x 3.2 x 4.6)
Main machinery: Electric; 30 hp (22 kW); single shaft
Speed, knots: 4
Complement: 2

Comment: Rescue submersibles built by Kawasaki Heavy Industries, Kobe and delivered on 27 August 1999. Space for 12 people. Sonars are fitted on the bow, upper and lower casings for depth sounding and obstacle avoidance. Can be deployed in the submarine rescue ships *Chiyoda* (AS 405) and *Chihaya* (ASR 403).

DSRV 7/2005, Hechiro Nakai / 1153295

TRAINING SHIPS

1 SHIMAYUKI CLASS (TRAINING SHIP) (AXGHM/TV)

Name	No	Builders	Commissioned
SHIMAYUKI	TV 3513 (ex-DD 133)	Mitsubishi, Nagasaki	17 Feb 1987

Displacement, tons: 3,050 standard; 4,200 full load
Dimensions, feet (metres): 426.4 x 44.6 x 14.4 (130 x 13.6 x 4.4)
Main machinery: COGOG; 2 Kawasaki-RR Olympus TM3B gas turbines; 45,000 hp (33.5 MW) sustained; 2 RR Type RM1C gas turbines; 9,900 hp (7.4 MW) sustained; 2 shafts, cp props
Speed, knots: 30; 19 cruise
Complement: 200

Missiles: SSM: 8 McDonnell Douglas Harpoon (2 quad) launchers; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg
SAM: Raytheon Sea Sparrow RIM-7M Mk 29 Type 3A launcher; semi-active radar homing to 16 km (8.5 n miles) at 2.5 Mach; warhead 38 kg; 12 missiles.
A/S: Honeywell ASROC Mk 112 octuple launcher; inertial guidance to 1.6-10 km (1-5.4 n miles) at 0.9 Mach; payload Mk 46 Mod 5 Neartip.
Guns: 1 OTO Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg
 2 General Electric/General Dynamics 20 mm Phalanx Mk 15 CIWS; 6 barrels per mounting; 3,000 rds/min combined to 1.5 km.
Torpedoes: 6-324 mm Type 68 (2 triple) tubes. Honeywell Mk 46 Mod 5 Neartip, anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.
Countermessures: Decoys: 2 Loral Hycor SRBOC 6-barrelled Mk 36 chaff launchers; range 4 km (2.2 n miles).
ESM: NOLR 8C; intercept
ECM: Fujitsu OLT 3; jammer.
Combat data systems: OYQ-5 action data automation; Link 14 (receive only) SATCOM.
Radars: Air search: Melco OPS-14B; D-band
 Surface search: JRC OPS-18-1; G-band
Fire control: Type 2-12 A; I/J-band (for SAM).
 2 Type 2-21/21A; I/J-band (for guns)
Tacans: ORN 6C
Sonars: Nec OQS 4A (III) (SQS-23 type), bow-mounted; active search and attack; low frequency.
Helicopters: Platform for 1 SH-60J Seahawk.

Comment: Converted to training ship in March 1999. Helicopter hangar converted to lecture rooms.

SHIMAYUKI 8/2007, Mick Prendergast / 1305107

1 KASHIMA CLASS (TRAINING SHIP) (AXH/TV)

Name	No	Builders	Launched	Commissioned
KASHIMA	TV 3508	Hitachi, Maizuru	23 Feb 1994	26 Jan 1995

Displacement, tons: 4,050 standard; 5,400 full load
Dimensions, feet (metres): 469.2 x 69.1 x 15.1 (143 x 18 x 4.6)
Main machinery: CODOG; 2 RR Spey SM1C gas-turbines; 27,000 hp (20.1 MW) sustained; 2 Mitsubishi S16U MTK diesels; 8,000 hp(m) (5.88 MW); 2 shafts
Speed, knots: 25
Range, n miles: 7,000 at 18 kt
Complement: 360 (includes 125 midshipmen)
Guns: 1 OTO Melara 76 mm/62 2-40 mm saluting guns.
Torpedoes: 6-324 mm (2 triple) tubes.
Radars: Air/surface search: Melco OPS-14C; D-band.
 Surface search: JRC OPS-18-1; D-band
Navigation: Fujitsu OPS-20, I-band
Fire control: Type 2-23; I/J-band.
Sonars: Hull-mounted; active search and attack; medium frequency OQS-4.
Helicopters: Platform for 1 medium

Comment: Approved in FY91 as a dedicated training ship but the project postponed to FY92 as a budget saving measure. Laid down 20 April 1993.

KASHIMA 4/2008, Kazumasa Watanabe / 1353103

2 ASAGIRI CLASS (TRAINING SHIPS) (AX/TV)

Name	No	Builders	Laid down	Launched	Commissioned
YAMAGIRI	TV 3515 (ex-DD 152)	Mitsui, Tamano	5 Feb 1986	8 Oct 1987	25 Jan 1989
ASAGIRI	TV 3516 (ex-DD 151)	Ishikawajima Harima, Tokyo	13 Feb 1985	19 Sep 1986	17 Mar 1988

Displacement, tons: 3,500 standard; 4,900 full load
Dimensions, feet (metres): 449.4 x 48 x 14.8 (137 x 14.6 x 4.5)
Main machinery: COGAG; 4 RR Spay SM1A gas turbines; 53,300 hp (39.8 MW) sustained;
 2 shafts; cp props
Speed, knots: 30+
Complement: 220

Missiles: SSM-8 McDonnell Douglas Harpoon (2 quad) launchers; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.
SAM: Raytheon Sea Sparrow Mk 29 (Type 3/3A) octuple launcher; semi-active radar homing to 14.6 km (8 n miles) at 2.5 Mach, warhead 39 kg; 20 missiles.
A/S: Honeywell ASROC Mk 112 octuple launcher; inertial guidance to 1.6-10 km (1-5.4 n miles) at 0.9 Mach, payload Mk 46 Mod 5 Neartip. Reload capability
Guns: 1 Otobreda 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg.
 2 General Electric/General Dynamics 20 mm Phalanx Mk 15 CIWS; 6 barrels per mounting; 3,000 rds/min combined to 1.5 km.
Torpedoes: 6—324 mm Type 68 (2 triple) HOS 301 tubes. Honeywell Mk 46 Mod 5 Neartip; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.
Countermeasures: Decoys: 2 Loral Hycor SRBOC 6-barrelled Mk 36 chaff launchers; range 4 km (2.2 n miles).
 1 SLQ-25 Nixie or Type 4; towed torpedo decoy.
ESM: Nec NOLR 6C or NOLR B (DD 152); intercept.
ECM: Fujitsu OLT-3; jammer.
Combat data systems: OYQ-7B data automation; Link 11/14. SATCOM. ORQ-1 helicopter datalink for SH-60J.
Radars: Air search: Melco OPS-14C; D-band.
 Surface search: JRC OPS-28C; G-band.
Fire control: Type 2-22 (for guns). Type 2-12E (for SAM).
Tacan: ORN-6D (URN 25)
Sonars: Mitsubishi OQS 4A (III); hull-mounted; active search and attack; low frequency.
 OQR-1; towed array; passive search; very low frequency.

Helicopters: Platform for 1 SH-60J Seahawk.

Comment: TV 3515 converted to training ship on 18 March 2004 and TV 3516 on 16 February 2005. Hangars converted to lecture rooms.

ASAGIRI 7/2008*, A A de Kruijff / 1353181

1 TENRYU CLASS (TRAINING SUPPORT SHIP) (AVHM/TV)

Name	No	Builders	Launched	Commissioned
TENRYU	ATS 4203	Sumitomo, Uraga	14 Apr 1999	17 Mar 2000

Displacement, tons: 2,450 standard; 2,750 full load
Dimensions, feet (metres): 347.8 x 54.1 x 13.5 (106 x 16.5 x 4.1)
Main machinery: 4 Niigata 8MG28H diesels, 12,800 hp(m) (9.5 MW) sustained; 2 shafts
Speed, knots: 22
Complement: 140
Guns: 1 OTO Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.6 n miles); weight of shell 6 kg.
Radars: Air/surface search: Melco OPS-14; D-band.
 Surface search: OPS-28D, G/H-band.
Fire control: Type 2-22; I/J-band.
Helicopters: 1 medium

Comment: Authorised in 1997 budget as a replacement for *Azuma* and laid down 19 June 1998. Carries four BQM-34J drones and four Northrop Chukar III drones used for evaluating performance of ships SAM systems. Improved 'Kurobe' design

TENRYU 4/2008*, Hachiro Nakai / 1353102

1 KUROBE CLASS (TRAINING SUPPORT SHIP) (AVM/TV)

Name	No	Builders	Commissioned
KUROBE	ATS 4202	Nippon Koukan, Tsurumi	23 Mar 1989

Displacement, tons: 2,200 standard; 2,750 full load
Dimensions, feet (metres): 331.4 x 54.1 x 13.1 (101 x 16.5 x 4)
Main machinery: 4 Fuji 8L275XF diesels; 9,160 hp(m) (6.8 MW); 2 shafts; cp props
Speed, knots: 20
Complement: 155 (17 officers)
Guns: 1 FMC/OTO Melara 3 in (76 mm)/62 Mk 75; 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 8 kg.
Radars: Air search: Melco OPS-14C, D-band.
 Surface search: JRC OPS-18-1; G-band.
Fire control: Type 2-22; I/J-band.

Comment: Approved under 1986 estimates, laid down 31 July 1987, launched 23 May 1988. Carries four BQM-34AJ high-speed drones and four Northrop Chukar II drones with two stern launchers. Used for training crews in anti-aircraft operations and evaluating the effectiveness and capability of ships' anti-aircraft missile systems.

KUROBE 7/2008*, Hachiro Nakai / 1353101

1 TRAINING TENDER (YXT)

YTE 13

Displacement, tons: 179 standard
Dimensions, feet (metres): 115.0 x 24.2 x 5.6 (35.3 x 7.4 x 1.72)
Main machinery: 2 Yanmar 12 LAK ST2 diesels, 2,200 hp(m) (1.16 MW); 2 shafts
Speed, knots: 16

Comment: Approved in FY00 budget and commissioned in 2002. Assigned to 1st Maritime Service School for cadet training

YTE 13 8/2005, Hachiro Nakai / 1153301

AUXILIARIES

2 MASHUU CLASS (FAST COMBAT SUPPORT SHIPS) (AOE/AORH)

Name	No	Builders	Laid down	Launched	Commissioned
MASHUU	AOE 425	Mitsui, Tamano	21 Jan 2002	5 Feb 2003	15 Mar 2004
OUMI	AOE 426	Universal, Maizuru	7 Feb 2003	19 Feb 2004	3 Mar 2005

Displacement, tons: 13,500 standard; 25,000 full load
Dimensions, feet (metres): 725 x 88.6 x 27.2 (221 x 27 x 8.3)
Main machinery: 2 Kawasaki RR Spay SM1C gas turbines, 40,000 hp (29.8 MW); 2 shafts
Speed, knots: 24
Complement: 145
Guns: 2—20 mm CIWS (to be fitted).
Countermeasures: Decoys: 4 SRBOC Mk 36 chaff and IR launchers.
Radars: Navigation: I-band
Helicopters: 2 medium.

Comment: First ship approved in FY00 and second in FY01. Capacity for 30 containers. Cranes capable of lifting 15 tons. Three replenishment at sea positions on each side.

MASHUU 10/2008*, Michael Nitz / 1353187

6 300 TON CLASS (EOD TENDERS) (YDT)

YDT 01-06

Displacement, tons: 300 standard
Dimensions, feet (metres): 150.9 x 28.2 x 7.2 (46 x 8.6 x 2.2)
Main machinery: 2 Niigata 6NSDL diesels; 1,500 hp(m) (1.1 MW); 2 shafts
Speed, knots: 15
Complement: 15 plus 15 divers
Radars: Navigation, I-band.

Comment: Built by Meehata Zousen. First pair approved in FY98, third in FY99, fourth in FY00 and fifth and sixth in FY01. First two commissioned 24 March 2000, third on 21 March 2001, fourth in December 2001 and last two on 14 March 2003. Used as diving tenders.

YDT 05 4/2008*, Hachiro Nakai / 1353178

1 CHIYODA CLASS**(SUBMARINE TENDER DEPOT AND RESCUE SHIP) (AS/ASRH)**

Name	No	Builders	Launched	Commissioned
CHIYODA	AS 405	Mitsui, Tamano	7 Dec 1983	27 Mar 1985

Displacement, tons: 3,650 standard; 5,400 full load
Dimensions, feet (metres): 370.6 x 57.7 x 15.1 (113 x 17.6 x 4.6)
Main machinery: 2 Mitsui 8L42M diesels; 11,500 hp(m) (8.6 MW); 2 shafts; cp props; bow and stern thrusters
Speed, knots: 17
Complement: 120 plus 80 submarine crew rest facility
Radars: Navigation: JRC OPS-16; G-band.
Sonars: SQS-38D.
Helicopters: Platform for up to MH-53 size.

Comment: Laid down 19 January 1983. Carries a 40 ton Deep Submergence Rescue Vehicle (DSRV), which is lowered and recovered through a centreline moonpool. The DSRV can mate to a decompression chamber. A personnel transfer capsule can also be deployed. Flagship Second Submarine Flotilla based at Yokosuka.

CHIYODA 1/2007, Hachiro Nakai / 1305114

1 CHIHAYA CLASS (SUBMARINE RESCUE SHIP) (ASRH)

Name	No	Builders	Launched	Commissioned
CHIHAYA	ASR 403	Mitsui, Tamano	8 Oct 1998	23 Mar 2000

Displacement, tons: 5,450 standard; 6,900 full load
Dimensions, feet (metres): 419.9 x 85.6 x 16.7 (128 x 20 x 5.1)
Main machinery: 2 Mitsui 12V 42M-A diesels; 19,500 hp(m) (14.33 MW); 2 shafts; 2 bow and 2 stern thrusters
Speed, knots: 21
Complement: 125
Radars: Navigation: OPS-20; I-band
Helicopters: Platform for up to MH-53 size.

Comment: Authorisation approved in the 1996 budget as a replacement for *Fushimi*. Laid down 13 October 1997. Fitted with a search sonar and carries a 40 ton DSRV. Also used as a hospital ship.

CHIHAYA 7/2008*, Hachiro Nakai / 1353129

3 TOWADA CLASS**(FAST COMBAT SUPPORT SHIPS) (AOE/AORH)**

Name	No	Builders	Launched	Commissioned
TOWADA	AOE 422	Hitachi, Maizuru	25 Mar 1986	24 Mar 1987
TOKIWA	AOE 423	Ishikawajima Harima, Tokyo	23 Mar 1989	12 Mar 1990
HAMANA	AOE 424	Hitachi, Maizuru	18 May 1989	29 Mar 1990

Displacement, tons: 8,150 standard; 15,850 full load
Dimensions, feet (metres): 547.8 x 72.2 x 26.9 (167 x 22 x 8.2)
Main machinery: 2 Mitsui 16V42MA diesels; 26,000 hp(m) (19.4 MW); 2 shafts
Speed, knots: 22 Range, n miles: 10,500 at 20 kt
Complement: 140
Cargo capacity: 5,700 tons
Countermeasures: Decoys: 2 chaff launchers can be fitted.
Radars: Surface search: JRC OPS-18-1/28C; G-band.
Helicopters: Platform for MH-53 size.

Comment: First approved under 1984 estimates, laid down 17 April 1985. Second and third of class in 1987 estimates. AOE 423 laid down 12 May 1988, and AOE 424 8 July 1988. Three replenishment at sea positions on each side (two fuel only, one stores).

TOWADA 7/2006, Hachiro Nakai / 1040592

34 HARBOUR TANKERS (YO/YW/YG)

Comment: There are: 18 of 490 tons (YO 14, 21-27, 29-31, 33-39); eight of 310 tons (YW 17-24), one of 280 tons (YO 13), seven of 270 tons (YG 202-206, YO 28, YO 32)

YO 21 2/2008*, Hachiro Nakai / 1353130

2 FIREFIGHTING TENDERS (YTR)

YTR 01-02

Displacement, tons: 60 standard
Dimensions, feet (metres): 82.0 x 18.0 x 3.6 (26.0 x 5.5 x 1.1)
Main machinery: 1 Isuzu Marine UM6WGITC diesel; 750 hp (560 kW); 2 Isuzu Marine UM6RB diesels; 1,040 hp (775 kW); 3 shafts
Speed, knots: 19
Complement: 10

Comment: Built in Japan by Ishikawajima-Harima Heavy Industries. YR 01 approved in FY99 budget and commissioned in 2001. YR 02 approved in FY00 budget and commissioned in 2002. Fitted with three waterjets forward and a crane aft.

YTR 01 9/2002, Takatoshi Okano / 0570888

1 MUROTO CLASS (CABLE REPAIR SHIP) (ARC)

Name	No	Builders	Launched	Commissioned
MUROTO	ARC 482	Mitsubishi, Shimonoseki	25 July 1979	27 Mar 1980

Displacement, tons: 4,500 standard; 6,000 full load
Dimensions, feet (metres): 436.2 x 57.1 x 18.7 (133 x 17.4 x 5.7)
Main machinery: 4 Kawasaki-MAN V8V22/30ATL diesels; 8,800 hp(m) (6.6 MW); 2 shafts; bow thruster
Speed, knots: 18
Complement: 135
Radars: Navigation: Fujitsu OPS-98; I-band.

Comment: Ocean survey capability. Laid down 28 November 1978. Similar vessels in civilian use.

MUROTO 7/2006, Hachiro Nakai / 1040593

1 HASHIDATE CLASS (ASY/YAC)

Name	No	Builders	Launched	Commissioned
HASHIDATE	ASY 91	Hitachi, Kanagawa	26 July 1999	30 Nov 1999

Displacement, tons: 400 standard; 490 full load
Dimensions, feet (metres): 203.4 × 30.8 × 6.6 (82 × 9.4 × 2.0)
Main machinery: 2 Niigata 16V 16FX diesels; 5,500 hp(m) (4.04 MW); 2 shafts
Speed, knots: 20
Range, n miles: 1,000 at 12 kt
Complement: 29 plus 130 passengers

Comment: Authorised in FY97 budget. Laid down 28 October 1998. Has replaced *Hiyodori* as a ceremonial yacht. Has facilities for disaster relief. Based at Yokosuka.

HASHIDATE 9/2007, Hachiro Nakai / 1305113

5 HIUCHI CLASS (MULTIPURPOSE SUPPORT SHIPS) (YTT)

Name	No	Builders	Launched	Commissioned
HIUCHI	AMS 4301	NKK, Tsurumi	4 Sep 2001	27 Mar 2002
SUOU	AMS 4302	Universal, Keihin (Tsurumi)	25 Apr 2003	16 Mar 2004
AMAKUSA	AMS 4303	Universal, Keihin (Tsurumi)	6 Aug 2003	16 Mar 2004
GENKAI	AMS 4304	Universal, Keihin (Tsurumi)	24 May 2007	20 Feb 2008
ENSHUU	AMS 4305	Universal, Keihin (Tsurumi)	9 Aug 2007	20 Feb 2008

Displacement, tons: 980 standard
Dimensions, feet (metres): 213.3 × 39.4 × 11.5 (65 × 12 × 3.5)
Main machinery: 2 Daihatsu 6 DKM-28 (L) diesels; 5,000 hp(m) (3.67 MW); 2 shafts
Speed, knots: 15
Complement: 40
Radars: Navigation: OPS-26B; I-band.

Comment: First authorised in FY99, two more in FY01 and two further in FY05 budget. Equipped for torpedo launch and recovery. Replaced ASU 81 class. Used as an ocean tug.

AMAKUSA 4/2008, Hachiro Nakai / 1353131

7 LANDING CRAFT (LIGHTER) (YL)

YL 9-15

Displacement, tons: 120 full load
Dimensions, feet (metres): 88.6 × 23.0 × 3.4 (270 × 70 × 1.04)
Main machinery: 2 Isuzu diesels; 560 hp (410 kW); 2 shafts
Speed, knots: 10
Complement: 5

Comment: Cargo lighters constructed by Ishihara, Takasago. First entered service in 1980 and latest in 1998. Equipped with a bow ramp and two 2 ton cranes

YL 10 4/2007, Hachiro Nakai / 1305117

ICEBREAKERS

0 + 1 FUTURE ICEBREAKER (AGBH)

Name	No	Builders	Laid down	Launched	Commissioned
SHIRASE	AGB 5003	Universal, Maizuru	15 Mar 2007	16 Apr 2008	May 2009

Displacement, tons: 12,500 standard; 20,000 full load
Dimensions, feet (metres): 452.7 × 91.9 × 30.2 (138.0 × 28.0 × 9.2)
Main machinery: Diesel-electric; 4 Mitsui 16V42M-B diesels; 4 generators; 4 motors; 30,000 hp (22 MW); 2 shafts
Speed, knots: 19.5 **Range, n miles:** 30,000 at 15 kt
Complement: 179 (34 officers) plus 80 scientists
Cargo capacity: 1,100 tons
Radars: Surface search: JRC OPS-18-3; G/H-band.
Navigation: Fujitsu OPS-39D; I-band
Tacan: ORN-6E.
Helicopters: 2 CH-101.

Comment: New Antarctic expedition ship planned to replace the decommissioned *Shirase*.

SHIRASE 4/2008, Hachiro Nakai / 1305319

TUGS

22 OCEAN TUGS (ATA/YT)

YT 58 YT 63-74 YT 78-79 YT 81 YT 84 YT 86 YT 89-90 YT 92 YT 94

Displacement, tons: 260 standard
Dimensions, feet (metres): 93 × 28 × 8.2 (28.4 × 8.6 × 2.5)
Main machinery: 2 Niigata 6L26B diesels; 1,800 hp(m) (1.32 MW); 2 shafts
Speed, knots: 11
Complement: 10

Comment: YT 58 entered service on 31 October 1978, YT 63 on 27 September 1982, YT 64 on 30 September 1983, YT 65 on 20 September 1984, YT 66 on 20 September 1985, YT 67 on 4 September 1986, YT 68 on 9 September 1987, YT 69 on 16 September 1987, YT 70 on 2 September 1988, YT 71 on 28 July 1989, YT 72 on 28 July 1990, YT 73 on 31 July 1991, YT 74 on 30 September 1991, YT 78 in July 1994, YT 79 on 29 September 1994, YT 81 on 8 July 1996, YT 84 on 30 September 1998, YT 86 on 21 March 2000, YT 89 and 90 on 16 March 2001, YT 92 on 17 March 2006 and YT 94 in March 2007. All built by Yokohama Yacht.

YT 78 7/2008, Hachiro Nakai / 1353137

21 COASTAL AND HARBOUR TUGS (YTM/YTB)

YT 53-57 YT 59-62 YT 75-77 YT 80 YT 82-83 YT 85 YT 87-88 YT 91 YT 93

Displacement, tons: 53 standard
Dimensions, feet (metres): 55.8 × 15.8 × 7.8 (170 × 4.8 × 2.4)
Main machinery: 2 Isuzu UM6SD1TCB diesels; 500 hp (373 kW); 2 shafts
Speed, knots: 8
Complement: 4

Comment: Details given are for 50 ton class (YT 75-77, YT 80, YT 85, YT 87-88, YT 91 and YT 93). There are also four of 190 tons (YT 53, YT 55-57), two of 35 tons (YT 60-61), one of 30 tons (YT 62) and two of 29 tons (YT 54, YT 59).

YT 83 1/2007, Hachiro Nakai / 1305110

COAST GUARD

KAIJYOU HOANCHOU

Headquarters Appointments

Commandant of the Coast Guard:
Teiji Iwasaki

Establishment

The Japan Coast Guard (Maritime Safety Agency before 1 April 2000) was established on 1 May 1948. Its five missions are Maintenance of Maritime Order, Maritime Search and Rescue, Maritime Environmental Protection and Enforcement, Maritime Traffic Safety and Co-operation with other national and international agencies. The HQ is at Tokyo, the Coast Guard Academy is at Kure and the Coast Guard School is at Maizuru.

The main operational branches are the Guard and Rescue, the Hydrographic and the Maritime Traffic Departments. Regional offices control the 11 districts with their location as follows (airbases in brackets): RMS 1-Otaru (Chitose, Hakodate, Kushiro); 2-Shiogama (Sendai), 3-Yokohama (Haneda); 4-Nagoya (Ise); 5-Kobe; 6-Hiroshima (Hiroshima); 7-Ube (Fukuoka); 8-Maizuru (Miho); 9-Niigata (Niigata); 10-Kagoshima (Kagoshima); 11-Naha (Naha, Ishigaki). This organisation includes, as well as the JCG HQ, 67 CG offices, 63 CG stations, 13 CG air stations, seven district communication centres, seven traffic advisory service centres, two hydrographic observatories, two aids to navigation offices, one Special Rescue station, one Special

Security station, one National Strike Team station and one Transnational Organised Crime Strike Force station.

LARGE PATROL VESSELS

1 SHIKISHIMA CLASS (PLH/PSOH)

Name	No	Builders	Laid down	Launched	Commissioned
SHIKISHIMA	PLH 31	Ishikawajima Harima, Tokyo	24 Aug 1990	27 June 1991	8 Apr 1992

Displacement, tons: 6,500 standard; 9,350 full load
Dimensions, feet (metres): 492.1 × 54.1 × 29.5 (150 × 18.5 × 9.0)
Main machinery: 2 SEMT-Pielstick 16 PC2.5 V 400; 20,800 hp(m) (15.29 MW); 2 shafts; bow thruster
Speed, knots: 25
Range, n miles: 20,000 at 18 kt
Complement: 110 plus 30 aircrew
Guns: 4 Oerlikon 35 mm/90 Type GDM-C (2 twin); 1,100 rds/min to 6 km (3.2 n miles); weight of shell 1.55 kg
 2 JM-61 MB 20 mm Gatling.
Radars: Air/surface search: Melco Ops 14; D-band
 Surface search: JMA 1576; I-band.
 Navigation: JMA 1596; I-band.
 Helo control: JMA 3000; I-band.
 Tacan: ORN-6 (URN 25)
Helicopters: 2 Aerospatiale A 332 L1.

Comment: Authorised in the FY89 programme in place of the third Mizuho class. Used to escort the plutonium transport ship. SATCOM fitted.

SHIKISHIMA

5/2008, Kazumasa Watanabe / 1353134

2 MIZUHO CLASS (PLH/PSOH)

Name	No	Builders	Launched	Commissioned
MIZUHO	PLH 21	Mitsubishi, Nagasaki	5 June 1985	19 Mar 1986
YASHIMA	PLH 22	Nippon Koukan, Tsurumi	20 Jan 1988	1 Dec 1988

Displacement, tons: 4,900 standard; 5,204 full load
Dimensions, feet (metres): 426.5 × 50.9 × 12.7 (130 × 15.5 × 5.4)
Main machinery: 2 SEMT-Pielstick 14 PC2.5 V 400 diesels; 18,200 hp(m) (13.38 MW) sustained; 2 shafts; cp props; bow thruster
Speed, knots: 23
Range, n miles: 8,500 at 22 kt
Complement: 100 plus 30 aircrew
Guns: 1 Oerlikon 35 mm/90; 550 rds/min to 6 km (3.2 n miles) anti-surface; 5 km (2.7 n miles) anti-aircraft; weight of shell 1.55 kg.
 1 JM-61 MB 20 mm Gatling.
Radars: Surface search: JMA 8303; I-band.
 Navigation/helo control, 2 JMA 3000; I-band.
Helicopters: 2 Fuji-Bell 212.

Comment: PLH 21 ordered under the FY83 programme laid down 27 August 1984. PLH 22 in 1986 estimates, laid down 3 October 1987. Two sets of fixed electric fin stabilisers that have a lift of 26 tons × 2 and reduce rolling by 90 per cent at 18 kt. Employed in search and rescue outside the 200 mile economic zone

MIZUHO

5/2005, Hechiro Nakai / 1143305

1 IZU CLASS (PL/PSOH)

Name	No	Builders	Launched	Commissioned
IZU	PL 31	Kawasaki, Sakaide	7 Feb 1997	25 Sep 1997

Displacement, tons: 3,500 normal
Dimensions, feet (metres): 360.9 × 49.2 × 17.4 (110 × 15 × 5.3)
Main machinery: 2 diesels; 12,000 hp(m) (8.82 MW); 2 shafts; bow thruster
Speed, knots: 20
Complement: 40 plus 70 spare
Guns: 1 Oerlikon 35 mm. 1 JM-61 MB 20 mm Gatling.
Radars: Surface search: I-band
 Navigation: I-band.
Helicopters: Platform for 1 Fuji-Bell 212.

Comment: Authorised in the FY95 programme. Laid down 22 March 1996. Replaced the former Izu in 1998, taking the same name and pennant number. Carries two launches.

IZU

5/2004, Japan Coast Guard / 1153306

438 Japan (COAST GUARD)/Large patrol vessels

10 SOYA CLASS (PLH/PSOH)

Name	No	Builders	Commissioned
SOYA	PLH 01	Nippon Kokan, Tsurumi	22 Nov 1978
TSUGURU	PLH 02	IHI, Tokyo	17 Apr 1979
OOSUMI	PLH 03	Mitsui Tamano	18 Oct 1979
HAYATO (ex-Uraga)	PLH 04	Hitachi, Maizuru	5 Mar 1980
ZAO	PLH 05	Mitsubishi, Nagasaki	19 Mar 1982
CHIKUZEN	PLH 06	Kawasaki, Kobe	28 Sep 1983
SETTSU	PLH 07	Sumitomo, Oppama	27 Sep 1984
ECHIGO	PLH 08	Mitsui Tamano	28 Feb 1990
RYUKYU	PLH 09	Mitsubishi, Nagasaki	31 Mar 2000
DAISEN	PLH 10	Nippon Kokan, Tsurumi	1 Oct 2001

Displacement, tons: 3,200 normal, 4,037 full load
Dimensions, feet (metres): 323.4 × 51.2 × 17.1 (98.6 × 15.6 × 5.2) (PLH 01)
 345.8 × 47.9 × 15.7 (105.4 × 14.6 × 4.8)
Main machinery: 2 SEMT-Pielstick 12 PC2.5 V 400 diesels; 15,604 hp(m) (11.47 MW) sustained; 2 shafts; cp props; bow thruster
Speed, knots: 21 (PLH 01), 22 (others)
Range, n miles: 5,700 at 18 kt
Complement: 71 (PLH 01-04), 69 (others)
Guns: 1 Bofors 40 mm or Oerlikon 35 mm. 1 Oerlikon 20 mm (PLH 01, 02, 05-07) or 1–20 mm JMS1MB Gatling gun.
Radars: Surface search: JMA 1576, I-band
 Navigation JMA 1596, I-band.
 Helo control: JMA 1596; I-band.
Helicopters: 1 Fuji-Bell 212.

Comment: PLH 01 has an icebreaking capability while the other ships are only ice strengthened. Fitted with both fin stabilisers and anti-rolling tanks of 70 tons capacity. The fixed electric hydraulic fins have a lift of 26 tons × 2 at 18 kt which reduces rolling by 90 per cent at that speed. At slow speed the reduction is 50 per cent, using the tanks. PLH 04 name changed on 27 March 1997. PLH 10 laid down 8 March 1999

SOYA 5/2008*, Kazumasa Watanabe / 1353135

1 MIURA CLASS (PL/PSOH)

Name	No	Builders	Launched	Commissioned
MIURA	PL 22	Sumitomo, Uraga	11 Mar 1998	28 Oct 1998

Displacement, tons: 3,000 normal
Dimensions, feet (metres): 377.3 × 45.9 × 15.7 (115 × 14 × 4.8)
Main machinery: 2 diesels; 8,000 hp(m) (5.88 MW); 2 shafts, cp props
Speed, knots: 18
Complement: 40 plus 10 spare
Guns: 1 Oerlikon 35 mm. 1–20 mm JM 61-B Gatling.

Comment: Authorised in FY96 programme. Laid down in October 1996. Has replaced ship of the same name.

MIURA 3/2007, Hachiro Nakai / 1305135

1 KOJIMA CLASS (PL/PSOH)

Name	No	Builders	Commissioned
KOJIMA	PL 21	Hitachi, Maizuru	11 Mar 1993

Displacement, tons: 2,650 normal, 2,950 full load
Dimensions, feet (metres): 377.3 × 45.9 × 23.8 (115 × 14 × 7.3)
Main machinery: 2 diesels; 8,000 hp(m) (5.9 MW); 2 shafts; cp props
Speed, knots: 18
Range, n miles: 7,000 at 15 kt
Complement: 118
Guns: 1 Oerlikon 35 mm/90. 1–20 mm JM-61B Gatling. 1–12.7 mm MG.
Radars: Navigation: Two JMA 1596; I-band.
Helicopters: Platform for 1 medium.

Comment: Authorised in the FY90 programme and ordered in March 1991. Laid down 7 November 1991, launched 10 September 1992. Training ship which has replaced the old ship of the same name and pennant number. SATCOM fitted.

KOJIMA 5/2008*, Kazumasa Watanabe / 1353136

1 NOJIMA CLASS (PL/PSOH)

Name	No	Builders	Commissioned
OKI (ex-Nojima)	PL 01	Ishikawajima Harima, Tokyo	21 Sep 1989

Displacement, tons: 1,500 normal
Dimensions, feet (metres): 285.4 × 34.4 × 11.5 (87 × 10.5 × 3.5)
Main machinery: 2 Fuji 8S40B diesels; 8,120 hp(m) (5.97 MW); 2 shafts
Speed, knots: 19
Complement: 34
Guns: 1 Oerlikon 35 mm/90. 1–20 mm JM-61B Gatling.
Radars: Navigation: 2 JMA 1596, I-band.
Helicopters: Platform for 1 Bell 212.

Comment: Laid down 16 August 1988 and launched 30 May 1989. Equipped as surveillance and rescue command ship. SATCOM fitted. Name changed on 30 November 1997

OKI 7/2005, Hachiro Nakai / 1153307

3 HIDA CLASS (PL/PSO)

Name	No	Builders	Launched	Commissioned
HIDA	PL 51	Mitsubishi, Shimonoseki	8 Aug 2005	18 Apr 2006
AKAISHI	PL 52	Mitsubishi, Shimonoseki	21 Oct 2005	18 Apr 2006
KISO	PL 53	IHI Marine United, Yokohama	17 Aug 2007	11 Mar 2008

Displacement, tons: 1,800 standard
Dimensions, feet (metres): 362.6 × 42.7 × 19.7 (95.0 × 13.0 × 6.0)
Main machinery: 4 diesels; waterjet propulsion
Speed, knots: 30
Guns: 1–40 mm Bofors Mk 3. 1–20 mm JM61 Gatling.
Helicopters: Platform for one medium.

Programmes: Two ships authorised in FY03 budget and a third in FY04 budget

AKAISHI 5/2007, Hachiro Nakai / 1305063

7 OJIKI CLASS (PL/PSOH)

Name	No	Builders	Launched	Commissioned
ERIMO (ex-Ojiki)	PL 02	Mitsui, Tamano	23 Apr 1991	31 Oct 1991
KUDAKA	PL 03	Hakodate Dock	10 May 1994	25 Oct 1994
YAHIKO (ex-Satsuma)	PL 04	Sumitomo, Uraga	3 June 1995	26 Oct 1995
DEJIMA (ex-Hakata)	PL 05	Ishikawajima, Tokyo	6 July 1998	26 Nov 1998
KURIKOMA (ex-Dejima)	PL 06	Mitsui, Tamano	28 June 1999	29 Oct 1999
SATAUMA	PL 07	Kawasaki, Kobe	3 June 1999	29 Oct 1999
TOSA (ex-Motobu)	PL 08	Sasebo Heavy Industries	5 June 2000	31 Oct 2000

Displacement, tons: 1,883 normal
Dimensions, feet (metres): 299.9 × 36.1 × 11.5 (91.4 × 11 × 3.5)
Main machinery: 2 Fuji 8S40B diesels; 7,000 hp(m) (5.15 MW); 2 shafts; cp props; 2 bow thrusters
Speed, knots: 18
Range, n miles: 4,400 at 15 kt
Complement: 38
Guns: 1 Oerlikon 35 mm/90. 1–20 mm JM-61B Gatling.
Radars: Navigation: JMA 1596; I-band.
Helicopters: Platform for 1 Bell 212 or Super Puma

Comment: Equipped as SAR command ships. SATCOM fitted 30 ton bollard pull. Stern dock for RIB. PL 04 name changed 28 September 1999. PL 02 name changed 1 October 2000. PL 06 name changed 4 January 2005. PL 05 changed name on 26 December 2008 and PL 08 on 29 January 2009.

KURIKOMA 5/2008*, Hachiro Nakai / 1353138

16 SHIRETOKO CLASS (PL/PSO)

Name	No	Builders	Commissioned
SHIRETOKO	PL 101	Mitsui Tamano	8 Nov 1978
WAKASA	PL 103	Kawasaki, Kobe	29 Nov 1978
KII (ex-Shimanto, ex-Yahiko)	PL 104	Mitsubishi, Shimonoseki	16 Nov 1978
SHIKINE	PL 109	Usuki	20 Sep 1979
SURUGA	PL 110	Kurashima	28 Sep 1979
NOTO	PL 115	Miho	30 Nov 1979
REBUN (ex-Iwami, ex-Kudaka, ex-Daisetsu, ex-Kurikoma)	PL 117	Hakodate	31 Jan 1980
SHIMOKITA	PL 118	Ishikawajima, Kakoki	12 Mar 1980
SUZUKA	PL 119	Kanazashi	7 Mar 1980
KUNISAKI	PL 120	Kouyo	29 Feb 1980
IWAMI (ex-Goto)	PL 122	Onomichi	29 Feb 1980
KOSHIKI	PL 123	Kasado	26 Jan 1980
KATORI	PL 125	Tohoku	21 Oct 1980
KUNIGAMI	PL 126	Kanda	17 Oct 1980
ETOMO	PL 127	Naikai	17 Mar 1982
ESAN (ex-Yonakuni, ex-Amagi, ex-Mashu)	PL 128	Shikoku	12 Mar 1982

Displacement, tons: 974 normal; 1,360 full load
 Dimensions, feet (metres): 255.8 x 31.5 x 10.5 (78 x 9.6 x 3.2)
 Main machinery: 2 Fuji 8S408; 8,120 hp(m) (5.97 MW); or 2 Niigata 8MA40 diesels; 2 shafts; cp props
 Speed, knots: 20
 Range, n miles, 4,400 at 17 kt
 Complement: 41
 Guns: 1 Bofors 40 mm or 1 Oerlikon 35 mm or 1 JM-61 20 mm Gatling (PL 101), 1 Oerlikon 20 mm (PL 101-105, 127 and 128)
 Radars: Surface search: JMA 1576; I-band
 Navigation: JMA 1596; I-band.

Comment: Average time from launch to commissioning was about four to five months. Designed for EEZ patrol duties. PL 117 changed her name on 1 April 1988, on 1 August 1994, on 1 October 2000 and on 12 December 2008. PL 122 changed named on 19 December 2008. PL 128 changed 1 April 1997, on 12 February 2005 and on 19 December 2008. PL 104 changed name on 28 September 1999 and again on 1 October 2004. PL 106 paid off on 20 October 2000 after being involved in a collision. PL 118 paid off on 12 February 2005, PL 108 and 112 on 12 March 2006 and PL 106 and 113 on 18 March 2006. PL 121 paid off on 5 February 2008, PL 124 on 27 February 2008, PL 102 and PL 111 on 12 December 2008. PL 107 paid off on 7 February 2009 and PL 114 on 29 January 2009.

KOSHIKI 5/2008, Hachiro Nakai / 1353137

3 ASO CLASS (PL/PSO)

Name	No	Builders	Laid down	Launched	Commissioned
ASO	PL 41	Mitsubishi, Shimonsaki	18 Dec 2003	28 Oct 2004	15 Mar 2005

-	PL 69	Mitsui, Tamano	-	-	Mar 2010

Displacement, tons: 1,300 standard
 Dimensions, feet (metres): 292.0 x 36.1 x 16.4 (89.0 x 11.0 x 5.0)
 Main machinery: 4 diesels; waterjet propulsion
 Speed, knots: 30
 Guns: 1 30 mm.
 Helicopters: Platform for 1 medium.

Comment: One authorised in FY05 budget, four in FY06 budget and four in FY07 budget

HATERUMA 3/2008, Hirotohi Yamamoto / 1353139

SHIPBORNE AIRCRAFT

Numbers/Type: 21/8 Bell 212/412.
 Operational speed: 103 kt (191 km/h).
 Service ceiling: 10,000 ft (3,048 m).
 Range: 412 n miles (763 km).
 Role/Weapon systems: Liaison, medium-range support and SAR. Sensors: Search radar. Weapons: Unarmed.

BELL 212 5/2008, Hachiro Nakai / 1353141

BELL 412 5/2005, Mitsuhiro Kadota / 1153338

Numbers/Type: 4 Aerospatiale AS 332L1 Super Puma.
 Operational speed: 125 kt (231 km/h).
 Service ceiling: 15,090 ft (4,600 m).
 Range: 500 n miles (926 km).
 Role/Weapon systems: Medium lift, support and SAR. Sensors: Search radar. Weapons: Unarmed.

AS 332L1 5/2008, Hachiro Nakai / 1353140

Numbers/Type: 4 Sikorsky S-76C.
 Operational speed: 135 kt (250 km/h).
 Service ceiling: 11,800 ft (3,505 m).
 Range: 607 n miles (1,125 km).
 Role/Weapon systems: Utility aircraft acquired in 1994-98. One aircraft lost on 10 January 2005. Up to 20 required to replace Bell 212s. Sensors: Search radar. Weapons: Unarmed.

S-76C 5/2007, Hachiro Nakai / 1305137

440 Japan (COAST GUARD)/Shipborne aircraft – Land-based maritime aircraft

Numbers/Type: 4 Bell 206B Jet Ranger
Operational speed: 115 kt (213 km/h).
Service ceiling: 13,500 ft (4,115 m).
Range: 368 n miles (682 km).
Role/Weapon systems: Support helicopter for reconnaissance and SAR.

Bell 206B

6/2005, Japan Coast Guard / 1154399

Numbers/Type: 2 Eurocopter EC 225
Operational speed: 149 kt (276 km/h).
Service ceiling: 13,120 ft (4,000 m).
Range: 500 n miles (926 km).
Role/Weapon systems: SAR and coastal surveillance helicopter ordered on 5 December 2005 and delivered in September 2007. To replace the AS 332 Super Puma in due course.

EC 225

9/2008*, Hachiro Nakai / 1353147

Numbers/Type: 3 AgustaWestland AW 139.
Operational speed: 167 kt (309 km/h).
Service ceiling: 19,460 ft (5,931 m).
Range: 307 n miles (568 km).
Role/Weapon systems: Medium-range support and SAR helicopter selected in late 2006 as the replacement for the Bell fleet. A total of 24 aircraft is expected.

AW 139

5/2008*, Hachiro Nakai / 1353143

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Notes: There is also a Cessna U 206G

Numbers/Type: 3/10 Beech Super King Air 200T/Super King Air 350
Operational speed: 200 kt (370 km/h).
Service ceiling: 35,000 ft (10,670 m).
Range: 1,460 n miles (2,703 km).
Role/Weapon systems: Visual reconnaissance in support of EEZ. Two are trainers. Sensors: Weather/search radar. Weapons: Unarmed.

BEECH 350

5/2005, Mitsuhiro Kadota / 1153337

Numbers/Type: 5 NAMCYS-11A
Operational speed: 230 kt (425 km/h).
Service ceiling: 21,600 ft (6,580 m).
Range: 1,960 n miles (3,629 km).
Role/Weapon systems: Maritime surveillance and associated tasks. Sensors: Weather/search radar. Weapons: Unarmed

YS-11A

5/2005, Mitsuhiro Kadota / 1153336

Numbers/Type: 2 Gulfstream Aerospace G-V
Operational speed: 510 kt (945 km/h).
Service ceiling: 41,000 ft (12,500 m).
Range: 6,500 n miles (12,040 km).
Role/Weapon systems: Reconnaissance version of long-range business jet ordered on 14 November 2001 and delivered in 2004. Sensors: Occan Master radar, FLIR, AMASCOS mission system. Can also drop liferafts.

GULFSTREAM G-V

5/2005, Hachiro Nakai / 1153311

Numbers/Type: 2 Dassault Falcon 900.
Operational speed: 428 kt (792 km/h).
Service ceiling: 51,000 ft (15,544 m).
Range: 4,170 n miles (7,722 km).
Role/Weapon systems: Maritime surveillance. Sensors: Weather/search radar. Weapons: Unarmed

FALCON 900

5/2008*, Hachiro Nakai / 1353144

Numbers/Type: 4 SAAB 340B.
Operational speed: 250 kt (463 km/h).
Service ceiling: 25,000 ft (7,620 m).
Range: 570 n miles (1,056 km).
Role/Weapon systems: Patrol aircraft procured in 1997. Two SAR variants were delivered in 2007.

SAAB 340B

10/2008*, Hachiro Nakai / 1353145

Numbers/Type: 3 Bombardier DHC-8 315.
Operational speed: 285 kt (491 km/h).
Service ceiling: 14,775 ft (4,503 m).
Range: 1,630 n miles (3,020 km).
Role/Weapon systems: Maritime surveillance variant of the Dash-8 Q300 regional airliner selected by the Japanese Coast Guard in December 2006 and delivered in 2008. Sensors: not confirmed but likely to include surveillance radar and FLIR.

MEDIUM PATROL VESSELS

14 TESHIO CLASS (PM/PSO)

Name	No	Builders	Commissioned
NATSUI (ex-Teshio)	PM 01	Shikoku	30 Sep 1980
KITAKAMI (ex-Oirose)	PM 02	Naikai	29 Aug 1980
BIHORO (ex-Echizen)	PM 03	Usuki	30 Sep 1980
TOKACHI	PM 04	Narazaki	24 Mar 1981
HITACHI	PM 05	Tohoku	19 Mar 1981

YAMAKUNI	PM 91	Usuki	26 Jan 1978
KATSURA	PM 92	Shikoku	15 Feb 1978

Displacement, tons: 615 normal; 636 full load
 Dimensions, feet (metres): 208 x 25.6 x 8.3 (63.4 x 78 x 2.5)
 Main machinery: 2 Niigata 6M31EX diesels, 3,000 hp(m) (2.21 MW); 2 shafts; cp props
 Speed, knots: 18
 Range, n miles: 3,200 at 16 kt
 Complement: 34
 Guns: 1 USN 20 mm/80 Mk 10
 Radars: Navigation: JMA 1596 and JMA 1576, I-band.

Comment: PM 85 and 87 changed names 3 April 2000, PM 93 on 1 April 2001 and PM 88 on 12 March 2006, PM 73 paid off on 30 March 2008, PM 82 on 5 February 2008, PM 93 on 30 March 2008, PM 81 on 23 January 2009 and PM 88 on 22 February 2009.

CHIKUGO 6/2007, Hachiro Nakai / 1305170

2 TAKATORI CLASS (PM/PBO)

Name	No	Builders	Commissioned
TAKATORI	PM 89	Naikai	24 Mar 1978
KUMANO	PM 94	Namura	23 Feb 1979

Displacement, tons: 634 normal
 Dimensions, feet (metres): 152.5 x 30.2 x 9.3 (46.5 x 9.2 x 2.9)
 Main machinery: 2 Niigata 6M31EX diesels; 3,000 hp(m) (2.21 MW); 2 shafts; cp props
 Speed, knots: 15. Range, n miles: 700 at 14 kt
 Complement: 34
 Radars: Navigation: JMA 1596 and JMA 1576; I-band.

Comment: SAR vessels equipped for salvage and firefighting.

TAKATORI 5/2008, Michael Nitz / 1353146

4 AMAMI CLASS (PM/PBO)

Name	No	Builders	Commissioned
AMAMI	PM 95	Hitachi, Kanagawa	28 Sep 1992
KUROKAMI (ex-Matsuura)	PM 96	Hitachi, Kanagawa	24 Nov 1995
KUNASHIRI	PM 97	Mitsubishi, Shimonoseki	26 Aug 1998
MINABE	PM 98	Mitsubishi, Shimonoseki	26 Aug 1998

Displacement, tons: 230 normal
 Dimensions, feet (metres): 183.7 x 24.6 x 6.6 (56 x 7.5 x 2)
 Main machinery: 2 Fuji 8S40B diesels; 8,120 hp(m) (5.97 MW); 2 shafts; cp props
 Speed, knots: 25
 Guns: 1 - 20 mm JM-61B Gatling
 Radars: Navigation: I-band.

Comment: First one authorised in the FY91 programme; laid down 22 October 1991. Second authorised in FY93 programme, laid down 7 October 1994. Last pair authorised in FY96 programme and both laid down 30 September 1997. Stern ramp for launching RiB. PM 96 changed name 3 April 2000. PM 95 damaged in incident with possible North Korean intelligence collection ship on 22 December 2001.

AMAMI 6/2007, Hachiro Nakai / 1305121

1 TESHIO CLASS (ICEBREAKER) (PM/AGOB)

Name	No	Builders	Commissioned
TESHIO	PM 15	Nippon Koukan, Tsurumi	19 Oct 1995

Displacement, tons: 550 normal
 Dimensions, feet (metres): 180.4 x 34.8 x 12.8 (56 x 10.6 x 3.9)
 Main machinery: 2 diesels; 3,800 hp(m) (2.65 MW); 2 shafts; bow thruster
 Speed, knots: 14.5
 Complement: 35
 Guns: 1 - 20 mm JM-61B Gatling.
 Radars: Navigation: 2 sets; I-band.

Comment: Authorised in FY93; laid down 7 October 1994, launched 20 April 1995. Has an icebreaker bow.

TESHIO 6/2002, Japan Coast Guard / 0570891

Displacement, tons: 115 full load
 Dimensions, feet (metres): 114.8 x 20.7 x 4.3 (35 x 6.3 x 1.3)
 Main machinery: 2 Pielstick 16 PA4 V 185 diesels; 5,344 hp(m) (3.93 MW) sustained; 2 shafts
 Speed, knots: 28
 Range, n miles: 500 at 20 kt
 Complement: 22
 Guns: 1 Browning 12.7 mm MG
 Radars: Navigation: 1 set, I-band.

Comment: Carry a 25-man inflatable rescue craft. The last four were ordered on 31 August 1987 and commissioned less than seven months later. PS 105 name changed on 1 October 2004. PS 101 and 102 paid off on 6 February 2009.

BIZAN 7/2006, Hechiro Nakai / 1040608

SMALL PATROL VESSELS

12 + (2) MIHASHI AND RAIZAN CLASS (PS/PBF)

Name	No	Builders	Commissioned
SHINZAN (ex-Akiyoshi, ex-Mihashi)	PS 01	Mitsubishi, Shimonoseki	9 Sep 1988
SAROMA	PS 02	Hitachi, Kanagawa	24 Nov 1989
INASA	PS 03	Mitsubishi, Shimonoseki	31 Jan 1990
KIRISHIMA	PS 04	Hitachi, Kanagawa	22 Mar 1991
KAMUI	PS 05	Mitsubishi, Shimonoseki	31 Jan 1994
RAIZAN (ex-Banna, ex-Bizan)	PS 06	Hitachi, Kanagawa	31 Jan 1994
ASHITAKI	PS 07	Mitsui, Tamano	30 Sep 1994
KARIBA (ex-Kurama)	PS 08	Mitsubishi, Shimonoseki	29 Aug 1995
ARASE	PS 09	Mitsubishi, Shimonoseki	29 Jan 1997
SANBE	PS 10	Hitachi, Kanagawa	29 Jan 1997
MIZUKI	PS 11	Mitsui, Tamano	9 June 2000
KOUYA	PS 12	Universal, Keihin	18 Mar 2004
TSUKUBA	PS 13	Mitsubishi, Shimonoseki	2009
AKAGI	PS 14	Mitsubishi, Shimonoseki	2009

Displacement, tons: 195 normal
 Dimensions, feet (metres): 141.1 x 24.6 x 5.6 (43 x 7.5 x 1.7)
 Main machinery: 2 SEMT-Pielstick 16 PA4 V 200 VGA diesels; 7,072 hp(m) (6.2 MW); 2 shafts
 1 SEMT-Pielstick 12 PA4 V 200 VGA diesel; 2,720 hp(m) (2 MW); Kamows 80 water-jet
 Speed, knots: 35. Range, n miles: 650 at 34 kt
 Complement: 34
 Guns: 1—12.7 mm MG or 1—20 mm JM 61 Gatling (being progressively fitted).
 Radars: Navigation: Furuno; I-band.

Comment: Capable of 15 kt on the water-jet alone. PS 01 name changed 28 January 1997 and again on 24 January 2001, PS 06 on 17 April 1999 and again on 1 August 2008. PS 08 on 29 March 2004. PS 11 authorised in FY98 programme and PS 12 in FY02 programme. PS 13-14 authorised in FY07 budget.

KAMUI 5/2008*, Hechiro Nakai / 1353148

6 TSURUUGI CLASS (PS/PBOF)

Name	No	Builders	Commissioned
TSURUUGI	PS 201	Hitachi, Kanagawa	15 Feb 2001
HOTAKA	PS 202	Mitsubishi, Shimonoseki	16 Mar 2001
NORIKURA	PS 203	Mitsui, Tamano	16 Mar 2001
KAIMON	PS 204	Mitsui, Tamano	21 Apr 2004
ASAMA	PS 205	Mitsui, Tamano	21 Apr 2004
HOUOU	PS 208	Mitsui, Tamano	27 Jan 2005

Displacement, tons: 220 standard
 Dimensions, feet (metres): 164.1 x 26.2 x 13.1 (50.0 x 8.0 x 4.0)
 Main machinery: 3 diesels; 3 waterjets
 Speed, knots: 35
 Guns: 1—20 mm JM-61 RFS Gatling.

Comment: First three authorised in FY99 budget, fourth and fifth in FY02 budget and sixth in FY03 budget.

ASAMA 5/2007, Hechiro Nakai / 1355123

2 TAKATSUKI CLASS (PS/PBF)

Name	No	Builders	Commissioned
TAKATSUKI	PS 108	Mitsubishi, Shimonoseki	23 Mar 1992
NOBARU	PS 109	Hitachi, Kanagawa	22 Mar 1993

Displacement, tons: 115 normal; 180 full load
 Dimensions, feet (metres): 114.8 x 22 x 4.3 (35 x 6.7 x 1.3)
 Main machinery: 2 MTU 16V 396TB94 diesels; 5,200 hp(m) (3.82 MW); 2 Kamowa 71 water-jets
 Speed, knots: 35
 Complement: 13
 Guns: 1—12.7 mm MG
 Radars: Navigation: I-band.

Comment: First authorised in the FY91 programme, second in FY92. Aluminium hulls.

COASTAL PATROL CRAFT

4 YODO CLASS (PC/YTR)

Name	No	Builders	Launched	Commissioned
YODO	PC 51	Sumidagawa	2 Oct 2001	29 Mar 2002
KOTOBIKI	PC 52	Sumidagawa	23 Oct 2002	27 Mar 2003
NACHI	PC 53	Ishihara	29 Jan 2003	27 Mar 2003
NUNOBIKI	PC 54	Sumidagawa	4 Dec 2002	27 Mar 2003

Displacement, tons: 125 standard
 Dimensions, feet (metres): 121.4 × 22.0 × 11.2 (37.0 × 6.7 × 3.4)
 Main machinery: 2 diesels; 2 waterjets
 Speed, knots: 25

Comment: The first authorised in FY00 budget, three more in FY01 budget. Also equipped for firefighting and replaced firefighting vessel of the same name.

YODO 5/2008, Hechiro Nakai / 1353149

13 MURAKUMO CLASS (PC/PB)

Name	No	Builders	Commissioned
KITAGUMO	PC 202	Hitachi, Kanagawa	17 Mar 1978
YUKIGUMO	PC 203	Hitachi, Kanagawa	27 Sep 1978
KAWAGIRI	PC 210	Hitachi, Kanagawa	27 July 1979

AKIGUMO	PC 110	Sumidagawa	10 Mar 2008
TATSUGUMO	PC 111	Sumidagawa	Mar 2009
IKIGUMO	PC 112	Sumidagawa	Mar 2009
NATSUZUKI	PC 113	Sumidagawa	Mar 2009
-	PC 114	Sumidagawa	July 2009
-	PC 115	Sumidagawa	July 2009
-	PC 116	Sumidagawa	July 2009

Displacement, tons: 100 standard
 Dimensions, feet (metres): 105.0 × 21.3 × 10.8 (32.0 × 6.5 × 3.3)
 Main machinery: 2 diesels; 5,200 hp(m) (3.82 MW); 2 waterjets
 Speed, knots: 36
 Complement: 10
 Guns: 1—12.7 mm MG.

Comment: Larger version of Asogiri class with waterjet propulsion and higher top speed. PC 105 changed name on 22 February 2001 and again on 18 March 2006. PC 106 authorised in FY01 budget and PC 107 in FY01 extra budget. PC 108-110 authorised in FY06 budget and PC 111-116 in FY07 budget.

HAYAGUMO 7/2008, Hechiro Nakai / 1353151

9 AKIZUKI CLASS (PC/SAR)

Name	No	Builders	Commissioned
URAYUKI	PC 72	Mitsubishi, Shimonoseki	31 May 1975
HATAGUMO	PC 75	Mitsubishi, Shimonoseki	21 Feb 1976
MAKIGUMO	PC 76	Mitsubishi, Shimonoseki	19 Mar 1976
HAMAZUKI	PC 77	Mitsubishi, Shimonoseki	29 Nov 1976
ISOZUKI	PC 78	Mitsubishi, Shimonoseki	18 Mar 1977
SHIMANAMI	PC 79	Mitsubishi, Shimonoseki	23 Dec 1977
YUZUKI	PC 80	Mitsubishi, Shimonoseki	22 Mar 1979
TAMANAMI (ex-Hamayuki)	PC 81	Mitsubishi, Shimonoseki	27 Mar 1981
AWAGIRI	PC 82	Mitsubishi, Shimonoseki	24 Mar 1983

Displacement, tons: 77 normal
 Dimensions, feet (metres): 85.3 × 20.7 × 6.9 (26 × 6.3 × 2.1)
 Main machinery: 3 Mitsubishi 12DM20MTK diesels; 3,000 hp(m) (2.21 MW); 3 shafts
 Speed, knots: 22. Range, n miles: 220 at 21.5 kt
 Complement: 10
 Radars: Navigation: FRA 10 Mk 2; I-band.

Comment: Aluminium hulls. Used mostly for SAR. Being paid off

AWAGIRI 9/2008, Hechiro Nakai / 1353152

1 MATSUNAMI CLASS (PC/PB)

Name	No	Builders	Commissioned
MATSUNAMI	PC 01	Mitsubishi, Shimonoseki	22 Feb 1995

Displacement, tons: 165 normal
 Dimensions, feet (metres): 114.8 × 26.2 × 10.8 (35 × 8 × 3.3)
 Main machinery: 2 diesels; 5,200 hp(m) (3.82 MW); 2 water-jets
 Speed, knots: 25
 Complement: 30
 Radars: Navigation: I-band.

Comment: Has replaced old craft of the same name. Laid down 10 May 1994. Used for patrol and for VIPs.

MATSUNAMI 5/2007, Hechiro Nakai / 1305178

3 SHIMAGIRI CLASS (PC/PB)

Name	No	Builders	Commissioned
SHIMAGIRI	PC 83	Hitachi, Kanagawa	7 Feb 1985
OKINAMI (ex-Setagiri)	PC 84	Hitachi, Kanagawa	22 Mar 1985
HAYAGIRI	PC 85	Mitsubishi, Shimonoseki	22 Feb 1985

Displacement, tons: 51 normal
 Dimensions, feet (metres): 75.5 x 17.4 x 6.2 (23 x 5.3 x 1.9)
 Main machinery: 2 Ikegai 12V 175 RTC diesels; 3,000 hp(m) (2.21 MW); 2 shafts
 Speed, knots: 30
 Complement: 10
 Guns: 1—12.7 mm MG (not in all).
 Radars: Navigation, FRA 10 Mk 2; I-band.

Comment: Aluminium hulls. PC 84 name changed 1 October 2000

HAYAGIRI 4/2003, Bob Flides / 0570885

1 SHIKINAMI CLASS (PC/PB)

Name	No	Builders	Commissioned
ASOYUKI	PC 74	Hitachi, Kanagawa	16 June 1975

Displacement, tons: 46 normal
 Dimensions, feet (metres): 69 x 17.4 x 3.3 (21 x 5.3 x 1)
 Main machinery: 2 MTU MB 12V 493 TY7 diesels; 2,200 hp(m) (1.62 MW) sustained, 2 shafts
 Speed, knots: 26
 Range, n miles: 230 at 23.8 kt
 Complement: 10
 Radars: Navigation: MD 806, I-band.

Comment: Built completely of light alloy. PC 69 paid off 8 December 1999 and PC 70 on 19 October 2000.

ASOYUKI 9/2008*, Hirotohi Yamamoto / 1353153

2 NATSUGIRI CLASS (PC/PB)

Name	No	Builders	Commissioned
NATSUGIRI	PC 86	Sumidagawa	29 Jan 1990
SUGANAMI	PC 87	Sumidagawa	29 Jan 1990

Displacement, tons: 68 normal
 Dimensions, feet (metres): 88.6 x 18.4 x 3.9 (27 x 5.8 x 1.2)
 Main machinery: 2 diesels; 3,000 hp(m) (2.21 MW); 2 shafts
 Speed, knots: 27
 Complement: 10
 Radars: Navigation: I-band.

Comment: Built under FY88 programme. Steel hulls.

SUGANAMI 5/2008*, Hachiro Nakai / 1353154

15 HAYANAMI CLASS (PC/PB/YTR)

Name	No	Builders	Commissioned
HAYANAMI	PC 11	Sumidagawa	25 Mar 1993
SETOGIRI (ex-Shikinami)	PC 12	Sumidagawa	24 Mar 1994
MIZUNAMI	PC 13	Ishihara	24 Mar 1994
IYONAMI	PC 14	Sumidagawa	30 June 1994
KURINAMI	PC 15	Sumidagawa	30 Jan 1995
HAMANAMI	PC 16	Sumidagawa	28 Mar 1996
SHINONOME	PC 17	Ishihara	29 Feb 1996
HARUNAMI	PC 18	Ishihara	28 Mar 1996
KIYOZUKI	PC 19	Sumidagawa	23 Feb 1998
AYANAMI	PC 20	Yokohama Yacht	28 Mar 1996
TOKINAMI	PC 21	Yokohama Yacht	28 Mar 1996

AWANAMI	PC 23	Sumidagawa	27 Aug 1999
URANAMI	PC 24	Sumidagawa	24 Jan 2000
SHIKINAMI	PC 25	Ishihara	24 Oct 2000

Displacement, tons: 110 normal, 190 full load
 Dimensions, feet (metres): 114.8 x 20.7 x 7.5 (35 x 6.3 x 2.3)
 Main machinery: 2 diesels; 4,000 hp(m) (2.94 MW); 2 shafts
 Speed, knots: 25
 Complement: 13
 Guns: 1—12.7 mm MG.
 Radars: Navigation: I-band

Comment: One more authorised in FY99 budget. From PC 22 onwards these craft are equipped for firefighting. PC 12 changed name 1 October 2000

AWANAMI 5/2008*, Hachiro Nakai / 1353155

206 + 8 COASTAL PATROL AND RESCUE CRAFT (CL/PB)

CL 01-09	CL 233	CL 244-249	CL 256-257	CL 264
CL 11-158	CL 238-239	CL 251	CL 259	GS 01-02
CL 214	CL 241-242	CL 253-254	CL 261	SS 51-77

Comment: Some have firefighting capability. Built by Shigi, Ishihara, Sumidagawa, Yokohama Yacht Co and Yamaha. For coastal patrol and rescue duties. Built of high tensile steel. Fourteen CL 11 class authorised in FY01 budget, eight in FY05 extra budget, eight in FY06 extra budget and eight in FY07 extra budget. CL 05-09 (ex-LS 231-235) were converted in 2008.

CL 138 5/2008*, Hachiro Nakai / 1353156

SS 59 5/2008*, Hachiro Nakai / 1353157

4 ASOGIRI CLASS (PC/PB)

Name	No	Builders	Commissioned
ASOGIRI	PC 101	Yokohama Yacht	19 Dec 1994
MUROZUKI	PC 102	Ishihara	27 July 1995
WAKAGUMO	PC 103	Ishihara	17 July 1996
KAGAYUKI (ex-Naozuki)	PC 104	Sumidagawa	23 Jan 1997

Displacement, tons: 88 normal
 Dimensions, feet (metres): 108.3 x 20.7 x 4.6 (33 x 6.3 x 1.4)
 Main machinery: 2 diesels; 5,200 hp(m) (3.82 MW); 2 shafts
 Speed, knots: 30
 Complement: 10
 Guns: 1—12.7 mm MG

Comment: First pair authorised in FY93 programme, third and fourth in FY95 PC 104 changed names on 1 April 2006.

MUROZUKI 8/2001, Hachiro Nakai / 0130250

KAIRYU 8/2008, Hachiro Nakai / 1353158

4 NUNOBIKI CLASS (FM/YTR)

Name	No	Builders	Commissioned
SHIRAITO	FM 04	Yokohama Yacht Co	25 Feb 1975
MINOO	FM 08	Sumidagawa	27 Jan 1978
RYUSEI	FM 09	Yokohama Yacht Co	24 Mar 1980
KIYOTAKI	FM 10	Sumidagawa	25 Mar 1981

Displacement, tons: 89 normal
 Dimensions, feet (metres): 75.4 x 19.7 x 5.2 (23 x 6 x 1.6)
 Main machinery: 1 MTU MB 12V 493 TY7 diesel; 1,100 hp(m) (810 kW) sustained; 1 shaft
 2 Nissan diesels, 500 hp(m) (615 kW); 3 shafts
 Speed, knots: 14
 Range, n miles: 180 at 13.5 kt
 Complement: 12
 Radars: Navigation: FRA 10; I-band.

Comment: Equipped for chemical firefighting. FM 01 paid off 31 October 2000 and FM 02 in 2002. FM 05, FM 06 and FM 07 paid off on 11 March 2003

KIYOTAKI 10/2003, Hachiro Nakai / 0570706

FIREFIGHTING VESSELS AND CRAFT**1 MODIFIED HIRYU CLASS (FL/YTR)**

Name	No	Builders	Launched	Commissioned
HIRYU	FL 01	NKK, Tsurumi	5 Sep 1997	24 Dec 1997

Displacement, tons: 280 normal
 Dimensions, feet (metres): 114.8 x 40 x 8.9 (35 x 12.2 x 2.7)
 Main machinery: 2 diesels, 4,000 hp(m) (2.94 MW); 2 shafts
 Speed, knots: 14
 Complement: 15

Comment: Authorised in FY96 programme. Catamaran design. Replaced ship of the same name and pennant number.

HIRYU 5/2007, Hachiro Nakai / 1305130

4 HIRYU CLASS (FL/YTR)

Name	No	Builders	Commissioned
SHORYU	FL 02	Nippon Kokan, Tsurumi	4 Mar 1970
NANRYU	FL 03	Nippon Kokan, Tsurumi	4 Mar 1971
KAIRYU	FL 04	Nippon Kokan, Tsurumi	18 Mar 1977
SUIRYU	FL 05	Yokohama Yacht Co	24 Mar 1978

Displacement, tons: 215 normal
 Dimensions, feet (metres): 90.2 x 34.1 x 7.2 (27.5 x 10.4 x 2.2)
 Main machinery: 2 (kegai) MTU MB 12V 493 TY7 diesels; 2,200 hp(m) (1.62 MW) sustained; 2 shafts
 Speed, knots: 13.2
 Range, n miles: 300 at 13 kt
 Complement: 14

Comment: Catamaran type fire boats designed and built for firefighting services to large tankers.

SURVEY SHIPS**1 SHOYO CLASS (AGS)**

Name	No	Builders	Launched	Commissioned
SHOYO	HL 01	Mitsui, Tamano	23 June 1997	20 Mar 1998

Displacement, tons: 3,000 normal
 Dimensions, feet (metres): 321.5 x 49.9 x 11.8 (98 x 15.2 x 3.6)
 Main machinery: Diesel-electric; 2 diesels; 8,100 hp(m) (5.95 MW); 2 motors; 5,712 hp(m) (4.2 MW); 2 shafts; cp props
 Speed, knots: 17
 Complement: 60

Comment: Authorised in FY95 programme. Laid down 4 October 1996. Has replaced former Shoyo.

SHOYO 5/2008, Hachiro Nakai / 1353159

1 TENYO CLASS (AGS)

Name	No	Builders	Commissioned
TENYO	HL 04	Sumitomo, Oppama	27 Nov 1986

Displacement, tons: 770 normal
 Dimensions, feet (metres): 183.7 × 32.2 × 9.5 (56 × 9.8 × 2.9)
 Main machinery: 2 Akasaka diesels; 1,300 hp(m) (955 kW); 2 shafts
 Speed, knots: 13
 Range, n miles: 5,400 at 12 kt
 Complement: 43 (18 officers)
 Radars: Navigation: 2 JMA 1596, I-band

Comment: Laid down 11 April 1986, launched 5 August 1986 Based at Tokyo.

TENYO 6/2006, Okano Takatoshi / 1040613

1 TAKUYO CLASS (AGS)

Name	No	Builders	Commissioned
TAKUYO	HL 02	Nippon Kokan, Tsurumi	31 Aug 1983

Displacement, tons: 3,000 normal
 Dimensions, feet (metres): 314.9 × 46.6 × 15.1 (96 × 14.2 × 4.6)
 Main machinery: 2 Fuji 6S40B diesels, 6,090 hp(m) (4.47 MW); 2 shafts; cp props
 Speed, knots: 17
 Range, n miles: 12,000 at 16 kt
 Complement: 60 (24 officers)
 Radars: Navigation: 2 sets; I-band.

Comment: Laid down on 14 April 1982, launched on 24 March 1983 Based at Tokyo. Side scan sonar fitted. Two survey launches

TAKUYO 5/2008, Hachiro Nakai / 1353160

2 MEIYO CLASS (AGS)

Name	No	Builders	Commissioned
MEIYO	HL 03	Kawasaki, Kobe	24 Oct 1990
KAIYO	HL 05	Mitsubishi, Shimonoseki	7 Oct 1983

Displacement, tons: 550 normal
 Dimensions, feet (metres): 196.9 × 34.4 × 10.2 (60 × 10.5 × 3.1)
 Main machinery: 2 Daihatsu 6 DLM-24 diesels; 3,000 hp(m) (2.2 MW); 2 shafts; bow thruster
 Speed, knots: 15
 Range, n miles: 5,280 at 11 kt
 Complement: 25 + 13 scientists
 Radars: Navigation: 2 sets; I-band

Comment: *Meiyo* laid down 24 July 1989 and launched 29 June 1990; *Kaiyo* laid down 7 July 1992 and launched 26 April 1993. Have anti-roll tanks and resiliently mounted main machinery. Has a 12 kHz bottom contour sonar. A large survey launch is carried on the port side.

KAIYO 6/2007, Hachiro Nakai / 1305061

7 HAMASHIO CLASS (YGS)

Name	No	Builders	Commissioned
HAMASHIO	HS 21	Yokohama Yacht	25 Mar 1991
ISOSHI	HS 22	Yokohama Yacht	25 Mar 1993
UZUSHIO	HS 23	Yokohama Yacht	22 Dec 1995
OKISHIO	HS 24	Ishihara	4 Mar 1999
ISESHIO	HS 25	Ishihara	10 Mar 1999
HAYASHIO	HS 26	Ishihara	10 Mar 1999
KURUSHIMA	HS 27	Nissui Marine	26 Mar 2003

Displacement, tons: 42 normal
 Dimensions, feet (metres): 66.6 × 14.8 × 3.9 (20.3 × 4.5 × 1.2)
 Main machinery: 3 diesels; 1,015 hp(m) (746 kW); 3 shafts
 Speed, knots: 15
 Complement: 10
 Radars: Navigation: I-band.

Comment: Survey launches. HS 27 authorised in FY01 extra budget.

HAMASHIO 5/2008, Hachiro Nakai / 1353161

AIDS TO NAVIGATION SERVICE

1 SUPPLY SHIP (AKSL)

Name	No	Builders	Commissioned
TSUSHIMA	LL 01	Mitsui, Tamano	9 Sep 1977

Displacement, tons: 1,950 normal
 Dimensions, feet (metres): 246 × 41 × 13.8 (75 × 12.5 × 4.2)
 Main machinery: 1 Fuji-Sulzer 8S40C diesel; 4,200 hp(m) (3.09 MW); 1 shaft; cp prop; bow thruster
 Speed, knots: 15.5
 Range, n miles: 10,000 at 15 kt
 Complement: 54

Comment: Lighthouse Supply Ship launched 7 April 1977. Fitted with tank stabilisers. Equipped with modern electronic instruments for carrying out research on electronic aids to navigation.

TSUSHIMA 5/2008, Hachiro Nakai / 1353162

2 HOKUTO CLASS (ABU)

Name	No	Builders	Commissioned
HOKUTO	LL 11	Sasebo	29 June 1979
GINGA	LL 13	Kawasaki, Kobe	18 Mar 1980

Displacement, tons: 700 normal
 Dimensions, feet (metres): 180.4 × 34.8 × 8.7 (55 × 10.6 × 2.7)
 Main machinery: 2 Asakasa MH23R diesels; 1,030 hp(m) (757 kW); 2 shafts
 Speed, knots: 12
 Range, n miles: 3,900 at 12 kt
 Complement: 31 (9 officers)

Comment: Used as buoy tenders. LL 12 paid off on 31 March 2008

HOKUTO 5/2004, Hachiro Nakai / 1044459

1 SUPPLY SHIP (AKSL)

Name	No	Builders	Commissioned
ZUIUN	LM 101	Usuki	27 July 1983

Displacement, tons: 370 normal
 Dimensions, feet (metres): 146.3 × 24.6 × 7.2 (44.6 × 7.5 × 2.2)
 Main machinery: 2 Mitsubishi-Asakasa MH23R diesels; 1,030 hp(m) (757 kW); 2 shafts
 Speed, knots: 13.5
 Range, n miles: 1,000 at 13 kt
 Complement: 20

Comment: Classed as a medium tender and used to service lighthouses. Can carry 85 tons of stores.

ZUIUN 6/2003, Japan Coast Guard / 0570701

7 SUPPLY CRAFT (AKSL)

Name	No	Builders	Commissioned
SEIUN	LM 202	Sumidagawa	22 Feb 1989
SEKIUN	LM 203	Ishihara	12 Mar 1991
HOUJUN	LM 204	Ishihara	22 Feb 1991
REIUN	LM 205	Ishihara	28 Feb 1992
GENUN	LM 206	Wakamatsu	19 Mar 1996
AYABANE	LM 207	Ishihara	9 Mar 2000
KOUN	LM 208	Sumidagawa	16 Mar 2001

Displacement, tons: 58 full load
 Dimensions, feet (metres): 75.5 × 19.7 × 3.3 (23 × 6 × 1)
 Main machinery: 2 GM 12V-71TA diesels; 840 hp (627 kW) sustained; 2 shafts
 Speed, knots: 14
 Range, n miles: 250 at 14 kt
 Complement: 9
 Radars: Navigation. FRA 10 Mk III; I-band

Comment: LM 114 decommissioned on 31 March 2006 and LM 201 on 31 March 2007.

KOUN 5/2008, Hachiro Nakai / 1353163

13 SMALL TENDERS (YAG)

LS 168–170 LS 194–195 LS 201 LS 216–223

Displacement, tons: 27 full load
 Dimensions, feet (metres): 65 × 14.7 × 7.5 (20 × 4.5 × 2.3)
 Main machinery: 2 diesels; 1,820 hp(m) (1.34 MW); 2 shafts
 Speed, knots: 25
 Complement: 8

Comment: Details given are for LS 231-233. Others with varying characteristics. LS 161, LS 164-167 and LS 212 decommissioned on 31 March 2006, LS 189 on 8 December 2006, LS 188-193, LS 213-215 converted to coastal patrol craft on 31 March 2007

LS 232 7/2006, Hachiro Nakai / 1040611

ENVIRONMENT MONITORING CRAFT**3 SERVICE CRAFT (YPC)**

Name	No	Builders	Commissioned
KINUGASA	MS 01	Ishihara, Takasago	31 Jan 1992
SAIKAI	MS 02	Ishihara, Takasago	4 Feb 1994
KATSUREN	MS 03	Sumidagawa	18 Dec 1997

Displacement, tons: 39 normal
 Dimensions, feet (metres): 59.1 × 29.5 × 4.3 (18 × 9 × 1.3)
 Main machinery: 2 diesels; 1,000 hp(m) (735 kW); 2 shafts
 Speed, knots: 15
 Complement: 8

Comment: Details given are for Kinugasa which has a catamaran hull. Saikai and Katsuren are monohulls of 26 tons. Used for monitoring pollution.

KINUGASA 10/2007, Mick Prendergast / 1305060

SAIKAI 8/2006, Hachiro Nakai / 1040583

Jordan**Country Overview**

The Hashemite Kingdom of Jordan is situated in the Middle East. With an area of 34,492 square miles, it has borders to the north with Syria, to the east with Iraq, to the west with Israel and the West Bank and to the east and south with Saudi Arabia. It has a 14 n mile coastline with the Gulf of Aqaba (in the northern Red Sea) on which Aqaba, the only seaport, is situated. Amman is the capital and largest city. Territorial seas (3 n miles) are claimed but an Exclusive Economic Zone (EEZ) is not claimed

Headquarters Appointments

Commander Naval Forces:
Major General Dar Al Zaben
Deputy Commander:
Colonel Abdelkareem Fdoul

Organisation

The Royal Jordanian Naval Force comes under the Director of Operations at General Headquarters.

Bases

Aqaba

Personnel

- (a) 2009: 500 officers and men
 (b) Voluntary service

PATROL FORCES

Notes: In addition to the craft listed, there are also four 17 ft launches and four 14 ft GRP boats used by the Underwater Swimmer unit.

3 AL HUSSEIN (HAWK) CLASS (FAST ATTACK CRAFT—GUN) (PB)

AL HUSSEIN 101 AL HASSAN 102 KING ABDULLAH 103

Displacement, tons: 124 full load
Dimensions, feet (metres): 100 × 22.5 × 4.9 (30.5 × 6.9 × 1.5)
Main machinery: 2 MTU 16V 396TB94 diesels; 5,800 hp(m) (4.26 MW) sustained; 2 shafts
Speed, knots: 32
Range, n miles: 750 at 15 kt; 1,500 at 11 kt
Complement: 16 (3 officers)
Guns: 1 Oerlikon GCM-A03 30 mm, 1 Oerlikon GAM B01 20 mm, 2—12.5 mm MGs.
Countermeasures: Decoys, 2 Wallop Stockade chaff launchers.
Combat data systems: Racal Cane 100
Weapons control: Radamec Series 2000 optronic director for 30 mm gun.
Radars: Surface search: Kelvin Hughes 1007, I-band

Comment: Ordered from Vosper Thornycroft in December 1987 GRP structure. First one on trials in May 1989 and completed December 1989. Second completed in March 1990 and the third in early 1991. All transported to Aqaba in September 1991.

AL HUSSEIN

4/2006, M Declerck / 1164802

4 FAYSAL CLASS (INSHORE PATROL CRAFT) (PB)

FAYSAL HUSSEIN (ex-Han) HASSAN (ex-Hasayu) MUHAMMED

Displacement, tons: 8 full load
Dimensions, feet (metres): 38 × 13.1 × 1.6 (11.6 × 4 × 0.5)
Main machinery: 2 BM 8V715 diesels; 600 hp (441 kW); 2 shafts
Speed, knots: 22
Range, n miles: 240 at 20 kt
Complement: 8
Guns: 1—12.7 mm MG, 1—762 mm MG.
Radars: Surface search: Decca, I-band.

Comment: Acquired from Bertram, Miami in 1974. GRP construction. Still operational and no replacements are planned yet.

MUHAMMED

3/2004, Bob Fildes / 0587768

2 HASHIM (ROTORK) CLASS (PB)

HASHIM FAISAL

Displacement, tons: 9 full load
Dimensions, feet (metres): 41.7 × 10.5 × 3 (12.7 × 3.2 × 0.9)
Main machinery: 2 Deutz diesels; 240 hp (179 kW); 2 shafts
Speed, knots: 28
Complement: 5
Military lift: 30 troops
Guns: 1—12.7 mm MG, 1—762 mm MG.
Radars: Surface search: Furuno, I-band

Comment: Delivered in late 1990 for patrolling the Dead Sea. Due to the annual decrease of water depth, the original three craft were moved to Aqaba in 2000. Hamza scrapped in 2006

HASHIM CLASS

3/2004, Bob Fildes / 0587769

4 ABDULLAH (DAUNTLESS) CLASS (PATROL CRAFT) (PB)

68171-68174

Displacement, tons: 14.5 full load
Dimensions, feet (metres): 43.3 × 13.8 × 4.4 (13.2 × 4.2 × 1.35)
Main machinery: 2 Cummins QSM-11 diesels; 1,160 hp (865 kW); 2 shafts
Speed, knots: 35
Complement: 4
Guns: 2—12.5 mm MGs, 2—762 mm MGs
Radars: Navigation: Raymarine RL70C; I-band

Comment: Sea Ark Dauntless design acquired in 2006.

ABDULLAH 68174

4/2006, M Declerck / 1164801

4 FAISAL (COMMANDER) CLASS (PATROL CRAFT) (PB)

FAISAL 1-4

Displacement, tons: 3.4 full load
Dimensions, feet (metres): 26.6 × 10.2 × 1.5 (8.1 × 3.1 × 0.45)
Main machinery: 2 Evinrude outboard motors; 500 hp (375 kW)
Speed, knots: 46
Complement: 3
Guns: 2—12.5 mm MGs
Radars: Navigation: Raymarine RL70C; I-band

Comment: Sea Ark Commander design acquired in 2006

FAISAL CLASS

6/2006, Jordanian Navy / 1164800

Kazakhstan

Country Overview

Formerly part of the USSR, the Republic of Kazakhstan declared its independence in 1991. Situated in Central Asia, it has an area of 1,049,155 square miles and is bordered to the north and west with Russia, to the east with China and to the south with Kyrgyzstan, Uzbekistan, and Turkmenistan. It has a 755 n mile coastline with the Caspian Sea on which Aktau, the principal port, is situated. Astana became the capital city in 1995 while Almaty, the former capital, is

the largest city. Maritime claims in the Caspian Sea are not clear. The naval Flotilla was inaugurated by President Nazarbayev in June 1998. The plan was to absorb about 30 per cent of the former USSR Caspian Flotilla, but many of these craft are derelict.

Headquarters Appointments

Commander, Navy:
 Rear Admiral Ratmir Komratov

Bases

Aktau (Caspian) (HQ)
 Aralsk (Aral Sea), Bautino (Caspian)

Personnel

2009: 3,000

PATROL FORCES

Notes: (1) Plans to expand the Navy were announced by the commander of the navy in July 2003. This was re-affirmed by the Kazakh Ministry of Defence in March 2007 and a Directorate for naval forces was established in January 2008

(2) There is also an ex-trawler *Tyulen II* of 39 m with a single diesel of 578 hp(m) (425 kW) capable of 10 kt. Acquired in 1997

(3) Six Customs cutters acquired from the UAE in 1998. At least one sunk in transit.

(4) Five Guardian class Boston Whalers delivered in November 1995 are reported operational.

(5) Plans to transfer three Yevgenya class from Russia appear to have been abandoned

(6) Three 14 m Sunkar-M class patrol craft were reported in service in 2006. They are capable of 40 kt

(7) There is an undisclosed number of SAFE Boats Archangel class 13 m response craft.

2 TURK (AB 25) CLASS (PB)

Name	No	Builders	Commissioned
– (ex-AB 32)	– (ex-P 132)	Haliç Shipyard	6 June 1969
– (ex-AB 26)	– (ex-P 126)	Haliç Shipyard	6 Feb 1970

Displacement, tons: 170 full load
Dimensions, feet (metres): 132 × 21 × 5.5 (40.2 × 6.4 × 1.7)
Main machinery: 4 SACM-AGO V16 CSHR diesels; 9,600 hp(m) (706 MW); 2 cruise diesels, 300 hp(m) (220 kW); 2 shafts
Speed, knots: 22
Complement: 31
Guns: 1 Bofors 40 mm/70, 1 Oerlikon 20 mm.
Radars: Surface search: Racal Decca; I-band.

Comment: Presented by the Turkish Navy on 3 July 1999 (AB 32) and 25 July 2001 (AB 26) at Geljuk. May have retained active sonar and ASW rocket launcher but this is unlikely.

TURK CLASS (Turkish colours) 10/2000, *Selim San* / 0106636

4 KW 15 (TYPE 369) CLASS (PB)

ALMATY (ex-KW 15) 2013 (ex-201)	ATYRAU (ex-KW 17) 2033 (ex-203)
AKTAU (ex-KW 16) 2023 (ex-202)	SCHAMBYL (ex-KW 20) 2043 (ex-204)

Displacement, tons: 70 full load
Dimensions, feet (metres): 93.5 × 15.4 × 4.9 (28.9 × 4.7 × 1.5)
Main machinery: 2 Mercedes Benz diesels; 2,000 hp(m) (1.47 MW); 2 shafts
Speed, knots: 26
Complement: 17
Guns: 2 – 20 mm can be fitted
Radars: Surface search: Kelvin Hughes 14/9; I-band.

Comment: Transferred from Germany at Wilhelmshaven on 23 August 1996. Built in Germany 1952–53 and paid off in 1994, having been used for river patrols and later as range safety craft. Disarmed on transfer. Reported as being non-operational.

ALMATY (old number) 8/1996, *Michael Nitz* / 0080219

1 ZHUK (PROJECT 1400) CLASS (PB)

BERKUT

Displacement, tons: 39 full load
Dimensions, feet (metres): 78.7 × 16.4 × 3.9 (24 × 5 × 1.2)
Main machinery: 2 Type M401B diesels; 2,200 hp(m) (1.6 MW) sustained; 2 shafts
Speed, knots: 30. Range, n miles: 1,100 at 15 kt
Complement: 11
Guns: 2 – 14.5 mm (twin); 1 – 12.7 mm MG
Radars: Surface search: Spin Trough; I-band

Comment: Built at the Zenith Shipyard, Uralsk, and commissioned 15 July 1998. Reports of a second craft have not been confirmed.

ZHUK (Russian colours) 11/1996, *MoD Bonn* / 0019041

1 DAUNTLESS CLASS (PB)

ABAY

Displacement, tons: 11 full load
Dimensions, feet (metres): 42 × 14 × 4.3 (12.8 × 4.3 × 1.3)
Main machinery: 2 Detroit 8V-92TA diesels; 1,270 hp (935 kW); 2 shafts
Speed, knots: 35
Range, n miles: 600 at 18 kt
Complement: 5
Guns: 1 – 12.7 mm MG. 2 – 7.62 mm MGs.
Radars: Surface search; Furuno; I-band.

Comment: Ordered under US funding in November 1995. Built by SeaArk, Monticello. Used to interdict the smuggling of nuclear materials across the Caspian Sea.

DAUNTLESS CLASS 7/1996, *SeaArk Marine* / 0080220

2 SAYGAK (PROJECT 1408) CLASS (PB)

Displacement, tons: 13 full load
Dimensions, feet (metres): 46.3 × 11.5 × 3 (14.1 × 3.5 × 0.9)
Main machinery: 1 diesel; 980 hp(m) (720 kW); 1 water-jet
Speed, knots: 35
Range, n miles: 135 at 35 kt
Complement: 6
Guns: 2 – 7.62 mm MGs
Radars: Surface search; I-band.

Comment: Russian-built small craft primarily found on the Amur river. Built in 1995 and acquired in early 1996

SAYGAK (Russian colours) 7/1996, *Hartmut Ehlers* / 0052520

Kenya

Country Overview

A former British colony, The Republic of Kenya gained independence in 1963. Located astride the Equator, the country has an area of 224,082 square miles and has borders to the north with Somalia and Ethiopia and to the south with Tanzania. It has a 292 n mile coastline with the Indian Ocean. The country includes almost all of Lake Turkana (Lake Rudolf) and a small portion of Lake Victoria. The capital and largest city is Nairobi and the main seaport is Mombasa. Kisumu is a port on Lake Victoria. Perhaps the first proponent of the Exclusive Economic Zone (EEZ) concept, Kenya claims a 200 n mile EEZ whose limits have been partly defined. Territorial seas (12 n miles) are claimed

Headquarters Appointments

Commander, Navy:
Major General Samson J Mwachethe

Personnel

- (a) 2009: 1,370 plus 120 marines
 (b) Voluntary service

Bases

Mombasa (Mtongwe port), Manda, Maiindi, Lamu, Kisumu (Lake Victoria)

Coast Defence

There are nine Masura coastal radar stations spread along the coast. Each station has 30 ft fast boats to investigate contacts.

Customs/Police

There are some 14 Customs and Police patrol craft of between 12 and 14 m. Mostly built by Cheverton, Performance Workboats and Fassmer in the 1980s. One Cheverton 18 m craft acquired in early 1997

PATROL FORCES

Notes: There are also five Spanish built inshore patrol craft of 16 m armed with 12.7 mm MGs and driven by twin 538 hp diesels for a speed of 16 kt. Acquired in 1995, they have pennant numbers P 943-947.

2 NYAYO CLASS (FAST ATTACK CRAFT—MISSILE) (PGGF)

Name	No	Builders	Launched	Commissioned
NYAYO	P 3128	Vosper Thornycroft	20 Aug 1986	23 July 1987
UMOJA	P 3127	Vosper Thornycroft	5 Mar 1987	16 Sep 1987

Displacement, tons: 310 light; 430 full load
Dimensions, feet (metres): 186 × 26.9 × 7.9 (56.7 × 8.2 × 2.4)
Main machinery: 4 Paxman Valenta 18CM diesels; 15,000 hp (11.19 MW) sustained; 4 shafts; 2 motors (slow speed patrol); 100 hp (74.6 kW)
Speed, knots: 40
Range, n miles: 2,000 at 18 kt
Complement: 40

Missiles: SSM: 4 OTO Melara/Matra Otomat Mk 2 (2 twin), active radar homing to 160 km (86.4 n miles) at 0.9 Mach; warhead 210 kg; sea-skimmer for last 4 km (2.2 n miles).
Guns: 1 OTO Melara 3 in (76 mm)/62, 85 rds/min to 16 km (8.7 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg.
 2 Oerlikon/BMARC 30 mm GCM-A02 (twin); 650 rds/min to 10 km (5.4 n miles) anti-surface; 3 km (1.6 n miles) anti-aircraft; weight of shell 0.36 kg.
 2 Oerlikon/BMARC 20 mm A41A, 800 rds/min to 2 km; weight of shell 0.24 kg.
Countermeasures: Decoys: 2 Wallop Barricade 18-barrelled launchers; Stockade and Palisade rockets.
ESM: Rascal Cutlass; radar warning
ECM: Rascal Cygnus; jammer.
Weapons control: CAAIS 450.
Radars: Surface search Plessey AWS 4; E/F-band; range 101 km (55 n miles).
Navigation: Decca AC 1226; I-band.
Fire control: Marconi ST802; I-band.

Programmes: Ordered in September 1984. Sailed in company from the UK, arriving at Mombasa 30 August 1988. Similar to Ormani Province class.
Operational: First live Otomat firing in February 1989. RIB carried right aft. Form Squadron 86. Both ships awaiting refit.

NYAYO 2/2001, Sattler/Steele / 0114357

1 MAMBA CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
MAMBA	P 3100	Brooke Marine, Lowestoft	7 Feb 1974

Displacement, tons: 125 standard; 160 full load
Dimensions, feet (metres): 123 × 22.5 × 5.2 (37.5 × 6.9 × 1.6)
Main machinery: 2 Paxman 16YJCM diesels; 4,000 hp (2.98 MW) sustained; 2 shafts
Speed, knots: 25
Range, n miles: 3,300 at 13 kt
Complement: 25 (3 officers)

Missiles: SSM: 4 IAI Gabriel II.
Guns: 2 Oerlikon/BMARC 30 mm GCM-A02 (twin); 650 rds/min to 10 km (5.4 n miles) anti-surface; 3 km (1.6 n miles) anti-aircraft; weight of shell 0.36 kg.
Radars: Navigation: Decca AC 1226; I-band.
Fire control: Selenia RTN 10X; VJ-band; range 40 km (22 n miles).

Programmes: Laid down 17 February 1972, launched 6 November 1973.
Modernisation: New missiles, gunnery equipment and optronic director fitted in 1982
Operational: Refitted at Vosper Thornycroft 1989-90. Although still seagoing, operational capability is limited. Gabriel system non-operational.

MAMBA 6/2002 / 0523319

2 SHUPAVU CLASS (LARGE PATROL CRAFT) (PBO)

SHUJAA P 3130	SHUPAVU P 3131
---------------	----------------

Displacement, tons: 480 full load
Dimensions, feet (metres): 190.3 × 26.9 × 9.2 (58 × 8.2 × 2.8)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 22
Complement: 24
Guns: 1 OTO Melara 3 in (76 mm)/62, 85 rds/min to 16 km (8.7 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg. 1 Maser 30 mm.
Weapons control: Breda optronic director.
Radars: Surface search: I-band

Comment: Built to civilian standards at Astilleros Gondan, Castropol and delivered in 1997 when they were taken over by the Navy. Armament fitted in Kenya.

SHUJAA 2/2001, Michael Nitz / 0137788

1 ARCHANGEL CLASS (RESPONSE BOAT) (PBF)

Displacement, tons: 12.6 full load
Dimensions, feet (metres): 42.5 × 13.3 × 7.2 (12.9 × 4.1 × 2.3)
Main machinery: 2 Caterpillar C9 diesels; 550 hp (409 kW); 2 Hamilton 322 waterjets
Speed, knots: 36
Range, n miles: 300 at 25 kt
Complement: 6
Guns: 2—7.62 mm MGs
Radars: Navigation; Furuno; I-band.

Comment: High-speed inshore patrol craft of aluminium construction and foam collar built by SAFE Boats International, Port Orchard, Washington. Donated by the US government on 9 October 2006. The new patrol craft is to be used for monitoring the coastline and deterrence of criminal activity including illegal arms and drug running.

ARCHANGEL CLASS 6/2006, SAFE Boats / 116494

5 DEFENDER CLASS (RESPONSE BOATS) (PBF)

PB 211-215

Displacement, tons: 2.7 full load
Dimensions, feet (metres): 25.0 × 8.5 × 3.6 (7.6 × 2.6 × 1.1)
Main machinery: 2 Honda outboard motors; 450 hp (335 kW)
Speed, knots: 46
Range, n miles: 175 at 35 kt
Complement: 4
Guns: 1—12.7 mm MG
Radars: To be announced.

Comment: High-speed inshore patrol craft of aluminium construction and foam collar built by SAFE Boats International, Port Orchard, Washington. Donated by the US government on 9 October 2006. The new patrol craft are to be used for monitoring the coastline and deterrence of criminal activity including illegal arms and drug running.

PB 212 6/2006, SAFE Boats / 1335394

AUXILIARIES

2 GALANA CLASS (LCM)

Name	No	Builders	Commissioned
GALANA	L 38	Astilleros Gondon, Spain	Feb 1994
TANA	L 39	Astilleros Gondon, Spain	Feb 1994

Displacement, tons: 1,400 full load
Dimensions, feet (metres): 208.3 × 43.6 × 7.9 (63.5 × 13.3 × 2.4)
Main machinery: 2 MTU/Bazán diesels; 2,700 hp(m) (1.98 MW) sustained; 2 shafts; bow thruster
Speed, knots: 12.5
Complement: 30
Radars: Navigation: Racal Decca; I-band.

Comment: Acquired by Galway Ltd for civilian use and taken over by the Navy for logistic support. The 4 m wide ramp is capable of taking 70 ton loads. Guns may be fitted in due course.

TANA 2/1999 / 0052523

2 TENDER (LCM)

Dimensions, feet (metres): 60 × 15.7 × 4.9 (18.3 × 4.8 × 1.5)
Main machinery: 2 Caterpillar 3305B-DIT diesels, 880 hp(m) (647 kW); 2 shafts
Speed, knots: 10
Range, n miles: 200 at 10 kt
Complement: 2 plus 136 passengers

Comment: Built by Souters, Cowes and delivered in 1998. Personnel tenders.

0 + 1 SURVEY SHIP (AGS)

JASIRI

Displacement, tons: 1,052 full load
Dimensions, feet (metres): 278.9 × 42.6 × 9.8 (85.0 × 13.0 × 3.0)
Main machinery: 2 MTU 20V 1163 diesels; 7,180 hp (5.35 MW); 2 shafts
Speed, knots: 28
Range, n miles: 5,500 at 12 kt
Complement: 60 (accommodation for 81)
Guns: 1—30 mm, 2—25 mm, 2—12.7 mm MGs.
Weapons control: Optronic director.
Radars: Air/surface search: E/F-band
 Surface search: E/F-band
 Navigation: I-band.

Comment: Contract for the procurement of a new ship signed between the government of Kenya and Euromarine on 15 July 2003. Subsequently, Astilleros Gondon was subcontracted to undertake construction of the vessel. The ship was launched in January 2005. However, following the return of the standby crew to Kenya in July 2005, the future of the ship became uncertain. Although outstanding problems were reportedly resolved on 3 May 2007 the ship had not been delivered by early 2009.

JASIRI 5/2007 / 1335393

Kiribati

Country Overview

The Republic of Kiribati, formerly the Gilbert Islands, is a south Pacific island group which gained independence in 1979 after the other part of the former British colony, the Ellice Islands, became independent as Tuvalu the previous year. Straddling the equator some 1,385 n miles southwest of Hawaii, it comprises from west to east Banaba (Ocean

island) and three detached island groups: the 16 Gilbert Islands, including Tarawa, on which the capital, Bairoki, is located, nine Phoenix Islands and eight of the 11 Line Islands. About 20 of the 34 islands are permanently inhabited. An archipelagic state, territorial seas (12 n miles) are claimed. An Exclusive Economic Zone (EEZ) (200 n miles) is also claimed but limits have not been fully defined by boundary agreements.

Headquarters Appointments

Head of Police Maritime Unit:
Assistant Superintendent John Mote

Bases

Tarawa

PATROL FORCES

1 PACIFIC CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
TEANOAI	301	Transfield Shipbuilding	22 Jan 1994

Displacement, tons: 165 full load
Dimensions, feet (metres): 103.3 × 26.6 × 6.9 (31.5 × 8.1 × 2.1)
Main machinery: 2 Caterpillar 3516TA diesels; 4,400 hp (3.28 MW) sustained; 2 shafts
Speed, knots: 18
Range, n miles: 2,500 at 12 kt
Complement: 18 (3 officers)
Guns: Can carry 1—12.7 mm MG but is unarmed
Radars: Navigation: Furuno 1011; I-band

Comment: The Pacific Patrol Boat programme was started by Australia in 1987. *Teanoai*, the 16th of the class, was handed over to Kiribati in 1994. The Australian government has announced that the programme will be extended so that all 22 boats will be able to operate for 30 years. *Teanoai* completed a half-life refit at Gladstone in 2001 and a life extension refit in 2008.

Korea, North

PEOPLE'S DEMOCRATIC REPUBLIC

Country Overview

The Democratic People's Republic of Korea (DPRK) was proclaimed in 1948 and occupies the northern part of the Korean peninsula. Located in north-eastern Asia and with an area of 46,540 square miles, it is bordered to the north by China and Russia and to the south by South Korea. It has a 1,350 n mile coastline with the Sea of Japan and the Yellow Sea. The capital and largest city is Pyongyang while the principal ports are Nampo and Haeju on the west coast and Chojin and Wonsan on the east coast. Territorial seas (12 n miles) are claimed. A 200 n mile EEZ has also been claimed but the limits have not been defined. A source of tension at sea is the dispute concerning the status of the *Northern Limit Line* and a number of South Korean islands off the south-west coast of DPRK.

The North Korean Navy is principally a coastal force and is the lowest priority military service. Ships are allocated to East or West Fleet Command. The Navy is manpower intensive and most equipment is technologically outdated and incapable of bluewater operations. Nevertheless, considerable emphasis has been placed on high speed infiltration and assault craft and the ability to conduct special forces operations. Fishing vessels are likely to be converted and/or commandeered for military use while ocean-going merchant vessels are likely to have military roles including arms transfers and intelligence gathering.

Headquarters Appointments

Commander of the Navy:
Admiral Kim Yun-Sim
Commander West Sea Fleet:
Rear Admiral Jyung Myung-Do
Commander East Sea Fleet:
Rear Admiral Park Won-Shik

Bases

Naval Headquarters: Pyongyang.
East Fleet Command (HQ T'oejo-dong (Nagwon-up))
East coast: T'oejo-dong, Ch'aho (submarines), Munch'on-up, Mayang-do (submarines), Najin
Minor bases: Chakto-dong (Chakto-ri), Hodo-ri, Kosong-up (Changjon-ni), Mugye-ri, Ohang-ni, Puam-dong, Sinch'ang-nodongjagu, Chongjin, Songjin (Kimch'aek), Songjon-pardo, Wonsan, Yoho-ri, Yongam-ni and Yukt'aedong-ni.
West Fleet Command. (HQ Namp'o).
West coast: Namp'o (Chinnamp'o), Pipa-got (submarines) and Sagon-ni (Sa-got)
Minor bases: Cho-do, Haeju, Kwangyang-ni, Sunwi-do, Yongdok and Yongamp'o.

Personnel

- (a) 2009: 46,000 officers and other ranks
(b) 5 years' national service

Maritime Security Battalions

In addition to the Navy there is a Coastal and Port Security Police Force which would be subordinate to the Navy in war. It is reported that the strength of this force is 10-15 Chong-Jin patrol craft and 130 patrol boats of various types.

Naval Aviation

There is believed to be a battalion-sized naval support/ASW air unit containing ASW, helicopter and transport elements. The ASW element consists of 10-20 Mi-14PL Haze-A ASW helicopters acquired during the late 1980s and early 1990s. The majority are thought to be subordinated to the East Sea Fleet although there are no details as to how they are organised and deployed. In addition, there are reported to be a small number of Ka-32S Helix although their role is unclear.

Coastal Defence

Considerable emphasis is given to coastal defence. There are believed to be two missile regiments (one in each fleet), a large number of surveillance radar companies and numerous artillery batteries. Missile sites are reported to be located at An-gol, Chakto-dong, Mayang-do, Sinsang-ni, and Unami-ni on the East Sea coast; and Chungsan, Hwajin-ni, Pip'a-got and Tungsan-got on the West Sea coast. Target acquisition is provided by organic target acquisition radar and ESM. There are numerous other sites available for redeployment and truck-mounted mobility is a key feature of the system. Major ports and naval bases are likely to be heavily defended.

Strength of the Fleet

Type	Active
Submarines – Patrol	23
Submarines – Coastal	32
Submarines – Midgets	23
Frigates	3
Corvettes	4
Patrol Forces	400+
Amphibious Craft	129
Hovercraft (LCPA)	135
Minesweepers	24
Depot Ships for Midget Submarines	8
Survey Vessels	4

DELETIONS

Notes: The order of battle and fleet dispositions represent the best estimates that can be made based on incomplete information.

SUBMARINES

- Notes:** (1) There are four obsolete ex-Soviet Whiskey class based at Mayang-do used for training. Probably restricted to periscope depth when dived.
(2) Reports of a sea-based ballistic missile capability have not been substantiated. A surface-ship based system is considered more likely than a submarine-launched missile which would present considerable technical challenges.
(3) It is likely that there are further midget submarines, possibly similar to the Iranian Yono class. Numbers have not been confirmed.

23 (+10 RESERVE) YUGO AND P-4 CLASS (MIDGET SUBMARINES) (SSW)

Displacement, tons: 80 surfaced; 110 dived
Dimensions, feet (metres): 65.6 × 10.2 × 15.1
(20 × 3.1 × 4.6)
Main machinery: 2 diesels; 320 hp(m) (236 kW); 1 shaft
Speed, knots: 12 surfaced; 8 dived
Range, n miles: 550 at 10 kt surfaced, 50 at 4 kt dived
Complement: 4 plus 6-7 divers
Torpedoes: 2–406 mm tubes.
Radars: Navigation: I-band.

Comment: Built at Yukdaeso-ri shipyard since early 1960s. More than one design. Details given are for the latest type, at least one of which has been exported to Iran, and have been building since 1987 to a Yugoslavian design. Some have two short external torpedo tubes and some have a short mast. The conning tower acts as a wet and dry compartment for divers. There is a second and smaller propeller for slow speed manoeuvring while dived. Twelve of the class are designated P-4s and

belong to the KWP. This type has two internal torpedo tubes. Operate from eight merchant mother ships (see *Auxiliaries*). Some have been lost in operations against South Korea, the most recent in June 1998. Two exported to Vietnam in June 1997. There are also about 50 two-man submersibles of Italian design 4.9 × 1.4 m. Overall numbers are approximate due to scrapping of older units.

YUGO P-4

6/1998, *Ships of the World* / 0052525

23 ROMEO (PROJECT 033) CLASS (SS)

Displacement, tons: 1,475 surfaced; 1,830 dived
Dimensions, feet (metres): 251.3 × 22 × 17.1
 (76.6 × 6.7 × 5.2)

Main machinery: Diesel-electric; 2 Type 37-D diesels; 4,000 hp(m) (2.94 MW); 2 motors; 2,700 hp(m) (1.98 MW); 2 creep motors; 2 shafts

Speed, knots: 15 surfaced; 13 dived
Range, n miles: 9,000 at 9 kt surfaced
Complement: 54 (10 officers)

Torpedoes: 8–21 in (533 mm) tubes (6 bow, 2 stern). 14 probably SAET-60; passive homing up to 15 km (8.7 n miles) at 40 kt; warhead 400 kg. Also some 53-56 may be carried

Mines: 28 in lieu of torpedoes

Countermeasures: ESM: China Type 921A Golf Ball (Stop Light); radar warning.

Radars: Surface search Snoop Plate/Tray; I-band.

Sonars: Pike Jaw; hull-mounted; active.
 Feniks; hull-mounted; passive.

Programmes: Two transferred from China 1973, two in 1974 and three in 1975. First three of class built at Sinpo and Mayang-do shipyards in 1976. Programme ran at about

ROMEO (China colours)

3/1995, van Ginderen Collection / 0608277

one every 14 months until 1985 when it stopped in favour of the Sang-O class. One reported sunk in February 1985

Operational: Seventeen are stationed on east coast and have occasionally operated in Sea of Japan.

The remainder, including four ex-Chinese units, are based on the west coast. By modern standards these are basic attack submarines with virtually no anti-submarine performance or potential and their operational status is doubtful.

32 SANG-O CLASS (SSC)

Displacement, tons: 256 surfaced; 277 dived
Dimensions, feet (metres): 116.5 × 12.5 × 12.1
 (35.5 × 3.8 × 3.7)

Main machinery: 1 Russian diesel generator; 1 North Korean motor; 1 shaft; shrouded prop

Speed, knots: 7.6 surfaced; 7.2 snorting; 8.8 dived

Range, n miles: 2,700 at 7 kt

Complement: 19 (2 officers) plus 6 swimmers

Torpedoes: 2 or 4–21 in (533 mm) tubes (in some). Probably Russian Type 53-56

Mines: 16 can be carried (in some)

Radars: Surface search; Furuno; I-band.

Sonars: Russian hull-mounted; passive/active search and attack.

Programmes: Started building in 1995 at Sinpo accelerating up to about four to six a year by 1996. Reported to have been building at about three a year from 1997. One reported delivered in 2002 and one in 2003 and overall numbers reflect an estimated building rate of almost two per year

Structure: A variation of a reverse engineered Yugoslav design. There are at least two types, one with torpedo tubes and one capable of carrying up to 16 externally-fitted bottom mines. There is a single periscope and a VLF radio receiver in the fin. Rocket launchers and a 12.7 mm MG can be carried. Diving depth 180 m (590 ft). A longer (39 m) variant submarine may replace older boats.

Operational: Used extensively for infiltration operations. The submarine can bottom, and swimmer disembarkation is reported as being normally exercised from periscope depth. One of the class grounded and was captured by South Korea on 18 September 1996. Some crew members may be replaced by special forces for short operations
 17 stationed on east coast

SANG-O CLASS
3/1996
0608223

FRIGATES

Notes: The hull of what is probably an ex-Russian Krivak III frigate is at Nampo naval shipyard. All weapons and sensors have been removed from the ship and the future of the vessel is unclear. If the ship were to be re-armed and activated, it would represent a significant increase in the capabilities of the surface fleet.

1 SOHO CLASS (FFGH)

Name	No	Builders	Laid down	Launched	Commissioned
-	823	Najin Shipyard	June 1980	Nov 1981	May 1982

Displacement, tons: 1,640 full load
Dimensions, feet (metres): 242.1 × 50.9 × 12.5
 (73.8 × 15.5 × 3.8)

Main machinery: 2 diesels, 15,000 hp(m) (11.03 MW); 2 shafts
Speed, knots: 23
Complement: 189 (17 officers)

Missiles: SSM: 4 CSS-N-2 ●; active radar or IR homing to 46 km (25 n miles) at 0.9 Mach, warhead 513 kg.

Guns: 1–3.9 in (100 mm) 56 ●, 40° elevation; 15 rds/min to 16 km (8.6 n miles); weight of shell 15.6 kg.

4–37 mm/63 (2 twin) ●.

4–30 mm/65 (2 twin) ●. 4–25 mm/60 (2 twin) ●.

A/S mortars: 2 RBU 1200 5-tubed fixed launchers ●; range 1,200 m, warhead 34 kg.

Countermeasures: ESM: China RW-23 Jug Pair (Watch Dog); intercept.

Radars: Surface search: Square Tie ●; I-band.

Fire control: Drum Tilt ●; H/I-band.

Navigation: I-band

Sonars: Stag Horn; hull-mounted; active search and attack; high frequency.

Helicopters: Platform for 1 medium.

SOHO

(Scale 1 : 600), Ian Sturton / 0508237

Programmes: Planned class of six but only one was ordered.
Structure: One of the largest warships built anywhere with a twin hull design and a helicopter deck aft. Has a large central superstructure to carry the heavy gun armament.

Operational: Probably very weather limited like many catamaran designs. Base and operational status not known.

2 NAJIN CLASS (FFG)

531 591

Displacement, tons: 1,500 full load
Dimensions, feet (metres): 334.6 × 32.8 × 8.9
 (102 × 10 × 2.7)
Main machinery: 3 SEMT-Pielstick Type 16 PA6 280 diesels;
 18,000 hp(m) (13.2 MW); 3 shafts
Speed, knots: 24
Range, n miles: 4,000 at 13 kt
Complement: 180 (16 officers)

Missiles: SSM: 2 CSS-N-1 (active radar or IR homing to 48 km (25 n miles) at 0.9 Mach; warhead 513 kg HE. Replaced torpedo tubes on both ships.
Guns: 2—3.9 in (100 mm)/56 (40° elevation; 15 rds/min to 16 km (8.6 n miles); weight of shell 15.6 kg.
 4—57 mm/80 (2 twin), 120 rds/min to 6 km (3.2 n miles); weight of shell 2.8 kg.
 12 or 4—30 mm/60 (6 or 2 twin) (see Structure).
 12—25 mm (6 twin)
A/S mortars: 2 RBU 1200 5-tubed fixed launchers (range 1,200 m; warhead 34 kg (not in 531))
Depth charges: 2 projectors; 2 racks. 30 weapons.

NAJIN

Mines: 30 (estimated)
Countermeasures: Decoys: 6 chaff launchers.
 ESM: China RW-23 Jug Pair (Watch Dog), intercept.
Weapons control: Optical director
Radars: Air search: Square Tie I-band.
 Surface search: Pot Head I-band.
 Navigation: Pot Drum, H/I band.
 Fire control: Drum Tilt, H/I band.
 IFF: High Pole. Square Head.
Sonars: Stag Horn; hull-mounted; active search; high frequency.

(Scale 1 : 900), Ian Sturton / 0506153

Programmes: Built at Najin and Nampo shipyards. First completed 1973, second 1975.

Structure: There is some resemblance to the ex-Soviet Kola class, now deleted. The original torpedo tubes were replaced by CSS-N-1 missile launchers in the mid-1980s and the RBU 1200 mortars have been removed in at least one of the class. Gun armaments differ, one having six twin 30 mm while the other only has one twin 30 mm and six twin 25 mm.

Operational: One based on each coast but seldom seen at sea

NAJIN 531

5/1993, JMSDF / 0080724

CORVETTES

1 TRAL CLASS (FS)

671

Displacement, tons: 580 full load
Dimensions, feet (metres): 203.7 × 23.9 × 7.8
 (62.1 × 7.3 × 2.4)
Main machinery: 2 diesels; 3,000 hp(m) (2.21 MW);
 2 shafts
Speed, knots: 16
Range, n miles: 2,700 at 16 kt
Complement: 60 (7 officers)

Guns: 1—85 mm/52 tank turret
 2—37 mm/6 (single)
 16—14.5 mm, 4 quad
Depth charges: 2 rails.

Mines: 30
Radars: Surface search: Pot Head or Don 2 I-band.
 Navigation: Model 351; I-band.
 IFF: Ski Pole

TRAL 671

Programmes: Two Tral class fleet minesweepers of 1930s vintage were transferred from the USSR in the mid-1950s, were paid off in the early 1980s but one returned to service in the early 1990s.

Structure: Minelaying rails are visible along the whole of upper deck aft of the bridge superstructure.

Operational: Based on the east coast (Najin or Kosong-up).

TRAL 671

5/1993, JMSDF / 0080773

4 SARIWON CLASS (FS)

511-514

Displacement, tons: 650 full load
Dimensions, feet (metres): 203.7 × 23.9 × 7.8
 (62.1 × 7.3 × 2.4)
Main machinery: 2 diesels, 3,000 hp(m) (2.21 MW); 2 shafts
Speed, knots: 16
Range, n miles: 2,700 at 16 kt
Complement: 60 (7 officers)

Guns: 4—57 mm/80 (2 twin), 4—37 mm/6 (2 twin), 16 14.5 mm (4 quad).

A/S mortars: 2 RBU 1200 5-tubed fixed launchers.
Depth charges: 2 rails.

Mines: 30
Radars: Surface search: Pot Head or Don 2; I-band
 Navigation: Model 351; I-band.
 IFF: Ski Pole.

Sonars: Stag Horn; hull-mounted; active; high frequency.

Programmes: Four Sariwon class built in North Korea in the mid-1960s.

Structure: Sariwon design based on the original USSR fleet minelayer Tral or Fugas class which entered service in the 1930s. One Sariwon is reported as having sonar and ASW armament. Minelaying rails are visible along the upper deck aft of the superstructure.

Operational: Based on the east coast at Najin or Kosong-up.

PATROL FORCES

Notes: There is reported to be a new class of hovercraft or Surface Effect Ship (SES) designed for patrol duties. The 38 x 12 m craft have a displacement of 170 tons and are reported to have a speed of 48 kt. They are armed with a 57 mm gun forward and a 39 mm gun aft.

12 OSA CLASS (PROJECT 205) (FAST ATTACK CRAFT—MISSILE) (PTFG)

Displacement, tons: 171 standard, 210 full load
Dimensions, feet (metres): 126.6 x 24.9 x 8.9 (38.8 x 7.6 x 2.7)
Main machinery: 3 Type M 503A diesels; 8,025 hp(m) (5.9 MW) sustained; 3 shafts
Speed, knots: 35
Range, n miles: 800 at 30 kt
Complement: 30
Missiles: SSM: 4 SS-N-2A Styx; active radar or IR homing to 46 km (25 n miles) at 0.9 Mach; warhead 513 kg.
Guns: 4—30 mm/65 (2 twin) AK 230; 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg.
Countermeasures: ESM: China BM/HZ 8610; intercept (Huangfen class).
Radars: Surface search: Square Tie; I-band.
Fire control: Drum Tilt; H/I-band (Osa I).
IFF: High Pole B. Square Head

Programmes: There are eight Osa I class remaining of 12 transferred from the USSR in 1968 and four more in 1972–83. Four are based on each coast. In addition, there are four Huangfen class acquired from China in 1980 and based on the west coast.

OSA I

0506031

10 SOJU CLASS (FAST ATTACK CRAFT—MISSILE) (PTG)

Displacement, tons: 285 full load
Dimensions, feet (metres): 139.4 x 24.6 x 5.6 (42.5 x 7.5 x 1.7)
Main machinery: 3 Type M 503A diesels; 8,025 hp(m) (5.9 MW) sustained; 3 shafts
Speed, knots: 34
Range, n miles: 600 at 30 kt
Complement: 32 (4 officers)
Missiles: SSM: 4 SS-N-2 Styx; active radar or IR homing to 46 km (25 n miles) at 0.9 Mach; warhead 513 kg.
Guns: 4—30 mm/65 (2 twin) AK 230; 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg.
Countermeasures: ESM: China BM/HZ 8610; intercept
Radars: Surface search: Square Tie; I-band
Fire Control: Drum Tilt; H/I-band

Comment: North Korean built and enlarged version of Osa class. First completed in 1981; built at about one per year at Nampo, Najin and Yongampo shipyards, but the programme terminated in 1996. Six based on the east coast and four on the west.

12 KOMAR CLASS (PROJECT 183) (FAST ATTACK CRAFT—MISSILE) (PTFG)

Displacement, tons: 75 standard; 85 full load
Dimensions, feet (metres): 84 x 24 x 5.9 (25.6 x 7.3 x 1.8)
Main machinery: 4 Type M 50 diesels; 4,400 hp(m) (3.3 MW) sustained; 4 shafts
Speed, knots: 40
Range, n miles: 400 at 30 kt
Complement: 19
Missiles: SSM: 2 SS-N-2A Styx or CSS-N-1; active radar or IR homing to 46 km (25 n miles) at 0.9 Mach; warhead 513 kg.
Guns: 2—25 mm/80 (twin); 270 rds/min to 3 km (1.6 n miles); weight of shell 0.34 kg.
 2—14.5 mm (twin) MGs.
Radars: Surface search: Square Tie; I-band.
IFF: Square Head

Programmes: There are six Komar class remaining of 10 transferred from the USSR. Wooden hulls have been replaced by steel. There are also six Sohung class, North Korean copies of the Komar class, first built in 1980–81 and no longer in production. The 'Komars' and four 'Sohung' are based on the east coast.

KOMAR

0506032

6 HAINAN CLASS (LARGE PATROL CRAFT) (PC)

201–204 292–293

Displacement, tons: 375 standard; 392 full load
Dimensions, feet (metres): 192.8 x 23.6 x 6.6 (58.8 x 7.2 x 2)
Main machinery: 4 Kolomna/PCR Type 9-D-8 diesels; 4,000 hp(m) (2.94 MW); 4 shafts
Speed, knots: 30.5
Range, n miles: 1,300 at 15 kt
Complement: 69
Guns: 4—57 mm/70 (2 twin); 120 rds/min to 8 km (4.4 n miles); weight of shell 2.8 kg.
 4—25 mm/80 (2 twin); 270 rds/min to 3 km (1.6 n miles); weight of shell 0.34 kg.
A/S mortars: 4 RBU 1200 5-tubed launchers; range 1,200 m; warhead 34 kg.
Depth charges: 2 projectors; 2 racks for 30 DCs.
Mines: Laying capability for 12.
Countermeasures: Decoys: 2 PK 16 chaff launchers.
ESM: China BM/HZ 8610; intercept.
Radars: Surface search: Pot Head (Model 351); I-band.
Sonars: Stag Ear; hull-mounted; active search and attack; high frequency.

Comment: Transferred from China in 1975 (two), 1976 (two), 1978 (two). All based on the west coast.

HAINAN (China colours)

4/1988 / 0080226

19 SO 1 CLASS (LARGE PATROL CRAFT) (PC)

Displacement, tons: 170 light; 215 normal
Dimensions, feet (metres): 137.8 x 19.7 x 5.9 (42 x 6 x 1.8)
Main machinery: 3 Kolomna Type 40-D diesels; 6,600 hp(m) (4.85 MW) sustained; 3 shafts
Speed, knots: 28
Range, n miles: 1,100 at 13 kt
Complement: 31
Guns: 1—85 mm/52, 18 rds/min to 15 km (8 n miles); weight of shell 9.5 kg.
 2—37 mm/63 (twin); 180 rds/min to 9 km (4.9 n miles); weight of shell 0.7 kg.
 4 or 6—25 mm/60 (2 or 3 twin); 270 rds/min to 3 km (1.6 n miles); weight of shell 0.34 kg.
 4—14.5 mm/93 MGs.
A/S mortars: 4 RBU 1200 5-tubed launchers, range 1,200 m; warhead 34 kg.
Radars: Surface search: Pot Head (Model 351); I-band.
Navigation: Don 2; I-band.
IFF: Ski Pole or Dead Duck
Sonars: Stag Ear; hull-mounted, active

Comment: Eight transferred by the USSR in early 1960s, with RBU 1200 ASW rocket launchers and depth charges instead of the 85 mm and 37 mm guns. Remainder built in North Korea to modified design. Twelve are fitted out for ASW with sonar and depth charges, the other seven are used as gunboats. The majority are based on the east coast.

SO 1 (USSR colours)

1988 / 0506030

13 SHANGHAI II CLASS (FAST ATTACK CRAFT—GUN) (PBT)

381–388 391–395

Displacement, tons: 113 standard, 131 full load
Dimensions, feet (metres): 126.3 x 17.7 x 5.8 (38.5 x 5.4 x 1.7)
Main machinery: 2 Type L12-180 diesels; 2,400 hp(m) (1.76 MW) (forward)
 2 Type 12-D-6 diesels; 1,820 hp(m) (1.34 MW) (aft); 4 shafts
Speed, knots: 30
Range, n miles: 700 at 16.5 kt
Complement: 34
Guns: 4—37 mm/63 (2 twin); 160 rds/min to 9 km (4.9 n miles); weight of shell 0.7 kg.
 4—25 mm/60 (2 twin); 270 rds/min to 3 km (1.6 n miles); weight of shell 0.34 kg.
 2—3 in (76 mm) recoilless rifles.
Depth charges: 8.
Mines: Rails can be fitted for 10 mines.
Countermeasures: ESM: China BM/HZ 8610; intercept.
Radars: Surface search: Pot Head (Model 351) or Skin Head; I-band.

Comment: Acquired from China since 1967. Based in the west fleet.

SHANGHAI II

1984 / 0080227

12 TAECHONG CLASS (LARGE PATROL CRAFT) (PC)

Displacement, tons: 385 standard; 410 full load (I); 425 full load (II)
Dimensions, feet (metres): 196.3 (II), 199.5 (II) × 23.6 × 6.6 (59.8; 60.8 × 7.2 × 2)
Main machinery: 4 Kolomna Type 40-D diesels; 8,800 hp(m) (6.4 MW) sustained; 4 shafts
Speed, knots: 25
Range, n miles: 2,000 at 12 kt
Complement: 80
Guns: 1–3.9 in (100 mm)/56 (Taechong II); 15 rds/min to 16 km (8.6 n miles); weight of shell 15.6 kg or 1–85 mm/52.
 2–57 mm/70 (twin), 120 rds/min to 8 km (4.4 n miles); weight of shell 2.8 kg.
 4–30 mm/85 (2 twin) (Taechong II), 2–25 mm/60 (twin) (Taechong I).
 16 or 4–14.5 mm MGs (4 quad (Taechong II); 2 twin (Taechong I)).
A/S mortars: 2 RBU 1200 5-tubed fixed launchers; range 1,200 m; warhead 34 kg.
Depth charges: 2 racks.
Radars: Surface search: Pot Head (Model 351); I-band.
Fire control: Drum Tilt; H/I-band.
IFF: High Pole A. Square Head.
Sonars: Stag Ear; hull-mounted; active attack; high frequency.

Comment: North Korean class of mid-1970s design, slightly larger than the Hainan class. There are seven Taechong I class and five Taechong II. The latter, built at Najin shipyard up to 1995, are slightly longer and more heavily armed. Based in both fleets.

TAECHONG (not to scale) / 0506033

TAECHONG II (with Najin) 1998 / 0506034

6 CHONG-JU CLASS (LARGE PATROL CRAFT) (PC)

Displacement, tons: 205 full load
Dimensions, feet (metres): 138.8 × 23.6 × 6.9 (42.3 × 7.2 × 2.1)
Main machinery: 4 diesels; 4,406 hp(m) (3.24 MW); 4 shafts
Speed, knots: 20
Range, n miles: 1,350 at 12 kt
Complement: 48 (7 officers)
Missiles: SSM: 4 CSS N-1; active radar or IR homing to 46 km (25 n miles) at 0.9 Mach; warhead 613 kg. In three of the class.
Guns: 1–85 mm/52; 18 rds/min to 15 km (8 n miles); weight of shell 9.5 kg.
 4–37 mm/63 (2 twin), 4–25 mm/60 (2 twin)
 4–14.5 mm/93 (2 twin) MGs.
A/S mortars: 2 RBU 1200; 5-tubed launchers; range 1,200 m; warhead 34 kg
Radars: Surface search: Pot Head (Model 351); I-band.
Sonars: Stag Ear; hull-mounted, active attack; high frequency.

Comment: Built between 1975 and 1989. At least one has been converted to fire torpedoes and three others have CSS-N-1 missiles and resemble the Soju class. Based in both fleets.

59 CHAHO CLASS (FAST ATTACK CRAFT—GUN) (PTF)

Displacement, tons: 82 full load
Dimensions, feet (metres): 85.3 × 19 × 6.6 (26 × 5.8 × 2)
Main machinery: 4 Type M 50 diesels; 4,400 hp(m) (3.2 MW) sustained; 4 shafts
Speed, knots: 37
Range, n miles: 1,300 at 18 kt
Complement: 16 (2 officers)
Guns: 1 BM 21 multiple rocket launcher. 2 USSR 23 mm/87 (twin), 2–14.5 mm (twin) MGs.
Radars: Surface search: Pot Head (Model 351); I-band.

Comment: Building in North Korea since 1974. Based on P 6 hull. Three transferred to Iran in April 1987. Still building and new hulls are replacing the old ones. 36 based in the east and 24 in the west.

CHAHO (Iranian colours) 4/1998 / 0506035

54 CHONG-JIN CLASS (FAST ATTACK CRAFT—GUN) (PTF/PTK)

Displacement, tons: 80 full load
Dimensions, feet (metres): 85.3 × 19 × 5.9 (26 × 5.8 × 1.8)
Main machinery: 4 Type M 50 diesels; 4,400 hp(m) (3.2 MW) sustained; 4 shafts
Speed, knots: 36. Range, n miles: 450 at 30 kt
Complement: 17 (3 officers)
Guns: 1–85 mm/52; 18 rds/min to 15 km (8 n miles); weight of shell 9.5 kg.
 4 or 8–14.5 mm (2 or 4 twin) MGs.
Radars: Surface search: Skin Head; I-band
IFF: High Pole B; Square Head

Comment: Particulars similar to Chaho class of which this is an improved version. Building began about 1975. About one third reported to be a hydrofoil development. Up to 15 are operated by the Coastal Security Force. Based in both fleets.

CHONG-JIN (not to scale), Ian Sturton / 0506036

33 SINPO CLASS (FAST ATTACK CRAFT—TORPEDO) (PTF/PTK)

Displacement, tons: 64 standard; 73 full load
Dimensions, feet (metres): 85.3 × 20 × 4.9 (26 × 6.1 × 1.5)
Main machinery: 4 Type M 50 diesels; 4,400 hp(m) (3.2 MW) sustained; 4 shafts
Speed, knots: 45. Range, n miles: 450 at 30 kt; 600 at 15 kt
Complement: 15
Guns: 4–25 mm/80 (2 twin) (original), 2–37 mm (others), 6–14.5 mm MGs (Sinpo class).
Torpedoes: 2–21 in (533 mm) tubes (in some). Sinpo class has no tubes.
Depth charges: 8 in some.
Radars: Surface search: Skin Head; I-band (some have Furuno)
IFF: Dead Duck. High Pole

Comment: Thirteen craft remain of the 27 P 6 class transferred from the USSR and 15 Shantou class transferred from China. Some of the P 6s have hydrofoils and one sank in June 1999. The Sinpo (or Sinnam) class are locally built versions of these craft of which 20 now remain. Based in both fleets.

P 6 0506037

SINPO 471 0506038

142 KU SONG, SIN HUNG AND MOD SIN HUNG CLASSES (FAST ATTACK CRAFT—TORPEDO) (PTF/PTK)

Displacement, tons: 42 full load
Dimensions, feet (metres): 75.4 × 16.1 × 5.5 (23 × 4.9 × 1.7)
Main machinery: 2 Type M 50 diesels, 2,200 hp(m) (1.6 MW) sustained, 2 shafts
Speed, knots: 40, 50 (Mod Sin Hung)
Range, n miles: 500 at 20 kt
Complement: 20 (3 officers)
Guns: 4–14.5 mm (2 twin) MGs.
Torpedoes: 2–18 in (457 mm) or 2–21 in (533 mm) tubes (not fitted in all).
Radars: Surface search: Skin Head; I-band.
IFF: Dead Duck

Comment: Ku Song and Sin Hung built in North Korea between mid-1950s and 1970s. Frequently operated on South Korean border. A modified version of Sin Hung with hydrofoils built from 1981–85. Fifty craft, previously thought to have been scrapped, are in various states of repair. Based in both fleets.

SIN HUNG (no torpedo tubes) 1991 / 0506039

MODIFIED FISHING VESSELS (COASTAL PATROL CRAFT) (PB/AGI)

Comment: Approximately 15 fishing vessels have been converted for naval use. Some act as patrol craft, others as AGIs. The vessel sunk by the Japanese Coast Guard on 22 December 2001 carried a 14.5 mm machine gun, two anti-air missile launchers and numerous small arms. The stern was fitted with outward opening doors.

MFV 801

7/1991, G Jacobs / 0506040

Fishing Vessel (being salvaged)

8/2002, P A News / 0522267

HIGH-SPEED AND SEMI-SUBMERSIBLE INFILTRATION CRAFT (HSIC/PBF)

Displacement, tons: 5 full load
Dimensions, feet (metres): 30.5 × 8.2 × 3.1 (9.3 × 2.5 × 1)
Main machinery: 1 diesel; 260 hp(m) (191 kW); 1 shaft
Speed, knots: 35
Complement: 2
Guns: 1—7.62 mm MG
Radars: Navigation: Furuno 701, I-band.

Comment: Up to a hundred built for Agent infiltration and covert operations. These craft have a very low radar cross-section and 'squat' at high speeds. High rate of attrition. A newer version was reported in 1998. This is 12.8 m in length and has a top speed of about 45 kt. It is reported to travel on the surface until submerging to a depth of 3 m using a snort mast. It has a dived speed of 4 kt.

HSIC

1991, J Bermudez / 0506041

15 TB 11PA AND 10 TB 40A CLASSES (INSHORE PATROL CRAFT) (PBF)

Displacement, tons: 8 full load
Dimensions, feet (metres): 38.7 × 8.6 × 3.3 (11.2 × 2.7 × 1)
Main machinery: 2 diesels; 520 hp(m) (382 kW); 2 shafts
Speed, knots: 35 **Range, n miles:** 200 at 15 kt
Complement: 4
Guns: 1—7.62 mm MG
Radars: Surface search: Furuno; I-band.

Comment: High-speed patrol boats. Reinforced fibreglass hull. Design closely resembles a number of UK/Western European commercial craft. Larger hull design, known as 'TB 40A' also built. Both classes being operated by the Coastal Security Force.

AMPHIBIOUS FORCES

18 HUNGNAM CLASS (LCM)

Displacement, tons: 70 full load
Dimensions, feet (metres): 55.8 × 14.4 × 3.9 (17 × 4.4 × 1.2)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 6
Guns: 2—14.5 mm (twin)

Comment: 1980s vintage. Based in both fleets.

10 HANTAE CLASS (LSM)

Displacement, tons: 350 full load
Dimensions, feet (metres): 157.6 × 21.3 × 6.6 (48 × 6.5 × 2)
Main machinery: 2 diesels; 4,352 hp(m) (3.2 MW); 2 shafts
Speed, knots: 18. **Range, n miles:** 2,000 at 12 kt
Complement: 36 (4 officers)
Military lift: 350 troops plus 3 MBTs
Guns: 8—25 mm/80 (4 twin)

Comment: Built in the early 1980s. Most are based on the east coast.

96 NAMPO CLASS (LLP)

Displacement, tons: 75 full load
Dimensions, feet (metres): 85.3 × 19 × 5.6 (26 × 5.8 × 1.7)
Main machinery: 4 Type M 50 diesels; 4,400 hp(m) (3.2 MW) sustained; 4 shafts
Speed, knots: 36. **Range, n miles:** 450 at 30 kt
Complement: 19
Military lift: 35 troops
Guns: 4—14.5 mm (2 twin) MGs.
Radars: Surface search: Skin Head; I-band.

Comment: A class of assault landing craft. Similar to the Chong-Jin class but with a smaller forward gun mounting and with retractable ramp in bows. Building began about 1975. Several have been deleted due to damage. There are 18 of the original class and 73 of a modified version which have a covered-in deck. Most have bow doors welded shut. Four sold to Madagascar in 1979 but now deleted. The Nampo D is the latest version with a multihull design. The first of these entered service in 1997 and four further craft have followed. Based in both fleets.

NAMPO

(not to scale), Ian Sturton / 0508042

7 HANCHON CLASS (LCM)

Displacement, tons: 145 full load
Dimensions, feet (metres): 117.1 × 25.9 × 3.9 (35.7 × 7.9 × 1.2)
Main machinery: 2 Type 3-D-12 diesels; 600 hp(m) (443 kW) sustained; 2 shafts
Speed, knots: 10. **Range, n miles:** 600 at 6 kt
Complement: 15 (1 officer)
Military lift: 2 tanks or 300 troops
Guns: 2—14.5 mm/93 (twin) MG.
Radars: Surface search: Skin Head; I-band.

Comment: Built in the 1980s. Based in both fleets.

136 KONGBANG CLASS (HOVERCRAFT) (LCPA)

Comment: Three types: one Type I, 57 Type II and 78 are Type III. Length 25 m (I), 21 m (II) and 18 m (III). A series of high-speed air cushion landing craft first reported in 1987 and building continued until 1996 and then stopped. Use of air cushion technology is an adoption of commercial technology based on the SRN-6. Kongbang II has twin propellers and can carry up to 50 commandos at 50 kt. Kongbang III has a single propeller and can take about 40 troops at 40 kt. All are radar fitted. Some have Styx SSM missiles. Older craft are being replaced continuously in a high priority programme. Divided between both fleets.

MINE WARFARE FORCES

24 YUKTO CLASS (COASTAL MINESWEEPERS) (MSC)

Displacement, tons: 60 full load (I); 52 full load (II)
Dimensions, feet (metres): 78.7 × 13.1 × 5.6 (24 × 4 × 1.7) (Yukto I)
68.9 × 13.1 × 5.6 (21 × 4 × 1.7) (Yukto II)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 18
Complement: 22 (4 officers)
Guns: 1—37 mm/63 or 2—25 mm/80 (twin), 2—14.5 mm/93 (twin) MGs
Mines: 2 rails for 4.
Radars: Surface search: Skin Head; I-band.

Comment: North Korean design built in the 1980s. There are 19 Yukto I and five Yukto II. The Yukto II have no after gun. Wooden construction. Based in both fleets.

SURVEY SHIPS

Notes: The Hydrographic Department has four survey ships but also uses a number of converted fishing vessels.

AUXILIARIES

Notes: (1) Trawlers operate as AGIs on the South Korean border where several have been sunk over the years. In addition many ocean-going commercial vessels are used for carrying weapons and ammunition worldwide in support of international terrorism. (2) There are also eight ocean cargo ships adapted as mother ships for midjet submarines. Their names are *Soo Gun-Ho*, *Dong Geon Ae Gook-Ho*, *Dong Hae-Ho*, *Choong Seong-Ho Number One*, *Choong Seong-Ho Number Two*, *Choong Seong-Ho Number Three*, *Hae Gum Gang-Ho* and the *Song Rim-Ho*.

1 KOWAN CLASS (ASR)

Displacement, tons: 2,010 full load
Dimensions, feet (metres): 275.6 × 46.9 × 12.8 (84 × 14.3 × 3.9)
Main machinery: 4 diesels; 8,160 hp(m) (6 MW); 2 shafts
Speed, knots: 16
Complement: 150
Guns: 12—14.5 mm (6 twin) MGs.
Radars: Navigation: Furuno; I-band.

Comment: Used as a submarine rescue ship. Probable catamaran construction. Based at Ch'aho.

Korea, South REPUBLIC

Country Overview

The Republic of Korea was proclaimed in 1948 and occupies the southern part of the Korean peninsula. Located in northeastern Asia and with an area of 38,375 square miles, it is bordered to the north by North Korea. It has a 1,300 n miles coastline with the Sea of Japan, the Yellow Sea and the Korea Strait, which separates it from Japan. There are numerous offshore islands in the south and west, the largest of which is Cheju. A source of tension at sea is the dispute concerning the status of the *Northern Limit Line* and a number of South Korean islands off the southwest coast of DPRK. The capital and largest city is Seoul. The principal port is Pusan while others include Incheon, the major port on the Yellow Sea, Mokpo and Gunsan. Territorial seas (12 n miles) are claimed. A 200 n mile EEZ has also been claimed but the limits have not been defined.

Headquarters Appointments

Chief of Naval Operations:
Admiral Jung Ok-Keun
Commandant Marine Corps:
Vice Admiral Lee Sang-Ro
Vice Chief of Naval Operations:
Vice Admiral Seo Yang-Won

Operational Commands

Commander-in-Chief Fleet:
Vice Admiral Yoon Yeong
Commander First Fleet:
Rear Admiral Chung Ok-Gaun
Commander Second Fleet:
Rear Admiral Jang Seung-Hak

Operational Commands — continued

Commander Third Fleet:
Rear Admiral Lee Hong-Hee

Personnel

- (a) 2009: Regulars: 35,000 (Navy) and 25,000 (Marines)
Conscripts: 19,000 (Navy and Marines)
(b) 2½ years' national service for conscripts
(c) Reserves: 9,000

Bases

Major: Chinhae (Fleet HQ), Donghae (1st Fleet), Pyongtaek (2nd Fleet), Pusan (3rd Fleet)
Minor: Cheju, Mokpo, Mukho, Pohang
Aviation: Pohang (MPA base), Chinhae, Cheju
Marines: Pohang, Kimp'o, Pongyongdo

A new base is under construction at Hwasun-ni on the south coast of Cheju Island. Completion is expected in 2014.

Organisation

In 1986 the Navy was reorganised into three Fleets, each commanded by a Rear Admiral, whereas the Marines retained two Divisions and one brigade plus smaller and support units. From October 1973 the RoK Marine Force was placed directly under the RoK Navy command with a Vice Chief of Naval Operations for Marine Affairs replacing the Commandant of Marine Corps. The Marine Corps was re-established as an independent service on 1 November 1987.
1st Fleet (East coast): No 11, 12, 13 DD/FF Sqn; No 101, 102 Coastal Defence Sqn; 181, 191, 111, 121 Coastal Defence Units; 121st Minesweeper Sqn.

2nd Fleet (West coast): No 21, 22, 23 DD/FF Sqn; No 201, 202 Coastal Defence Sqn; 211, 212 Coastal Defence Units; 522nd Minesweeper Sqn.
3rd Fleet (Southern peninsula): 301, 302, 303 DD/FF Sqn; 304, 406th Coastal Defence Units.

Coast Defence

Three batteries of Marines with truck-mounted quadruple Harpoon SSM launchers

Pennant Numbers

Numbers ending in 4 are not used as they are considered unlucky

SUBMARINES

Notes: (1) The Type 214 programme is to be followed by the KSS-3 programme on which design work began in 2007. Construction of the first hull is expected to start in 2010 or 2011 to meet an in-service date of 2017. Up to nine submarines are planned, probably in batches of three. The new submarines are to be of about 3,000 tons.
(2) Reports of a nuclear submarine programme (SSX) have been officially denied.

11 MIDGET SUBMARINES (SSW)

052 (Dolgorae)

053 (Dolgorae)W

Displacement, tons: 150 surfaced; 175 dived (Dolgorae); 70 surfaced, 83 dived (Cosmos)
Dimensions, feet (metres): 82 × 8.9 (25 × 2.7) (Cosmos)
Main machinery: Diesel-electric; 1 diesel generator; 1 motor; 1 shaft
Speed, knots: 9 surfaced; 6 dived
Complement: 6 + 8 swimmers
Torpedoes: 2—406 mm tubes (Dolgorae), 2—533 mm tubes (Cosmos)
Sonars: Atlas Elektronik; hull-mounted; passive search; high frequency

Comment: Two KSS-1 Dolgorae class which entered service in 1983. Nine Cosmos class type used by Marines. Limited endurance, for use only in coastal waters. Fitted with Pilkington Optronics periscopes (CK 37 in Dolgorae and CK 41 in Cosmos). Numbers of each type confirmed but the Dolgorae class are being replaced by more Cosmos. All are based at Cheju Island.

DOLGORAE
11/1985, G Jacobs

LEE JONGMU	066	Daewoo, Okpo	1993	17 Apr 1995	29 Aug 1996
JUNG WOON	067	Daewoo, Okpo	1994	7 May 1996	29 Aug 1997
LEE SUNSIN	068	Daewoo, Okpo	1995	21 May 1998	15 June 1999
NA DAEYONG	069	Daewoo, Okpo	1996	15 June 1999	Nov 2000
LEE EOKGI	071	Daewoo, Okpo	1997	26 May 2000	30 Nov 2001

Displacement, tons: 1,100 surfaced; 1,285 dived
Dimensions, feet (metres): 185.0 × 20.3 × 18
 (56.4 × 6.2 × 5.5)

Main machinery: Diesel-electric; 4 MTU 12V 396 SE diesels; 3,800 hp (m) (2.8 MW) sustained; 4 alternators; 1 motor; 4,600 hp (m) (3.38 MW) sustained; 1 shaft
Speed, knots: 11 surfaced/snorting; 22 dived
Range, n miles: 7,500 at 8 kt surfaced
Complement: 33 (8 officers)

Missiles: SSM: McDonnell Douglas UGM-84B Sub Harpoon; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg (fitted to at least three boats)

Torpedoes: 8—21 in (533 mm) bowtubes. 14 System Technik Nord (STN) SUT Mod 2; wire-guided, active/passive homing to 12 km (6.6 n miles) at 35 kt or 28 km (15.1 n miles) at 23 kt; warhead 260 kg. Swim-out discharge
Mines: 28 in lieu of torpedoes.

Countermeasures: ESM: Argo; radar warning
Weapons control: Atlas Elektronik ISUS 83 TFCS.

Radars: Navigation: I-band

Sonars: Atlas Elektronik CSU 83; hull mounted; passive search and attack; medium frequency

Programmes: First three ordered in late 1987, one built at Kiel by HDW, and two assembled at Okpo by Daewoo from material packages transported from Germany

Second three ordered in October 1989 and a further batch of three in January 1994.

Modernisation: Mid life upgrade of all nine boats is under consideration. It is envisaged that AIP propulsion and Sub-Harpoon SSM may be fitted in stretched hulls.

Structure: Type 1200 similar to those built for the Turkish Navy with a heavy dependence on Atlas Elektronik sensors and STN torpedoes. Diving depth 250 m (820 ft). A passive towed array may be fitted in due course.

Operational: An indigenous torpedo based on the Honeywell NP 37 may be available in due course. The class is split between the three Fleets. Operations conducted off Hawaii from 1997 to improve operating standards.

—	076	Daewoo, Okpo	2010	2013	2014

Displacement, tons: 1,700 surfaced; 1,860 dived

Dimensions, feet (metres): 213.3 x 20.7 x 19.7
(65 x 6.3 x 6)

Main machinery: 1 MTU 16V 396 diesel; 4,243 hp (3.12 MW);
1 Siemens Permasyn motor; 3,875 hp(m) (2.85 MW);
1 shaft; 2 HDW PEM fuel cells; 240 kW; sodium sulphide
high-energy batteries

Speed, knots: 20 dived, 12 surfaced

Complement: 27 (5 officers)

Torpedoes: 8—21 in (533 mm) bow tubes

Countermeasures: Decoys: ESM

Weapons control: STN Atlas

Radars: Surface search: I-band

Sonars: Bow, flank and towed arrays.

Programmes: Decision taken in November 2000 to order three HDW designed Air Independent Propulsion (AIP) submarines. The boats are being built by Hyundai Heavy Industries with the German Submarine Corporation, led by HDW, providing construction plans, materials and other equipment. First steel cut for the first of class in November 2002. A contract for the supply of six further material

packages was signed with HDW in December 2008. Construction of this second batch is expected to start in 2010. The first boat is to be constructed by Daewoo and successor boats are likely to be built at the rate of one per year.

Structure: The Type 214 is a synthesis of the proven Type 209 design with AIP from the Type 212. South Korea is the second customer for the Type 214 after Greece. Details given are mainly for the Type 214 as advertised by HDW but changes may have been made. Diving depth 400 m.

1 + 2 SEJONG DAEWANG (KDX-3) CLASS (DDGHM)

Name	No	Builders	Laid down	Launched	Commissioned
SEJONG DAEWANG	991	Hyundai, Ulsan	12 Nov 2004	25 May 2007	22 Dec 2008
YII	992	Daewoo, Okpo	26 July 2007	14 Nov 2008	2010
—	993	Hyundai, Ulsan	2008	2011	2012

Displacement, tons: 7,650 standard, 10,290 full load
Dimensions, feet (metres): 544.3 × 68.9 × 34.4
(165.9 × 21.0 × 10.5)

Main machinery: COGAG; 4 GE LM 2500 gas turbines,
105,000 hp (78.33 MW) sustained; 2 shafts; cp props
Speed, knots: 30
Range, n miles: 5,000 at 14 kt

Missiles. SLCM: 32 Cheon Ryong land-attack missiles ①;
inertial/GPS guidance to 1,500 km (810 n miles) at
0.7 Mach; warhead 500 kg

SSM: 8 McDonnell Douglas Harpoon Block 1C ②; active
homing to 124 km (67 n miles); at 0.9 Mach; warhead
227 kg.

SAM: Mk 41 VLS, 80 cells for Standard SM-2 MR Block
IIIB ③; command/inertial guidance; semi-active radar
homing to 187 km (90 n miles) at 2.5 Mach; 2 magazines;
48 missile tubes forward, 32 aft.

1 GMLS Mk 49 RAM RIM-116 ④; 21 rounds; passive
IR/anti-radiation homing to 9.6 km (5.2 n miles) at 2 Mach;
warhead 9.1 kg

A/S: 16 Loral ASROC VLA ⑤; inertial guidance 1.6-18.6 km
(1-9 n miles).

Guns: 1 United Defence 5 in (127 mm)/54 Mk 45 Mod 4 ⑥;
20 rds/min to 23 km (12.6 n miles); anti-surface; weight
of shell 32 kg

1 Sigaaal/General Electric 30 mm 7-barrelled Goalkeeper
⑦; 4,200 rds/min to 1.5 km.

Torpedoes: 6-324 mm (2 triple) Mk 32 tubes ⑧; K745 LW
(Blue Shark); anti-submarine; active/passive homing to
11 km (5.9 n miles) at 40 kt; warhead 44 kg.

SEJONG DAEWANG

(Scale 1 : 1,500), Ian Sturton / 116/985

Combat data systems: Aegis Baseline 71.

Weapons control: To be announced

Radars: Air search/fire control: SPY 1D(V) phased arrays ⑨;
3D; F-band

Surface search: Norden/DRS SPS-67(V) ⑩; G-band.

Fire control: 3 Raytheon SPG-62 ⑪; I/J-band.

Navigation: To be announced.

Sonars: Lockheed Martin SQG-89(V); underwater combat
system with SQS-53C bow mounted; active search and
attack.

Helicopters: 2 Westland Super Lynx Mk 99 ⑫.

Programmes: The KDX-3 programme is the third phase
of a surface ship modernisation programme that
began with the KDX-1 programme in the early 1990s.

The current programme consists of three ships but a
class of six vessels is expected. Lockheed Martin was
selected on 24 July 2002 to supply the combat data
system and multifunction radar and South Korea is the
fifth nation to operate the AEGIS system. The details of
the Cheon Ryong cruise missile are speculative.

Structure: A development of the Arleigh Burke class, the
South Korean variant also incorporates the AN/SPY-1D
AEGIS system but the design has been enlarged to
accommodate additional weapon systems. The ships
have three magazines: the forward Mk 41 VLS launcher
consists of 48 cells for SM-2 missiles which may also
be launched from a 32-cell Mk 41 VLS aft. A separate,
indigenous 48-cell VLS launcher aft contains 32 Hyunmoo
land attack cruise missiles and 16 ASROC anti-submarine
missiles. There are hangar facilities for two helicopters.

YANGMANCHUN	973	Daewoo, Okpo	Aug 1997	19 Oct 1998	29 June 2000

Displacement, tons: 3,855 full load
 Dimensions, feet (metres). 444.2 x 46.6 x 13.8
 (135.4 x 14.2 x 4.2)
 Main machinery: CODOG; 2 GE LM 2500 gas turbines, 58,200 hp (43.42 MW) sustained; 2 MTU 20V 956 TB92 diesels 8,000 hp(m) (5.88 MW); 2 shafts
 Speed, knots: 30
 Range, n miles: 4,000 at 18 kt
 Complement: 170 (15 officers)

KWANGGAETO DAEWANG

(Scale 1 : 1,200), Ian Sturton / 0572485

Missiles: SSM: 8 McDonnell Douglas Harpoon Block 1C (2 quad) launchers; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.
 SAM: Raytheon Sea Sparrow; Mk 48 Mod 2 VLS launcher for 16 cells RIM-7P; semi-active radar homing to 18 km (8.5 n miles) at 2.5 Mach; warhead 38 kg.
 Guns: 1 Otobreda 5 In (127 mm)/54; 45 rds/min to 23 km (12.4 n miles); weight of shell 32 kg.
 2 Signaal 30 mm Goalkeeper; 7 barrels per mounting; 4,200 rds/min combined to 2 km
 Torpedoes: 6—324 mm (2 triple) Mk 32 tubes; Alliant Techsystems Mk 48 Mod 5; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg
 Countermeasures: Decoys. 4 CSEE Dagare Mk 2 chaff launchers; SLQ-25 Nixie towed torpedo decoy.

ESM/ECM: Argo AR 700/APECS II; intercept and jammer.
 Combat data systems: BAeSEMA/Samsung SSCS Mk 7; Litton NTDS (Link 11); SATCOM
 Radars: Air search: Raytheon SPS-49V5; C/D-band
 Surface search: Signaal MW08; G-band.
 Fire control: 2 Signaal STIR 180; I/J/K-band.
 Navigation: Daewoo DTR 92 (SPS 55M); I-band, IFF: UPX-27.
 Sonars: Atlas Elektronik DSQS-21BZ; hull-mounted active search; medium frequency
 Daewoo Telecom towed array; passive low frequency.
 Helicopters: 1 Westland Super Lynx

Programmes: Project KDX-1. A much delayed programme. The first keel was to have been laid down at Daewoo in late 1992 for completion in 1996, but definition studies extended to late 1993, when contracts started to be signed for the weapon systems. First steel cut at Daewoo Okpo in April 1994.
 Structure: Emphasis is on air defence but the design took so long to reach fulfilment that it was overtaken by the KDX-2. McTaggart Scott Trigon 5 helo handling system.
 Operational: The Goalkeepers are also used against close-in surface threats using FAPDS (Frangible Armour Penetrating Discarding Sabot).

Displacement, tons: 1,496 light; 2,180 full load (2,300 for FF 957-961)

Dimensions, feet (metres): 334.6 × 37.7 × 11.5 (102 × 11.5 × 3.5)

Main machinery: CODOG; 2 GE LM 2500 gas turbines; 53,640 hp (40 MW) sustained; 2 MTU 16V 538 TB82 diesels; 5,940 hp(m) (4.37 MW) sustained; 2 shafts, cp props

Speed, knots: 34, 18 on diesels

Range, n miles: 4,000 at 15 kt

Complement: 150 (16 officers)

Missiles: SSM: 8 McDonnell Douglas Harpoon (4 twin) launchers; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.

Guns: 2–3 in (76 mm) 62 OTO Melara compact; 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg.

8 Emerson Electric 30 mm (4 twin) (FF 951-955); 6 Breda 40 mm/70 (3 twin) (FF 956-961)

Torpedoes: 6–324 mm Mk 32 (2 triple) tubes; Honeywell Mk 46 Mod 1; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg

Depth charges: 12.

Countermeasures: Decoys: 4 Loral Hycor SRBOC 6-barrelled Mk 36 launchers; range 4 km (2.2 n miles). SLQ-25 Nixie; towed torpedo decoy.

ESM: ULQ-11K; intercept.

Combat data systems: Samsung/Ferranti WSA 423 action data automation (FF 957-961). Litton systems retrofitted to others. Link 11 in three of the class. WSC-3 SATCOM (F 957).

Weapons control: 1 Signaal Lioid optronic director (FF 951-956); 1 Radamec System 2400 optronic director (FF 957-961)

Radars: Air/surface search: Signaal DA05; E/F-band surface search: Signaal ZW06 (FF 951-956); Marconi S 1810 (FF 957-961); I-band.

Fire control: Signaal WM28 (FF 951-956); Marconi ST 1802 (FF 957-961); IJ-band.

Navigation: Raytheon SPS-10C (FF 957-961); I-band.

Tacan: SRN 15.

ULSAN

(Scale 1 : 900), Ian Sturton / 0506154

CHE JU

(Scale 1 : 900), Ian Sturton / 0506155

Sonars: Raytheon DE 1167, hull-mounted; active search and attack; medium frequency.

Modernisation: New sonars fitted. WSC-3 SATCOM fitted in *Chon Nam*.

Structure: Steel hull with aluminum alloy superstructure. There are three versions. The first five ships are the same but *Kyong Buk* has the four Emerson Electric twin 30 mm guns replaced by three Breda twin 40 mm, and the last four of the class have a built-up gun platform aft and a different combination of surface search, target indication

and navigation radars. Weapon systems integration caused earlier concern and a Ferranti combat data system has been installed in the last five, Litton Systems Link 11 fitted in three of the class.

Operational: *Che Ju* and *Chung Nam* conducted the first ever deployment of South Korean warships to Europe during a four month tour from September 1991 to January 1992. Trainees were embarked. Three of the class have a shore datalink and act as local area commanders to control attack craft carrying out coastal protection patrols.

Fire control: Signaal WM28; I/J-band.
Sonars: Signaal PHS-32, hull-mounted; active search and attack, medium frequency.

Programmes: This was the first version of the corvette series, with four being ordered in 1980, one each from the four major warship building yards.
Structure: The design was too small for the variety of different weapons which were intended to be fitted for different types of warfare and was therefore discontinued in favour of the Po Hang class.

DONG HAE (Scale 1 : 900), Ian Sturton / 0506046

KANG REUNG 10/2008*, Chris Sattler / 1353705

SHIPBORNE AIRCRAFT

Notes: A Request for Proposals for eight mine-hunting helicopters is expected in 2009.

Numbers/Type: 12/13 Westland Lynx Mk 99/Mk 99A
Operational speed: 125 kt (231 km/h)
Service ceiling: 12,000 ft (3,660 m)
Range: 320 n miles (593 km).
Role/Weapon systems: 12 Mk 99 helicopters delivered by 1991; 13 Mk 99A ordered in June 1997 and delivered in 1999/2000. Sensors: Ferranti Sea Spray Mk 3 radar and Racal ESM. Bendix AQS 18(V) dipping sonar and ASQ 504(V) MAD in ASW versions. Weapons: 4 BAe Sea Skua missiles. Mk 46 (Mod 5) torpedo (in ASW version). Sea Skua may be replaced in due course

LYNX MK 99A 10/2008*, Michael Nitz / 1353706

Numbers/Type: 5 Aerospatiale SA 316B/SA 319B Alouette III.
Operational speed: 113 kt (210 km/h).
Service ceiling: 10,500 ft (3,200 m).
Range: 290 n miles (540 km).
Role/Weapon systems: Marine support helicopter; operated by RoK Marine Corps. Sensors: None Weapons: Unarmed

ALOUETTE III 6/2008*, Anneti Collection / 1353207

Numbers/Type: 19 Sikorsky UH-60P Blackhawk.
Operational speed: 145 kt (268 km/h)
Service ceiling: 18,700 ft (5,070 m).
Range: 315 n miles (583 km).
Role/Weapon systems: Korean built variant of Sikorsky UH-60L. Naval version used for SAR and operations from Dokdo

UH-60P 10/2008*, Michael Nitz / 1353208

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Notes: (1) F-16 fighters are capable of firing Harpoon ASV missiles.
 (2) There are also 5 UH-1 utility helicopters.
 (3) Eight Lockheed P-3B Orion are to be reactivated and upgraded. KA1 and L-3 Communications selected in December 2004 to undertake the work. The contract is to be completed by 2010
 (4) Additional assault helicopters may be required to augment the UH-60P already in service.

Numbers/Type: 8 Lockheed P-3C Orion Update III.
Operational speed: 411 kt (761 km/h).
Service ceiling: 28,300 ft (8,625 m)
Range: 4,000 n miles (7,410 km).
Role/Weapon systems: Maritime patrol aircraft ordered in December 1990. First pair delivered April 1995, remainder April 1996. To be replaced by eight upgraded P-3B by 2010. The Update III version is fitted with ASQ-212 tactical computer. Sensors: APS-134 or 137(V)6 search radar; AAS-36 IR. Weapons: four Harpoon ASM.

P-3C 8/2008*, Michael Nitz / 1353210

Numbers/Type: 5 Rheims-Cosona F 406 Caravan II.
Operational speed: 229 kt (424 km/h).
Service ceiling: 30,000 ft (9,145 m).
Range: 1,153 m (2,135 km).
Role/Weapon systems: Maritime surveillance version ordered in 1997 with first one delivered in mid-1999. Sensors: APS 134 radar; Litton FLIR. Weapons: none.

F 406 8/2008*, Anneti Collection / 1353709

PATROL FORCES

1 + 8 (11) GUMDOKSURI CLASS (FAST ATTACK CRAFT) (PGGF)

Name	No	Builders	Laid down	Launched	Commissioned
YOON YOUNG-HA	711	Hanjin Heavy Industries, Pusan	2005	28 June 2007	17 Dec 2008

Displacement, tons: 440 standard; 570 full load
Dimensions, feet (metres): 205.7 x 29.5 x 16.4 (63.0 x 9.0 x 5.0)
Main machinery: CODAG: 2 GE LM 500 gas turbines; 10,900 hp (8.1 MW); 2 MTU 18V 1163 diesels; 15,880 hp (11.8 MW)
Speed, knots: 41. **Range, n miles:** 2,000 at 15 kt
Complement: 40
Missiles: SSM 4 Harpoon (2 twin).
Guns: 1—3 in (76 mm). 1—40 mm.
Radars: Air/surface search: Thales MW 08; G-band
Fire control: Saab Cerros 200, J-band
Navigation: I-band.

Comment: A new class of patrol craft to replace Sea Dolphin class. Following construction of the first of class by Hanjin, hulls 2-5 are to be built by STX Shipbuilding, Jinhae, and hulls 6-9 by Hanjin. A class of 20 is projected.

YOON YOUNG-HA 10/2008*, Michael Nitz / 1353214

81 SEA DOLPHIN/WILDCAT CLASS
(FAST ATTACK CRAFT—PATROL) (PBF/PTF)

PKM 212-375 series

Displacement, tons: 148 full load
Dimensions, feet (metres): 121.4 × 22.6 × 5.6 (37 × 6.9 × 1.7)
Main machinery: 2 MTU MD 16V 538 TB90 diesels; 6,000 hp(m) (4.41 MW) sustained; 2 shafts
Speed, knots: 37
Range, n miles: 600 at 20 kt
Complement: 31 (5 officers)
Guns: 2 Emerson Electric 30 mm (twin) or USN 3 in (76 mm)/50 or Bofors 40 mm/60, 2 GE/GD 20 mm Sea Vulcan Gatlings (in most), 2—12.7 mm MGs. Rocket launchers in lieu of after Gatling in some.
Weapons control: Optical director.
Radars: Surface search: Raytheon 1645; I-band.

Comment: Fifty-four Sea Dolphins built by Korea SEC, and 47 Wildcats by Korea Tacoma. First laid down 1978. The class has some gun armament variations and some minor superstructure changes in later ships. These craft form the basis of the coastal patrol effort against incursions by North Korean amphibious units. Five sold to the Philippines in 1985, two transferred to Bangladesh in 2000 and a further two in 2004. Some deleted so far, others are in reserve.

SEA DOLPHIN 281 10/2008*, Guy Toremans / 1353217

SEA DOLPHIN 296 10/2008*, Guy Toremans / 1353211

SEA DOLPHIN 362 10/2008*, Michael Nitz / 1353213

AMPHIBIOUS FORCES

Notes: The LST-2 programme is for four 4,500 ton LSTs to replace the ageing 512-1152 class ships and to augment the Alligator class.

10 LCM 8 CLASS (LCM)

Displacement, tons: 115 full load
Dimensions, feet (metres): 74.5 × 21 × 4.6 (22.7 × 6.4 × 1.4)
Main machinery: 4 GM 6-71 diesels; 696 hp (519 kW) sustained; 2 shafts
Speed, knots: 11
Complement: 11
Military lift: 55 tons

Comment: Previously US Army craft. Transferred in September 1978

LCM 87 10/2008*, Michael Nitz / 1353219

4 ALLIGATOR CLASS (LSTH)

Name	No	Builders	Launched	Commissioned
KOJOON BONG	681	Korea Tacoma, Masan	Sep 1992	June 1993
BIRO BONG	682	Korea Tacoma, Masan	Dec 1996	Nov 1997
HYANGRO BONG	683	Korea Tacoma, Masan	Oct 1998	Aug 1999
SEONGIN BONG	685	Korea Tacoma, Masan	Feb 1999	Nov 1999

Displacement, tons: 1,900 standard; 4,278 full load
Dimensions, feet (metres): 369.1 × 50.2 × 9.8 (112.5 × 15.3 × 3)
Main machinery: 2 SEMT-Pielstick 16 PA6 V 280; 12,800 hp(m) (9.41 MW) sustained; 2 shafts; cp props
Speed, knots: 16
Range, n miles: 4,500 at 12 kt
Complement: 169
Military lift: 200 troops; 15 MBT; 6—3 ton vehicles; 4 LCVPs
Guns: 2 Breda 40 mm/70 (LST 663, 685), 2—30 mm (1 twin) (LST 681), 2 Vulcan 20 mm Gatlings.
Countermeasures: Decoys: 1 RBOC chaff launcher.
ESM: radar intercept
Weapons control: Selonia NA 18. Optronic director. Daeyoung WCS-86.
Radars: Surface search: Raytheon SPS 64, E/F-band.
Navigation: Raytheon SPS 64; I-band
Tacan: SRN 15.
Helicopters: Platform for 1 UH-60A.

Comment: First one ordered in June 1990 from Korea Tacoma, Masan but delayed by financial problems. Korea Tacoma became Hanjin Heavy Industries. Design improvements include stern ramp for underway launching of LVTs, helicopter deck, and a lengthened bow ramp. There are unlikely to be further orders.

KOJOON BONG 10/2008*, Michael Nitz / 1353217

HYANGRO BONG 10/2008*, Michael Nitz / 1353218

2 LST 512-1152 CLASS (LST)

Name	No	Builders	Commissioned
SU YONG (ex-Kana County LST 853)	677	Chicago Bridge	11 Dec 1945
BUK HAN (ex-Lynn County LST 900)	678	Dravo, Pittsburg	28 Dec 1944

Displacement, tons: 1,653 standard; 2,366 beaching; 4,080 full load
Dimensions, feet (metres): 328 × 50 × 14 (screws) (100 × 15.2 × 4.3)
Main machinery: 2 GM 12-567A diesels, 1,800 hp (1.34 MW); 2 shafts
Speed, knots: 10
Complement: 80
Military lift: 2,100 tons including 20 tanks and 2 LCVPs
Guns: 8 Bofors 40 mm (2 twin, 4 single) 2 Oerlikon 20 mm

Comment: Former US Navy tank landing ships. Transferred to South Korea between 1955 and 1959. All purchased 15 November 1974. Planned to be replaced by the Alligator class but two reported as still in service.

BUK HAN 10/1997 008165

1 + (2) AMPHIBIOUS TRANSPORT DOCK (LPD)

Name	No	Builders	Laid down	Launched	Commissioned
DOKDO	6111	Hanjin Heavy Industries, Pusan	2003	12 July 2005	3 July 2007

Displacement, tons: 13,000 standard; 19,000 full load
 Dimensions, feet (metres): 656.3 × 105.0 × 21.33
 (200.0 × 32.0 × 6.5)
 Main machinery: CODAD: 4 SEMT Pielstick 16PC 2.5
 STC diesels; 41,615 hp(m) (30.6 MW) sustained;
 2 shafts
 Speed, knots: 22
 Complement: 400 ship plus 700
 Military lift: 700 troops, 10 tanks and two air-cushion
 landing craft
 Missiles: 1 Raytheon Mk 49 launcher RAM 116 ☉; 21 rds;
 passive IR/anti-radiation homing to 9.6 km (5.2 n miles)
 at 2.5 Mach; warhead 9.1 kg.
 Guns: 2 TNNL Goalkeeper ☉ 30 mm; 4,200 rds/min to
 1.5 km.
 Combat data systems: Based on Tactics.

DOKDO

(Scale 1 : 2,400), Ian Sturton / 118668/

Radars: Air search Thales SMART L ☉; 3D; D-band.
 Surface search: Signal MW 08 ☉; G-band.
 Navigation: To be announced.
 CCA: Galileo Avionica SPN-720, I-band.

Helicopters: 10 UH-60.

Programmes: The contract for an amphibious assault ship
 was placed with Hanjin Heavy Industries on 28 October
 2002. An order for a second ship, possibly to be called
Marado, is expected in 2008 and a third ship is also
 under consideration.

Structure: The design includes a well dock.

3TSAPLYA (MURENA E) (PROJECT 12061) CLASS (ACV)

621-623

Displacement, tons: 108 standard; 150 full load
Dimensions, feet (metres): 102.7 x 48.5 x 4.9 (31.3 x 14.8 x 1.5)
Main machinery: 2 PR-77 gas turbines for lift and propulsion; 8,000 hp (5.88 MW)
Speed, knots: 50
Range, n miles: 500 at 50 kt
Complement: 11 (3 officers) + 100 troops
Guns: 2—30 mm AK 306M, 2—30 mm grenade launchers, 2—12.7 mm MGs.

Comment: Ordered on 5 August 2002. Designed by Almaz, all built at Khabarovsk. First laid down on 26 April 2004 and delivered to Inchon on 11 November 2005. The second and third delivered in November and December 2006 respectively. Capable of carrying one medium tank or 130 troops.

TSAPLYA 621

6/2006 / 1104/05

MISCELLANEOUS LANDING CRAFT

Comment: A considerable number of US LCVF type built of GRP in South Korea. In addition there were plans to build up to 20 small hovercraft for special forces; first two reported building in 1994, and one seen on sea trials in May 1995. Also 56 combat support boats of 8 m were ordered from FBM Marina for assembly by Hanjin Heavy Industries.

HOVERCRAFT

5/1995, David Jordan / 0081167

2 LSF-II LANDING CRAFT AIR CUSHION (LCAC)

631-632

Displacement, tons: 100 standard; 155 full load
Dimensions, feet (metres): 88.0 (on cushion) x 47.0 (on cushion) (26.8 x 14.3)
Main machinery: 4 Vericor Power Systems ETF40B gas turbines for propulsion and lift; 15,800 hp (11.8 MW); 2 shrouded reversible-pitch airscrews (propulsion), 4 double-entry centrifugal fans (lift)
Speed, knots: 40
Range, n miles: 300 at 35 kt
Complement: 5
Military lift: 23 troops; 1 main battle tank or 55 tons
Guns: 1—20 mm
Radars: To be announced

Comment: LSF II is a high-speed air-cushion craft of aluminium construction developed and manufactured by Hanjin Heavy Industries for operations in conjunction with the LPD *Dokdo*. The design appears to be based on the US Navy's LCAC design. Both delivered in mid-2007.

LCAC 632

10/2008*, Michael Nitz / 1353270

MINE WARFARE FORCES

6 SWALLOW CLASS (MINEHUNTERS) (MHSC)

Name	No	Builders	Commissioned
KANG KYEONG	561	Kangnam Corporation	Dec 1996
KANG JIN	562	Kangnam Corporation	May 1991
KO RYEONG	563	Kangnam Corporation	Nov 1991
KIM PO	565	Kangnam Corporation	Apr 1993
KO CHANG	566	Kangnam Corporation	Oct 1993
KUM WHA	567	Kangnam Corporation	Apr 1994

Displacement, tons: 470 standard, 520 full load
Dimensions, feet (metres): 164 x 27.2 x 8.6 (50 x 8.3 x 2.6)
Main machinery: 2 MTU diesels; 2,040 hp(m) (1.5 MW) sustained; 2 Voith-Schneider props; bow thruster; 102 hp(m) (75 kW)
Speed, knots: 15
Range, n miles: 2,000 at 10 kt
Complement: 44 (5 officers) plus 4 divers
Guns: 1 Oerlikon 20 mm, 2—7.62 mm MGs
Countermeasures: MCM: 2 Gaymarine Pluto remote-control submersibles (possibly to be replaced by Double Eagle)
Combat data systems: Racal MAINS 500
Radars: Navigation: Raytheon SPS 64, I-band
Sonars: GEC-Marconi 193M Mod 1 or Mod 3; minehunting; high frequency.

Comment: Built to a design developed independently by Kangnam Corporation but similar to the Italian Lerici class. GRP hull. Single sweep gear deployed at 8 kt. Decca/Racal plotting system. First delivered at the end of 1986 for trials. Two more with some modifications ordered in 1988, three more in 1990

KANG KYEONG

10/2008*, Michael Nitz / 1353271

1 WON SAN CLASS (MINELAYER) (MLH)

Name	No	Builders	Launched	Commissioned
WON SAN	560	Hyundai, Ulsan	Sep 1996	Sep 1997

Displacement, tons: 3,300 full load
Dimensions, feet (metres): 340.6 x 49.2 x 11.2 (103.8 x 15 x 3.4)
Main machinery: CODAD; 4 SEMT-Prestick 12 PA6 diesels; 17,200 hp(m) (12.64 MW); 2 shafts
Speed, knots: 22
Range, n miles: 4,500 at 15 kt
Complement: 160
Guns: 1 OTO Melara 3 in (76 mm)/62; 85 rds/min to 16 km (8.6 n miles); weight of shell 6 kg, 2 Breda 40 mm/70
Torpedoes: 6—324 mm Mk 32 (2 triple) launchers.
Mines: 2 stern launchers. Up to 300
Countermeasures: Decoys; 2 chaff launchers. ESM/ECM
Weapons control: Radamec optronic director.
Radars: Air/surface search, E/F-band
Fire control: Marconi 1802; I/J-band
Navigation: I-band.
Sonars: Bow-mounted, active search and attack, medium frequency
Helicopters: Platform only

Comment: Project design contract ordered October 1991 and completed July 1993 by Hyundai. Order to build given in October 1994.

WON SAN

3/2004, Chris Sattler / 1042330

3 YANG YANG CLASS (MSC/MHC)

Name	No	Builders	Commissioned
YANG YANG	571	Kangnam Corporation	Dec 1999
ONGJIN	572	Kangnam Corporation	Feb 2004
HAE NAM	573	Kangnam Corporation	Mar 2005

Displacement, tons: 880 full load
Dimensions, feet (metres): 195 x 34.4 x 9.8 (59.4 x 10.5 x 3.0)
Main machinery: 2 MTU diesels, 4,000 hp(m) (2.98 MW) sustained; 2 Voith-Schneider props; bow thruster; 134 hp(m) (100 kW)
Speed, knots: 15
Range, n miles: 3,000 at 12 kt
Complement: 56 (7 officers) plus 5 divers

Guns: 1—20 mm Sea Vulcan Gatling, 2—7.62 mm MGs.
Countermeasures: MCM. BAE Systems deep mechanical and combined influence sweep system, 2 Gayrobot Pluto GIGAS ROVs.
Combat data systems: Thomson Marconi TSM 2061 Mk 3.
Radars: Navigation: Raytheon; I-band.
Sonars: Thomson Marconi Type 2093 VDS; minehunting, active multifrequency.

Comment: The first one ordered in late 1995 and a second pair delivered by 2005. Further orders are possible. A large version of the Swallow class built to a design developed by Kangnam Corporation. GRP hull. The integrated navigation and dynamic positioning system developed by Kongsberg Simrad.

ONGJIN 10/2008*, Michael Nitz / 1353222

SURVEY SHIPS

18 SURVEY SHIPS (AGOR)

PUSAN 801	PUSAN 806	201-204
PUSAN 802	PUSAN 810	208-209
PUSAN 803	CH'UNGNAM 821	215-217
PUSAN 805	KANGWON 831	220

Comment: All ships are painted white with a distinctive yellow coloured crest on the funnel. Most were commissioned in the 1980s. The Hydrographic Service is responsible to the Ministry of Transport.

201 10/2008*, Guy Toremans / 1353224

RESCUE VEHICLES

1 RESCUE SUBMERSIBLE

DSRV II

Displacement, tons: 26
Dimensions, feet (metres): 31.5 x 8.9 x 12.5 (9.6 x 2.7 x 3.8)
Main machinery: 2 electric motors; 26.8 hp (20 kW); 4 tiltable side thrusters; 18 hp (12 kW)
Speed, knots: 3
Complement: 2 pilots and 1 rescue chamber operator

Comment: James Fisher Defence Limited announced on 13 December 2006 that it had been awarded a contract to deliver a new Submarine Rescue Vehicle (SRV) to the Republic of Korea Navy. It was delivered in November 2008. The new submarine rescue vehicle, DSAR-5, is based on the LR5/DSAR-1, in-service with the Royal Navy until replaced in 2008. Lithium based battery technology enables the underwater endurance to be increased significantly over conventional lead-acid based systems. DSAR-5 has two compartments. The forward compartment houses the pilot and co-pilot while the aft compartment carries the RCO and up to 16 rescues. Capable of operating at a depth of 500 m in currents of up to 3 kt, rescues may be transferred under pressure to the medical and decompression facilities onboard the submarine rescue mothership *Cheong-Hae-Jin*.

AUXILIARIES

Notes: The South Korean Navy also operates nine small harbour tugs (designated YTLs). These include one ex-US Navy craft and five ex-US Army craft. There are also approximately 35 small service craft in addition to the YO-type tankers listed and the harbour tugs. These craft include open lighters, floating cranes, diving tenders, dredgers, ferries, non self-propelled fuel barges, pontoon barges, and sludge removal barges; most are former US Navy craft.

1 CHEONG HAE JIN CLASS (ARS)

Name	No	Builders	Launched	Commissioned
CHEONG HAE JIN	21	Daewoo, Okpo	Oct 1995	30 Nov 1996

Displacement, tons: 4,300 full load
Dimensions, feet (metres): 337.3 x 53.8 x 15.1 (102.8 x 16.4 x 4.6)
Main machinery: Diesel-electric; 4 MAN Burmeister & Wain 16V 28/32 diesels, 11,800 hp(m) (8.67 MW); 2 motors, 5,440 hp(m) (4 MW); 2 shafts; cp props; 3 bow and 2 stern thrusters
Speed, knots: 18
Range, n miles: 9,500 at 15 kt
Complement: 130
Guns: 1 GE/GD 20 mm Vulcan Gatling (can be fitted), 6—12.7 mm MGs.
Radars: Navigation: I-band.
Sonars: Hull-mounted, active search; high frequency.
Helicopters: Platform for 1 light.

Comment: Ordered in 1992. Laid down December 1994. A multipurpose salvage and submarine rescue ship which can carry DSRV II as well as two LCVPs on davits plus a diving bell for nine men and a decompression chamber. Two large hydraulic cranes fore and aft and one towing winch. There are also two salvage ships which belong to the Coast Guard.

CHEONG HAE JIN 9/2003, Hartmut Ehlers / 0570936

2 EDENTON CLASS (SALVAGE SHIPS) (ATS)

Name	No	Builders	Commissioned
PYONGTAEK (ex-Beaufort)	27	Brooke Marine, Lowestoft	22 Jan 1972
KWANG YANG (ex-Brunswick)	28	Brooke Marine, Lowestoft	19 Dec 1972

Displacement, tons: 2,929 full load
Dimensions, feet (metres): 282.6 x 50 x 15.1 (86.1 x 15.2 x 4.6)
Main machinery: 4 Paxman 12YJCM diesels; 6,000 hp (4.48 MW) sustained; 2 shafts, cp props; bow thruster
Speed, knots: 16. **Range, n miles:** 10,000 at 13 kt
Complement: 129 (7 officers)
Guns: 2 Oerlikon 20 mm Mk 68
Radars: Navigation: Sperry SPS-53; I/J-band

Comment: Transferred from USA on 29 August 1996. Capable of (1) ocean towing, (2) supporting diver operations to depths of 850 ft, (3) lifting submerged objects weighing as much as 600,000 lb from a depth of 120 ft by static tidal lift or 30,000 lb by dynamic lift, (4) fighting ship fires. Fitted with 10 ton capacity crane forward and 20 ton capacity crane aft. Both recommissioned 28 February 1997.

PYONGTAEK (US colours) 12/1995, Giorgio Arra / 0506303

3 CHUN JEE CLASS (LOGISTIC SUPPORT SHIPS) (AORH)

Name	No	Builders	Launched	Commissioned
CHUN JEE	57	Hyundai, Ulsan	May 1990	Dec 1990
DAE CHUNG	58	Hyundai, Ulsan	Jan 1997	1 Dec 1997
HWA CHUN	59	Hyundai, Ulsan	July 1997	Mar 1998

Displacement, tons: 4,180 standard; 9,180 full load
Dimensions, feet (metres): 426.5 × 56.4 × 21.3 (130 × 17.8 × 6.5)
Main machinery: 2 SEMT-Pielstick 16 PA6 V 280 (AO 57) or 12 PC2.5 diesels; 12,800 hp(m) (9.4 MW) sustained; 2 shafts
Speed, knots: 20 **Range, n miles:** 4,500 at 15 kt
Cargo capacity: 4,200 tons liquids, 450 tons solids
Guns: 4 Emerlec 30 mm (2 twin) or 2 Breda 40 mm/70. 2 GE/GD 20 mm Vulcan Gatlings.
Radars: Navigation: 2 Racal Decca; I-band.
Helicopters: Platform for 1 medium.

Comment: *Chun Jee* laid down September 1989. Underway replenishment stations on both sides. Helicopter for Vertrep but no hangar. There are three 6 ton lifts. Possibly based on Italian Stromboli class. Second of class was to have followed on but was eventually ordered together with the third in May 1995, to a slightly different design. More may be built when funds are available.

1 TRIALS SUPPORT SHIP (AGE)

Name	No	Builders	Launched	Commissioned
SUNJIN	AGS 11	Hyundai, Ulsan	Nov 1992	Apr 1993

Displacement, tons: 320 full load
Dimensions, feet (metres): 113.2 × 49.2 × 12.1 (34.5 × 15 × 3.7)
Main machinery: 1 MTU 16V 396 TE74L diesel; 2,680 hpl(m) (2 MW); 1 shaft, cp prop; 2 bow thrusters
Speed, knots: 21 **Range, n miles:** 600 at 16 kt
Complement: 5 plus 20 scientists
Guns: 1—20 mm Gatling
Radars: Navigation: I-band.

Comment: Experimental design built by Hyundai. Ordered June 1991, laid down June 1992. Aluminium SWATH hull with dynamic positioning system. Fitted with various trials equipment including an integrated navigation system and torpedo tracking pingor system VDS and towed arrays. Used by the Defence Development Agency and civilian operated.

SUNJIN

1993, Hyundai / 0081169

TUGS

Notes: In addition to the Edenton class ATS there are a further 10 harbour tugs and numerous port service auxiliaries.

HARBOUR TUG

10/2008*, Guy Toremans / 135322b

COAST GUARD

Notes: (1) The Republic of Korea Coast Guard was originally established as the Maritime Safety Division on 12 December 1953. After becoming the Maritime Police Unit in 1962, it separated from the national police in 1998 and changed its name to the Coast Guard in December 2000. It is responsible for Maritime Security (including maritime counter-terrorism), Search and Rescue, Marine Environmental Protection, Marine Pollution Response and Maritime Safety. With its Headquarters at Songdo, Incheon, it has four regional headquarters at Incheon, Mokpo, Busan and Daenghae. There are 13 coast guard stations at Songdo, Daenghae, Pohang, Ulsan, Busan, Tongyeong, Yeosu, Wando, Cheju, Mokpo, Gunsan, Taean and Incheon. Patrol ships and craft are painted with blue hulls and white superstructure, the word "Police" is painted on the side of the superstructure. Larger salvage ships are painted white with the word "Police" and a red-yellow-blue diagonal stripe on the side of the hull. The Police Coast Guard academy was established in 2004.

(2) Aviation assets include a Bombardier Challenger 604 maritime surveillance aircraft, Kamov Ka-27 Helix and Bell 412 SAR helicopters, and AS 565 MB helicopters.

3 MAZINGER CLASS (PSO)

PC 1001–1003

Displacement, tons: 1,200 full load
Dimensions, feet (metres): 264.1 × 32.2 × 11.5 (80.5 × 9.6 × 3.2)
Main machinery: 2 SEMT-Pielstick 12 PA6 V 280 diesels; 9,600 hp(m) (7.08 MW) sustained; 2 shafts
Speed, knots: 22
Range, n miles: 7,000 at 18 kt
Complement: 69 (11 officers)
Guns: 1 Bofors 40 mm/70. 4 Cerlikon 20 mm (2 twin).
Radars: Surface search: Raytheon; I-band

Comment: Ordered 7 November 1980 from Korea Tacoma and Hyundai. *PC 1001* delivered 29 November 1981. *PC 1002* 31 August 1982 and *PC 1003* on 31 August 1983. All-welded mild steel construction. Used for offshore surveillance and general coast guard duties. *PC 1001* is the Coast Guard Command ship. Only three of this class were completed.

MAZINGER (old colours)

1987, Korea Tacoma / 0506048

1 HAN KANG CLASS (PG)

HAN KANG PC 1005

Displacement, tons: 1,180 full load
Dimensions, feet (metres): 289.7 × 32.8 × 9.5 (88.3 × 10 × 2.9)
Main machinery: CODOG; 1 GE LM 2500 gas turbine; 26,820 hp (20 MW) sustained; 2 MTU 12V 956 TB82 diesels; 6,260 hp(m) (4.6 MW) sustained; 3 shafts
Speed, knots: 32
Range, n miles: 4,000 at 15 kt
Complement: 72 (11 officers)
Guns: 1 OTO Melara 76/62 compact. 1 Bofors 40 mm/70. 2 GE/GD 20 mm Vulcan Gatlings.
Weapons control: Signal L10D optronic director
Radars: Surface search: Raytheon SPS-64(V); I-band.
Fire control: Signal WM28; I/J-band

Comment: Built between May 1984 and December 1985 by Daewoo. Same hull as Po Kang class but much more lightly armed. Only one of the class was completed.

HAN KANG

9/2000 / 0097740

6 430 TON CLASS (PBO)

300-303 402-403

Displacement, tons: 430 full load
 Dimensions, feet (metres): 176.2 × 24.3 × 7.9 (53.7 × 7.4 × 2.4)
 Main machinery: 2 MTU 16V 396 TB83 diesels; 1,990 hp(m) (1.49 MW); 2 shafts; cp props
 Speed, knots: 19
 Range, n miles: 2,100 at 17 kt
 Complement: 14
 Guns: 1 or 2 GD/GE 20 mm Vulcan Gatlings. 4–12.7 mm MGs.
 Radars: Surface search; Raytheon, I-band.

Comment: All built between 1990 and 1995 by Hyundai except 301 which was built by Daewoo. Multipurpose patrol ships.

300 3/1996, D Swetnam / 0081177

301 8/2000, van Ginderen Collection / 0087741

23 SEA WOLF/SHARK CLASS (PBO)207 255-259 265-269 276-277
251-253 261-263 271-273

Displacement, tons: 310 full load
 Dimensions, feet (metres): 158.1 × 23.3 × 8.2 (48.2 × 7.1 × 2.5)
 Main machinery: 2 diesels, 7,320 hp(m) (5.38 MW); 2 shafts
 Speed, knots: 25. Range, n miles: 2,400 at 15 kt
 Complement: 35 (3 officers)
 Guns: 4 Oerlikon 20 mm (2 twin or 1 twin, 2 single). Some have a twin Bofors 40 mm/70 vice the twin Oerlikon, 2 Browning 12.7 mm MGs.
 Radars: Surface search; I-band.

Comment: First four ordered in 1979-80 from Korea SEC (Sea Shark), Hyundai and Korea Tacoma (Sea Wolf) Programme terminated in 1988. Pennant numbers in 200 series up to 277.

SEA WOLF 207 5/1997, van Ginderen Collection / 0017111

4 BUKHANSAN CLASS (PBO)

BUKHANSAN 278 CHULMASAN 279 P 281 P 282

Displacement, tons: 380 full load
 Dimensions, feet (metres): 174.2 × 24 × 7.2 (53.1 × 7.3 × 2.2)
 Main machinery: 2 MTU diesels; 8,300 hp(m) (6.1 MW) sustained; 2 shafts
 Speed, knots: 28. Range, n miles: 2,500 at 15 kt
 Complement: 35 (3 officers)
 Guns: 1 Breda 40 mm/70, 1 GE/GD 20 mm Vulcan Gatling, 2–12.7 mm MGs.
 Weapons control: Radamec optronic director
 Radars: Surface search; I-band.

Comment: Follow on to Sea Wolf class developed by Hyundai in 1987. Ordered in 1988 from Hyundai and Daewoo respectively. First pair in service in 1989, and second pair in 1990.

CHULMASAN (old colours) 1989, Daewoo / 0506049

5 HYUNDAI TYPE (PB)

105 113 118 121 125

Displacement, tons: 110 full load
 Dimensions, feet (metres): 105.6 × 19.7 × 4.6 (32.2 × 6 × 1.4)
 Main machinery: 2 diesels; 2 shafts
 Speed, knots: 25
 Complement: 19
 Guns: 1 Rheinmetall 20 mm, 2–12.7 mm MGs.
 Radars: Surface search; Furuno; I-band.

Comment: Ordered in 1996 and delivered from June 1997.

HYUNDAI 125 6/2008, Harald Carstens / 1353227

1 SALVAGE SHIP (ARSH)

Name	No	Builders	Launched	Commissioned
TAE PUNG YANG I	3001	Hyundai, Ulsan	Oct 1991	18 Feb 1993

Displacement, tons: 3,200 standard, 4,300 full load
 Dimensions, feet (metres): 343.5 × 49.2 × 17 (104.7 × 15 × 5.2)
 Main machinery: 4 Ssangyong MAN Burmeister & Wain 16V 28/32 diesels; 4,800 hp(m) (3.53 MW); 2 shafts; cp props; bow and stern thrusters
 Speed, knots: 21
 Range, n miles: 8,500 at 15 kt
 Complement: 121
 Guns: 1 GD/GE 20 mm Vulcan Gatling, 6 12.7 mm MGs.
 Radars: Navigation; I-band.
 Helicopters: 1 light

Comment: Laid down February 1991. Has a helicopter deck and hanger, an ROV capable of diving to 300 m and a firefighting capability. Dynamic positioning system. Can be used for cable laying. Operates for the Marine Police.

TAE PUNG YANG I 10/2008, Guy Toremans / 1353278

1 SALVAGE SHIP (ARSH)

Name	No	Builders	Commissioned
JAEMIN I	1501	Daewoo, Okpo	28 Dec 1992

Displacement, tons: 2,072 full load
 Dimensions, feet (metres): 254.6 × 44.3 × 13.8 (77.6 × 13.5 × 4.2)
 Main machinery: 2 MTU diesels; 8,000 hp(m) (5.88 MW); 2 shafts, cp props
 Speed, knots: 18
 Range, n miles: 4,500 at 12 kt
 Complement: 92
 Guns: 1 GD/GE 20 mm Vulcan Gatling.
 Radars: Navigation; I-band.

Comment: Ordered in 1990. Fitted with diving equipment and has a four point mooring system. Carries two LCVPs.

JAEMIN I 8/2000 / 0091745

474 Korea, South/Coast guard

1 SALVAGE SHIP (ARS)

Name	No	Builders	Launched	Commissioned
JAEMIN II	1502	Hyundai, Ulsan	15 July 1995	Apr 1996

Displacement, tons: 2,500 full load
Dimensions, feet (metres): 288.7 × 47.6 × 15.1 (88 × 14.5 × 4.6)
Main machinery: 2 MTU diesels; 12,662 hp(m) (9.31 MW); 2 shafts; Kamewa cp props; bow and stern thrusters
Speed, knots: 20
Range, n miles: 4,500 at 15 kt
Complement: 81
Guns: 1 GE/GD 20 mm Vulcan Gatling.
Radars: Navigation. I-band

Comment: Ordered in December 1993 for Maritime Police. A general purpose salvage ship capable of towing, firefighting, supply or patrol duties.

JAEMIN II 8/1999, *Ships of the World* / 0081176

1 SALVAGE SHIP (ARSH)

Name	No	Builders	Commissioned
JAEMIN III	1503	Hyundai, Ulsan	Nov 1998

Displacement, tons: 4,200 full load
Dimensions, feet (metres): 362.6 × 50.5 × 16 (110.5 × 15.4 × 4.9)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 18
Complement: 120
Guns: 2 GE 20 mm Vulcan Gatlings. 8—12.7 mm MGs.
Radars: Navigation: I-band.

Comment: Ordered in 1996, from Hyundai, Ulsan. Large helicopter deck but no hangar.

JAEMIN III 10/2008*, *Guy Toremans* / 1353229

1 DAEWOOTYPE (PSO)

SUMJINKANG PC 1006

Displacement, tons: 1,650 full load
Dimensions, feet (metres): 275.6 × 34.1 × 11.8 (84 × 10.4 × 3.6)
Main machinery: 2 Wärtsilä Nohab 16V25 diesels; 10,000 hp(m) (735 MW) sustained; 2 shafts
Speed, knots: 21
Range, n miles: 4,500 at 18 kt
Complement: 57 (7 officers)
Guns: 1—20 mm Sea Vulcan Gatling. 4—12.7 mm MGs.
Radars: Surface search I-band

Comment: Ordered in 1997 from Daewoo. Described as a multipurpose patrol ship. Launched 22 January 1999, and delivered 20 June 1999.

SUMJINKANG 6/2006, *Korea Coast Guard* / 1159985

6 SEA DRAGON/WHALE CLASS (PBO)

PC 501-503	PC 505-507
------------	------------

Displacement, tons: 640 full load
Dimensions, feet (metres): 199.5 × 26.2 × 8.9 (60.8 × 8 × 2.7)
Main machinery: 2 SEMT-Pielstick 12 PAG V 280 diesels; 9,600 hp(m) (708 MW) sustained; 2 shafts
Speed, knots: 24
Range, n miles: 6,000 at 15 kt
Complement: 40 (7 officers)
Guns: 1 Sofors 40 mm/60. 2 Derlikon 20 mm. 2 Browning 12.7 mm MGs.
Radars: Navigation. Two sets.

Comment: Delivered 1978-1982 by Hyundai, Korea and Korea Tacoma. Fitted with SATNAV. Welded steel hull. Armament varies between ships, one 76 mm gun can be mounted on the forecastle. Variant of this class built for Bangladesh and delivered in October 1997.

SEA DRAGON 502 6/2006, *Korea Coast Guard* / 1158987

INSHORE PATROL CRAFT (PBR)

Displacement, tons: 47 full load
Dimensions, feet (metres): 69.9 × 17.7 × 4.5 (21.3 × 5.4 × 1.4)
Main machinery: 2 diesels; 1,800 hp(m) (1.32 MW); 2 shafts
Speed, knots: 22
Range, n miles: 400 at 12 kt
Complement: 11
Guns: 1 Rheinmetall 20 mm. 3—12.7 mm MGs.
Radars: Surface search. Furuno; I-band

Comment: Details are for the largest design of patrol craft. There are numbers of this type of vessel used for inshore patrol work. All Police craft have P pennant numbers. Armaments vary.

P 01 10/2008*, *Michael Nitz* / 1353740

P 135 10/2008*, *Guy Toremans* / 1353231

1 + (1) SAMBONGHO CLASS (PATROL SHIP) (PSO)

Name	No	Builders	Commissioned
SAMBONGHO	5001	Hyundai, Ulsan	23 Apr 2002

Displacement, tons: 5,000 (approx) full load
Dimensions, feet (metres): To be announced
Main machinery: To be announced
Speed, knots: To be announced
Guns: 2—20 mm
Radars: Navigation. I-band
Helicopters: 1 large.

Comment: The largest ship in the Coast Guard. A second ship may be under construction.

SAMBONGHO 6/2006, *Korea Coast Guard* / 1159986

1 SALVAGE SHIP (ARSH)

Name	No	Builders	Commissioned
TAE PUNG YANG II	3002	Hyundai, Ulsan	31 Oct 1988

Displacement, tons: 3,900 standard
 Dimensions, feet (metres): 362.5 × 50.5 × 16.1 (110.5 × 15.4 × 4.9)
 Main machinery: 2 diesels; 2 shafts
 Speed, knots: 18
 Complement: 120
 Guns: 2—20 mm Vulcan Gatlings, 6—12.7 mm MGs.
 Radars: Surface search, I-band
 Helicopters: Platform for 1 large

Comment: Ordered from Hyundai in mid-1996. Also used for SAR operations.

TAE PUNG YANG II 6/2006, Korea Coast Guard / 1159984

3 SALVAGE SHIPS (ARSH)

Name	No	Builders	Commissioned
TAE PUNG YANG VI	3006		
TAE PUNG YANG VII	3007	Hanjin Heavy Industries, Pusan	28 Aug 2006
TAE PUNG YANG VIII	3009		

Displacement, tons: 4,000 (approx) full load
 Dimensions, feet (metres): 362.5 × 50.5 × 16.1 (110.5 × 15.4 × 4.9)
 Main machinery: 2 SEMT Pielstick 12PA6B STC diesels; 2 shafts
 Speed, knots: 21
 Range, n miles: 4,500 at 15 kt
 Complement: 120
 Guns: 1 20 mm 2 12.7 mm MGs
 Radars: Navigation, I-band.
 Helicopters: Platform for 1 large.

Comment: Three new multipurpose EEZ patrol and salvage ships believed to be of the same class. Details are based on those of *Tae Pung Yang II* and may be different.

TAE PUNG YANG VI 10/2006, Guy Toremans / 1353232

2 SALVAGE SHIPS (ARSH)

Name	No	Builders	Commissioned
JAEMIN VII	1507	Hanjin Heavy Industries, Pusan	
JAEMIN VIII	1508	Hyundai, Ulsan	20 Oct 2005

Displacement, tons: 2,728 full load
 Dimensions, feet (metres): 320.5 × 45.9 × 14.1 (97.7 × 14.0 × 4.3)
 Main machinery: 2 diesels; 2 shafts
 Speed, knots: To be announced
 Range, n miles: 4,500 at 15 kt
 Guns: 1—20 mm, 2—12.7 mm MGs.
 Radars: Navigation: I-band.

Comment: Two new salvage ships reported to be of the same class. Details are those published for *Jaemin VII*.

JAEMIN VII 6/2006, Korea Coast Guard / 1159983

Kuwait

**Country Overview**

Formerly a British protectorate, the Kingdom of Kuwait gained independence in 1961. Situated on the northwestern coast of the Gulf, it is bordered to the north by Iraq and to the south by Saudi Arabia. The country's total area, including the islands of Bubiyan, Warbah, and Faylakah, is 6,880 square miles. It has a 269 n mile coastline with the Gulf. The capital, largest city and principal port is Kuwait City. The country was annexed by Iraq from August 1990 to February 1991 when the country was liberated. Territorial seas (12 n miles) are claimed. An EEZ has not been claimed.

Headquarters Appointments

Commander of the Navy:
 Major General Ahmed Youssef Al Mulla
 Deputy Commander of the Navy:
 Brigadier Marzouk Hassan al Bader

Personnel

2009: 2,700 (including 500 Coast Guard)

Aviation

The Air Force operates five Eurocopter AS 532C Cougar helicopters armed with Exocet AM 39 ASMs and 40 F/A 18C/D Hornets.

Bases

Navy: Ras Al Qalayah
 Coast Guard: Shuwaikh, Umm Al-Haiyan, Al-Bida

PATROL FORCES

Notes: There is a requirement for two Fast Missile Strike Craft. This programme has superseded plans to acquire offshore patrol vessels armed with SSMs. The outline requirement calls for craft of 57-72 m.

1 TNC 45 TYPE (FAST ATTACK CRAFT—MISSILE) (PGGF)

Name	No	Builders	Commissioned
AL SANBOUK	P 4505	Lürssen, Vegesack	26 Apr 1984

Displacement, tons: 255 full load
 Dimensions, feet (metres): 147.3 × 23 × 7.5
 (44.9 × 7 × 2.3)
 Main machinery: 4 MTU 16V 538TB92 diesels; 13,640 hp(m)
 (10 MW) sustained; 4 shafts
 Speed, knots: 41. Range, n miles: 1,800 at 16 kt
 Complement: 35 (5 officers)

Missiles: SSM: 4 Aerospatiale MM 40 Exocet; inertial cruise, active radar homing to 70 km (40 n miles) at 0.9 Mach, warhead 165 kg; sea-skimmer

Guns: 1 OTO Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg.
 2 Breda 40 mm/70 (twin); 300 rds/min to 12.5 km (6.6 n miles); weight of shell 0.96 kg.

Countermeasures: Decoys: CSEE Dagaia; IR flares and chaff, H/J-band
 ESM: Racal Cutless, intercept.

Weapons control: PEAB 9LV 228 system; Link Y; CSEE Lynx optical sight.

Radars: Air/surface search: Ericsson Sea Giraffe 50HC; G/H-band

Fire control: Philips 9LV 200, J-band.
 Navigation: Decca TM 1228C; I-band.

AL SANBOUK 3/2003, A Sharma / 0568872

Programmes: Six ordered from Lürssen in 1980 and delivered in 1983-84.

Operational: *Al Sanbouk* escaped to Bahrain when the Iraqis invaded in August 1990, but the rest of this class

was taken over by the Iraqi Navy, and either sunk or severely damaged by Allied forces in February 1991. The ship was refitted by Lürssen in 1995 and again in 2004.

8 UM ALMARADIM (COMBATTANTE I) CLASS (PBM)

Name	No	Builders	Launched	Commissioned
UM ALMARADIM	P 3711	CMN, Cherbourg	27 Feb 1997	31 July 1998
OUHA	P 3713	CMN, Cherbourg	29 May 1997	31 July 1998
FAILAKA	P 3715	CMN, Cherbourg	29 Aug 1997	19 Dec 1998
MASKAN	P 3717	CMN, Cherbourg	6 Jan 1998	19 Dec 1998
AL-AHMADI	P 3719	CMN, Cherbourg	2 Apr 1998	1 July 1999
ALFAHAHEEL	P 3721	CMN, Cherbourg	16 June 1998	1 July 1999
AL-YARMOUK	P 3723	CMN, Cherbourg	3 Mar 1999	7 June 2000
GAROH	P 3725	CMN, Cherbourg	June 1999	7 June 2000

Displacement, tons: 245 full load
Dimensions, feet (metres): 137.8 oa; 121.4 wl x 26.8 x 8.2 (42; 37 x 8.2 x 1.9)
Main machinery: 2 MTU 16V 538 TB93 diesels; 4,000 hp(m) (2.94 MW); 2 Kamewa waterjets
Speed, knots: 30 **Range, n miles:** 1,350 at 14 kt
Complement: 29 (5 officers)

Missiles: SSM: 4 BAe Sea Skua (2 twin). Semi-active radar homing to 15 km (8.1 n miles) at 0.9 Mach
SAM: Sadral sextuple launcher fitted for only.
Guns: 1 Otobreda 40 mm/70; 120 rds/min to 12.5 km (6.8 n miles); weight of shell 0.96 kg.
 1 Giat 20 mm M 621. 2 – 12.7 mm MGs
Countermeasures: Decoys: 2 Dagaie Mk 2 chaff launchers fitted for only.
ESM: Thomson-CSF DR 3000 S1; intercept.
Combat data systems: Thomson-CSF TAVITAC NT; Link Y.
Weapons control: CS Defence Najir Mk 2 optronic director
Radars: Air/surface search: Thomson-CSF MRR; 3D; G-band.
Fire control: BAe Seaspray Mk 3; I/J-band (for SSM).
Navigation: Litton Marine 20V90, I-band

Programmes: Contract signed with CMN Cherbourg on 27 March 1995. First steel cut 9 June 1995. Names are taken from former Kuwaiti patrol craft.

Structure: Late decisions were made on the missile system which has been fitted in the last pair on build and to the remainder from 2000. Provision is also made for Simbad SAM and Dagaie decoy launchers, which may be fitted later. Positions of smaller guns are uncertain.

Operational: Training done in France. The aim is to have 10 crews capable of manning the eight ships. First four arrived in the Gulf in mid-August 1999, second four arrived in mid-2000.

AL-AHMADI

1 FPB 57 TYPE (FAST ATTACK CRAFT—MISSILE) (PGGF)

Name	No	Builders	Commissioned
ISTIQLAL	P 5702	Lürssen, Vegesack	9 Aug 1983

Displacement, tons: 410 full load
Dimensions, feet (metres): 190.6 x 24.9 x 8.9 (58.1 x 7.6 x 2.7)
Main machinery: 4 MTU 16V 956 TB91 diesels; 15,000 hp(m) (11 MW) sustained; 4 shafts
Speed, knots: 36
Range, n miles: 1,300 at 30 kt
Complement: 40 (5 officers)

Missiles: SSM: 4 Aerospatiale MM 40 Exocet; inertial cruise; active radar homing to 70 km (40 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer
Guns: 1 OTO Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft, weight of shell 6 kg.
 2 Breda 40 mm/70 (twin); 300 rds/min to 12.5 km (6.6 n miles); weight of shell 0.96 kg.
Mines: Fitted for minelaying
Countermeasures: Decoys: CSEE Dagaie trainable mounting; automatic dispenser; IR flares and chaff; H/J-band.
ESM: Racal Cutlass; radar intercept.
ECM: Racal Cygnus, jammer.
Weapons control: PEAB 9LV 228 system; Link Y; CSEE Lynx optical sight.
Radars: Surface search: Marconi S 810 (after radome); I-band; range 43 km (25 n miles).
Navigation: Decca TM 1226C; I-band.
Fire control: Philips 9LV 200; J-band

Programmes: Two ordered from Lürssen in 1980

Operational: *Istiqlal* escaped to Bahrain when the Iraqis invaded in August 1990. The second of this class was captured and sunk in February 1991. Having been laid up since 1997 *Istiqlal* was refitted at Lürssen 2003–2005. In addition to operational roles, it is also used as a training ship.

ISTIQLAL

4/2005, Michael Nitz / 1121416

Displacement, tons: 54 full load
Dimensions, feet (metres): 90.0 x 18.0 x 4.75 (27.4 x 5.5 x 1.5)
Main machinery: 2 MTU 12V 396 TE94 diesels; 4,500 hp (3.36 MW); 2 Kamewa waterjets
Speed, knots: 45
Range, n miles: 600 at 35 kt
Complement: 5 plus 16 troops
Guns: 1 Rheinmetall MLG 27 mm (remotely operated).
Countermeasures: ESM. To be announced
Radars: Navigation: I-band

Comment: The US Congress was advised on 17 December 2005 of the possible sale of 12 (later reduced to 10) interception craft. With a higher superstructure, the craft are to be a modified version of the US MKV Pegasus class and are to be built by US Marine Inc, Gulfport, Mississippi. The keel of the first of class is expected to be laid in 2009.

MKV (US colours)

4/2003, A Sharma / 0512143

AUXILIARIES

1 SAWAHIL CLASS (SUPPORT SHIP)

AL DORRAR (ex-Qaruh, ex-Sawahil 35) S 5509

Measurement, tons: 545 dwt
Dimensions, feet (metres): 181.8 x 65.6 x 6.6 (55.4 x 20 x 2)
Main machinery: 2 diesels; 2,400 hp(m) (1.76 MW); 2 shafts
Speed, knots: 9
Complement: 40
Guns: 2 – 12.7 mm MGs
Radars: Navigation: Racal Decca; I-band

Comment: This is a Sawahil class oil rig replenishment and accommodation ship which was built in South Korea in 1986. She escaped to Bahrain during the Iraqi invasion, and is back in service. High-level helicopter platform aft. Used as a utility transport. Refitted in 1996/97.

AL DORRAR

3/2007, Edward McDonnell / 1170188

COAST GUARD

PATROL FORCES

Headquarters Appointments

Director of Coast Guard:
Brigadier Jassim al Failakia

16 VICTORY TEAM P 46 CLASS (PATROL CRAFT) (PBF)

Displacement, tons: 8.5
Dimensions, feet (metres): 45.9 x 10.6 x 2.6 (14.0 x 3.23 x 0.8)
Main machinery: 2 Yanmar 6CX diesels; 930 hp (690 kW); 2 Amoson ASD 8 surface drives
Speed, knots: 52 Range, n miles: 200 at 50 kt
Complement: 4
Guns: 2—12.7 mm MGs.
Radars: Navigation.

Comment: Contract for 16 craft signed in April 2004 with delivery of the final vessel expected by mid-2006. The Victory Team of Dubai design is a twin-stepped deep-‘vee’ monohull developed from its offshore power boats. The hull, deck and internal assembly are built from a sandwich composite comprising a glass fibre, kevlar and carbon mix to provide structural integrity at a minimum weight. The cockpit is protected by 17 mm Dyneema Ballistic panelling.

P 46 3/2005, Victory Team / 1127034

4 INTTISAR (OPV 310) CLASS (PB)

Name	No	Builders	Commissioned
INTTISAR	P 301	Australian Shipbuilding Industries	20 Jan 1993
AMAN	P 302	Australian Shipbuilding Industries	20 Jan 1993
MAIMON	P 303	Australian Shipbuilding Industries	7 Aug 1993
MOBARK	P 304	Australian Shipbuilding Industries	7 Aug 1993

Displacement, tons: 150 full load
Dimensions, feet (metres): 103.3 oa; 88.9 wl x 21.3 x 6.6 (31.5, 27.1 x 6.5 x 2)
Main machinery: 2 MTU 16V 396T894 diesels; 5,800 hp(m) (4.26 MW) sustained; 2 shafts, 1 MTU 8V 183TE62 diesel; 750 hp(m) (550 kW) maximum; 1 Hamilton 422 water-jet
Speed, knots: 28. Range, n miles: 300 at 28 kt
Complement: 11 (3 officers)
Guns: 1 Oerlikon 20 mm, 1—12.7 mm MG
Radars: Surface search: 2 Racal Decca, I-band

Comment: First two ordered from Australian Shipbuilding Industries in 1991. Second pair ordered in July 1992. Steel hulls, aluminium superstructure. The third engine drives a small waterjet to provide a loiter capability. Carries an RIB. Used by the Coast Guard.

AMAN 1992, Australian Shipbuilding Industries / 0081178

Displacement, tons: 116 full load
Dimensions, feet (metres): 115.5 x 22.3 x 4.0 (35.2 x 6.8 x 1.2)
Main machinery: 2 MTU 12V 4000 M70 diesels, 4,600 hp (3.43 MW); 2 Kamewa waterjets
Speed, knots: 32
Range, n miles: 300 at 28 kt
Complement: 11 (3 officers)
Guns: 1 Oerlikon 20 mm, 2—12.7 mm MGs
Radars: Sperry Bridgmaster E; I-band.

Comment: Built by OCEA, France based on Al Shaheed class design. Aluminium construction. Operated by the Coast Guard. P 300 is a VIP variant equipped with three cabins.

MARZOUG 8/2004, B Prézelin / 1133080

RAYYAN 7/2006, B Prézelin / 1040681

3 INSHORE PATROL CRAFT (PBR)

KASSIR T 205 DASTOOR T 210 MAHROOS T 215

Displacement, tons: to be announced
Dimensions, feet (metres): 70.9 x 19.5 x 4.9 (21.6 x 5.96 x 1.5)
Main machinery: 2 MTU 12V 183TE92 diesels; 1,800 hp (1.45 MW); 2 shafts
Speed, knots: 25. Range, n miles: 325 at 25 kt
Complement: 3 + 41 passengers
Radars: Navigation: to be announced.

Comment: Order for three craft for the Coast Guard announced on 7 January 2003. Based on the 22 m craft in service with the New South Wales Police, the vessels were constructed by Austal Ships subsidiary, Image Marine and delivered in June 2004. Aluminium hull.

DASTOOR 6/2004, Austal Ships / 0587772

3 AL SHAHEED CLASS (PB)

Name	No	Builders	Commissioned
AL SHAHEED	P 305	OCEA, Les Sables d'Olonne	July 1997
BAYAN	P 306	OCEA, Les Sables d'Olonne	Apr 1999
DASMAN	P 307	OCEA, Les Sables d'Olonne	2001

Displacement, tons: 104 full load
Dimensions, feet (metres): 109.3 x 23 x 4 (33.3 x 7 x 1.2)
Main machinery: 2 MTU 12V 396TE94; 4,352 hp(m) (3.2 MW) sustained; 2 shafts
Speed, knots: 30 Range, n miles: 360 at 25 kt
Complement: 11 (3 officers)
Guns: 1 Oerlikon 20 mm, 2—12.7 mm MGs
Radars: Surface search: Racal Decca 20V 90 TA, E/F-band
Navigation: Racal Decca Bridgmaster ARPA, I-band.

Comment: Built by OCEA, France to FPB 100K design. Operated by the Coast Guard.

AL SHAHEED 10/1997, Ships of the World / 0012718

33 AL-SHAALI TYPE (INSHORE PATROL CRAFT) (PBF)

Comment: Ten 10 m and 23 8.5 m patrol craft built by Al-Shaali Marine, Dubai, and delivered in June 1992. Also used by UAE Coast Guard. More Rapid Intervention patrol craft are to be acquired in due course.

12 MANTA CLASS (INSHORE PATROL CRAFT) (PBF)

1B 1501–1523 series

Displacement, tons: 10 full load
Dimensions, feet (metres): 45.9 × 12.5 × 2.3 (14 × 3.8 × 0.7)
Main machinery: 2 Caterpillar 3208 diesels; 810 hp(m) (595 kW) sustained, 2 shafts
Speed, knots: 40. **Range, n miles:** 180 at 35 kt
Complement: 4
Guns: 3 Herstal M2HB 12.7 mm MGs.
Radars: Surface search: Furuno; I-band.

Comment: Original craft ordered in September 1992 from Simonneau Marine and delivered in 1993. Aluminium construction. This version has two inboard engines. Pennant numbers are in odd number sequence. All the class reported to be inoperable due to technical problems. An underlying cause may be that the boats were fitted with inboard engines although designed for outboards.

MANTA 1501

11/1996 / 0012719

6 COUGAR ENFORCER 40 CLASS (INSHORE PATROL CRAFT) (PBF)

Displacement, tons: 5.7 full load
Dimensions, feet (metres): 40 × 9 × 2.1 (12.2 × 2.8 × 0.80)
Main machinery: 2 Sabre 380 S diesels; 760 hp(m) (559 kW); 2 Arneson ASD 8 surface drives; 2 shafts
Speed, knots: 45
Range, n miles: 250 at 35 kt
Complement: 4
Guns: 1 – 12.7 mm MG.
Radars: Surface search: Koden, I-band.

Comment: First one completed in July 1996 for the Coastguard by Cougar Marine, Worsash. The craft has a V monohull design.

ENFORCER 40

7/1996, Cougar Marine / 0081179

17 COUGAR TYPE (INSHORE PATROL CRAFT) (PBF)

Comment: Three Cat 900 (32 ft) three Predator 1100 (35 ft) and three Predator 1000 (33 ft) all powered by two Yamaha outboards (400 hp(m) (294 kW)). Four Type 1200 (38 ft) and four Type 1300 (41 ft) all powered by two Sabre diesels (780 hp(m) (569 kW)). All based on the high-performance planing hull developed for racing, and acquired in 1991–92. Most have a 7.62 mm MG and a Kroden I-band radar. Used by the Coast Guard.

COUGAR 1200

1991, Cougar Marine / 0081180

AUXILIARIES

Notes: (1) A 95 m ship of about 2,000 tons is required to act as a support ship for patrol vessels. It would also be equipped to undertake a training role. Revised bids were submitted in June 2001 but there have been no further developments.
 (2) There is a logistic craft P 140.
 (3) There is an ex-oilrig supply vessel *Abdul Jaal* with pennant number B 45.

P 140

10/2002 / 0587770

1 LOADMASTER MK 2 (LOGISTIC SUPPORT CRAFT) (LCU)

SAFFAR (ex-Jalbout) L 403

Displacement, tons: 420 full load
Dimensions, feet (metres): 108.3 × 33.5 × 5.7 (33.0 × 10.2 × 1.75)
Main machinery: 2 Caterpillar V12 diesels; 1,000 hp (745 kW); 2 props
Speed, knots: 10
Complement: 7 (1 officer)
Radars: Navigation I-band.

Comment: Built by Fairley Marine Cowes, UK and entered service in 1985. Captured by Iraqi forces in 1990 and subsequently recovered and reactivated in 1992.

SAFFAR

5/2001 / 0525907

2 AL TAHADDY CLASS (LCU)

Name	No	Builders	Commissioned
AL SOUMOOD	L 401	Singapore SBEC	July 1994
ALTAHADDY	L 402	Singapore SBEC	July 1994

Displacement, tons: 215 full load
Dimensions, feet (metres): 141.1 × 32.8 × 6.2 (43 × 10 × 1.9)
Main machinery: 2 MTU diesels; 2 shafts
Speed, knots: 13
Complement: 12
Military lift: 80 tons
Radars: Navigation: Racal Decca; I-band.

Comment: Ordered in 1993 and launched on 15 April 1994. Multipurpose supply ships with cargo tanks for fuel, fresh water, refrigerated stores and containers on the main deck. Has 3 ton crane. Capable of beaching. Used by the Coast Guard.

AL TAHADDY

1/1999, Maritime Photographic / 0053294

1 LANDING SUPPLY CRAFT (LCU)

L 404

Measurement, tons: 300 dwt
Dimensions, feet (metres): 160.8 × 7 × 7 (49.0 × 7 × 7)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 12
Complement: 12
Radars: Navigation: I-band.

Comment: Contract for the design and build of a landing craft signed with Singapore Technologies Marine Ltd (ST Marine) on 8 October 2004. The multipurpose vessel is to be used for transport and supply operations as well as law enforcement duties in the Arabian Gulf. In addition to carrying roll-on roll-off goods on the main deck, the vessel is also designed to transport liquid, refrigeration and general cargoes. Delivery of the ship was made in late 2005.

1 SAWAHIL CLASS (AGH)**SAWAHIL** (ex-Sawahil 50) B 50

Measurement, tons: 545 dwt
Dimensions, feet (metres): 181.8 × 31.5 × 6.6 (55.4 × 9.0 × 2)
Main machinery: 2 diesels; 2,400 hp(m) (1.76 MW); 2 shafts
Speed, knots: 9
Complement: 40
Guns: 2 – 12.7 mm MGs.
Radars: Navigation Rascal Decca, I-band

Comment: This is a Sawahil class oil rig replenishment and accommodation ship which was built in South Korea in 1986 and taken on by the Coast Guard in 1990. She escaped to Bahrain during the Iraqi invasion, and is back in service. High-level helicopter platform aft. Used as a utility transport. Refitted in 1996/97. A similar vessel, *Al Dorrar*, is operated by the navy.

SAWAHIL CLASS

11/1997, Kuwait Navy / 0012/71

Latvia**LATVIJAS JURAS SPEKI****Country Overview**

The Republic of Latvia regained independence in 1991 after 51 years as a Soviet republic. Situated in northeastern Europe, the country has an area of 24,938 square miles and borders to the north with Estonia, east with Russia and to the south with Belarus and Lithuania. It has a 286 n mile coastline with the Baltic Sea. Riga is the capital, largest city and principal port. Territorial seas (12 n miles) are claimed but while it has claimed a 200 n mile Exclusive Economic Zone (EEZ), its limits have not been fully defined by boundary agreements.

Headquarters Appointments

Commander of the Navy:
 Commander Aleksandrs Pavlovicis

Bases

Liepaja, Ventspils, Riga

Personnel

2009: 600 Navy (including Coast Guard)

Coastal Surveillance

Work began in 2002 on a maritime sea surveillance system which includes Swedish PS2-39 radars at Jumalciens, Liepaja, Paviosta, Ventspils, Ovisi, Mikoltornis, Kolka

and Riga. The system is to become operational in 2010. The Latvian AIS (Automatic Identification System) was commissioned in 2005 and is part of the HELCOM network that links other Baltic and Scandinavian navies. The Maritime Search and Rescue Coordination Centre (MRCC) is based at Riga.

Coast Guard

These ships have a diagonal thick white and thin white line on the hull, and have KA numbers. They operate as part of the Navy.

PATROL FORCES**4 STORM CLASS (PB)**

Name	No	Builders	Commissioned
ZIBENS (ex-Djervi)	P 01 (ex-P 966)	Westermoen, Mandal	1966
LODE (ex-Hvass)	P 02 (ex-P 972)	Westermoen, Mandal	1966

6/2006, E & M Laursen / 1166811

0 + 5 SWATH PATROL SHIPS (PB)

Displacement, tons: 125 full load
Dimensions, feet (metres): 84.1 × 46.8 × 8.9 (25.65 × 14.26 × 2.7)
Main machinery: Diesel-electric: 2 MAN diesels, 2 motors; 2 shafts
Speed, knots: 20
Complement: To be announced
Guns: To be announced.
Radars: To be announced.

Comment: Contract signed with Abeking & Rasmussen, Lemwerder, on 23 June 2008 for the construction of five SWATH patrol vessels. The ships are to be constructed at Lemwerder and delivered in co-operation with Riga Shipyard. The vessels are derived from the design of SWATH pilot boats, on which indicative details are based, which have been in operation since 1999. The roles of the ships are to be patrol and surveillance of territorial waters and EEZ and feature a modular mission bay in the forward section. Delivery of the first-of-class is planned in December 2010.

SWATH PATROL VESSEL

4/2007, Guy Toremans / 1335256

MINE WARFARE FORCES

5 ALKMAAR (TRIPARTITE) CLASS (MINEHUNTERS) (MHC)

Name	No	Laid down	Launched	Commissioned
IMANTA (ex-Harlingen)	M 04 (ex-M 854)	30 Nov 1981	9 July 1983	12 Apr 1984
VIESTURS (ex-Scheveningen)	M 05 (ex-M 855)	24 May 1982	2 Dec 1983	18 July 1984
TALIVALDIS (ex-Dordrecht)	M 06 (ex-M 852)	5 Jan 1981	26 Feb 1983	16 Nov 1983
VISVALDIS (ex-Alkmaar)	M 07 (ex-M 850)	30 Jan 1979	18 May 1982	28 May 1983
RŪSINĀS (ex-Delfzijl)	M 08 (ex-M 851)	29 May 1980	29 Oct 1982	17 Aug 1983

Displacement, tons: 562 standard; 595 full load
Dimensions, feet (metres): 168.9 × 29.2 × 8.5 (51.5 × 8.9 × 2.6)
Main machinery: 1 Stork Wärtsilä A-RUB 215X-12 diesel, 1,860 hp(m) (1.35 MW) sustained; 1 shaft; LIPS cp props; 2 active rudders; 2 motors; 240 hp(m) (179 kW); 2 bow thrusters
Speed, knots: 12 diesel; 7 electric
Range, n miles: 3,000 at 12 kt
Complement: 29-42 depending on task

Guns: 1 Gat 20 mm. 2 – 12.7 mm MGs.
Countermeasures: MCM: 2 PAP 104 remote-controlled submarines.
Combat data systems: Signaal Sowaco IX. SATCOM
Radars: Navigation. Racal Decca TM 1229C or Consilium Selesmar MM 950, I-band.
Sonars: Thomson Sintra DUBM 21A; hull-mounted, minehunting; 100 kHz (±10 kHz).

Programmes. Originally procured for the Royal Netherlands Navy, these ships were part of the Netherlands commitment to a tripartite co-operative plan between Netherlands, Belgium and France for GRP-hulled minehunters. All five ships built by van der Giessen-de Noord. Ex-Alkmaar, Delfzijl and Dordrecht were withdrawn from RNLN service in 2000 and Harlingen and Scheveningen in 2003. Imanta was handed over on 6 March 2007, Viesturs on 5 September 2007 and Talivaldis in January 2008, Visvaldis in October 2008 and Rūsinās in June 2009.

Modernisation: The ships are to be overhauled before entering Latvian service and a mid-life upgrade may also be considered.

Structure: A 5 ton container can be shipped, stored for varying tasks-research; patrol; extended diving, drone control

Operational: Endurance, 15 days. Automatic radar navigation system. Automatic data processing and display. EVEC 20. Decca HI-fix positioning system. Alcatel dynamic positioning system.

IMANTA 2/2007, Michael Nitz / 1190986

Range, n miles: 575 at 25 kt
Complement: 4 (1 officer)
Radars: Navigation: Furuno; I-band.

Comment: Built in Finland in 1996. Commissioned on 12 March 2001

ASTRA 4/2007, E & M Laursen / 1166813

2 HARBOUR PATROL CRAFT (WPB)

KA 10 **KA 11**

Displacement, tons: 9.6 full load (KA 10-11); 5.4 full load (KA 12)
Dimensions, feet (metres): 41.3 × 10.5 × 2 (12.6 × 3.2 × 0.6)
Main machinery: 1 3D6C diesel; 150 hp(m) (110 kW); 1 shaft
Speed, knots: 13
Complement: 2
Radars: Navigation: Furuno; I-band.

Comment: Former USSR craft acquired in 1993-94. KA 10 and 11 were Sverdlov class cruiser boats.

KA 11 9/1996, Hartmut Ehlers / 0506304

1 VALPAS CLASS (OFFSHORE PATROL VESSEL) (WPBO)

VALPAS

Displacement, tons: 545 full load
Dimensions, feet (metres): 159.1 × 27.9 × 12.5 (48.5 × 8.5 × 3.8)
Main machinery: 1 Werkspoor diesel; 2,000 hp(m) (1.47 MW); 1 shaft; cp prop
Speed, knots: 15
Complement: 18
Guns: 1 Oerlikon 20 mm.
Sonars: Simrad SS105; active scanning; 14 kHz.

Comment: An improvement on the *Silmā* design. Built by Laivateollisuus, Turku, and commissioned 21 July 1971. Ice strengthened. Donated by Finland on 25 September 2002 and operated by State Border Security Service.

VALPAS 5/2003, J Čížek / 0568321

LAND-BASED MARITIME AIRCRAFT

Numbers/Type: 2 Mi-8 MTV1 Hip H.
Operational speed: 124 kt (230 km/h)
Service ceiling: 16,400 ft (5,000 m)
Range: 324 n miles (600 km).
Role/Weapon systems: SAR aircraft acquired in 1999. Operated by the Air Force.

MI-8 4/2007, Freddy Phillips / 1168117

Lebanon

Country Overview

The Lebanese Republic gained independence from France in 1946 but was devastated by civil war between 1975–1991. Situated on the eastern shore of the Mediterranean Sea, it has an area of 4,015 square miles and is bordered to the north and east by Syria and to the south by Israel. It has a 121 n mile coastline with the Mediterranean Sea.

The capital, largest city and principal port is Beirut. Other important ports include Tripoli and Sidon. Territorial seas (12 n miles) are claimed but an EEZ is not claimed.

Headquarters Appointments

Navy Commander:
Rear Admiral Ali El Moallem

Personnel

2009: 1,100 (395 officers)

Bases

Beirut (HQ), Jounieh

PATROL FORCES

Notes: (1) There is a patrol craft of unknown type with pennant number 501.
(2) Ten interceptor craft were donated by the UAE in 2008. There are four 14.5 m diesel-engined craft and six 12.5 m petrol-engined craft.

501

5/2006, Marco Ghiglino / 1164962

7 TRACKER MK 2 CLASS (COASTAL PATROL CRAFT) (PB)

TRIPOLI (ex-Attacker) 301 BYBLOS (ex-Chaser) 304 SARAFAND (ex-Swift) 307
JOUNIEH (ex-Fencer) 302 BEIRUT (ex-HunterII) 305
BATROUN (ex-Safeguard) 303 SIDON (ex-Striker) 306

Displacement, tons: 38 full load
Dimensions, feet (metres): 65.6 × 17 × 4.9 (20 × 5.2 × 1.5)
Main machinery: 2 Detroit 12V-71TA diesels; 840 hp (616 kW) sustained; 2 shafts
Speed, knots: 21 **Range, n miles:** 650 at 14 kt
Complement: 13 (1 officer)
Guns: 3 – 12.7 mm MGs
Raders: Surface search: Racal Decca 1216, I-band

Comment: All built at Cowes and Southampton. GRP construction. The ex-Royal Naval Units were originally commissioned in March 1983. Three transferred from UK on 17 July 1992 after serving as patrol craft for British bases in Cyprus. The other two were acquired in 1993. The two ex-UK Customs Craft (*Batroun* and *Sarafand*) were originally commissioned in 1979 and acquired in late 1993.

JOUNIEH

7/2006, Marco Ghiglino / 1164961

25 INSHORE PATROL CRAFT (PBR)

401 403–418 420–427

Displacement, tons: 6 full load
Dimensions, feet (metres): 26.9 × 8.2 × 2 (8.2 × 2.5 × 0.6)
Main machinery: 2 Sabre 212 diesels; 212 hp(m) (156 kW); 2 waterjets
Speed, knots: 22
Range, n miles: 154 at 22 kt
Complement: 4
Guns: 3 – 5.56 mm MGs

Comment: M-boot type used by the US Army on German rivers and 27 were transferred in January 1994. Called Combat Support Boats, there are 20 operational and five laid up. Two were decommissioned in 2002.

403

7/2006, Marco Ghiglino / 1164960

1 PATROL SHIP (PB)

AAMCHIT (ex-Bremen 2)

Measurement, tons: To be announced
Dimensions, feet (metres): 111.5 × 17.1 × 5.9 (34.0 × 5.2 × 1.8)
Main machinery: 2 diesels; 3,900 hp (2.9 MW); 2 shafts
Speed, knots: 28
Range, n miles: To be announced
Complement: To be announced

Comment: Former City of Bremen Maritime Police vessel built by Schiffswerft Ernst Menzer, Hamburg-Bergedorf in 1974 and transferred to Lebanon on 7 June 2007. The contract includes a training package.

AAMCHIT (German police colours)

8/2006, Frank Findler / 1167959

1 PATROL SHIP (PB)

NAQUORA (ex-Bremen 9)

Displacement, tons: 32 full load
Dimensions, feet (metres): 65.6 × 18.4 × 4.8 (20.0 × 5.6 × 1.45)
Main machinery: 2 MTU 12V 183TE92 diesels; 1,970 hp (1.5 MW); 2 shafts
Speed, knots: 32
Range, n miles: 300 at 25 kt
Complement: 6

Comment: Former City of Bremen Maritime Police vessel built by Fassmer Werft in 1992 and transferred to Lebanon on 7 June 2007. Aluminium construction. The contract includes a training package. The design includes space for a 3 m interceptor craft.

NAQUORA (outboard ship)

4/2007, Frank Findler / 1167958

1 PATROL SHIP (PB)

Name	No	Builders	Commissioned
TABARJA (ex-Bergen)	- (ex-Y 838)	Lurssen, Vegesack	19 May 1994

Displacement, tons: 126 full load
Dimensions, feet (metres): 91.2 x 19.7 x 4.6 (27.8 x 6.0 x 1.4)
Main machinery: 2 KHD TBD 234 diesels; 2,054 hp (1.51 MW); 2 shafts
Speed, knots: 16
Complement: 15

Comment: Former German Range Safety Craft donated by the German Navy on 17 June 2008

TABARJA (German colours)

6/2007, Michael Nitz / 1166144

AMPHIBIOUS FORCES

2 FRENCH EDIC CLASS (LCT)

Name	No	Builders	Commissioned
SOUR	21	SFCN, Villeneuve la Garonne	28 Mar 1985
DAMOUR	22	SFCN, Villeneuve la Garonne	28 Mar 1985

Displacement, tons: 870 full load
Dimensions, feet (metres): 193.5 x 39.2 x 4.2 (59 x 12 x 1.3)
Main machinery: 2 SACM MGO 175 V12 M1 diesels; 1,200 hp (m) (882 kW); 2 shafts
Speed, knots: 10. **Range, n miles:** 1,800 at 9 kt
Complement: 20 (2 officers)
Military lift: 96 troops; 11 trucks or 8 APCs
Guns: 2 Oerlikon 20 mm, 1—81 mm mortar, 2—12.7 mm MGs, 1—762 mm MG
Radars: Navigation: Decca; I-band

Comment: Both were damaged in early 1990 but repaired in 1991 and are fully operational. Used by the Marine Regiment formed in 1997.

DAMOUR

5/2006, Marco Ghiglini / 1164954

Libya

Country Overview

The Socialist People's Libyan Arab Jamahiriya is situated in north Africa. With an area of 679,362 square miles, it has a 956 n mile coastline with the Mediterranean Sea and is bordered to the east by Egypt, to the south by Sudan, Chad and Niger and to the west by Algeria and Tunisia. The capital and largest city is Tripoli, which, with Benghazi, is a principal port. Territorial seas (12 n miles) are claimed. An EEZ has not been claimed. The status of the Gulf of Sirte, which Libya claims as internal waters, is disputed by numerous states including USA, United Kingdom, France, Italy and Greece.

Headquarters Appointments

Chief of Staff Navy:

Rear Admiral Muhammad al Shaybani Ahmad al Suwahil

Headquarters Appointments—continued

Deputy Chief of Staff Navy
 Captain al-Din Mufti

Personnel

- (a) 2009: 8,000 officers and ratings, including Coast Guard
 (b) Voluntary service

Bases

Naval HQ at Al Khums.
 Operating Ports at Tripoli, Darnah (Derna) and Benghazi.
 Naval bases at Al Khums and Tobruq.
 Submarine base at Ras Hala
 Naval air station at Al Girdabiya.
 Naval infantry battalion at Sidi Bilal

Coast Defence

Batteries of truck-mounted SS-C-3 Styx missiles

General

Specialist teams in unconventional warfare are a threat and most Libyan vessels can lay mines, but overall operational effectiveness is very low, not least because of poor maintenance and stores support. Sanctions imposed by the UN in April 1992 were reported as 'destroying' the Fleet. The situation improved in late 1995 when mostly Ukrainian technicians were hired on maintenance contracts. Further progress was reported in 1998 and the situation could improve following the lifting of UN sanctions on 12 September 2003. The EU arms embargo was lifted on 11 October 2004 although export licences are still required.

SUBMARINES

Notes: Acquisition of up to two Type 836 diesel submarines from Russia is reported to be under consideration.

2 FOXTROT CLASS (PROJECT 641) (SS)

AL KHYBER 315	AL HUNAIN 316
---------------	---------------

Displacement, tons: 1,950 surfaced; 2,475 dived
Dimensions, feet (metres): 299.5 x 24.6 x 19.7
 (91.3 x 7.5 x 6)

Main machinery: Diesel-electric; 3 Type 37-D diesels (1 x 2,700 and 2 x 1,350), 6,000 hp (m) (4.4 MW); 3 motors, 5,400 hp (m) (3.97 MW); 3 shafts; 1 auxiliary motor; 140 hp (m) (103 kW)

Speed, knots: 16 surfaced; 15 dived

Range, n miles: 20,000 at 8 kt surfaced, 380 at 2 kt dived

Complement: 75 (8 officers)

Torpedoes: 10—21 in (533 mm) (6 bow, 4 stern) tubes. SAET-60, passive homing to 15 km (8.1 n miles) at 40 kt; warhead 400 kg, and SET-65E, active/passive homing to 15 km (8.1 n miles) at 40 kt; warhead 205 kg or Type 53-56. Total of 22 torpedoes.

Mines: 44 in place of torpedoes.

Countermeasures: ESM Stop Light; radar warning

Radars: Surface search, SnoopTray; I-band.

Sonars: Merkules, hull-mounted, active; medium frequency.

Faniks, hull-mounted; passive

Programmes: Six of the class originally transferred from USSR; this last one in April 1982

Operational: Libyan crews trained in the USSR and much of the maintenance was done by Russian personnel. No routine patrols have been seen since 1984 although both boats have been reported to conduct surface patrols. One submarine was reported to be in dry dock at Tripoli during 2003 and *Al Khyber* reported to be sea-going. However a return to full operational capability remains highly unlikely

FOXTROT

6/1992, van Ginderen Collection / 0081190

FRIGATES

Notes: (1) The *Dar Assawari* F 211 is a training hulk alongside in Tripoli
 (2) Two decommissioned Koni-class frigates may be acquired from Montenegro, possibly as spares.

2 KONI (PROJECT 1159) CLASS (FFGM)

AL HANI PF 212

AL QIRDABIYAH PF 213

Displacement, tons: 1,440 standard; 1,900 full load
 Dimensions, feet (metres): 316.3 × 41.3 × 11.5
 (96.4 × 12.6 × 3.5)

Main machinery: CODAG: 1 SGW, Nikolayev, M88 gas turbine (centre shaft), 18,000 hp(m) (13.26 MW) sustained; 2 Russki B-68 diesels; 15,820 hp(m) (11.63 MW) sustained, 3 shafts

Speed, knots: 27 on gas; 22 on diesel
 Range, n miles: 1,800 at 14 kt
 Complement: 120

Missiles: SSM: 4 Soviet SS-N-2C Styx (2 twin) launchers ●, active radar/IR homing to 83 km (45 n miles) at 0.9 Mach; warhead 513 kg; sea-skimmer at end of run.

SAM: SA-N-4 Gecko twin launcher ●, semi-active radar homing to 15 km (8 n miles) at 2.5 Mach; altitude 9.1-3,048 m (29.5-10,000 ft); warhead 50 kg; 20 missiles.

Guns: 4 USSR 3 in (76 mm)/59 AK 726 (2 twin) ●, 90 rds/min to 16 km (8.5 n miles) anti-surface; weight of shell 5.9 kg

4 USSR 30 mm/65 (2 twin) automatic ●, 500 rds/min to 2 km (1.1 n miles); weight of shell 0.54 kg

Torpedoes: 4—406 mm (2 twin) tubes amidships ● USET-95; active/passive homing to 10 km (5.5 n miles) at 30 kt; warhead 100 kg.

A/S mortars: 1 RBU 6000 12-tubed trainable launcher ●, automatic loading; range 6,000 m; warhead 31 kg.

Depth charges: 2 racks.
 Mines: Capacity for 20

Countermeasures: Decoys: 2—16-barrelled chaff launchers.
 Towed torpedo decoys.

ESM: 2 Watch Dog; radar warning.

Radars: Air search: Strut Curve ●, F-band; range 110 km (60 n miles) for 2 m² target
 Surface search: Plank Shave ●, E/F-band.

Navigation: Don 2, I-band.

Fire control: Drum Tilt ●, H/I-band (for 30 mm).

Hawk Screech ●, I-band; range 27 km (15 n miles) (for 76 mm).

Pop Group ●, F/H/I-band (for SAM).

IFF: High Pole B. Square Head.

Sonars: Hercules (MG 322), hull-mounted; active search and attack; medium frequency.

AL HANI

(Scale 1 : 900), Ian Sturton / 0506050

Programmes: Type III Konis built at Zelenodolsk and transferred from the Black Sea. 212 commissioned 28 June 1986 and 213 on 24 October 1987

Structure: SSMs mounted either side of small deckhouse on forecastle behind gun. A deckhouse amidships contains air conditioning machinery. Changes to the standard Koni include SSM, four torpedo tubes, only one RBU 6000 and Plank Shave surface search; and target indication radar. Camouflage paint applied in 1991

Operational: One of the class fired an exercise Styx missile in September 1999. 213 has been reported active but the operational status of 212 is doubtful

AL HANI

7/1999, van Ginderen Collection / 0081191

CORVETTES

1 NANUCHKA II (PROJECT 1234) CLASS
(MISSILE CORVETTE) (FSGM)

TARIQ IBN ZIYAD (ex-Ean Mara) 416

Displacement, tons: 660 full load
 Dimensions, feet (metres): 194.5 × 38.7 × 8.5 (59.3 × 11.8 × 2.6)
 Main machinery: 6 M 504 diesels; 26,112 hp(m) (19.2 MW); 3 shafts
 Speed, knots: 33. Range, n miles: 2,500 at 12 kt; 900 at 31 kt
 Complement: 42 (7 officers)

Missiles: SSM: 4 Soviet SS-N-2C Styx launchers; auto-pilot; active radar/IR homing to 83 km (45 n miles) at 0.9 Mach; warhead 513 kg HE, sea-skimmer at end of run.

SAM: SA-N-4 Gecko twin launcher; semi-active radar homing to 15 km (8 n miles) at 2.5 Mach; altitude 9.1-3,048 m (29.5-10,000 ft); warhead 50 kg HE, 20 missiles.

Guns: 2 USSR 57 mm/75 AK 725 (twin) automatic; 120 rds/min to 12.7 km (6.8 n miles); weight of shell 2.8 kg.

Countermeasures: Decoys: 2 chaff 16-barrelled launchers.

ESM: Bell Tap; radar warning.

Radars: Surface search: Square Tie; I-band (Bandstand radome)

Navigation: Don 2; I-band.

Fire control: Muff Cob; G/H-band.

Pop Group; F/H/I-band (for SAM)

Programmes: First transferred from USSR in October 1981; second in February 1983; third in February 1984, fourth in September 1985

Structure: Camouflage paint applied in 1991 but have been reported as having blue hulls since 1993

Operational: *Ean Zaqit* (419) sunk on 24 March 1986. *Ean Mara* (416) severely damaged on 25 March 1986 by forces of the US Sixth Fleet; repaired in Leningrad and returned to Libya in early 1991 as the *Tariq Ibn Ziyad*. *Ean Al Gazala* (417) probably in reserve as a source of spares and *Ean Zarah* (418) reported non-operational. Reports of refit plans are doubtful

TARIQ IBN ZIYAD

7/1991, van Ginderen Collection / 0081192

LAND-BASED MARITIME AIRCRAFT

Numbers/Type: 2/5 Aerospatiale SA 321 Frelon/SA 324 Super Frelon.

Operational speed: 134 kt (248 km/h).

Service ceiling: 10,000 ft (3,050 m).

Range: 440 n miles (815 km).

Role/Weapon systems: Obsolescent helicopter; Air Force manned but used for naval support tasks. Most are non-operational due to lack of spares. Sensors: None. Weapons: Fitted for Exocet AM 39.

Numbers/Type: 5 Aerospatiale SA 316B Alouette III.

Operational speed: 113 kt (210 km/h).

Service ceiling: 10,500 ft (3,200 m).

Range: 290 n miles (540 km).

Role/Weapon systems: Support helicopter. Probably non-operational. Another six are used by the Police. Sensors: None. Weapons: Unarmed

PATROL FORCES

Notes: (1) More than 50 remote-control explosive craft acquired from Cyprus. Based on Q-Boats with Q-26 GRP hulls and speed of about 30 kt. Also reported that 15 31 ft craft delivered by Stobrebro, and 60 more built locally are similarly adapted. No reports of recent activity.

(2) There is also a Hamelin 37 m patrol craft *Al Kifah* 206 based at Tripoli.

(3) Six 30 m patrol craft had been acquired for the Libyan Coast Guard by late 2007. The PV30 craft were constructed by Adria-Mar Shipbuilding, Croatia. The vessels are capable of 33 kt.

4 OSA II (PROJECT 205) CLASS
(FAST ATTACK CRAFT—MISSILE) (PTFG)

AL ZUARA 513 AL RUHA 515 AL FIKAH 523 AL MATHUR 525

Displacement, tons: 245 full load
Dimensions, feet (metres): 126.6 × 24.9 × 8.8 (38.6 × 7.6 × 2.7)
Main machinery: 3 Type M 504 diesels; 10,800 hp(m) (794 MW) sustained; 3 shafts
Speed, knots: 37
Range, n miles: 800 at 30 kt; 500 at 35 kt
Complement: 30

Missiles: SSM: 4 Soviet SS-N-2C Styx; active radar or IR homing to 83 km (45 n miles) at 0.9 Mach; warhead 513 kg HE; sea-skimmer at end of run.

Guns: 4 USSR 30 mm/65 (2 twin) automatic; 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg.

Radars: Surface search: Square Tie; I-band; range 73 km (45 n miles).

Fire control: Drum tilt; H/I-band.
IFF: 2 Square Head, High Pole

Programmes: The first craft arrived from USSR in October 1976, four more in August–October 1977, a sixth in July 1978, three in September–October 1979, one in April 1980, one in May 1980 (521) and one in July 1980 (529).

Structure: Some painted with camouflage stripes in 1991 and some were given blue hulls in 1993.

Operational: There have been few sightings of these ships at sea in recent years. One fired an exercise Styx missile in September 1999. The following eight craft are reported non-operational: *Al Katum* 511, *Al Baida* 517, *Al Nabha* 519, *Al Safhra* 521, *Al Masha* 527, *Al Sakab* 529, *Al Bitar* 531 and *Al Saded* 533. Based at Tobruk.

RAS AL FULAJAH 117 RAS AL QULA 119 RAS AL MASSAD 123 RAS AL HANI 125

Displacement, tons: 804 full load

Dimensions, feet (metres): 200.1 × 33.5 × 10.8 (61 × 10.2 × 3)

Main machinery: 2 Type M 504 diesels; 5,000 hp(m) (3.67 MW) sustained; 2 shafts; cp props

Speed, knots: 16. **Range, n miles:** 3,000 at 12 kt

Complement: 67

Guns: 4 USSR 30 mm/65 (2 twin) automatic; 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg.

4 USSR 25 mm/80 (2 twin); 270 rds/min to 3 km (1.6 n miles); weight of shell 0.34 kg.

A/S mortars: 2 RBU 1200 6-tubed fixed launchers; elevating; range 1,200 m; warhead 34 kg.

Mines: 10.

Countermeasures: MCM: 1 GKT-2 contact sweep; 1 AT-2 acoustic sweep; 1 TEM-3 magnetic sweep

Radars: Surface search: Don 2; I-band

Fire control: Drum Tilt; H/I-band.

IFF: 2 Square Head, 1 High Pole B.

Sonars: Hull-mounted; active search; high frequency.

Comment: Transferred from USSR between 1981 and 1986. At least one of the class painted in green striped camouflage in 1991. Others may have blue hulls. Capable of magnetic, acoustic and mechanical sweeping. Mostly used for coastal patrols and never observed minesweeping. *Ras Al Massad* has been used for training cruises. The following are non-operational: *Al Tiyar* 111, *Al Isar* 113, *Ras Al Hamman* 115 and *Ras Al Madwar* 121.

NATYA 2/1988 / 0506051

AUXILIARIES

Notes: (1) *Zeltin 711* is used as an alongside tender for petrol forces but is no longer capable of going to sea.

(2) The Vosper class *Tobruk* is used for alongside training.

(3) There are about eight 60 m trawlers employed on intelligence collection tasks. They include: *Al Nasim*, *Al Rabat*, *Al Sahfa*, *Al Yakada* and *Zarqa al Yammana*.

Lithuania

KARINES JURU PAJEGOS

Country Overview

The Republic of Lithuania regained independence in 1991 after 51 years as a Soviet republic. Situated in northeastern Europe, the country has an area of 25,175 square miles and borders to the north with Latvia, to the east and south with Belarus, to the southwest with Poland and the Russian enclave of Kaliningrad. It has a 58 n mile coastline with the Baltic Sea. Vilnius is the capital and largest city while Klaipeda is the principal port. Territorial seas (12 n miles) are claimed but while it has claimed a 200 n mile Exclusive Economic Zone (EEZ), its limits have not been fully defined by boundary agreements.

Headquarters Appointments

Commander of the Navy:
Commander Aruras Stank
Chief of Staff:
Commander Eduard Karlonas

Personnel

2009: 643

Bases

Klaipeda

State Border Police (Pakrancliy Apsauga)

Coast Guard Force formed in late 1992. Name changed in 1996 to Border Police. Vessels have one thick and one thin diagonal yellow stripe on the hull.

FRIGATES

1 GRISHA III (ALBATROS) CLASS (PROJECT 1124M) (FFLM)

Name	No	Builders	Commissioned	Decommissioned
AUKŠTAITIS	F 12 (ex-MPK 44)	Kiev Shipyard	15 Aug 1980	6 Nov 1992

2 + 1 FLYVEFISKEN CLASS (PBO)

Name	No	Builders	Commissioned
ZEMAITIS (ex-Flyvefisken)	P 11 (ex-P 550)	Danyard A/S, Aalborg	19 Dec 1989
DJUKAS (ex-Hajen)	P 12 (ex-P 551)	Danyard A/S, Aalborg	19 July 1990
— (ex-Lommen)	— (ex-P 559)	Danyard A/S, Aalborg	21 Jan 1994

Displacement, tons: 480 full load
Dimensions, feet (metres): 177.2 x 29.5 x 8.2 (54 x 9 x 2.5)
Main machinery: 2 diesels; 5,800 hp(m) (4.26 MW) sustained; 2 shafts; cp props; bow thruster
Speed, knots: 20
Range, n miles: 2,400 at 18 kt
Complement: 29

Guns: 1 OTO Melara 3 in (76 mm)/62 Super Rapid; dual purpose; 120 rds/min to 16 km (8.7 n miles).
 2—12.7 mm MGs

Countermessures: To be announced.

Combat data systems: To be announced.

Weapons control: To be announced.

Radars: Surface search: Terma Scantier Mil; I-band.

Navigation: Furuno, I-band.

Fire control: To be announced.

Programmes: Standard Flex 300 ships built for the Danish Navy to meet requirement for re-role by the interchange of mission-specific containers. Three ships decommissioned in 2005. Following an agreement in March 2007, ex-Flyvefisken and ex-Hajen were handed over on 30 May 2008 and 28 January 2009 respectively. Ex-Lommen is to be transferred in 2009. Of the four container positions, one crane module is to be installed in an aft position while the 76 mm gun is to occupy the forward position. The other two positions are to be covered. The original CODAG propulsion system is to be replaced by two diesel engines powering two of the three shafts.

Operational: Likely to be employed on offshore patrol duties.

Displacement, tons: 463 full load
Dimensions, feet (metres): 154.5 x 27.2 x 9.8 (9.2 Troika) (47.1 x 8.3 x 3) (2.8)
Main machinery: 2 MTU MD diesels; 4,000 hp(m) (2.94 MW); 2 shafts
Speed, knots: 16.5. **Range, n miles:** 850 at 16.5 kt
Complement: 42 (5 officers)
Guns: 1 Bofors 40 mm/70. 2—12.7 mm MGs.
Radars: Navigation: Raytheon Mariner Pathfinder; I-band.
Sonars: Plessey 193 m; minehunting; high frequency (100/300 kHz).
 EdgeTech DF-1000 sidescan (M 51); high frequency (100/400 kHz).

Comment: M 52 acquired from Germany in June 1999 and recommissioned 2 December 1999. M 51 transferred in November 2000. Converted to minehunters in 1978. Hulls of wooden construction. Full minehunting equipment including PAP 104 ROVs transferred with the vessels.

SĖDUVIS

9/2007, Maritime Photographic / 1335793

0 + 2 HUNT CLASS (MINEHUNTERS—COASTAL) (MHC)

Name	No	Builders	Launched	Commissioned
— (ex-Cottesmore)	— (ex-M 32)	Yarrow Shipbuilders, Glasgow	9 Feb 1982	24 June 1983
— (ex-Dulverton)	— (ex-M 35)	Vosper Thornycroft, Woolston	3 Nov 1982	4 Nov 1983

Displacement, tons: 615 standard; 750 full load
Dimensions, feet (metres): 187.0 wl; 197.0 oa x 32.8 x 11.2 (57.0; 60.0 x 10.0 x 3.4)
Main machinery: To be announced.
Speed, knots: To be announced. **Range, n miles:** To be announced.
Complement: To be announced
Guns: To be announced.
Countermessures: MCM. Expendable mine-disposal system.
Combat data systems: To be announced.
Radars: To be announced.
Sonars: Thales 2193; hull-mounted, minehunting; 100/300 kHz.

Comment: The contract to refit, upgrade and transfer two former Royal Navy mine-countermeasures vessels was announced on 27 November 2008. All minehunting and minesweeping equipment was removed from both ships during conversion in 1997 to undertake patrol duties during their latter days in RN service. Both ships subsequently decommissioned in 2005. Thales UK is to act as prime contractor for the upgrade which is likely to involve a substantial package including a new command system (possibly NAUTIS III as fitted in RN Hunt class), minehunting sonar, propulsion machinery, expendable mine disposal equipment (possibly based on Seafox C) and radars. The re-activation is to be undertaken in a UK shipyard and both ships are expected to enter Lithuanian service in late 2010.

Macedonia, Former Yugoslav Republic of

Country Overview

The Former Yugoslav Republic of Macedonia declared its independence in 1991. A land-locked country with an

area of 9,928 square miles, it is situated in south-eastern Europe and is bordered to the north by Serbia, to the east by Bulgaria, to the south by Greece and to the west by Albania. Parts of the borders with Albania and Greece

pass through the two principal lakes, Ohrid and Prespa. The capital and largest city is Skopje.

PATROL FORCES

Notes: The Macedonian Lake Service (Ezerska služba - EZ) consists of about 400 soldiers and is nominally an independent arm of the Army although in practice it is almost integrated with Land Forces. In addition up to five ex-Yugoslavian Army patrol boats on Lake Ohrid, there are two further small craft on Lake Prespa although their operational status is doubtful.

5 BOTICA CLASS (TYPE 16) (RIVER PATROL CRAFT) (PBR)

303-305 +2

Displacement, tons: 23 full load
Dimensions, feet (metres): 55.8 x 11.8 x 2.8 (17.0 x 3.6 x 0.8)
Main machinery: 2 diesels; 454 hp (340 kW); 2 shafts
Speed, knots: 15. **Range, n miles:** 340 at 14 kt
Complement: 7
Military lift: 3 tons or 30 troops
Guns: 1 Oerlikon 20 mm, 2—762 mm MGs
Radars: Decca 110; I-band

Comment: Former Yugoslavian craft which entered service in the 1970s. Two are reported operational. There is a similar craft in Serbian Navy service.

BOTICA 304

6/2007, Fraivogel Collection / 1167934

Madagascar MALAGASY REPUBLIC MARINE

Country Overview

Formerly a French Protectorate, the Malagasy Republic became self-governing in 1958 and fully independent in 1960. It adopted the name Democratic Republic of Madagascar in 1975. Situated in the Indian Ocean and separated from the southeastern coast of Africa by the Mozambique Channel, it comprises Madagascar Island, the fourth largest island in the world, and several small islands. The country's total area is 226,658 square miles and it has a coastline of 2,608 n miles. Antananarivo is the capital

while Toamasina is the principal commercial port. There are further ports at Antsiranana, Mahajanga and Toliara. Territorial seas (12 n miles) are claimed. An Exclusive Economic Zone (EEZ) has been claimed but boundaries have not been agreed.

Personnel

2009: 430 officers and men (including Marine Company of 120 men)

Headquarters Appointments

Head of Navy:
Rear Admiral Retsimitetra

Bases

Antsiranana (main), Toamasina, Mahajanga, Toliara, Nosy Bé, Tolanoro, Manakara

PATROL FORCES

Military lift: 250 tons
Guns: 2 Giat 20 mm.

Comment: Built in 1964 by Chantier Naval Franco-Belge. Transferred from France 28 September 1985 having been paid off by the French Navy in 1981. Repaired by the French Navy in 1996 and now back in service.

AINA VAO VAO

6/1999, Madagascar Navy / 0081202

AUXILIARIES

Notes: (1) There are three Algrette class harbour tugs, *Tourterelle*, was acquired from France in 1975 and *Engoulevant* and *Martin Pêcheur* May 1996.
 (2) There is also a 400 ton coastal tug *Trozona*.
 (3) A former trawler, *Daikannon Maru*, is employed on fishery protection duties.

Malawi

Country Overview

Formerly the British Protectorate of Nyasaland, the Republic of Malawi gained independence in 1964. A landlocked country situated in east Central Africa, it is bordered to the north by Tanzania, to the west by Zambia and to the south and east by Mozambique. The country's total area is 45,747 square miles, nearly a quarter of which is water. The principal lake is Lake Malawi (formerly Lake Nyasa).

with which there is a shoreline of some 475 n miles. The largest city is Blantyre and the capital, since 1975, is Lilongwe. The naval base at Monkey Bay is situated on a peninsula at the south of the lake.

Bases

Monkey Bay, Lake Malawi

Headquarters Appointments

Commander of the Malawi Army Marine Unit:
 Colonel G A Ziyabu

Personnel

2009 225

PATROL FORCES

Notes: One survey craft built in France in 1988 is operated on Lake Malawi by Department of Surveys.

1 ANTARES CLASS (PB)

KASUNGU (ex-Chikala) P 703

Displacement, tons: 41 full load
Dimensions, feet (metres): 68.9 × 16.1 × 4.9 (21 × 4.9 × 1.5)
Main machinery: 2 Poyaud 520 V12 M2 diesels, 1,300 hp(m) (956 kW); 2 shafts
Speed, knots: 22. **Range, n miles:** 650 at 15 kt
Complement: 16
Guns: 1 MG 21 20 mm. 2—7.62 mm MGs
Radars: Surface search. Decca; I-band.

Comment: Built in prefabricated sections by SFCN Villeneuve-la-Garenne and shipped to Malawi for assembly on 17 December 1984. Commissioned May 1985. Operational status doubtful.

KASUNGU

6/1996, Malawi Navy / 0012737

2 NAMACURRA CLASS (PB)

KANING'A (ex-Y 1520) P 704 +1

Displacement, tons: 5 full load
Dimensions, feet (metres): 29.5 × 9 × 2.8 (9 × 2.7 × 0.8)
Main machinery: 2 BMW 3.3 outboards; 380 hp(m) (279 kW)
Speed, knots: 32. **Range, n miles:** 180 at 20 kt
Complement: 4
Guns: 1—12.7 mm MG. 2—7.62 mm MGs
Radars: Surface search. Decca; I-band.

Comment: First craft donated by South Africa on 29 October 1988. A second was donated in February 2008.

KANING'A

6/1997, Malawi Navy / 0012736

1 ROTORK CLASS (LCU)

CHIKOKO I L 702

Displacement, tons: 9 full load
Dimensions, feet (metres): 41.5 × 10.5 × 1.5 (12.7 × 3.2 × 0.5)
Main machinery: 2 Volvo diesels, 260 hp(m) (191 kW); 2 shafts
Speed, knots: 24
Range, n miles: 3,000 at 15 kt
Complement: 8
Guns: 3—7.62 mm MGs.

Comment: Built by Rotork Marine. Needs a refit but no funds are available.

CHIKOKO I

6/1996, Malawi Navy / 0012738

Malaysia

TENTERA LAUT DIRAJA

Country Overview

The Federation of Malaysia was formed in 1963. Situated in south-east Asia, its two regions are separated by some 350 n miles of the South China Sea. Peninsular Malaysia (formerly West Malaysia) is bordered to the north by Thailand and to the south by Singapore (which left the federation in 1965) and includes 11 states occupying the southern half of the Malay Peninsula. To the east, the states (former British colonies) of Sabah and Sarawak (which surrounds the sultanate of Brunei) occupy the northern third of the island of Borneo, the remainder of which forms the Indonesian province of Kalimantan. With an overall land area of 127,320 square miles, Malaysia has a coastline of 2,527 n miles with the Strait of Malacca, the South China Sea, the Sulu and Celebes Seas. Kuala Lumpur is the capital and largest city while the principal ports are Penang, Port Klang, Tanjung Pelepas, Kuantan, Kota Kinabalu and Kuching. Territorial seas (12 n miles) are claimed. An EEZ (200 n miles) is claimed but the limits have not been fully defined.

Headquarters Appointments

Chief of Navy:

Admiral Datuk Abdul Aziz bin Haji Jaafar

Deputy Chief of Navy:

Vice Admiral Dato' Hj Mohammed Noordin bin Ali

Fleet Commander:

Vice Admiral Dato' Ahmad Kamarulzaman bin Hj Ahmad Badaruddin

Commander Naval Area I (Kuantan):

Captain Abdul Aziz bin Hj Mohd Dom

Headquarters Appointments -- continued

Commander Naval Area II (Sabah and Sarawak):

Commodore Syed Zahiruddin Putra

Commander Naval Area III (Langkawi):

Commodore Abdul Ghani bin Othman

Personnel

- (a) 2009: 19,561 (2,385 officers)
 (b) Voluntary service: Royal Malaysian Navy Voluntary Reserve (RMNVR); Total: 3,202 (872 officers)

Coastal Defence

Procurement of a coastal surveillance system is under consideration.

Bases

- (a) Lumut Naval Base comprises HQ Fleet Operations, HQ Fleet System, HQ Support, HQ Air, Mine Warfare and Diving Centre (KD *Duyong*) and HQ Special Forces (*Paskal*)
 (b) Naval Area 1 HQ - Kuantan (West of longitude 109E)
 (c) Naval Area 2 HQ - Kota Kinabalu (East of longitude 109E). Comprises HQ Submarine Force, Kota Kinabalu Naval Base, Sandakan Naval Base (KD *Sri Sandakan*), Semporna Naval Base (KD *Sri Semporna*) and KD *Sri Tawau*
 (d) Naval Area 3 HQ - Langkawi Island
 (e) Naval Area 4 HQ (Designated) - Kuching, Sarawak
 (f) Others - Naval Education Training Command, Kuala Lumpur (ex-KD *Sri Klang*), National Hydrographic

Centre, Kuala Lumpur, and Tanjung Pengelih, Johor (KD *Sultan Ismail*).

- (g) Bases for regular reserve forces situated in Penang, Perak, Selangor, Kuala Lumpur, Labuan Federal Territory, Pahang, Johor, Terengganu, Sabah and Sarawak.

Prefix to Ships' Names

The names of Malaysian warships are prefixed by KD (Kapal Diraja meaning His Majesty's Ship)

Maritime Patrol Craft

There are large numbers of armed patrol craft belonging to the Police, Customs and Fisheries Departments. Details at the end of the section

SUBMARINES

Notes: (1) There are no plans to procure mini-submarines as has been previously reported.

(2) The French Agosta class submarine *Quessant* is on loan to Malaysia to provide initial training which started in early 2005. The boat continues to belong to the French Navy and is based at Brest. The submarine may go to Malaysia on completion of training in 2009.

(3) The full details of the future submarine rescue capability are yet to be announced. The capability is likely to be based around the ships *Mahsuri* and *Setia Sekel*.

1 + 1 SCORPENE CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
TUNKU ABDUL RAHMAN	-	DCN, Cherbourg	26 Apr 2004	23 Oct 2007	28 Jan 2009
TUN RAZAK	-	Navantia, Cartagena	25 Apr 2005	8 Oct 2008	Oct 2009

Displacement, tons: 1,559 surfaced; 1,758 dived
Dimensions, feet (metres): 221.6 x 20.3 x 17.7 (67.56 x 6.2 x 5.4)
Main machinery: Diesel electric; 2 SEMT-Pielstick 12 PA4 200 SM DS diesels; 1 Jeumont Industrie motor; 4,290 hp (3.2 MW), 1 shaft
Speed, knots: 20.5 dived; 12 surfaced
Range, n miles: 360 at 4 kt dived; 6,000 at 8 kt surfaced
Complement: 31 (7 officers)

Missiles: SSM. Aerospatiale SM39 Exocet; launched from 21 in (533 mm) torpedo tubes; inertial cruise; active radar homing to 50 km (27 n miles) at 0.9 Mach; warhead 165 kg.

Torpedoes: 6-21 in (533 mm) tubes. WASS Black Shark torpedoes; wire (fibre-optic cable) guided; active and passive homing to 50 km (27 n miles) at 50 kt, warhead 250 kg. Total of 18 weapons.
Countermeasures: ESM: Thales DR 3000; intercept.
Weapons control: UDS International SUBTICS.
Radars: Navigation: I-band.
Sonars: Hull mounted; active/passive search and attack, medium frequency.

Programmes: Contract for the construction of two submarines awarded to Armaris and IZAR on 5 June 2002. A four-year training programme aboard an Agosta-70

(ex-*Quessant*) is included in the package. First steel cut for first of class 2 December 2003. The two forward modules were constructed by DCN and the two aft modules by Navantia.
Structure: Similar in design to the Chilean boats. Diving depth more than 300 m (984 ft). Option to retrofit AIP at a later date.
Operational: Following sea trials, the first boat is to arrive in Malaysia in August 2009 and the second in 2010. To be based in Naval Area 2 at Sepanggar Naval Base, Sabah.

FRIGATES

Notes: The decision to build two new frigates was announced on 17 July 2006. The sections of the ships are to be built at BAE Systems' facilities at Govan and Scotstoun and final assembly is to take place at Labuan Shipyard. The 112 m ships are likely to be a development of the Lekiu class. An order is not expected until 2010.

2 LEKIU CLASS

 (97.3 x 11.3 x 3.5)
Main machinery: 4 MTU 20V 1163 T892 diesels, 23,400 hp(m) (17.2 MW) sustained; 2 shafts
Speed, knots: 28; 18 on 2 diesels
Range, n miles: 3,000 at 18 kt; 5,000 at 14 kt
Complement: 124 (13 officers)

Missiles: SSM: 8 Aerospatiale MM 40 Exocet Block II ☉; inertial cruise; active radar homing to 70 km (40 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.
Guns: 1 Creusot-Loire 3.9 in (100 mm)/55 Mk 2 compact ☉; 20/45/90 rds/min to 17 km (9.2 n miles) anti-surface; 6 km (3.2 n miles) anti-aircraft; weight of shell 13.5 kg.
 1 Bofors 57 mm/70 ☉; 200 rds/min to 17 km (9.2 n miles); weight of shell 2.4 kg. Launchers for illuminants.
 4 Emerson Electric 30 mm (2 twin) ☉; 1,200 rds/min combined to 6 km (3.2 n miles); weight of shell 0.35 kg.

A/S mortars: 1 Bofors 375 mm twin trainable launcher ☉; automatic loading; range 3,600 m.
Countermeasures: Decoys: 2 CSEE Dagaie trainable systems; replaceable containers for IR or chaff
 ESM Rapids.
 ECM MEL Scimitar, jammer
Combat data systems: Signaal Sewaco-MA. Link Y Mk 2.
Electro-optic systems: 2 Signaal LIOD optronic directors.
Radars: Air/surface search: Signaal DA08 ☉; F-band

Navigation: Kelvin Hughes 1007; I-band.
Fire control: Signaal WM22 ☉; I/J-band
IFF: US Mk 10
Sonars: Atlas Elektronik DSQS-21C; hull mounted; active search and attack; medium frequency.
Helicopters: Platform for 1 medium ☉
Programmes: First two ordered in February 1981. Fabrication began early 1982
Modernisation: An extensive Ship Life Extension Programme (SLEP) for both ships started in 2007. The upgrade includes a new Combat Data System (Tactics), IFF, Target Designation Sight (TDS), Mirador optronic

KASTURI

director, and underwater telephone. Bofors 375 A/S launchers are to be replaced by 324 mm torpedo tubes with A244S torpedoes while the 30 mm armament is to be replaced by new 30 mm MSI D530B REMSIG guns. The 100 mm gun forward is to be replaced by a Bofors 57 mm gun while the aft 57 mm gun is to be removed to facilitate extension of the flight deck. Super Barricade is to replace the Dagaie chaff system while the MEL Scimitar jammer is to be removed. The refits are to be completed by 2009 and 2010 respectively.
Structure: Near sisters to the Colombian ships with differing armament.
Operational: Form 22nd Corvette Squadron.

Displacement, tons: 1,650 full load
 Dimensions, feet (metres): 298.9 x 42.2 x 11.1
 (91.1 x 12.85 x 3.4)
 Main machinery: 2 Caterpillar 3616 diesels, 14,617 hp(m)
 (10.9 MW) sustained; 2 shafts, cp propellers
 Speed, knots: 22
 Range, n miles: 6,050 at 12 kt
 Complement: 68 (11 officers)

KEDAH

(Scale 1 : 800), Ian Sturton / 1044756

Missiles: Fitted for SSM (MM40) and SAM (RAM CIWS)
 Guns: 1 Otobreda 3 in (76 mm)/62 Super Rapid; 120 rds/min to 16 km (8.7 n miles); weight of shell 6 kg.
 1—30 mm Otobreda/Mauser 2—12.7 mm MGs.
 Countermeasures: Decoys RBOC chaff launcher
 Combat data systems: STN Atlas Cosys 110M1
 Electro-optic systems: Contraves TMEO optronic director
 Radars: Air/surface search: EADS TRS-3D/16ES
 G-band
 Navigation: Atlas Elektronik 9600 ARPA; I-band.
 Sonars: Fitted for.
 Helicopters: Platform for medium helicopter.

Programme: An agreement between the Malaysian government, the Panang Shipbuilding Corporation (PSC) and German Naval Group consortium (led by Blohm + Voss) was reached in November 2000 for the supply of an initial batch of six vessels. The first two OPVs were built in Germany for shipment to Malaysia and assembly and fitting out at Lumut. The other four ships are under construction in Malaysia. Following technical problems and construction delays PSC reverted

to state control as Boustead Naval Shipyard which took over the programme in September 2005.
Structure: Design based on Blohm + Voss MEKO 100 including measures to reduce the radar and IR signatures. Space has been included for future enhancements which may include SSM, SAM, sonar and an EW suite.
Operational: Principal tasks are expected to be maritime surveillance and patrol duties in the Malaysian EEZ. The first two are to be based at Sepanggar.

Displacement, tons: 705 full load
Dimensions, feet (metres): 204.4 x 30.5 x 8
(62.3 x 9.3 x 2.5)

Main machinery: 4 MTU 20V 956 TB92 diesels; 20,120 hp (m)
(14.8 MW) sustained; 4 shafts
Speed, knots, 36. Range, n miles: 2,300 at 18 kt
Complement: 47

Missiles. SSM. 6 OTO Melara/Matra Otomat Teseo Mk 2
(TG 2) (3 twin) ●; command guidance; active radar
homing to 180 km (98.4 n miles) at 0.9 Mach; warhead
210 kg; sea skimmer.

SAM. 1 Selenia/Elsag Albatros launcher ● (4 cell-2 reloads);
Aspide; semi-active radar homing to 13 km (7 n miles)
at 2.5 Mach; height envelope 15-5,000 m (49.2-16,405 ft);
warhead 30 kg.

Guns: 1 OTO Melara 3 in (76 mm)/62 Super Rapid ●;
120 rds/min to 16 km (8.7 n miles) anti-surface; 12 km
(6.6 n miles) anti-aircraft; weight of shell 6 kg.
2 Breda 40 mm/70 (twin) ●; 300 rds/min to 12.5 km
(6.8 n miles); weight of shell 0.95 kg.

Torpedoes. 6-324 mm (LAS 3 (2 triple) tubes ● Whitehead
A244S; anti-submarine; active/passive homing to 7 km
(3.8 n miles); warhead 34 kg (shaped charge).

Countermeasures: Decoys: 2 Breda 105 mm 6-tubed
multipurpose launchers; chaff to 5 km (2.7 n miles);
illuminants to 12 km (6.6 n miles).

ESM. Selenia INS-3; intercept

ECM. Selenia TQN-2; jammer

Combat data systems: Selenia IPN 10 (136, 137); Alenia
IPN-S (134, 135); Signaal/AESN Link Y Mk 2.

Weapons control: 2 Selenia NA 21; Dardo.

LAKSAMANA HANG NADIM

(Scale 1 : 600), Ian Sturton / 0126348

Radars: Air/surface search: Selenia RAN 12L/X ●; D/I-band;
range 82 km (45 n miles).

Navigation. Kelvin Hughes 1007, I-band

Fire control 2 Selenia RTN 10X ●; I/J-band; 1 Selenia RTN
20X ●; I/J-band.

Sonars: Atlas Elektronik ASO 84-41; hull-mounted; active
search and attack.

Programmes: Ordered in February 1981 for the Iraqi Navy
and fell foul of UN sanctions before they could either be
paid for or delivered. Subsequently completed in 1988
and maintained by Fincantieri. Two near sister ships were
paid for by Iraq and remain laid up at La Spezia. Contract
signed on 26 October 1995, and confirmed on 26 July
1996, to transfer two of the class to the Malaysian Navy

after refit at Muggiano and three months training in Italy.
Contract for two more signed on 20 February 1997 for
conversion and delivery.

Modernisation: Super Rapid 76 mm gun, datalink, new
navigation radar and GPS fitted in 1996. Bridge wings
are extended to the after gun deck. Contract signed with
Alenia Marconi on 11 April 2002 to upgrade command
systems of F 134 and F 135 to IPN-S.

Structure: NBC citadel and full air conditioning fitted
Operational: First pair arrived in Malaysia in September
1997. Second pair delayed by payment problems but
arrived in September 1999. Constitute 24th Corvette
Squadron.

Opinion: This was an unusual purchase because of the lack
of equipment commonality with the rest of the Fleet.

SHIPBORNE AIRCRAFT

Notes: (1) Sikorsky S-61A Nuri Army support helicopter can be embarked in the two Logistic Support Ships.
 (2) The procurement of six anti-submarine helicopters is under consideration. Contenders include the AgustaWestland AW 101, NH Industries NH 90 and Sikorsky MH-60R Seahawk.

NURI 6/1997 / 0081211

Numbers/Type: 6 GKN Westland Super Lynx.
Operational speed: 132 kt (244 km/h).
Service ceiling: 10,000 ft (3,048 m).
Range: 320 n miles (593 km).
Role/Weapon systems: Ordered on 3 September 1999. All delivered in 2003. ASW, ASuW and surveillance roles. Sensors: Seaspray radar; Sky Guardian 2500 ESM, MST-S FLIR. Weapons: ASW; two A244S torpedoes. ASV; three Sea Skus ASM, 2 – 12.7 mm MG.

SUPER LYNX 6/2007, Royal Malaysian Navy / 1167987

LAND-BASED MARITIME AIRCRAFT

Notes: The Air Force has eight F/A-18D fighter-bombers with Harpoon ASM, and 15 Hawk fighters with Sea Eagle ASM.

Numbers/Type: 6 Aerospatiale AS 555 Fennec.
Operational speed: 120 kt (222 km/h).
Service ceiling: 10,000 ft (3,050 m).
Range: 389 n miles (722 km).
Role/Weapon systems: Unarmed aircraft ordered late 2001 for delivery in June 2004. Utility, SAR and training roles. Sensors: Bendix RDR 1500B radar; EWR 99 Fruit RWR; ARGOS 410-A5 FLIR. Weapons: 7.62 mm MG.

FENNEC 6/2007, Royal Malaysian Navy / 1167986

Numbers/Type: 4 Beechcraft B 200T Super King
Operational speed: 282 kt (523 km/h)
Service ceiling: 35,000 ft (10,670 m).
Range: 2,030 n miles (3,756 km).
Role/Weapon systems: Used for maritime surveillance. Acquired in 1994. Air Force operated. Sensors: Search radar. Weapons: Unarmed

SUPER KING 6/1993 / 0084007

PATROL FORCES

17 COMBATBOAT 90H (PBF)

TEMPUR 1 TEMPUR 21–24 TEMPUR 41–44
 TEMPUR 11–14 TEMPUR 31–34

Displacement, tons: 19 full load
Dimensions, feet (metres): 52.2 x 12.5 x 2.6 (15.9 x 3.8 x 0.8)
Main machinery: 2 Volvo Penta TAMD 163P diesels; 1,500 hp(m) (1.1 MW); 2 waterjets
Speed, knots: 45. **Range, n miles:** 240 at 30 kt
Complement: 3
Guns: 1 – 7.62 mm MG.
Radars: Surface search: I-band

Comment: Ordered from Dockstarvarvet in Sweden in April 1997. Have more powerful engines than the boats in Swedish service. Primary role is maritime law enforcement particularly on east coast of Sabah. Three Combatboat 90E are operated by the Customs service

TEMPUR 31 6/2007, Royal Malaysian Navy / 1167984

4 HANDALAN (SPICA-M) CLASS
 (FAST ATTACK CRAFT – MISSILE) (PTFG)

Name	No	Builders	Commissioned
HANDALAN	3511	Karlskrona, Sweden	26 Oct 1979
PERKASA	3512	Karlskrona, Sweden	26 Oct 1979
PENDEKAR	3513	Karlskrona, Sweden	26 Oct 1979
GEMPITA	3514	Karlskrona, Sweden	26 Oct 1979

Displacement, tons: 240 full load
Dimensions, feet (metres): 142.6 x 23.3 x 7.4 (screws) (43.6 x 7.1 x 2.4)
Main machinery: 3 MTU 16V 538TB91 diesels; 9,180 hp(m) (6.75 MW) sustained, 3 shafts
Speed, knots: 34.5 **Range, n miles:** 1,850 at 14 kt
Complement: 40 (8 officers)

Missiles: SSM: 4 Aerospatiale MM 38 Exocet; inertial cruise; active radar homing to 42 km (23 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.
Guns: 1 Bofors 57 mm/70 Mk 1; 200 rds/min to 17 km (9.2 n miles); weight of shell 2.4 kg
Illuminant launchers:
 1 Bofors 40 mm/70; 300 rds/min to 12 km (6.5 n miles) anti-surface; 4 km (2.2 n miles) anti-aircraft; weight of shell 0.96 kg.
Countermeasures: ESM: Thales DR 3000, intercept
Weapons control: 1 PEAB 9LV212 Mk 2 weapon control system with TV tracking LME anti-aircraft laser and TV rangefinder
Radars: Surface search: Philips 9GR 600, I-band (agile frequency).
Navigation: Kelvin Hughes 1007; I-band
Fire control: Philips 9LV 212; J-band.

Programmes: Ordered 15 October 1976. All named in one ceremony on 11 November 1978, arriving in Port Klang on 26 October 1979.

Modernisation: There are plans to replace the MM 38 with MM 40 or Teseo missiles and to update radar and EW.

Operational: Form 2nd Fast Attack Craft Squadron and based in Area 1.

GEMPITA 12/2007, Chris Sattler / 1170003

**4 PERDANA (LA COMBATTANTE II) CLASS
(FAST ATTACK CRAFT—MISSILE) (PTFG)**

Name	No	Builders	Launched	Commissioned
PERDANA	3501	CMN, Cherbourg	31 May 1972	21 Dec 1972
SERANG	3502	CMN, Cherbourg	22 Dec 1971	31 Jan 1973
GANAS	3503	CMN, Cherbourg	26 Oct 1972	28 Feb 1973
GANYANG	3504	CMN, Cherbourg	16 Mar 1972	20 Mar 1973

Displacement, tons: 234 standard, 265 full load
Dimensions, feet (metres): 154.2 x 23.1 x 12.8 (47 x 7 x 3.9)
Main machinery: 4 MTU MB 870 diesels; 14,000 hp(m) (10.3 MW); 4 shafts
Speed, knots: 36.5 **Range, n miles:** 800 at 25 kt; 1,800 at 15 kt
Complement: 30 (4 officers)

Missiles: SSM: 2 Aerospatiale MM 38 Exocet; inertial cruise; active radar homing to 42 km (23 n miles) at 0.9 Mach; warhead 166 kg, sea-skimmer. Not always carried
Guns: 1 Bofors 57 mm/70, 200 rds/min to 17 km (9.2 n miles); weight of shell 2.4 kg.
 1 Bofors 40 mm/70; 300 rds/min to 12 km (6.5 n miles) anti-surface; 4 km (2.2 n miles) anti-aircraft; weight of shell 0.96 kg.
Countermeasures: Decoys: 4 57 mm chaff/flare launchers.
ESM: Thomson-CSF DR 3000; intercept.
Weapons control: Thomson-CSF Vega optical for guns.
Radars: Air/surface search: Thomson-CSF TH-D 1040 Trton; G band; range 33 km (18 n miles) for 2 m² target.
 Navigation: Kelvin Hughes 1007; I-band.
 Fire control: Thomson-CSF Pollux; I/J-band; range 31 km (17 n miles) for 2 m² target.

Programmes: Left Cherbourg for Malaysia 2 May 1973
Modernisation: There are plans to replace MM 38 with MM 40 or Teseo SSMs and to update radar and EW
Structure: All of basic La Combattante II design with steel hulls and aluminium superstructure
Operational: Form 1st Fast Attack Craft Squadron and based in Area 1.

GANYANG 12/2005, Chris Sattler / 1153393

6 JERONG CLASS (FAST ATTACK CRAFT—GUN) (PB)

Name	No	Builders	Commissioned
JERONG	3505	Hong Leong-Lürssen, Butterworth	27 Mar 1976

Dimensions, feet (metres): 147.3 x 23 x 8.3 (44.9 x 7 x 2.5)
Main machinery: 3 MTU MB 16V 538 TB90 diesels; 9,000 hp(m) (6.6 MW) sustained; 3 shafts
Speed, knots: 32 **Range, n miles:** 2,000 at 14 kt
Complement: 36 (4 officers)
Guns: 3 Bofors 57 mm/70 Mk 1, 200 rds/min to 17 km (9.2 n miles); weight of shell 2.4 kg
 1 Bofors 40 mm/70.
Countermeasures: ESM, Thales DR 3000; intercept.
Radars: Surface search, Kelvin Hughes 1007; I-band.

Comment: Lürssen 45 type. Illuminant launchers on both gun mountings. Design of hull modification is reported to have been contracted. Form 6th Fast Attack Squadron based at Labuan

TODAK 6/2007, Royal Malaysian Navy / 116798F

2 31 METRE PATROL CRAFT (PB)

Name	No	Builders	Commissioned
SRI PERLIS	47	Vosper Ltd, Portsmouth	24 Jan 1968
SRI JOHOR	49	Vosper Ltd, Portsmouth	14 Feb 1968

Displacement, tons: 96 standard, 109 full load
Dimensions, feet (metres): 103 x 19.8 x 5.5 (31.4 x 6 x 1.7)
Main machinery: 2 MTU MD 656/18 diesels; 3,500 hp(m) (2.57 MW); 2 shafts
Speed, knots: 27
Range, n miles: 1,400 at 14 kt
Complement: 22 (3 officers)
Guns: 2 Bofors 40 mm/70, 2—7.62 mm MGs
Radars: Surface search: Racal Decca Bridgemaster ARPA, I-band

Comment: Two boats of the Kns class ordered in 1965 for delivery between 1966 and 1968. Prefabricated steel construction and fitted with air conditioning and Vosper roll damping equipment. These two craft form the 12th Patrol Boat Squadron based at Lumut. The remaining craft of the 13th and 14th Squadrons have been transferred to the Maritime Enforcement Agency (MMEA)

31 METRE CLASS 11/2001, Maritime Photographic / 0130744

AMPHIBIOUS FORCES

Notes: There is a requirement for up to three multirole support ships. The ships are to be capable of transporting up to 700 troops in addition to vehicles, guns and helicopters and will also have hospital facilities

1 NEWPORT CLASS (LSTH)

Name	No	Builders	Laid down	Launched	Commissioned
SRI INDERAPURA (ex: Spartanburg County)	1505 (ex-1192)	National Steel, San Diego	7 Feb 1970	11 Nov 1970	1 Sep 1971

Displacement, tons: 4,975 light, 8,450 full load
Dimensions, feet (metres): 522.3 (hull) x 89.5 x 17.5 (aft) (159.2 x 27.2 x 5.3)
Main machinery: 6ALCO 16-251 diesels; 16,500 hp (12.3 MW) sustained; 2 shafts; cp props; bow thruster
Speed, knots: 20 **Range, n miles:** 14,250 at 14 kt
Complement: 257 (13 officers)
Military lift: 400 troops (20 officers); 500 tons vehicles; 3 LCVPs and 1 LCPL on davits

Guns: 1 General Electric/General Dynamics 20 mm Vulcan Phalanx Mk 15
Radars: Surface search, Raytheon SPS-67; G-band
 Navigation: Marconi LN66; I/J-band
 Kelvin Hughes 1007; I-band.

Helicopters: Platform only

Programmes: Transferred by sale from the USN 16 December 1994, arriving in Malaysia in June 1995. Second authorised for transfer by lease in 1998 but this was not confirmed.

Structure: The hull form required to achieve 20 kt would not permit bow doors, thus these ships unload by a 112 ft ramp over their bow. The ramp is supported by twin derrick arms. A ramp just forward of the superstructure

SRI INDERAPURA 7/2007, Robert Pabst / 1166R14

connects the lower tank deck with the main deck and a vehicle passage through the superstructure provides access to the parking area amidships. A stern gate to the tank deck permits unloading of amphibious tractors into the water, or unloading of other vehicles into an LCU or onto a pier. Vehicle stowage covers 19,000 sq ft.

Length over derrick arms is 562 ft (171.3 m); full load draught is 11.5 ft forward and 17.5 ft aft.
Operational: 3 in guns removed before transfer. Repeated refits in Johore shipyard between late 1995 and 1998. Damaged by fire on 15 December 2002 at Lumut but subsequently repaired. Forms 32 Sealift Squadron.

500 Malaysia/Amphibious forces — Survey ships

5 LCP

RCP 2 RCP 3 RCP 6 RCP 8 RCP 9

Displacement, tons: 30 full load
Main machinery: 2 diesels; 330 hp (246 kW); 2 shafts
Speed, knots: 17
Military lift: 35 troops

Comment: Malaysian built and in service 1974–84. Transferred to the Army in 1993.

130 DAMEN ASSAULT CRAFT 540

Dimensions, feet (metres): 17.7 × 5.9 × 2 (5.4 × 1.8 × 0.6)
Main machinery: 1 outboard; 40 hp(m) (29.4 kW)
Speed, knots: 12
Military lift: 10 troops

Comment: First 65 built by Damen Gorinchem, Netherlands in 1986. Remainder built by Limbungan Timor SY. Army assault craft. Manportable and similar to Singapore craft. Used by the Army. Some have been deleted.

2 FAST TROOP VESSELS (AP)

SRI GAYA 331 SRITIGA 332

Displacement, tons: 116.5 full load
Dimensions, feet (metres): 123.1 × 23.0 × 3.6 (375 × 70 × 1.1)
Main machinery: 4 MAN D2842 LE 408 diesels, 2,080 hp (1.55 MW); 4 water-jets
Speed, knots: 25
Range, n miles: 540
Complement: 8
Military lift: 32 troops + stores
Radars: Navigation: Furuno; I-band.

Comment: Design based on Australian Wave Master fast-ferry monohull. Procured to transport troops and stores particularly in Sabah and Sarawak waters. Built by Naval Dockyard, Lumut and commissioned on 29 May 2001. Based at Kota Kinabalu.

SRI GAYA 12/2005, Chris Sattler / 1153396

2 LOGISTIC SUPPORT SHIPS (AOR/AE/AXH)

Name	No	Builders	Commissioned
SRI INDERA SAKTI	1503	Bremer Vulkan	24 Oct 1980
MAHAWANGSA	1504	Korea Tacoma	15 May 1983

Displacement, tons: 4,300 (1503); 4,900 (1504) full load
Dimensions, feet (metres): 328; 337.8 (1504) × 49.2 × 15.7 (100; 103 × 15 × 4.8)
Main machinery: 2 Deutz KHD SBV6M540 diesels; 5,865 hp(m) (4.31 MW); 2 shafts; cp props; bow thruster
Speed, knots: 16.5
Range, n miles: 4,000 at 14 kt
Complement: 136 (14 officers) plus 65 spare
Military lift: 17 tanks; 600 troops
Cargo capacity: 1,300 tons diesel; 200 tons fresh water (plus 48 tons/day distillers)

Guns: 2 Bofors 57 mm Mk 1 (1 only fwd in 1503). 2 Oerlikon 20 mm.
Countermeasures: ESM. Thales DR 3000; intercept.
Radars: Navigation: Kelvin Hughes 1007; I-band.

Helicopters: 1 Sikorsky S-61A Nuri (army support) can be carried (1504 only).

Programmes: Ordered in October 1979 and 1981 respectively.

Structure: Fitted with stabilising system, vehicle deck, embarkation ramps port and starboard, recompression chamber and a stern anchor. Large operations room and a conference room are provided. Transfer stations on either beam and aft, light jacks on both sides and a 15 ton crane for replenishment at sea. 1504 has additional capacity to transport ammunition and the funnel has been removed to enlarge the flight deck which is also higher in the superstructure.

Operational: Used as training ships for cadets in addition to main roles of long-range support of Patrol Forces and MCM vessels, command and communications and troop or ammunition transport. Form 31 Squadron.

SRI INDERA SAKTI 6/2007, Royal Malaysian Navy / 1170005

MAHAWANGSA 12/2007, Chris Sattler / 1170002

MINE WARFARE FORCES

4 MAHAMIRU (LERICI) CLASS (MINEHUNTERS) (MHC)

Name	No	Builders	Launched	Commissioned
MAHAMIRU	11	Intermarine, Italy	23 Feb 1984	11 Dec 1985
JERAI	12	Intermarine, Italy	5 Jan 1984	11 Dec 1985
LEDANG	13	Intermarine, Italy	14 July 1983	11 Dec 1985
KINABALU	14	Intermarine, Italy	19 Mar 1983	11 Dec 1985

Displacement, tons: 610 full load
Dimensions, feet (metres): 167.3 × 32.5 × 9.2 (51 × 9.9 × 2.8)
Main machinery: 2 MTU 12V 396TC82 diesels (passage); 2,605 hp(m) (1.91 MW) sustained, 2 shafts, Kamewa cp props; 3 Fincantieri Isotta Fraschini ID 36 SS 6V diesels; 1,481 hp(m) (1.09 MW) sustained, 2 Riva Calzoni hydraulic thrust jets
Speed, knots: 16 diesels; 7 thrust jet
Range, n miles: 2,000 at 12 kt
Complement: 42 (5 officers)
Guns: 1 Bofors 40 mm/70; 300 rds/min to 12.5 km (6.8 n miles); weight of shell 0.96 kg.
Countermeasures: Thomson-CSF IBIS II minehunting system; 2 improved PAP 104 ROVs. Oropesa 'O' MIS-4 mechanical sweep.
Radars: Navigation: Kelvin Hughes 1007; Thomson-CSF Tripartite III; I-band.
Sonars: Thomson Sintra TSM 2022 Mk III with Display 2060; minehunting; high frequency.

Comment: Ordered on 20 February 1981. All arrived in Malaysia on 26 March 1986. Heavy GRP construction without frames. Snatch active tank stabilisers. Draeger Duocomb decompression chamber. Slightly longer than Italian sisters. Endurance, 14 days. Upgrade of tactical data system completed in 2001; Minehunting Tactical Display System (MTDS) installed by Altech Defence System, South Africa. A SLEP for Mahamiru and Ledang was completed in 2007. Upgrades included TSM Mk III sonar, MTDS adaptation and Kongsberg navigation echo-sounder. The other two ships are to be similarly modified. Form the 26th Mine Countermeasures Squadron.

MAHAMIRU 12/2007, Chris Sattler / 1170001

SURVEY SHIPS

1 SURVEY VESSEL (AGSH)

Name	No	Builders	Commissioned
MUTIARA	255 (ex-152)	Hong Leong-Lurssen, Butterworth	12 Jan 1978

Displacement, tons: 1,905 full load
Dimensions, feet (metres): 232.9 × 42.8 × 13.1 (71 × 13 × 4)
Main machinery: 2 Deutz SBA12M528 diesels; 4,000 hp(m) (2.94 MW); 2 shafts
Speed, knots: 16
Range, n miles: 4,500 at 16 kt
Complement: 155 (14 officers)
Guns: 4 Oerlikon 20 mm (2 twin).
Radars: Navigation: 2 Racal Decca 1228/1229; I-band
Helicopters: Platform only.

Comment: Ordered in early 1975. Carries satellite navigation, auto-data system and computerised fixing system. Devita for six survey launches. Forms part of 36 Squadron.

MUTIARA 12/2005, Chris Sattler / 1153397

1 SURVEY VESSEL (AGS)

Name	No	Builders	Commissioned
PERANTAU	151	Hong Leong-Lürssen, Butterworth	12 Oct 1998

Displacement, tons: 1,996 full load
Dimensions, feet (metres): 222.4 × 43.6 × 13.1 (678 × 13.3 × 4)
Main machinery: 2 Deutz/MWM SBV8 M628 diesels; 4,787 hp(m) (3.52 MW); 2 shafts; Berg cp props, Schottel bow thruster
Speed, knots: 18. **Range, n miles:** 6,000 at 10 kt
Complement: 94 (17 officers)
Guns: 4 Oerlikon 20 mm (2 twin).
Radars: Navigation: STN Atlas; I-band.

Comment: Ordered from Krogenwerft in 1996. The ship is equipped with two survey launches and four multipurpose boats and has three winches and two cranes, including a hoist for a STN Atlas side scan sonar. Full range of hydrographic and mapping equipment embarked. Forms part of 36 Squadron.

PERANTAU 6/2007, Royal Malaysian Navy / 1167987

TRAINING SHIPS

1 HANGTUAH (TYPE 41/61) CLASS (FFH/AX)

Name	No	Builders	Commissioned
HANGTUAH (ex-Mermaid)	78	Yarrow (Shipbuilders), Glasgow	16 May 1973

Displacement, tons: 2,300 standard; 2,520 full load
Dimensions, feet (metres): 339.3 × 40 × 16 (screws) (103.5 × 12.2 × 4.9)
Main machinery: 2 Stork Wärtsilä 12SW28 diesels; 9,928 hp(m) (7.3 MW) sustained; 2 shafts; cp props
Speed, knots: 24. **Range, n miles:** 4,800 at 15 kt
Complement: 210
Guns: 1 Bofors 57 mm/70 Mk 1; 200 rds/min to 17 km (9.2 n miles); weight of shell 2.4 kg. 2 Bofors 40 mm/70, 300 rds/min to 12 km (6.5 n miles) anti-surface; 4 km (2.2 n miles) anti-aircraft; weight of shell 0.96 kg.
Radars: Navigation: Kelvin Hughes 1007; I-band.
Helicopters: Platform for 1 medium.

Comment: Originally built for Ghana as a display ship for ex-President Nkrumah but put up for sale after his departure. She was launched without ceremony on 29 December 1965 and completed in 1968. Commissioned in Royal Navy 16 May 1973 and transferred to Royal Malaysian Navy May 1977. Refitted in 1991–92 to become a training ship. Main gun and main engines replaced in 1995–96. Sonars and Limbo ASW mortars removed. There are no plans for further modifications. Forms 21st Frigate Squadron.

HANGTUAH 12/2007, Chris Settler / 1188000

1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Commissioned
TUNAS SAMUDERA	A 13	Brooke Yacht, Lowestoft	16 Oct 1989

Displacement, tons: 239 full load
Dimensions, feet (metres): 114.8 × 25.6 × 13.1 (35 × 7.8 × 4)
Main machinery: 2 Perkins diesels; 370 hp (272 kW); 2 shafts
Speed, knots: 9
Complement: 10 plus 26 trainees
Radars: Navigation: Racal Decca; I-band.

Comment: Laid down 1 December 1988 and launched 4 August 1989. Two-masted brig manned by the Navy but used for training all sea services.

TUNAS SAMUDERA 7/2007, B. Prézeln / 1166815

1 NAVAL TRAINING SHIP (AX)

FAJAR SAMUDERA (ex-Yufu, ex-Ferry Sunrise)

Measurement, tons: 4,476 gross
Dimensions, feet (metres): 295.6 × 51.2 × 14.8 (90.1 × 15.6 × 4.5)
Main machinery: 2 Daihatsu diesels; 7,200 hp (5.4 MW); 2 shafts
Speed, knots: 19
Complement: 25 plus 350 trainees
Radars: Navigation: I-band.

Comment: Former passenger/Ro-Ro ship constructed by Kanda Shipbuilding Company, Japan in 1989. Leased as a training ship by the Royal Malaysian Navy.

FAJAR SAMUDERA 6/2007, Royal Malaysian Navy / 1170009

1 SAIL TRAINING SHIP (AXS)

PUTERI MAHSURI (ex-Kanrin Maru)

Measurement, tons: 794 gross
Dimensions, feet (metres): 215.9 oa; 158.1 w l × 34.4 × 14.8 (65.8; 48.2 × 10.5 × 4.5)
Main machinery: 2 Mitsubishi diesels; 938 hp (700 kW); 1 shaft, cp prop
Speed, knots: 7
Complement: 40
Radars: Furuno FR-1510; I-band.

Comment: Three-masted sailing barque constructed by De Merwede shipyard Netherlands, in 1991. Leased as a training vessel by the Royal Malaysian Navy.

PUTERI MAHSURI 6/2007, Royal Malaysian Navy / 1170008

AUXILIARIES

Notes: (1) There are six miscellaneous personnel launches: *Kempong, Kuramah, Mangkasa, Patak, Selar and Tepuruk*.
 (2) An ex-tug, *Penyu* (465 tons) is used as a diving tender. Commissioned in 1979, it has a complement of 26.

PENYU 10/2003, Hartmut Ehlers / 0567883

4 COASTAL SUPPLY SHIPS AND TANKERS (AOTL/AKSL)

LANG TRAM LANG SIPUT MELEBAN JERNIH

Comment: Various auxiliaries mostly acquired in the early 1980s. There are also Sabah supply ships identified by M numbers.

502 Malaysia/Auxiliaries – Malaysia (COAST GUARD)/Patrol forces

1 DIVING SUPPORT/SALVAGE VESSEL (ARS)

MAHSURI (ex-Bramen)

Measurement, tons: 4,112 gross
Dimensions, feet (metres): 301.8 × 62.3 × 24.3 (92.0 × 19.0 × 7.4)
Main machinery: 2 MAK diesels; 4,800 hp (3.53 MW); 1 shaft; 1 Ulstein bow thruster
Speed, knots: 14
Complement: 80
Radars: Atlas 9600; E/F/I-band.

Comment: Former research ship constructed by Schichau-Unterwester, Bremerhaven, in 1972. Extensively refitted in 2001. Leased as a multirole vessel by the Royal Malaysian Navy. Capabilities include hydrographic survey, diving support, submarine rescue and accommodation vessel. It is also used for training.

MAHSURI

12/2007, Chris Sattler / 1167999

1 DIVING SUPPORT/SALVAGE SHIP (ARS)

SETIA SEKAL (ex-Orient Explorer, ex-Lady Gay)

Measurement, tons: 994 gross
Dimensions, feet (metres): 189.9 × 43.3 × 14.8 (57.9 × 13.2 × 4.5)
Main machinery: 4 Daihatsu diesels; 4,200 hp (3.1 MW); 2 shafts; 2 kort nozzles; 1 Kamewa bow thruster, 300 hp (225 kW)
Speed, knots: 12
Complement: 40
Radars: 2 Furuno; I-band.

Comment: Ex-anchor handling tug constructed by Carrington Slipway, Newcastle, NSW in 1974. Refitted by Pan United Shipyard in 1996. Leased as a diving support and salvage vessel by the Royal Malaysian Navy. Equipped with a four-point mooring system, hydra-lift 10-ton crane and a two-unit diving chamber for a total of six men. Also fitted with hospital facilities and a workshop. There is a Launch And Recovery System (LARS) for a wet-bell system capable of mixed-gas diving to 90 m.

COAST GUARD (MARITIME ENFORCEMENT AGENCY)

Headquarters Appointments

Director General

Admiral Datuk Mohd Amdan bin Kurish

Establishment

The Malaysian Maritime Enforcement Agency (MMEA) (or Agensi Penguatkuasaan Maritim Malaysia (APMM)) commenced operations on 30 November 2005. Under the provisions of ACT 633, which came into force on 15 February 2005, the MMEA shall be under the general command and control of the Armed Forces of Malaysia during any period of emergency, special crisis or war.

The MMEA is established through an amalgamation of resources of existing Maritime agencies that include the Royal Malaysian Navy, Royal Malaysian Police, Customs, Fisheries, Marine and Immigration Department. The MMEA has a force of approximately 100 over vessels comprising ships and craft. There are plans to purchase helicopters and fixed-wing aircraft.

Principal Missions

Enforcement of law and order under Malaysian Federal Law
 Maritime search and rescue
 Air and coastal surveillance

Maintenance of maritime safety and security
 Control and prevention of maritime pollution
 Prevention and suppression of piracy and illicit traffic in narcotic drugs

Personnel

2009: 2,000 approx
 There are plans to build up to a force of about 4,025 personnel.

Organisation

The Malaysian Maritime Zone is divided into five maritime regions which consist of 18 maritime districts.

Bases

MMEA HQ: Putrajaya
 Northern Peninsula: Regional HQ: Langkawi (HQ)
 District: Langkawi, Pulau Pinang, Lumut
 Southern Peninsula: Regional HQ: Johore Bahru
 District: Johore Baharu, Port Klang, Kuala Linggi, Tanjung Sedili
 Eastern Peninsula: Regional HQ: Kuantan
 District: Kuantan, Kuala Trengganu, Tok Bali
 Sarawak: Regional HQ: Kuching
 District: Kuching, Bintulu, Miru
 Sabah: Regional HQ: Kota Kinabalu
 District: Kota Kinabalu, Labuan, Kudat, Sandakan, Tawau

PATROL FORCES

Notes: (1) There are 38 RHIB craft with pennant numbers 711-738

(2) There is one 9 m patrol craft *Pengaman 1* (ex-*Mastura*) with pennant number 901

(3) There are five craft *Pelindung 1* (ex-PL 27), *Pelindung 2* (ex-PL 48), *Pelindung 3* (ex-PL 50), *Pelindung 4* (ex-PL 59), *Pelindung 5* (ex-PL 60) with pennant numbers 701-705.

PELINDUNG 4 (police colours)

12/2007, Chris Sattler / 1167994

2 LANGKAWI CLASS (OFFSHORE PATROL VESSELS) (PSOH)

Name	No	Builders	Launched	Commissioned
LANGKAWI (ex-Musyitari)	7501 (ex-180)	Korea Shipbuilders, Pusan	20 July 1984	18 Dec 1985
BANGGI (ex-Marikh)	7502 (ex-181)	Malaysia SB and E Co, Johore	21 Jan 1985	9 Apr 1987

Displacement, tons: 1,300 full load
Dimensions, feet (metres): 246 × 35.4 × 12.1 (75 × 10.8 × 3.7)
Main machinery: 2 SEMT Pielstick diesels; 12,720 hp(m) (9.35 MW); 2 shafts
Speed, knots: 22
Range, n miles: 5,000 at 15 kt
Complement: 76 (10 officers)
Guns: 1—57 mm.
 2 Emerson Electric 30 mm (twin); 1,200 rds/min combined to 6 km (3.2 n miles); weight of shell 0.35 kg.
Countermeasures: ESM. Thales DR 3000; intercept.
Weapons control: PEAB 9LV 230 optronic system
Radars: Air/surface search: Signaal DA05, E/F-band; range 137 km (75 n miles) for 2 m² target
Navigation: Kelvin Hughes 1007; I-band.
Fire control: Philips 9LV; J-band.
Helicopters: Platform for 1 medium

Programmes: Ordered in June 1983
Structure: Flight deck suitable for Sikorsky S-61A Nuri army support helicopter.
Operational: These ships were transferred from the Malaysian Navy on 23 June 2006 and became operational in 2007. Based in the Eastern Peninsula region.

JARAK (ex-Badek)	3134 (ex-37)	Vosper Ltd, Portsmouth	15 Dec 1966
KUKUP (ex-Panah)	3135 (ex-42)	Vosper Ltd, Portsmouth	27 July 1967
SEMPADI (ex-Kelewang)	3136 (ex-45)	Vosper Ltd, Portsmouth	4 Oct 1967
LABAS (ex-Sri Sabah)	3137 (ex-3144)	Vosper Ltd, Portsmouth	2 Sep 1964
NYIREH (ex-Sri Negri Sembilan)	3138 (ex-3146)	Vosper Ltd, Portsmouth	28 Sep 1964
KURAMAN (ex-Renchang)	3139 (ex-38)	Vosper Ltd, Portsmouth	17 Jan 1967
SIAMIL (ex-Tombak)	3140 (ex-39)	Vosper Ltd, Portsmouth	2 Mar 1967
PEMANGGIL (ex-Kerambit)	3141 (ex-43)	Vosper Ltd, Portsmouth	28 July 1967
BIDONG (ex-Beladai)	3142 (ex-44)	Vosper Ltd, Portsmouth	12 Sep 1967
SATANG (ex-Rentaka)	3143 (ex-46)	Vosper Ltd, Portsmouth	22 Sep 1967
RUMBIA (ex-Sri Melaka)	3144 (ex-3147)	Vosper Ltd, Portsmouth	2 Nov 1964
LIGITAN (ex-Lembing)	3145 (ex-40)	Vosper Ltd, Portsmouth	12 Apr 1967

Displacement, tons: 96 standard; 109 full load
Dimensions, feet (metres): 103 × 19.8 × 5.5 (31.4 × 6 × 1.7)
Main machinery: 2 Bristol Siddeley or MTU MD 655/18 diesels; 3,500 hp(m) (2.57 MW); 2 shafts
Speed, knots: 27
Range, n miles: 1,400 (1,660 Sabah class) at 14 kt
Complement: 22 (3 officers)

Guns: 2 Bofors 40 mm/70. 2—7.62 mm MGs.
Radars: Surface search: Racal Decca Bridgemaster ARPA; I-band.
Comment: The four ex-Sabah class were ordered in 1963 for delivery in 1964. The boats of the ex-Kris class were ordered in 1965 for delivery between 1966 and 1968. All are of prefabricated steel construction and are fitted with

air conditioning and Vosper roll damping equipment. The differences between the classes are minor, the later ones having improved radar, communications, evaporators and engines of MTU, as opposed to Bristol Siddeley construction. All have been refitted to extend their operational lives and transferred from the Malaysian Navy to MMEA by June 2006. Similar craft in service in Panama.

Maldives

Country Overview

Formerly a British Protectorate, The Maldives gained independence in 1965 and a republic was established in 1968. Situated in the northern Indian Ocean, southwest of the southern tip of India, the country comprises a 468 n mile long chain of

nearly 2,000 small coral islands that are grouped together into clusters of atolls. The capital and principal commercial centre is Malé and other populous atolls include Suvadiva and Tiladummati. An archipelagic state, territorial waters (12 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has been claimed although the limits

have only been partly defined by boundary agreements.

1 CHEVERTON CLASS (PB)

BUREVI 116 (ex-7)

Displacement, tons: 26 full load
Dimensions, feet (metres): 56.7 × 14.4 × 4.3 (17.3 × 4.4 × 1.3)
Main machinery: 2 MAN B&W diesels; 850 hp (634 kW) sustained; 2 shafts
Speed, knots: 23. **Range, n miles:** 590 at 18 kt
Complement: 10
Guns: 1–12.7 mm MG. 1–762 mm MG.
Radars: Surface search: JRC; I-band.

Comment: GRP hull and aluminium superstructure. Originally built by Fairey Marine, UK, for Kiribati and subsequently sold to Maldives and commissioned on 11 September 1981. Used for security and SAR operations.

BUREVI

6/2005, Maldives Coast Guard / 1133512

3 HARBOUR PATROL CRAFT (PB)

HP 1 **HP 2** **HP 4**

Displacement, tons: 6 full load
Dimensions, feet (metres): 36.1 × 7.5 × 1.8 (11.0 × 2.3 × 0.5)
Main machinery: 2 Yamaha outboard engines; 500 hp (375 kW)
Speed, knots: 30
Range, n miles: 90 at 25 kt
Complement: 8
Guns: 1–762 mm MG.

Comment: Built by Gulf Craft Service based in the Maldives. GRP hull. First craft commissioned 12 December 1999. Used for harbour patrol and SAR duties.

HARBOUR PATROL CRAFT

6/2005, Maldives Coast Guard / 1133510

1 LANDING CRAFT (LCM)

LC 1

Displacement, tons: 38.4
Dimensions, feet (metres): 68.6 × 16.4 × 2.3 (20.9 × 5.0 × 0.7)
Main machinery: 2 MAN B&W D 2842 LE 401 diesels; 2 Hamilton waterjets
Speed, knots: 20
Range, n miles: 500 at 18 kt
Complement: 7
Guns: 2–762 mm MGs.
Radars: Surface search/Navigation: JRC; I-band.

Comment: Built by Colombo Dockyard and commissioned on 12 December 1999. Aluminium hull and superstructure. Used for carrying troops and supplies.

Malta

Country Overview

Formerly a British colony, the Republic of Malta gained independence in 1964. Situated 45 n miles south of Sicily, the country comprises the islands of Malta (95 square miles), Gozo (26 square miles), Comino, Kemmalett, and Filfla. It has a 76 n mile coastline with the Mediterranean Sea. The capital, largest town and principal port is Valletta. Territorial seas (12 n miles) are claimed. A fishery management and conservation zone of 25 n miles is also claimed.

Headquarters Appointments

Officer Commanding Maritime Squadron:
Major Wallace Camilleri

General

The Maritime Squadron of the Armed Forces of Malta was established in November 1970. An independent unit of the

Armed Forces of Malta, it is employed primarily as a Coast Guard

Personnel

2009: 242 (14 officers)

PATROL FORCES

2 MARINE PROTECTOR CLASS (PB)

P 51 P 52

Displacement, tons: 91 full load
Dimensions, feet (metres): 86.9 × 19 × 5.2 (26.5 × 5.8 × 1.6)
Main machinery: 2 MTU 8V 396TE94 diesels; 2,680 hp(m) (1.97 MW) sustained; 2 shafts
Speed, knots: 25 **Range, n miles:** 900 at 8 kt
Complement: 10 (1 officer)
Radars: Navigation: I-band.

Comment: Built by Bollinger Shipyards to US Coast Guard specifications. The vessels are based on the hull of the Damen Stan Patrol 2600 in service with the Hong Kong police. Steel hull with GRP superstructure. A stern ramp is used for launching a 5.5 m RIB. P 51 was commissioned 18 November 2002 and P 52 was commissioned 7 July 2004

P 51 11/2007, Marco Ghiglino / 11/0193

1 DICOTTI CLASS (OFFSHORE PATROL VESSEL) (PBO)

P 61

Displacement, tons: 393 full load
Dimensions, feet (metres): 176.2 × 28.6 × 17.7 (53.4 × 8.1 × 5.4)
Main machinery: 2 Isotta Fraschini V1716T2 MSD diesels; 6,335 hp (4.7 MW); 2 shafts
Speed, knots: 23 **Range, n miles:** 2,100 at 18 kt
Complement: 25 (4 officers)
Guns: 1 Otobreda 25 mm, 2—12.7 mm MGs.
Radars: Surface search: E/F-band
Navigation: I-band
Helicopters: Platform for 1 medium.

Comment: Financed from the 5th Italo-Maltese Protocol, contract signed on 12 March 2004 with Fincantieri, Muggiano, Italy for the construction of one vessel. The ship was commissioned on 3 November 2005. The contract included a training and logistic support package. Design based on Dicotti (modified Saettia) class vessels in service with the Italian Coast Guard. Steel hull with helicopter deck and stern ramp for launching a 6.5 m RIB.

P 61 10/2005, Air Squadron, AFM / 1133090

2 BREMSE CLASS (INSHORE PATROL CRAFT) (PBI)

P 32 (ex-G 33/GS 20) P 33 (ex-G 22/GS 22)

Displacement, tons: 42 full load
Dimensions, feet (metres): 74.1 × 15.4 × 3.6 (22.6 × 4.7 × 1.1)
Main machinery: 2 Iveco (P 32) diesels; 1,000 hp(m) (745 kW); 2 shafts
Speed, knots: 17
Complement: 9
Guns: 1—12.7 mm MG
Radars: Surface search: Racal 1290A; I-band

Comment: Built in 1971–72 for the ex-GDR GBK. Transferred from Germany in mid-1992. Others of the class acquired by Tunisia. P 32 completed mid-life upgrade in 2005. P 33 is in reserve but it is unlikely to be upgraded.

P 32 11/2007, Marco Ghiglino / 11/0192

2 SWIFT CLASS (HARBOUR PATROL CRAFT) (YP)

P 23 (ex-C 6823) P 24 (ex-C 6824)

Displacement, tons: 22.5 full load
Dimensions, feet (metres): 50 × 13 × 4.9 (15.6 × 4 × 1.5)
Main machinery: 2 GM 12V-71 diesels, 680 hp (507 kW) sustained; 2 shafts
Speed, knots: 25
Range, n miles: 400 at 18 kt
Complement: 6
Guns: 1—12.7 mm MG
Radars: Surface search: Furuno 1040, I band.

Comment: Built by Sewart Seacraft Ltd in 1967. Transferred from US in February 1971. Have an operational endurance of about 24 hours. Modernised in Malta in 1998/99

P 24 11/2007, Marco Ghiglino / 11/0191

2 SUPERVITTORIA 800 CLASS (SAR)

MELITA I MELITA II

Displacement, tons: 12.5 full load
Dimensions, feet (metres): 37.7 × 18.1 × 2.6 (11.5 × 4.9 × 0.8)
Main machinery: 2 Cummins 6CTA 8.3 DIAMONS; 840 hp(m) (618 kW); 2 Kamewa FF310 waterjets
Speed, knots: 34
Range, n miles: 160 at 34 kt
Complement: 4
Radars: Surface search: Raytheon Pathfinder SL 70; I-band.

Comment: Built in 1998 by Vitoria Naval Shipyard, Italy, for the Civil Protection Department of Malta. Transferred to the Armed Forces of Malta (AFM) in May 1999 for search and rescue duties. Although still the property of the Civil Protection Department, the Melita I and II are operated and maintained by the Maritime Squadron of the AFM.

MELITA I 11/2007, Marco Ghiglino / 11/0190

1 HIGH-SPEED INTERCEPTION CRAFT (HSIC)

P 01

Displacement, tons: 3.4 full load
Dimensions, feet (metres): 34.0 x 8.8 x 2.6 (10.37 x 2.67 x 0.8)
Main machinery: 2 VM diesels; 600 hp (450 kW); 2 shafts
Speed, knots: 50+ **Range, n miles:** 200 at 35 kt
Complement: 2 plus 8
Guns: 1—7.62 mm MG.
Radars: Navigation: Furuno; I-band

Comment: Co-financed by the EU. RIB 33SC designed and built by FB Design, Italy, and commissioned in February 2006. The high-speed interception craft is to provide support to maritime law enforcement agencies and special forces.

P 01 6/2006, Lawrence Dalli / 1158416

BN ISLANDER 2001, Douglas-John Falzon / 0114534

Notes: The Armed Forces of Malta operate two Britten-Norman BN-2B maritime patrol aircraft, five BAe Bulldog T. Mk 1 observation aircraft, two Nardi MD NH 500HM, five SA.316B/D Alouette III and two AB-47G-2 helicopters

ALOUETTE III 4/2006, Frank Findler / 1305138

NH 500 4/2002, Adolfo Ortigueira Gil / 0668875

Marshall Islands

Country Overview

The Republic of the Marshall Islands was a US-administered UN Trust territory from 1947 before becoming a self-governing republic in 1979. In 1986, a Compact of Free Association, delegating to the US the responsibility for defence and foreign affairs, came into effect. The country

consists of some 1,200 atolls and reefs in the central Pacific. There are two main island groups: the Ratak and Ralik chains. Majuro is the capital island. Kwajalein is the largest atoll and is leased as a US missile test range. Bikini and Eniwetok are former US nuclear test sites. An archipelagic state, territorial seas (12 n miles) are claimed. An Exclusive Economic Zone (EEZ) (200 n miles)

is also claimed but limits have not been fully defined.

Headquarters Appointments

Chief of Surveillance
Major Thomas Heine

PATROL FORCES

1 PACIFIC CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
LOMOR	03	Australian Shipbuilding Industries	29 June 1991

Displacement, tons: 162 full load
Dimensions, feet (metres): 103.3 x 26.6 x 6.9 (31.5 x 8.1 x 2.1)
Main machinery: 2 Caterpillar 3516TA diesels, 4,400 hp (3.3 MW) sustained; 2 shafts
Speed, knots: 20
Range, n miles: 2,500 at 12 kt
Complement: 17 (3 officers)
Guns: 1—12.7 mm MG
Radars: Surface search: Furuno 8111, I-band

Comment: The 14th craft to be built in this series for a number of Pacific Island coast guards. Ordered in 1989. Following the decision by the Australian government to extend the Pacific Patrol Boat project to a 30-year life for each boat, Lomor completed a half-life refit in 1999 and a life-extension refit in December 2008

LOMOR 12/2008, Chris Sattler / 1335795

Mauritania

MARINE MAURITANIENNE

Country Overview

A former French colony, The Islamic Republic of Mauritania gained full independence in 1960. With an area of 397,955 square miles, it is situated in northwestern Africa and has borders to the north with western Sahara and Algeria, to the east with Mali and to the south with Senegal. It has a 405 n mile coastline with the Atlantic Ocean. The capital and largest city is Nouakchott while Nouadhibou is the principal port. Territorial seas (12 n miles) are claimed

but while it has claimed a 200 n mile Exclusive Economic Zone (EEZ), its limits have not been defined by boundary agreements.

Personnel

(a) 2009: 500 (40 officers) plus 200 marines
 (b) Voluntary service

Bases

Port Etienne, Nouadhibou (new quay began construction in 2007)
 Port Friendship, Nouakchott

Headquarters Appointments

Commander of Navy:
Captain Isselkou Ould Cheikh El-Wel

Main machinery: 2 MTU-Bazán MA 16V 362 S880 diesels; 2,450 hp (1.8 MW); 2 shafts
Speed, knots: 13. **Range, n miles:** 1,200 at 13 kt
Complement: 12
Guns: 1 Oerlikon 20 mm/120 Mk 10, 1—12.7 mm MG
Radars: Surface search: Furuno, I-band.

Comment: Former Spanish coastal patrol craft transferred in 2007. The details are as for the vessels in Spanish service and may differ

CONJERA CLASS 9/2006, Adolfo Ortigueira Gil / 1040693

1 RAIDCO RPB 18 CLASS (PATROL CRAFT) (PB)

YACOB OULD RAJEL

Displacement, tons: To be announced
Dimensions, feet (metres): 58.3 x 15.1 x 4.1 (17.9 x 4.6 x 1.25)
Main machinery: 2 MAN V12 diesels; 1,500 hp (1.1 MW); 2 shafts
Speed, knots: 23
Radars: Navigation: I-band.

Comment: Donated by the European Union, the vessel was built by Raidco Marine and delivered in 2000. Steel hull and aluminium superstructure. Used for fishery protection. A similar craft, *Dah Ould Bah*, is operated by the Customs Service.

LAND-BASED MARITIME AIRCRAFT

Numbers/Type: 2 Piper Cheyenne II.
Operational speed: 283 kt (524 km/h).
Service ceiling: 31,600 ft (9,630 m).
Range: 1,510 n miles (2,796 km).
Role/Weapon systems: Coastal surveillance and EEZ protection acquired 1981 Sensors. Bendix 1400 weather radar; cameras. Weapons: Unarmed

Mauritius**Country Overview**

A former British colony, the Republic of Mauritius gained independence in 1968 and became a republic in 1992. Situated in the western Indian Ocean, east of Madagascar, it comprises the islands of Mauritius (720 square miles), Rodrigues (42 square miles), the Agalega islands to the north and the St Brandon Group (also known as the Cargados Carajos Shoals) to the northeast. The capital, largest town and principal port is Port Louis. Territorial seas (12 n miles) are claimed but, while it has declared a 200 n mile Exclusive Economic Zone (EEZ), the claim is

complicated by disputes over the sovereignty of Tromelin Island (France) and Diego Garcia (UK).

A maritime security force was established in 1974 with the donation of MNS *Amar* by India. The National Coast Guard, a specialised wing of the Mauritius Police Force, was formed in 1987.

Headquarters Appointments

Commandant National Coast Guard:
 Commander Mahendra V S Negi

Port Louis (plus 24 manned CG stations)

Personnel

2009: 750 (including officers on deployment)

Maritime Aircraft

2 Dornier 228 (MPCG 1 and 3).
 1 Britten-Norman BN-2-T Defender (MPCG 2).

COAST GUARD

Notes: There are approximately 80 inshore craft (RHIBs, glass fibre boats and so on) in addition to those listed.

1 VIGILANT CLASS (PSOH)

6 TORNADO VIKING 580 RHIB (PBI)

Displacement, tons: 2
Dimensions, feet (metres): 18.7 × 8.5 × 2.5 (5.7 × 2.6 × 0.75)
Main machinery: 1 Yamaha outboard motor; 90 hp
Speed, knots: 35
Complement: 10 including passengers

Comment: Acquired in 2004

VIKING 580 6/2004, Mauritius Coast Guard / 0569763

Mexico MARINA NACIONAL

Country Overview

The United Mexican States is a federal republic in North America. A total land area of 756,066 square miles includes a number of offshore islands. Bordered to the north by the United States and to the south by Belize and Guatemala, it has a 1,382 n mile coastline with the Caribbean and Gulf of Mexico and 3,856 n mile coastline with the Pacific Ocean. The capital and largest city is Mexico City while the principal ports are Acapulco (Pacific) and Veracruz (Gulf of Mexico). Territorial seas (12 n miles) are claimed. A 200 n mile EEZ has also been claimed but the limits have not been fully defined by boundary agreements.

Headquarters Appointments

Secretary of the Navy:

Admiral Marco Mariano Francisco Saynez Mendoza

Under-Secretary of the Navy:

Admiral Raul Santos Galán Villanueva

Commander of the Navy:

Admiral Moses Gomez Cabrera

Inspector General of the Navy:

Admiral Sergio Enrique Henaro Galán

Chief of the Naval Staff:

Admiral Jorge Humberto Pastor Gómez

Flag Officers

Commander in Chief, Gulf and Caribbean:

Admiral Joseph Mars Camarena

Commander in Chief, Pacific:

Admiral Nestor Amador Evencio Yee

Personnel

- (a) 2009: 46,972 officers and men (including 946 Naval Air Force and 11,385 Marines)
 (b) Military service

Naval Bases and Commands

The Naval Command is split between the Pacific and Gulf areas each with a Commander-in-Chief with HQs at Manzanillo and Tuxpan respectively. Each area has three

naval Regions which are further subdivided into Zones (9), Sectors (11) and Subsectors (7). There is a Central Naval Region that has an HQ in Mexico City.

Gulf Area

First Naval Region (HQ Tuxpan, Veracruz)

I Naval Zone (HQ Ciudad Madero, Tamaulipas)

Naval Sector (Matamoros, Tamaulipas)

Naval Sector (La Pesca, Tamaulipas)

III Naval Zone (HQ Veracruz, Veracruz)

Naval Sector (HQ Coatzacoalcos, Veracruz)

Third Naval Region (HQ Ciudad del Carmen, Campeche)

V Naval Zone (HQ Frontera Tabasco, Campeche)

VII Naval Zone (HQ Lerma, Campeche)

Naval Sector (HQ Champotón, Campeche)

Fifth Naval Region (HQ Isla Mujeres, Quintana Roo)

IX Naval Zone (HQ Yukalpeten, Yucatán)

XI Naval Zone (HQ Chetumal, Quintana Roo)

Naval Subsector (HQ Isla Cozumel, Quintana Roo)

Pacific Area

Second Naval Region (HQ Ensenada, Baja California)

Naval Sector (HQ Puerto Cortez, Baja California)

Fourth Naval Region (HQ Guaymas, Sonora)

Naval Sector (HQ San Felipe, Baja California)

Naval Sector (HQ Puerto Penasco, Baja California)

II Naval Zone (HQ La Paz, Baja California Sur)

Naval Sector (HQ Santa Rosalía, Baja California Sur)

Naval Sector (HQ Los Cabos, Baja California Sur)

IV Naval Zone (HQ Mazatlán, Sinaloa)

Naval Sector (HQ Topolobampo, Sinaloa)

Sixth Naval Region (HQ Manzanillo, Colima)

Naval Sector (HQ Isla Socorro, Colima)

VI Naval Zone (HQ San Blas, Nayarit)

X Naval Zone (HQ Lázaro Cárdenas, Michoacán)

Eighth Naval Region (HQ Acapulco, Guerrero)

Naval Sector (HQ Ixtapa Zihuatanejo, Guerrero)

XII Naval Zone (HQ Salina Cruz, Oaxaca)

Naval Sector (HQ Huatulco, Oaxaca)

XIV Naval Zone (HQ Puerto Chiapas, Chiapas)

Naval Air Force

Six naval air bases at Mexico City, Veracruz, Campeche, Chetumal, Tapachula and La Paz; there are two Naval Air Stations at Guaymas and Tampico.

Marine Forces

There are two Amphibious Reaction Forces, based at Manzanillo and Tuxpan; one Parachute Battalion, 30 Infantry Battalions and one Presidential Guards Battalion based in Mexico City.

Strength of the Fleet

Type	Active	Building
Destroyers	1	-
Frigates	7	-
Gunships	19	2
Large Patrol Craft	26	-
Coast Guard	11	-
Coastal and River Patrol Craft	60	12
Survey Ships	7	-
Support Ships	7	-
Tankers	2	-
Sail Training Ship	1	-

Names and Pennant Numbers

Many of the ship names and pennant numbers were changed in early 1994 and again in 2001. Destroyers and frigates are named after Aztec emperors and forerunners of the Independence War (1810-1825). Gunboats are named after naval and military heroes.

FRIGATES

4 ALLENDE (KNOX) CLASS (FFHM)

Name	No	Builders	Laid down	Launched	Commissioned
IGNACIO ALLENDE (ex-Stein)	F 211 (ex-E 50, ex-FF 1065)	Lockheed	1 June 1970	19 Dec 1970	8 Jan 1972
MARIANO ABASOLO (ex-Marvin Shields)	F 212 (ex-E 51, ex-FF 1066)	Todd Shipyards	12 Apr 1968	23 Oct 1969	10 Apr 1971
GUADALOUPE VICTORIA (ex-Pharris)	F 213 (ex-E 52, ex-FF 1094)	Avondale Shipyards	11 Feb 1972	16 Dec 1972	26 Jan 1974
FRANCISCO JAVIER MINA (ex-Whipple)	F 214 (ex-FF 1062)	Todd Shipyards	24 Apr 1967	12 Apr 1968	22 Aug 1970

Displacement, tons: 3,011 standard; 4,260 full load
Dimensions, feet (metres): 439.6 x 46.8 x 15; 24.8 (sonar)
 (134 x 14.3 x 4.6; 7.8)

Main machinery: 2 Combustion Engineering/Babcock & Wilcox boilers; 1,200 psi (84.4 kg/cm²); 950°F (510°C); 1 Westinghouse turbine; 35,000 hp (26 MW); 1 shaft

Speed, knots: 27

Range, n miles: 4,000 at 22 kt on 1 boiler

Complement: 288 (20 officers)

Missiles: SAM: 1 octuple Mk 25 launcher for Sea Sparrow RIM-7P (in F 211) (see *Structure*); semi-active radar homing to 16 km (8.5 n miles) at 2.5 Mach; warhead 38 kg. SA-N-10; IR homing to 5 km (2.7 n miles) at 1.7 Mach, warhead 1.5 kg.

A/S: Honeywell ASROC Mk 16 octuple launcher with reload system (has 2 cells modified to fire Harpoon); inertial guidance to 1.8–10 km (1–5.4 n miles); payload Mk 46.

Guns: 1 FMC 5 in (127 mm)/54 Mk 42 Mod 9; 20–40 rds/min to 24 km (13 n miles) anti-surface; 14 km (7.7 n miles) anti-aircraft, weight of shell 32 kg.

Torpedoes: 4–324 mm Mk 32 (2 twin) fixed tubes; 22 Honeywell Mk 46; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg

Countermeasures: Decoys: 2 Loral Hyco SRBOC 6-barrelled fixed Mk 36; IR flares and chaff to 4 km (2.2 n miles). T Mk-6 Fanfare/SLO-25 Nixie; torpedo decoy. Prairie Masker hull and blade rate noise suppression.

ESM: SLO-32(V)2; intercept

IGNACIO ALLENDE

(Scale 1 : 1,200), Ian Sturton / 011466R

Weapons control: Mk 68 Mod 3 GFCS Mk 114 Mod 6 ASW FCS.

Mk 1 target designation system. MMS target acquisition sight (for mines, small craft and low flying aircraft)

Radars: Air search: Lockheed SPS-408; B-band Surface search: Raytheon SPS-10 or Norden SPS-67; G-band.

Navigation: Marconi LN66; I-band.

Fire control: Western Electric SPG-53D/F; I/J-band. Tecan: SRN 15.

Sonars: EDO/General Electric SOS-26CX; bow-mounted; active search and attack; medium frequency.

Helicopters: 1 BO 105 CB

Programmes: First pair decommissioned from USN in 1992/93. Both transferred on 29 January 1997 and

arrived in Mexico 16 August 1997. Both then underwent extensive refits, entering service on 23 November 1998. Third of class (ex-Pharris) transferred 2 February 2000 and recommissioned on 16 March 2000. The fourth ship (ex-Whipple) transferred in August 2001 and recommissioned on 1 November 2002.

Modernisation: To be fitted with SSM (Harpoon or Gabriel II).
Structure: Four Mk 32 torpedo tubes are fixed in the midships structure, two to a side, angled out at 45°. The original Knox class SAM launcher has been put back aft, in F 211 only.

Operational: In US service these ships had Harpoon SSM, but it is reported that these weapons are not carried. Pennant numbers changed in 2001. All based at Tuxpan.

11/1998, Mexican Navy / 0017679

IGNACIO ALLENDE

6/2005, Mexican Navy / 1153500

2 BRAVO (BRONSTEIN) CLASS (FFH)

Name	No	Builders	Laid down	Launched	Commissioned
NICOLAS BRAVO (ex-McClay)	F 201 (ex-E 40, ex-FF 1038)	Avondale Shipyards	15 Sep 1961	9 June 1962	21 Oct 1963
HERMENEGILDO GALEANA (ex-Bronstein)	F 202 (ex-E 42, ex-FF 1037)	Avondale Shipyards	16 May 1961	31 Mar 1962	16 June 1963

Displacement, tons: 2,360 standard; 2,650 full load
Dimensions, feet (metres): 371.5 x 40.5 x 13.5, 23 (sonar)
 (113.2 x 12.3 x 4.1; 7)

Main machinery: 2 Foster-Wheeler boilers; 1 De Laval geared turbine; 20,000 hp (14.92 MW); 1 shaft
Speed, knots: 23.5. **Range, n miles:** 3,924 at 15 kt
Complement: 207 (17 officers)

Missiles: A/S: Honeywell ASROC Mk 112 octuple launcher

Guns: 2 USN 3 in (76 mm)/50 (twin) Mk 33; 50 rds/min to 12.8 km (7 n miles); weight of shell 6 kg, or 1 Bofors 57 mm/70 Mk 2; 220 rds/min to 17 km (9.3 n miles); weight of shell 2.4 kg.

Torpedoes: 6—324 mm US Mk 32 Mod 7 (2 triple tubes)
 14 Honeywell Mk 46; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg

Countermeasures: Decoys: 2 Loral Hycor 6-barrelled fixed Mk 33; IR flares and chaff to 4 km (2.2 n miles)
 T-Mk 6 Fanfare; torpedo decoy system.

Weapons control: Mk 58 GFCS. Mk 114 ASW FCS Mk 1 target designation system. Eisag NA 18 optronic director may be fitted.

Radars: Air search: Lockheed SPS-40D; B-band; range 320 km (175 n miles)
 Surface search: Raytheon SPS-10F; G-band.

NICOLAS BRAVO

(Scale 1 : 900), Ian Sturton / D506240

Navigation: Marconi LN66; I-band
Fire control: General Electric Mk 35; I/J-band.
Sonars: EDO/General Electric SQS-26 AXR; bow-mounted; active search and attack, medium frequency.

Helicopters: Platform and some facilities but no hangar

Programmes: Transferred from the US to Mexico by sale 12 November 1993 having paid off in December 1990.

Modernisation: Bofors 57 mm SAK may be fitted to replace the Mk 33 gun, possibly with an Eisag NA 18 optronic director

Structure: Position of stem anchor and portside anchor (just forward of gun mount) necessitated by large bow sonar dome. As built, a single 3 in (Mk 34) open mount was aft of the helicopter deck, removed for installation of towed sonar which has since been taken out

Operational: ASROC is non-operational. Pannant numbers changed in 2001. Both based at Manzanillo.

HERMENEGILDO GALEANA

6/2004, Mexican Navy / 0589777

SHIPBORNE AIRCRAFT

Numbers/Type: 6 MD 902 Explorer.
Operational speed: 113 kt (210 km/h).
Service ceiling: 9,845 ft (3,000 m).
Range: 407 n miles (754 km).
Role/Weapon systems: Coastal patrol helicopter acquired 1999–2000 for patrol, fisheries protection and EEZ protection duties, SAR as secondary role. Sensors: Bendix search radar. Weapons: MGs or rocket pods

BO 105CB 9/1994, Mexican Navy / 0052605

Numbers/Type: 11 Bolkow BO 105
Operational speed: 100 kt (185 km/h).
Service ceiling: 17,000 ft (5,180 m).
Range: 160 n miles (296 km).
Role/Weapon systems: Coastal patrol helicopter acquired 1982–86 for patrol, fisheries protection and EEZ protection duties, SAR as secondary role. A modernisation programme was announced in October 2003; the first upgraded aircraft was delivered in 2004 and the programme was completed by late 2006. Sensors: Bendix search radar. Weapons: MGs or rocket pods.

BO 105 6/2004, Mexican Navy / 1133542

Numbers/Type: 2 Eurocopter AS 565 AF Fennec.
Operational speed: 121 kt (225 km/h).
Service ceiling: 13,120 ft (4,000 m).
Range: 389 n miles (722 km).
Role/Weapon systems: Patrol helicopter for EEZ protection and SAR. Operated from Oaxaca class patrol ships. More may be acquired when funds are available. Sensors: Bendix 1500 search radar. Weapons: Can carry up to two torpedoes, rocket pods or an MG

AS 565 AF 6/2005, Mexican Navy / 1133541

Numbers/Type: 4 Eurocopter AS 565ME Panther.
Operational speed: 165 kt (305 km/h).
Service ceiling: 15,223 ft (4,640 m).
Range: 200 n miles (370 km).
Role/Weapon systems: Transport and reconnaissance helicopter procured in June 2005. Four further aircraft are to be acquired. Capable of carrying eight passengers or 1,000 kg load

AS 565 ME 6/2005, Mexican Navy / 1133540

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Notes: (1) Transport aircraft used include two Rockwell 306 Sabraliners, three Learjets, one Dash 8-200, 28 Mil Mi-17, four Mil Mi-2 Hoplite and four MD 500E
 (2) Training aircraft include eight Aeromacchi M-290TP Redigos, 14 Maule MX-7-180, nine Zlin Z242L, three Beech B55 Baron, one Cessna 402C, four Lancair and five Schweizer 300C.
 (3) Two Cessna C-208 Grand Caravan Elint aircraft are to be transferred from the US To be equipped with radar and FLIR.

MI-2 6/2005, Mexican Navy / 1133539

MI-17 6/2005, Mexican Navy / 1133537

SABRELINER 6/2005, Mexican Navy / 1133538

Numbers/Type: 3 Grumman E-2C Hawkeye.
Operational speed: 323 kt (598 km/h).
Service ceiling: 37,000 ft (11,278 m).
Range: 1,540 n miles (2,852 km).
Role/Weapon systems: Acquired from Israel in 2004 after refurbishment by Israel Aircraft Industries' (IAI's) Bedek Aviation Group. Equipment details are speculative. Sensors: ESM, ALR-73 PDS, Airborne tactical data system with Links 4A and 11; AN/AP-125 radar; Mk XII IFF. Weapons: Unarmed.

E-2C 6/2004, Mexican Navy / 0589773

Numbers/Type: 7 CASA C-212 Aviocar.
Operational speed: 190 kt (353 km/h).
Service ceiling: 24,000 ft (7,315 m).
Range: 1,650 n miles (3,055 km).
Role/Weapon systems: Acquired from 1987 and used for Maritime Surveillance. Two aircraft upgraded in Spain with EADS/CASA Integrated Tactical System (FITS) in 2003. The remainder upgraded in Mexico by late 2006. One aircraft lost in November 2006. Sensors: Search radar; APS 504. Weapons: Unarmed.

C-212 6/2005, Mexican Navy / 1133536

Numbers/Type: 4 Rockwell Turbo Commander
Operational speed: 250 kt (463 km/h).
Service ceiling: 31,000 ft (9,450 m).
Range: 480 n miles (890 km).
Role/Weapon systems: Acquired in 1992. Used for reconnaissance and transport.

TURBO COMMANDER 6/2004, Mexican Navy / 113354

Numbers/Type: 6 Antonov AN 32B.
Operational speed: 250 kt (463 km/h).
Service ceiling: 26,000 ft (7,925 m).
Range: 750 n miles (1,390 km).
Role/Weapon systems: Acquired 1997-99. Used for transport and reconnaissance. Two aircraft fitted with FLIR.

An-32B 6/2004, Mexican Navy / 0589775

Numbers/Type: 2 Casa CN-235 MP Persuader.
Operational speed: 210 kt (384 km/h).
Service ceiling: 24,000 ft (7,315 m).
Range: 2,000 n miles (3,218 km).
Role/Weapon systems: EEZ surveillance. Two ordered in September 2006 with plans for a further four. Sensors and weapons to be announced.

CN-235 MP (Irish colours) 7/2003, Paul Jackson / 0588935

PATROL FORCES

Notes: The Caribe project was initiated in about 1998 and involves the construction of 31 m patrol craft of 110 tons. One is under construction at ASTIMAR 3 and was reported 30 per cent completed in September 2006.

2 HURACAN (SAAR 4.5) CLASS (FAST ATTACK CRAFT — MISSILE) (PTG)

Name	No	Builders	Launched	Commissioned
HURACAN (ex-Aliya)	301	Israel Shipyards, Haifa	11 July 1980	11 July 1980
TORMENTA (ex-Geoula)	302	Israel Shipyards, Haifa	Oct 1980	31 Dec 1980

Displacement, tons: 498 full load
Dimensions, feet (metres): 202.4 x 24.9 x 9.2
 (61.7 x 7.6 x 2.8)
Main machinery: 4 MTU/Bazán 16V 956 TB91 diesels;
 15,000 hp(m) (11 03 MW) sustained; 4 shafts
Speed, knots: 31
Range, n miles: 3,000 at 17 kt; 1,500 at 30 kt
Complement: 53

Missiles: SSM: 4 IAI Gabriel II; radar or optical guidance; semi-active radar plus anti-radiation homing to 36 km (19.4 n miles) at 0.7 Mach, warhead 75 kg or 4 McDonnell Douglas Harpoon; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.

Guns: 2 Oerlikon 20 mm, 800 rds/min to 2 km.
 1 General Electric/General Dynamics Vulcan Phalanx 6-barrelled 20 mm Mk 15; 3,000 rds/min combined to 15 km anti-missile
 4—12.7 mm (twin or quad) MGs.

Countermeasures: Decoys: 1—45-tube, 4—24-tube, 4 single-tube chaff launchers.

ESM/ECM: Elisra NS 9003/6; intercept and jammer.

Combat data systems: IAI Reshet datalink.

Radars: Air/surface search: Thomson-CSF TH-D 1040 Neptune; G-band

Fire control: Selenia Orion RTN-10X; I/J-band.

Programmes: First two of the original class of five Saar 4.5s, before conversions from Saar 4s were started. Transferred to Mexico on 1 June 2004.

Modernisation: Harpoon may have replaced Gabriel in one or both ships.

HURACAN 7/2004, Diego Quevedo / 0583999

Structure: The CIWS mounted in the eyes of the ship replaced a 40 mm gun. **Operational:** Test-firing of a Gabriel missile took place in June 2005. Both based at Coatzacoalcos.

TORMENTA 7/2004, Diego Quevedo / 0584000

4 HOLZINGER (ÁGUILA) CLASS (GUNSHIPS) (PSOH)

Name	No	Builders	Laid down	Launched	Commissioned
CAPITÁN DE NAVIO SEBASTIAN JOSÉ HOLZINGER (ex-Uxmal)	PO 131 (ex-C 01, ex-GA 01)	ASTIMAR 20, Salina Cruz, Oaxaco	1 June 1985	1 June 1988	1 May 1991
CAPITÁN DE NAVIO BLAS GODÍNEZ (ex-Militia)	PO 132 (ex-C 02, ex-GA 02)	ASTIMAR 1, Tampico, Tamaulipas	7 July 1985	22 Mar 1988	1 Nov 1991
BRIGADIER JOSÉ MARIÁ DE LA VEGA (ex-Paten)	PO 133 (ex-C 03, ex-GA 03)	ASTIMAR 20, Salina Cruz, Oaxaco	22 Sep 1986	1 June 1988	16 Mar 1994
GENERAL FELIPE B BERRIOZÁBAL (ex-Anahuac)	PO 134 (ex-C 04, ex-GA 04)	ASTIMAR 1, Tampico, Tamaulipas	9 Mar 1988	21 Apr 1991	18 Mar 1994

Displacement, tons: 1,290 full load
Dimensions, feet (metres): 244.1 × 34.4 × 11.1
 (74.4 × 10.5 × 3.4)
Main machinery: 2 MTU 20V 956 TB92 diesels; 11,700 hp(m)
 (8.6 MW) sustained; 2 shafts
Speed, knots: 22
Range, n miles: 3,920 at 16 kt
Complement: 75 (11 officers)

Guns: 1 Bofors 57 mm/70 Mk 2 (PO 133, PO 134); 220 rds/min to 17 km (9.3 n miles); weight of shell 2.4 kg or 2 Bofors 40 mm/60 (1 twin) (PO 131, PO 132).

Combat data systems: Elsig 2 CSDA-10

Weapons control: Elsig NA 18 optronic director (PO 133, PO 134)

Radars: Surface search: Raytheon SPS-64(V)6A; I-band.
 Navigation: Kelvin Hughes Nucleus; I-band.

Helicopters: 1 MBB BO 105 CB.

Programmes: Originally four were ordered from Tampico and Veracruz. First laid down November 1983, second in 1984 but then there were delays caused by financial problems. Named after military heroes.

Structure: An improved variant of the Bazán Falcon (Urbe) class with a flight deck extended to the stern.

Operational: Pennant numbers changed in 2001. All based at Lazero.

GENERAL FELIPE B BERRIOZÁBAL

6/2005, Mexican Navy / 1133533

3 SIERRA CLASS (GUNSHIPS) (PSOH)

Name	No	Builders	Laid down	Launched	Commissioned
JUSTO SIERRA MENDEZ	PO 141 (ex-C 2001)	ASTIMAR 1, Tampico, Tamaulipas	19 Jan 1998	1 June 1998	1 June 1998
GUILLERMO PRIETO	PO 143 (ex-C 2003)	ASTIMAR 1, Tampico, Tamaulipas	1 June 1998	18 Sep 1999	18 Sep 1999
MATIAS ROMERO	PO 144 (ex-C 2004)	ASTIMAR 20, Salina Cruz, Oaxaco	23 July 1998	17 Sep 1999	17 Sep 1999

Displacement, tons: 1,344 full load
Dimensions, feet (metres): 231.0 × 34.4 × 9.2
 (70.4 × 10.5 × 2.8)
Main machinery: 2 Caterpillar 3616 V16 diesels; 6,197 hp(m)
 (4.55 MW); 2 shafts
Speed, knots: 18
Complement: 76 (10 officers)

Missiles: SA-N-10 (PO 144); IR homing to 5 km (2.7 n miles) at 1.7 Mach; warhead 1.5 kg.

Guns: 1 Bofors 57 mm/70 Mk 3; 220 rds/min to 17 km (9.3 n miles); weight of shell 2.4 kg.

Combat data systems: Alenia 2.

Weapons control: Saab EOS 450 optronic director.

Radars: Air/surface search: E/F-band
 Surface search: I-band.

Helicopters: 1 MD 902 Explorer.

Programmes: Follow on to the Holzinger class. Ordered in 1997.

Structure: Derived from the Holzinger class but with a markedly different superstructure. All ships carry 11 m interceptor craft capable of 50 kt.

Operational: All based at Acapulco. PO 142 *Benito Juárez* badly damaged by fire in October 2003 and subsequently decommissioned. The ship was sunk as a target in July 2007.

JUSTO SIERRA MENDEZ

4 DURANGO CLASS (GUNSHIPS) (PSOH)

Name	No	Builders	Laid down	Launched	Commissioned
DURANGO	PO 151	ASTIMAR 1, Tampico, Tamaulipas	18 Dec 1999	11 Sep 2000	11 Sep 2000
SONORA	PO 152	ASTIMAR 20, Salina Cruz, Oaxaco	14 Dec 1999	4 Sep 2000	4 Sep 2000
GUANAJUATO	PO 153	ASTIMAR 1, Tampico, Tamaulipas	2000	13 Dec 2001	13 Dec 2001
VERACRUZ	PO 154	ASTIMAR 20, Salina Cruz, Oaxaco	4 Sep 2000	17 Dec 2001	17 Dec 2003

Displacement, tons: 1,470 full load
 Dimensions, feet (metres): 268.4 x 34.4 x 9.2
 (81.8 x 10.5 x 2.8)

Main machinery: 2 Caterpillar 3616 V16 diesels, 6 197 hp(m)
 (4.55 MW); 2 shafts

Speed, knots: 18

Complement: 76 (10 officers)

Guns: 1 Bofors 57 mm/70 Mk 3; 220 rds/min to 17 km
 (9.3 n miles); weight of shell 2.4 kg.

Combat data systems: Alenia 2.

Weapons control: Saab EDS 450 optronic director.

Radars: Air/surface search: E/F-band

Surface search: I-band.

Helicopters: 1 MD 902 Explorer

Programmes: Follow on to the Sierra class. Ordered on
 1 June 1998.

Structure: Derived from the Holzinger class but with
 a markedly different superstructure. Durango class
 slightly larger than the Sierra class. All ships carry 11 m
 interceptor craft capable of 50 kt.

Operational: PO 151 and PO 152 based at Guaymas and
 PO 153 and PO 154 at Coatzacoalcos

DURANGO

8/2004, Mexican Navy / 0589/70

2 + 2 (2) OAXACA CLASS (GUNSHIPS) (PSOH)

Name	No	Builders	Laid down	Launched	Commissioned
OAXACA	PO 161	ASTIMAR 20, Salina Cruz, Oaxaco	17 Dec 2001	11 Apr 2003	Feb 2005
BAJA CALIFORNIA	PO 162	ASTIMAR 1, Tampico, Tamaulipas	13 Dec 2001	21 May 2003	Apr 2007
BICENTENARIO	PO 163	ASTIMAR 20, Salina Cruz, Oaxaco	11 Apr 2003	2009	2010
INDEPENDENCIA	PO 164	ASTIMAR 1, Tampico, Tamaulipas	21 May 2003	2009	2010

Displacement, tons: 1,680
 Dimensions, feet (metres): 282.2 x 34.4 x 9.3
 (86.0 x 10.5 x 3.0)

Main machinery: 2 Caterpillar 3916 V16 diesels, 2 shafts

Speed, knots: 20

Complement: 77

Guns: 1 Oto Melara 3 in (76 mm)/62 Compact, 85 rds/min
 to 16 km (8.7 n miles); weight of shell 6 kg. 1 Oto Melara
 25 mm. 2 - 12.7 mm MGs.

Combat data systems: Alenia.

Radars: Surface search/navigation: Terma Scantec 2001,
 I band

Fire control: Alenia NA-25; I-band.

Helicopters: Eurocopter AS 565 Panther.

Programmes: The programme was originally for six ships.
 Construction of PO 163 and PO 164 was suspended for
 about two years but was resumed in 2007. Delivery of

both ships is now expected in 2010. A further two ships
 are expected to be laid down in 2009.

Structure: A further derivation of the basic Holzinger
 class and a slightly longer version of the Durango
 class. Capable of operating a helicopter and
 equipped with a fast 11 m interception boat capable
 of 50 kt.

Operational: PO 161 and PO 162 based at Coatzacoalcos.

OAXACA

9/2007, Mario R V Carneiro / 1353233

VICELMIRANTE OTHÓN P BLANCO	PO 125 (ex-C 15, ex-GH 05)	Bazán, San Fernando	18 Dec 1981	26 Mar 1982	24 Feb 1983
CONTRALMIRANTE ANGEL ORTIZ MONASTERIO	PO 126 (ex-C 16, ex-GH 06)	Bazán, San Fernando	30 Dec 1981	4 May 1982	24 Feb 1983

Displacement, tons: 988 full load
Dimensions, feet (metres): 219.9 × 34.4 × 11.5 (67 × 10.5 × 3.5)
Main machinery: 2 MTU-Bazán 16V 958 T892 diesels; 7,500 hp (m) (5.52 MW) sustained; 2 shafts
Speed, knots: 22 **Range, n miles:** 5,000 at 13 kt
Complement: 46 (7 officers)

Guns: 1 Bofors 40 mm/70, 300 rds/min to 12.5 km (6.7 n miles); weight of shell 0.96 kg.

Weapons control: Naja optronic director.
Radars: Surface search; Decca AC 1226; I-band.
Navigation: I-band.
Tacan: SRN 15.

Helicopters: 1 MBB BO 105 CB.

Programmes: Ordered in 1980 to a Falcon class design. Contracts for a further eight of the class have been

shelved. Pennant numbers changed in 1992. Named after naval heroes.

Modernisation: An upgrade programme for all six ships was in progress in 2006.

Structure: Flight deck extends to the stern. Similar ships built for Argentina.

Operational: Used for EEZ patrol. Pennant numbers changed in 2001. Basing, Lázaro (PO 121, 122), Manzanillo (PO 123); Ensenada (PO 124, 125, 126)

Displacement, tons: 1,065 standard; 1,250 full load
Dimensions, feet (metres): 221.2 × 32.2 × 9.2 (67.5 × 9.8 × 2.8)
Main machinery: Diesel-electric; 2 Caterpillar diesels; 2 shafts
Speed, knots: 18
Range, n miles: 6,900 at 10 kt
Complement: 73 (9 officers)
Guns: 1 USN 3 in (76 mm)/50, 4 Bofors 40 mm/80 (2 twin), 4–12.7 mm (2 twin) MGs (in some on quarterdeck)
Radars: Surface search; Kelvin Hughes 14/9 (in most), I band
Helicopters: Platform for 1 BO 105 (PO 103, 104 and 110)

Comment: Transferred from US, six in February 1973, four in April 1973, nine in September 1973. Eight have since been deleted. Employed on Coast Guard duties. All built during Second World War. Variations are visible in the mid-ships section where some have a bulwark running from the break of the forecastle to the quarterdeck. Minesweeping gear removed. All ships re-engined 1999–2002. Some carry a Pirana 26 kt motor launch armed with 40 mm grenade launchers and 7.62 mm MGs. P 103, P 104 and P 110 have had helicopter flight decks installed aft. Plans to fit flight decks in the others have been shelved. PO 102, 103, 104, 106, 108 and 113 based at Lázaro; PO 109 and 114 based at Tampico; PO 110 and 117 based at Ensenada.

Complement: 4
Guns: 1 Oto Melara 12.7 mm MG
Radars: Surface search; Litton Decca Bridgemester E; I-band.

Comment: A further development of the Polaris and Acuario classes. The first of class was delivered by Dockstarvarvet, Sweden, on 10 August 2005 and three further craft were completed at ASTIMAR 3 by 2007. Two further craft delivered in January 2008. Based at Isla Cozumel (1401, 1402) and Ciudad del Carmen (1403, 1404). A class of 11 is expected.

MIAPLACIDUS 6/2005, Mexican Navy / 1133524

0 + 6 (24) DEFENDER CLASS (RESPONSE BOATS) (PBF)

Displacement, tons: 2.7 full load
Dimensions, feet (metres): 10.1 x ? x ? (33.3 x ? x ?)
Main machinery: 3 outboard motors; 825 hp (615 kW)
Speed, knots: 50
Complement: 4
Guns: 2 – 12.7 mm MGs.
Radars: To be announced.

Comment: High-speed inshore patrol craft of aluminum construction and foam collar built by SAFE Boats International, Port Orchard, Washington. An initial order for six craft was made in December 2007 for delivery in 2009. A further 24 craft are expected by 2012.

DEFENDER CLASS 6/2004, Mexican Navy / 0589767

61 FAST PATROL CRAFT (PBF)

G 01-36 +25

Dimensions, feet (metres): 22.3 x 7.5 x 1 (6.8 x 2.3 x 0.3)
Main machinery: 2 Johnson outboards; 280 hp (209 kW)
Speed, knots: 40
Range, n miles: 190 at 40 kt
Complement: 2
Guns: 1 or 2 – 7.62 mm MGs.

Comment: Details are for the 36 G 01-38 Piraña class. Acquired in 1993/94. An 11.6 m 50 kt Interceptor class launch is carried in *Democrata* and modified 10.5 m versions are embarked in the *Sierra*, *Durango* and *Oaxaca* classes. Ten are in service and more may be acquired. There are also ten 29 ft Mako Marine craft, with twin Mercury outboards acquired in 1995. Five Sea Force 730 RIBs with Hamilton water-jets, also acquired in 1995-96.

Displacement, tons: 4,080 full load
Dimensions, feet (metres): 328 x 50 x 14 (100 x 15.3 x 4.3)
Main machinery: 2 GM 12-567A diesels; 1,800 hp (1.34 MW); 2 shafts
Speed, knots: 11
Range, n miles: 6,000 at 11 kt
Complement: 250
Guns: 8 Bofors 40 mm (2 twin, 4 single)

Comment: Ex-US LST 452 class transferred and recommissioned on 1 July 1972. Deployed also as SAR and disaster relief ship. Based at Manzanillo.

TRANSPORT SHIP
 7/1991, Harald Carstens
 0081259

2 NEWPORT CLASS (LSTH)

Name	No	Builders	Laid down	Launched	Commissioned	Recommissioned
RIO PAPALOAPAN (ex-Sonora, ex-Newport)	A 411 (ex-A-04, ex-LST-1179)	Philadelphia Naval Shipyard	1 Nov 1966	3 Feb 1968	7 June 1969	5 June 2001
USUMACINTA (ex-Frederick)	A 412 (ex-LST-1184)	National Steel & Shipbuilding Co	13 Apr 1968	8 Mar 1969	11 Apr 1970	1 Dec 2002

Displacement, tons: 4,975 light; 8,450 full load
Dimensions, feet (metres): 522.3 (hull) x 69.5 x 17.5 (aft) (159.2 x 21.2 x 5.3)
Main machinery: 6 General Motors 16-645-E5 diesels; 16,500 hp (12.3 MW) sustained; 2 shafts; cp props; bow thruster
Speed, knots: 20
Range, n miles: 14,250 at 14 kt
Complement: 257 (13 officers)
Military lift: 400 troops, 500 tons vehicles; 3 LCVPs and 1 LCPL on davits.
Guns: 4 USN 3 in (76 mm)/50 (A 411)
Radars: Surface search: Raytheon SPS-10F; G-band.
Navigation: Raytheon SPS-64, I-band

Helicopters: Platform only.

Programmes: A-411 sold to Mexico by the US Navy on 18 January 2001, A-412 sold on 9 December 2002. Both ships employed in amphibious role rather than as transport ships as previously reported. A 411 based at Tampico and A 412 at Manzanillo.

Modernisation: A new surface search radar reported installed in both ships by 2008.

SURVEY AND RESEARCH SHIPS

1 SUPPORT SHIP (AKS)

Name	No	Builders	Commissioned
RIO SUCHIATE (ex-Monob 1)	BI 05 (ex-A 27, ex-YAG 61, ex-YW 87)	Zenith Dredge Co	11 Nov 1943

Displacement, tons: 1,390 full load
Dimensions, feet (metres): 193.6 x 32.5 x 9.5 (59.9 x 9.9 x 2.9)
Main machinery: 1 Caterpillar D 398 diesel; 850 hp (634 kW); 1 shaft
Speed, knots: 9
Range, n miles: 2,500 at 9 kt
Complement: 21

Comment: Acquired from US on 1 August 1966. The ship was converted from a water carrier to an acoustic research role in 1969, and had four laboratories in US service. Adapted to act also in support ship role in 1997. New pennant number in 2001. Based at Guaymas.

RIO SUCHIATE

8/2005, Mexican Navy / 1170106

ALTAIR

8/2005, Mexican Navy / 1133519

4 ARRECIFE (EX-OLMECA II) CLASS (SURVEY CRAFT) (YGS)

ALACRAN BI 08 (ex-PR 301)	CABEZO BI 10 (ex-PR 304)
RIZO BI 09 (ex-PR 310)	ANEGAGADA DE ADENTRO BI 11 (ex-PR 309)

Displacement, tons: 18 full load
Dimensions, feet (metres): 54.8 x 14.4 x 3.9 (16.7 x 4.4 x 1.2)
Main machinery: 2 Detroit 8V-92TA diesels; 700 hp (562 kW) sustained; 2 shafts
Speed, knots: 20 **Range, n miles:** 460 at 10 kt
Complement: 15 (2 officers)
Guns: 1—12.7 mm MG
Radars: Navigation: Raytheon 1900; I-band

Comment: Built at Acapulco and completed between 1982 and 1989. GRP hulls. Converted for inshore hydrographic duties in 2003. All have *Arrecife* in front of the names. Based at Manzanillo (BI 08, 09) and Veracruz (BI 10, 11).

ALACRAN

8/2005, Mexican Navy / 1133518

2 ROBERT D CONRAD CLASS (RESEARCH SHIPS) (AGOR)

Name	No	Builders	Commissioned
ALTAIR (ex-James M Gilliss)	BI 03 (ex-H 06, ex-AGOR 4)	Christy Corp, WI	5 Nov 1962
ANTARES (ex-S P Lee)	BI 04 (ex-H 06, ex-AG 192)	Defoe, Bay City	2 Dec 1962

Displacement, tons: 1,370 full load
Dimensions, feet (metres): 208.9 x 40 x 15.4 (63.7 x 12.2 x 4.7)
Main machinery: Diesel-electric; 2 Caterpillar diesel generators; 1,200 hp (895 kW); 2 motors; 1,000 hp (746 kW); 1 shaft; bow thruster
Speed, knots: 13.5
Range, n miles: 10,500 at 10 kt
Complement: 41 (12 officers) plus 15 scientists
Radars: Navigation: Raytheon 1025; Raytheon R4iY; I-band.

Comment: *Altair* leased from US 14 June 1983. Refitted and modernised in Mexico. Recommissioned 23 November 1984. Primarily used for oceanography. *Antares* served as an AGI with the USN until February 1974 when she transferred on loan to the Geological Survey. Acquired by sale and recommissioned on 1 December 1992. New pennant numbers in 2001. Based at Manzanillo (BI 03) and Tampico (BI 04).

1 SURVEY SHIP (AGS)

Name	No	Builders	Commissioned
RIO HONDO (ex-Deer Island)	BI 06 (ex-H 08, ex-A 26, ex-YAG 62)	Haitec Marine	May 1962

Displacement, tons: 400 full load
 Dimensions, feet (metres): 120.1 × 27.9 × 6.9 (36.6 × 8.5 × 2.1)
 Main machinery: 2 General Motors 7122-700 diesels; 2 shafts
 Speed, knots: 10
 Range, n miles: 6,000 at 10 kt
 Complement: 20

Comment: Acquired from US on 1 August 1996 and adapted for a support ship role in 1997. Converted to Survey Ship in 1999. Used in US service from 1983 as an acoustic research ship to test noise reduction equipment. Started life as an oil rig supply tug. New pennant number in 2001. Based at Coatzacoalcos.

RIO HONDO (old number) 4/1999, M Declerck / 0081258

1 HUMBOLDT CLASS (RESEARCH SHIP) (AGOR)

Name	No	Builders	Recommissioned
ALEJANDRO DE HUMBOLDT	BI 01 (ex-H 03)	JG Hitzler, Elbe	22 June 1987

Displacement, tons: 585 standard; 700 full load
 Dimensions, feet (metres): 140.7 × 32 × 13.5 (42.3 × 9.6 × 4.1)
 Main machinery: 1 MAN R8V 22/30 diesel; 2 shafts
 Speed, knots: 14
 Complement: 20 (4 officers)
 Radars: Navigation: Kelvin Hughes; I-band.

Comment: Former trawler built in Germany and launched in January 1970. Converted in 1982 to become a hydrographical and acoustic survey ship. Based at Manzanillo. New pennant number in 2001

ALEJANDRO DE HUMBOLDT (old number) 6/2001, Mexican Navy / 0114671

1 SURVEY SHIP (AGS)

Name	No	Builders	Commissioned
RIO TUXPAN (ex-Whiting)	BI 12	Marette Manufacturing Company, Mt Pleasant, West Virginia	July 1963

Displacement, tons: 907
 Dimensions, feet (metres): 163.0 × 33.0 × 12.2 (49.7 × 10.1 × 3.7)
 Main machinery: 2 General Motors diesels, 1,600 hp (1.2 MW); 2 cp props
 Speed, knots: 12
 Range, n miles: 5,700 at 11 kt
 Complement: 30 (7 officers)
 Radars: Surface search; E/F-band
 Navigation: I-band.

Comment: Ex-US NOAA ship designed for hydrographic and bathymetric survey work. Decommissioned in May 2003 and transferred to the Mexican Navy in April 2005. Equipped (in NOAA service) with Intermediate Depth Swath Survey System (IDSSS) (36 kHz), Deep Water Echo Sounder (12 kHz), Shallow Water Echo Sounder (100 kHz), Hydrographic Survey Sounder (24 and 100 kHz), EG&G 270 Side Scan Sonar and Klein T-5000 High Speed/High Resolution Side Scan Sonar. Based at Tuxpan.

RIO TUXPAN 4/2005, NOAA / 1133517

1 ONJUKU CLASS (SURVEY SHIP) (AGS)

Name	No	Builders	Commissioned
ONJUKU	BI 02 (ex-H 04)	Uchida Shipyard	10 Jan 1980

Displacement, tons: 494 full load
 Dimensions, feet (metres): 121 × 26.2 × 11.5 (36.9 × 8 × 3.5)
 Main machinery: 1 Yanmar 6UA-UT diesel; 700 hp (m) (515 kW); 1 shaft
 Speed, knots: 10
 Range, n miles: 5,645 at 10.5 kt
 Complement: 20 (4 officers)
 Radars: Navigation: Furuno; I-band.
 Sonars: Furuno; hull-mounted; high frequency active.

Comment: Launched 9 December 1977 in Japan. Sonar is a fish-finder type. New pennant number in 2001. Based at Veracruz.

ONJUKU 6/2005, Mexican Navy / 1133520

TRAINING SHIPS

1 TRAINING SHIP (AGSC)

Name	No	Builders	Commissioned
MOCTEZUMA II	BI 07 (ex-A-09)		

Displacement, tons: 150 full load
 Dimensions, feet (metres): 78.7 × 20.3 × 13.1 (24.0 × 6.2 × 4.0)
 Main machinery: 1 Detroit diesel; 192 hp (143 kW); 1 shaft
 Speed, knots: 17 (sail), 3 (diesel)
 Complement: 18 (5 officers)

Comment: Two-masted sailing vessel built in 1972 and taken over by the Navy on 6 December 1985. Also used for oceanographic research. Based at Acapulco.

MOCTEZUMA II 6/2007, Mexican Navy / 1170154

1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Launched	Commissioned
CUAUHTÉMOC	SE 01 (ex-A 07)	Astilleros Talleres Calaya SA, Bilbao	9 Jan 1982	23 Sep 1982

Displacement, tons: 1,662 full load
Dimensions, feet (metres): 296.9 (bowsprit); 220.5 wl × 39.4 × 17.7 (90.5; 67.2 × 12 × 5.4)
Main machinery: 1 Detroit 12V-149T diesel; 1,125 hp (839 kW); 1 shaft
Speed, knots: 17 sail; 7 diesel
Complement: 268 (20 officers, 90 midshipmen)
Guns: 2 — 65 mm Schneider Model 1902 saluting guns.

Comment: Has 2,368 m² of sail. Similar ships in Ecuador, Colombia and Venezuela. Based at Acapulco.

CUAUHTÉMOC 7/2006, Chris Sattler / 1184/36

1 MANUEL AZUETA (EDSALL) CLASS (FF/AX)

Name	No	Builders	Laid down	Launched	Commissioned
COMODORO	D 111	Brown SB Co,	27 Jan 1943	14 Apr 1943	30 Aug 1943
MANUEL AZUETA	(ex-E 30, ex-Hurst DE 250)	Houston, TX			
	(ex-A 06)				

Displacement, tons: 1,400 standard; 1,850 full load
Dimensions, feet (metres): 302.7 × 36.6 × 13 (92.3 × 11.3 × 4)
Main machinery: 4 Fairbanks-Morse 38D8-1/8-10 diesels; 7,080 hp (5.3 MW) sustained; 2 shafts
Speed, knots: 12
Range, n miles: 13,000 at 12 kt
Complement: 216 (15 officers)

Guns: 2 USN 3 in (76 mm)/50; 20 rds/min to 12 km (6.6 n miles); weight of shell 6 kg.
 8 Bofors 40 mm/60 (1 quad, 2 twin) Mk 2 and Mk 1; 120 rds/min to 10 km (5.5 n miles); weight of shell 0.89 kg.
 2 Oerlikon 20 mm. 2 — 37 mm saluting guns.
Weapons control: Mk 52 (for 3 in); Mk 51 Mod 2 (for 40 mm).
Radars: Surface search: Kelvin Hughes Type 17; I-band.
Navigation: Kelvin Hughes Type 14; I-band.

Programmes: Transferred from US 1 October 1973.
Modernisation: OTO Melara 76 mm gun fitted in 1995 but subsequently removed and US 3 in gun restored.
Operational: Employed as training ship and based at Tuxpan, A/S weapons and sensors removed. Speed much reduced. Pennant number changed in 2001.

COMODORO MANUEL AZUETA 6/2005, Mexican Navy / 113354b

AUXILIARIES

Notes: (1) Procurement of up to two Hospital Ships is reported to be under consideration. (2) Procurement of up to two logistic support vessels, capable of carrying 120 marines and of operating helicopters, is reported to be under consideration.

1 LOGISTIC SUPPORT SHIP (AKS)

Name	No	Builders	Recommissioned
MAYA (ex-Rio Nautla)	ATR 01 (ex-A 20, ex-A 23)	Isla Gran Cayman, Ru	1 June 1988

Displacement, tons: 924 full load
Dimensions, feet (metres): 160.1 × 38.1 × 11.5 (48.8 × 11.6 × 3.5)
Main machinery: 1 MAN diesel; 1 shaft
Speed, knots: 12
Complement: 15 (8 officers)

Comment: First launched in 1962 and acquired for the Navy in 1988. Unarmed. New name and pennant number in 2001. Based at Mazatlan

MAYA 8/2004, Mexican Navy / 0589766

1 LOGISTIC SUPPORT SHIP (AK)

Name	No	Builders	Recommissioned
TARASCO (ex-Rio Lerma, ex-Sea Point, ex-Tricon, ex-Marika, ex-Arneb)	ATR 03 (ex-A 22, A 25)	Solvesborg, Sweden	1 Mar 1990

Displacement, tons: 1,970 full load
Dimensions, feet (metres): 315.0 × 40.7 × 15.8 (96.0 × 12.4 × 4.8)
Main machinery: 1 Deutz RBV8M 358 diesel; 2,100 hp(m) (1.54 MW); 1 shaft
Speed, knots: 14
Complement: 35
Cargo capacity: 778 tons

Comment: Built in 1962 as a commercial ship and taken into the Navy in 1990. New name and pennant number in 2001. Based at Tampico.

TARASCO 6/2005, Mexican Navy / 1133516

2 HUASTECA CLASS (APH/AK/AH)

Name	No	Builders	Commissioned
HUASTECA (ex-Rio Usumacinta)	AMP 01 (ex-A 10, ex-A 21)	Tampico, Tampico	21 May 1986
ZAPOTECO (ex-Rio Coatzacoalcos)	AMP 02 (ex-A 11, ex-A 22)	Salina Cruz	1 Sep 1986

Displacement, tons: 1,854 standard; 2,650 full load
Dimensions, feet (metres): 227 × 42 × 15.5 (69.2 × 12.8 × 4.73)
Main machinery: 1 GM-EMD diesel; 3,600 hp(m) (2.65 MW); 1 shaft
Speed, knots: 14.5
Range, n miles: 5,500 at 14 kt
Complement: 85 plus 300 passengers
Guns: 1 Bofors 40/60 Mk 3
Radars: Navigation: I-band
Helicopters: Platform for 1 MBB BO 105C

Comment: Used in a training role but can also serve as troop transports, supply or hospital ships. New names and pennant numbers in 2001. AMP 01 based at Tampico and AMP 02 at Manzanillo.

HUASTECA 7/2004, Diego Quevedo / 0583785

2 AGUASCALIENTES CLASS (YOG/YO)

Name	No	Builders	Recommissioned
AGUASCALIENTES (ex-Las Choapas)	ATQ 01 (ex-A 45, ex-A 03)	Geo H Mathis Co Ltd	26 Nov 1964
TLAXCALA (ex-Amatlan)	ATQ 02 (ex-A 46, ex-A 04)	Geo Lawley & Son, Neponset, MA	26 Nov 1964

Displacement, tons: 895 standard; 1,480 full load
Dimensions, feet (metres): 173.9 × 32.8 × 10.2 (53.0 × 10.0 × 3.1)
Main machinery: 1 Fairbanks-Morse diesel; 500 hp (373 kW); 1 shaft
Speed, knots: 6
Complement: 26 (5 officers)
Cargo capacity: 6,570 barrels
Guns: 1 Oerlikon 20 mm.

Comment: Former US self-propelled fuel oil barges built in 1943. Purchased in August 1964. New names and pennant numbers in 2001. ATQ 01 based at Puerto Cortes and ATQ 02 at Coatzacoalcos.

TLAXCALA 6/2005, Mexican Navy / 1133515

5 FLOATING DOCKS (YOG/YO)

ADI 01 (ex-US ARD 2)	ADI 03 (ex-US AFDL 28)	— (ex-US ARD 31)
ADI 02 (ex-US ARD 15)	ADI 04 (ex-US ARD 11)	

Comment: ARD 2 (150 × 24.7 m) transferred 1963 and ARD 11 (same size) 1974 by sale. Lift 3,550 tons. Two 10 ton cranes and one 100 kW generator. ARD 15 has the same capacity and facilities—transferred 1971 by lease. AFDL 28 built in 1944, transferred 1973. Lift, 1,000 tons. ARD 30 transferred on 20 March 2001 and ARD 31 in 2004.

Complement: 76
Guns: 1 US 3 in (76 mm)/50 Mk 22
Radars: Navigation: Marconi LN66; I-band.

Comment: Otomi transferred from US 27 September 1978, remainder 1 October 1978. All by sale. Speed reduced. Based at Tampico (ARE 01, ARE 03) and Manzanillo (ARE 02, ARE 04).

SERI 6/2003, Mexican Navy / 0567905

Federated States of Micronesia

Country Overview

The Federated States of Micronesia was a US-administered UN Trust territory from 1947 before becoming a self-governing republic in 1979. In 1986, a Compact of Free Association, delegating to the US the responsibility for defence and foreign affairs,

came into effect. Composed of the states of Pohnpei (location of capital, Palikir), Kosrae, Chuuk, and Yap, the country consists of 607 islands in the western Pacific Ocean which extend 1,566 n miles across the Caroline Islands archipelago. Moen Island in Chuuk is the largest community. Territorial seas (12 n miles) are claimed. An Exclusive

Economic Zone (EEZ) (200 n miles) is also claimed but limits have not been fully defined.

Headquarters Appointments

Maritime Wing Commander:
Commander Robert Maluweiranj

Personnel

2009: 120

Bases

Koloria (main base), Kosrae, Moen, Takatik.

PATROL FORCES

3 PACIFIC CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
PALIKIR	FSM 01	Australian Shipbuilding Industries	28 Apr 1990
MICRONESIA	FSM 02	Australian Shipbuilding Industries	3 Nov 1990
INDEPENDENCE	FSM 05	Transfield	22 May 1997

Displacement, tons: 162 full load
Dimensions, feet (metres): 103.3 x 26.6 x 6.9 (31.5 x 8.1 x 2.1)
Main machinery: 2 Caterpillar 3516TA diesels, 4,400 hp (3.28 MW) sustained; 2 shafts
Speed, knots: 20
Range, n miles: 2,500 at 12 kt
Complement: 17 (3 officers)
Radars: Surface search: Furuno 1011, I-band

Comment: First pair ordered in June 1989 from Australian Shipbuilding Industries. Training and support provided by Australia at Port Kolonia Third of class negotiated with Transfield (former ASI) in 1997. Following the decision by the Australian government to extend the Pacific Patrol Boat programme to enable 30-year boat lives, *Palikir*, *Micronesia* and *Independence*, underwent half life refits in 1998, 1999 and 2003. A life-extension refit for *Palikir* was completed in 2007 and is due for *Micronesia* in 2009 and *Independence* in 2011

MICRONESIA
 11/1990, Royal Australian Navy

Montenegro

Country Overview

The Republic of Montenegro was formed following a referendum on 21 May 2006 in which the people voted for independence and for the dissolution of the Federal Republic of Serbia and Montenegro which itself was the rump of the former Yugoslavia. A formal declaration of independence was made by the Montenegro Assembly on 3 June 2006. With an area of 5,333 square miles, it is located in south-eastern Europe in the Balkan Peninsula and is bordered to the north-west by Bosnia, to the east by Serbia, to the south by Albania and to the west by Croatia. It has a 158 n mile coastline with the Adriatic Sea on which Bar and Tivat are the principal ports. The capital and largest city is Podgorica Territorial waters (12 n miles) are claimed but an EEZ has not been claimed

The provisions of the Union Constitution were that, in the event of dissolution, the armed forces of Serbia and Montenegro would be split in such a way that each state keeps the assets in its territory. Therefore, all of the former navy of Serbia and Montenegro transferred to Montenegro in June 2006, except for the former Danube Flotilla, which transferred to Serbian land forces. While the future size and shape of the Montenegrin Navy is yet to be decided, it is expected that the force will drawn down into a small Coast Guard force and that most former units will be sold or scrapped.

Personnel

2009: 1,100

Bases

Headquarters and Base Bar

Organisation

Montenegrin naval forces are to be re-organised into five detachments: Patrol forces; search and rescue; coastal reconnaissance; coast guard; training. All naval facilities have been concentrated at Bar and the naval repair and maintenance yard at Tivat has been sold. All special forces have been consolidated under the command of the army. Former coastal defence missile systems have reportedly been sold to Egypt.

Headquarters Appointments

Commander-in-Chief
 Rear Admiral Dragan Semardzic

SUBMARINES

Notes. All former patrol submarines have been decommissioned or scrapped. The Sava-class boats *Sava* and *Drava* are to be sold. The Heroj-class boats *Heroj*, *Junak* and *Uskuk* are all likely to be scrapped while all five Una class midget submarines have been laid-up or scrapped.

2 R-2 MALA CLASS (TWO-MAN SWIMMER DELIVERY VEHICLES) (LDW)

Displacement, tons: 1.4
Dimensions, feet (metres): 16.1 x 4.6 x 4.3 (4.9 x 1.4 x 1.3)
Main machinery: 1 motor; 4.7 hp(m) (3.5 kW); 1 shaft
Speed, knots: 4.4
Range, n miles: 18 at 4.4 kt, 23 at 3.7 kt
Complement: 2
Mines: 250 kg of limpet mines

Comment: Free-flood craft with the main motor, battery, navigation pod and electronic equipment housed in separate watertight cylinders. Instrumentation includes aircraft type gyrocompass, magnetic compass, depth gauge (with 0-100 m scale), echo-sounder, sonar and two searchlights. Constructed of light aluminium and plexiglass, it is fitted with fore and after-hydroplanes, the tail being a conventional cruciform with a single rudder abaft the screw. Large perspex windows give a good all-round view. Operating depth 60 m (196.9 ft) maximum. Two operated by Croatia. Two reported sold to Syria and one to Sweden.

Notes: There are also reported to be four R-1 craft. Transportable in submarine torpedo tubes and crewed by one man, they are 3.7 m craft, powered by a 1 kW electric motor and 24V silver-zinc batteries. Capable of 2.8 kt, they can dive to 60 m. They have a range of 4 n miles. Of a total twelve reported to have been manufactured. A further six units have probably been deleted, one unit is in Croatia and one was exported to Sweden.

FRIGATES

Notes: The two decommissioned Koni-class frigates, *Beograd* and *Podgorica*, may be sold

1 KOTOR CLASS (FFGM)

Name	No	Builders	Launched	Commissioned
NOVI SAD (ex-Pula)	34	Tito Shipyard, Kraljevica	18 Dec 1985	Nov 1988

Displacement, tons: 1,870 full load
Dimensions, feet (metres): 317.3 × 42 × 13.7
 (96.7 × 12.8 × 4.2)
Main machinery: CODAG; 1 SGW Nikolayev gas turbine; 18,000 hp(m) (13.2 MW); 2 SEMT-Pielstick 12 PA6 V 280 diesels; 9,600 hp(m) (7.1 MW) sustained; 3 shafts
Speed, knots: 27 gas; 22 diesel. **Range, n miles:** 1,800 at 14 kt
Complement: 110

Missiles: SSM: 4 SS-N-2C Styx ●, active radar or IR homing to 83 km (45 n miles) at 0.9 Mach; warhead 513 kg; sea-skimmer at end of run.
SAM: SA-N-4 Gecko twin launcher ●, semi-active radar homing to 15 km (8 n miles) at 2.5 Mach; height envelope 9-3,048 m (29.5-10,000 ft); warhead 50 kg.

Guns: 4 USSR 3 in (76 mm)/59 AK 726 (2 twin) (1 mounting only in 33 and 34) ●, 90 rds/min to 16 km (8.5 n miles); weight of shell 6.8 kg.
 4 USSR 30 mm/65 (2 twin) ●, 500 rds/min to 5 km (2.7 n miles); weight of shell 5.9 kg.

A/S mortars: 2 RBL 6000 12-barrelled trainable ●, range 6,000 m; warhead 31 kg.
Mines: Can lay mines.

Countermeasures: Decoys: 2 Wallop Barricade double layer chaff launchers.

KOTOR CLASS

(Scale 1 : 900), Ian Sturton / 0506341

Radars: Air/surface search: Strut Curve ●, F-band. Navigation: Palm Front; I-band.
Fire control: PEAB 9LV200 ●, I-band (for 76 mm and SSM). Drum Tilt ●, H/I-band (for 30 mm).
**Pop Group ●, F/M-I-band (for SAM).
 IFF: High Pole; 2 Square Head.
Sonars: Bull Nose; hull-mounted; active search and attack; medium frequency.**

Programmes: Built under licence. Type name, VPB (Veliki Patrolni Brod).

Modernisation: Combat data system fitted in 2000. SS-N-2C missiles, SA-N-4 missiles and RBU 6000 rocket launchers are to be removed. Following a refit, which may include installation of a flight deck aft, *Novi Sad* is to be employed as an offshore patrol vessel.

Structure: The hull is similar to the Russian Koni class but are to a Yugoslavian design

Operational: VPB 33 *Kotor* has been decommissioned but may be re-activated subject to funding. Based at Bar

KOTOR CLASS

6/1998, Yugoslav Navy / 0050746

PATROL FORCES

Notes: Acquisition of two Minerva-class corvettes from Italy was reported in 2007 to be under consideration but there have been no indications of progress.

2 KONČAR CLASS (TYPE 240) (PTFG)

Name	No	Builders	Launched	Commissioned
JORDAN NIKOLOV ORCE	405	Tito Shipyard, Kraljevica	26 Apr 1979	Aug 1979
ANTE BANINA	406	Tito Shipyard, Kraljevica	23 Nov 1979	Nov 1980

Displacement, tons: 271 full load
Dimensions, feet (metres): 147.6 × 22.6 × 8.5 (45 × 8.4 × 2.8)
Main machinery: CODAG; 2 RR Proteus gas turbines; 7,100 hp (5.29 MW) sustained; 2 MTU 16V 538 TB91 diesels; 6,000 hp(m) (4.41 MW) sustained; 4 shafts; cp props
Speed, knots: 38
Range, n miles: 490 at 38 kt; 670 at 23 kt (diesels)
Complement: 30 (5 officers)

Missiles: SSM: 2 SS-N-2B Styx, active radar or IR homing to 46 km (25 n miles) at 0.9 Mach; warhead 513 kg.

Guns: 2 Bofors 57 mm/70; 200 rds/min to 17 km (9.3 n miles); weight of shell 2.4 kg
 2—128 mm rocket launchers for illuminants.
 2—30 mm/65 (twin) or 1—30 mm/65 AK 630 may be fitted in place of the after 57 mm.

Countermeasures: 2 Wallop Barricade double layer chaff launchers.

Weapons control: PEAB 9LV 202 GFCS

Radars: Surface search: Decca 1226; I-band.

Fire control: Philips TAB; VJ-band.

Programmes: Type name, Raketna Topovnjaca

Structure: Aluminium superstructure. Designed by the Naval Shipping Institute in Zagreb based on Swedish Spica class with bridge amidships like Malaysian boats. The after 57 mm gun is replaced by a twin 30 mm mounting in at least one of the class.

Operational: 402 was taken by Croatia in 1991. 401 and 404 have been decommissioned but may be re-activated subject to funding, 403 has been decommissioned 405 and 406 are to remain in service but the SS-N-2B missile system is likely to be removed.

AMPHIBIOUS FORCES

1 SILBA CLASS (LCT/ML)

Name — (ex-Silba)	No DBM 241	Builders Brodosplit Shipyard, Split	Commissioned 1990
-----------------------------	----------------------	---	-----------------------------

Displacement, tons: 880 full load
Dimensions, feet (metres): 163.1 oa; 144 wl × 33.5 × 8.5 (49.7; 43.9 × 10.2 × 2.6)
Main machinery: 2 Burmeister & Wain Alpha 10V23LVO diesels; 3,100 hp(m) (2.28 MW) sustained; 2 shafts, cp props
Speed, knots: 12
Range, n miles: 1,200 at 12 kt
Complement: 33 (3 officers)
Military lift: 460 tons or 6 medium tanks or 7 APCs or 4—130 mm guns plus towing vehicles or 300 troops with equipment
Missiles: 1 SA-N-5 Grail quad mounting.
Guns: 4—30 mm/65 (2 twin) AK 230, 4—20 mm M75 (quad), 2—128 mm illuminant launchers.
Mines: 94 Type SAG-1
Radars: Surface search: Racal Decca; I-band.

Comment: Ro-ro design with bow and stern ramps. Can be used for minelaying, transporting weapons or equipment and troops. Two further craft, launched in 1992 and 1994, are in the Croatian Navy and this final craft is to be sold, possibly to Egypt.

3 TYPE 21 (LCU)

DJC 614	DJC 616	DJC 618
----------------	----------------	----------------

Displacement, tons: 32 full load
Dimensions, feet (metres): 69.9 × 15.7 × 5.2 (21.3 × 4.8 × 1.6)
Main machinery: 1 diesel; 1,450 hp(m) (1.07 MW); 1 shaft
Speed, knots: 23
Range, n miles: 320 at 22 kt
Complement: 6
Military lift: 8 tons
Guns: 1—20 mm M71.

Comment: The survivors of a class of 20 built between 1976 and 1979. Four held by Croatia in 1991 of which three have paid off. Others sunk or scrapped. Some of these may be laid up and all are likely to be offered for sale.

DJC 616 and 618

4/2007, Marco Ghilino / 1167915

AUXILIARIES

Notes: (1) Two 22 m inshore survey vessels BH 12 and CH 1 are operated by the Naval Hydrological Institute. BH 11 has been donated to a civilian institute.
 (2) There are seven tenders BM 58, BM 65, BM 66, BM 67, BM 70 and BS 22. Most of these are reported to have been sold.
 (3) There are five diving tenders BRM 81, BRM 84, BRM 85, BRM 87 and BRM 88.
 (4) Alga PV 17 is a 44 m water tanker which is laid-up.

1 SAIL TRAINING SHIP (AXS)

JADRAN

Displacement, tons: 737 full load
Dimensions, feet (metres): 198.9 × 29.2 × 13.3 (60.0 × 8.9 × 4.05)
Main machinery: 1 Burmeister Alpha diesel; 353 hp (263 kW)
Speed, knots: 10.4
Radars: 1 FR 2120 and 1 FR 7061, I-band

Comment: The contract for a barquentine sail training ship was signed on 4 September 1930 with the German shipbuilding company H C Stülcken & Son of Hamburg. She was launched on 25 June 1931 and arrived in Tivat on 16 July 1933. During the Second World War, she was used by the Italian Navy under the name of *Marco Polo* before being allowed to fall into disrepair. She returned to Yugoslavia in 1946 and was reconstructed in her original form at Tivat.

1 LUBIN CLASS (TRANSPORT SHIP) (AKR)

LUBIN PO 91

Displacement, tons: 860 full load
Dimensions, feet (metres): 190.9 × 36.1 × 9.2 (58.2 × 11.0 × 2.8)
Main machinery: 2 diesels; 3,500 hp(m) (2.57 MW); 2 shafts; cp props
Speed, knots: 16
Range, n miles: 1,500 at 16 kt
Complement: 43
Military lift: 150 troops; 6 tanks
Guns: 1 Bofors 40 mm/70, 4–20 mm M75, 128 mm rocket launcher for illuminants

Comment: Fitted with bow doors and two upper-deck cranes. Ro-Ro cargo ship built in Split in the 1980s and used as an ammunition transport. Based at Bar. This ship had been assessed decommissioned in the early 1990s but has been officially reported as being in good condition and operational. The ship is likely to be sold

LUBIN

5/2004, Sieche Collection / 1044503

1 DRINA CLASS (AOTL)

SIPA PN 27

Displacement, tons: 430 full load
Dimensions, feet (metres): 151 × 23.6 × 10.2 (46 × 7.2 × 3.1)
Main machinery: 1 diesel; 300 hp(m) (220 kW); 1 shaft
Speed, knots: 7
Complement: 12
Missiles: SAM 1 SA-N-5
Guns: 6 Hispano 20 mm (1 quad, 2 single)

Comment: Built at Kraljevica in mid-1950s. Based at Bar. The ship is likely to be sold.

SIPA

6/2003, Serbia and Montenegro Navy / 1044504

TUGS

Notes: There are three coastal tugs PR 37, PR 38 and PR 41 (armed with a 20 mm gun) and seven harbour tugs LR 23, LR 72, LR 74, LR 75, LR 77 and LR 80

PR 41

POLICE

2 MIRNA CLASS (TYPE 140) (PB)

BAR (ex-Učka) P 01 (ex-174)
 HERCEG NOVI (ex-Kosmaj) P 03 (ex-178)

Displacement, tons: 142 full load
Dimensions, feet (metres): 104.9 × 22 × 7.5 (32 × 6.7 × 2.3)
Main machinery: 2 SEMT-Pielstick 12 PA4 200 VGDS diesels; 5,292 hp(m) (3.89 MW) sustained; 2 shafts
Speed, knots: 28
Range, n miles: 400 at 20 kt
Complement: 19 (3 officers)
Guns: 1 Bofors 40 mm/70, 4–20 mm (quad), 2–128 mm illuminant launchers.
Depth charges: 8 DCs
Radars: Surface search: Racal Decca 1216C, i-band.
Sonars: Simrad SQS 3D/3F; active, high frequency

Comment: Builders, Kraljevica Yard. Launched between June 1981 and December 1983. An unusual feature of this design is the fitting of an electric outboard motor giving a speed of up to 6 kt. One sunk possibly by a limpet mine in November 1991. Four held by Croatia, five have been sold to civilian use and two transferred from the Montenegrin Navy to the Police in 2006.

HERCEG NOVI

4/2007, Marco Ghiglino / 1167914

Morocco

MARINE ROYALE MAROCAINE

Country Overview

Formerly divided into French and Spanish protectorates, the Kingdom of Morocco gained independence in 1956. Situated in north-western Africa, it has an area of 172,414 square miles and is bordered to the east by Algeria; it occupies 80 per cent of Western Sahara (formerly Spanish Sahara), the country to the south. Two Spanish exclaves, Ceuta and Melilla, are located on the Mediterranean coast. It has coastlines with Atlantic Ocean (756 n miles) and Mediterranean Sea (238 n miles). The capital is Rabat while Casablanca is the largest city and principal port. Other ports are at Tangier, Agadir, Kenitra, Mohammedia, and Safi. Territorial seas (12 n miles) are claimed. An EEZ

(200 n mile) has also been claimed but its limits have not been fully defined.

Headquarters Appointments

Inspector of the Navy:
 Rear Admiral Mohamed Berrada Kouzi

Personnel

(a) 2009: 7,800 officers and ratings (including 1,500 Marines)
 (b) 18 months' national service

Bases

Casablanca (HQ), Safi, Agadir, Kenitra, Tangier, Dakhla, Al Hocaïma

Aviation

The Ministry of Fisheries operates 11 Pilatus Britten-Norman Defender maritime surveillance aircraft

Name	No	Builders	Laid down	Launched	Commissioned
LIEUTENANT COLONEL ERRHAMANI	501	Bazan, Cartagena	20 Mar 1979	26 Feb 1982	28 Mar 1983

Displacement, tons: 1,233 standard; 1,479 full load
Dimensions, feet (metres) 291.3 × 34 × 12.5
 (88.9 × 10.4 × 3.8)
Main machinery: 4 MTU-Bazán 16V 956 T891 diesels,
 15,000 hp(m) (11 MW) sustained; 2 shafts; cp props
Speed, knots: 25.5
Range, n miles: 4,000 at 18 kt (1 engine)
Complement: 100

Missiles, SSM: 4 Aerospatiale MM 38 Exocet ●; inertial
 cruise; active radar homing to 42 km (23 n miles) at 0.9
 Mach; warhead 165 kg, sea-skimmer. Frequently not
 embarked.

SAM: Selenia/Elsag Albatros octuple launcher ●; 24
 Aspide; semi-active radar homing to 13 km (8 n miles)
 at 2.5 Mach; height envelope 15-5,000 m (49.2-16,405 ft);
 warhead 30 kg

Guns: 1 OTO Melara 3 in (76 mm)/62 compact ●, 85 rds/min
 to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles)
 anti-aircraft; weight of shell 6 kg.
 2 Breda Bofors 40 mm/70 ●; 300 rds/min to 12.5 km
 (6.7 n miles); weight of shell 0.96 kg.

Torpedoes: 6—324 mm Mk 32 (2 triple) tubes ● Honeywell
 Mk 46 Mod 1; anti-submarine; active/passive homing to
 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

A/S mortars: 1 Bofors SR 375 mm twin trainable launcher ●,
 range 3.6 km (1.9 n miles); 24 rockets.

LIEUTENANT COLONEL ERRHAMANI

(Scale 1 : 900), Ian Sturton / 11510/2

Countermasures: Decoys: 2 CSEE Degaie double trainable
 mounting, IR flares and chaff; H/J-band.
ESM/ECM: Electronica ELT 715; intercept and jammer.

Combat data systems: Signaal SEWACO-MR action data
 automation, SATCOM.

Radars: Air/surface search: Signaal DA05 ●; E/F-band
 (see *Operations*).

Surface search: Signaal ZW06 ●; I-band.
Fire control: Signaal WM25/41 ●; I/J-band; range 48 km
 (25 n miles).

Navigation: 2 Decca ●; I-band.

Sonars: Raytheon DE 1160 B; hull-mounted; active/passive;
 medium range; medium frequency

Programmes: Ordered 7 June 1977

Modernisation: New 40 mm guns fitted in 1995. Refit in
 Spain in 1996.

Operational: The ship is fitted to carry Exocet but the
 missiles are seldom embarked. The air search radar was
 removed in 1998 but reinstated in 1999.

0 + 1 FREMM CLASS (FSG)

Name	No	Builders	Laid down	Launched	Commissioned
-	-	DCNS, Lorient	2009	2011	2013

Displacement, tons: 4,500 standard; 6,000 full load
Dimensions, feet (metres): 449.5 oa; 419.9 wl × 62.3 × 16.4 (1370; 128.0 × 19.0 × 5.0)
Main machinery: CODLOG; 1 Fiat/GE LM 2500+ G4 gas turbine; 47,370 hp(m) (34.8 MW); 2 Jeumont motors; 2 shafts
Speed, knots: 28
Range, n miles: 6,000 at 15 kt
Complement: 108 (22 officers) (accommodation for 145)

Missiles: SAM: 16 (2 octuple) cell Sylver A43 VLS for MBDA Aster 15; inertial guidance, mid-course update and final active homing to 30 km (16.2 n miles) at 3 Mach.
SSM: 8 MBDA MM 40 Exocet Block III; inertial cruise; active radar homing to 180 km (100 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.
Guns: 1 OTO Melara 3 in (76 mm)/62 Super Rapid; 120 rds/min to 16 km (8.7 n miles); weight of shell 6 kg. 2—12.7 mm MGs.
Torpedoes: 6—324 mm (2 B 515 triple) tubes; Eurotorp Mu-90; active/passive homing to 25 km (13.5 n miles) at 29/50 kt
Countermeasures: Decoys: 2 EADS NGDS 12-barrelled chaff, IR and anti-torpedo decoy launchers.
ESM: ARBR 21; intercept
ECM: To be announced
Combat data systems: DCN/Thales SETIS CMS
Weapons control: 1 optronic FCS
Radars: Air/Surface search: Thales Herakles 3-D multifunction; E/F-band

(Scale 1 : 1,200), Ian Sturton / 1304075

FREMM

Navigation: To be announced
Fire control: Alenia Marconi NA-25XP; J-band.
Sonars: Thales TUS 4110CL; hull mounted (bow dome); active search and attack.
Thales Captas UMS-4249 active/passive towed array (to be confirmed).

Helicopters: To be announced.

Programmes: The order for one FREMM frigate was first announced on 22 October 2007 and later confirmed by French Prime Minister François Fillon on 18 April 2008. The ship, to be delivered by 2013, is the first export order for the 27-ship Franco-Italian joint programme. The ship is required to extend the patrol capabilities of the Moroccan

Navy and to enable joint operations with NATO and other navies. Details are based on the ships being procured for the French Navy and may be different.

Structure: FREMM has a conventional hull design. The main engine room contains the gas turbine and two diesel generators while the aft machinery space contains the motors. Particular attention has been paid to signature reduction. The radar signature is expected to be comparable to that of the La Fayette class while exhaust cooling measures are expected to achieve a comparatively low IR signature. Acoustic quietening is to be achieved by the rating of engines and motors and the use of electric propulsion. The Herakles radar is housed in the foremast and communications and IFF in the after mast.

Radars: Air/Surface search: Thales SMART-S; 3D, E/F-band.
Navigation: To be announced.
Sonars: Thales Kinglip.

Helicopters: To be announced.

Programmes: Contract for the construction of three corvettes, all to be built in the Netherlands, announced on 8 February 2008. Two ships are 88 m Sigma 9813 and one is a lengthened 105 m Sigma 10513. First steel was cut for the lead (105 m) ship on 27 February 2008. The ships, which are to have common systems, are required to extend the patrol capabilities of the Moroccan Navy and to enable joint operations with NATO and other navies.

SHIPBORNE AIRCRAFT

Numbers/Type: 3 Eurocopter AS 565MB Panther
Operational speed: 165 kt (305 km/h)
Service ceiling: 16,700 ft (5,100 m)
Range: 483 n miles (895 km).
Role/Weapon systems: Procured from France for operation from Floréal class. Sensors: Thomson-CSF Varan radar. FLIR. Weapons: 7.62 mm MG.

PANTHER (French colours)

9/1998, M Declerck / 0052167

2 OKBA (PR 72) CLASS (LARGE PATROL CRAFT) (PG)

Name	No	Builders	Commissioned
OKBA	302	SFCN, Villeneuve la Garenne	16 Dec 1976
TRIKI	303	SFCN, Villeneuve la Garenne	12 July 1977

Displacement, tons: 375 standard; 445 full load
Dimensions, feet (metres): 168.8 × 25 × 7.1 (57.5 × 7.6 × 2.1)
Main machinery: 2 SACM AGO V16 ASHR diesels; 5,520 hp(m) (4.1 MW); 2 shafts
Speed, knots: 20
Range, n miles: 2,500 at 16 kt
Complement: 53 (5 officers)
Guns: 1 OTO Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.8 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg.
 1 Bofors 40 mm/70; 300 rds/min to 12.5 km (6.7 n miles); weight of shell 0.96 kg.
Weapons control: 2 CSEE Panda optical directors.
Radars: Surface search: Racal Decca 1226; I-band

Comment: Ordered June 1973. Okba launched 10 October 1975, Triki 1 February 1976. Can be Exocet fitted (with Vega control system). Triki refitted at Lorient 2002–03. Modifications included installation of a funnel and removal of two diesels and two shafts. Speed reduced to 20 kt. Similar refit for Okba completed in early 2005

TRIKI

6/2003, B Prézeltin / 0589781

PATROL FORCES

Notes: There are two patrol craft, pennant numbers 105-106, of unknown type

106

4 LAZAGA CLASS (FAST ATTACK CRAFT—MISSILE) (PGG)

Name	No	Builders	Commissioned
COMMANDANT EL KHATTABI	304	Bazán, San Fernando	26 July 1981
COMMANDANT BOUTOUBA	305	Bazán, San Fernando	2 Aug 1982
COMMANDANT EL HARTY	306	Bazán, San Fernando	20 Nov 1981
COMMANDANT AZOUGGARH	307	Bazán, San Fernando	26 Feb 1982

Displacement, tons: 425 full load
 Dimensions, feet (metres): 190.6 × 24.9 × 8.9 (58.1 × 7.6 × 2.7)
 Main machinery: 2 MTU-Bazán 16V 956 TB91 diesels; 7,500 hp(m) (5.51 MW) sustained; 2 shafts
 Speed, knots: 30
 Range, n miles: 3,000 at 15 kt
 Complement: 41
 Missiles: SSM: 4 Aerospatiale MM 38 Exocet, inertial cruise; active radar homing to 42 km (23 n miles); at 0.9 Mach, warhead 165 kg; sea-skimmer.
 Guns: 1 OTO Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg.
 1 Breda Bofors 40 mm/70; 300 rds/min to 12.5 km (6.7 n miles); weight of shell 0.95 kg.
 2 Oerlikon 20 mm/90 GAM-BO1; 800 rds/min to 2 km.
 Weapons control: CSEE Panda optical director.
 Radars: Surface search: Signaal ZW06; I-band; range 26 km (14 n miles).
 Fire control: Signaal WM25; I/J-band; range 46 km (25 n miles).
 Navigation: Furuno; I-band.

Comment: Ordered from Bazán, San Fernando (Cadiz), Spain 14 June 1977. New Bofors guns fitted aft in 1996/97. 76 mm gun removed from 305 in 1998. *El Harty* and *Azouggarh* refitted by Navantia, Cartagena, 2008–09.

COMMANDANT BOUTOUBA 9/2008*, Diego Quevedo / 1453740

COMMANDANT AZOUGGARH 2/2005, Marco Ghiglino / 1133095

4 OSPREY MK II CLASS (LARGE PATROL CRAFT) (PBO)

Name	No	Builders	Commissioned
EL HAHIQ	308	Danyard A/S, Frederikshavn	11 Nov 1987
EL TAWFIQ	309	Danyard A/S, Frederikshavn	31 Jan 1988
EL HAMISS	316	Danyard A/S, Frederikshavn	9 Aug 1990
EL KARIB	317	Danyard A/S, Frederikshavn	23 Sep 1990

Displacement, tons: 475 full load
 Dimensions, feet (metres): 179.8 × 34 × 8.5 (54.8 × 10.5 × 2.6)
 Main machinery: 2 MAN Burmeister & Wain Alpha 12V23/30-DVO diesels; 4,440 hp(m) (3.23 MW) sustained; 2 water-jets
 Speed, knots: 22
 Range, n miles: 4,500 at 16 kt
 Complement: 15 plus 20 spare berths
 Guns: 1 Bofors 40 mm/60. 2 Oerlikon 20 mm.
 Radars: Surface search. Racal Decca; I-band.
 Navigation: Racal Decca, I-band

Comment: First two ordered in September 1986; two more on 30 January 1989. There is a stern ramp with a hinged cover for launching the inspection boat. Used for Fisheries Protection duties.

EL HAMISS 3/2006, M Declercq / 116495b

6 CORMORAN CLASS (LARGE PATROL CRAFT) (PBO)

Name	No	Builders	Launched	Commissioned
LV RABHI	310	Bazan, San Fernando	23 Sep 1987	16 Sep 1988
ERRACHIQ	311	Bazan, San Fernando	23 Sep 1987	16 Dec 1988
EL AKID	312	Bazan, San Fernando	29 Mar 1988	4 Apr 1989

EL MAJID	314	Bazan, San Fernando	21 Oct 1988	26 Sep 1989
EL BACHIR	315	Bazan, San Fernando	21 Oct 1988	19 Dec 1989

Displacement, tons: 425 full load
 Dimensions, feet (metres): 190.6 × 24.9 × 8.9 (58.1 × 7.6 × 2.7)
 Main machinery: 2 MTU-Bazán 16V 956 TB82 diesels; 8,340 hp(m) (6.13 MW) sustained; 2 shafts
 Speed, knots: 22. Range, n miles: 6,100 at 12 kt
 Complement: 36 (4 officers) plus 15 spare
 Guns: 1 Bofors 40 mm/70. 2 Giat 20 mm.
 Weapons control: CSEE Lynx optronic director.
 Radars: Surface search: Racal Decca; I band.

Comment: Three ordered from Bazán, Cadiz in October 1985 as a follow on to the Lazaga class of which these are a slower patrol version with a 10 day endurance. Option on three more taken up. Used for fishery protection. Armament removed from some. *El Akid*, *El Majid* and *El Bachir* refitted by Raidco Marine 2007–08.

EL AKID 6/2006, B Prézelin / 1040659

5 RAÏS BARGACH CLASS (TYPE OPV 64) (PSO)

Name	No	Builders	Launched	Commissioned
RAÏS BARGACH	318	Leroux & Lotz, Lorient	9 Oct 1995	14 Dec 1995
RAÏS BRITEL	319	Leroux & Lotz, Lorient	19 Mar 1996	14 May 1996
RAÏS CHARKAOUI	320	Leroux & Lotz, Lorient	25 Sep 1995	10 Dec 1996
RAÏS MAANINOU	321	Leroux & Lotz, Lorient	7 Mar 1997	21 May 1997
RAÏS AL MOUNASTIRI	322	Leroux & Lotz, Lorient	15 Oct 1997	17 Dec 1997

Displacement, tons: 580 full load
 Dimensions, feet (metres): 210 × 37.4 × 9.8 (64 × 11.4 × 3)
 Main machinery: 2 Wärtsilä Nohab 25 V16 diesels; 10,000 hp(m) (7.36 MW) sustained; 2 Löröy auxiliary motors; 326 hp(m) (240 kW); 2 shafts; cp props
 Speed, knots: 24, 7 (on motors)
 Range, n miles: 4,000 at 12 kt
 Complement: 24 (3 officers) + 30 spare
 Guns: 1 Bofors 40 mm/60. 1 Oerlikon 20 mm. 4—14.5 mm MGs (2 twin).
 Radars: Surface search: Racal Decca Bridgmaster; I-band.

Comment: First pair ordered to a Sertre design from Leroux & Lotz, Lorient in December 1993, second pair in October 1994. Option on fifth taken up in 1996. There is a stern door for launching a 7 m RIB, a water gun for firefighting and two passive stabilisation tanks. This version of the OPV 64 does not have a helicopter deck and the armament is fitted after delivery. Manned by the Navy for the Fisheries Department. Based at Agadir.

RAÏS BRITEL 4/2007, Rafael Carrera Gonzalez / 1170199

RAÏS AL MOUNASTIRI 9/2005, S Dominguez Llosá / 1040670

**6 EL WACIL (P 32) CLASS
(COASTAL PATROL CRAFT) (PB)**

Name	No	Builders	Launched	Commissioned
EL WACIL	203	CMN, Cherbourg	12 June 1975	8 Oct 1975
EL JAIL	204	CMN, Cherbourg	10 Oct 1975	3 Dec 1975
EL MIKDAM	205	CMN, Cherbourg	1 Dec 1975	30 Jan 1976

EL HARIIS	207	CMN, Cherbourg	31 Mar 1976	30 June 1976
EL ESSAHIR	208	CMN, Cherbourg	2 June 1976	16 July 1976

Displacement, tons: 74 light; 89 full load
Dimensions, feet (metres): 106 x 17.7 x 4.6 (32 x 5.4 x 1.4)
Main machinery: 2 SACM MGO 12V BZSHR diesels, 2,700 hp (m) (1.98 MW); 2 shafts
Speed, knots: 28
Range, n miles: 1,500 at 15 kt
Complement: 17
Guns: 1 Oerlikon 20 mm.
Radars: Surface search: Decca, I-band.

Comment: Ordered in February 1974. In July 1985 a further four of this class were ordered from the same builders but for the Customs Service. Wooden hull sheathed in plastic.

EL JAIL 3/2004, S D Lloyd / 1044135

10 VCSM CLASS (PATROL CRAFT) (PB)

P 107-116

Displacement, tons: 40 full load
Dimensions, feet (metres): 65.6 x 16.4 x 4.9 (20.0 x 5.0 x 1.5)
Main machinery: 2 MAN V12 diesels; 2,000 hp (1.47 MW); 2 shafts
Speed, knots: 25
Range, n miles: 530 at 15 kt
Complement: 5
Guns: 1—7.62 mm MG
Radars: Navigation: Furuno; I-band.

Comment: Coastal Surveillance craft ordered from Raidco Marine in 2005 (4) and 2006 (6), built at l'Herbaudière and delivered in 2006-08. Raidco RPB 20 design. GRP hull and superstructure. A 4.9 m RIB can be embarked on an inclined ramp at the stern. There are 24 similar 'Vedettes' craft in service with the French Navy.

P 107 6/2006, B Prézelin / 1040671

1 PATROL VESSEL (PBO)

Name	No	Builders	Commissioned
— (ex-Cygnat)	323 (ex-P 261)	R Dunstan Ltd, Hesse	8 July 1976

Displacement, tons: 194 full load
Dimensions, feet (metres): 120 x 23.6 x 6.5 (36.6 x 7.2 x 2.0)
Main machinery: 2 Paxman 16VJCM diesels; 4,200 hp (3.1 MW); 2 shafts
Speed, knots: 21
Range, n miles: 2,000 at 14 kt
Complement: 21 (4 officers)
Guns: 1—12.7 mm MG
Radars: Navigation: I-band

Comment: Former Royal Navy Bird class patrol craft sold to a private buyer and delivered to Agadir on 11 April 1997. The ship was later implicated in a counter-drugs operation and the vessel was confiscated by the Moroccan authorities. It has since been operated by the Moroccan Navy.

323 3/2006, M Declerck / 1164950

0 + 4 OFFSHORE PATROL VESSELS (PSO)

Displacement, tons: To be announced
Dimensions, feet (metres): 229.7 x 37.1 x 7 (70.0 x 11.3 x 7)
Main machinery: 2 Wärtsilä diesels; 2 shafts
Speed, knots: 22
Range, n miles: To be announced.
Complement: 64
Guns: 1—76 mm, 1—40 mm
Radars: Surface search: To be announced.
Navigation: I-band.

Comment: The order for four patrol vessels was announced on 30 May 2008. Designed by Raidco Marine, the ships are to be built by Aker Yards, Lanester. Delivery of the first vessel is to be made in 2010 and the remainder at one-year intervals.

RAIDCO OPV (Scale 1 : 900), Ian Sturton / 1353238

AMPHIBIOUS FORCES

1 NEWPORT CLASS (LSTH)

Name	No	Builders	Commissioned
SIDI MOHAMMED BEN ABDALLAH (ex-Bristol County)	407 (ex-1198)	National Steel, San Diego	5 Aug 1972

Displacement, tons: 4,975 light; 8,450 full load
Dimensions, feet (metres): 522.3 (hull) x 69.5 x 17.5 (aft) (159.2 x 21.2 x 5.3)
Main machinery: 6 ALCO 16-251 diesels; 18,500 hp (12.3 MW) sustained, 2 shafts, cp props; bow thruster
Speed, knots: 20
Range, n miles: 14,250 at 14 kt
Complement: 257 (13 officers)
Military lift: 400 troops (20 officers); 500 tons vehicles; 3 LCVPs and 1 LCPL on davits
Guns: 1 GE/GD 20 mm 8-barrelled Vulcan Phoenix Mk 15.
Radars: Surface search: Raytheon SPS-67; G-band.
Navigation: Marconi LN66; I/J-band.
Helicopters: Platform only.

Comment: Received from the US by grant transfer on 16 August 1994. Has replaced *Arrafiq*. The ship was non-operational by late 1996 and although back in service, has so far proved to be a poor bargain. The bow ramp is supported by twin derrick arms. A ramp just forward of the superstructure connects the lower tank deck with the main deck and a vehicle passage through the superstructure provides access to the parking area amidships. A stern gate to the tank deck permits unloading of amphibious tractors into the water, or unloading of other vehicles into an LCU or on to a pier. Vehicle stowage covers 19,000 sq ft. Length over derrick arms is 562 ft (171.3 m); full load draught is 11.5 ft forward and 17.5 ft aft. Based at Casablanca.

SIDI MOHAMMED BEN ABDALLAH 7/2007, Shaun Jones / 1170195

3 BATRAL CLASS (LSMH)

Name	No	Builders	Commissioned
DAOUD BEN AICHA	402	Dubigeon, Normandie	28 May 1977
AHMED ES SAKALI	403	Dubigeon, Normandie	Sep 1977
ABOU ABDALLAH EL AYACHI	404	Dubigeon, Normandie	Mar 1978

Displacement, tons: 750 standard; 1,409 full load
 Dimensions, feet (metres): 262.4 x 42.6 x 7.9 (80 x 13 x 2.4)
 Main machinery: 2 SACM Type 196 V12 CSHR diesels, 3,600 hp(m) (2.65 MW) sustained; 2 shafts

Speed, knots: 16
 Range, n miles: 4,500 at 13 kt
 Complement: 47 (3 officers)
 Military lift: 140 troops; 12 vehicles or 300 tons
 Guns: 2 Bofors 40 mm/70, 2—81 mm mortars, 2—12.7 mm MGs.
 Radars: Surface search-Thomson-CSF DRBN 32 (Racal Decca 1226); I-band
 Helicopters: Platform only.

Comment: Two ordered on 12 March 1975. Third ordered 19 August 1975. Of same type as the French *Champlain*. Vehicle-stowage above and below decks. *Daoud Ben Aicha* was refitted in Lorient by Leroux & Lotz in 1995 and *Abou Abdallah el Ayachi* in 1997.

DAOUD BEN AICHA 10/2004, Carlos Pardo Gonzalez / 1133132

1 CTM (LCM)

Displacement, tons: 59 standard, 150 full load
 Dimensions, feet (metres): 78.0 x 21.0 x 4.2 (23.8 x 6.4 x 1.3)
 Main machinery: 2 Poyaud V8520NS diesels; 450 hp (331 kW); 2 shafts
 Speed, knots: 9.5
 Range, n miles: 380 at 8 kt
 Complement: 4 plus 200 passengers
 Military lift: 90 tons (maximum); 48 tons normal
 Guns: 1—12.7 mm MG
 Radars: Navigation: I-band.

Comment: Ex-CTM-5 transferred from France in August 2000.

LCM 6/2006, S Dominguez Llosá / 1040668

SURVEY AND RESEARCH SHIPS

1 ROBERT D CONRAD CLASS (AGOR)

Name	No	Builders	Commissioned
ABU AL BARAKAT	802 (ex-702)	Northwest Marine Iron Works,	31 Mar 1969
AL BARBARI (ex-Bartlett)	ex-T-AGOR 13)	Portland, OR	

Displacement, tons: 1,200 light, 1,370 full load
 Dimensions, feet (metres): 208.9 x 40 x 15.3 (63.7 x 12.2 x 4.7)
 Main machinery: Diesel-electric; 2 Caterpillar D 378 diesel generators; 1 motor; 1,000 hp (746 kW); 1 shaft; bow thruster
 Speed, knots: 13.5
 Range, n miles: 12,000 at 12 kt
 Complement: 41 (9 officers, 15 scientists)
 Radars: Navigation. TM 1660/12S; I-band.

Comment: Leased from the USA on 26 July 1993. Fitted with instrumentation and laboratories to measure gravity and magnetism, water temperature, sound transmission in water, and the profile of the ocean floor. Special features include 10 ton capacity boom and winches for handling over-the-side equipment; bow thruster; 620 hp gas turbine (housed in funnel structure) for providing 'quiet' power when conducting experiments; can propel the ship at 6.5 kt. Ships of this class are in service with Brazil, Mexico, Chile, Tunisia and Portugal.

ABU EL BARAKAT AL BARBARI 11/2004, Marco Ghiglini / 1133094

AUXILIARIES

Notes: (1) There is also a yacht, *Essaouira*, 60 tons, from Italy in 1967, used as a training vessel for watchkeepers.
 (2) Bazán delivered a harbour pusher tug, similar to Spanish Y 171 class, in December 1993.
 (3) There are two sail training craft *Al Massira* and *Boujdour*
 (4) There is a stern trawler used as a utility and diver support vessel (803 (ex-YFU 14)).

803 9/2004, S D Llosá / 1044141

1 LOGISTIC SUPPORT SHIP (AKS)

EL AIGH (ex-Merc Nordia) 405

Measurement, tons: 1,500 grt
 Dimensions, feet (metres): 252.6 x 40 x 15.4 (77 x 12.2 x 4.7)
 Main machinery: 1 Burmeister & Wain diesel; 1,250 hp(m) (919 kW); 1 shaft
 Speed, knots: 11
 Complement: 25
 Guns: 2—14.5 mm MGs

Comment: Logistic support vessel with four 5 ton cranes. Former cargo ship with ice-strengthened bow built by Fredrickshavn Vaerft in 1973 and acquired in 1981

EL AIGH 5/1994, M Declerck / 0506199

1 DAKHLA CLASS (LOGISTIC SUPPORT SHIP) (AKS)

Name	No	Builders	Launched	Commissioned
DAKHLA	408	Leroux & Lotz, Lorient	5 June 1997	1 Aug 1997

Displacement, tons: 2,160 full load
 Dimensions, feet (metres): 226.4 x 37.7 x 13.8 (69 x 11.5 x 4.2)
 Main machinery: 1 Wärtsilä Nohab 8V25 diesel; 2,300 hp(m) (1.69 MW) sustained; 1 shaft; cp prop
 Speed, knots: 12
 Range, n miles: 4,300 at 12 kt
 Complement: 24 plus 22 spare
 Cargo capacity: 800 tons
 Guns: 2—12.7 mm MGs
 Radars: Navigation: 2 Racal Decca Bridgemaster ARPA, I-band.

Comment: Ordered from Leroux & Lotz, Nantes in 1995. Side entry for vehicles. One 15 ton crane. Based at Agadir.

DAKHLA 8/1997, Leroux & Lotz / 0012789

CUSTOMS/COAST GUARD/POLICE

Notes: (1) The Coast Guard was created by Royal Decree on 9 September 1997. Responsibility for Search and Rescue conferred on the Ministère des Pêches Maritimes (MPM). Operational control is exercised from the National Rescue Service HQ at Rabat in co-ordination with the Merchant Marine HQ at Casablanca.
 (2) There is a 17 m SAR craft *Al Fida* delivered in August 2002.
 (3) There are four SAR craft: *Rif, Loukouss, Souss* and *Dghira*

AL WHADA 7/2004, S D Lloás / 1044137

SOUSS 7/1995, Zamacona / 1044138

2 SAR CRAFT (SAR)

AL AMANE 2344 AIT BAÄMRANE 2345

 Dimensions, feet (metres): 51.7 x 14.7 x 3.4 (15.75 x 4.48 x 1.05)
 Main machinery: 2 Volvo D12; 1,300 hp (970 kW); Hamilton waterjets
 Speed, knots: 34
 Complement: 4

Comment: Constructed by Auxnaval Shipbuilders, Spain and delivered in March 2003. Aluminium hull.

AL AMANE 7/2003, Auxnaval / 1044136

2 SAR CRAFT (SAR)

AL WHADA 12-64 SEBOU 12-65

Displacement, tons: 70 full load
 Dimensions, feet (metres): 68.0 x 19.2 x 5.9 (20.7 x 5.8 x 1.8)
 Main machinery: 2 MAN D2842 LE401 diesels, 2,000 hp (1.49 MW); 2 shafts
 Speed, knots: 20
 Complement: 4

Comment: Constructed by Auxnaval, Asturias, Spain and delivered in 2004.

AL WHADA 7/2004, Auxnaval / 1044139

4 ERRAID (P 32) CLASS (COASTAL PATROL CRAFT) (WPB)

Name	No	Builders	Launched	Commissioned
ERRAID	209	CMN, Cherbourg	20 Dec 1987	18 Mar 1988
ERRACED	210	CMN, Cherbourg	21 Jan 1988	16 Apr 1988
EL KACED	211	CMN, Cherbourg	10 Mar 1988	17 May 1988
ESSAID	212	CMN, Cherbourg	19 May 1988	4 July 1988

Displacement, tons: 89 full load
 Dimensions, feet (metres): 105 x 17.7 x 4.6 (32 x 5.4 x 1.4)
 Main machinery: 2 SACM MGO 12V BZSHR diesels; 2,700 hp(m) (1.98 MW); 2 shafts
 Speed, knots: 28
 Range, n miles: 1,500 at 15 kt
 Complement: 17
 Guns: 1 Oerlikon 20 mm.
 Radars: Navigation: Decca; I-band.

Comment: Similar to the El Wacil class listed under Patrol Forces. Ordered in July 1985.

EL KACED 6/1999, 0081779

18 ARCOR 46 CLASS (COASTAL PATROL CRAFT) (WPB)

Displacement, tons: 15 full load
 Dimensions, feet (metres): 47.6 x 13.8 x 4.3 (14.5 x 4.2 x 1.3)
 Main machinery: 2 SACM UD18V8 M5D diesels; 1,010 hp(m) (742 kW) sustained; 2 shafts
 Speed, knots: 32
 Range, n miles: 300 at 20 kt
 Complement: 6
 Guns: 2 Browning 12.7 mm MGs.
 Radars: Surface search: Furuno 701; I-band.

Comment: Ordered from Arcor, La Teste In June 1985. GRP hulls. Delivered in groups of three from April to September 1987. Used for patrolling the Mediterranean coastline.

ARCOR 46 CLASS 9/2004, S D Lloás / 1044140

3 SAR CRAFT (SAR)

HAOUZ ASSA TARIK

Displacement, tons: 40 full load
 Dimensions, feet (metres): 63.6 × 15.7 × 4.3 (19.4 × 4.8 × 1.3)
 Main machinery: 2 diesels; 1,400 hp(m) (1.03 MW); 2 shafts
 Speed, knots: 20
 Complement: 6

Comment: Rescue craft built by Schwaers, Bardoniafleth and delivered in 1991

15 ARCOR 53 CLASS (COASTAL PATROL CRAFT) (WPBF)

Displacement, tons: 17 full load
 Dimensions, feet (metres): 52.5 × 13 × 3.9 (16 × 4 × 1.2)
 Main machinery: 2 Saab DSI-14 diesels; 1,250 hp(m) (919 kW); 2 shafts
 Speed, knots: 35. Range, n miles: 300 at 20 kt
 Complement: 6
 Guns: 1—12.7 mm MG.
 Radars: Surface search: Furuno; I-band

Comment: Ordered from Arcor, La Teste in 1990 for the Police Force. Delivered at one month from October 1992.

ARCOR 53 CLASS

3/2006, M Declerck / 1164948

Mozambique

MARINHA MOÇAMBIQUE

Country Overview

The Republic of Mozambique gained independence from Portugal in 1975. Situated in south-eastern Africa, it has an area of 308,642 square miles and is bordered to the north by Tanzania, to the south by South Africa and Swaziland and to the west by Zimbabwe, Zambia, and Malawi. It has a 1,334 n mile coastline with the Mozambique Channel of the Indian Ocean. Maputo (formerly Lourenço Marques) is the capital, largest city and principal port. There is another major port at Beira. Territorial Seas (12 n miles) are claimed.

A 200 n mile EEZ has also been claimed but the limits are not fully defined by boundary agreements.

All the Russian built Zhuks and Yevgenyas have sunk alongside or been sold. There are some motorboats operational on Lake Malawi.

Headquarters Appointments

Commander of the Navy:
 Rear Admiral Patricio Jotamo

Personnel

2009: 200

Bases

Maputo (Naval HQ); Nacala, Beira; Pamba (Porto Amélia); Metangula (Lake Malawi); Tete (River Zambesi); Inhambane.

PATROL FORCES

Notes: A total of eight patrol craft have been reported donated by the US. Probably the widely exported Defender class, three were delivered on 21 December 2006, three on 19 March 2007 and the remaining two in late 2007.

2 NAMACURRA CLASS (INSHORE PATROL CRAFT) (PB)

Y 07 (ex-Y 1507) Y 30 (ex-Y 1530)

Displacement, tons: 5 full load
 Dimensions, feet (metres): 29.5 × 9 × 2.8 (9 × 2.7 × 0.8)
 Main machinery: 2 Yamaha outboards; 380 hp(m) (2.79 kW)
 Speed, knots: 32
 Range, n miles: 180 at 20 kt
 Complement: 4
 Guns: 1—12.7 mm MG. 2—7.62 mm MGs.
 Depth charges: 1 rack
 Radars: Surface search: Furuno; I-band

Comment: Built in South Africa in 1980–81. Can be transported by road. Donated by South Africa in 2004.

NAMACURRA (South African colours)

8/2001, van Ginderen Collection / 0132/83

Myanmar

TATMADAW YAY

Country Overview

The Union of Myanmar, also known as the Republic of Burma, gained independence in 1948. Situated in South East Asia, it has an area of 261,218 square miles, is bordered to the north-east by China, to the north-west by India and Bangladesh and to the south-east by Laos and Thailand. It has a 1,042 n mile coastline with the Andaman Sea and the Bay of Bengal. The administrative capital became Pyin Oung Uye on 6 November 2005. Rangoon (Yangon) is the commercial capital, largest city and principal port. Some 6,900 n miles of navigable inland waterways are important transport arteries. Territorial waters (12 n miles) are claimed. A 200 n mile EEZ has been claimed although the limits have only been partly defined by boundary agreements.

Headquarters Appointments

Commander in Chief:
 Rear Admiral Nyan Tun

Personnel

- (a) 2009: 13,000 (this may include 800 naval infantry)
 (b) Voluntary service

Bases

There are five regional commands with principal bases as indicated:
 Ayeyarwady (Irawaddy): Monkey Point (Navy HQ), Yangon (Rangoon), Thilawa (dockyard), Great Coco Island
 Taninthayri (Tenasserim): Myeik (Mergui) (Regional HQ), Zadetgyi Island (Base 58, St Matthew's Island), Kathayun (Kathayin), Pale Island, Thekaton (Kadan Island)
 Danyawady: Haingyi Island (Regional HQ), Pathain
 Mawrawady: Mawlamyine (Moulmein) (Regional HQ), Kyaikkami, Dawei (Tavoy)
 Panmawady: Kyaikpyu (Regional HQ), Akyab (Base 18, Sittwe), Thandwe
 The Headquarters of Training Command is at Thilawa in Rangoon. The main training depot is currently at Syriam

(Thanlyin), but is to be transferred to Seikkyi, near the mouth of the Hlaing (Rangoon) River. The Pathain base will reportedly be moved to Pyadatgyi Island, where an expanded airfield will permit the basing of air force equipment and personnel as well as navy. The Great Coco Island base has also been expanded through the construction of a large landing jetty to replace the existing small pier. It is also the site of a Chinese surveillance installation.

Organisations

Naval units are usually commanded directly from Rangoon, but operational control is occasionally delegated to regional commands.

Naval Infantry

The existence of 800 naval infantry has been previously reported but not confirmed.

FRIGATES

Notes. A programme for the procurement of a 110 m frigate of about 3,000 tons has reportedly been initiated. While further details are not known and it is unclear whether construction has started, the project is likely to have received Chinese assistance. This is reported to have included supply of diesel engines in 2007.

CORVETTES

3 ANAWRAHTA CLASS (CORVETTES) (FSG)

Name	No	Builders	Laid down	Launched	Commissioned
ANAWRAHTA	771	Sinmalaik Shipyard, Rangoon	1998	2000	2001
BAYINTNAUNG	772	Sinmalaik Shipyard, Rangoon	1998	2001	2003
	-	Sinmalaik Shipyard, Rangoon	1998	2001	2005

Displacement, tons: 1,088 full load
Dimensions, feet (metres): 252.6 x 7 x ?
(77.0 x 7 x ?)

Main machinery: To be announced

Speed, knots: To be announced

Complement: 101 (15 officers)

Missiles: SSM: 4 C-802; mid-course guidance and active radar homing to 150 km (81 n miles) at 0.9 Mach; warhead 165 kg.

Guns: 1 OTO Breda 3 in (76 mm)/62 compact, 85 rds/min to 16 km (8.7 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg

2 Breda 40 mm/70 (twin), 300 rds/min to 12.5 km (6.8 n miles); weight of shell 0.96 kg.

Countermeasures: To be announced.

Radars: Surface search. To be announced

Navigation: To be announced

Fire control: To be announced

Sonars: To be announced

Helicopters: Platform for 1 medium.

Programmes: The programme to acquire ships to replace the now decommissioned PCE-827 and Admirable class corvettes was probably instituted in the 1990s. As frigates initially proved to be too expensive, three Chinese hulls are believed to have been acquired in about 1998 for fitting out at Sinmalaik Shipyard. There have been reports that Israeli electronic systems (radars and sonar) have been fitted. The details of the programme are speculative.

ANAWRAHTA

12/2004 0581402

Operational: There has been speculation that these vessels were to be armed with four C-801 anti-ship missiles but is unclear as to whether they have been fitted. The first ship conducted sea trials in 2001 when the second ship was reportedly nearing completion.

Three ships were reported in commission by 2004 although there have been no known sightings of the second two ships. *Anawrahta* visited Port Blair in January 2006 and *Bayintnaung* participated in Exercise Milan 2008.

ANAWRAHTA

1/2006, Indian Navy / 1158724

PATROL FORCES

Notes: There is a new class of river patrol craft known as the Ngaman class. These 8 m craft are of a Boston Whaler type and are armed with a 12.5 mm gun in the bow and a twin 7.62 mm aft. Locally built, the craft have probably replaced the PBR Mk II class which have been decommissioned

6 HOUXIN (TYPE 037/1G) CLASS (FAST ATTACK CRAFT – GUN) (PTG)

MAGA 471 SAITRA 472 DUWA 473 ZEYDA 474 475 476

Displacement, tons: 478 full load
Dimensions, feet (metres): 206 × 23.6 × 7.9 (62.8 × 7.2 × 2.4)
Main machinery: 4 PR 230ZC diesels; 4,000 hp(m) (2.94 MW); 4 shafts
Speed, knots: 28 **Range, n miles:** 1,300 at 15 kt
Complement: 71

Missiles: SSM: 4 YJ-1 (C-801) (2 twin); active radar homing to 40 km (22 n miles) at 0.9 Mach; warhead 165 kg; sea skimmer C-802 may be fitted in due course.

Guns: 4 – 37 mm/63 Type 76A (2 twin); 180 rds/min to 8.5 km (4.6 n miles); weight of shell 1.42 kg.

4 – 14.5 mm Type 69 (2 twin).

Countermeasures: ESM/ECM, Intercept and jammer.

Radars: Surface search: Square Tie, I-band

Fire control: Rice Lamp; I-band.

Programmes: First pair arrived from China in December 1995, second pair in mid-1996 and last two in late 1997. The first four were wrongly reported as Heinan class.

Structure: Details given are for this class in Chinese service.

Operational: 475 damaged in a collision during sea trials in August 1996. All based at Rangoon.

ZEYDA

6/2001 / 0130747

MYANMAR CLASS 556

6/2007 / 1170700

MYANMAR CLASS 563

6/2001 / 0130746

2 OSPREY CLASS (OFFSHORE PATROL VESSELS) (PBO)

Name	No	Builders	Commissioned
INDAW	FV 55	Frederikshavn Dockyard	30 May 1980
INVA	FV 57	Frederikshavn Dockyard	25 Mar 1982

Displacement, tons: 385 standard; 505 full load

Dimensions, feet (metres): 164 × 34.5 × 9 (50 × 10.5 × 2.8)

Main machinery: 2 Burmeister and Wain Alpha diesels; 4,640 hpt(m) (3.4 MW); 2 shafts; cp props

Speed, knots: 20. **Range, n miles:** 4,500 at 16 kt

Complement: 20 (5 officers)

Guns: 1 Bofors 40 mm/60. 2 Oerlikon 20 mm.

Comment: Operated by Burmese Navy for the People's Pearl and Fishery Department. Helicopter deck with hangar in *Indaw*. Carry David Still craft or RIBs capable of 25 kt. *Inva* reported to be in poor condition. Both based at Rangoon. A third of class, *Inma*, reported to have sunk in 1987. A similar ship is in service in Namibia.

INVA

1980 / 0056642

MYANMAR CLASS 556-558

11/2005 / 1151121

3 PB 90 CLASS (COASTAL PATROL CRAFT) (PB)

424–426

Displacement, tons: 92 full load

Dimensions, feet (metres): 89.9 × 21.5 × 7.2 (27.4 × 6.6 × 2.2)

Main machinery: 3 diesels; 4,290 hp(m) (3.15 MW); 3 shafts

Speed, knots: 32

Range, n miles: 400 at 25 kt

Complement: 17

Guns: 8 – 20 mm M75 (two quad). 2 – 128 mm launchers for illuminants.

Radars: Surface search: Decca 1226; I band.

Comment: Built by Brodotekhnika, Yugoslavia for an African country and completed in 1986–87. Laid up when the sale did not go through and shipped to Burma arriving in October 1990. All are active. Based at Rangoon.

PB 90 (Yugoslav colours)

1990, Yugoslav FDSP 0056643

9 MYANMAR CLASS (COASTAL PATROL CRAFT) (PGG)

551–558 560

Displacement, tons: 213 full load

Dimensions, feet (metres): 147.3 × 23 × 8.2 (45 × 7 × 2.5)

Main machinery: 2 Mercedes-Benz diesels; 2 shafts

Speed, knots: 30+

Complement: 34 (7 officers)

Missiles: 4 YJ-1 (Eagle Strike) (C-801) (2 twin) launchers, active radar homing to 40 km (22 n miles) at 0.9 Mach; warhead 165 kg.

Guns: 2 – 37 mm (twin), 4 – 23 mm (2 twin) (gun-armed variant)

4 – 30 mm AK 230 (2 twin), 4 – 14.5 mm (1 quad) (missile-armed variant).

Radars: Surface search: I-band

Fire control: Rice Lamp; I-band.

Comment: First ship under construction at the Naval Engineering Depot, Rangoon in 1991. 551 launched on 2 January 1996 and 552 on 4 January 1996. Four further vessels reported in service by 2004, a further two in 2005 and a further one by 2007. There appear to be three variants of the class. Possibly four (556–558 and 560) have missile launchers believed to house C-801. These have a higher mainmast and an additional radar. The remainder (551–552 and 553–555) are gun-armed but with differences in superstructure.

9 HAINAN (TYPE 037) CLASS (COASTAL PATROL CRAFT) (PC)

YAN YE AUNG 445 YAN NYEIN AUNG 443
 YAN WIN AUNG 448 YAN PAING AUNG 447
 YAN MYAT AUNG 442 YAN ZWE AUNG 450
 YAN MIN AUNG 446 YAN KHWIN AUNG 444
 YAN AYE AUNG 449

Displacement, tons: 375 standard; 392 full load
Dimensions, feet (metres): 192.8 × 23.6 × 7.2 (58.8 × 7.2 × 2.2)
Main machinery: 4 PCR/Kolomna Type 9-D-8 diesels, 4,000 hp(m) (2.94 MW) sustained; 4 shafts
Speed, knots: 30.5
Range, n miles: 1,300 at 15 kt
Complement: 69
Guns: 4 China 57 mm/70 (2 twin); 120 rds/min to 12 km (6.5 n miles); weight of shell 6.31 kg
 4 USSR 25 mm/60 (2 twin); 270 rds/min to 3 km (1.6 n miles) anti-aircraft; weight of shell 0.34 kg
A/S mortars: 4 RBU 1200 5-tubed fixed launchers, range 1,200 m; warhead 34 kg
Depth charges: 2 BMB-2 projectors; 2 racks.
Mines: Rails fitted.
Countermeasures: ESM; Intercept.
Radars: Surface search: Pot Head, I-band
 Navigation: Raytheon Pathfinder; I-band.
 IFF: High Pole.
Sonars: Stag Ear; hull-mounted, active search and attack; high frequency.

Comment: First six delivered from China in January 1991, four more in mid-1993. The first six originally had double figure pennant numbers which have been changed to three figures. These ships are the later variant of this class with tripod masts. Based at Rangoon. *Yan Sit Aung* (441) reported sunk during cyclone Nargis (May 2008).

YAN WIN AUNG

9/1993 / 0056641

YAN KHWIN AUNG

3/2008* / 1353241

4 RIVER GUNBOATS (EX-TRANSPORTS) (PBR)

SAGU SEINDA SHWETHIDA SINMIN

Displacement, tons: 98 full load
Dimensions, feet (metres): 94.5 × 22 × 4.5 (28.8 × 6.7 × 1.4)
Main machinery: 1 Crossley ERL 6-cyl diesel; 160 hp (119 kW); 1 shaft
Speed, knots: 12
Complement: 32
Guns: 1—40 mm/60 (*Sagu*), 1—20 mm (3 in *Sagu*)

Comment: Built in mid-1950s. *Sinmin*, *Seinda* and *Shwethida* have a roofed-in upper deck with a 20 mm gun forward of the funnel. *Sagu* has an open upper deck aft of the funnel but with a 40 mm gun forward and mountings for 20 mm aft on the upper deck and midships either side on the lower deck. Based at Moulmein and at least two are operational. Four other ships of the same type are unarmed and are listed under *Auxiliaries*.

SEINDA

8/1994 / 0056649

6 BURMA PGM TYPE (COASTAL PATROL CRAFT) (PB)

PGM 412-415 THHAYARZAR I THHAYARZAR II

Displacement, tons: 168 full load
Dimensions, feet (metres): 110 × 22 × 6.5 (33.5 × 6.7 × 2)
Main machinery: 2 Deutz SBA16MB816 LLKR diesels; 2,720 hp(m) (2 MW); 2 shafts
Speed, knots: 16. **Range, n miles:** 1,400 at 14 kt
Complement: 17
Guns: 2 Bofors 40 mm/60.

Comment: Built by Burma Naval Dockyard modelled on the US PGM 43 type. First two completed 1983. Two more craft with different superstructure but with identical dimensions and named *Thuhayzar I* and *II* were delivered by Myanmar Shipyard to the Customs on 27 June 1993. Both craft may be lightly armed.

PGM 415

4/1993 / 0056644

THHAYARZAR CLASS

11/2005 / 1151118

1 IMPROVED Y 301 CLASS (RIVER GUNBOAT) (PBR)

Y 311

Displacement, tons: 250 full load
Dimensions, feet (metres): 121.4 × 24 × 3.9 (37 × 7.3 × 1.2)
Main machinery: 2 MTU MB diesels; 1,000 hp(m) (735 kW); 2 shafts
Speed, knots: 12
Complement: 37
Guns: 2 Bofors 40 mm/60, 4 Oerlikon 20 mm.
Radars: Surface search: Raytheon; I-band.

Comment: Built at Simmilak in 1969 and based on similar Yugoslav craft which have been scrapped. Y 312 sunk during cyclone Nargis (May 2008). Based at Sittwe.

Y 311

11/2005 / 1151120

6 CARPENTARIA CLASS (RIVER PATROL CRAFT) (PBR)

112-117

Displacement, tons: 26 full load
Dimensions, feet (metres): 51.5 × 15.7 × 4.3 (15.7 × 4.8 × 1.3)
Main machinery: 2 MTU 8V 331TC92 diesels; 1,770 hp(m) (1.3 MW) sustained; 2 shafts
Speed, knots: 29. **Range, n miles:** 950 at 18 kt
Complement: 10
Guns: 1 Oerlikon 20 mm, 1—12.7 mm MG.

Comment: Built by De Havilland Marine, Sydney. First two delivered 1979, remainder in 1980. Similar to craft built for Indonesia. Based at Rangoon.

CARPENTARIA 113

1991 / 0056651

25 MICHAO CLASS (PBR)

001-025

Comment: Small craft, 52 ft (15.8 m) long, acquired from Yugoslavia in 1965. Also used to ferry troops and two are used as VIP launches. 1 to 7 based at Rangoon; 8 to 16 at Moulmein and 17 to 25 at Sittwe.

MICHAO CLASS

5/1995 / 0056650

2 CGCTYPE (RIVER GUNBOATS) (PBR)

MGB 102

MGB 110

Displacement, tons: 49 standard; 66 full load
Dimensions, feet (metres): 83 x 16 x 5.5 (25.3 x 4.9 x 1.7)
Main machinery: 4 GM diesels, 800 hp (596 kW); 2 shafts
Speed, knots: 11
Complement: 16
Guns: 1 Bofors 40 mm/60. 1 Oerlikon 20 mm.

Comment: Ex-USCG type cutters with new hulls built in Burma. Completed in 1960. Based at Rangoon but have not been seen recently.

MGB 110

0505966

10 Y 301 CLASS (RIVER GUNBOATS) (PBR)

Y 301-310

Displacement, tons: 120 full load
Dimensions, feet (metres): 104.8 x 24 x 3 (32 x 7.3 x 0.9)
Main machinery: 2 MTL MB diesels; 1,000 hp(m) (735 kW); 2 shafts
Speed, knots: 13
Complement: 29
Guns: 2 Bofors 40 mm/60 or 1 Bofors 40 mm/60 and 1 Vickers 2-pdr.

Comment: All of these boats were completed in 1958 at the Uljanik Shipyard, Pula, Yugoslavia. Y 301, 303 and 307 based at Moulmein. The remainder at Rangoon.

Y 306

3/2008* / 1353242

3 SWIFT TYPE PGM (COASTAL PATROL CRAFT) (PB)

PGM 421-423

Displacement, tons: 128 full load
Dimensions, feet (metres): 103.3 x 23.8 x 6.9 (31.5 x 7.2 x 3.1)
Main machinery: 2 MTU 12V 331 TC81 diesels; 2,450 hp(m) (1.8 MW) sustained; 2 shafts
Speed, knots: 27
Range, n miles: 1,800 at 18 kt
Complement: 25
Guns: 2 Bofors 40 mm/60. 2 Oerlikon 20 mm. 2-12.7 mm MGs.
Radars: Surface search: Raytheon 1500; I-band.

Comment: Swiftships construction completed between March and September 1979. Acquired 1980 through Vosper, Singapore. PGM 421 previously reported sunk in 1990s but reported to have been repaired. Based at Rangoon.

PGM

6/1991 / 0056645

6 PGM 43 TYPE (COASTAL PATROL CRAFT) (PB)

PGM 401-406

Displacement, tons: 141 full load
Dimensions, feet (metres): 101 x 21.1 x 7.5 (30.8 x 6.4 x 2.3)
Main machinery: 8 GM 6-71 diesels; 1,392 hp (1.04 MW) sustained; 2 shafts
Speed, knots: 17
Range, n miles: 1,000 at 15 kt
Complement: 17
Guns: 1 Bofors 40 mm/60. 2 Oerlikon 20 mm (twin). 2-12.7 mm MGs.
Radars: Surface search: Raytheon 1500 (PGM 405-406).
 EDO 320 (PGM 401-404); I/J-band

Comment: First four built by Marinette Marine in 1959, last pair by Peterson Shipbuilders in 1961. PGM 401-403 based at Moulmein and 404-405 at Rangoon. PGM 406 at Sittwe.

PGM 406

3/1992 / 0056646

9 RIVER PATROL CRAFT (PBR)

RPC 11-19

Displacement, tons: 37 full load
Dimensions, feet (metres): 50 x 14 x 3.5 (15.2 x 4.3 x 1.1)
Main machinery: 2 Thornycroft RZ 6 diesels; 250 hp (186 kW); 2 shafts
Speed, knots: 10
Range, n miles: 400 at 8 kt
Complement: 8
Guns: 1 Oerlikon 20 mm or 2-12.7 mm MGs (twin). 1-12.7 mm MG

Comment: Built by the Naval Engineering Depot, Rangoon. First five in mid-1980s; second batch of a modified design in 1990-91. Sometimes used by the Naval Infantry and can carry up to 35 troops. Based at Rangoon.

AMPHIBIOUS FORCES

1 LCU

AIYAR LULIN 603

Displacement, tons: 360 full load
Dimensions, feet (metres): 119 x 34 x 6 (36.3 x 10.4 x 1.8)
Main machinery: 4 GM diesels; 600 hp (448 kW); 2 shafts
Speed, knots: 10
Range, n miles: 1,200 at 8 kt
Complement: 14
Military lift: 168 tons
Guns: 1-12.7 mm MG

Comment: Completed in Rangoon in 1968 to the US 1610 design. Based at Rangoon.

AIYAR LULIN

1990 / 0056654

10 LCM 3 TYPE

LCM 701-710

Displacement, tons: 52 full load
Dimensions, feet (metres): 50 x 14 x 4 (15.2 x 4.3 x 1.2)
Main machinery: 2 Gray Marine 64 HN9 diesels; 330 hp (246 kW); 2 shafts
Speed, knots: 9
Complement: 5

Comment: US-built LCM type landing craft. Used as local transports for stores and personnel. Cargo capacity, 30 tons. Guns have been removed. Based at Sittwe.

LCM 704

5/1994 / 0056655

4 ABAMIN CLASS (LCU)

AIYAR MAI 604 AIYAR MAUNG 605 AIYAR MINTHAMEE 606 AIYAR MINTHAR 607

Displacement, tons: 250 full load
 Dimensions, feet (metres): 125.6 × 29.8 × 4.6 (38.3 × 9.1 × 1.4)
 Main machinery: 2 Kubota diesels; 600 hp(m) (441 kW); 2 shafts
 Speed, knots: 10
 Complement: 10
 Military lift: 100 tons
 Guns: 1—12.7 mm MG.

Comment: All built by Yokohama Yacht in 1969. Based at Rangoon.

AIYAR MAUNG 1991 / 0056653

3 LCU

001-003

Comment: Operated by the Army. Dimensions not known.

LANDING CRAFT 003 7/1992 / 0056652

MINE WARFARE FORCES

Notes: Up to two Chinese-built minesweepers are expected to be acquired when funds are available.

SURVEY SHIPS

Notes: Thu Tay Thi means 'survey vessel'.

1 SURVEY CRAFT (AGSC)

Name	No	Builders	Commissioned
YAY BO	807	Damen, Netherlands	1958

Displacement, tons: 108 full load
 Dimensions, feet (metres): 98.4 × 22.3 × 4.9 (30 × 6.8 × 1.5)
 Main machinery: 2 diesels; 2 shafts
 Speed, knots: 10
 Complement: 34 (2 officers)
 Guns: 1—12.7 mm MG

Comment: Used for river surveys. Based at Rangoon.

YAY BO 1990 / 0056658

AUXILIARIES

Notes: As well as the ships listed below there is a small coastal oil tanker, a harbour tug and several harbour launches and personnel carriers.

1 TRANSPORT VESSEL (AK)

AYIDAWAYA

Displacement, tons: 805 full load
 Dimensions, feet (metres): 163.4 × 27.6 × 12.1 (49.8 × 8.4 × 3.7)
 Main machinery: 1 diesel; 600 hp(m) (441 kW); 1 shaft
 Speed, knots: 12
 Complement: 30

Comment: Built in Norway in 1975. Acquired in 1991 and used as transport for stores and personnel.

AYIDAWAYA 12/1991 / 0056658

1 BUOYTENDER (ABU)

HSAD DAN

Displacement, tons: 706 full load
 Dimensions, feet (metres): 130.6 × 37.1 × 8.9 (39.8 × 11.3 × 2.7)
 Main machinery: 2 Deutz B48M816 diesels; 1,341 hp(m) (985 kW); 2 shafts
 Speed, knots: 10
 Complement: 23

Comment: Built by Italhai in 1986. Operated by the Rangoon Port Authority but manned by the Navy.

HSAD DAN 8/1992 / 0056662

8 MFVS

811 520-523 801 905-906

Comment: Armed vessels of approximately 200 tons (801), 80 tons (905, 906) and 50 tons (remainder) with a 12.7 mm or 6.72 mm MG mounted above the bridge in some. All have navigational radars. Based at Rangoon.

MFV 8/1990 / 0104255

4 TRANSPORT VESSELS (AKL)

SABAN SETHYA SHWEPAZUN SETYAHAT

Displacement, tons: 98 full load
Dimensions, feet (metres): 94.5 x 22 x 4.5 (28.8 x 6.7 x 1.4)
Main machinery: 1 Crossley ERL 6-cyl diesel; 160 hp (119 kW); 1 shaft
Speed, knots: 12
Complement: 30

Comment: These are sister ships to the armed gunboats shown under *Patrol Forces*. It is possible that a 20 mm gun may be mounted on some occasions. Based at Rangoon.

SHWEPAZUN 1991 / 005661

1 TRANSPORT VESSEL (AKL)

PYI DAW AYE

Displacement, tons: 850 full load
Dimensions, feet (metres): 163 x 27 x 11.5 (49.7 x 8.3 x 3.5)
Main machinery: 2 diesels; 600 hp (447 kW); 2 shafts
Speed, knots: 11
Complement: 12

Comment: Completed in about 1975. Dimensions are approximate. Naval manned.

PYI DAW AYE 1991 / 005663

PRESIDENTIAL YACHT

1 TRANSPORT SHIP (YAC)

YADANABON

Comment: Built in Burma and used for VIP cruises on the Irrawaddy river and in coastal waters. Armed with 2-7.62 mm MGs and manned by the Navy.

PRESIDENT'S YACHT 1990 / 005665

Namibia

Country Overview

Formerly South West Africa and governed by South Africa, Namibia gained independence in 1990 although South Africa continued to administer an enclave containing the principal seaport, Walvis Bay, until 1994. With an area of 318,252 square miles, it has borders to the north with Angola and to the south with South Africa. It has an 848 n mile coastline with the south Atlantic Ocean. The capital and largest city is Windhoek and there is another port at Luderitz. Territorial seas (12 n miles) are claimed; it also claims a 200 n mile Exclusive Economic Zone (EEZ)

but its limits have not been fully defined by boundary agreements.

The Maritime Wing became the Navy on 7 October 2004.

Headquarters Appointments

Head of Navy:
 Captain Peter Vilho

Bases

Walvis Bay

Personnel

2009: 350

Aviation

Five ex-US Air Force Cessna O-2A observation aircraft operate in a maritime surveillance role.

PATROL FORCES

1 IMPERIAL MARINHEIRO CLASS (COASTAL PATROL SHIP) (PB)

Name	No	Builders	Commissioned
LIEUTENANT GENERAL DIMO HAMAAMBO (ex-Purus)	C 11 (ex-V 23)	Smit, Kinderdijk, Netherlands	17 Apr 1965

Displacement, tons: 911 standard, 1,025 full load
Dimensions, feet (metres): 184 x 30.5 x 11.7 (56 x 9.3 x 3.6)
Main machinery: 2 Sulzer 6TD36 diesels; 2,160 hp(m) (1.69 MW); 2 shafts
Speed, knots: 18
Complement: 64 (6 officers)
Guns: 1—3 in (76 mm)/50 Mk 33; 50 rds/min to 12.8 km (6.9 n miles); weight of shell 6 kg. 2 or 4 Oerlikon 20 mm.
Radars: Surface search: Racal Decca; I-band.

Comment: Built for Brazilian Navy as fleet tug but subsequently classified as a corvette. Withdrawn from Brazilian service in 2002 and recommissioned into the Namibian Navy on 27 August 2004.

LIEUTENANT GENERAL DIMO HAMAAMBO 2/2006, W Clements / 1040664

1 GRAJAÚ CLASS (LARGE PATROL CRAFT) (PBO)

Name	No	Builders	Laid down	Launched	Commissioned
BRENDAN SIMBWAYE	P 48	Inace, Fortaleza	25 Feb 2005	1 May 2008	Dec 2008

Displacement, tons: 263 full load
Dimensions, feet (metres): 152.8 x 24.6 x 7.5 (46.5 x 7.5 x 2.3)
Main machinery: 2 MTU 16V 396 TB94 diesels; 5,800 hp(m) (4.26 MW) sustained, 2 shafts
Speed, knots: 26
Range, n miles: 2,200 at 12 kt
Complement: 29 (4 officers)
Guns: 1 Bofors 40 mm/70; 2 Oerlikon 20 mm.
Radars: Surface search: Racal Decca 1290A; I-band.

Comment: Following an agreement between the governments of Namibia and Brazil in November 2003, the project for a new patrol ship is being conducted by EMGEPRON which contracted Inace for the construction of the vessel. The ship is to be similar to Guanabara built for the Brazilian Navy in 1999, and on which details are based.

GRAJAÚ CLASS (Brazilian colours) 2/2001, Mario R V Carneiro / 0130468

0 + 4 TRACKER II CLASS (COASTAL PATROL CRAFT) (PB)

Displacement, tons: 31 standard; 45 full load
Dimensions, feet (metres): 68.6 × 17 × 4.8 (20.9 × 5.2 × 1.5)
Main machinery: 2 MTU 8V 396 TB83 diesels; 2,100 hp(m) (1.54 MW) sustained; 2 shafts
Speed, knots: 25. **Range, n miles:** 600 at 15 kt
Complement: 8 (2 officers)
Guns: 2—12.7 mm MGs
Radars: Surface search: Racal Decca RM 1070A; I-band.

Comment: Construction of four new craft is to begin once the patrol ship *Brenden Simbwaye* is completed in late 2008. The first two are to be delivered in 2009 and the second pair in 2010.

TRACKER II CLASS (Brazilian colours) 10/2003, Gomet/Marsan / 0569150

1 PATROL SHIP (PBO)

Name	No	Builders	Commissioned
ORYX (ex-S to S)	P 01	Burmeister/Abeking & Rasmussen	May 1975

Displacement, tons: 406 full load
Dimensions, feet (metres): 149.9 × 28.9 × 7.9 (45.7 × 8.8 × 2.4)
Main machinery: 2 Deutz RSBA 16M diesels; 2,000 hp(m) (1.47 MW); 1 shaft; cp prop; bow thruster
Speed, knots: 14. **Range, n miles:** 4,100 at 11 kt
Complement: 20 (6 officers)
Guns: 1—12.7 mm MG
Radars: Surface search: Furuno ARPA FR 1525; I-band
Navigation: Furuno FR 805D; I-band.

Comment: Built for the Nautical Investment Company, Penama and used as a yacht by the Managing Director of Fiat. Acquired in 1993 by Namibia. Replaced by *Nathanael Maxwellili* in fishery protection role and transferred to the navy as a patrol ship in 2002.

ORYX 6/1997 / 0081282

2 NAMACURRA CLASS (INSHORE PATROL CRAFT) (PB)

—(ex-Y 1501) —(ex-Y 1510)

Displacement, tons: 5 full load
Dimensions, feet (metres): 29.5 × 9 × 2.8 (9 × 2.7 × 0.8)
Main machinery: 2 Yamaha outboards; 380 hp(m) (2.79 kW)
Speed, knots: 32. **Range, n miles:** 180 at 20 kt
Complement: 4
Guns: 1—12.7 mm MG. 2—7.62 mm MGs.
Depth charges: 1 rack.
Radars: Surface search: Furuno; I-band.

Comment: Built in South Africa in 1980–81. Can be transported by road. Donated by South Africa on 29 November 2002.

NAMACURRA 8/2001, van Ginderen Collection / 0132/83

GOVERNMENT MARITIME FORCES

Notes: There are also four research ships. *Benguela, Walwitschis, Nautilus II* and *Kuiseb*.

1 OSPREY FV 710 CLASS (PBOH)

Name	No	Builders	Commissioned
TOBIAS HAINYEKO (ex-Havørnen)	—	Frederikshavn Vaertt	July 1979

Displacement, tons: 505 full load
Dimensions, feet (metres): 164 × 34.5 × 9 (50 × 10.5 × 2.8)
Main machinery: 2 Burmeister & Wain Alpha 16V23L diesels; 4,640 hp(m) (3.41 MW); 2 shafts, cp props
Speed, knots: 20. **Range, n miles:** 4,000 at 15 kt
Complement: 15 plus 20 spare
Radars: Surface search: Furuno ARPA FR 1525; I-band.
Navigation: Furuno FRM 64; I-band.

Comment: Donated by Denmark in late 1993, retaining some Danish crew. Recommissioned 15 December 1994. The helicopter deck can handle up to Lynx size aircraft and there is a slipway on the stern for launching an RIB. Similar ships in service in Greece, Morocco and Myanmar.

TOBIAS HAINYEKO 6/2008* / 133539/

2 PATROL SHIPS (PBOH)

Name	Builders	Commissioned
NATHANAEL MAXWILILI	Moen Slip AS, Kolvereid, Norway	14 May 2002
ANNA KAKURUKAZE MUNGUNDA	Freire Shipyards, Vigo	10 Feb 2004

Displacement, tons: 1,500
Dimensions, feet (metres): 189.0 × 41.0 × 13.8 (57.6 × 12.5 × 4.2)
Main machinery: 2 Deutz SBV8M diesel; 4,063 hp (3.03 MW); 2 shafts; Kamewa Ulstein bow thruster; 385 hp (285 kW)
Speed, knots: 17. **Range, n miles:** 8,200 at 16 kt
Radars: Furuno FR-2125; I-band
Helicopters: Platform only.

Comment: *Nathanael Maxwellili* ordered in 1999. Financed by NORAD (Norwegian Agency for Development Co-Operation). *Anna Kakurukaze Mungunda* was financed by the Spanish government. Equipped with inspection craft for fishery protection role.

NATHANAEL MAXWILILI 2/2006, W Clements / 1041065

ANNA KAKURUKAZE MUNGUNDA 3/2005, W Clements / 1041067

NATO**Overview**

The North Atlantic Treaty Organisation (NATO) was formed under Article 9 of the North Atlantic Treaty signed on 4 April 1949. Now comprising 26 members, the original signatories

were Belgium, Canada, Denmark, France, Iceland, Italy, Luxembourg, Netherlands, Norway, Portugal, UK and US. Greece and Turkey were admitted to the alliance in 1952, West Germany in 1955, and Spain in 1982. In 1990 the newly unified Germany replaced West Germany. Three former

members of the Warsaw Pact, Czech Republic, Hungary and Poland were admitted in 1999. Seven further countries: Bulgaria, Estonia, Latvia, Lithuania, Romania, Slovakia and Slovenia, became members on 29 March 2004. A new NATO-Russia council was inaugurated on 28 May 2002.

SUBMARINES

Notes: Operational analysis to establish the requirements for a future submarine capability, to enter service from about 2025, has been initiated.

4 WALRUS CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
WALRUS	S 802	Rotterdamse Droogdok Mij, Rotterdam	11 Oct 1979	26 Oct 1985 (13 Sep 1989)	25 Mar 1992
ZEELEEUW	S 803	Rotterdamse Droogdok Mij, Rotterdam	24 Sep 1981	20 June 1987	25 Apr 1990
DOLFIJN	S 808	Rotterdamse Droogdok Mij, Rotterdam	12 June 1986	25 Apr 1990	29 Jan 1993
BRUINVIS	S 810	Rotterdamse Droogdok Mij, Rotterdam	14 Apr 1988	25 Apr 1992	5 July 1994

Displacement, tons: 2,465 surfaced; 2,800 dived

Dimensions, feet (metres): 223.1 x 27.6 x 23
(677 x 8.4 x 7)

Main machinery: Diesel-electric; 3 SEMT Pielstick 12 PA4
200 VG diesels; 6,300 hp(m) (4.63 MW); 3 alternators;
2.88 MW; 1 Holec motor; 6,910 hp(m) (5.1 MW); 1 shaft

Speed, knots: 12 surfaced; 20 dived

Range, n miles: 10,000 at 9 kt snorting

Complement: 52 (7 officers)

Missiles: SSM: McDonnell Douglas Sub Harpoon; active
radar homing to 130 km (70 n miles); at 0.9 Mach,
warhead 227 kg.

Torpedoes: 4 - 21 in (533 mm) tubes. Honeywell Mk 48 Mod 4;
wire-guided; active/passive homing to 38 km (20.5 n
miles) active at 55 kt; 50 km (27 n miles) passive at 40 kt;
warhead 267 kg; 20 torpedoes or missiles carried. Mk 19
Turbine ejection pump. Mk 67 water-ram discharge

Mines: 40 in lieu of torpedoes.

Countermeasures: ESM L3 DR 3000; radar warning.

Weapons control: Signaal SEWACO VIII action data
automation. Signaal Gipsy data system. GTHW integrated
Harpoon and Torpedo FCS.

Radars: Surface search. Signaal/Racal. ZW07; I-band.

Sonars: Thomson Sintra TSM 2272 Eledone Octopus; hull-
mounted; passive/active search and attack; medium
frequency

GEC Avionics Type 2026; towed array; passive search;
very low frequency.

Thomson Sintra DUUX 5; passive ranging and intercept.

Programmes: Contract for the building of the first was
signed 16 June 1979, the second was on 17 December
1979. In 1981 various changes to the design were made
which resulted in a delay of one to two years. *Dolfijn* and
Bruinvis ordered 16 August 1985, prefabrication started
late 1985. Completion of *Walrus* delayed by serious fire
14 August 1986, hull undamaged but cabling and computers
destroyed. *Walrus* relaunched 13 September 1989.

Modernisation: A snort exhaust diffuser was fitted to
Zeeleeuw in 1996. The rest of the class have been
similarly modified. A life-extension programme for all
four boats is planned to start in 2011 and to be completed
in 2018. Upgrades are likely to include platform (including
pressure hull) preservation measures, replacement
of the combat management system, installation of an
optronic mast (to replace one periscope) and upgrade of
the sonar.

Structure: These are improved *Zwaardvis* class with similar
dimensions and silhouettes except for X stern. Use of H T
steel increases the diving depth by some 50 per cent.
Diving depth, 300 m (984 ft). Pilkington Optronics CK 24
search and CH 74 attack periscopes.

Operational: Weapon systems evaluations completed
1990-93. Sub Harpoon is not carried.

Flight deck, feet (metres): 88.6 x 61.7 (27 x 18.8)
Main machinery: CODOG; 2 RR SM1C Spey; 52,300 hp (39 MW) sustained; 2 Stork-Wärtsilä 16V 26 ST diesels; 13,600 hp(m) (10 MW); 2 shafts; LIPS; cp props
Speed, knots: 28 **Range, n miles:** 5,000 at 18 kt
Complement: 204 (32 officers) including staff

Missiles: SSM: 8 McDonnell Douglas Harpoon Block 1D; active radar homing to 240 km (130 n miles) at 0.9 Mach; warhead 227 kg

SAM: Mk 41 VLS (40 cells); 32 Raytheon Standard SM2-MR (Block IIIA); command/inertial guidance; semi-active radar homing to 167 km (90 n miles) at 2.5 Mach. 32 Evolved Sea Sparrow RIM 162B (quad pack); semi-active radar homing to 18 km (9.7 n miles) at 3.6 Mach; warhead 38 kg.

Guns: 1 Otobreda 5 in (127 mm) M54; 45 rds/min to 23 km (12.42 n miles) anti-surface; weight of shell 32 kg. 2 Thales Goalkeeper 30 mm; 4,200 rds/min to 1.5 km. 2 Browning 12.7 mm MGs.

Torpedoes: 4—323 mm (2 twin) Mk 32 Mod 9 fixed launchers. Mk 46 Mod 5 torpedoes.

Countermeasures: 4 SRBOC Mk 36 chaff launchers, Nixie torpedo decoy.

ESM/ECM: Racal Sabre; intercept/jammer.

Combat data systems: CAMS Force Vision SEWACO XI; Link 11/16; SATCOMS

Weapons control: Thales Sirius IRST optronic director. Thales Mirador Tractable Electro-Optical Observation System (TEODS)

DE ZEVEN PROVINCIEI

(Scale 1 : 1,200), Ian Sturton / 0569296

Radars: Air search: Thales SMART L; 3D; D-band. Air/surface search/fire control: Thales APAR; I/J-band. Surface search: Thales Scout; I band. IFF Mk XII

Sonars: STN Atlas DSQS 24C, bow-mounted; active search and attack; medium frequency.

Helicopters: 1 NH90 NFH/Lynx

Programmes: Project definition awarded to Royal Schelde on 15 December 1993 with a contract for first two ships and detailed design following on 30 June 1995. Second pair ordered 5 February 1997. Shipyards in Germany (ARGE for Type 124) collaborated to achieve some commonality of design and equipment.

Modernisation: Plans to install an additional 8-cell Mk 41 VLS launcher for Tactical Tomahawk IV were

cancelled on 14 May 2007. Other improvements to achieve a TBMD capability remain under consideration. TBMD trials were conducted by Tromp at the Pacific Missile Test Range Facility, Hawaii, in November-December 2006. A test version of an Extended Long-Range (ELR) mode of SMART L was assessed. A long-range guided munitions capability is also under consideration.

Structure: As well as the listed equipment the ship is to have an electro-optic surveillance system and a navigation radar. The Scout radar is a Low Probability Intercept (LPI) set. High standards of stealth and NBC protection are part of the design. DCN Samahé helicopter handling system. Space exists to retrofit an additional 8-cell Mk 41 launcher alongside the four already fitted.

Operational: All ships fitted with command facilities. NFH 90 helicopter planned for 2009.

VAN SPEIJK

(Scale 1 : 1,200), Ian Sturton / 0012800

Weapons control: Signaal IRSCAN infra-red detector (fitted in F 829 for trials and may be retrofitted in all in due course). Signaal VESTA helo transponder

Radars: Air/surface search Signaal SMART ●; 3D; F-band.

Air search: Signaal LW08 ●; D-band

Surface search: Signaal Scout ●; I-band.

Navigation: Racal Decca 1226, I-band

Fire control: 2 Signaal STIR ●; I/J/K-band; range 140 km (76 n miles) for 1 m² target

Sonars: Signaal PHS-36; hull-mounted, active search and attack; medium frequency.

Thomson Sintra Anaconda DSBV 61; towed array; passive low frequency. LFAS may be fitted in due course.

Helicopters: 1 Westland SH-14 Lynx ●

Programmes: Declaration of intent signed on 29 February 1984 although the contract was not signed until 29 June 1985 by which time the design had been completed.

A further four ordered 10 April 1986. Names were shuffled to make the new *Van Speijk* the last of the class but she retained her allocated pennant number.

Modernisation: SEWACO VIII(A) operational from January 1992 and VIII(B) from mid-1994. By 1994 all fitted with

APECS II EW system and DSBV 61 towed array. SHF SATCOM based on the USN WSC-6, with twin aeri-als providing a 360° coverage even at high latitudes. Scout radar fitted on bridge roof in 1997. A mid-life modernisation is planned for F 831 and F 828 2010-12. Upgrades are to include modifications to operate the NH-90 helicopter, replacement of the combat data system by Guardian MFF; addition of a Thales Seastar radar, installation of a low-frequency active sonar and replacement of SATCOM systems. Platform systems are also to be upgraded.

Structure: The VLS SAM is similar to Canadian Halifax and Greek MEKO classes. The ship is designed to reduce radar and IR signatures and has extensive NBCD arrangements. Full automation and roll stabilisation fitted. The APECS jammers are mounted starboard forward of the bridge and port aft corner of the hangar. The SAM launchers have been given added protection and better stealth features with a flat screen in some of the class.

Operational: F 832 and F 830 sold to Chile and transferred in November 2005 and mid-2006 respectively. F 827 and F 829 transferred to Belgium in March 2007 and March 2008 respectively and F 833 to Portugal in December 2008. F 834 is to transfer to Portugal in November 2009.

Service ceiling: 12,500 ft (3,810 m).

Range: 320 n miles (590 km).

Role/Weapon systems: ASW, SAR and utility helicopter series all converted to SH-14D type. Mk 25B, Mk 27A and Mk 81A can all be embarked for ASW duties in escorts. To be replaced by NH 90 NFH from 2009. Sensors: Ferranti Sea Spray radar, Alcatel DUAV-4 dipping sonar, FLIR Model 2000; Ferranti AWARE-3 ESM. Weapons: Two Mk 46 torpedoes or depth bombs.

Electro-optic systems: Thales Gatekeeper; IR and TV.

Radars: Thales SMILE, E/F-band.

Surface search: Thales SEASTAR; I-band

Navigation: 2 (to be announced), I-band

Helicopters: 1 NH 90

Comment: Contract for the design and build of four patrol ships awarded to Schelde Naval shipbuilding on 20 December 2007. The role of the ships is to conduct low-intensity military operations including maritime interdiction, counter-terrorism and humanitarian assistance. The ships are to be fitted with two water guns. Design features include an integrated mast for sensors and communications and provision to accommodate additional payloads, including stowage for two 20 ft containers or pallets in a multifunction space beneath the flight deck. A 10 tonne crane is fitted on the starboard side for cargo handling. Two 12 m RHIBs can be embarked: one may be launched and recovered via a stern slipway, the other from a boat davit on the port side.

JOHAN DE WITT	L 801	Royal Schelde, Vlissingen	18 June 2003	13 May 2006	30 Nov 2007

Displacement, tons: 16,680 full load
 Dimensions, feet (metres): 578.7 × 95.8 × 18.0
 (176.4 × 29.2 × 5.5)

Flight deck, feet (metres): 190.3 × 82.0 (58 × 25)

Main machinery: Diesel-electric; 4 Wärtsilä 12V26A diesel generators; 19,310 hp (14.4 MW) sustained; 2 Schottel SEP 5 podded propulsors; 14,750 hp (11 MW); 2 Schottel bow thrusters; 2,400 hp (1.8 MW)

Speed, knots: 19

Range, n miles: 10,000 at 12 kt

Complement: 146 (17 officers) + 555 Marines or 402 CJTF
 Military lift: 555 troops, 170 APCs or 33 MBTs, 4 LCVPs and 2 LCU or 2 LCM

Guns: 2 Signaal Goalkeeper 30 mm ● 4—12.7 mm MGs.
 Countermeasures: Decoys: 4 SRBOC chaff/IR launchers ●, Nixie torpedo decoy system.

ESM: ARGO Systems AR-900; intercept

Combat data systems: 1 CAMS/Force Vision CMS, 2 Raytheon SHF SATCOM ●, 2 Sursom UHF SATCOM, 1 AEHF SATCOM; Link 11 (16 and 22 planned), MCCIS

Radars: Air/surface search: Thales VARIANT 2 ●, G/I-band
 Surface search: Thales/Kelvin Hughes ARPA ●, I-band
 Navigation: 1 Consilium Selesmar; I-band, 2 Consilium Selesmar ●, E/F-band.

Helicopters: 6 NH 90 ● or 4 Merlin.

Programmes: Contract signed with Royal Schelde 3 May 2002. The hull was constructed at the Damen-owned Galati yard in Romania and arrived at the Schelde yard on 3 December 2004 for completion. To be fitted with command and control facilities for an afloat CJTF-HQ.

Structure: Facilities to transport a fully equipped Marine battalion with docking facilities for landing craft and a two spot helicopter flight deck with hangar space for six NH90. 25-ton crane for disembarkation. Full hospital facilities. Built to commercial standards with military command and control and NBCD facilities. Can carry up to 30 torpedoes and 300 sonobuoys. Based on the L 800 design but larger and wider. The flight deck is also stronger.

Operational: Alternative employment as an SAR ship for environmental and disaster relief tasks

VLAARDINGEN	M 863	6 May 1986	4 Aug 1988	15 Mar 1989
WILLEMSTAD	M 864	3 Oct 1986	27 Jan 1989	20 Sep 1989

Displacement, tons: 620 standard; 650 full load
Dimensions, feet (metres): 168.9 × 29.2 × 8.5 (51.5 × 8.9 × 2.6)
Main machinery: 1 Stork Wärtsilä A-RUB 215X-12 diesel; 1,860 hp(m) (1.36 MW) sustained, 1 shaft; LIPS cp prop; 2 active rudders; 2 motors; 240 hp(m) (179 kW); 2 bow thrusters
Speed, knots: 15 diesel; 7 electric
Range, n miles: 3,000 at 12 kt
Complement: 29–42 depending on task

Guns: 3–12.7 mm MGs.
Countermeasures: MCM, Atlas Seafox MIDS.
Combat data systems: Atlas Elektronik IMCMS SATCOM
Raders: Navigation: Consilium Selesmar MM 950; I-band.
Sonars: Thales TSM 2022 Mk III; hull-mounted; minehunting; 100, 200 and 400 kHz and Double Eagle Mk III Mod 1 variable depth sonar

Programmes: The two Indonesian ships ordered in 1985 took the place of M 863 and 864 whose laying down was delayed as a result. This class is the Netherlands' part of a tripartite co-operative plan with Belgium and France for GRP hulled minehunters. The whole class built by van der Giessen-de Noord. Ships were launched virtually ready for trials.

Modernisation: An extensive modernisation programme is underway at Den Helder between mid-2003 and 2010 to extend service life to 2020. Upgrades include a MCM command and control system, an Integrated Mine Countermeasures System (comprising hull-mounted and self-propelled variable-depth sonar (installed in Double Eagle Mk III Mod 1 RoV)) and a Mine-Identification and Disposal System (MIDS) based on the Atlas Seafox. Linked to the ship by a 3,000 m fibre optic tether, one variant (Seafox-C) is used for mine disposal and the other (Seafox-I) is used for identification. Modernisation of eight ships had been completed by late 2008. M 864 and M 857 are to be completed by 2010.

Structure: A 5 ton container can be shipped, stored for varying tasks—research; patrol; extended diving; drone control.

Operational: Endurance, 15 days. MHCs are sometimes assigned to coast guard operations.

Sales: Two of a modified design to Indonesia, completed March 1988. M 850–852 decommissioned in 2000. M 854 and M 855 decommissioned in 2003. All five have been sold to Latvia and transfer is to be completed by 2009.

TRAINING SHIPS

Notes: Two Dokkum class minesweepers are used by Sea Cadets.

1 TRAINING SHIP (AXL)

Name	No	Builders	Commissioned
VAN KINSBERGEN	A 902	Damen Shipyards	2 Nov 1999

Displacement, tons: 630 full load
Dimensions, feet (metres): 136.2 x 30.2 x 10.8 (41.5 x 9.2 x 3.3)
Main machinery: 2 Caterpillar 3508 B1-TA; 1,572 hp(m) (1.16 MW) sustained; 2 shafts; bow thruster, 272 hp(m) (200 kW)
Speed, knots: 13
Complement: 5 plus 3 instructors and 16 students
Radars: Navigation; Consilium Selesmar; I-band

Comment: Launched 30 August 1999. Has replaced *Zeefakkel* as the local training ship at Den Helder. Carries a 25 kt RIB.

VAN KINSBERGEN

6/2008*, Michael Nitz / 1335277

1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Commissioned
URANIA (ex-Tromp)	Y 8050	Haarlem	23 Apr 1938

Displacement, tons: 75 full load
Dimensions, feet (metres): 87.9 x 19.8 x 8.5 (26.8 x 6.05 x 2.7)
Main machinery: 1 Caterpillar diesel, 235 hp(m) (186 kW); 1 shaft
Speed, knots: 10 diesel, 12 sail
Complement: 3 + 14 trainees

Comment: Schooner used for training in seamanship. Refit 2001-04 included a new hull and aluminium masts.

URANIA

5/2008*, A A de Kruiff / 1335775

AUXILIARIES

Notes: (1) In addition to the vessels listed there are large numbers of non self-propelled craft with Y pennant numbers, and six harbour launches Y 8200-8203 and 9001-9002 (2) An Accommodation Ship *Thetis* (A 887) is based at Den Helder and provides harbour training for divers and underwater swimmers.

1 AMSTERDAM CLASS (FAST COMBAT SUPPORT SHIP) (AORH)

Name	No	Builders	Laid down	Launched	Commissioned
AMSTERDAM	A 836	Merwede, Hardinxveld, and Royal Schelde, Vlissingen	25 May 1992	11 Sep 1993	2 Sep 1995

Displacement, tons: 17,040 full load
Dimensions, feet (metres): 544.6 x 72.2 x 26.2 (166 x 22 x 8)
Main machinery: 2 Bazán/Burmeister & Wain 16V 40/45 diesels; 24,000 hp(m) (17.6 MW) sustained; 1 shaft; LIPS cp prop
Speed, knots: 20
Range, n miles: 13,440 at 20 kt
Complement: 160 (23 officers) including 24 aircrew plus 20 spare

Cargo capacity: 6,815 tons diesel; 1,660 tons aviation fuel; 290 tons solids
Guns: 2 Oerlikon 20 mm. 1 Signaal Goalkeeper 30 mm CIWS
Countermeasures: Decoys. 4 SRBOC Mk 36 chaff launchers. Nixie towed torpedo decoy.
Weapons control: Signaal IRSCAN infrared director.
Radars: Surface search and helo control: 2 Kelvin Hughes, F-band.

Helicopters: 3 Lynx or 3 SH-3D or 3 NH90 or 2 EH 101
Programmes: NP/SP AOR 90 replacement for *Poolster* ordered 14 October 1991. Hull built by Merwede, with fitting out by Royal Schelde from October 1993. A similar ship has been built for the Spanish Navy
Structure: Close co-operation between Dutch Navalbu and Spanish Bazán led to this design which has maintenance workshops as well as four abeam and one stern RAS/FAS station, and one Vertrep supply station. Built to merchant ship standards but with military NBC damage control.

AMSTERDAM

11/2007, Derek Fox / 1335265

1 SUBMARINE SUPPORT SHIP AND TORPEDO TENDER (ASL/YTT)

Name	No	Builders	Commissioned
MERCUUR	A 900	Koninklijke Maatschappij de Schelde	21 Aug 1987

Displacement, tons: 1,400 full load
Dimensions, feet (metres): 212.6 x 39.4 x 14.1 (64.8 x 12 x 4.3)
Main machinery: 2 Brons 61-20/27 diesels; 1,100 hp(m) (808 kW); 2 shafts; bow thruster
Speed, knots: 14
Complement: 39 (6 officers)
Torpedoes: 3-324 mm (triple) tubes. 1-21 in (533 mm) underwater tube.
Mines: Can lay mines.
Radars: Navigation; Racal Decca 1229, I-band.
Sonars: SQR-01; hull-mounted; passive search.

Comment: Replacement for previous ship of same name. Ordered 13 June 1984. Laid down 6 November 1985. Floated out 25 October 1986. Can launch training and research torpedoes above and below the waterline. Services, maintains and recovers torpedoes.

MERCUUR

6/2008*, Martin Mokrus / 1335266

1 MODIFIED POOLSTER CLASS (FAST COMBAT SUPPORT SHIP) (AORH)

Name	No	Builders	Laid down	Launched	Commissioned
ZUIDERKRUIS	A 832	Verolme Shipyards, Alblasserdam	16 July 1973	15 Oct 1974	27 June 1975

Displacement, tons: 16,900 full load
Measurement, tons: 10,000 dwt
Dimensions, feet (metres): 556 x 66.6 x 27.6 (169.6 x 20.3 x 8.4)
Main machinery: 2 Stork-Werkspoor TM410 diesels, 21,000 hp(m) (15.4 MW); 1 shaft; LIPS cp props
Speed, knots: 21
Complement: 266 (17 officers)
Cargo capacity: 10,300 tons including 8-9,000 tons oil fuel

Guns: 1 Signaal Goalkeeper 30 mm CIWS, 5 Oerlikon 20 mm
Countermeasures: Decoys: 2 Loral Hycor SRBOC Mk 36 fixed 6-barrelled launchers; IR flares and chaff
ESM: Ferranti AWARE-4; radar warning
Weapons control: Signaal IRSCAN
Radars: Air/surface search: Racal Decca 2459, F1-band.
Navigation: 2 Racal Decca TM 1226C, Signaal SCOUT; I-band

Helicopters: 1 Westland UH-14A Lynx.
Structure: Helicopter deck aft. Funnel heightened by 4.5 m (14.8 ft). 20 mm guns, containerised Goalkeeper CIWS and SATCOM, fitted for operational deployments
Operational: Capacity for five helicopters with A/S weapons. Two fuelling stations each side for underway replenishment. Planned to remain in commission until replaced by the Joint Support Ship in about 2014.
Sales: Poolster sold to Pakistan in June 1994.

ZUIDERKRUIS

9/2006, M Declerck / 1164979

0 + 1 JOINT LOGISTIC SUPPORT SHIP (AFSH)

Name	No	Laid down	Launched	Commissioned
-	-	2010	2013	2015

Displacement, tons: 27,000 full load
Dimensions, feet (metres): 672.5 x 98.4 x 21.3 (205.0 x 30.0 x 6.5)
Main machinery: Diesel-electric; 2 shafts; 2 bow thrusters; 1 stern thruster
Speed, knots: 20
Complement: 175 plus 300 embarked force
Guns: 2 Thales Goalkeeper 30 mm, 2-300 mm, 4-12.7 mm MGs.
Countermeasures: Decoys: To be announced.
Combat data systems: Link 11. Provision for Link 16/22 SATCOM
Electro-optic systems: Thales Gatekeeper; IR and TV.
Radars: Air/Surface search/navigation: Thales SMILE; E/F-band.
Surface search: Thales SEASTAR; I-band.
Navigation: I-band.
Helicopters: 6 NH 90 or 2 Chinooks.

Comment: A contract is expected in 2009 for the construction of a multipurpose ship capable of maritime logistic support, strategic sealift and support of land-based forces. Secondary tasks are to be disaster relief, humanitarian aid and civil operations. There are to be three replenishment (fuel, water, solids) stations (two abeam and one astern). The ship will have 2,000 lane metres of space for vehicles/containers, weapons for an infantry company and or 9,000 m³ of fuel and 125 m³/day water. Fitted with two 40 ton cranes and a number of cargo lifts, the ship is also to be capable of embarking two LCVPs. There are to be two vehicle ramps, one on the starboard side and one on the quarter. A medical support facility, workshops and a logistics support centre are also to be included. The flight deck has two spots for Chinook-sized helicopters.

PATRIA

7/2005, A A de Kruijt / 1151128

1 LOGISTIC SUPPORT VESSEL (AP)

Name	No	Builders	Laid down	Launched	Commissioned
PELIKAAN	A 804	Damen Shipyard	25 Aug 2005	7 Feb 2006	12 June 2006

Displacement, tons: 1,700 full load
Dimensions, feet (metres): 214.6 x 43.5 x 9.8 (65.4 x 13.25 x 3.0)
Main machinery: 2 Caterpillar 3516B TA diesels; 4,000 hp (3 MW); 2 shafts
Speed, knots: 14.5
Complement: 14 (2 officers) plus 15 extra plus 45 temporary
Guns: 4-12.7 mm MGs.
Radars: Navigation: I-band.

Comment: In January 2005 a contract was signed between the Royal Netherlands Navy and Damen Shipyards for the design and construction of a Logistic Support Vessel (LSV) to provide sealift for the RNLMC in the Caribbean. The ship has replaced the old vessel of the same name. Following construction of the hull at the Damen-owned Galatz shipyard in Romania, the ship was completed at Gonnchem. A large cargo area is located at main deck level and can accommodate six rigid raiding craft, four trucks and a range of support equipment. Loading and unloading is facilitated by a deck crane.

JOINT SUPPORT SHIP (artist's impression)

 Speed, knots: 8
 Complement: 21
 Radars: Navigation: JRC JMA 606; I-band.

Comment: Built by Vervako as a diving training ship and commissioned 3 November 1989. There is a moonpool aft with a 50 m diving bell, and a decompression chamber.

RV 50 10/2004, Bram Plokker / 1047865

COAST GUARD (KUSTWACHT)

Notes: (1) On 26 February 1987, many of the maritime services were merged to form a Coast Guard with its own distinctive colours. Included were assorted craft of the Ministries that signed the Coast Guard Agreement. From 1 June 1995 the operational command of the Coast Guard became the responsibility of the Royal Netherlands Navy. On 1 January 2007 the Coast Guard became an independent civil organisation under the Ministry of Defence.

(2) The following ships, craft and aircraft are permanently available for Coast Guard duties: *Waker*, *Visarend*, *Zocarend*, *Barend Biesheuvel* and two Dornier-228 surveillance.

(3) In addition, the Coast Guard can call upon the following ships and craft:

- Ministry of Transport and Public Works: *Frans Naerabout*, *Rotterdam*, *Terschelling*, *Nieuwediep*, *Schuitgat*, *Vlietstroom*, *Waddenzee*, *Zirfaes*, *Jan van Gent*, *Stormmeeuw*.
- Ministry of Defence: Minehunters of the Alkmaar class and military police vessel R-180.
- Ministry of Home Affairs: P 41, P 42, P 44, P 48, P 49.
- Royal Netherlands Sea-Rescue organisation: 65 lifeboats in 42 stations.

JAGUAR	P 810	Damen Shipyards	2 Nov 1998
PANTER	P 811	Damen Shipyards	18 Jan 1999
POEMA	P 812	Damen Shipyards	19 Mar 1999

Displacement, tons: 205 full load

Dimensions, feet (metres): 140.4 x 22.3 x 8.2 (42.8 x 6.8 x 2.5)

Main machinery: 2 Caterpillar 3516B diesels; 5,685 hp(m) (4.18 MW); 2 shafts; LIPS cp props, bow thruster

Speed, knots: 26

Range, n miles: 2,000 at 12 kt

Complement: 11 plus 6 police

Guns: 1—12.7 mm MG

Radars: Surface search: Signal Scout; I-band

Navigation: Kelvin Hughes; I-band

Comment: Ordered from Damen shipyards in March 1997 for delivery in late 1998. Equipped with surveillance passive sensors. The cutters have a gas citadel. A 30 kt RIB is launched through a transom door. Based at Willemstad, Curaçao.

JAGUAR

6/2006, M Declercq / 1164973

New Zealand

Country Overview

New Zealand is an independent island country situated in the south Pacific Ocean with which it has a 8,170 n mile coastline. The British monarch, represented by a governor-general, is head of state. Situated about 865 n miles south-east of Australia, it comprises two main islands, North and South islands, which are separated by the Cook Strait. In addition there are numerous smaller islands including Stewart Island and the Auckland Islands. The overall area is 104,454 square miles. Overseas territories include Ross Dependency (Antarctica) and Tokelau (north of Samoa). In addition, the Cook Islands and Niue are self-governing territories in free association. The capital is Wellington and largest city is Auckland; both are ports located on North Island. Other principal ports are Tauranga, Lyttelton (near Christchurch), and Port Chalmers (Dunedin). Territorial seas (12 n miles) are claimed. An EEZ (200 n mile) is also claimed.

TE MANA

4/2005, Chris Sattler / 1133137

for New Zealand. Options on a third of class were turned down in November 1998. Modules constructed at Newcastle, Australia and Whangarei, New Zealand, and shipped to Melbourne for final assembly. The two New Zealand ships are the second and fourth of the class. First steel cut on *Te Kaha* on 11 February 1993. *Te Kaha* means Prowess. *Te Mana* means Power.

Modernisation: The ANZAC Ship will undergo a series of modifications during the period 2009–2014. In Phase I, the CIWS is being upgraded to Block 1B status. Concurrently, the diesel engines are to be replaced with an updated version and a new integrated propulsion management system is to be fitted. Other platform

modifications are being undertaken to enhance services and stability margins. Phase II is to be an upgrade of weapon systems and sensors. The combat data system is to be replaced and the point-defence missile is to be upgraded. There are also to be improvements to ISR systems and measures to improve interoperability.

Structure: The ships include space and weight provision for considerable enhancement including canister-launched SSM, an additional fire-control channel and ECM Signature suppression features are incorporated in the design. All-steel construction. Fin stabilisers, McTaggart Scott Trigon 3 helicopter traversing system. Two RHIBs are carried.

TE KAHA

9/2006, Ships of the World / 1158744

SHIPBORNE AIRCRAFT

Numbers/Type: 5 Kaman SH-2G (NZ) Super Seasprite.

Operational speed: 130 kt (241 km/h).

Service ceiling: 22,500 ft (6,860 m).

Range: 400 n miles (740 km).

Role/Weapon systems: Last of five delivered in February 2003. Sensors: Litton ASN 150 C2; Telephonics APS 143 radar; AAG 32 Safire IRDS; ALR 100 ESM, ALE 47 ECM. Weapons: ASW; 2 Mk 46 torpedoes or Mk 11 depth bomb, ASV; 2 Hughes Maverick AGM 85D (NZ); 1–7.62 mm M60 MG.

SUPER SEASPRITE

5/2003, A Sharma / 0567466

Numbers/Type: 8 NH Industries NH 90.

Operational speed: 165 kt (305 km/h).

Service ceiling: 9,720 ft (2,960 m).

Range: 430 n miles (796 km).

Role/Weapon systems: Eight helicopters, similar to the MH 90s ordered by Australia, planned to enter service between 2010 and 2013. Four will be able to embark in Canterbury. Sensors: Likely to include NR-90 radar, FLIR. Flash dipping sonar. Weapons: Mu 90 torpedoes and possible ASM.

NH 90

4/2006, NH Industries / 0062373

LAND-BASED MARITIME AIRCRAFT

Numbers/Type: 6 Lockheed P-3K2 Orion.

Operational speed: 405 kt (750 km/h).

Service ceiling: 30,000 ft (9,146 m).

Range: 4,000 n miles (7,410 km).

Role/Weapon systems: Purchased in 1966. Long-range surveillance and reconnaissance patrol; updated 1984. Modernisation of airframes (Project Kestrel) undertaken 1995–2001 for 20 year extension. Upgrade project in progress to modernise mission avionics, sensors and communication/navigation systems. The upgrade is to include an Elta EL/M-2022(V)3 radar and Wescam MX-20 FLIR. Contract signed with L-3 communications on 4 October 2004. The first upgraded aircraft is to be delivered in 2008 and programme is to be completed by 2010. Operated by RNZAF. Sensors: APS-134 radar, ASQ-10 MAD, acoustic processor, AYK 14 computers, IFF, ESM, SSQ 53/62 sonobuoys. Weapons: ASW; eight Mk 46 torpedoes, Mk 80 series depth bombs.

P-3K2

PATROL FORCES

1 + 1 PROTECTOR CLASS (OFFSHORE PATROL VESSELS) (PBO)

Name	No	Builders	Laid down	Launched	Commissioned
OTAGO	P 148	Tenix Defence Systems, Williamstown	16 Dec 2005	18 Nov 2006	2009
WELLINGTON	P 55	Tenix Defence Systems, Williamstown	2 June 2007	27 Oct 2007	2009

Displacement, tons: 1,600

Dimensions, feet (metres): 278.9 × 45.9 × 11.8 (86.0 × 14.0 × 3.6)

Main machinery: 2 MAN Burmeister & Wain 12 RK 280 diesels; 2 shafts, cp props

Speed, knots: 22

Range, n miles: 6,000 at 15 kt

Complement: 35 plus 44 spare

Guns: 1 MSI DS 25M Autsig 25 mm, 2 -12.7 mm MGs.

Radars: Navigation: I band.

Helicopters: 1 SH-2G Super Seasprite

Programmes: Following selection as 'Project Protector' prime contractor in April 2004, Tenix Defence awarded contract for final design and construction on 28 July 2004. The ships are to meet patrol and surveillance requirements in support of civil agencies in New Zealand's EEZ and the Southern Ocean and to assist South Pacific states to patrol their EEZs. Manufacturing of modules started at Tenix's Whangarei Shipyard in New Zealand in February 2005. Final assembly is being undertaken at Williamstown, Victoria.

Structure: The design is a lengthened, helicopter-capable variant of a Kvaerner Masa Manne design in service in Ireland and Mauritius. They are to be ice-strengthened.

OTAGO

6/2008, RNZN / 1335399

2 + 2 LAKE CLASS (INSHORE PATROL VESSELS) (PBO)

TAUPO	P 3570	Tenix Defence Systems, Williamstown	14 Dec 2007	23 Aug 2008	2009

Displacement, tons: 340

Dimensions, feet (metres): 180.4 × 29.5 × 9.5 (55.0 × 9.0 × 2.9)

Main machinery: 2 MAN Burmeister & Wain 12VP 185 diesels; 2 shafts; cp props

Speed knots: 25

Range, n miles: 3,000 at 15 kt

Complement: 20 plus 16 spare

Guns: 3–12.7 mm MGs

Radars: Navigation: I-band.

Programmes: Following selection as 'Project Protector' prime contractor in April 2004, Tenix Defence awarded contract for final design and construction on 29 July 2004. The ships are to operate in support of civil agencies to meet patrol and surveillance requirements in New Zealand's inshore zone (out to 24 n miles), particularly around North Island, Marlborough Sounds and Tasman Bay. Manufacturing started at Tenix's Whangarei Shipyard in New Zealand in early 2005.

Structure: The Tenix design is based on the 56 m San Juan class built for the Philippines Coast Guard. Capable of operating in up to Sea State 5, they will be able to launch and recover rigid hull inflatable boats in up to Sea State 4.

HAWEA

SURVEY AND RESEARCH SHIPS

1 STALWART CLASS (AGS)

Name	No	Builders	Commissioned
RESOLUTION (ex-Tenacious)	A 14 (ex-TAGOS 17)	Halter Marine, Moss Point	29 Sep 1999

Displacement, tons: 2,262 full load
Dimensions, feet (metres): 224 × 43 × 18.7 (68.3 × 13.1 × 5.7)
Main machinery: Diesel-electric; 4 Caterpillar D 398B diesel generators; 3,200 hp (2.39 MW); 2 motors; 1,600 hp (1.2 MW); 2 shafts; bow thruster; 550 hp (410 kW)
Speed, knots: 11. **Range, n miles:** 19,000 at 11 kt
Complement: 49
Radars: Navigation: 2 Raytheon; I-band.

Comment: Laid up by USN in 1995 and acquired in September 1996. Reactivated in October 1996 and commissioned into RNZN 13 February 1997 for passage to New Zealand. Conversion commenced mid-1997 to suit the ship for hydrography with secondary role of acoustic research for about three months per year, replacing both *Tui* and *Monowai*. Second stage of conversion to fit Atlas Elektronik MD 2/30 multibeam echo-sounder, completed in January 1999. A fixed dome increased the ship's draught. A DGPS and a towed array fitted for acoustic research. A new survey boat with Atlas Elektronik MD20 multibeam echo sounder was embarked in 2001. The ship has been repainted grey.

RESOLUTION 3/2006, Chris Sattler / 1158701

1 SURVEY MOTOR BOAT (YGS)

ADVENTURE A 05

Displacement, tons: 9
Dimensions, feet (metres): 31.8 × 11.5 × 2.3 (9.7 × 3.5 × 0.7)
Main machinery: 2 Volvo-Penta AD31P/DP diesels, 300 hp (223 kW)
Speed, knots: 25 **Range, n miles:** 1,000 at 10 kt
Complement: 3
Radars: Navigation: I-band.

Comment: Aluminium catamaran craft built in Kumeu, North Auckland, in 1998. While usually operated as a tender from *Resolution*, she is capable of independent inshore hydrographic operations and short coastal passages. She is fitted with an echo sounder whose data can be integrated with the multibeam system fitted in *Resolution*.

ADVENTURE 4/2006, Chris Sattler / 1305309

AUXILIARIES

Notes: (1) Options for the replacement of *Endeavour* are under consideration. The successor ship is likely to be a joint-support vessel with a broader range of capabilities. Commonality with *Canterbury* is likely to be a key factor.
 (2) In addition to vessels listed below there are three 12 m sail training craft used for seamanship training: *Paea II*, *Mako II*, *Manga II* (sail nos 6911-6913).

PAEA 2002, RNZN 0525919

2 LANDING CRAFT (LCM)

LC 01 LC 02

Displacement, tons: 55 standard; 100 full load
Dimensions, feet (metres): 75.5 × 21.0 × ? (23.0 × 6.4 × ?)
Main machinery: 2 Scania D19 44M diesels; 630 hp (470 kW); 2 Veth Z-drive azimuth thrusters
Speed, knots: 9
Range, n miles: 250 at 9 kt
Complement: 3
Military lift: 2 armoured fighting vehicles (NZLAV)

Comment: Designed by Iv-Nevesbu b.v. (Papendrecht, Netherlands) and constructed by Zwijnenburg, Rotterdam, the craft are to be carried in *Canterbury*. Operable in Sea State 3, onload and offload can be achieved (empty) using *Canterbury*'s 60 tonne crane or alternatively via the stern ramp. The LCMs are designed for beach landings and are fitted with a ballasting system to allow the safe onload and offload of cargo. They are also fitted with a keedge system. The stern ramp of *Canterbury* has 'marnage blocks' to facilitate correct alignment on the ramp.

LC 02 6/2007, RNZN / 1170065

1 REPLENISHMENT TANKER (AORH)

Name	No	Builders	Launched	Commissioned
ENDEAVOUR	A 11	Hyundai, South Korea	14 Aug 1987	6 Apr 1988

Displacement, tons: 12,390 full load
Dimensions, feet (metres): 453.1 × 80 × 23 (138.1 × 18.4 × 7.3)
Main machinery: 1 MAN-Burmeister & Wain 12V32/36 diesel; 5,780 hp(m) (4.25 MW) sustained; 1 shaft; LIPS cp prop
Speed, knots: 13.5
Range, n miles: 8,000 at 13.5 kt
Complement: 49 (10 officers)
Cargo capacity: 5,500 tons diesel; 100 tons Avcat; 20 containers
Radars: Navigation: Racal Decca 1290A/9; ARPA 1690S; I-band.
Helicopters: Platform only.

Comment: Ordered July 1986. Laid down 10 April 1987. Completion delayed by engine problems but arrived in New Zealand in May 1988. Two abeam RAS rigs (one QRC, one Probe). Fitted with Inmarsat. Standard merchant design modified on building to provide a relatively inexpensive replenishment tanker. Modifications are to be undertaken in 2009 to convert the ship's tanks to meet double-skinning requirements demanded by MARPOL regulations. This will extend the ship's life to 2013.

ENDEAVOUR 7/2007, Chris Sattler / 1169573

1 MOA CLASS (TRAINING SHIP) (AXL)

Name	No	Builders	Commissioned
KAHU (ex-Manawanui)	A 04 (ex-A 08)	Whangarei Engineering and Construction Co Ltd	28 May 1979

Displacement, tons: 91.5 standard; 105 full load
Dimensions, feet (metres): 88 × 20 × 7.2 (26.8 × 6.1 × 2.2)
Main machinery: 2 Cummins KT-1150M diesels; 710 hp (530 kW); 2 shafts
Speed, knots: 12
Range, n miles: 1,000 at 11 kt
Complement: 16
Radars: Navigation: Racal Decca Bridgemaster 2000; I-band.

Comment: Same hull design as former Patrol Craft. Now used for navigation and seamanship training and as a standby diving tender.

KAHU 3/2006, Chris Sattler / 1158599

1 DIVING TENDER (YDT)

Name	No	Builders	Commissioned
MANAWANUI (ex-Star Perseus)	A 09	Cochrane, Selby	May 1979

Displacement, tons: 911 full load
Dimensions, feet (metres): 143 × 31.2 × 10.5 (43.6 × 9.5 × 3.2)
Main machinery: 2 Caterpillar D 379TA diesels; 1,130 hp (843 kW); 2 shafts; cp props; bow thruster
Speed, knots: 10.7. **Range, n miles:** 5,000 at 10 kt
Complement: 24 (2 officers)
Radars: Surface search. Racal Decca Bridgemaster 2000, I-band.
Sonars: Klein 595Tracpoint; side scan; active high frequency.

Comment: North Sea Oil Rig Diving support vessel commissioned into the RNZN on 5 April 1988. Completed conversion in December 1988 and has replaced the previous ship of the same name which proved to be too small for the role. Equipment includes two Phantom HDX remote-controlled submersibles, a decompression chamber (to 250 ft), wet diving bell and 13 ton crane. Fitted with Inmarsat, MCAIS data system, side scan sonar and GPS fitted in 1995. More modifications are planned to enable the ship to do some of the work previously undertaken by *Tui*. This includes a stern gantry and general purpose winches for research including MCM. Used to support RAN submarine trials in 1996/97

MANAWANUI

10/2006, Chris Sattler / 1158734

1 CANTERBURY CLASS (MULTIROLE VESSEL) (AKRH/AX)

Name	No	Builders	Laid down	Launched	Commissioned
CANTERBURY	L 421	Merwede Shipyard, Netherlands	6 Sep 2005	11 Feb 2006	12 June 2007

Displacement, tons: 8,870
Dimensions, feet (metres): 430.4 × 76.8 × 18.4 (131.2 × 23.4 × 5.6)
Main machinery: CODAGE, 2 Wärtsilä 9L32 diesels; 12,000 hp (9 MW); 2 shafts, cp props
Speed, knots: 19
Range, miles: 6,000 at 15 kt
Complement: 53 + accommodation for 250 troops and 47 additional
Guns: 1 MSI DS 25M Autsig 25 mm, 2—12.7 mm MGs.
Military lift: 1 infantry company including Light Armoured Vehicles and equipment. 2 LCM.
Radars: Navigation: 2 I-band
Helicopters: 2 SH-2G Super Seasprites.

Programmes: Following selection as 'Project Protector' prime contractor in April 2004, Tenix Defence awarded contract for final design and construction on 29 July 2004. The ship was constructed in the Netherlands and fitted out by Tenix at Williamstown, Victoria.

Structure: With a design based on a commercial roll-on/roll-off vessel, the ship is built to comply with Lloyds Register of Shipping rules. The ship is ice-strengthened for operations in the Southern Ocean and the Ross Sea. Staff facilities are incorporated. Following an independent review to investigate problems arising during the introduction of the ship into service, remedial work is required to improve safety and stability in high seas states.

CANTERBURY

9/2007, Chris Sattler / 1166624

Operational: The ship provides a limited tactical sealift capacity for disaster relief, humanitarian relief operations, peace support operations, military support

activities and development assistance support. The ship is also used as the principal sea training platform for the RNZN.

CANTERBURY

9/2007, Chris Sattler / 1166639

Nicaragua

FUERZA NAVAL-EJERCITO DE NICARAGUA

Country Overview

The Republic of Nicaragua is the largest Central American republic. After many years of civil war, a 1989 peace plan introduced a more stable period of democratic government. With an area of 50,893 square miles, it is situated between Honduras to the north and Costa Rica to the south it has a 381 n mile coastline with the Caribbean and a 225 n mile coastline with the Pacific Ocean. Lake Nicaragua (Cocibolca), the largest lake in central America, and Lake

Managua (Xolotlán) are connected by the river Tipitapa. The capital and largest city is Managua while Corinto, on the Pacific coast, is the principal port. Nicaragua has not claimed an EEZ but is one of a few coastal states which claims a 200 n mile territorial sea.

Headquarters Appointments

Head of Navy:

Rear Admiral Juan Santiago Estrada García

Personnel

2009: 910 officers and men

Pacific: Corinto (HQ), San Juan del Sur, Puerto Sandino y Potosi
 Atlantic: Bluefields (HQ), El Bluff, Puerto Cabezas, Corn Island, San Juan del Norte

PATROL FORCES

Notes: There are reported plans to procure four Damen Stan Patrol 2606 patrol craft.

3 DABUR CLASS (PB)

GC 201 GC 202 GC 205

Displacement, tons: 39 full load
 Dimensions, feet (metres): 64.9 x 18 x 5.8 (19.8 x 5.5 x 1.8);
 Main machinery: 2 Caterpillar 3406 diesels; 1,500 hp (1.1 MW) sustained; 2 shafts
 Speed, knots: 20
 Range, n miles: 450 at 13 kt
 Complement: 12
 Guns: 2—12.7 mm MGs.
 Radars: Surface search, Furuno 2115, I-band.

Comment: GC 201, 203 and 205 were acquired from Israel in May 1996. All three craft re-engined GC 205 in 2004, GC 202 in 2006 and GC 201 in 2008. All are operational on the Atlantic coast.

GC 201 4/2008*, Nicaraguan Navy / 1335288

4 RODMAN 101 CLASS (PB)

GP 401-404

Displacement, tons: 63 full load
 Dimensions, feet (metres): 98.4 x 19.4 x 4.3 (30.0 x 5.9 x 1.3)
 Main machinery: 2 Caterpillar 3412C diesels; 2,800 hp (2.06 MW); 2 Hamilton waterjets
 Speed, knots: 30
 Range, n miles: 800 at 12 kt
 Complement: 11
 Radars: Navigation: Furuno FR 2115; I-band.

Comment: GRP hull. Built by Rodman, Vigo and donated by the Spanish government in 2007. Employed on fishery protection duties and operated by the navy. Based on both coasts

GP 404 6/2008*, Nicaraguan Navy / 1335289

4 INTERCEPTOR CRAFT (PBF)

Displacement, tons: To be announced
 Dimensions, feet (metres): 44.0 x 9.0 x 3.0 (13.4 x 2.75 x 0.9)
 Main machinery: 3 Yanmar diesels; 945 hp (704 kW); Bravo X drives
 Speed, knots: 60
 Range, n miles: 600 at 25 kt
 Complement: 6

Comment: Manufactured by Nor-Tech, Fort Myers, FL. Composite and glass-fibre hull with V-bottomed hull. Donated by the US Southern Command in 2007. Employed on counter drugs, arms trafficking and illegal immigration duties.

INTERCEPTOR CRAFT 6/2007, US Southern Command / 1167968

19 ASSAULT AND RIVER CRAFT (PBF)

Comment: There are approximately 21 Colombian-built Eduardoño class 10 to 13 m assault craft, capable of 50 kt and 12 m 'Cigarette' craft capable of 46 kt. These are divided between the Atlantic and Pacific. Sixteen Zodiac RIBs with 40 hp engines were donated by the US in mid-2006

EDUARDOÑO CLASS 6/2008*, Nicaraguan Navy / 1335287

CIGARETTE CLASS 6/2008*, Nicaraguan Navy / 1335290

EDUARDOÑO CLASS 6/2008*, Nicaraguan Navy / 1335291

Nigeria

Country Overview

Formerly a British protectorate, the Federal Republic of Nigeria gained full independence in 1960. With an area of 356,669 square miles, it is situated in western Africa and is bordered to the north by Niger, to the east by Chad and Cameroon and to the west by Benin. It has a 459 n mile coastline with the Gulf of Guinea. Abuja is the capital while Lagos (the capital until 1991) is the largest city, commercial centre and one of its principal ports. There are other ports at Port Harcourt, Warri, Calabar, Bonny, and Burutu. Territorial Seas (12 n miles) are claimed. An EEZ (200 n miles) has been claimed but the limits have not been defined.

The Navy has suffered from chronic lack of investment over the last ten years but there are signs that a refit programme is attempting to restore a core seagoing capability for operations within the Nigerian EEZ. However, the operational status of weapon systems and sensors remains doubtful.

Headquarters Appointments

Chief of the Naval Staff
 Vice Admiral Iko Ibrahim

Headquarters Appointments— continued

Flag Officer Western Command:
 Rear Admiral Ola Sahad Ibrahim
 Flag Officer Eastern Command:
 Rear Admiral Igwe Ben Acholonu

Personnel

- a) 2009: 8,000 (650 officers) including Coast Guard
- b) Voluntary service

Bases

Apapa-Lagos: Western Naval Command, Naval Base Lagos (NNS *Onaku*), Naval College (NNS *Olokun*) and Naval Training (NNS *Quorra*).
 Calabar: Eastern Naval Command, Naval Base Calabar (NNS *Anansu*), Naval Base Warri (NNS *Umalokun*) and Naval Base Port Harcourt (NNS *Okemini*). There is a forward operating base NNS *Pathfinder* at Bonny Island, Rivers State and plans for further bases at Egwuama, Bayelsa State and Forcados in Delta State. This is in addition to those already established at Ibaka, Akwa-Ibom State and Igbokada in Ondo State.

Naval Aviation

The official list includes two Lynx Mk 89, 12 MBB BO 105C, three Fokker F27 and 14 Dornier Do 128-6MPA. These aircraft are believed not to be operational. Four Agusta A 109E were procured from Italy in September 2004 for patrol duties, one of which was lost in April 2007.

Prefix to Ships' Names

NNS

Port Security Police

A separate force of 1,600 officers and men in Lagos.

Coastal Defence

There are plans to build a national coastal defence system although the status of the programme is unclear.

FRIGATES

1 MEKOTYPE 360 H1 (FFGHM)

Range, n miles: 6,500 at 15 kt
Complement: 195 (26 officers)

ARADU

(Scale 1 : 1,200), Ian Sturton / 0081331

Missiles: SSM: 8 OTO Melara/Matra Otomat Mk 1 ●; active radar homing to 80 km (43.2 n miles) at 0.9 Mach; warhead 210 kg. SAM Selenia Elsig Albatros octuple launcher ●; 24 Aspide; semi-active radar homing to 13 km (7 n miles) at 2.5 Mach; warhead 30 kg.
Guns: 1 OTO Melara 5 in (127 mm)/54 ●; 45 rds/min to 23 km (12.4 n miles); weight of shell 32 kg.
 8 Breda Bofors 40 mm/70 (4 twin) ●; 300 rds/min to 12.5 km (6.8 n miles) anti-surface; weight of shell 0.96 kg.
Torpedoes: 6—324 mm Plessey STWS-1B (2 triple tubes) ●
 18 Whitehead A244S; anti-submarine; active/passive homing to 7 km (3.8 n miles) at 33 kt; warhead 34 kg (shaped charge).
Depth charges: 1 rack.

Countermasures: Decoys: 2 Breda 105 mm SCLAR 20-tubed trainable; chaff to 5 km (2.7 n miles); illuminants to 12 km (6.6 n miles). ESM: Decca RDL-2, Intercept. ECM: RCM-2; jammer.

Combat data systems: Sewaco-BV actron data automation.
Weapons control: M20 series GFCS. Signaal Vesta ASW
Radars: Air/surface search: Plessey AWS 5 ●; E/F-band.
 Navigation: Racal Decca 1226; I-band.
 Fire control: Signaal STIR ●; I/J/K-band. Signaal WM 25 ●; I/J-band

Sonars: Atlas Elektronik EA80; hull-mounted, active search and attack; medium frequency

Helicopters: 1 Lynx Mk 89 ●

Modernisation: Refit started at Wilmot Point, Lagos with Blohm & Voss assistance in 1991 and completed in February 1994

Operational: Had two groundings and a major collision in 1987 and ran aground again during post refit trials in early 1994. Assessed as beyond economical repair in 1995 but managed to go to sea in early 1996, and again in 1997 when she broke down for several months in Monrovia. Back in Lagos on one engine in 1998 for further repairs. SSM system reported being refitted in 1999. Following a refit at Lagos, attended Fleet Review at Portsmouth, UK, in June 2005 and participated in fleet exercises in January 2007

5/1999 / 0081333

PATROL FORCES

Notes: (1) All the Coastal Patrol Craft belong to the Coast Guard. Some 38 craft were acquired in the mid-1980s from various shipbuilders including Simonneau, Damen, Swiftships, Intermarine, Watercraft, Van Mill and Rotork. Few of these vessels have been reported at sea in recent years although some are visible, laid up ashore, and are still serviceable.

(2) A Damen 2600 Mk II patrol craft was acquired from South Africa in 2001.

(3) Four 8 m Night Cat 27, capable of 70 kt, were delivered by Intercept Boats in 2003-04.

(4) Several 20 m VCSM craft were acquired from Reidco Marine in 2008.

Displacement, tons: 385 standard, 430 full load
 Dimensions, feet (metres): 184 x 24.9 x 7 (56.2 x 7.6 x 2.1)
 Main machinery: 4 MTU 16V 956TB92 diesels; 17,700 hp(m) (13 MW) sustained; 2 shafts
 Speed, knots: 38
 Range, n miles: 2,000 at 15 kt
 Complement: 42

Missiles: SSM: 4 Aerospatiale MM 38 Exocet; inertial cruise; active radar homing to 42 km (23 n miles) at 0.9 Mach; warhead 185 kg; sea-skimmer.
 Guns: 1 OTO Melara 3 in (76 mm)/62, 60 rds/min to 16 km (8.7 n miles); weight of shell 6 kg.
 2 Breda 40 mm/70 (twin); 300 rds/min to 12.5 km (6.8 n miles); weight of shell 0.96 kg.
 4 Emerson Electric 30 mm (2 twin); 1,200 rds/min combined to 6 km (3.3 n miles); weight of shell 0.35 kg.
 Countermeasures: ESM. Decca RDL; radar intercept.
 Weapons control: Thomson-CSF Vega system. 2 CSEE Panda optical directors.
 Radars: Air/surface search: Thomson-CSF Triton (TRS 3033); G-band.
 Navigation: Racal Decca TM 1226; I-band. Fire control: Thomson-CSF Castor II (TRS 3203), I/J-band.

Programmes: Ordered in late 1977. Finally handed over in February 1982 after delays caused by financial problems.

Modernisation: Major refit and repairs carried out at Cherbourg from March to December 1991 but the ships were delayed by financial problems.

Operational: Ayam believed to be operational and sister ships Siri and Ekun are reported to be seagoing.

AYAM (outboard DAMISA) 5/2002 / 0526300

AMPHIBIOUS FORCES

1 FDR TYPE RO-RO 1300 (LST)

Name	No	Builders	Commissioned
AMBE	LST 1312	Howaldtswerke, Hamburg	11 May 1979

Displacement, tons: 1,470 standard; 1,860 full load
 Dimensions, feet (metres): 285.4 x 45.9 x 7.5 (87 x 14 x 2.3)
 Main machinery: 2 MTU 16V 956TB92 diesels; 8,850 hp(m) (6.5 MW) sustained; 2 shafts
 Speed, knots: 17
 Range, n miles: 5,000 at 10 kt
 Complement: 58 (6 officers)
 Military lift: 460 tons and 220 troops long haul; 540 troops or 1,000 troops seated short haul; can carry 5-40 ton tanks
 Guns: 1 Breda 40 mm/70. 2 Oerlikon 20 mm.
 Radars: Navigation: Racal Decca 1226; I-band.

Comment: Ordered September 1976. Built to a design prepared for the FGN. Has 19 m bow ramps and a 4 m stern ramp. Reported that bow ramps are welded shut. Second of class, Offiam, beyond repair but Ambe reported active in 2007.

AMBE 7/1997 / 0012836

MINE WARFARE FORCES

2 LERICI CLASS (MINEHUNTERS/SWEEPERS) (MHSC)

Name	No	Builders	Commissioned
OHUE	M 371	Intermarine SY, Italy	28 May 1987
BARAMA	M 372	Intermarine SY, Italy	25 Feb 1988

Displacement, tons: 540 full load
Dimensions, feet (metres): 167.3 × 32.5 × 9.2 (51 × 9.9 × 2.8)
Main machinery: 2 MTU 12V 396 TB83 diesels, 3,120 hp (2.3 MW) sustained; 2 waterjets

Speed, knots: 15.5

Range, n miles: 2,500 at 12 kt

Complement: 50 (5 officers)

Guns: 2 Emerson Electric 30 mm (twin), 1,200 rds/min combined to 6 km (3.3 n miles); weight of shell 0.36 kg.
 2 Oerlikon 20 mm GAM-BO1.

Countermeasures: MCM: Fitted with 2 Pluto remote-controlled submersibles, Dropesa 'O' Mis 4 and Jbis V control system.

Radars: Navigation: Racal Decca 1228; I-band

Sonars: Thomson Sintra TSM 2022; hull-mounted; mine detection; high frequency

Comment: *Ohue* ordered in April 1983 and *Barama* in January 1986. *Ohue* laid down 23 July 1984 and launched 22 November 1985. *Barama* laid down 11 March 1985, launched 6 June 1986. GRP hulls but, unlike Italian and Malaysian versions they do not have separate hydraulic minehunting propulsion. Carry Galeazzi two-man decompression chambers. Both were refitted in 1999, after operations off Liberia. *Barama* reported refitted in late 2004 but the operational effectiveness of both ships in their MCM role is doubtful

SURVEY SHIPS

1 SURVEY SHIP (AGS)

Name	No	Builders	Launched	Commissioned
LANA	A 498	Brooke Marine, Lowestoft	4 Mar 1976	18 July 1976

Displacement, tons: 1,088 full load

Dimensions, feet (metres): 189 × 37.5 × 12 (57.8 × 11.4 × 3.7)

Main machinery: 2 Lister Blackstone diesels, 2,640 hp (1.97 MW); 2 shafts

Speed, knots: 16

Range, n miles: 4,500 at 12 kt

Complement: 52 (12 officers)

Radars: Navigation: Decca; I-band.

Comment: Similar to UK Bulldog class. Ordered in 1973. Rarely goes to sea.

Norway

Country Overview

The Kingdom of Norway is a constitutional monarchy occupying the northwest part of the Scandinavian Peninsula. With an area of 125,016 square miles, it is bordered to the east by Sweden and to the northeast by Finland and Russia. The coastline of 11,842 n miles with the Atlantic Ocean (Norwegian Sea), Arctic Ocean (Barents Sea), North Sea and Skagerrak Strait contains numerous fjords and offshore islands. External territories in the Arctic Ocean include the Svalbard archipelago and Jan Mayen Island while the uninhabited Bouvet Island lies in the south Atlantic. Territorial claims in Antarctica include the territory known as Queen Maud Land and Peter I Island. The capital, largest city and principal port is Oslo. Other ports include Bergen, Trondheim and Stavanger. Territorial seas (12 n miles) and an EEZ (200 n miles) are claimed.

Personnel

(a) 2009: 3,200 officers and ratings

(b) 9 to 12 months' national service (up to 40 per cent of ships complement)

Coast Artillery

The fixed defence system of nine coastal forts and controlled minefields is in long-term storage. As a result, the Coastal Ranger Command was established in 2001 with a headquarters at Trondenes.

Coast Guard

Founded April 1977 with operational command held by Norwegian Defence Command. Main bases at Sortland (North) and Haakonsværn (South). Tasks include fishery protection, customs, police, SAR and environmental duties at sea.

Bases

Reitan (Bodo): National Operational HQ (from 8/2009)

Haakonsværn (Bergen): Main Naval Base

Laksevåg (Bergen): Submarine Repair

Ramsund: Supply, repair and maintenance

Sortland: Coast Guard Base

Air Force Squadrons (see *Shipborne and Land-based Aircraft*)

Aircraft (Squadron)	Location	Duties
Sea King Mk 43 (330)	Bodø, Benak, Sola, Ørland	SAR
Orion P.3N/C (333)	Andøya	MPA
Lynx (337)	Coast Guard vessels/ Bardufoss	MP
Boll 412 (719, 339 & 720)	Bodø, Rygge, Bardufoss	Army Transport

SUBMARINES

Notes: Norway withdrew from the 'Viking' submarine project on 13 June 2003 at the end of the Project Definition Phase Step 1 Studies into the replacement of the current submarine capability from about 2020 were launched in late 2007. Following initial conceptual work, a more detailed project definition study is expected to start in 2009.

6 ULA CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
ULA	S 300	Thyssen Nordseewerke, Emden	29 Jan 1987	28 July 1988	27 Apr 1989
UREDD	S 305	Thyssen Nordseewerke, Emden	23 June 1988	22 Sep 1989	3 May 1990

UTSTEIN	S 302	Thyssen Nordseewerke, Emden	6 Dec 1989	25 Apr 1991	14 Nov 1991
UTSIRA	S 301	Thyssen Nordseewerke, Emden	15 June 1990	21 Nov 1991	30 Apr 1992

Displacement, tons: 1,040 surfaced; 1,150 dived

Dimensions, feet (metres): 193.6 × 17.7 × 15.1
(59 × 5.4 × 4.6)

Main machinery: Diesel-electric; 2 MTU 16V 396 SB83 diesels; 2,700 hp(m) (1.98 MW) sustained; 1 Siemens motor; 6,000 hp(m) (4.41 MW); 1 shaft

Speed, knots: 11 surfaced; 23 dived

Range, n miles: 5,000 at 8 kt

Complement: 21 (5 officers)

Torpedoes: 8–21 in (533 mm) bow tubes. 14 AEG DM 2A3 Sehecht: dual purpose; wire-guided, active/passive homing to 28 km (15 n miles) at 23 kt; 13 km (7 n miles) at 35 kt; warhead 260 kg; depth to 460 m.

Countermeasures: ESM: Argo S 5; radar warning.

Weapons control: Kongsberg MSI-90(U) TFCS.

Radars: Surface search: Kelvin Hughes 1007; I-band.

Sonars: Atlas Elektronik CSU 83; active/passive intercept search and attack; medium frequency.
Thomson Sintra; flank array; passive; low frequency.

Programmes: Contract signed on 30 September 1982. This was a joint West German/Norwegian effort known as Project 210 in Germany. Although final assembly was

UTHAUG

5/2007, Harald Carstens / 1165510

at Thyssen a number of pressure hull sections were provided by Norway.

Modernisation: MSI-90U being upgraded 2000–2005. A mid-life upgrade of all six boats is in progress 2007–15. The programme includes updates to the sonar and communications systems and a number of platform improvements.

Structure: Diving depth, 250 m (820 ft). The basic command and weapon control systems are Norwegian, the attack sonar is German but the flank array, based on piezoelectric polymer antenna technology, was developed in France and substantially reduces flow noise. Celzoni Trident modular system of non-penetrating masts has been installed. Zeiss periscopes.

THOR HEYERDAHL	F 314	Navantia, Ferrol	23 Nov 2007	11 Feb 2009	2010

Displacement, tons: 5,290 full load

Dimensions, feet (metres): 437.0 x 55.1 x 16.1
(133.2 x 16.8 x 4.9)

Main machinery: CODAG; 1 GELM 2500 gasturbine; 26,112 hp
(19.2 MW); 2 Bazán Bravo 12V diesels; 12,240 hp(m)
(9 MW); 2 shafts; cp props; bow thruster; 1,360 hp(m)
(1 MW)

Speed, knots: 26

Range, n miles: 4,500 at 16 kt

Complement: 120 (50 officers) plus 26 spare

Missiles: SSM: 8 Kongsberg NSM; inertial, GPS and terrain mapping guidance and passive IR homing to 185 km (100 n miles) at 0.95 Mach; warhead 120 kg.

SAM: Mk 41 VLS (8 cells); 32 Evolved Sea Sparrow RIM 162B, semi-active radar homing to 18 km (9.7 n miles) at 3.6 Mach; warhead 38 kg

Guns: 1 Oto Melara 76 mm/62 Super Rapid; 120 rds/min to 15.75 km (8.5 n miles) anti-aircraft, 12 km (6.5 n miles) anti-aircraft, weight of shell 6 kg.
4—12.7 mm MGs. Fitted for 1—40 mm/70.

Torpedoes: 4—324 mm (2 double) tubes; Marconi Stingray, active/passive homing to 11 km (5.9 n miles) at 45 kt; warhead 35 kg shaped charge

Countermeasures: Decoys: Terma SKWS chaff, IR, LOKI 130 mm acoustic decoy.

ESM: Condor CS-3701, Intercept.

Combat data systems: AEGIS with ASW and ASuW segments from Kongsberg; Link 11 (fitted for Link 16/22).

FRIDTJOF NANSEN

(Scale 1 : 1,200), Ian Sturton / 1190985

Weapons control: Sagem VIGY 20 optronic director.

Radars: Air search: Lockheed Martin SPY-1F; E/F-band

Surface search: Litton; E/I-band

Fire control: 2 Mk 82 (SPG-62); I/J-band

Navigation: 2 Litton; I-band, IFF: Mk XII.

Sonars: Thomson Marconi Spherion MRS 2000 and Mk 2

CAPTAS, combined active/passive towed array.

Helicopters: 1 NH 90.

Programmes: Design Definition for a new class of frigates started in March 1997. Izar and Lockheed Martin selected in March 2000 and contract signed 23 June 2000. Most of the construction is being undertaken by Navantia (formerly Izar). Two Norwegian shipyards,

Bergen Mekaniske Verksted and Aker Yards, Florø, are collaborating to build modules for each ship. These are shipped to Ferrol where final assembly takes place. The building programme has been delayed by disputes over quality control and contractual arrangements. Planned commissioning dates could be affected.

Modernisation: Stingray torpedoes are to be upgraded or replaced in due course.

Structure: The design is based on the Alvaro de Bazan class. Damage control is automated through the Integrated Platform Management System.

Operational: Fridtjof Nansen successfully conducted Combat Systems Ship Qualification Trials with the US Navy in mid-2007.

SHIPBORNE AIRCRAFT

Numbers/Type: 14 NH Industries NH 90 NFH
Operational speed: 157 kt (291 km/h).
Service ceiling: 13,940 ft (4,250 m).
Range: 621 n miles (1,150 km).
Role/Weapon systems: Delivery of 14 aircraft, reconfigurable for ASW and Coast Guard missions, is to begin in 2010. Flight of the first aircraft took place on 20 December 2006. Option for further ten SAR aircraft. Sensors: Thales ENR surveillance radar, TJS FLASH dipping sonar. Weapons: NSM missiles, Stingray (to be upgraded or replaced) torpedoes.

NH 90 6/2008*, Norwegian Navy / 1335801

Numbers/Type: 6 Westland Lynx Mk 86.
Operational speed: 125 kt (232 km/h).
Service ceiling: 12,500 ft (3,810 m).
Range: 320 n miles (590 km).
Role/Weapon systems: Operated by Air Force on behalf of the Coast Guard for fishery protection, offshore oil protection and SAR; embarked in CG vessels and shore-based. To be replaced by NH 90 from 2010. Sensors: Search radar, FLIR may be fitted, ESM. Weapons: Generally unarmed.

LYNX 6/2002, Royal Norwegian Navy / 0572608

LAND-BASED MARITIME AIRCRAFT

Notes: The Air Force has a total of 56 F-16 Falcons armed with Penguin 3 ASMs.

Numbers/Type: 4 Lockheed P-3C Orion.
Operational speed: 410 kt (760 km/h).
Service ceiling: 28,300 ft (8,625 m).
Range: 4,000 n miles (7,410 km).
Role/Weapon systems: Long-range MR and oceanic surveillance duties in peacetime, with ASW added as a war role. Updated in 1998-99 with new radars and new tactical computers. P-3Ns used by Coast Guard paid off in 1999. Sensors: APS-137(V)5 radar, ASQ-81 MAD, AQS-212 processor and computer, IFF, AAR-36 IR detector; AAR-47 ESM, ALE 47 countermeasures; sonobuoys. Weapons: ASW: 8 MUSL Stingray (to be upgraded or replaced) torpedoes, depth bombs or mines. ASV: Penguin NFT Mk 3 ASM.

P-3C 6/2001, A Sherna, D130100

Numbers/Type: 12 Westland Sea King Mk 43B
Operational speed: 125 kt (232 km/h).
Service ceiling: 10,500 ft (3,200 m).
Range: 630 n miles (1,165 km).
Role/Weapon systems: SAR, surface search and surveillance helicopter; supplemented by civil helicopters in wartime. Two 43B delivered in May 1996; remainder updated to 43B standard. Sensors: FLIR 2000 and dual Bendix radars RDR 1500 and RDR 1300. Weapons: Generally unarmed.

SEA KING 43B 2001, GKN Westland / 0051448

PATROL FORCES

Notes: There is an inshore patrol craft *Kaholman* SHV 121 delivered in about 2005.

Missiles: 8 SSM; 8 Kongsberg NSM inertial, GPS and terrain matching guidance and passive IR homing to 185 km (100 n miles) at 0.95 Mach; warhead 120 kg.
SAM: Mistral; IR homing to 4 km (2.2 n miles) at 2.5 Mach; warhead 3 kg
Guns: 1 Oto Melara 76 mm/62 Super Rapid; 120 rds/min to 16 km (8.7 n miles), weight of shell 6 kg. 2-12.7 mm MGs
Countermeasures: 1 Rheinmetall MASS-1L.
ESM: EDO CS 370; intercept
Combat data systems: DCN Senit 2000; Link 11/16.
Weapons control: Sagem VIGX-20 optronic director.
Radars: Air/surface search: Thales MRR; 3D NG; G-band.
Navigation: I-band.
Fire control: CelsiusTech Ceros 200, J-band

Programmes: Project SMP 6081. A preproduction version (P 960) ordered 30 August 1996. This was tested by the Norwegian Navy from 1999-2001 and was evaluated by the USN and USCG in 2001-02. The Norwegian parliament decided on 23 October 2003 that five additional vessels were to be built. Contract with Skjold Prime Consortium, comprising Umoe Mandal, Armaris and Kongsberg Defence & Aerospace, was signed 28 November 2003. Ships are being built at Umoe Mandal shipyard for delivery by 2009. P 960 is to be used for crew training and is to be upgraded to production standard after the other five vessels have been delivered.

Structure: SES hull with advanced stealth technology including anechoic coatings. Building on experience in US trials, a more raked bow has been adopted to improve performance into sea. The foredeck structure is also to be strengthened around the gun mounting. Two quadruple SSM launchers are to be recessed aft of the bridge. These will elevate to fire and then retract.

Range, n miles: 240 at 20 kt
Complement: 3
Military lift: 2.8 tons or 20 troops
Guns: 1—12.7 mm MG
Radars: Navigation: I-band

Comment: Ordered from Dockstarvarvet, Sweden. Four Batch 1 units delivered for trials in July and October 1996. Three more of the class delivered in 1997, 13 in 1998. Used to carry mobile light missile units and prime method of transportation for new Coastal Ranger Commando. Similar in most details to the Swedish Coastal Artillery craft. Names are mostly taken from Coastal Fortresses. Evaluation of these craft as a launch platform for the Hellfire missile took place on Mørviika in May 2004. Pennant numbers were changed in 2004.

KJØKØY 6/2008*, Royal Norwegian Navy / 1335798

7 ALUSAFE 1290 CLASS (INSHORE PATROL CRAFT) (PB)

L 4540–L 4546

Displacement, tons: 7.6
Dimensions, feet (metres): 43.2 × 11.5 × 2.5 (12.9 × 3.5 × 0.75)
Main machinery: 2 Volvo Penta TAMD 74 EDC diesels; 900 hp (670 kW); 2 Kamewa K28 waterjets
Speed, knots: 42
Complement: 2 (plus 13 troops)
Guns: 2—12.7 mm MGs

Comment: Aluminium hull. Built by Maritime Partner, Ålesund and delivered in 2002. Designed for use by the Norwegian Naval Home Guard as multifunction assault and patrol vessels by the coastal rangers. The craft are also available as tactical logistics craft and to support police, customs, environmental and fishery authorities.

L 4540 6/2008*, Richard Scott / 1335808

MINE WARFARE FORCES

6 OKSØY/ALTA CLASS

(MINEHUNTERS/SWEEPERS) (MHCM/MSCM)

Name	No	Builders	Commissioned
Hunters			
KARMØY	M 341	Kvaerner Mandal	24 Oct 1994
MÅLØY	M 342	Kvaerner Mandal	24 Mar 1995
HINNØY	M 343	Kvaerner Mandal	8 Sep 1995
Sweepers			
ALTA	M 350	Kvaerner Mandal	12 Jan 1998
OTRA	M 351	Kvaerner Mandal	8 Nov 1996
RAUMA	M 352	Kvaerner Mandal	2 Dec 1998

Displacement, tons: 375 full load

Dimensions, feet (metres), 181.1 × 44.6 × 8.2 (2.76 cushion) (55.2 × 13.6 × 2.5; 0.84)

Main machinery: 2 MTU 12V 396 TE84 diesels; 3,700 hp(m) (2.72 MW) sustained, 2 Kvaerner Eureka water-jets; 2 MTU 8V 396 TE54 diesels; 1,740 hp(m) (1.28 MW/60 Hz) sustained, lift engines

Speed, knots: 23

Range, n miles, 1,500 at 20 kt

Complement: 40 (14 officers) (minehunters); 32 (10 officers) (minesweepers)

Missiles, SAM: Matra Sadral twin launcher; Mistral; IR homing to 4 km (2.2 n miles); warhead 3 kg.

Guns: 1 or 2 Rheinmetall 20 mm. 3—12.7 mm MGs

Countermeasures: MCMV-2 Pluto submersibles (minehunter); mechanical, AGATE (air gun and transducer equipment) acoustic and Elma magnetic sweep (minesweepers). Minesweeper mini torpedoes can be carried.

Radars: Navigation: 2 Racal Decca; I-band.

Sonars: Thales TSM 2022 Mk 3; hull mounted; high frequency.

Programmes: Order placed with Kvaerner on 9 November 1989

Modernisation: Both minehunters and minesweepers are being upgraded with new sonars (TSM 2022), new tactical C2 system and new dynamic positioning system. The Kongsberg Simrad Hugin 1000 AUV is to be installed in all ships. The AUV is to be used for mine reconnaissance and rapid environmental assessment.

Structure: Design developed by the Navy in Bergen with the Defence Research Institute and Norsk Veritas and uses an air cushion created by the surface effect between two hulls. The hull is built of Fibre Reinforced Plastics (FRP) in sandwich configuration. The ROVs are carried in a large hangar and are launched by two hydraulic cranes. The minesweeper has an A frame aft for the sweep gear. SAM launcher mounted forward of the bridge

Operational: Simrad Albatross tactical system including mapping; Cast/Del Norte mobile positioning system with GPS. The catamaran design is claimed to give higher transit speeds with lesser installed power than a traditional hull design. Other advantages are lower magnetic and acoustic signatures, clearer water for sonar operations and less susceptibility to shock. Orkla M 353 was lost after a catastrophic fire on 19 November 2002. M 354 was decommissioned in 2004 and M 340 in 2005

Displacement, tons: 7,560 full load

Dimensions, feet (metres): 267.4 × 130.9 × 19.7 (81.5 × 39.9 × 6)

Main machinery: Diesel-electric; 2 MTU Siemens 16V 396 TE diesels; 7,072 hp(m) (5.2 MW); 2 Dresser Rand/Siemens gas-turbine generators; 9,792 hp(m) (7.2 MW); 2 Siemens motors; 8,160 hp(m) (6 MW); 2 Schottel 3030 thrusters, 1 Siemens motor; 2,720 hp(m); (2 MW); 1 Schottel thruster (forward)

Speed, knots: 15

Complement: 14 plus 31 scientists

Helicopters: Platform for one medium

Comment: Ordered in February 1992 from Langsten Slip og Batbyggen to replace the old ship of the same name. Called Project Minerva. Design developed by Ariel A/S, Horten. The three main superstructure-mounted cupolas contain ELINT and SIGINT equipment. Hull-reinforced to allow operations in fringe ice. Equipment includes Sperry radars, Elac sonars, Siemens TV surveillance, and a fully equipped helicopter flight deck. The unconventional hull which gives the ship an extraordinary length to beam ratio of 2:1 is said to give great stability and dynamic qualities.

TRAINING SHIPS

2 TRAINING SHIPS (AXL)

Name	No	Builders	Commissioned
HESSA (ex-Hitra, ex-Marsteinen)	P 358	Fjellstrand, Omastrand	Jan 1978
VIGRA (ex-Kvarven)	P 359	Fjellstrand, Omastrand	July 1978

Displacement, tons: 39 full load

Dimensions, feet (metres): 77 × 16.4 × 3.5 (23.5 × 5 × 1.1)

Main machinery: 2 GM 12V-71 diesels; 1,800 hp (1.34 MW); 2 shafts

Speed, knots: 20

Complement: 5 plus 13 trainees

Guns: 1—12.7 mm Browning MG.

Radars: Navigation: Racal Decca, I-band

Comment: The vessels are designed for training students at the Royal Norwegian Naval Academy in navigation, manoeuvring and seamanship. All-welded aluminium hulls. Also equipped with an open bridge and a blind pilotage position below deck. 18 berths.

VIGRA

4/2002, P Froud / 0529133

AUXILIARIES

Notes: A concept study to explore options for afloat replenishment and logistic support is in progress. Potential conclusions include a multirole Ro-Ro ship and an ADR to support the new frigates. An acquisition programme, is as yet unfunded

1 SUPPLY AND RESCUE VESSEL

Name	No	Builders	Commissioned
VALKYRIEN	A 535	Ulstein Høtlo	1981

Displacement, tons: 3,000 full load
Dimensions, feet (metres), 223.1 x 47.6 x 16.4 (68 x 14.5 x 5)
Main machinery: Diesel electric; 4 diesels; 10,560 hp(m) (7.76 MW) sustained; 2 motors; 3.14 MW; 2 shafts; 2 bow thrusters; 1,600 hp(m) (1.18 MW); 1 stern thruster; 800 hp(m) (588 kW)
Speed, knots: 16
Complement: 13
Missiles: SAM: Mistral; IR homing to 4 km (2.2 n miles) at 2.5 Mach; warhead 3 kg.
Guns: 3—12.7 mm MGs.
Radars: Navigation: 2 Furuno; HI-band.

Comment: Tug/supply ship acquired in 1994 for supply and SAR duties. Bollard pull 128 tons. Can carry a 700 ton deck load. Oil recovery equipment is also carried.

VALKYRIEN 6/2008*, Maritime Photographic / 1335606

7 COASTAL VESSELS (YPT/YDT)

Notes: Due to re-organisation of the coastal vessels, the naval districts no longer operate many of the vessels previously assigned. The following remain in service and are prefaced by two letters as follows. HT (torpedo recovery), HM (multirole), HS (tugs), HD (diving), HP (personnel), HR (rescue). *Hitra* (HP 15) is also used for training cruises. All are less than 300 tons displacement

Name	No	Speed, knots	Commissioned	Role

1 SUPPORT SHIP (AGDS)

Name	No	Builders	Commissioned
TYR (ex- <i>Standby Master</i>)	N 50	Alesund Mekaniske Verksted	1981

Displacement, tons: 495 full load
Dimensions, feet (metres), 138.8 x 33.1 x 11.5 (42.3 x 10.1 x 3.5)
Main machinery: 2 Deutz SBA12M816 diesels; 1,300 hp(m) (956 kW); 1 shaft; cp prop; 1 MWM diesel, 150 hp(m) (110 kW); bow and stern thrusters
Speed, knots: 12
Complement: 22 (7 officers)
Mines: 2 rails.
Radars, Navigation: Furuno 711 and Furuno 1011; I-band.

Comment: Former oil rig pollution control ship. Acquired in December 1993 and converted by Mjellum & Karlsen, Bergen. Recommissioned 7 March 1995 as a minelayer, and for the maintenance of controlled minefields but principal current task is to support underwater operations. Carries a ROV

TYR 6/2008*, Maritime Photographic / 1335804

ROYAL YACHTS

1 ROYAL YACHT (YAC)

Name	No	Builders	Commissioned
NORGE (ex- <i>Philante</i>)	A 533	Camper & Nicholson's Ltd, Southampton	1937

Displacement, tons: 1,786 full load
Dimensions, feet (metres), 263 x 38 x 15.2 (80.2 x 11.6 x 4.6)
Main machinery: 2 Bergen KRMB-8 diesels; 4,850 hp(m) (3.6 MW) sustained; 2 shafts, bow thruster
Speed, knots: 17
Complement: 50 (18 officers)
Radars: Navigation, 2 Decca, I-band.

Comment: Built to the order of the late T O M Sopwith as an escort and store vessel for the yachts *Endeavour I* and *Endeavour II* Launched on 17 February 1937. Served in the Royal Navy as an anti-submarine escort during the Second World War, after which she was purchased by the Norwegian people for King Haakon and reconditioned as a Royal Yacht at Southampton. Can accommodate about 50 people in addition to crew. Repaired after serious fire on 7 March 1985 when the ship was fitted with a bow-thruster

NORGE 6/2005, E & M Laursen / 1151127

COAST GUARD (KYSTVAKT)

3 CHARTERED SHIPS (WPBO)

Name	No	Tonnage	Completion
ÅLESUND	W 312	1,357	1996
STÅLBAS	W 314	850	1955
LEIKVIN	W 319	1,300	1969

Comment: All armed with one 40 mm/60 gun. Some ships are operated with two crews, changing over every three weeks. *Leikvin* and *Stålbas* are to be replaced by Barentshav class when they enter service from 2009.

574 Norway/Coast guard

1 ARCTIC CLASS (WPSOH)

Name	No	Builders	Commissioned
SVALBARD	W 303	Tangen Verft, Kragerø	5 Jan 2002

Displacement, tons: 6,300 full load
Dimensions, feet (metres): 340.3 × 62.7 × 21.3 (103.7 × 19.1 × 6.5)
Main machinery: Diesel electric; 4 Rolls Royce diesel generators; 10 MW; 2 azimuth pods; 1 bow thruster
Speed, knots: 17
Range, n miles: 10,000 at 13 kt
Complement: 50
Guns: 1 Bofors 57 mm/70
Radars: Air/Surface search EADSTRS 3D; G band.
Surface search/navigation: Kongsberg Bridgeline 10; I-band.
Helicopters: Platform for 1 NH 90 or Lynx

Comment: Project definition completed in 1997 for an ice-reinforced vessel equipped with a helicopter. Built to Det Norske Veritas standards. Contract placed 15 December 1999 with Langsten Slip and Båtbyggeri A/S, Tomrefjord. Ship launched February 2001. Fitted for firefighting and counter-pollution work. There are two motor cutters and a sea-raider type dinghy. The ship underwent refit at Fiskerstrand Verft in 2006.

SVALBARD 7/2003, Freddie Philips / 06/2601

1 ULSTEIN UT 512 (SALVAGE AND RESCUE TUG) (ARS)

Name	No	Builders	Commissioned
HARSTAD	W 318	Aker Sjøviknes	28 Jan 2005

Displacement, tons: 3,130 full load
Dimensions, feet (metres): 272.3 × 50.8 × 19.7 (83.0 × 15.5 × 6.0)
Main machinery: 2 Bergen B 32-40L diesels; 10,730 hp (8 MW); 2 Kamewa Ulstein cp props, two bow thrusters; 1 Kamewa Ulstein 738 kW tunnel thruster; 1 Ulstein Aquamaster swing-up 883 kW azimuth thruster
Speed, knots: 19
Complement: 26
Guns: 1-57 mm.

Comment: Contract awarded in November 2003 for vessel designed by Rolls-Royce for a variety of coastguard and EEZ management roles. These include offshore standby and rescue, firefighting, salvage, pollution prevention, general law enforcement operations and fishery control. The ship is to be capable of operating the NATO Submarine Rescue System. Built by Aker's Sjøviknes yard based on steelwork from Aker Tulcea in Romania. The ship is owned by Remøy Shipping, who operates the ship on long term charter.

HARSTAD 6/2008, Richard Scott / 1335803

1 + 2 BARENTSHAV (VS 794) CLASS (SALVAGE AND RESCUE TUGS) (ARS)

Name	No	Builders	Commissioned
BARENTSHAV	W 340	Myklebust Verft AS	2009
BERGEN	W 341	Myklebust Verft AS	2009
SORTLAND	W 342	Myklebust Verft AS	2010

Displacement, tons: 4,000 full load
Dimensions, feet (metres): 305.8 × 54.5 × 19.0 (93.2 × 16.6 × 5.8)
Main machinery: LNG/diesel-electric; 1 Bergen B32 diesel; 5,364 hp (4 MW); 3 Mitsubishi GS 16R generators; 3,480 hp (2.6 MW); 1 Mitsubishi GS 12R generator; 860 hp (642 kW); 1 motor; 1 shaft
Speed, knots: 20
Complement: 16
Guns: 1-40 mm/70
Radars: Air/Surface search: To be announced
Surface search/Navigation: To be announced

Comment: Contract signed on 21 October 2005 with designer Vik-Sandvik AS and owner Remøy Management for the delivery of three coast guard vessels. The ships are to be operated by the Coast Guard on long term charter. The vessels are to be equipped with the same kind of rescue and environmental protection equipment as that in the UT 512 design Harstad. The vessels are of particular interest in that they are some of the world's first naval vessels to use a hybrid propulsion system based on diesel and liquid natural gas (LNG). The hulls are under construction in Romania and are to be fitted out in Norway from 2009.

BARENTSHAV (artist's impression) 1/2006, Myklebust Verft / 1158733

3 NORDKAPP CLASS (WPSOH)

Name	No	Builders	Launched	Commissioned
NORDKAPP	W 320	Bergens Mek Verksteder	2 Apr 1980	25 Apr 1981
SENJA	W 321	Horten Verft	16 Mar 1980	6 Mar 1981
ANDENES	W 322	Haugesund Mek Verksted	21 Mar 1981	30 Jan 1982

Displacement, tons: 3,300 full load
Dimensions, feet (metres): 346 × 47.9 × 18.1 (105.5 × 14.6 × 4.9)
Main machinery: 4 Wichmann 9AXAG diesels; 16,163 hp(m) (11.9 MW); 2 shafts
Speed, knots: 21 **Range, n miles:** 7,500 at 15 kt
Complement: 52 (6 aircrew)
Missiles, SSM: Fitted for 6 Kongsberg Penguin II but not embarked.
SAM: Fitted for MBDA Simbad
Guns: 1 Bofors 57 mm/70; 200 rds/min to 17 km (9.3 n miles); weight of shell 2.4 kg. 4 Rheinmetall 20 mm/20; 1,000 rds/min to 2 km.
Torpedoes: 8-324 mm US Mk 32 (2 triple) tubes. Honeywell Mk 46; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg. Mountings only in peacetime.
Depth charges: 1 rack
Countermeasures: Decoys: 2 chaff launchers.
Combat data systems: Navkis or EDO (after modernisation). SATCOM can be carried.
Weapons control: Sagem Vigy 20 optronic director.
Radars: Air/surface search: EADSTRS-3D; G-band.
Navigation: Atlas; I-band.
Sonars: Simrad SP 270; hull-mounted; 24-30 kHz

Helicopters: 1 Westland Lynx Mk 86

Programmes: In November 1977 the Coast Guard budget was cut resulting in a reduction of the building programme from seven to three ships.

Modernisation: A modernisation programme was conducted 2001-03. Upgrades included an optronic director, new hull-mounted sonar, new air search radar and combat data system. A further refit programme for all three ships was conducted by Fiskerstrand Verft in 2006.

Structure: Ice strengthened. Fitted for firefighting, anti-pollution work, all with two motor cutters and a Gemini-type dinghy. SATCOM fitted for Gulf dep oyment.

Operational: Bunks for 109. War complement increases to 76.

ANDENES 6/2006, E & M Laursen / 1151136

4 FISHERY PROTECTION SHIPS (WPSOH)

Name	No	Tonnage	Completion
TITRAN	KV 1	96	1982
GARSØY	KV 8	95	1988
ÅHAV	KV 7	50	1981
THORSTEINSON	KV 26	272	1960

Comment: An Inshore Patrol Force was established in January 1997. This comprises mostly chartered ships with KV pennant numbers. KV 1-7 are coastal cutters. Five new ships are to replace older ships from 2006.

GARSØY 6/2005, Globke Collection / 1151135

5 + (5) NORNEN CLASS (PATROL VESSELS) (PBO)

Name	No	Builders	Commissioned
NORNEN	W 330	Gryfia Shipyard, Szczecin	2006
FARM	W 331	Gryfia Shipyard, Szczecin	2006
HEIMDAL	W 332	Gryfia Shipyard, Szczecin	2008
NJORD	W 333	Gryfia Shipyard, Szczecin	2008
TOR	W 334	Gryfia Shipyard, Szczecin	2008

Displacement, tons: 743 full load
Dimensions, feet (metres): 154.8 × 33.8 × 10.8 (47.2 × 10.3 × 3.3)
Main machinery: Diesel-electric; 2 azimuth thrusters
Speed, knots: 16
Complement: 20

Comment: Contract awarded in February 2005 to Remøy Management and Remøy Shipping for the construction of five new vessels with an option for a further five. The original plan was for the ships to be owned and managed by the shipping companies and chartered to the Coast Guard. However, this was overtaken by the decision in July 2008 to purchase all five ships. The design, developed by Skipsteknisk AS, is called ST-610. The ships are employed out to 24 n miles from the coast and are equipped to conduct towing, counter-pollution operations, fire-fighting and general patrol duties. Two fast rescue craft are carried and there is space for 100 m³ of cargo space on deck and 90 m³ in the hold

HEIMDAL

4/2007, L-G Nilsson / 1166620

Oman

Country Overview

The Sultanate of Oman is an independent Middle-East state extending along the south-east coast of the Arabian Peninsula. It is bordered to the south-west by the Republic of Yemen, to the west by Saudi Arabia and to the north-west by the United Arab Emirates which separates a small exclave on the Musandam peninsula, on the south side of the Strait of Hormuz, from the rest of the country. Masirah island and the Khuriya Muriya Islands lie off the south-east coast. With an area of 92,030 square miles, it has a 1,129 n mile coastline with the Indian Ocean and Gulf of Oman. The capital, largest city and principal port is Muscat while there is a further port at Salalah. Territorial seas (12 n miles) are claimed. An EEZ (200 n miles) has also been claimed but its limits have only been partly defined by boundary agreements.

Headquarters Appointments

Commander Royal Navy of Oman:
 Rear Admiral (Liwaah Rukn Bahry) Salim bin Abdullah bin Rashid al Alawi
Principal Staff Officer:
 Commodore (Ameed) Abdullah Khamis Abdullah Al-Raisi
Director General Operations and Plans:
 Commodore (Ameed) Abdullah Khamis Abdullah Al-Raisi
Commander Coast Guard:
 Captain (Aqeed Bahry) Hamdan bin Marhoon Al Mamary
Commander Royal Yacht Squadron:
 Commodore (Ameed) J M Knapp

Bases

Said bin Sultan, Widam A'Sahil (main base, dockyard and shipyard)
 Ras Musandam
 Musaskar al Murtafa'a (headquarters)

Personnel

(a) 2009: 4,200 officers and men
 (b) Voluntary service

CORVETTES

1 PATROL SHIP (FSH/AXL/AGS)

Name	No	Builders	Commissioned
AL MABRUKAH (ex-Al Said)	Q 30 (ex-A 1)	Brooke Marine, Lowestoft	1971

Displacement, tons: 900 full load
Dimensions, feet (metres): 203.4 × 35.1 × 9.8 (62 × 10.7 × 3)
Main machinery: 2 Paxman Valenta 12CM diesels, 5,000 hp (3.73 MW) sustained, 2 shafts
Speed, knots: 12
Complement: 39 (7 officers) plus 32 trainees

Guns: 1 Bofors 40 mm/70, 2 Oerlikon 20 mm A41A.
Countermeasures: Decoys: Wallop Barricade 18-barrelled chaff launcher
ESM: Racal Cutlass; radar warning.
Radars: Surface search: Racal Decca TM 1226, I-band.
Helicopters: Platform only.

Comment: Built by Brooke Marine, Lowestoft. Launched 7 April 1970 as a yacht for the Sultan of Oman. Carried on board is one Rotork landing craft. Converted to training/patrol ship in 1983 with enlarged helicopter deck, additional accommodation and armament. Re-classified as a corvette and pennant number changed in 1997. Fitted with survey equipment in 2000, as an additional role.

AL MABRUKAH

Dimensions, feet (metres): 274.6 oa; 249.3 wl x 37.7 x 11.8 (89.7; 76 x 11.5 x 3.6)
Main machinery: CODAD; 4 Crossley SEMT-Pielstick 16 PA6 V 280 STC, 28,160 hp(m) (20.7 MW) sustained; 2 shafts, Kamewa cp props
Speed, knots: 28
Range, n miles: 4,000 at 10 kt
Complement: 76 (14 officers) plus 3 spare

Missiles: SSM: 8 Aerospatiale MM 40 Block 2 Exocet ●; inertial cruise; active radar homing to 70 km (40 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer. SAM: Thomson-CSF Crotale NG octuple launcher ●; 16 VT1; command line of sight guidance; radar/IR homing to 13 km (7 n miles) at 2.4 Mach; warhead 14 kg.
Guns: 1 OTO Melara 3 in (76 mm)/62 Super Rapid ●; 120 rds/min to 16 km (8.7 n miles); weight of shell 6 kg. 2 Oerlikon/Royal Ordnance 20 mm: GAM-BO1 ●; 2 7.62 mm MGs.
Torpedoes: 6—324 mm (2 triple) tubes may be fitted in due course
Countermeasures: Decoys: 2 Barricade 12-barrelled chaff and IR launchers ●.
ESM: Thomson-CSF DR 3000 ●, intercept.
Combat data systems: Signaal/Thomson-CSF TACTICOS; Link Y; SATCOM
Weapons control: Signaal STING optronic and radar tracker ●; 2 Signaal optical directors.
Radars: Air/surface search: Signaal MW08 ●; G band.
Fire control: Signaal STING ●; I/J-band. Thomson-CSF DRBV 51C ●; J-band (for Crotale).
Navigation: Kelvin Hughes 1007; I-band.
Sonars: Thomson Sintra/BAeSEMA ATAS; towed array; active search, 3 kHz (may be fitted).

Helicopters: Platform for 1 Super Lynx ●

Programmes: Vosper Thornycroft signed the Muheet Project contract on 5 April 1992. First steel cut 23 September 1992. C 31 accepted on 27 March 1996, and C 32 on 26 November 1996. Commissioned after operational work up in the UK, and on return to Oman. Names mean Conqueror of the Waves, and The Supported.

Structure: The ship is based on the Vigilance class design with enhanced stealth features. It is possible lightweight torpedo tubes may be fitted. The towed array, if fitted, adds another 8 tons on the stern but does not affect the helicopter deck. RAM (Radar Absorbent Material) is widely used on the superstructure.

Operational: The helicopter platform can support a Super Puma sized aircraft.

Weapons control: Sperry Sea Archer (8 10), Philips 9LV 307 (remainder).
Radars: Air/surface search: Plessey AWS 4 or AWS 6; E/F-band.
 Fire control, Philips 9LV 307; I/J-band.
 Navigation: KH 1007 ARPA; I-band.

Programmes: First ordered in 1980, two more in January 1981 and fourth in January 1986.
Structure: Similar to Kenyan Nyayo class. Mast structures are different dependent on radars fitted
Operational: Pennant numbers have been changed from B to Z.

PATROL FORCES

Notes: Replacement of the Dhofar class is under consideration.

3 AL BUSHRA CLASS (PBO)

Name	No	Builders	Laid down	Launched	Commissioned
AL BUSHRA	Z 1	CMN, Cherbourg/Wudam Dockyard	10 Nov 1993	3 May 1995	15 June 1995
AL MANSOOR	Z 2	CMN, Cherbourg/Wudam Dockyard	12 Apr 1994	3 May 1995	10 Aug 1995
AL NAJAH	Z 3	CMN, Cherbourg/Wudam Dockyard	27 June 1994	5 Mar 1996	15 Apr 1996

Displacement, tons: 475 full load
Dimensions, feet (metres): 178.6 x 26.2 x 8.9 (54.5 x 8 x 2.7)
Main machinery: 2 MTU 16V 538 TB93 diesels; 8,000 hp (m) (5.88 MW) sustained; 2 shafts
Speed, knots: 24. **Range, n miles:** 2,400 at 15 kt
Complement: 43 (8 officers)
Guns: 1 OTO Melara 76 mm/62 Compact; 85 rds/min to 16 km (8.7 n miles); weight of shell 6 kg
 2 Oerlikon/Royal Ordnance 20 mm GAM-BO1, 2 12.7 mm MGs.
Countermeasures: Decoys: Plessey Barricade chaff launcher
 ESM Thomson-CSF DR 3000; intercept
Weapons control: CelsiusTech 9LV 207 Mk 3 command system and optronic director.
Radars: Surface search Kelvin Hughes 1007 ARPA; I-band.
Programmes: Project Mawj order for three, with an option on five more, on 1 September 1993. The ships have had additional weapon systems fitted in Wudam dockyard.
Structure: Same hull design as the French P 400 class. 20 mm guns, and countermeasures were not fitted at Cherbourg and are planned to be installed in due course. 76 mm guns were fitted from 1998 from deleted Al Waafi class. The plan to fit torpedoes and sonars has been shelved.
Operational: First pair arrived in Oman on 28 September 1995, last one on 29 June 1996. Pennant numbers have been changed from B to Z.

AL MANSOOR

6/2003, Royal Navy of Oman / 0569798

578 Oman/Patrol forces—Training ships

4 SEEB (VOSPER 25) CLASS (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
SEEB	Z 20	Vosper Private, Singapore	15 Mar 1981
SHINAS	Z 21	Vosper Private, Singapore	15 Mar 1981
SADH	Z 22	Vosper Private, Singapore	15 Mar 1981
KHASSAB	Z 23	Vosper Private, Singapore	15 Mar 1981

Displacement, tons: 74 full load
Dimensions, feet (metres): 82.8 × 19 × 5.2 (25 × 5.8 × 1.6)
Main machinery: 2 MTU 12V 331 TCS2 diesels; 2,660 hp (m) (1.96 MW) sustained; 2 shafts
 1 Cummins N-855M diesel for slow cruising, 189 hp (141 kW) sustained; 1 shaft
Speed, knots: 25; 8 (Cummins diesel)
Range, n miles: 750 at 14 kt
Complement: 13
Guns: 1 Oerlikon 20 mm GAM-801, 2—7.62 mm MGs.
Radars: Surface search, Racal Decca 1226; I-band.

Comment: Arrived in Oman on 19 May 1981 having been ordered one month earlier. The craft were built on speculation and completed in 1980. Pennant numbers have been changed from B to Z.

SADH

10/2004 / 1151305

AMPHIBIOUS FORCES

Notes: There are also some French-built Havas Mk 8 two-man SDVs in service.

1 LANDING SHIP-LOGISTIC (LSTH)

Name	No	Builders	Commissioned
NASR AL BAHR	A 2	Brooke Marine, Lowestoft	6 Feb 1985

Displacement, tons: 2,500 full load
Dimensions, feet (metres): 305 × 50.8 × 8.5 (93 × 15.5 × 2.6)
Main machinery: 2 Paxman Valenta 18 CM diesels; 7,500 hp (5.6 MW) sustained; 2 shafts; cp props
Speed, knots: 12
Range, n miles: 5,500 at 15 kt
Complement: 104 (13 officers)
Military lift: 7 MBT or 400 tons cargo; 190 troops; 2 LCVPs
Guns: 2 Breda 40 mm/70 (1 twin), 2 Oerlikon 20 mm GAM-801, 2—12.7 mm MGs.
Countermasures: Decoys; Wallop Barricade double layer chaff launchers.
Weapons control: PEAB 9LV 107 GFCS and CSEE Lynx optical sight.
Radars: Surface search/navigation; 2 Racal Decca 1226; I-band.
Helicopters: Platform for Super Puma.

Comment: Ordered 18 May 1982. Launched 16 May 1984. Similar to Algerian LSLs. Carries one 16 ton crane. Bow and stern ramps. Full naval command facilities. The forward ramp is of two sections measuring length 59 ft (when extended) × 16.5 ft breadth (18 × 5 m), and the single section stern ramp measures 14 × 16.5 ft (4.3 × 5 m). Both hatches can support a 60 ton tank. The tank deck side bulkheads extend 7.5 ft (2.25 m) above the upper deck between the forecabin and the forward end of the superstructure, and provides two hatch openings to the tank deck below. Positioned between the hatches is a 2 ton crane with athwartship travel. New engine exhaust system and funnel fitted in 1987. Aft Oerlikon gun removed. Ship is also used as a ratings' training vessel. Pennant number has been changed from L to A.

NASR AL BAHR

2/2002, A Sharma / 0533304

1 LANDING CRAFT (LCT)

AL MUNASSIR A 1

Displacement, tons: 850 approx
Dimensions, feet (metres): 210 × 39.4 × 8.7 (64.0 × 12.0 × 2.7)
Main machinery: 2 Caterpillar 3508 diesels; 3,620 hp (2.7 MW); 2 shafts
Speed, knots: 11
Complement: 19 (plus 56 troops)
Military lift: Military vehicles

Comment: The Project Mahmal contract was placed with Abu Dhabi Ship Building on 13 March 2005. The vessel is likely to be similar to those delivered to the UAE in 2004. Details are speculative. The ship was launched on 17 May 2008 and sea trials had started by the end of 2008.

3 LCMs (LSTH)

Name	No	Builders	Commissioned
SABA AL BAHR	A 8 (ex-L 8)	Vosper Private, Singapore	17 Sep 1981
AL DOGHAS	A 9 (ex-L 9)	Vosper Private, Singapore	10 Jan 1983
ALTEMSAH	A 10 (ex-L 10)	Vosper Private, Singapore	12 Feb 1983

Displacement, tons: 230 full load
Dimensions, feet (metres): 108.2 (83.6, C 8) × 24.3 × 4.3 (33 (25.5) × 2.4 × 1.3)
Main machinery: 2 Caterpillar 3408TA diesels; 1,880 hp (1.4 MW) sustained; 2 shafts
Speed, knots: 8
Range, n miles: 1,400 at 8 kt
Complement: 11
Military lift: 100 tons
Radars: Navigation: Furuno 701; I-band

Comment: First one launched 30 June 1981. Second pair of similar but not identical ships, launched 12 November and 15 December 1982. Pennant numbers have been changed from L to A.

ALTEMSAH

6/2003, Royal Navy of Oman / 0567468

1 LCU (LSTH)

Name	No	Builders	Commissioned
AL NEEMRAN	A 7 (ex-L 7)	Lewis Offshore, Stornoway	1979

Measurement, tons: 85 dwt
Dimensions, feet (metres): 84 × 24 × 6 (25.6 × 7.4 × 1.8)
Main machinery: 2 diesels; 300 hp (220 kW); 2 shafts
Speed, knots: 7/8
Complement: 6
Radars: Navigation: Furuno; I-band.

Comment: Second of class deleted in 1993. Pennant number has been changed from L to A.

TRAINING SHIPS

1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Recommissioned
SHABAB OMAN (ex-Captain Scott)	S 1	Herd and Mackenzie, Buckie, Scotland	1979

Displacement, tons: 386 full load
Dimensions, feet (metres): 144.3 × 27.9 × 15.1 (44 × 8.5 × 4.6)
Main machinery: 2 Gardner diesels; 460 hp (343 kW); 2 shafts
Speed, knots: 10 (diesels)
Complement: 20 (5 officers) plus 3 officers and 24 trainees

Comment: Topsail schooner built in 1971 and taken over from Dulverton Trust in 1977 used for sail training. Name means Omani Youth.

SHABAB OMAN

8/2008, Frank Findler / 1353246

AUXILIARIES

Notes: (1) In addition to the listed vessels there are four 12 m Cheverton Work boats (W 41-44) and eight 8 m Work boats (W 4-11).

(2) The contract for five 52 m catamaran vessels was signed with Rodriguez Cantieri Navali on 8 April 2006. Three are to be used for transport and two for rescue. Delivery is expected to be completed in 2009.

1 SUPPLY SHIP (AKS)

Name	No	Builders	Launched	Commissioned
AL SULTANA	T 1 (ex-A 2, ex-S 2)	Conoship, Groningen	18 May 1975	4 June 1975

Measurement, tons: 1,380 dwt
Dimensions, feet (metres): 215.6 × 35 × 13.5 (65.7 × 10.7 × 4.2)
Main machinery: 1 Mirreles Blackstone diesel; 1,120 hp(m) (835 kW); 1 shaft
Speed, knots: 11
Complement: 20
Radars: Navigation Racal Decca TM 1226; I-band.

Comment: Major refit in 1992. Has a 1 ton crane. Pennant number changed in 1997 and again in 2002.

AL SULTANA 4/2002, Schaeffer/Marsan / 0533305

2 FAST TRANSPORT SHIPS (AP)

SHINAS HORMUZ

Measurement, tons: 146 dwt
Dimensions, feet (metres): 212.6 × 54.1 × 6.9 (64.8 × 16.5 × 2.1)
Main machinery: 4 MTU 20V 1163 TB73L diesels; 34,865 hp (26 MW); 4 Kamewa 90 waterjets
Speed, knots: 50 **Range, n miles:** 450 at 40 kt
Complement: 12
Military lift: 203 passengers and 56 vehicles including 64 lane-metres of trucks
Radars: Navigation.
Helicopters: Platform for one medium.

Comment: Contract signed with Austal Ships on 15 May 2006 for the construction of two multipurpose passenger/vehicle ferries. They are of a twin-hull catamaran design and of aluminium construction. The vessels act as intra-theatre sealift ships in an emergency and, at other times, they are used commercially as passenger ferries. The first vessel was launched on 27 September 2007; the second was delivered in July 2008. They are based around the Musandam Peninsula.

SHINAS 10/2007, Austal Ships / 12934/4

ROYAL YACHTS

Notes: The Royal Yacht Squadron of Oman is a distinct service that is not part of the Royal Navy of Oman. Based at Muscat, the squadron consists of three major units and a number of smaller craft.

1 ROYAL YACHT (YAC)

Name	No	Builders	Commissioned
AL SAID	-	Picchiotti SpA, Viareggio	July 1982

Displacement, tons: 3,800 full load
Dimensions, feet (metres): 340.5 × 62.4 × 15.4 (103.8 × 19.0 × 4.7)
Main machinery: 2 GMT A 420.6 H diesels; 8,400 hp(m) (6.17 MW); sustained; 2 shafts, cp props; bow thruster
Speed, knots: 18
Complement: 156 (16 officers)
Radars: Navigation; Decca TM 1226C; ACS 1230C; I-band.

Comment: Fitted with helicopter deck and fin stabilisers. Carries three Puma C service launches and one Rotork beach landing craft. A variety of small arms carried.

AL SAID 12/2005, Hartmut Ehlers / 116/444

1 SUPPORT SHIP (AKSH)

Name	No	Builders	Launched	Commissioned
FULK AL SALAMAH	-	Bremer-Vulkan	29 Aug 1986	3 Apr 1987

(ex-Ghubat Al Salamah)

Measurement, tons: 10,797 grt; 3,239 net
Dimensions, feet (metres): 447.5 × 68.9 × 19.7 (136.4 × 21 × 6)
Main machinery: 4 Fincantieri GMT A 420.6 H diesels; 16,800 hp(m) (12.35 MW) sustained; 2 shafts, cp props
Speed, knots: 19.5
Military lift: 240 troops
Radars: Navigation. 2 Racal Decca; I-band.
Helicopters: Up to 2 AS 332C Super Pumas.

Comment: Primary role is to support the Royal Yacht on deployments. Secondary roles include government, environmental and training duties. Reported to be fitted with Javelin air-defence missile system.

FULK AL SALAMAH 12/2005, Hartmut Ehlers / 1167445

1 ROYAL DHOW (YAC)

Name	No	Builders	Commissioned
ZINAT AL BIHAAR	-	-	1988

Displacement, tons: 510 light
Dimensions, feet (metres): 200.2 × 32.2 × 12.8 (61 × 9.8 × 3.9)
Main machinery: 2 Siemens motors, 965 hp (720 kW); 2 shafts
Speed, knots: 11.5

Comment: Three-masted wooden sailing vessel built in Oman on traditional lines.

ZINAT AL BIHAAR 4/2004, Derek Fox / 0589797

POLICE

Notes: (1) In addition to the vessels listed below there are several harbour craft including a Cheverton 8 m work boat *Zahra 24*, *Zahra 16* and a fireboat pennant number 10. There are also two P.1atus aircraft for SAR
 (2) 15 FPBs between 11 and 30 m may be ordered in due course. These could be for the Navy if it takes over Fishery Protection duties from the Police

ZAHRA 16 6/2003, Hartmut Ehlers / 0567471

3 CG 29 TYPE (COASTAL PATROL CRAFT) (PB)

HARAS 7 H 7

HARAS 9 H 9

HARAS 10 H 10

Displacement, tons: 84 full load
Dimensions, feet (metres): 94.8 × 17.7 × 4.3 (28.9 × 5.4 × 1.3)
Main machinery: 2 MTU 12V 331TC92 diesels; 2,660 hp(m) (1.96 MW) sustained; 2 shafts
Speed, knots: 25
Range, n miles: 600 at 15 kt
Complement: 13
Guns: 2 Oerlikon 20 mm GAM-BO1.
Radars: Navigation: Racal Decca 1226; I-band.

Comment: Built by Karlskrona Varvet. Commissioned in 1981–82. GRP Sandwich hulls.

HARAS 9

12/2000 / 0114776

1 + 2 FAST PATROL CRAFT (PBF)

Displacement, tons: 54 full load
Dimensions, feet (metres): 90.0 × 18.0 × 4.75 (27.4 × 5.5 × 1.5)
Main machinery: 2 MTU 12V 4000M 90 diesels; 5,470 hp (4.1 MW); 2 Kamewa 56SII waterjets
Speed, knots: 45
Range, n miles: 1,200 at 30 kt
Complement: 12 (2 officers)
Guns: 1—12.7 mm MG 2 7.62 mm MGs.
Radars: Navigation: I-band.

Comment: Order placed on 9 June 2005 with United States Marine, Gulfport, Mississippi, for three interception craft under the Foreign Military Sales programme. With a higher superstructure, the craft are a modified version of the US Mk V Pegasus class. The first boat was delivered in January 2008 and the contract includes a training and support package. Roles include anti-smuggling and anti-narcotics.

1 P 1903 TYPE (COASTAL PATROL CRAFT) (PB)

HARAS 8 H 8

Displacement, tons: 32 full load
Dimensions, feet (metres): 63 × 16.7 × 5.2 (19.2 × 4.8 × 1.6)
Main machinery: 2 MTU 8V 331TC92 diesels; 1,770 hp(m) (1.3 MW); 2 shafts
Speed, knots: 30
Range, n miles: 1,650 at 17 kt
Complement: 10
Guns: 2—12.7 mm MGs.
Radars: Navigation: Racal Decca 1226; I-band.

Comment: Built by Le Comte, Netherlands. Commissioned August 1981. Type 1903 Mk III.

HARAS 8

10/1992, Hartmut Ehlers / 0506067

1 CG 27 TYPE (COASTAL PATROL CRAFT) (PB)

HARAS 6 H 6

Displacement, tons: 53 full load
Dimensions, feet (metres): 78.7 × 18 × 6.2 (24 × 5.5 × 1.9)
Main machinery: 2 MTU 12V 331TC92 diesels; 2,660 hp(m) (1.96 MW) sustained; 2 shafts
Speed, knots: 25
Complement: 11
Guns: 1 Oerlikon 20 mm GAM-BO1
Radars: Navigation: Furuno 701; I-band.

Comment: Completed in 1980 by Karlskrona Varvet. GRP hull.

HARAS 6

10/1992, Hartmut Ehlers / 0506068

14 RODMAN 58 CLASS (PB)

HARAS 21–34

Displacement, tons: 19 full load
Dimensions, feet (metres): 59.0 × 16.0 × 3.9 (18.0 × 4.9 × 1.2)
Main machinery: 2 diesels, 2,000 hp (1.49 MW); 2 waterjets
Speed, knots: 34. **Range, n miles:** 450 at 17 kt
Complement: 5
Radars: Navigation: I-band

Comment: GRP hull. Built in 2002–03 by Rodman, Vigo.

HARAS 25

3/2007, Marco Ghiglino / 1170202

1 P 2000 TYPE (COASTAL PATROL CRAFT) (PB)

DHEEB AL BAHAR 1 2 1

Displacement, tons: 80 full load
Dimensions, feet (metres): 68.2 × 19 × 5 (20.8 × 5.8 × 1.5)
Main machinery: 2 MTU 12V 396TB93 diesels; 3,260 hp(m) (2.4 MW) sustained; 2 shafts
Speed, knots: 40
Range, n miles: 423 at 38 kt; 700 at 18 kt
Guns: 1—12.7 mm MG
Radars: Surface search: Furuno 701; I-band.

Comment: Delivered January 1985 by Watercraft Ltd, Shoreham, UK. GRP hull. Similar to UK Archer class. Carries SATNAV.

DHEEB AL BAHAR 1

6/2003, Hartmut Ehlers / 0589794

2 D 59116 TYPE (COASTAL PATROL CRAFT) (PB)**DHEEB AL BAHAR 2 Z 2****DHEEB AL BAHAR 3 Z 3**

Displacement, tons: 65 full load
Dimensions, feet (metres): 75.5 x 17.1 x 3.9 (23 x 5.2 x 1.2)
Main machinery: 2 MTU 12V 396 TB93 diesels; 3,260 hp(m) (2.4 MW) sustained; 2 shafts
Speed, knots: 36
Range, n miles: 420 at 30 kt
Complement: 11
Guns: 1 – 12.7 mm MG
Radars: Surface search: Furuno 711-2; Furuno 2400; I-band.

Comment: Built by Yokohama Yacht Co, Japan. Commissioned in 1988

**DHEEB AL BAHAR 3**

6/2003, Hartmut Ehlers / 056/470

5 INSHORE PATROL CRAFT (PBI)**ZAHRA 14 Z 14 ZAHRA 15 Z 15 ZAHRA 17 Z 17 ZAHRA 18 Z 18 ZAHRA 21 Z 21**

Displacement, tons: 16; 18 (Zahra 18 and 21) full load
Dimensions, feet (metres): 45.6 x 14.1 x 4.6 (13.9 x 4.3 x 1.4)
 52.5 x 13.8 x 7.5 (16 x 4.2 x 2.3) (Zahra 18 and 21)
Main machinery: 2 Cummins VTA-903M diesels, 643 hp (480 kW); 2 shafts
Speed, knots: 36
Range, n miles: 510 at 22 kt
Complement: 5-6
Guns: 1 or 2 - 7.62 mm MGs.
Radars: Navigation: Decca 101, I-band.

Comment: Zahra 14, 15 and 17 built by Watercraft, Shoreham, UK and completed in 1981. Zahra 21 completed by Emsworth SB in 1987 to a slightly different design. Zahra 18 built by Lecomte in 1987.

**ZAHRA 17 (alongside Zahra 14)**

6/2003, Hartmut Ehlers / 056/472

12 SEASPRAY ASSAULT BOATS (PB)

Displacement, tons: To be announced
Dimensions, feet (metres): 31.2 x 10.2 x 1.6 (9.5 x 3.1 x 0.5)
Main machinery: 2 outboards; 500 hp (375 kW)
Speed, knots: 50
Range, n miles: 450 at 17 kt
Complement: 5
Radars: Navigation: I-band.

Comment: Abu Dhabi Ship Building awarded contract in January 2004. Designed by SeaSpray Aluminium Boats. To be employed in policing, patrol and interception roles by the navy and police.

1 DIVING CRAFT (YDT)**SABHUR 7 (ex-Zahra 27)**

Displacement, tons: 13 full load
Dimensions, feet (metres): 59 x 12.4 x 3.6 (18 x 3.8 x 1.1)
Main machinery: 2 Volvo Penta AQD70D diesels; 430 hp(m) (316 kW) sustained; 2 shafts
Speed, knots: 20
Complement: 4
Guns: 2 – 7.62 mm MGs.

Comment: Rotork Type, the last of several logistic support craft, delivered in 1981 and now used as a diving boat. Similar craft used by the Navy.

**SABHUR 7**

12/2006, Hartmut Ehlers / 1167446

5 VOSPER 75 ft TYPE (COASTAL PATROL CRAFT) (PB)**HARAS 1-5 H 1 HARAS 2 H 2 HARAS 3 H 3 HARAS 4 H 4 HARAS 5 H 5**

Displacement, tons: 50 full load
Dimensions, feet (metres): 75 x 20 x 5.9 (22.9 x 6.1 x 1.8)
Main machinery: 2 Caterpillar D 348 diesels; 1,460 hp (1.08 MW) sustained; 2 shafts
Speed, knots: 24.5
Range, n miles: 1,000 at 11 kt
Complement: 11
Guns: 1 Oerlikon 20 mm GAM-BO1.
Radars: Navigation: Decca 101; I-band.

Comment: First four completed 22 December 1975 by Vosper Thornycroft. GRP hulls. Haras 5 commissioned November 1978.

**HARAS 3**

3/2004, Bob Fildea / 058979F

20 HALMATIC COUGAR ENFORCER 33 (FAST PATROL CRAFT) (PBF)

Displacement, tons: 5.4 full load
Dimensions, feet (metres): 35.7 x 9.3 x 2.5 (10.88 x 2.84 x 0.75)
Main machinery: 2 Yanmar diesels; 2 Hamilton waterjets
Speed, knots: 45
Range, n miles: 120 at 45 kt

Comment: Based on Cougar 33 deep Vee hull form, first batch of five craft supplied by Halmatic in March 2003 with further 15 delivered by late 2003. Deployed in coastal patrol and interception role.

**ENFORCER 33**

3/2007, Marco Ghiglino / 1171701

Pakistan

Country Overview

The Islamic Republic of Pakistan gained independence in 1947. Situated in south Asia, it has an area of 307,293 square miles and is bordered to the west by Iran, to the north by Afghanistan and to the south by India. It has a 567 n mile coastline with the Arabian Sea. The former province of East Pakistan seceded in 1971 and assumed the name Bangladesh. The status of Jammu and Kashmir is disputed with India. The capital is Islamabad while Karachi is the largest city and principal port. There is a further port at Muhammad bin Qasim. Territorial waters (12 n miles) are claimed. A 200 n mile EEZ has been claimed but the limits have not been defined.

Headquarters Appointments

Chief of the Naval Staff:
Admiral Noman Bashir, HI (M)
Vice Chief of Naval Staff:
Vice Admiral Asaf Humayun, HI (M)
Deputy Chief of Naval Staff (Operations):
Rear Admiral Tanveer Faiz, SI (M)

Senior Appointments

Commander Pakistan Fleet:
Rear Admiral Mohammad Asif Sandila, SI (M)
Commander Karachi:
Vice Admiral Saleem Ahmad Meanai, HI (M)
Commander Coastal Area:
Rear Admiral Muhammad Shafi, SI (M)
Commander Logistics:
Rear Admiral Bakhtiar Mohsin, HI (M)
Commander North Navy:
Commodore Syed Hassan Mustafa, SI (M)
Director General Maritime Security Agency:
Rear Admiral Azher Shamim Anwar, SI (M)

Diplomatic Representation

Naval Adviser in London:
Commodore Asif Saleem
Naval Attaché in Qatar:
Commodore Kalim Shaukat
Naval Attaché in Kuala Lumpur:
Commodore Ayaz Ahmed Nasir
Naval Attaché in Paris:
Captain Asif Khaliq
Naval Attaché in Tehran:
Captain Moazzam Ilyas
Naval Attaché in New Delhi:
Captain Javid Iqbal
Naval Attaché in Washington:
Captain Muhammad Fayyaz Gilani
Naval Adviser in New Delhi:
Captain Javid Iqbal
Naval Attaché in Bonn:
Captain Muhammad Shafiq
Naval Attaché in Beijing:
Captain Mirza Foad Amin Baig
Defence Attache in Muscat:
Captain Shahid Sohail Rao

Personnel

(a) 2009: 25,100 (2,980 officers) including 1,200 Marines and 1,000 (36 officers) seconded to the MSA
(b) Voluntary service
(c) Reserves 5,000

Bases

PNS *Haider* (Naval HQ); PNS *Akram* (Gwadar Naval Base); PNS *Iqbal* (Commando Base); PNS *Mehran* (Karachi Naval Air Station); PNS *Qasim* (Marines HQ/Base), Jinnah Naval Base (Port Ormora)

Prefix to Ships' Names

PNS

Maritime Security Agency

Set up in 1986. Main purpose is to patrol the EEZ in co-operation with the Navy and the Army-manned Coast Guard

Marines

A Marine Commando Unit was formed at PNS *Iqbal*, Karachi in 1981.

SUBMARINES

Notes: A competition for the acquisition of three new diesel-electric submarines was launched in 2006. AI-independent propulsion is a requirement and principal contenders are reported to include the French (DCN) Scorpene class and Germany's (HDW) Type 214. The submarines are expected to be built in Pakistan.

2 HASHMAT (AGOSTA 70) CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
HASHMAT (ex-Astrant)	S 135	Dubigeon Normandie, Nantes	15 Sep 1976	14 Dec 1977	17 Feb 1979
HURMAT (ex-Adventurous)	S 136	Dubigeon Normandie, Nantes	18 Sep 1977	1 Dec 1978	18 Feb 1980

Displacement, tons: 1,490 surfaced; 1,740 dived
Dimensions, feet (metres): 221.7 × 22.3 × 17.7
(67.6 × 6.8 × 5.4)

Main machinery: Diesel-electric; 2 SEMT-Pielstick 16 PA4 V 185 VG diesels; 3,600 hp(m) (2.65 MW); 2 Jeumont Schneider alternators; 1.7 MW; 1 motor; 4,600 hp(m) (3.4 MW); 1 cruising motor; 32 hp(m) (23 kW); 1 shaft
Speed, knots: 12 surfaced; 20 dived
Range, n miles: 8,500 at 9 kt snorting; 350 at 3.5 kt dived
Complement: 59 (8 officers)

Missiles: SSM McDonnell Douglas Sub Harpoon; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.

Torpedoes: 4—21 in (533 mm) bow tubes ECAN F17P; wire-guided; active/passive homing to 20 km (10.8 n miles) at 40 kt; warhead 250 kg; water ram discharge gear. E14, E15 and L3 torpedoes are also available. Total of 20 torpedoes and missiles.

Mines, Stonefish.

Countermeasures: ESM: DR-3000, intercept and warning
Radars: Surface search: Thomson-CSF DRUA 33; I-band
Sonars: Thomson Sintra TSM 2233D, passive search; medium frequency.
Thomson Sintra DUUA 2B; active/passive search and attack; 8 kHz active.
Thomson Sintra TSM 2933D towed array; passive; very low frequency

Programmes: Purchased from France in mid-1978 after United Nations' ban on arms sales to South Africa. *Hashmat* arrived Karachi 31 October 1979, *Hurmat* arrived 11 August 1980

Structure: Diving depth, 300 m (985 ft). Both were modified to fire Harpoon in 1985 but may have had to acquire the missiles through a third party
Operational: Assigned to 5th Submarine Squadron.

HURMAT

3/2000, Michael Nitz / 1305311

3 KHALID (AGOSTA 90B) CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
KHALID	S 137	DCN, Cherbourg	15 July 1998	18 Dec 1998	6 Sep 1999
SAAD	S 138	DCN, Cherbourg/PN Dockyard, Karachi	2 Dec 1999	24 Aug 2002	12 Dec 2003
HAMZA	S 139	Karachi Shipyard and Engineering Works	2000	10 Aug 2006	26 Sep 2008

Displacement, tons: 1,510 surfaced; 1,760 dived (1,980 with MESMA)

Dimensions, feet (metres): 221.7; 250.0 (S 139) × 22.3 × 17.7 (67.6; 76.2 (S 139) × 6.8 × 5.4)

Main machinery: Diesel-electric; 2 SEMT-Pielstick 16 PA4 V 185 VG diesels; 3,600 hp(m) (2.65 MW); 2 Jeumont Schneider alternators; 1.7 MW; 1 Jeumont motor; 2,992 hp(m) (2.2 MW); 1 cruising motor; 32 hp(m) (23 kW); 1 shaft

Speed, knots: 12 surfaced; 20 dived

Range, n miles: 8,500 at 9 kt snorting, 350 at 3.5 kt dived

Complement: 36 (7 officers)

Missiles: SSM: 4 Aerospatiale Exocet SM 39; inertial cruise; active radar homing to 50 km (27 n miles) at 0.9 Mach; warhead 165 kg

Torpedoes: 4–21 in (533 mm) bow tubes. 16 ECAN F17P Mod 2; wire-guided; active/passive homing to 20 km (10.8 n miles) at 40 kt; warhead 250 kg. Total of 20 weapons

Mines: Stonefish

Countermeasures: ESM. Thomson-CSF DR-3000U; intercept

Weapons control: Thomson Sintra SUBTICS Mk 2.

Radars: Surface search: KH 1007; I-band.

Sonars: Thomson Sintra TSM 2233 suite; bow cylindrical, passive ranging and intercept, and clip-on towed arrays.

Programmes: A provisional order for a second batch of three more Agostas was reported in September 1992 and this was confirmed on 21 September 1994. First one built

SAAD

9/2003, DCN / 1567934

in France. Parts for S 138 sent to Pakistan in April 1998 and for S 139 in September 1998.

Structure: The last of the class has a 200 kW MESMA liquid oxygen AIP system, thereby extending the hull by 8.6 m. The MESMA AIP system has a power output of 200 kW which quadruples dived performance at 4 kt. The MESMA system is to be retrofitted in S 137 and S 138 during their next major refits from about 2012.

Hulls also have much improved acoustic quietening and a full integrated sonar suite including flank, intercept and towed arrays SOPOLEM J 95 search and STS 95 attack periscopes. Sagem Integrated navigation system HLES 80 steel Diving depth of 320 m (1,050 ft).

Operational: Khalid completed 29 April 1999 and sailed for Pakistan in November 1999. Assigned to 5th Submarine Squadron.

HAMZA

8/2006, DCN / 1154888

3 MIDGET SUBMARINES (SSW)

X 01–X 03

Displacement, tons: 118 dived

Dimensions, feet (metres): 91.2 × 18.4 (27.8 × 5.6)

Speed, knots: 7 dived

Range, n miles: 2,200 surfaced; 60 dived

Complement: 8 + 8 swimmers

Torpedoes: 2–21 in (533 mm) tubes; 2 ALCATEL E 14/E 15; active homing to 12 km (6.5 n miles) at 25 kt; passive homing to 28 km (15 n miles) at 23 kt; warhead 300 kg

plus either two short range active/passive homing torpedoes or two SDVs.

Mines: 12 Mk 414 Limpet type

Sonars: Hull mounted; active/passive; high frequency.

Comment: MG 110 type built in Pakistan under supervision by Cosmos. These are enlarged SX 756 of Italian Cosmos design. Diving depth of 150 m and can carry eight

swimmers with 2 tons of explosives as well as two CF2 FX 80 SDVs (swimmer delivery vehicles). Pilkington Optronics CK 39 periscopes. Reported as having a range of 1,000 n miles and an endurance of 20 days. All have been upgraded since 1995 with improved sensors and weapons. However, reports that X 01 has been equipped with Harpoon are not considered likely. All are active.

X 03

5/2003 / 1156926

FRIGATES

Notes: Procurement of second-hand frigates is under consideration

6TARIQ (AMAZON) CLASS (TYPE 21) (FFHM/FFGH)

Name	No	Builders	Laid down	Launched	Commissioned	Recommissioned
TARIQ (ex-Ambuscade)	D 181 (ex-F 172)	Yarrow Shipbuilders, Glasgow	1 Sep 1971	18 Jan 1973	5 Sep 1975	28 July 1993

SHAHJAHAN (ex-Active)	D 186 (ex-F 171)	Vosper Thornycroft, Woolston	23 July 1971	23 Nov 1972	17 June 1977	23 Sep 1994

Displacement, tons: 3,100 standard; 3,700 full load
Dimensions, feet (metres): 384 oa; 360 wl x 41.7 x 19.5 (screws) (117; 109.7 x 12.7 x 5.9)
Main machinery: COGOG, 2 RR Olympus TM3B gas turbines; 50,000 hp (37.3 MW) sustained; 2 RR Tyne RM1C gas turbines (cruising); 9,900 hp (7.4 MW) sustained; 2 shafts, cp props
Speed, knots: 30; 18 on Tynes
Range, n miles: 4,000 at 17 kt; 1,200 at 30 kt
Complement: 221 (23 officers) (accommodation for 192)

Missiles: SSM: 4 McDonnell Douglas Harpoon 1C fitted in D 186, D 184 and D 182
SAM: China LY 60N sextuple launchers semi-active radar homing to 13 km (7 n miles) at 2.5 Mach; warhead 33 kg (D 185, D 181 and D 183).
Guns: 1 Vickers 4.5 in (114 mm)/55 Mk 8; 25 rds/min to 22 km (11.9 n miles) anti-surface; 6 km (3.3 n miles) anti-aircraft, weight of shell 21 kg.
 Hughes 20 mm Vulcan Phalanx Mk 15; 3,000 rds/min to 1.5 km (D 181, D 183, D 184 and D 186)
 2 MSI DS 30B 30 mm/75; D 182, D 185 and D 186.
 4-12.7 mm MGs

Torpedoes: 6-324 mm Plessey STWS Mk 2 (2 triple) tubes (D 184 and D 186); others fitted with 2 Bofors Type 43X2 single launchers for Swedish Type 45 torpedoes.

Countermeasures: Decoys: Graseby Type 182; towed torpedo decoy
 2 Rheinmetall MASS launchers (D 181-186) Mk 36 SRBOC (D 181 and D 182)
 ESM: Thomson-CSF DR 3000S; intercept.

Combat data systems: CAAIS combat data system with Ferranti FM 1600B computers (D 186 and D 184) CelsiusTech 9LV Mk 3 including LinkY (in remainder).

Weapons control: Ferranti WSA-4 digital fire-control system. CSEE Najir Mk 2 optronic director (D 182, D 185 and D 186).

Radars: Air/surface search: Marconi Type 992R; E/F-band (D 182, D 184 and D 186). Signaal DA08; F-band (D 181, D 183 and D 185).

Surface search: Kelvin Hughes Type 1007 or Type 1006 (D 184 and D 186), I-band.

Fire control: 1 Selonia Type 912 (RTN 10X); I/J-band (D 182, D 184 and D 186)
 1 China LZ-1 (for LY 60N); I/J-band (D 185, D 181 and D 183).

SHAHJAHAN

(Scale 1 : 1,200), Ian Sturton / C114/84

TIPPU SULTAN

(Scale 1 : 1,200), Ian Sturton / 1133556

Sonars: Graseby Type 184P; hull-mounted; active search and attack; medium frequency Kelvin Hughes Type 162M, hull-mounted; bottom classification; 50 kHz
Helicopters: 1 Alouette III

Programmes: Acquired from the UK in 1983-94. *Tariq* arrived in Karachi 1 November 1993 and the last pair in January 1995. These ships replaced the Garcia and Brooke classes and have been classified as destroyers

Modernisation: Exocet, torpedo tubes and Lynx helicopter facilities were all added in RN service, but torpedo tubes were subsequently removed in all but *Badr* and *Shahjahan* and all retrofitted by Pakistan using Swedish equipment. Exocet was not transferred and the obsolete Seacat SAM system was replaced by Phalanx taken from the Gearings. Chinese LY 60N, which is a copy of *Aspide*, has been fitted in three of the class, Harpoon in three

others. New EW equipment has been installed. There are still plans to update the hull sonars but there is no evidence that ATAS sonar has been fitted in D 183 and D 185 as previously reported. Other equipment upgrades include a DA08 search radar in three of the class, an optronic director, new 30 mm and 20 mm guns, SRBOC chaff launchers. An improved combat data system with a datalink to shore HQ is also fitted in four of the class.

Structure: Due to cracking in the upper deck structure large strengthening pieces have been fixed to the ships' side at the top of the steel hull as shown in the illustration. The addition of permanent ballast to improve stability has increased displacement by about 350 tons. Further hull modifications to reduce noise and vibration started in 1988 and completed in all of the class by 1992

Operational: Form 25th Destroyer Squadron.

-	-	Karachi Shipyard and Engineering Works	2009	2011	2013

Displacement, tons: 2,250 full load
Dimensions, feet (metres): 403.6 x 45.9 x 7
 (129.0 x 14.0 x 7)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 27
Range, n miles: 4,000 at 18 kt
Complement: 170

Missiles: SSM: 8 C-802 (YJ-83/CSS-N-8 Saccade) ●; mid-course guidance and active radar homing to 150 km (81 n miles) at 0.9 Mach; warhead 165 kg; sea skimmer.
SAM: 1 HQ-7 (Crotale) octuple launcher CSA-N-4 ●; line of sight guidance to 13 km (7 n miles) at 2.4 Mach; warhead 14 kg.

Guns: 1–3 in (76 mm) AK 176M ●.
 2–30 mm Type 730 ●; 7 barrels per mounting; 4,200 rds/min combined to 15 km.

Torpedoes: 5–324 mm (2 triple) tubes.
Countermeasures: Decoys/ESM/ECM. To be announced
Combat data systems: To be announced

Weapons control: Optronic director to be announced

Radars: Air search: Type 517 Knife Rest ●; A-band.

Air/surface search: Type 363 Seagull S ●; E/F-band.

Fire control: Type 343G ●; I-band (for SSM and 76 mm gun).

Type 347G(2) ●; I-band for Type 730.
 Type 345 (MR 35) ●; I/J-band (for SAM).

Navigation: To be announced.

Sonars: Atlas Elektronik DSQS-238Z; hull-mounted, active search and attack; medium frequency.

Helicopters: 1 Harbin Zhi-9C Haitun ●

Programmes: A contract to procure four frigates from China was signed on 4 April 2005. The ships, three of which are to be built in Shanghai and the fourth at Karachi, look to be based on the Type 054 Jiangkai class in service in the PLA(N). Technology transfer is a key element of the deal and the contract includes the upgrade of KSEW Shipyard, training and technical assistance. Steel was first cut for the first of class on 12 October 2006. Details of weapons and sensors are indicative and are based on the Jiangwei II class in PLA(N) service. A second batch of ships may be ordered.

ZULFIQUAR

(Scale 1 : 900), Ian Sturton / 1353748

ZULFIQUAR

12/2008* / 1353250

SHIPBORNE AIRCRAFT

Numbers/Type: 6 Westland Sea King Mk 45/45A.

Operational speed: 125 kt (232 km/h).

Service ceiling: 10,500 ft (3,200 m).

Range: 630 n miles (1,165 km).

Role/Weapon systems: Sensors: ARI 5955 search radar, Marconi Type 2069 dipping sonar, Star SAFIRE FLIR, AQS-928G acoustic processors. Weapons: ASW; two Mk 46 torpedoes; Mk 11 depth charges. ASV; one AM 39 Exocet missile.

SEA KING

6/2007, Hechiro Nakai / 1186819

Numbers/Type: 4/10 Aerospatiale SA 316 Alouette III/SA 319B Alouette III.

Operational speed: 113 kt (210 km/h).

Service ceiling: 10,660 ft (3,250 m).

Range: 270 n miles (500 km).

Role/Weapon systems: Reconnaissance helicopter. Two SA 319B procured in mid-1970s and fitted with radar and MAD. Eight further SA 319B (eight ex-French Air Force) purchased in 2005 for delivery in 2008 after refurbishment. Four SA 316 acquired in 1994. Sensors: Weather/search radar and MAD (in two SA 319B). Weapons: ASW: Mk 11 depth charges, and MG1 A3 gun

ALOUETTE III

6/2003, Pakistan Navy / 0569234

Numbers/Type: 6 Hai Z-9EC.

Operational speed: 140 kt (260 km/h).

Service ceiling: 15,000 ft (4,572 m)

Range: 200 n miles (370 km).

Role/Weapon systems: ASW helicopter procured in conjunction with Zulfiqar class frigate programme. Chinese design based on Dauphin 2. Sensors: KLC-1 radar; ESM; DSE Sonar. Weapons: up to four ET-52C torpedoes.

LAND-BASED MARITIME AIRCRAFT

Notes: The Maritime Security Agency operates three Britten-Norman Maritime Defenders. with Bendix RDR 1400C radars

DEFENDER

8/1996, MSA / 0081375

Numbers/Type: 10 Lockheed P-3C Orion (Update II).

Operational speed: 410 kt (760 km/h).

Service ceiling: 28,300 ft (8,625 m).

Range: 4,000 n miles (7,410 km).

Role/Weapon systems: Order of first two completed in 1991 but held up by the Pressler amendment, until delivery in December 1996. May be used for Elint. Eight further aircraft donated by the United States in September 2005. The first two, delivered in early 2007, are to have an avionics upgrade at a later date. The remaining six are to be upgraded before delivery. Sensors: APS-115 search radar; up to 100 sonobuoys, ASQ 81 MAD; ESM Weapons: four Whitehead A 244 torpedoes or Mk 11 depth charges for ASW; Harpoon.

P-3C

6/2001, Pakistan Navy / 0114/83

Numbers/Type: 6 Fokker F27-200
Operational speed: 250 kt (463 km/h)
Service ceiling: 29,500 ft (8,990 m)
Range: 2,700 n miles (5,000 km)

Role/Weapon systems: Acquired in 1994–96 for maritime surveillance and limited ASW. One further aircraft acquired in 2007. Sensors: OM 100 radar, Thomson-CSF DR 3000A ESM. Star SAFIRE FLIR. Weapons: Mk II depth charge.

FOKKER F27-200

6/2001, Pakistan Navy / 0114780

Numbers/Type: 2 Breguet Atlantic 1.
Operational speed: 355 kt (658 km/h)
Service ceiling: 32,800 ft (10,000 m)
Range: 4,855 n miles (8,995 km)

Role/Weapon systems: Long-range MR/ASW cover for Arabian Sea, ex-French and Dutch stock. Upgraded in 1992–93. Three more acquired in 1994 for spares. Sensors: Thomson-CSF Ocean Master radar, Thomson-CSF DR 3000A ESM, MAD, sonobuoys, Sadang 1C sonobuoy signal processor. Weapons: ASW, nine Mk 46 torpedoes, Mk 11 depth bombs, mines. ASW: AM 39 Exocet missiles.

ATLANTIC 1

6/2001, Pakistan Navy / 0114781

Numbers/Type: 12 AMD-BA Mirage III.
Operational speed: 750 kt (1,390 km/h)
Service ceiling: 59,055 ft (18,000 m)
Range: 740 n miles (1,370 km)

Role/Weapon systems: Operated by the Air Force, and all can be used for maritime strike. Sensors: Thomson-CSF radar. Weapons: ASW, two AM 39 Exocet or Harpoon; two 30 mm DEFA.

MIRAGE III

6/2004, Pakistan Navy / 1044171

Numbers/Type: 5 Saab 2000 AEW
Operational speed: 250 kt (463 km/h)
Service ceiling: 25,000 ft (7,620 m)
Range: 570 n miles (1,056 km)

Role/Weapon systems: Air Force operated early warning aircraft. Modified version of Saab 340B special mission aircraft derived from regional transport aircraft. Dorsal-mounted main radar. First aircraft rolled out in mid-June 2008 for delivery in 2009. Sensors: Ericsson Erieye radar, ESM, ECM.

SAAB 2000 AEW

5/2008*, Saab / 1330714

PATROL FORCES

Notes: Eight Mekat type catamarans ordered in late 1997. These may be operated by the Customs

2 JALALAT CLASS (FAST ATTACK CRAFT—MISSILE) (PTG)

Name	No	Builders	Launched	Commissioned
JALALAT	1029 (ex-1022)	PN Dockyard, Karachi	16 Nov 1996	14 Aug 1997
SHUJAAT	1030	PN Dockyard, Karachi	26 Mar 1999	30 Sep 1999

Displacement, tons: 185 full load
Dimensions, feet (metres): 128 × 22 × 5.4 (39 × 6.7 × 1.64)
Main machinery: 2 MTU diesels; 5,984 hp(m) (4.4 MW) sustained; 2 shafts
Speed, knots: 23. **Range, n miles:** 2,000 at 17 kt
Complement: 31 (3 officers)
Missiles: SSM: 4 China C 802 Saccade (2 twin); active radar homing to 120 km (66 n miles) at 0.9 Mach; warhead 165 kg; sea skimmer.
Guns: 2–37 mm/63 (twin); 180 rds/min to 8.5 km (4.6 n miles); weight of shell 1.42 kg
Countermeasures: Decoys: chaff launcher.
ESM: Thales DR 3000
Radars: Surface search: Kelvin Hughes Type 756; I-band.
Fire control: Type 47G (for gun); Type TR 47G A/R (for SSM); I-band.

Comment: Designed with Chinese assistance to replace deleted Hegu class. Same hull as Larkana

JALALAT

3/2007 / 1170017

2 JURRAT CLASS (FAST ATTACK CRAFT—MISSILE) (PTG)

Name	No	Builders	Launched	Commissioned
JURRAT	1023	Karachi Shipyards and Engineering Works	9 Sep 2004	24 Feb 2006
QUWWAT	1028	Karachi Shipyards and Engineering Works	13 Sep 2004	24 Feb 2006

Displacement, tons: 225 standard, 250 full load
Dimensions, feet (metres): 127.4 × 26.2 × 4.9 (38.85 × 8.0 × 1.85)
Main machinery: 3 MTU 16V 4000 M70; 3 shafts; ducted propellers
Speed, knots: 32. **Range, n miles:** 1,700 at 15 kt
Complement: 35 (3 officers)
Missiles: SSM: 4 China C 802 Saccade (2 twin); active radar homing to 120 km (68 n miles) at 0.9 Mach; warhead 165 kg; sea skimmer.
Guns: 2–25 mm (twin).
Countermeasures: Decoys: chaff launcher.
ESM: RW-28 CB, warning receiver.
Radars: Surface search: Type SR 47A; I-band.
Fire control: Type 47G (for gun); Type TR 47G A/R (for SSM); I-band.

Comment: Both ordered in September 2002 and laid down 4 April 2003. Built at KSEW, reportedly in co-operation with Thai company Marsun. Steel hull and aluminium superstructure.

JURRAT

3/2008*, Michael Nitz / 1305312

1 TOWN CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
RAJSHAHI	P 140	Brooke Marine	1965

Displacement, tons: 115 standard; 143 full load
Dimensions, feet (metres): 107 × 20 × 6.9 (32.6 × 6.1 × 2.1)
Main machinery: 2 MTU 12V 538 diesels; 3,400 hp(m) (2.5 MW); 2 shafts
Speed, knots: 24
Complement: 19
Guns: 2 Bofors 40 mm/60. 2–12.7 mm MGs.
Radars: Surface search: Pot Head, I-band.

Comment: The last survivor in Pakistan of a class of four built by Brooke Marine in 1965. Steel hull and aluminium superstructure. Assigned to 10th Patrol Squadron.

RAJSHAHI

6/2003, Pakistan Navy / 0569233

1 LARKANA CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
LARKANA	P 157	PN Dockyard, Karachi	6 June 1994

Displacement, tons: 180 full load
Dimensions, feet (metres): 128 x 22 x 5.4 (39 x 6.7 x 1.7)
Main machinery: 2 MTU diesels; 5,984 hp(m) (4.4 MW) sustained; 2 shafts
Speed, knots: 23. **Range, n miles:** 2,000 at 17 kt
Complement: 25 (3 officers)
Guns: 2 Type 78A 37 mm/63 (twin), 4—25 mm/60 (2 twin).
Depth charges: 2 Mk 64 launchers.
Radars: Surface search: Kelvin Hughes Type 756; I-band

Comment: Ordered in 1991 and started building in October 1992. Has replaced the last of the Hainan class. The missile version on the same hull has taken priority but more may be built. Assigned to 10th Patrol Squadron.

LARKANA 8/2004 / 113352

4 GRIFFON 2000 TDX(M) (HOVERCRAFT) (UCAC)

Displacement, tons: 7.5 full load
Dimensions, feet (metres): 39.0 x 20.0 (11.9 x 6.1)
Main machinery: 1 Deutz BF8L513 diesel; 355 hp (265 kW) sustained
Speed, knots: 35. **Range, n miles:** 300 at 25 kt
Complement: 2
Military lift: 25 troops or 2 tons
Guns: 2—12.7 mm MGs.
Radars: Navigation: I-band.

Comment: Acquired from Griffon, UK. First craft delivered in April 2004 and the last in July 2005. The first two are of a modular design to enable rapid role-change. The second two have fixed roofs.

GRIFFON 2000 6/2005, Griffon Hovercraft / 1163507

2 KAAAN 15 (FAST INTERVENTION CRAFT) (PBF)

P 01 P 02

Displacement, tons: 19 full load
Dimensions, feet (metres): 54.8 x 13.2 x 3.9 (16.7 x 4.04 x 1.2)
Main machinery: 2 MTU 12V 183 TE93 diesels; 2,300 hp(m) (1.69 MW); 2 Ameson ASD 12 B1L surface drives
Speed, knots: 54. **Range, n miles:** 350 at 35 kt
Complement: 4 plus 8 mission crew
Guns: 2—12.7 mm MGs.

Comment: Built by Yonca Shipyard, Turkey. Advanced composites structure. The first delivered on 17 August 2004 and the second on 14 October 2004. To be operated by Special Services Group based at PNS Iqbar. Details based on those in Turkish Coast Guard service

P 01 7/2004, Selçuk Emre / 1044173

2 KAAAN 33 (FAST ATTACK CRAFT) (PGGF)

ZARRAR P 03 KARRAR P 04

Displacement, tons: 120 full load
Dimensions, feet (metres): 116.8 x 22.0 x 4.7 (35.6 x 6.7 x 1.4)
Main machinery: CODAG: 1 Honeywell TF50 gas turbine; 2 MTU 12V 4000 M90 diesels; 7,396 hp(m) (5.44 MW); 3 MJP 650/750 waterjets
Speed, knots: 65 (28 on diesels). **Range, n miles:** 970 at 15 kt
Complement: 18 (2 officers)
Missiles: SSM: 4 McDonnell Douglas Harpoon Block 2; active radar homing to 130 km (70 n miles) at 0.9 Mach, warhead 227 kg
Guns: 1—30 mm, 2—12.7 mm MGs.

Comment: Following a tendering process, two MRTP 33 fast attack craft ordered from Yonca-Onuk Shipyard, Turkey on 8 June 2006. Construction began in February 2007 and delivery of the first of class was made on 26 November 2007. The second followed in April 2008. With advanced composites structure, the craft are improved versions of those in service in the Turkish Coast Guard. The craft are to be used for patrol of littoral waters, maritime interdiction and special forces operations.

ZARRAR 8/2007, Yonca-Onuk / 1353751

4 MILITARY ASSAULT CRAFT (LCP)

114 +3

Displacement, tons: To be announced
Dimensions, feet (metres): To be announced
Main machinery: To be announced
Speed, knots: 30
Complement: 4 plus 14 troops
Guns: 2—12.7 mm MGs.

Comment: Built by Marsun Shipyard, Thailand. The first was delivered on 11 December 2004. Appearance is similar to SEAL assault craft in service with the Thai Navy

MILITARY ASSAULT CRAFT 114 3/2007 / 1170019

MINE WARFARE FORCES

3 MUNSIF (ÉRIDAN) CLASS (MINEHUNTERS) (MHSC)

Name	No	Builders	Launched	Commissioned
MUNSIF (ex-Sagittaire)	M 166	Lorient Dockyard	9 Nov 1988	27 July 1989
MUHAFIZ	M 163	Lorient Dockyard	8 July 1995	15 May 1996
MUJAHID	M 164	Lorient/PN Dockyard, Karachi	28 Jan 1997	9 July 1998

Displacement, tons: 562 standard, 595 full load
Dimensions, feet (metres): 168.9 x 29.2 x 9.5 (51.5 x 8.9 x 2.9)
Main machinery: 1 Stork Wärtsilä A-RUB 215X-12 diesel; 1,860 hp(m) (1.37 MW) sustained; 1 shaft; LIPS op prop; auxiliary propulsion; 2 motors; 240 hp(m) (179 kW); 2 active rudders; 2 bow thrusters
Speed, knots: 15; 7 on auxiliary propulsion
Range, n miles: 3,000 at 12 kt
Complement: 46 (5 officers)
Guns: 1 GIAT 20F2 20 mm; 1—12.7 mm MG
Countermeasures: MCM; 2 PAP 104 Mk 5 systems; mechanical sweep gear. Elosco MKR 400 acoustic sweep; MRK 960 magnetic sweep
Combat data systems: Thomson-CSF TSM 2061 Mk 2 tactical system in the last pair.
Radars: Navigation: Racal Decca 1229 (M 166) or Kelvin Hughes 1007; I-band
Sonars: Thomson Sintra DUBM 21B or 21D (163 and 164); hull-mounted; active; high frequency; 100 kHz (±10 kHz). Thomson Sintra TSM 2054 MCM towed array may be included

Comment: Contract signed with France 17 January 1992. The first recommissioned into the Pakistan Navy on 24 September 1992 after active service in the Gulf with the French Navy in 1991. Sailed for Pakistan in November 1992. The second was delivered in April 1996. The last one was transferred to Karachi by transporter ship in April 1995 with a final package following in November 1995. Form 21st Mine Countermeasures Squadron

MUHAFIZ 3/2008, Guy Toremans / 1305314

SURVEY SHIPS

Notes: Acquisition of a new oceanographic research vessel was reported in November 2002 to have received Presidential approval. It is not clear whether this is to be a specialist or a multipurpose vessel.

1 SURVEY SHIP (AGS/AGOR)

Name	No	Builders	Laid down	Launched	Commissioned
BEHR PAIMA	SV 48	Ishikawajima, Japan	16 Feb 1982	7 July 1982	27 Dec 1982

Measurement, tons: 1,183 gross
Dimensions, feet (metres): 200.1 × 38.7 × 12.1 (61 × 11.8 × 3.7)
Main machinery: 2 Daihatsu 6DSM-22 diesels; 2,000 hp(m) (1.47 MW); 2 shafts; cp props, bow thruster
Speed, knots: 13.7
Range, n miles: 5,400 at 12 kt
Complement: 84 (16 officers)

Comment: Ordered in November 1981 Hydrographic and oceanographic research vessel Equipped with multibeam echo-sounder, deep echo sounder and carries two survey motor boats for inshore operations.

BEHR PAIMA 6/2003, Pakistan Navy / 0569231

AUXILIARIES

Notes: An order for two unspecified 1,600-ton auxiliary ships was placed with Karachi Shipyard and Engineering Works (KSEW) in May 2007. The first was laid down on 27 February 2008. The ships are required for logistic support, SAR, mine-laying and torpedo-recovery tasks.

1 FUQING CLASS (AORH)

Name	No	Builders	Commissioned
NASR (ex-X-350)	A 47	Dalian Shipyard	27 Aug 1987

Displacement, tons: 7,500 standard; 21,750 full load
Dimensions, feet (metres): 561 × 71.5 × 30.8 (177 × 21.8 × 9.4)
Main machinery: 1 Sulzer 8RL866 diesel; 13,000 hp(m) (9.56 MW); 1 shaft
Speed, knots: 18
Range, n miles: 18,000 at 14 kt
Complement: 130 (during visit to Australia in October 1988 carried 373 (23 officers) including 100 cadets)
Cargo capacity: 10,550 tons fuel; 1,000 tons dieso; 200 tons feed water; 200 tons drinking water
Guns: 1 GE/GD Vulcan Phalanx CIWS. 4—37 mm (2 twin). 2—12.7 mm MGs
Countermeasures: Decoys: SRBOC Mk 36 chaff launcher. 2 Rheinmetall MASS launchers. ESM: Thales DR 3000
Radars: Navigation: 1 Kelvin Hughes 1007; 1 SPS 66; I-band
Helicopters: 1 SA 319B Alouette III.

Comment: Similar to Chinese ships of the same class. Two replenishment at sea positions on each side for liquids and one for solids. Phalanx fitted on the hangar roof in 1995. Assigned to 42nd Auxiliary Squadron.

NASR 7/2008*, John Mortimer / 1363252

2 COASTAL TANKERS (AOTL)

Name	No	Builders	Commissioned
GWADAR	A 49	Karachi Shipyard	1984
KALMAT	A 21	Karachi Shipyard	29 Aug 1982

Measurement, tons: 831 grt
Dimensions, feet (metres): 206 × 37.1 × 9.8 (62.8 × 11.3 × 3)
Main machinery: 1 Sulzer diesel; 550 hp(m) (404 kW); 1 shaft
Speed, knots: 10
Complement: 26
Cargo capacity: 340 m³ fuel or water
Guns: 2—7.62 mm MGs

Comment: Assigned to 42nd Auxiliary Squadron.

GWADAR 3/2008*, Guy Toremans / 1305313

1 POOLSTER CLASS (AORH)

Name	No	Builders	Commissioned	Recommissioned
MOAWIN (ex-Poolster)	A 20 (ex-A 835)	Rotterdamse Droogdok Mij	10 Sep 1964	28 July 1994

Displacement, tons: 16,800 full load
Measurement, tons: 10,000 dwt
Dimensions, feet (metres): 552.2 × 66.6 × 26.9 (168.3 × 20.3 × 8.2)
Main machinery: 2 boilers; 2 turbines; 22,000 hp(m) (16.2 MW); 1 shaft
Speed, knots: 21
Complement: 200 (17 officers)
Cargo capacity: 10,300 tons including 8-9,000 tons oil fuel
Guns: 4—20 mm Oerlikon (2 twin). 2—12.7 mm MGs.
Countermeasures: Decoys: SRBOC Mk 36 chaff launcher. ESM: SLQ 32
Radars: Air/surface search: Racal Decca 2459; F/I-band
Navigation: Racal Decca TM 1229C; I-band.
Sonars: Signaal CWE 10; hull-mounted; active search; medium frequency.
Helicopters: 1 Sea King.

Comment: Acquired from the Netherlands Navy. Helicopter deck aft. Funnel heightened by 4.5 m (14.8 ft). Capacity for five Lynx sized helicopters. Two fuelling stations each side for underway replenishment. Phalanx to be fitted in due course. Assigned to 42nd Auxiliary Squadron.

MOAWIN 6/2007, Hachiro Nakai / 1166816

1 TANKER (AOTL)

ATTOCK A 40

Displacement, tons: 1,200 full load
Dimensions, feet (metres): 177.2 × 32.3 × 15.1 (54 × 9.8 × 4.6)
Main machinery: 2 diesels; 800 hp(m) (276 kW); 2 shafts
Speed, knots: 8
Complement: 18
Cargo capacity: 550 tons fuel
Guns: 2 Oerlikon 20 mm.

Comment: Built in Italy in 1957. Assigned to 42nd Auxiliary Squadron.

ATTOCK 6/2004, Pakistan Navy / 1044169

TUGS

Notes: *Jandar* and *Jafakash* are two pusher tugs (10 ton bollard pull) built by Karachi Shipyard and commissioned in 2000.

JANDAR and JAFAKASH 6/2003, Pakistan Navy / 1044170

5 COASTAL TUGS (YTB)

Name	No	Builders	Commissioned
BHOLU	A 44	Giessendam Shipyard, Netherlands	Apr 1991
GAMA	A 45	Giessendam Shipyard, Netherlands	Apr 1991
JANBAZ	—	Karachi Shipyard	Sep 1990
JOSHILA	—	Karachi Shipyard	Sep 2000
DELAIR	—	Karachi Shipyard	Sep 2000

Displacement, tons: 265 full load
 Dimensions, feet (metres): 85.3 x 22.3 x 9.5 (26 x 6.8 x 2.9)
 Main machinery: 2 Cummins KTA38-M diesels, 1,836 hp (1.26 MW) sustained; 2 shafts
 Speed, knots: 11
 Complement: 6

Comment: Details are for *Bholu* and *Gama*, built by Damen Shipyards and which entered service in 1991. *Janbaz* and *Joshila* were built by Karachi Shipyard and delivered in 1990 and 2000 respectively

JOSHILA 5/2003 / 0569777

MARITIME SECURITY AGENCY

Notes: (1) All ships are painted white with a distinctive diagonal blue and red band and MSA on each side
 (2) One Britten-Norman Maritime Defender acquired in 1993, a second in 1994 and a third on 8 August 2004. Based near Karachi with 93 Squadron.
 (3) Plans for new aircraft are under consideration.

2 SHANGHAI II CLASS (FAST ATTACK CRAFT—GUN) (PB)

SUBQAT P 1066 RAFAQAT P 1068

Displacement, tons: 131 full load
 Dimensions, feet (metres): 127.3 x 17.7 x 5.8 (38.8 x 5.4 x 1.7)
 Main machinery: 2 Type L12-180 diesels; 2,400 hp (1.76 MW) (forward); 2 Type 12-D-6 diesels; 1,820 hp (1.34 MW) (aft); 4 shafts
 Speed, knots: 30. Range, n miles: 700 at 16.5 kt
 Complement: 34
 Guns: 4—37 mm/63 (2 twin), 2—25 mm/80 (twin).
 Depth charges: 2 projectors, 8 weapons.
 Mines: Fitted with mine rails for approx 10 mines.
 Radars: Surface search. Anritsu ARC-32A; I-band

Comment: Four of the class were transferred from the Navy in 1986 and two more in 1998. The last pair were then replaced by naval craft. All were originally acquired from China 1972-1976.

SUBQAT 5/2003 / 0569223

1 GEARING (FRAM 1) CLASS (DD)

Name	No	Builders	Commissioned
NAZIM (ex-Tughril)	D 156 (ex-D 167)	Iodd Pacific	4 Aug 1945

Displacement, tons: 2,425 standard; 3,500 full load
 Dimensions, feet (metres): 390.5 x 41.2 x 19 (119 x 12.6 x 5.8)
 Main machinery: 4 Babcock & Wilcox boilers; 600 psi (43.3 kg/cm²); 850 F (454 C); 2 GE turbines, 60,000 hp (45 MW); 2 shafts
 Speed, knots: 32. Range, n miles: 4,500 at 16 kt
 Complement: 180 (15 officers)
 Guns: 2 US 5 in (127 mm)/38 Mk 38 (twin), 15 rds/min to 17 km (9.3 n miles) anti-surface; 11 km (5.9 n miles); anti-aircraft; weight of shell 25 kg
 4—25 mm (2 twin)
 Torpedoes: 6—324 mm Mk 32 (2 triple) tubes.
 Countermasures: Decoys: 2 Plessey Shield 6-barrelled fixed launchers; chaff and IR flares in distraction, decoy or centroid modes
 Weapons control: Mk 37 for 5 in guns. OE 2 SATCOM.
 Radars: Surface search. Raytheon/Sylvania; SPS-10; G-band
 Navigation: KH 1007; I-band.
 Fire control: Western Electric Mk 25, I/J band

Comment: Transferred from the US on 30 September 1980 to the Navy. Passed on to the MSA in 1998 and renamed. This is the third Gearing to be renamed *Nazim*, the previous pair having been sunk as targets. All weapon systems removed except the torpedo tubes and main gun. Serves as the MSA Flagship.

NAZIM 3/2007, Paul Daly / 1170320

4 BARKAT CLASS (PBO)

Name	No	Builders	Commissioned
BARKAT	1060 (ex-P 60)	China Shipbuilding Corp	29 Dec 1989
REHMAT	1061 (ex-P 61)	China Shipbuilding Corp	29 Dec 1989
NUSRAT	1062 (ex-P 62)	China Shipbuilding Corp	13 June 1990
VEHDAT	1063 (ex-P 63)	China Shipbuilding Corp	13 June 1990

Displacement, tons: 435 full load
 Dimensions, feet (metres): 190.3 x 24.9 x 7.5 (58 x 7.6 x 2.3)
 Main machinery: 4 MTU 16V 396TB93 diesels, 8,720 hp (6.4 MW) sustained, 4 shafts
 Speed, knots: 27. Range, n miles: 1,500 at 12 kt
 Complement: 50 (5 officers)
 Guns: 2—37 mm/63 (1 twin), 2—14.5 mm/60 (twin)
 Radars: Surface search. 2 Anritsu ARC 32A; I-band

Comment: Type P58A patrol craft built in China for the MSA. First two arrived in Karachi at the end of January 1990, second pair in August 1990. Some of this type of ship are in service with Chinese paramilitary forces.

VEHDAT 6/1994, Maritime Security Agency / 0081380

1 HUANGFEN CLASS (PATROL BOAT) (PB)

SADAQAT (ex-Dahshat) P 1069 (ex-P 1026)

Displacement, tons: 171 standard; 205 full load
 Dimensions, feet (metres): 126.6 x 24.9 x 8.9 (38.6 x 7.6 x 2.7)
 Main machinery: 3 Type 42-160 diesels; 12,000 hp (8.8 MW) sustained; 3 shafts
 Speed, knots: 28. Range, n miles: 800 at 22 kt
 Complement: 28
 Guns: 4 Norinco 25 mm/80 (2 twin), 270 rds/min to 3 km (1.6 n miles); weight of shell 0.34 kg
 Radars: Surface search. Square Tie; I-band.

Comment: Originally transferred to the Pakistan Navy in April 1984. The then missile-armed craft were Chinese versions of the Soviet Osa II class. This craft was transferred to the MSA on 25 June 2005

SADAQAT 6/2005, Maritime Security Agency / 1164330

3 GUNS CLASS (PATROL BOATS) (PB)

GUNS MS 111 SUR MS 112 MALAN MS 113

Displacement, tons: 15 full load
Dimensions, feet (metres): 42.6 x 12.0 x 3.3 (13.0 x 3.65 x 1.0)
Main machinery: 2 Yamaha ME 730TIL diesels; 636 hp (475 kW); 2 shafts
Speed, knots: 21
Complement: 6
Guns: 1 – 7.62 mm MG.
Radars: Navigation: JRC 1500; I-band.

Comment: Manufactured by Karachi Shipyard and Engineering Works and commissioned in 2006. GRP construction.

MALAN 6/2006, Maritime Security Agency / 1164331

COAST GUARD

Notes: (1) Unlike the Maritime Security Agency which comes under the Defence Ministry, the official Coast Guard was set up in 1985 and is manned by the Army and answerable to the Ministry of the Interior.
 (2) The Customs Service is manned by naval personnel. It operates approximately 18 craft.

1 SWALLOW CLASS (PB)

SAIF

Displacement, tons: 52 full load
Dimensions, feet (metres): 65.6 x 15.4 x 4.3 (20.0 x 4.7 x 1.3)
Main machinery: 2 GM Detroit 12V71T1 diesels; 2,120 hp (1.58 MW); 2 shafts
Speed, knots: 25
Range, n miles: 500 at 20 kt
Complement: 8
Guns: 2 – 12.7 mm MGs

Comment: Built by Swallowcraft/Kangnam and delivered in 1986.

4 CRESTITALIA MV 55 CLASS (PBF)

SADD P 551 SHABHAZ P 552 VAQAR P 553 BURQ P 554

Displacement, tons: 23 full load
Dimensions, feet (metres): 54.1 x 17.1 x 2.95 (16.5 x 5.2 x 0.9)
Main machinery: 2 MTU diesels, 2,200 hp (1.64 MW); 2 shafts
Speed, knots: 35
Range, n miles: 425 at 25 kt
Complement: 5

Comment: Delivered in 1987.

SHABHAZ 5/2003 / 0669728

Palau

Country Overview

The Republic of Palau was a US-administered UN Trust territory from 1947 before becoming independent in 1994 when a Compact of Free Association, delegating to the US the responsibility for defence and foreign affairs, came into effect. Situated in the western Pacific

Ocean, the country comprises about 200 of the Caroline Islands archipelago spread in a chain about 350 n miles long. These include Koror (the administrative centre), Babelthuap (the largest island), Arakabesan, Malakal and Pelietu. The capital is currently on Koror, but a new capital is being built in eastern Babelthuap. Territorial seas (3 n miles) are claimed. An extended fisheries zone

(200 n miles) is also claimed but limits have not been fully defined.

Headquarters Appointments

Chief of Division of Marine Law Enforcement:
 Captain Ellender Ngirameketi

PATROL FORCES

1 PACIFIC CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
PRESIDENT H I REMELIK	001	Transfield Shipbuilding	May 1996

Displacement, tons: 162 full load
Dimensions, feet (metres): 103.3 x 26.6 x 6.9 (31.5 x 8.1 x 2.1)
Main machinery: 2 Caterpillar 3516TA diesels; 4,400 hp (3.28 MW) sustained; 2 shafts
Speed, knots: 20
Range, n miles: 2,500 at 12 kt
Complement: 17 (3 officers)
Guns: 2 – 7.62 mm MGs.
Radars: Surface search: Furuno 1011; I-band.

Comment: Ordered in 1995. This was the 21st hull in the Pacific class programme. Following the decision by the Australian government to extend the Pacific Patrol Boat project, the ship underwent a half-life refit at Gladstone in 2003. A life-extension refit will be required in 2010/11.

PRESIDENT H I REMELIK 6/2004, Division of Marine Law Enforcement, Palau 0144175

Panama

SERVICIO MARITIMO NACIONAL

Country Overview

The Republic of Panama is an independent state situated on the isthmus linking South America with Central and North America. Bordered to the west by Costa Rica and to the east by Colombia, it has an area of 29,157 square miles and a 684 n mile coastline with the north Pacific Ocean and of 370 n miles with the Caribbean. The country is bisected by the Panama Canal. A now treaty in 1977 ended US operation, maintenance and defence of the canal in 1999. The capital is Panama City while the main ports are Balboa, Cristóbal, Coco Solo, Bahía Las Minas,

Vacamonte, Almirante and Puerto Armuelles. Territorial seas (12 n miles) are claimed. An Exclusive Economic Zone (EEZ) (200 n miles) has been defined by boundary agreements. Reform of the security apparatus led to the creation of the Panamanian Public Forces, which includes the National Maritime Service, in 1984.

Personnel

- (a) 2009 620
(b) Voluntary service

Headquarters Appointments

Director General National Maritime Service
Rodrigo Cigarruista Tobias

Bases

Isla Flamenco (HQ) (Punta Brujas - HQ designate), Quebrada de Piedra, Largo Remo (under construction), Punta Cocos (air), Kuna Yala (air) (under construction)

PATROL FORCES

- Notes: (1) A patrol craft *Cocle* P 814 has been reported.
(2) Four interceptor craft, capable of 35 kt, donated by the United States in July 2007.
(3) A patrol craft *Carlos Jacome* has been reported.

1 BALSAM CLASS (PBO)

Name	No	Builders	Commissioned
INDEPENDENCIA (ex-Sweetgum)	A 401 (ex-WLB 309)	Marino Iron and Shipbuilding Corp, Duluth, Minnesota	20 Nov 1943

Displacement, tons: 1,034 full load
Dimensions, feet (metres): 180 × 37 × 12 (54.9 × 11.3 × 3.8)
Main machinery: Diesel electric; 2 diesels; 1,402 hp (1.06 MW); 1 motor; 1,200 hp (895 kW); 1 shaft, bow thruster
Speed, knots: 13
Range, n miles: 8,000 at 12 kt
Complement: 53
Guns: 2—12.7 mm MGs.
Radars: Navigation. Raytheon SPS-64(V)1.

Comment: Transferred from US Coast Guard on 15 February 2002. Operates as an offshore patrol ship.

INDEPENDENCIA

1/2004 / 0587788

2 VOSPERTYPE (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
PANQUIACO	P 301 (ex-GC 10)	Vospers, Portsmouth	July 1971
LIGIA ELENA	P 302 (ex-GC 11)	Vospers, Portsmouth	July 1971

Displacement, tons: 96 standard; 145 full load
Dimensions, feet (metres): 103 × 18.9 × 5.8 (31.4 × 5.8 × 1.8)
Main machinery: 2 Detroit diesels; 5,000 hp (3.73 MW); 2 shafts
Speed, knots: 18
Range, n miles: 1,500 at 14 kt
Complement: 17 (3 officers)
Guns: 2—7.62 mm MGs.
Radars: Surface search: Raytheon R 81; I-band.

Comment: *Panquaco* launched on 22 July 1970, *Ligia Elena* on 25 August 1970. Hull of welded mild steel and upperworks of welded or buck-bolted aluminium alloy. Vospers fin stabiliser equipment. P 302 was sunk in December 1989, but subsequently recovered. Both vessels had major repairs in the Coco Solo shipyard from September 1992. This included new engines, a new radar and replacement guns. Pacific Flotilla. Similar craft in service in Malaysia.

LIGIA ELENA

6/2003, Panama Maritime Service / 0589305

1 COASTAL PATROL CRAFT (PB)

Name	No	Builders	Commissioned
NAOS (ex-Ertine)	P 303 (ex-RV 821)	Equitable, NO	Dec 1964

Displacement, tons: 120 full load
Dimensions, feet (metres): 105 × 24.9 × 6.9 (32 × 7.6 × 2.1)
Main machinery: 2 Caterpillar diesels, 2 shafts
Speed, knots: 10. Range, n miles: 550 at 8 kt
Complement: 11 (2 officers)
Guns: 2—7.62 mm MGs.
Radars: Surface search: Raymerx 2800; I-band

Comment: Served as a support/research craft at the US Underwater Systems establishment at Bermuda. Transferred from US in July 1992 and recommissioned in December 1992. Refitted in 1997 with new engines. Pacific Flotilla.

NAOS

6/2002, Panama Maritime Service / 0575006

1 COASTAL PATROL CRAFT (PB)

ESCUDO DE VERAGUAS (ex-Aun Sin Nombre, ex-Kathyuska Kelly) P 305 (ex-P 206)

Displacement, tons: 158 full load
Dimensions, feet (metres): 90.5 × 24.1 × 6.1 (27.6 × 7.3 × 1.9)
Main machinery: 2 Detroit 12V-71 diesels, 840 hp (627 kW) sustained; 2 shafts
Speed, knots: 10
Complement: 10 (2 officers)
Guns: 1—12.7 mm MG
Radars: Surface search: Raytheon; I-band

Comment: Confiscated drug runner craft taken into service in 1996. Also used for transport duties. Caribbean Flotilla

ESCUDO DE VERAGUAS

11/1998, Panama Maritime Service / 0057687

1 COASTAL PATROL CRAFT (PB)

TABOGA P 306

Comment: Details not confirmed. Possibly a confiscated vessel

TABOGA

6/2003, Panama Maritime Service / 0569104

1 NEGRITA CLASS (COASTAL PATROL CRAFT) (PB)

CACIQUE NOME (ex-Negrita) P 203

Displacement, tons: 68 full load
Dimensions, feet (metres): 80 x 15 x 6 (24.4 x 4.6 x 1.8)
Main machinery: 2 Detroit 12V-71 diesels, 840 hp (627 kW); 2 shafts
Speed, knots: 13. **Range, n miles:** 250 at 10 kt
Complement: 8 (2 officers)
Guns: 2—7.62 mm MGs.
Radars: Surface search: Raytheon 71; I-band

Comment: Former oilfield crew boat completely rebuilt in the Coco Solo shipyard and recommissioned 5 May 1993. Pacific Flotilla

CACIQUE NOME 8/1998, Panama Maritime Service / 0052688

5 DE NOVIEMBRE (ex-Point Hannon)	P 209 (ex-82355)	J M Martinac, Tacoma	23 Jan 1967

Displacement, tons: 69 full load
Dimensions, feet (metres): 83 x 17.2 x 5.8 (25.3 x 5.2 x 1.8)
Main machinery: 2 Cummins V-12-900M diesels, 1,600 hp (1.18 MW); 2 shafts
Speed, knots: 18. **Range, n miles:** 1,500 at 8 kt
Complement: 10 (2 officers)
Guns: 2—7.62 mm MGs.
Radars: Surface search: Raytheon Pathfinder; I-band.

Comment: P 204 transferred from US Coast Guard 7 June 1991 and recommissioned 10 July 1991. P 206 and P 207 transferred 22 April 1999. P 208 transferred 20 September 2000 and P 209 on 11 January 2001. Carry a RIB with a 40 hp engine. Caribbean Flotilla.

28 DE NOVIEMBRE 6/2003, Panama Maritime Service / 0568902

3 COASTAL PATROL CRAFT (PB)

CHIRIQUI P 841 **VERAGUAS** P 842 **BOCAS DEL TORO** P 843

Displacement, tons: 46 full load
Dimensions, feet (metres): 73.8 x 17.3 x 2.9 (22.5 x 5.3 x 0.9)
Main machinery: 3 Detroit 12V 71 diesels; 1,260 hp (940 kW) sustained, 3 shafts
Speed, knots: 20
Complement: 7 (1 officer)
Guns: 2—7.62 mm MGs
Radars: Surface search: Furuno 1411; I-band.

Comment: Ex-US Sea Spectre PB Mk IV Class transferred as Grant-Aid from the US in March 1998. Used for drug prevention patrols in both Flotillas.

BOCAS DEL TORO 6/2003 / 0568903

2 HARBOUR PATROL CRAFT (PB)

PANAMA P 101 **CALAMAR** P 102 (ex-PC 3602)

Displacement, tons: 11 full load
Dimensions, feet (metres): 38 x 13 x 3 (11 x 4 x 0.9)
Main machinery: 1 Detroit 6-71T diesel; 300 hp (224 kW); 1 shaft
Speed, knots: 15
Range, n miles: 160 at 12 kt
Complement: 5
Guns: 1—7.62 mm MG.

Comment: Ex-US personnel landing craft. P 102 in service from December 1992. P 101 from February 1998. GRP construction. Pacific flotilla.

CALAMAR 8/1998, Panama Maritime Service / 0506310

6 FAST PATROL BOATS (PBF)

BPC 2201 BPC 2203 BPC 2206-2209

Dimensions, feet (metres): 22.3 x 7.5 x 2 (6.8 x 2.3 x 0.6)
Main machinery: 2 Johnson outboards, 280 hp (209 kW)
Speed, knots: 35
Complement: 4
Guns: 1—7.62 mm MG.

Comment: BPC 2201-2206 are Boston Whaler Piraña class acquired between June 1991 and October 1992.

BPC 2203 11/1998, Panama Maritime Service / 0057690

BPC 3202 BPC 3208 BPC 3214 BPC 3220 BPC 3223

Dimensions, feet (metres): 33.5 x 7.5 x 2 (10.2 x 2.3 x 0.6)
Main machinery: 2 Yamaha outboards; 400 hp(m) (294 kW)
Speed, knots: 35
Complement: 4
Guns: 1—7.62 mm MG.

Comment: Eduardoño class acquired between June 1995 and October 1998

BPC 3202 6/2003, Panama Maritime Service / 0587789

4 INTERCEPT CRAFT (PBF)

Displacement, tons: To be announced
Dimensions, feet (metres): 44.0 x 9.0 x 3.0 (13.4 x 2.75 x 0.9)
Main machinery: 3 Yanmar diesels, 945 hp (704 kW); Bravo X drives
Speed, knots: 60
Range, n miles: 600 at 25 kt
Complement: 6

Comment: Manufactured by Nor-Tech, Fort Myers, FL. Composite and glass-fibre hull with V-bottomed hull. Donated by the US Southern Command in 2007. Employed on counter drugs, arms trafficking and illegal immigration duties.

INTERCEPT CRAFT 6/2007, US Southern Command / 1167968

LAND-BASED MARITIME AIRCRAFT

Numbers/Type: 3 CASA C-212 Aviocar
Operational speed: 190 kt (353 km/h)
Service ceiling: 24,000 ft (7,315 m)
Range: 1,650 n miles (3,055 km)
Role/Weapon systems: Air Force operated coastal patrol aircraft for EEZ protection and anti-smuggling duties. Sensors: APS-128 radar, limited ESM. Weapons: ASW: two Mk 44/46 torpedoes. ASV: two rocket or machine gun pods.

C-212 6/2003, Adolfo Ortega Gili / 0587787

Numbers/Type: 1 Pilatus Britten-Norman Islander
Operational speed: 150 kt (280 km/h)
Service ceiling: 18,900 ft (5,760 m)
Range: 1,500 n miles (2,775 km)
Role/Weapon systems: Air Force operated coastal surveillance duties. Sensors: Search radar. Weapons: Unarmed

AUXILIARIES

Notes: (1) There are two auxiliary craft *Frailes del Norte* T 06 (ex-US LCM 8 class) and *Frailes del Sur* T 07.
 (2) *General Esteban Huertas* (ex-YFU 81) has been reported with pennant number A 402 and may have replaced *Flamenco* in July 2004.

FRAILES DEL NORTE 6/2003, Panama Maritime Service / 0568901

1 LOGISTIC CRAFT (YAG)

ISLA PARIDAS (ex-Endoavour) L 21
Displacement, tons: 120 full load
Dimensions, feet (metres): 75 x 14 x 7 (22.9 x 4.3 x 2.1)
Main machinery: 1 Caterpillar diesel, 366 hp (270 kW); 1 shaft
Speed, knots: 12
Complement: 7 (1 officer)
Radars: Navigation: Furuno; I-band.

Comment: Acquired in September 1991. Pacific flotilla

1 COASTAL PATROL CRAFT (YO)

FLAMENCO (ex-Scheherazade) A 402 (ex-P 304, ex-WB 831)
Displacement, tons: 220 full load
Dimensions, feet (metres): 105 x 25 x 6.9 (32 x 7.6 x 2.1)
Main machinery: 2 Caterpillar diesels; 2 shafts
Speed, knots: 10
Complement: 11 (2 officers)
Guns: 2—7.62 mm MGs.
Radars: Surface search: Furuno FCR 1411; I-band.

Comment: Built in 1963. Transferred from US 22 July 1992 and commissioned in December 1992. Former US wooden hulled COOP craft. Refitted in Panama in 1994. Now used as a refuelling auxiliary. May have been replaced by ex-YFU 81.

FLAMENCO (old number) 12/1998, Panama Maritime Service / 0052696

1 MSB 5 CLASS (YAG)

NOMBRE DE DIOS (ex-MSB 25) L 16
Displacement, tons: 44 full load
Dimensions, feet (metres): 67.2 x 15.5 x 4 (17.4 x 4.7 x 1.2)
Main machinery: 2 Detroit diesels; 600 hp (448 kW); 2 shafts
Speed, knots: 12
Complement: 6 (1 officer)
Guns: 1—7.62 mm MG
Radars: Navigation: Raytheon Raystar; I-band.

Comment: Built between 1952 and 1956. Former US minesweeping boat. Served in the canal area until 1992 and transferred from US to Panama in December 1992 after refit. Wooden hull, new engine. Used as logistic craft. Pacific flotilla.

NOMBRE DE DIOS 6/2003 / 0568899

6 SUPPORT CRAFT (YAG)

DORADO I BA 055 **DORADO III** – **PORTOBELO** BA 058
DORADO II BA 056 **AGUACERO** BA 057 **FANTASMA AZUL** BA 059

Comment: *Dorado I* and *II* acquired in February 1998 and are used as 40 kt supply craft. *Agucero* is a confiscated 50 kt power boat taken into service in November 1998.

DORADO I 12/1998, Panama Maritime Service / 0052692

Papua New Guinea

Country Overview

Papua New Guinea lies north of Australia in the eastern half of New Guinea which it shares with the Indonesian province of Irian Jaya. An Australian-administered UN Trust territory from 1949, it became independent in 1975. Its head of state is the British sovereign, who is represented by a Governor-General. Its many island groups include the Bismarck and Louisiade Archipelagos, the Trobriand Islands, the D'Entrecasteaux Islands and Woodlark Island. Amongst other islands are Bougainville (a nine-year separatist conflict ended in 1997) and Buka. It has a

2,781 n mile coastline. The capital, principal city and port is Port Moresby. An archipelagic state, territorial seas (12 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has also been claimed but the limits have not been fully defined by boundary agreements.

Headquarters Appointments

Commander Defence Forces:
Commodore Peter Ilau, CBE
Director Maritime Operations:
Commander Murphy Kila

Bases

Port Moresby (HQ PNGDF and PNGDF Landing Craft Base); Lombrum (Manus)

HMPNGS

PATROL FORCES

4 PACIFIC CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
RABAUL (ex-Tararua)	01	Australian Shipbuilding Industries	16 May 1987
DREGER	02	Australian Shipbuilding Industries	31 Oct 1987
SEADLER	03	Australian Shipbuilding Industries	29 Oct 1988
MORESBY (ex-Basilisk)	04	Australian Shipbuilding Industries	1 July 1989

Displacement, tons: 162 full load
Dimensions, feet (metres): 103.3 x 26.6 x 6.9 (31.5 x 8.1 x 2.1)
Main machinery: 2 Caterpillar 3516TA diesels; 4,400 hp (3.3 MW) sustained; 2 shafts
Speed, knots: 20. **Range, n miles:** 2,500 at 12 kt
Complement: 17 (3 officers)
Guns: 1 Oerlikon GAM BQ1 20 mm, 2—762 mm MGs.
Radars: Surface search: Furuno 1011; I-band.

Comment: Contract awarded in 1985 to Australian Shipbuilding Industries (Hamilton Hill, West Australia) under Australian Defence co-operation. These are the first, third, sixth and seventh of the class and some of the few to be armed. All upgraded, during half-life refits in Australia with new radars and navigation support systems in 1997/98. Following the decision by the Australian government to extend the Pacific Patrol Boat project, *Rabaal* underwent a life-extension refit at Gladstone in 2003 and *Dreger* at Townsville in 2004. Similar refits conducted for *Seadler* and *Moresby* at Townsville in 2006 and 2007 respectively.

12/1990, James Goldrick / 0081510

Paraguay

ARMADA NACIONAL

Country Overview

The Republic of Paraguay is one of two landlocked countries in South America; Bolivia is the other. With an area of 157,048 square miles, it has borders to the north with Bolivia, to the east with Brazil and to the south with Argentina. There are some 1,800 n miles of internal waterways including the principal rivers, the Pilcomayo, Paraguay and Alto Paraná. Navigable by large ships for much of their length, they link the capital, largest city and principal port, Asunción, with the Rio de la Plata estuary on the Atlantic Ocean. Other ports include Ciudad del Este, Encarnación and Concepción.

Headquarters Appointments

Commander-in-Chief of the Navy:
Rear Admiral Ciber Benitez Caceres

Personnel

2009: 3,600 including 300 Coast Guard, 800 marines and 100 naval air

Bases

Main Base: Puerto Sajonia, Asunción
Minor Bases: Base Naval de Bahía Negra (BNBN) (on upper Paraguay river)
Base Naval de Salto del Guairá (BNSG) (on upper Paraná river)
Base Naval de Ciudad del Este (BNCE) (on Paraná river)
Base Naval de Encarnación (BNE) (on Paraná river)
Base Naval de Ita-Piru (BNIP) (on Paraná river)

Training

Specialist training is done with Argentina (Exercise Sirena), Brazil (Exercise Ninfa) and US (Exercise Unitas)

Helicopters: Puerto Sajonia

Coast Guard

Prefectura General Naval

PATROL FORCES

Notes: An unnamed 10 m patrol craft is based at Asunción. Twelve 5 to 6 m patrol craft (LP 30-41) of four different types were commissioned in 2007; six further were ordered in 2008

1 RIVER DEFENCE VESSEL (PGR)

Name	No	Builders	Commissioned
PARAGUAY	C 1	Odero, Genoa	May 1931

Displacement, tons: 836 standard, 885 full load
Dimensions, feet (metres): 231 × 35 × 5.3 (70 × 10.7 × 1.7)
Main machinery: 2 boilers; 2 Parsons turbines; 3,800 hp (2.83 MW); 2 shafts
Speed, knots: 17
Range, n miles: 1,700 at 16 kt
Complement: 86
Guns: 4—4.7 in (120 mm) (2 twin) 3—3 in (76 mm), 2—40 mm.
Mines: 6
Radars: Navigation (Paraguay); I-band

Comment: Refitted in 1975. Has 0.5 in side armour plating and 0.3 in on deck. Still in restricted operational service with boiler problems. Plans to re-engine with diesels have not yet been implemented and the ship is probably non-operational. Based at Asunción. Gun tubs on either side of bridge can be fitted with single 20 mm guns.

PARAGUAY and TENIENTE FARINA

1 ITAIPÚ CLASS (RIVER DEFENCE VESSEL) (PBR)

Name	No	Builders	Commissioned
ITAIPÚ	P 05 (ex-P 2)	Arsenal de Marinha, Rio de Janeiro	2 Apr 1985

Displacement, tons: 385 full load
Dimensions, feet (metres): 151.9 × 27.9 × 4.6 (46.3 × 8.5 × 1.4)
Main machinery: 2 MAN V6V16/18TL diesels; 1,920 hp(m) (1.41 MW); 2 shafts
Speed, knots: 14
Range, n miles: 6,000 at 12 kt
Complement: 40 (9 officers) plus 30 marines
Guns: 1 Bofors 40 mm/60, 2—81 mm mortars, 4—12.7 mm MGs
Radars: Navigation: I-band.
Helicopters: Platform for 1 HB 350B or equivalent.

Comment: Ordered late 1982. Launched 16 March 1984. Same as Brazilian Roraima class. Has some hospital facilities. Based at Asunción.

ITAIPÚ

4/2003, Hartmut Ehlers / 0567473

2 BOUCHARD CLASS (PATROL SHIPS) (PBR)

Name	No	Builders	Commissioned
NANAWA (ex-Bouchard M 7)	P 02 (ex-M 1)	Rio Santiago Naval Yard	27 Jan 1937
TENIENTE FARINA (ex-Py M 10)	P 04 (ex-M 3)	Rio Santiago Naval Yard	1 July 1939

Displacement, tons: 450 standard; 620 normal; 650 full load
Dimensions, feet (metres): 197 × 24 × 8.5 (60 × 7.3 × 2.6)
Main machinery: 2 sets MAN 2-stroke diesels; 2,000 hp(m) (1.47 MW); 2 shafts
Speed, knots: 16
Range, n miles: 6,000 at 12 kt
Complement: 70
Guns: 4 Bofors 40 mm/60 (2 twin), 2—12.7 mm MGs.
Mines: 1 rail
Radars: Navigation: I-band.

Comment: Former Argentinian minesweepers of the Bouchard class. Launched on 20 March 1936 and 31 March 1938 respectively. Transferred from the Argentine Navy to the Paraguayan Navy; *Nanawa* recommissioned 14 March 1964, *Teniente Farina* 6 May 1968. Based at Asunción. A third ship, *Capitán Moza*, was scrapped between 1995–97.

LP 07 (ex-P 07) P 107 (ex-P 08) LP 09 (ex-P 09) LP 10 (ex-P 10) LP 11 (ex-P 11)

Displacement, tons: 18 full load
Dimensions, feet (metres): 48.2 x 10.2 x 2.6 (14.7 x 3.1 x 0.8)
Main machinery: 2 GM 6-71 diesels; 340 hp (254 kW); 2 shafts
Speed, knots: 12 **Range, n miles:** 240 at 12 kt
Complement: 4
Guns: 2—12.7 mm MGs.

Comment: Built by Arsenal de Marina, Paraguay. LP 07 launched March 1989, P 107 and LP 09 in February 1990 and LP 10-11 in October 1991. The programme was then aborted. Bases: LP 07 (Isla Margarita); LP 107 (Lake Itaipu); LP 09 (Bahia Negra); LP 10 (Asuncion); LP 11 (Encarnacion)

LP 10 4/2003, Hartmut Ehlers / 0567477

6 TYPE 701 CLASS (PBR)

- LP 01 (ex-P 105) - LP 102 (P 102) - LP 104 (ex-P 104)
 - LP 101 (ex-P 101) **MIGUEL SOTOA P 103** **MANUEL TRUJILLO P 106**

Displacement, tons: 15 full load
Dimensions, feet (metres): 42.5 x 12.8 x 3 (13 x 3.9 x 0.9)
Main machinery: 2 diesels; 500 hp (373 kW); 2 shafts
Speed, knots: 20
Complement: 7
Guns: 2—12.7 mm MGs

Comment: Built by Sewart in 1970. Delivered 1967-71. LP 105 is in reserve. Bases: LP 01 (Asuncion); LP 101 (Ayolas); LP 102 (Asuncion); P 103 (Lake Itaipu); LP 104 (Fuerte Olimpo); P 106 (Lake Itaipu).

LP 104 4/2003, Hartmut Ehlers / 0567478

LAND-BASED MARITIME AIRCRAFT

Notes: The Naval Aviation inventory includes four fixed wing aircraft (two Cessna 150, two Cessna 310K and one Cessna 401A) in addition to the two Helibras Esquilo. Four further Robinson R44 helicopters have not been ordered, as previously reported.

Numbers/Type: 2 Helibras HB 350B Esquilo.
Operational speed: 125 kt (232 km/h).
Service ceiling: 10,000 ft (3,050 m)
Range: 390 n miles (720 km).
Role/Weapon systems: Support helicopter for riverine patrol craft. Delivered in July 1985.

ESQUILO 5/2000, Hartmut Ehlers / 0105198

AUXILIARIES

Notes: In addition to the craft listed, there are three LCVPs (EDVP 1-3), two service craft (Arsenal 1 and 2) one utility launch (Teniente Cabrera), one suction dredger (Teniente Oscar Carreras Sagüier), one floating crane (Grúa Flotante) and one floating dry dock (Dique Flotante (ex-AFDL 26)).

EDVP-03 4/2003, Hartmut Ehlers / 0687190

1 HYDROGRAPHIC LAUNCH (YGS)

SUBOFICIAL ROGELIO LESME LPH 01 (ex-LH 1)

Displacement, tons: 18 full load
Dimensions, feet (metres): 65.5 x 10.2 x 2.6 (14.7 x 3.1 x 0.8)
Main machinery: 1 Mercedes-Benz diesel, 100 hp (74 kW); 1 shaft
Speed, knots: 13
Complement: 5

Comment: Built in 1958.

1 TRAINING SHIP/TRANSPORT (AK/AX)

Name	No	Builders	Commissioned
GUARANI (ex-Cerro Cora)	-	Tomas Ruiz de Velasco, Bilbao	Feb 1968

Measurement, tons: 714 gross, 1,047 dwt
Dimensions, feet (metres): 240.3 x 36.3 x 11.9 (73.6 x 11.1 x 3.7)
Main machinery: 1 MWM diesel; 1,300 hp(m) (956 kW); 1 shaft
Speed, knots: 13
Complement: 21
Cargo capacity: 1,000 tons

Comment: Refitted in 1975 after a serious fire in the previous year off the coast of France. Used to spend most of her time acting as a freighter on the Asunción Europe run, commercially operated for the Paraguayan Navy. Since 1991 she has only been used for river service and for training cruises Asunción-Montevidéo. Reported laid up and probably not operational.

GUARANI 4/2003, Hartmut Ehlers / 0567480

1 RIVER TRANSPORT (AKL)

TENIENTE HERREROS (ex-*Presidente Stroessner*) T 1

Displacement, tons: 420 full load
 Dimensions, feet (metres): 124 x 29.5 x 7.2 (378 x 9 x 2.2)
 Main machinery: 2 MWM diesels; 330 hp (m) (243 kW)
 Speed, knots: 10
 Complement: 10
 Cargo capacity: 120 tons

Comment: Built by Arsenal de Marina in 1964 from an old hull.

TENIENTE HERREROS 5/1991, Paraguay Navy / 0081518

1 PRESIDENTIAL YACHT (MYAC)

3 de FEBRERO (ex-26 de Febrero)

Displacement, tons: 98.5 full load
 Dimensions, feet (metres): 92.2 x 19.7 x 5.2 (28.1 x 6.0 x 1.6)
 Main machinery: 2 Rolls Royce; 517 hp (386 kW); 2 shafts
 Speed, knots: 11
 Range, n miles: 1,350 at 11 kt
 Complement: 6 + 8 guests

Comment: Built by Naval Arsenal Asunción and launched in 1972. Entered service in 1982

3 de FEBRERO

Peru

ARMADA PERUANA

Country Overview

The Republic of Peru is situated in western South America. With an area of 496,225 square miles it has borders to the north with Ecuador and Colombia, to the east with Brazil and Bolivia and to the south with Chile. It has a coastline of 1,850 n miles with the Pacific Ocean. Lima is capital and largest city and is served by the port of Callao. There are further ports at Paita, Salaverry, Chimbote, Pisco, San Juan, Matarani and Ilo. Inland, Iquitos and Pucallpa are linked to the Atlantic Ocean by the Amazon River. Lake Titicaca is also an important waterway. Peru has not claimed an EEZ but is one of a few coastal states which claims a 200 n mile territorial sea

Headquarters Appointments

Commander of the Navy:
 Admiral Carlos Gamarra Elias
 Chief of the Naval Staff
 Vice Admiral Rolando Navarrete Salomon
 Inspector General:
 Vice Admiral Jorge de la Puente Ribeyro
 Commander Pacific Operations Command (Callao):
 Vice Admiral Alberto Lozada Frias

Headquarters Appointments – continued

Commander Amazon Operations
 Command (Iquitos):
 Vice Admiral José Cueto Aservi
 Director General, Coast Guard
 Rear Admiral Fergán Herrera Cuntt
 Commander, Surface Forces
 Rear Admiral Raúl Vázquez Alvarado
 Commander, Submarines:
 Rear Admiral Jaime Navach Gamio
 Commander, Special Operations Force
 Rear Admiral Erick Giovannini Freire
 Commander, Naval Aviation:
 Rear Admiral José Paredes Lora
 Commander, Naval Infantry Force:
 Captain Carlos Tello Ariaga

Personnel

(a) 2009: 23,715 (2,000 officers)
 (b) 2 years' voluntary military service

Organisation and Bases

2 Operational Commands: Pacific (Callao) and Amazon (Iquitos).
 5 Naval Zones: 1st (Piura), 2nd (Callao), 3rd (Arequipa), 4th (Pucallpa) and 5th (Iquitos)
 Coast Guard General Directorate (Callao).

Callao: Main Naval Base, dockyard with shipbuilding capacity, one dry dock, three floating docks, one floating crane; training schools, Submarine Naval Station. Main Naval Air Base near Jorge Chavez International Airport.
 San Lorenzo: Naval Station.
 Iquitos: River base for Amazon Flotilla, small building yard, repair, facilities, floating dock.
 Pucallpa: River base with logistic facilities.
 San Juan de Marcona: Naval Aviation Training School and airfield.
 Paita: Naval Station with logistic facilities.
 Chimbote: Naval Base, dockyard for small vessels, ogistic facilities.
 Puerto Maldonado: River Base
 Puno: Lake Titicaca Lake Station.
 La Punta (Naval Academy).
 Naval Stations with logistic facilities at El Salto (Tumbes), Mollendo (Arequipa), El Estrecho and Gueppi (Amazon)

Marines

The Peruvian Marines comprise 3,500 men whose Headquarters is at Ancón. The force includes a Marine Brigade, the Amphibious Support Group and Recon Forces. The Marine Brigade has three battalions: First Battalion - Guarnición de Marina; Second Battalion - Guardia Chalaca, Third Battalion

(including Fire Support Group armed with 122 mm howitzer and 120 mm mortar and Engineer Support company) - Vencedores de Punta Melpaio. The Amphibious Support Group is composed of the Vehicles and Motor Transport battalions. Recon Forces include a Commando and anti-terrorist companies. Additionally, the Peruvian Marines have jungle battalions at Iquitos and Pucallpa (BIMSE 1 and BIMSE 2).

Special Operations

The Special Operations Command is responsible for the organisation, equipment, training and control of the operations of its subordinate Units; these Units are: the North, Central, South and Northwest Special Operations Groups, the Diving and Salvage Group, the Explosives Ordnance Unit, The Special Operations Station and the Special Operations School.

Prefix to Ships' Names

BAP (Buque Armada Peruana).

Coast Guard

A separate service set up in 1975 with a number of light forces transferred from the Navy.

6 ANGAMOS/ISLAY (TYPE 209/1200) CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
ANGAMOS (ex-Casma)	SS 31	Howaldtswerke, Kiel	15 July 1977	31 Aug 1979	19 Dec 1980
ANTOFAGASTA	SS 32	Howaldtswerke, Kiel	3 Oct 1977	19 Dec 1979	20 Feb 1981
PISAGUA	SS 33	Howaldtswerke, Kiel	15 Aug 1978	19 Oct 1980	12 July 1983
CHIPANA	SS 34	Howaldtswerke, Kiel	1 Nov 1978	19 May 1981	20 Sep 1982
ISLAY	SS 35	Howaldtswerke, Kiel	15 Mar 1971	11 Oct 1973	29 Aug 1974
ARICA	SS 36	Howaldtswerke, Kiel	1 Nov 1971	5 Apr 1974	21 Jan 1975

Displacement, tons: 1,185 surfaced; 1,290 dived
Dimensions, feet (metres): 183.7 × 20.3 × 17.9
 (56 × 6.2 × 5.5)

Main machinery: Diesel-electric; 4 MTU 12V 493 AZ80 GA31L diesels; 2,400 hp(m) (176 MW) sustained; 4 Siemens alternators; 1.7 MW; 1 Siemens motor; 4,600 hp(m) (3.38 MW) sustained; 1 shaft

Speed, knots: 11 surfaced/snorting; 21.5 dived

Range, n miles: 240 at 8 kt

Complement: 35 (5 officers) (*Islay* and *Arica*); 31 (others)

Torpedoes: 8–21 in (533 mm) tubes. 14 AEG SST4, wire-guided; active/passive homing to 12/28 km (6.5/15 n miles) at 35/23 kt; warhead 260 kg. Swim-out discharge

Countemeasures: ESM Radar warning

Weapons control: Sepa Mk 3 or Signaal Sinbad M8/24 (*Angamos* and *Antofagasta*).

Radars: Surface search: Thomson-CSF Calypso; I-band.

Sonars: Atlas Elektronik CSU 3; active/passive search and attack; medium/high frequency.

Thomson Sintra DUUX 2C or Atlas Elektronik PRS 3; passive ranging.

Programmes: Two Type 209 (SS 35-36) ordered 1969. Two further Type 209 boats (SS 31-32) ordered 12 August 1976. Two Type 1200 (SS 33-34) ordered 21 March 1977

Designed by Ingenieurkontor, Lübeck for construction by Howaldtswerke, Kiel and sale by Ferrostaal, Essen all acting as a consortium.

Modernisation: Sepa Mk 3 fire control fitted progressively from 1986. *Angamos* modernised with new batteries,

sonar and EW suite. Torpedoes are to be replaced by Atlas Elektronik SUT Mod 3. An update programme for all six boats is in progress. Work on *Islay* and *Arica* is to be of more limited scope than the other four boats.

Structure: A single-hull design with two ballast tanks and forward and after trim tanks. Fitted with snort and remote machinery control. The single screw is slow revving, very high-capacity batteries with GRP lead-acid cells and battery cooling-by Wilh Hagen and VARTA. Fitted with two periscopes and Omega receiver. Foreplanes retract. Diving depth, 250 m (820 ft).

Operational: Endurance, 50 days. Four are in service, two in refit or reserve at any one time. *Angamos* took part in multinational exercises in mid-2004 during which she achieved 156 days at sea.

CRUISERS

1 DE RUYTER CLASS (CG/CLM)

Name	No	Builders	Laid down	Launched	Commissioned
ALMIRANTE GRAU (ex-De Ruyter)	CLM 81	Wilton-Fijenoord, Schiedam	5 Sep 1939	24 Dec 1944	18 Nov 1953

Displacement, tons: 12,165 full load
Dimensions, feet (metres), 624.5 × 56.7 × 22
 (190.3 × 17.3 × 6.7)
Main machinery: 4 Werkspoor-Yarrow boilers; 2 De Schelde-
 Parsons turbines; 85,000 hp (62.5 MW); 2 shafts
Speed, knots: 32
Range, n miles: 7,000 at 12 kt
Complement: 953 (49 officers)

Missiles: SSM, 8 OTO Melara/Matra Otomat Mk 2 (TG 1) ●; active radar homing to 80 km (43.2 n miles) at 0.9 Mach; warhead 210 kg, sea-skimmer for last 4 km (2.2 n miles).
Guns: 8 Bofors 6 in (152 mm)/53 (4 twin) ●; 15 rds/min to 26 km (14 n miles); weight of shell 46 kg
 4 Otobreda 40 mm/70 (2 twin) ●; 120 rds/min to 12.5 km (6.8 n miles); weight of shell 0.96 kg
 4 Bofors 40 mm/70 ●; 300 rds/min to 12 km (6.6 n miles); weight of shell 0.96 kg.

Countermeasures: Decoys: 2 Dagaie and 1 Sagaie chaff launchers.

Combat data systems: Signaal Sewaco PE SATCOM ●

Weapons control: 2 Lirod 8 optronic directors ●

Radars: Air search: AN/SPS-6 ●; D-band.

Surface search/target indication: Signaal DA08 ●; E/F-band.

Navigation: Rascal Decca 1226; I-band.

Fire control: Signaal WM25 ●; I/J-band (for 6 in guns), range 46 km (25 n miles).

Signaal STIR ●; I/J/K-band; range 140 km (76 n miles) for 1 m² target.

Programmes: Transferred by purchase from Netherlands 7 March 1973 and commissioned in Peruvian Navy 23 May 1973.

Modernisation: Taken in hand for a two and a half year modernisation at Amsterdam Dry Dock Co in March 1985. This was to include reconditioning of mechanical and electrical engineering systems, fitting of SSM and SAM, replacement of electronics and fitting of one CSEE Sagaie and two Dagaie launchers. In 1986 financial constraints limited the work but much had been done to update sensors and fire-control equipment. Sailed for Peru 23 January 1988 without her secondary gun armament, which was completed at Sima Yard, Callao. Sonar has been removed. SATCOM fitted aft.

Operational: Expected to be decommissioned in 2010.

Displacement, tons: 2,208 standard; 2,500 full load

Dimensions, feet (metres): 371.3 x 37.1 x 12.1
(113.2 x 11.3 x 3.7)

Main machinery: CODLOG, 2 GE/Fiat LM 2500 gas turbines, 50,000 hp (37.3 MW) sustained; 2 GMT A 230 20 M diesel; 8,000 hp (m) (5.88 MW) sustained; 2 shafts, LIPS cp props

Speed, knots: 35

Range, n miles: 3,450 at 20.5 kt

Complement: 185 (20 officers)

Missiles SSM 8 OTO Melara/Matra Otomat Mk 2 (TG 1) ●; active radar homing to 80 km (43.2 n miles) at 0.9 Mach; warhead 210 kg; sea-skimmer for last 4 km (2.2 n miles). SAM. Selenia Elsig Albatros octuple launcher ●; 8 Aspide, semi-active radar homing to 13 km (7 n miles) at 2.5 Mach; height envelope 15–5,000 m (49.2–16,405 ft); warhead 30 kg. An SA-N-10 launcher (MPG 86) may be fitted on the stern.

Guns: 1 OTO Melara 5 in (127 mm)/54 ●; 45 rds/min to 16 km (8.7 n miles); weight of shell 32 kg. 4 Breda 40 mm/70 (2 twin) ●; 300 rds/min to 12.5 km (6.8 n miles); weight of shell 0.96 kg.

Torpedoes: 6–324 mm ILAS (2 triple) tubes ●, Mk 44; anti-submarine; active homing to 5 km (2.7 n miles) at 30 kt; warhead 34 kg (shaped charge).

Countermeasures: Decoys: 2 Breda 105 mm SCLAR 20-barrelled trainable launchers ●, multipurpose; chaff to 5 km (2.7 n miles); illuminants to 12 km (6.6 n miles); HE bombardment.

ESM: Elettronica Lambda; intercept.

MARIATEGUI

Combat data systems: Selenia IPN-10 action data automation

Weapons control: 2 Elsig Mk 10 Argo with NA-21 directors, Dardo system for 40 mm.

Radars: Air search: Selenia RAN 10S (FM 52–54) ●; E/F-band. Signal LW 08 (FM 51), D-band.

Surface search: Selenia RAN 11LX ●; D/I-band

Navigation: SMA 3 RM 20R; I-band

Fire control: 2 RTN 10X ●; I/J-band.

2 RTN 20X ●; I/J-band (for Dardo).

Sonars: EDO 610E; hull-mounted, active search and attack; medium frequency

Helicopters: 1 Agusta AB 212ASW ●, 1 Agusta ASH 3D Sea King (deck only) (FM 51 and 54).

Programmes. *Montero* and *Mariategui* were the first major warships to be built on the Pacific Coast of South America, although some equipment was provided by Fincantieri

(Scale 1 : 1,200), Ian Sturton / 0105275

Modernisation: FM 51 and FM 54 have had flight deck extensions in order to operate Sea Kings from the deck although they cannot be stowed in the hangar. Similar extensions to FM 52 and 53 were made in 2007 SA-N-10 (MPG-86) may be fitted on the sterns of two ships. LW 08 (ex-*Almirante Grau*) replaced RAN 10S in FM 51 in 2003. A mid-life refit of FM 51–54, to include propulsion systems and the modernisation of Aspide, is reported to be under consideration.

Structure: FM 51–54 differ from those built for Italian service by having a fixed hangar and higher 40 mm mounts. The SAM system is also different. The ships were commissioned with a step-down from the flight deck to the stern although this has been modified in FM 51 and 54.

Operational: Helicopter provides an over-the-horizon targeting capability for SSM. HIFR facilities fitted to FM 52 and 53 in 1989 to allow refuelling of Sea King helicopters.

Service ceiling: 14,200 ft (4,330 m).

Range: 230 n miles (425 km).

Role/Weapon systems: ASW and surface search helicopter for smaller escorts. Sensors: Selenia search radar, Bendix ASQ 18 dipping sonar, ECM. Weapons: ASW; two Mk 44, Mk 46 or 244/S torpedoes or depth bombs.

AB 212

8/2006, Michael Nitz / 1335400

Numbers/Type: 3 Agusta-Sikorsky ASH-3D Sea King.

Operational speed: 120 kt (222 km/h).

Service ceiling: 12,200 ft (3,720 m).

Range: 630 n miles (1,165 km).

Role/Weapon systems: ASW helicopter; can be operated from two FFGs. Sensors: Selenia search radar, Bendix ASQ-18 dipping sonar, sonobuoys. Weapons: ASW; four Mk 44, Mk 46 or 244/S torpedoes or depth bombs or mines. ASV; two AM 39 Exocet missiles.

ASH-3D

6/2004, Peruvian Navy / 1127039

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Notes: (1) There are also three Mi-8T transport helicopters.

(2) There are three Fokker: one F-27 200, one F-27 600 and one F-27 500.

(3) There are two Antonov AN 32B transport aircraft

(4) Five Beech T-34C are used for training

(5) There is one Cessna 206 and two Cessna 150

(6) There are three Bell 206B training helicopters.

(7) Six Enstrom F-28F training helicopters were ordered in January 2008.

Mi-8T

6/2000, Peruvian Navy / D105209

ENSTROM F-28F

6/2008*, Peruvian Navy / 1435410

Numbers/Type: 5 Beechcraft Super King Air 200T.

Operational speed: 282 kt (523 km/h).

Service ceiling: 35,000 ft (10,670 m).

Range: 2,030 n miles (3,756 km).

Role/Weapon systems: Coastal surveillance and EEZ patrol duties. Sensors: Search radar, cameras. Weapons: Unarmed.

PATROL FORCES

Notes: (1) Procurement of 10 hovercraft for river policing is under consideration.

(2) Eight 7.4 m river patrol craft, similar to the Piranhas class, operate on the River Amazon.

6 VERLARDE (PR-72P) CLASS
(FAST ATTACK CRAFT—MISSILE) (CM/PGGFM)

Name	No	Builders	Launched	Commissioned
VELARDE	CM 21	SFCN, France	16 Sep 1978	25 July 1980
SANTILLANA	CM 22	SFCN, France	11 Sep 1978	25 July 1980
DE LOS HEROS	CM 23	SFCN, France	20 May 1979	17 Nov 1980
HERRERA	CM 24	SFCN, France	16 Feb 1979	26 Feb 1981
LARREA	CM 25	SFCN, France	12 May 1979	16 June 1981
SANCHEZ CARRIÓN	CM 26	SFCN, France	28 June 1979	18 Sep 1981

Displacement, tons: 470 standard; 560 full load

Dimensions, feet (metres): 210 × 27.4 × 5.2 (64 × 8.4 × 2.6)

Main machinery: 4 SACM AGO 240 V16 M7 (CM 21, 23, 25) or 4 MTU 12V 595 (CM 22, 24, 26) diesels; 22,200 hp(m) (16.32 MW) sustained; 4 shafts

Speed, knots: 37

Range, n miles: 2,500 at 16 kt

Complement: 36 plus 10 spare

Missiles: SSM: 4 Aerospatiale MM 38 Exocet; inertial cruise; active radar homing to 42 km (23 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.

SAM: An SA-N-10 launcher (MPG-86) may be fitted on the stern

Guns: 1 OTO Melara 3 in (76 mm)/62, 85 rds/min to 16 km (8.7 n miles); weight of shell 6 kg.

2 Breda 40 mm/70 (twin); 300 rds/min to 12.5 km (6.8 n miles); weight of shell 0.96 kg.

Countermeasures: ESM Thomson-CSF DR 2000; intercept.

Weapons control: CSEE Panda director Vega system.

Radars: Surface search: Thomson-CSF Triton; G-band, range 33 km (18 n miles) for 2 m² target

Navigation: Racal Decca 1226; I-band

Fire control: Thomson-CSF/Castor II; I/J-band; range 15 km (8 n miles) for 1 m² target.

Programmes: Ordered late 1976. Hulls of *Velarde*, *De los Heros*, *Larrea* subcontracted to Lorient Naval Yard, the others being built at Villeneuve-la-Garenne. Classified as corvettes

Modernisation: CM 22, 24 and 26 re-engined in 2000. The other three craft are to be similarly modernised

VELARDE

11/2004, Globke Collection / 1047863

2 MARAÑÓN CLASS (RIVER GUNBOATS) (CF/PGR)

Name	No	Builders	Commissioned
MARAÑÓN	CF 13 (ex-CF 401)	John I Thornycroft & Co Ltd	July 1951
UCAYALI	CF 14 (ex-CF 402)	John I Thornycroft & Co Ltd	June 1951

Displacement, tons: 365 full load

Dimensions, feet (metres): 154.8 w l > 32 < 4 (47.2 × 9.7 × 1.2)

Main machinery: 2 MTU 485 diesels; 800 hp (597 kW); 2 shafts

Speed, knots: 12

Range, n miles: 6,000 at 10 kt

Complement: 40 (2 officers)

Guns: 2–3 in (76 mm)/50, 3 Bofors 40 mm/60, 2 Oerlikon 20 mm.

Comment: Ordered early in 1950 and launched 7 March and 23 April 1951 respectively. Employed on police duties in Upper Amazon. Superstructure of aluminium alloy. Based at Iquitos.

MARAÑÓN

6/2006, Peruvian Navy / 1154740

2 LORETO CLASS (RIVER GUNBOATS) (CF/PGR)

Name	No	Builders	Commissioned
AMAZONAS	CF 11 (ex-CF 403)	Electric Boat Co, Groton	1935
LORETO	CF 12 (ex-CF 404)	Electric Boat Co, Groton	1935

Displacement, tons: 250 standard
 Dimensions, feet (metres): 145 x 22 x 4 (44.2 x 6.7 x 1.2)
 Main machinery: 2 diesels; 750 hp (551 kW); 2 shafts
 Speed, knots: 12
 Range, n miles: 4,000 at 10 kt
 Complement: 35 (2 officers)
 Guns: 1—3 in (76 mm). 3 Bofors 40 mm/60. 2 Oerlikon 20 mm.

Comment: Launched in 1934. In Upper Amazon Flotilla, based at Iquitos. The after 3 in gun has been replaced by a third 40 mm. Likely to be replaced by the Manuel Clavero class.

LORETO 6/2008*, Peruvian Navy / 1335409

1 + 1 (2) MANUEL CLAVERO CLASS (RIVER GUNBOATS) (CF/PGR)

Name	No	Builders	Launched	Commissioned
MANUEL CLAVERO	CF 16	Sima Iquitos	10 June 2008	2009
PUTUMAYO	CF 17	Sima Iquitos	2008	2009

Displacement, tons: 344 full load
 Dimensions, feet (metres): 149.9 x 34.8 x 7.5 (45.7 x 10.6 x 2.3)
 Main machinery: 3 CAT diesels; 1,365 hp (1 MW); 3 shafts
 Speed, knots: 14
 Range, n miles: 6,580 at 10 kt
 Complement: 28 (3 officers) + 20 marines
 Guns: 2—40 mm AGLs. 5—12.7 mm MGs. 2—7.62 mm MGs.
 Radars: Navigation: Furuno; I-band

Comment: Construction of the first of class began on 6 May 2006. The second is expected in early 2009 and both are to replace the Loreto class. Two further vessels may be ordered. Two 5.8 m fast interception craft are carried

MANUEL CLAVERO 6/2008*, Peruvian Navy / 1335408

AMPHIBIOUS FORCES

Notes: (1) There are plans for up to three 300 ft LSTs to be locally built when funds are available
 (2) Two Newport class LSTs (possibly *Freno* and *Racine*) may be acquired from the US Navy in 2009

4 PAITA (TERREBONNE PARISH) CLASS (LSTH)

Name	No	Builders	Commissioned
PAITA (ex-Walworth County LST 1164)	DT 141	Ingalls SB	26 Oct 1953
PISCO (ex-Waldo County LST 1163)	DT 142	Ingalls SB	17 Sep 1953
CALLAO (ex-Washoe County LST 1165)	DT 143	Ingalls SB	30 Nov 1953
ETEN (ex-Traverse County LST 1160)	DT 144	Bath Iron Works	19 Dec 1953

Displacement, tons: 2,590 standard; 5,800 full load
 Dimensions, feet (metres): 384 x 55 x 17 (117.1 x 16.8 x 5.2)
 Main machinery: 4 GM 16-278A diesels; 6,000 hp (4.48 MW); 2 shafts
 Speed, knots: 15
 Range, n miles: 15,000 at 9 kt
 Complement: 116
 Military lift: 2,000 tons; 395 troops
 Guns: 5 Bofors 40 mm/60 (2 twin, 1 single).
 Radars: Navigation: I-band

Comment: Four transferred from USA on loan 7 August 1984, recommissioned 4 March 1985. Have small helicopter platform. Original 3 in guns replaced by 40 mm. Lease extended by grant aid in August 1989, again in August 1994, and again in April 1999. All are active.

PAITA 11/2004, Globke Collection / 1047862

3 PUNTA MALPELO CLASS (RIVER ASSAULT CRAFT) (DLS/PBF)

Name	No	Builders	Commissioned
PUNTA MALPELO	DLS 381	Construcciones Náuticas, Peru	1996
PUNTA MERO	DLS 382	Construcciones Nauticas, Peru	1996
PUNTA SAL	DLS 383	Construcciones Náuticas, Peru	1998

Displacement, tons: To be announced
 Dimensions, feet (metres): 42.0 x 11.0 x 3.0 (12.8 x 3.36 x 0.91)
 Main machinery: 2 Diesel Volvo Penta TAMD/B; 286 hp (200 kW); 2 Hamilton waterjets
 Speed, knots: 32
 Range, n miles: 500 at 27 kt
 Complement: 7
 Guns: 1—40 mm AGL. 1—12.7 mm MG. 2—7.62 mm MGs.

Comment: Acquired in 1996.

SURVEY AND RESEARCH SHIPS

Notes: AH 177 is a 5 ton fast survey craft.

1 INSHORE SURVEY CRAFT (AGSC/EH)

Name	No	Builders	Commissioned
MACHA	AEH 174	SIMA, Chimbote	Apr 1982

Displacement, tons: 49 standard; 53 full load
 Dimensions, feet (metres): 64.9 x 17.1 x 3 (19.8 x 5.2 x 0.9)
 Main machinery: 2 Caterpillar 3406-TA diesels; 543 hp (400 kW); 2 shafts
 Speed, knots: 13
 Complement: 8 (2 officers)

Comment: Side scan sonar for plotting bottom contours. EH (Embarcacion Hidrográfica).

MACHA 6/2000, Peruvian Navy / 0105213

For details of the latest updates to *Jane's Fighting Ships* online and to discover the additional information available exclusively to online subscribers please visit jfs.janes.com

1 DOKKUM CLASS (AGSC/EH)

Name	No	Builders	Commissioned
CARRASCO (ex-Abcoude)	AH 171 (ex-M 810)	Smulders, Schiedam	18 May 1956

Displacement, tons: 373 standard, 453 full load
Dimensions, feet (metres): 152.9 × 28.9 × 7.5 (48.6 × 8.8 × 2.3)
Main machinery: 2 Fijenoord MAN V64 diesels; 2,500 hp(m) (1.84 MW); 2 shafts
Speed, knots: 16
Range, n miles: 2,500 at 10 kt
Complement: 27-36
Guns: 2 Oerlikon 20 mm/70.
Radars: Navigation. Racal Decca TM 1229C; I-band.

Comment: Service with the Netherlands Navy as a minesweeper included modernisation in the mid-1970s and a life prolonging refit in the late 1980s. *Carrasco* placed in reserve in 1993 and transferred to Peru 16 July 1994. The ship has been acquired for hydrographic duties. Two more were planned to follow in mid-1996 but the transfer was cancelled.

CARRASCO 6/2004, Peruvian Navy / 112/040

2 VAN STRAELEN CLASS (AGSC/EH)

Name	No	Builders	Commissioned
CARRILLO (ex-van Harnel)	AH 175	De Vries, Amsterdam	14 Oct 1960
MELO (ex-van der Wel)	AH 176	De Vries, Amsterdam	6 Oct 1961

Displacement, tons: 169 full load
Dimensions, feet (metres): 108.6 × 18.2 × 5.2 (33.1 × 5.6 × 1.6)
Main machinery: 2 GM diesels; 1,100 hp(m) (808 kW) sustained; 2 shafts
Speed, knots: 13
Complement: 17 (2 officers)
Guns: 1–20 mm

Comment: Both built as inshore minesweepers. Acquired 23 February 1985 for conversion with new engines and survey equipment.

MELO 2000, Peruvian Navy / 0105/12

1 RIVER SURVEY CRAFT (AGSC/AH)

Name	No	Builders	Commissioned
STIGLICH	AH 172	Sima, Iquitos	1981

Displacement, tons: 230 standard; 250 full load
Dimensions, feet (metres): 112.2 × 25.9 × 5.6 (34.2 × 7.9 × 1.7)
Main machinery: 2 Caterpillar 3304 diesels, 600 hp (367 kW); 2 shafts
Speed, knots: 9
Complement: 22 (2 officers)

Comment: *Stiglich* is based at Iquitos for survey work on the Upper Amazon.

STIGLICH 6/1999, Peruvian Navy / 008/533

AUXILIARIES

Notes: (1) All auxiliaries may be used for commercial purposes if not required for naval use.
 (2) There are three small river hospital craft: *Corrientes* (ABH 303), *Curaray* (ABH 304) and *Pastaza* (ABH 305).
 (3) There are four Rio Comaina class 30 m fuel barges (ABP 336-339), *Rio Comaina*, *Rio Huazaga*, *Rio Chinganaza*, *Rio Cenepa*.
 (4) There are two 15 m river cargo barges (ABC 360-361).

1 MOLLENDO CLASS (TRANSPORT) (AOR)

Name	No	Builders	Commissioned
MOLLENDO (ex-Ilo)	ATC 131	SIMA, Callao	15 Dec 1971

Displacement, tons: 18,400 full load
Measurement, tons: 13,000 dwt
Dimensions, feet (metres): 507.7 × 67.3 × 27.2 (154.8 × 20.5 × 8.3)
Main machinery: 1 Burmeister & Wain 6K47 diesel; 11,600 hp(m) (8.53 MW); 1 shaft
Speed, knots: 16.6
Complement: 60
Cargo capacity: 13,000 tons

Comment: Sister ship *Rimac* has been scrapped.

MOLLENDO 3/2006, Hachiro Nakai / 133/487

3 HARBOUR TANKERS (FUEL/WATER) (YW/YO)

CALOYERAS ACA 111 (ex-YW 128)	NOGUERA ACP 118 (ex-YO 221)
GAUDEN ACP 119 (ex-YO 171)	

Displacement, tons: 1,390 full load
Dimensions, feet (metres): 174 × 32 × 13.3 (52.3 × 9.8 × 4.1)
Main machinery: 1 GM diesel; 560 hp (418 kW); 1 shaft
Speed, knots: 8
Complement: 23
Cargo capacity: 200,000 gallons
Radars: Navigation: Raytheon, I-band.

Comment: YO 221 (fuel) transferred from US to Peru January 1975; YO 171 (fuel) 20 January 1981; YW 128 (water) 26 January 1985.

GAUDEN 6/2006, Peruvian Navy / 1184/39

1 TORPEDO RECOVERY VESSEL (YPT)

Name	No	Builders	Commissioned
SAN LORENZO	ART 322	Lüresen/Burmeister	1 Dec 1981

Displacement, tons: 68 standard; 65 full load
Dimensions, feet (metres): 82.7 × 18.4 × 5.6 (25.2 × 5.6 × 1.7)
Main machinery: 2 MTU 8V 396 TC82 diesels; 1,740 hp(m) (1.28 MW) sustained; 2 shafts
Speed, knots: 19. Range, n miles: 500 at 15 kt
Complement: 9

Comment: Can carry four long or eight short torpedoes.

SAN LORENZO 6/2006, Peruvian Navy / 1164/37

1 MORONA CLASS (RIVER HOSPITAL CRAFT) (ABH)

Name	No	Builders	Commissioned
MORONA	ABH 302	Sima, Iquitos	13 May 1976

Displacement, tons: 150 full load
 Dimensions, feet (metres): 98.4 × 19.7 × 2.0 (30.0 × 6.0 × 0.6)
 Main machinery: 2 Caterpillar 3304 diesels, 150 hp (112 kW) sustained; 2 shafts
 Speed, knots: 12
 Complement: 22 (2 officers)

Comment: *Morona* is used as a hospital craft and has a red cross on her superstructure.

MORONA 6/2008, Peruvian Navy / 1335406

1 LAKE HOSPITAL CRAFT (AH)

Name	No	Builders	Commissioned
PUNO (ex- <i>Yapura</i>)	ABH 306	J Watt Co, Thames Iron Works	18 May 1872

Displacement, tons: 500 full load
 Dimensions, feet (metres): 125.1 × 19.7 × 13.1 (38.13 × 6.0 × 4.0)
 Main machinery: 1 diesel; 1 shaft
 Speed, knots: 14
 Complement: 24 (1 officer)

Comment: Stationed on Lake Titicaca. 500 grt and has a diesel engine. The second of the class was finally paid off in 1990.

PUNO 8/1999, A Campanera I Rovira / 0081536

1 MARTE CLASS (SAIL TRAINING CRAFT) (AXS)

Name	No	Builders	Commissioned
MARTE (ex- <i>Neptuna</i> , ex- <i>Noah's Ark</i>)	ALY 313	James O Rasborough, Halifax, Canada	1974

Displacement, tons: 49 standard, 55 full load
 Dimensions, feet (metres): 66.6 × 17.0 × 6.4 (20.30 × 5.18 × 1.95)
 Main machinery: Two Perkins 130C diesels; 260 hp (194 kW); 2 props
 Speed, knots: 8
 Complement: 26
 Radars: Surface search: Furuno, I-band

Comment: Used for cadet instruction at the Naval Academy.

MARTE 6/2004, Peruvian Navy / 1127042

3 FLOATING DOCKS (AH)

ADF 104	ADF 106	ADF 107
---------	---------	---------

Displacement, tons: 4,500 (104); 1,900 (106); 5,200 (107)

Comment: 106 (ex-US AFDL 33) transferred 1959, 107 (ex-US ARD 8) transferred 1961; 104 built at SIMA, Callao in 1991

2 BAYÓVAR CLASS (TANKERS) (AOT)

Name	No	Builders	Commissioned
BAYÓVAR (ex- <i>Petr Schmidt</i>)	ATP 154	Kherson Shipyard	1987
ZORRITOS (ex- <i>Grigoriy Nesterenko</i>)	ATP 155	Kherson Shipyard	1986

Displacement, tons: 38,290 full load
 Measurement, tons: 18,625 grt
 Dimensions, feet (metres): 587.3 × 93.0 × 36.1 (179.0 × 25.3 × 11.0)
 Main machinery: 1 B&W 6L67GFC diesel; 11,900 hp (8.9 MW); 1 shaft
 Speed, knots: 15
 Complement: To be announced

Comment: Russian-built tankers acquired on 22 December 2006 and commissioned into the Peruvian Navy at Callao on 15 April 2007. They have replaced *Talara* and *Lobitos*.

BAYÓVAR 6/2008, Peruvian Navy / 1335407

TUGS

Notes: (1) There are three river tugs *Río Tapuina* AER 180, *Río Gaudín* AER 186 and *Río Zambrano* AER 187.

(2) There are also five small harbour tugs *Mejía* ARB 120, *Huertas* ARB 121, *Dueñas* ARB 126, *Olaya* ARB 128 and *Selendón* ARB 129.

(3) There is a 43 m salvage tug *Unanue* (AMB 160), first commissioned in 1944, transferred from the US in 1961.

1 CHEROKEE CLASS (SALVAGE TUG) (ATS)

Name	No	Builders	Commissioned
GUARDIAN RIOS (ex- <i>Pluto</i> ATF 90)	ARB 123	Cramp, Philadelphia, PA	1 Apr 1943

Displacement, tons: 1,640 full load
 Dimensions, feet (metres): 205 × 38.5 × 17 (62.5 × 11.7 × 5.2)
 Main machinery: Diesel-electric; 4 GM 12-278 diesels; 4,400 hp (3.28 MW); 4 generators; 1 motor; 3,000 hp (2.24 MW); 1 shaft
 Speed, knots: 16.5
 Range, n miles: 6,500 at 16 kt
 Complement: 99
 Guns: 2—20 mm.

Comment: Transferred from USA on loan in 1960, sold 17 May 1974. Fitted with powerful pumps and other salvage equipment.

GUARDIAN RIOS 6/2006, Peruvian Navy / 1164738

COAST GUARD

5 RIO NEPEÑA CLASS (LARGE PATROL CRAFT) (WPB)

Name	No	Builders	Commissioned
RIO NEPEÑA	PC 243	SIMA, Chimbote	1 Dec 1981
RIO TAMBO	PC 244	SIMA, Chimbote	10 Mar 1982
RIO OCOÑA	PC 245	SIMA, Chimbote	14 July 1983
RIO HUARMEY	PC 246	SIMA, Chimbote	8 Oct 1984
RIO ZAÑA	PC 247	SIMA, Chimbote	12 Feb 1985

Displacement, tons: 253 standard; 296 full load
Dimensions, feet (metres): 167 × 24.8 × 5.6 (50.9 × 7.4 × 1.7)
Main machinery: 4 Bazen MAN V8V diesels; 5,640 hp(m) (4.15 MW); 2 shafts
Speed, knots: 23
Range, n miles: 3,050 at 17 kt
Complement: 39 (4 officers)
Guns: 1 Oerlikon 20 mm 2—12.7 mm MGs.
Radars: Surface search: Decca T226; I-band.

Comment: Have aluminium alloy superstructures. The prototype craft was scrapped in 1990. *Rio Ocoña* completed refit in July 1996 and the rest of the class were refitted at one per year.

RIO OCOÑA

11/2004, Globke Collection / 1047861

6 CHICAMA (DAUNTLESS) CLASS (PBR)

CHICAMA PC 216	CHORRILLOS PC 218	CAMANA PC 220
HUANCHACO PC 217	CHANCAY PC 219	CHALA PC 221

Displacement, tons: 14 full load
Dimensions, feet (metres): 40 × 14 × 4.4 (12.2 × 4.3 × 1.3)
Main machinery: 2 Caterpillar 3208TA diesels; 870 hp (650 kW); 2 shafts
Speed, knots: 27. **Range, n miles:** 600 at 18 kt
Complement: 5 (1 officer)
Guns: 1—12.7 mm MG. 1—7.62 mm MG.
Radars: Surface search: Furuno B21; I-band.

Comment: Ordered in February 2000 under FMS funding. Built by SeaArk Marine, Arkansas. First pair delivered in August 2000 remainder in November 2000. Formerly river patrol craft, now operational on Pacific Coast.

CHANCAY

6/2004, Peruvian Coast Guard / 1177045

1 RIVER PATROL CRAFT (PBR)

Name	No	Builders	Commissioned
RIO PIURA	PC 242 (ex-P 252)	Viareggio, Italy	5 Sep 1960

Displacement, tons: 44 standard; 55 full load
Dimensions, feet (metres): 65.7 × 17 × 3.2 (20 × 5.2 × 1)
Main machinery: 2 GM 8V-71 diesels; 460 hp (344 kW) sustained, 2 shafts
Speed, knots: 15
Range, n miles: 1,000 at 16 kt
Complement: 9 (2 officers)
Guns: 2—12.7 mm MGs. 1 Oerlikon 20 mm
Radars: Navigation: Raytheon; I-band

Comment: Ordered in 1959. Armament changed in 1992. Refitted in 1996

RIO PIURA

6/2004, Peruvian Coast Guard / 1177043

1 PGM 71 CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
RIO CHIRA	PM 223 (ex-PGM 111)	SIMA, Callao	29 May 1972

Displacement, tons: 136 standard; 147 full load
Dimensions, feet (metres): 118.2 × 21 × 6 (36.0 × 6.4 × 1.8)
Main machinery: 2 Detroit GN-71 diesels, 1,450 hp (1.08 MW); 2 shafts
Speed, knots: 15
Range, n miles: 1,500 at 10 kt
Complement: 16 (3 officers)
Guns: 1—12.7 mm MG
Radars: Surface search: Raytheon, I-band.

Comment: Acquired from the Navy in 1975. Paid off in 1994 but back in service again in 1997, with refurbished engines.

RIO CHIRA

2000, Peruvian Coast Guard / 0105718

10 ZORRITOS CLASS (RIVER PATROL CRAFT) (PBR)

Name	No	Builders	Commissioned
ZORRITOS	PC 222	SIMA, Callao	23 Sep 2003

RÍO NAPO 6/2008*, Peruvian Navy / 0105221

Philippines

Country Overview

The Republic of the Philippines was formally proclaimed in 1946. Situated between Taiwan to the north and Indonesia and Malaysia to the south, the country comprises about 7,100 islands with a total coastline of 19,597 n miles with the South China, Philippine and Celebes Seas. Eleven islands, Bohol, Cebu, Leyte, Luzon, Masbate, Mindanao, Mindoro, Negros, Palawan, Panay, and Samar, contain the majority of the population. Most remaining islands are less than 1 square mile in area. The capital, principal city and port is Manila. Other important ports include Davao, Cebu and Zamboanga. An archipelagic state, territorial seas (12 n miles) are claimed. A 200 n mile EEZ has also been claimed but the limits have not been defined.

Headquarters Appointments

Flag Officer-in-Command:

Rear Admiral Ferdinand S Golez

Commander Fleet:

Rear Admiral George T Uy

Commandant Coast Guard:

Vice Admiral Wilfredo D Tamayo

Commandant Marines:

Major General Mohammad Ben Dolorfino

Personnel

(a) 2009: 22,000 Navy; 8,700 Marines; 3,600 Coast Guard
(b) Reserves: 17,000

Organisation

The Naval Headquarters is at Manila. The fleet is divided into functional units including the Ready Force, Patrol Force, Service Force, Assault Craft Force, Naval Air Group and Naval Special Warfare Group. There are six operational areas of responsibility: Southern Luzon, Northern Luzon; Central, West; Western Mindanao and Eastern Mindanao. The Coast Guard was transferred to the Department of Transport and Communication in 1998. There are eight Coast Guard Districts, 47 stations and 154 Coast Guard Detachment units.

Marine Corps

Marines comprise three tactical brigades composed of 10 tactical battalions, one support regiment, a service group, a guard battalion and a reconnaissance battalion. Headquarters at Ternate, Manila Bay. Deployed in Mindanao and Palawan.

Bases

Main Cavite.

Operational: San Vicente, Mactan, Ternate.
Stations: Cebu, Davao, Legaspi, Bonifacio, Tacloban, San Miguel, Utugan, Balabne, Puerto Princesa, Pagasa.

Prefix to Ships' Names

BRP: Barko Republika Pilipinas

1 CANNON CLASS (FF)

Name	No	Builders	Laid down	Launched	Commissioned
RAJAH HUMABON (ex-Hatsuhi DE 263, ex-Atherton DE 169)	PF 11 (ex-PF 78)	Norfolk Navy Yard, Portsmouth, VA	14 Jan 1943	27 May 1943	29 Aug 1943

Displacement, tons: 1,390 standard; 1,750 full load
Dimensions, feet (metres): 306 × 36.6 × 14
(93.3 × 11.2 × 4.3)
Main machinery: Diesel electric; 2 GM EMD 16V-645E7 diesels; 5,800 hp (4.32 MW); 4 generators; 2 motors; 2 shafts
Speed, knots: 18
Range, n miles: 6,000 at 14 kt
Complement: 165

Guns: 3 US 3 in (76 mm)/50 Mk 22; 20 rds/min to 12 km (6.6 n miles); weight of shell 6 kg.
6 US/Bofors 40 mm/56 (3 twin). 4 Oerlikon 20 mm/70; 4—12.7 mm MGs.

Weapons control: Mk 52 GFCS with Mk 41 rangefinder for 3 in guns; 3 Mk 51 Mod 2 GFCS for 40 mm

Radars: Surface search: Raytheon SPS-5; G/H-band. Navigation: RCA/GE Mk 28; I-band.

Sonars: SQS-17B, hull-mounted; active search and attack; medium/high frequency.

Programmes: *Hatsuhi* originally transferred by the US to Japan 14 June 1955 and paid off June 1975 reverting to US Navy. Transferred to Philippines 23 December 1978. Towed to South Korea 1979 for overhaul and modernisation. Recommissioned 27 February 1980. A sister ship *Datu Kalantiao* lost during Typhoon Clara 20 September 1981.

Modernisation: Upgrade plans have been suspended.

Operational: Hedgehog A/S mortars have been reported.

ARTEMIO RICARTE (ex-Starling)	PS 37 (ex-P 241)	Hall Russell, Aberdeen	11 Sep 1983	10 Aug 1984	4 Aug 1997

Displacement, tons: 763 full load
Dimensions, feet (metres): 204.1 x 32.8 x 8.9
 (62.6 x 10 x 2.7)

Main machinery: 2 Crossley Pielstick 18 PA6 V 280 diesels, 14,000 hp (m) (10.6 MW) sustained; 2 shafts; 1 retractable Schottel prop; 181 hp (135 kW)

Speed, knots: 25

Range, n miles: 2,500 at 17 kt

Complement: 31 (6 officers) plus 7 spare berths

Guns: 1--3 in (76 mm)/62 OTO Melara compact 85 kds. min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg

1 MSI Defence Systems 25 mm.
 4 FN 762 mm MGs.

Weapons control: Radamec 1500 optronic director
Radars: Sperry Marine Bridgemaster E; E/F/I/J-bands.

Programmes: Letter of Intention to purchase from the UK signed in November 1996. Transferred 1 August 1997 after sailing from Hong Kong on 1 July 1997. Others of the class in service with the navy of the Irish Republic.

Modernisation: An upgrade programme was agreed in 2002 and a contract was signed on 6 December 2004 for phase one of the work which included overhaul of

the 76 mm gun, installation of a MSI Defense Systems 25 mm mounting on the stern, replacement of Sea Archer fire-control system with a Radamec 1500 optronic director, replacement of the navigation radar with Sperry Marine Bridgemaster E and new navigation systems. Phase one was completed in September 2006. Phases two and three are to involve new propulsion and safety systems.

Structure: Fitted with telescopic cranes, lorry drive and replenishment at sea equipment. In UK service, two fast pursuit craft were carried.

Operational: These ships are the workhorses of the fleet. Based at Cavite.

ARTEMIO RICARTE

6/2008*, Ships of the World / 1353255

1 CYCLONE CLASS (COASTAL PATROL SHIP) (PB)

Name	No	Builders	Commissioned
GENERAL MARIANO ALVARES (ex-Cyclone)	PS 38 (ex-PC 1)	Bollinger, Lockport	7 Aug 1993

Displacement, tons: 386 full load
Dimensions, feet (metres): 179 x 25.9 x 7.9
 (54.6 x 7.9 x 2.4)

Main machinery: 4 Paxman Valenta 16RP200CM diesels, 13,400 hp (10 MW) sustained; 4 shafts

Speed, knots: 35

Range, n miles: 2,500 at 12 kt

Complement: 28 (4 officers) plus 8

Countermeasures: Decoys: 2 Mk 52 sextuple and/or Wallop

Super Barricade Mk 3 chaff launchers

ESM: Privateer APR-39; radar warning

Weapons control: Marconi VISTAR IM 405 IR system

Radars: Surface search: 2 Sperry RASCAR, E/F/I/J-band

Sonars: Wesmar; hull-mounted; active; high frequency

Programmes: Transferred from the USN to the Philippines in February 2004 following refit at Bollinger. Recommissioned on 8 March 2004.

Modernisation: All armament was removed before transfer from the USN. New armament is likely to include two 25 mm guns and 12.7 mm machine guns.

Structure: Design based on Vosper Thornycroft Ramadan class modified for USN requirements including 1 in armour on superstructure. The craft has a slow speed lorry capability and has been modified to incorporate a semi-dry well, boat ramp and stern gate to facilitate deployment and recovery of a fully loaded RIB while the ship is making way.

Navigation: RCA SPN-18; I/J-band.

Programmes: Five transferred from the US to the Philippines in July 1948 (PS 28-32); PS 22 to South Vietnam from US Navy on 29 November 1961, PS 20 in April 1962, PS 19 on 11 July 1966, and PS 23 in June 1970. PS 19, 20 and 22 to Philippines November 1975 and PS 23 5 April 1976.

Modernisation: PS 19, 22, 31 and 32 refurbished in 1990-91, PS 23 and 28 in 1992 and the last pair in 1996/97.

Structure: First three were originally fitted as rescue ships (PCER). A/S equipment has been removed or is inoperable. PS 20 has some minor structural differences having been built as an Admirable class MSF.

Operational: PS 29 is probably not operational

CEBU

5/2000, M Declerck / 0105727

LAND-BASED MARITIME AIRCRAFT

Notes: There are two Cessna 177 Cardinal transport aircraft.

Numbers/Type: 7 PADC (Pilatus Britten-Norman) Islander F27MP.

Operational speed: 150 kt (280 km/h)

Service ceiling: 18,900 ft (5,760 m)

Range: 1,500 n miles (2,775 km)

Role/Weapon systems: Short-range MR and SAR aircraft. First purchased in 1989. Three transferred from the Air Force. An upgrade programme, including engines, avionics and communications systems has been completed on five aircraft. The remaining two aircraft are to be similarly modernised. Sensors: Search radar, cameras. Weapons: Unarmed.

Numbers/Type: 5 PADC (MBB) BO 105C.

Operational speed: 145 kt (270 km/h)

Service ceiling: 17,000 ft (5,180 m)

Range: 355 n miles (657 km)

Role/Weapon systems: Sole shipborne helicopter; some shore-based for SAR, some commando support capability. Purchased at the rate of one per year from 1986 to 1992. Upgrade of avionics and communications is planned. Sensors: Some fitted with search radar. Weapons: Unarmed.

F-27MP

10/2001, Adolfo Ortigueira Gil / 0561482

PATROL FORCES

Notes: Plans to procure three offshore patrol craft have been suspended although they remain a long-term aspiration.

2 AGUINALDO CLASS (LARGE PATROL CRAFT) (PBO)

BRIGADIER ABRAHAM CAMPO (ex-Point Doran)	PG 396 (ex-82375)	CGYard, Maryland	1 June 1970

Displacement, tons: 67 full load
Dimensions, feet (metres): 83 x 17.2 x 5.8 (25.3 x 5.2 x 1.8)
Main machinery: 2 Caterpillar 3412 diesels; 1,600 hp (1.19 MW); 2 shafts
Speed, knots: 23 **Range, n miles:** 1,500 at 8 kt
Complement: 10
Guns: 2-12.7 mm MGs.
Radars: Surface search: Furuno; I-band

Comment: PG 394 transferred from US Coast Guard 16 November 1999. Second transferred 22 March 2001. This class is in service with many other navies.

POINT CLASS (US colours) 4/1992, van Ginderen Collection / DOR1549

3 KAGITINGAN CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
KAGITINGAN	P 101	Hamelin SY, Germany	9 Feb 1979
BAGONG LAKAS	PG 102 (ex-P 102)	Hamelin SY, Germany	9 Feb 1979
BAGONG SILANG	PG 104 (ex-P 104)	Hamelin SY, Germany	July 1979

Displacement, tons: 150 full load
Dimensions, feet (metres): 121.4 x 20.3 x 5.6 (37 x 6.2 x 1.7)
Main machinery: 2 MTU MB 16V-538TB91 diesels, 2,500 hp (1.86 MW) sustained; 2 shafts
Speed, knots: 21
Complement: 30 (4 officers)
Guns: 2-30 mm (twin), 4-12.7 mm MGs, 2-762 mm MGs.
Radars: Surface search: I-band

Comment: Based at Cavite. P 103 paid off and used for spares. All still in service.

BAGONG LAKAS 1993, Philippine Navy / 0506161

8 TOMAS BATILO (SEA DOLPHIN) CLASS (FAST ATTACK CRAFT) (PBF)

TOMAS BATILO PG 110	SALVADOR ARCEDE PG 114	+2
BONNY SERRANO PG 111	RAMON AGUIRRE PG 115	
BIENVENIDO SALTING PG 112	NICOLAS MAHUSAY PG 116	

Displacement, tons: 150 full load
Dimensions, feet (metres): 121.4 x 22.6 x 5.6 (37 x 6.9 x 1.7)
Main machinery: 2 MTU 20V-538TB91 diesels; 9,000 hp (6.71 MW) sustained; 2 shafts
Speed, knots: 38
Range, n miles: 600 at 20 kt
Complement: 31 (5 officers)
Guns: 2 Emerson Electric 30 mm (twin); 1,200 rds/min combined to 6 km (3.2 n miles); weight of shell 0.35 kg
 1 Bofors 40 mm/60, 2 Oerlikon 20 mm.
Weapons control: Optical director
Radars: Surface search: Raytheon 1645; I-band

Comment: Six transferred from South Korea on 15 June 1995. Part of the PKM 200 series. Different armament to South Korean ships of the same class. A further two were transferred on 7 December 2006. Refit of two other vessels is under consideration.

BIENVENIDO SALTING 6/1996, Philippine Navy / 0506311

DIOSCORO PAPA PG 381	FELIX APOLINARIO PG 395

Displacement, tons: 56 full load
Dimensions, feet (metres): 78 x 20 x 5.8 (23.8 x 6.1 x 1.8)
Main machinery: 2 Detroit 16V-92TA diesels; 1,380 hp (1.03 MW) sustained; 2 shafts
Speed, knots: 28
Range, n miles: 1,200 at 12 kt
Complement: 8-12 (1 officer)
Guns: 1 Bushmaster 25 mm or Bofors 40 mm/60
 4-12.7 mm Mk 28 MGs, 2-762 mm M60 MGs.
Radars: Surface search: Raytheon SPS-64(V)2; I-band

Comment: There are four batches of this class. Batch I (PCF 370-378), Batch II (PCF 379-390), Batch III (PCF 392-393) and Batch IV (PCF 395). The main difference between batches include weapons, electronics and accommodation. First four ordered from Hafter Marine in August 1989 under FMS and built at Equitable Shipyards, New Orleans, as were a further four ordered in 1990. Eight more ordered in March 1993 with co-production between Hafter Marine and AG&P Shipyard, Batangas. An additional three were ordered in 1995. Built to US Coast Guard standards with an aluminium hull and superstructure. The main gun may be fitted in all after some minor modifications. PG 392 delivered in March 1998, PG 393 in July 1998 and PG 395 on 10 October 2000.

TESTIMO FIGURACION 5/2000, M Declerck / 0105226

612 Philippines/Patrol forces – Auxiliaries

4 PCF 65 (SWIFT MK 3) CLASS (COASTAL PATROL CRAFT) (PB)

PC 351–354

Displacement, tons: 29 standard; 37 full load
Dimensions, feet (metres): 65 × 16 × 3.4 (19.8 × 4.9 × 1)
Main machinery: 3 GM 12V-71TI diesels; 840 hp (616 kW) sustained; 3 shafts
Speed, knots: 25
Complement: 8
Guns: 2–12.7 mm MGs.
Radars: Surface search: Koden; I-band.

Comment: Improved Swift type inshore patrol boats built by Peterson and delivered 1975–76. Aluminium construction. Some that were laid up have been returned to service. New radars fitted.

PC 354

5/1998, John Mortimer / 0081551

10 CONRADO YAP (SEA HAWK/KILLER) CLASS (COASTAL PATROL CRAFT) (PBF)

CONRADO YAP PG 840
 TEDORICO DOMINADO JR PG 842
 COSME ACOSTA PG 843
 JOSÉ ARTIAGA JR PG 844
 NICANOR JIMENEZ PG 846

LEOPOLDO REGIS PG 847
 LEÓN TADINA PG 848
 LORETO DANIFO PG 849
 APOLLO TIANO PG 851
 SULPICIO FERNANDEZ PG 853

Displacement, tons: 74.5 full load
Dimensions, feet (metres): 83.7 × 17.7 × 6.2 (25.5 × 5.4 × 1.9)
Main machinery: 2 MTU 16V-538TB91 diesels; 5,000 hp (m) (3.72 MW); 2 shafts
Speed, knots: 38
Range, n miles: 290 at 20 kt
Complement: 15 (3 officers)
Guns: 1 Bofors 40 mm/60, 2 Oerlikon 20 mm (twin) Mk 16.
Radars: Surface search: Raytheon 1645; I-band.

Comment: Type PK 181 built by Korea Tacoma and Hyundai 1975–78. Twelve craft transferred from South Korea 19 June 1993. Eight were commissioned 23 June 1993 and a further four on 23 June 1994. However PC 845 and PC 852 have not been reactivated and are probably used as spares.

CONRADO YAP CLASS

1993, Philippine Navy / 0506162

SURVEY AND RESEARCH SHIPS

Notes: (1) Survey ships are operated by Coast and Geodetic Survey of Ministry of National Defence and are not naval. These include: *Atymba*, *Alunya*, *Arnya*, *Bantay Kalikasan* and *Explorer*.
 (2) Two research ships *Fort San Antonio* (AM 700) and *Fort Abad* (AM 701) were acquired in 1993.

AUXILIARIES

Notes: (1) All LSTs, LSVs, LCMs and LCUs are classified as Transports.
 (2) Procurement of a multirole vessel, capable of transporting 500 troops, is under consideration. The broad requirement is for a 150 m vessel capable of 20 kt.

2 BACOLOD CITY (FRANK S BESSON) CLASS (LSVH)

Name	No	Builders	Commissioned
BACOLOD CITY	LC 550	Moss Point Marine	1 Dec 1993
DAGUPAN CITY (ex-Cagayan De Oro City)	LC 551	Moss Point Marine	5 Apr 1994

Displacement, tons: 4,265 full load
Dimensions, feet (metres): 272.8 × 60 × 12 (83.1 × 18.3 × 3.7)
Main machinery: 2 GM EMD 16V-645E6 diesels; 5,800 hp (4.32 MW) sustained; 2 shafts; bow thruster; 250 hp (187 kW)
Speed, knots: 11.8
Range, n miles: 6,000 at 11 kt
Complement: 30 (6 officers)
Military lift: 2,280 tons (900 for amphibious operations) of vehicles, containers or cargo, plus 150 troops, 2 LCVPs on davits
Radars: Navigation: Raytheon SPS-64(V)2; I-band
Helicopters: Platform for 1 BO 105C

Comment: Contract announced by Trinity Marine 3 April 1992 for two ships with an option on a third which was not taken up. Ro-ro design with 10,500 sq ft of deck space for cargo. Capable of beaching with 4 ft over the ramp on a 1 : 30 offshore gradient with a 900 ton cargo. Similar to US Army vessels but with only a bow ramp. The stern ramp space is used for accommodation for 150 troops and a helicopter platform is fitted over the stern.

6/2008, Ships of the World / 1353254

DAGUPAN CITY

12/1999, Sattler/Steele / 0081544

5 LST 512-1152 CLASS (TRANSPORT SHIPS) (LST)

Name	No	Builders	Commissioned
ZAMBOANGA DEL SUR (ex-Cam Ranh, ex-Marion County LST 975)	LT 86	Bethlehem Steel, Hingham, Mass	3 Feb 1945
SOUTH COTABATO (ex-Cayuga County LST 529)	LT 87	Bethlehem Steel, Hingham, Mass	28 Feb 1944
LAGUNA (ex-FLST 230)	LT 501	American Bridge, Ambridge, PA	3 Nov 1943
LANAO DEL NORTE (ex-FLST 568)	LT 504	Missouri Valley Bridge and Iron Co, Evensville, Ind	29 May 1944
KALINGA APAYAO (ex-Can Tho, ex-Garrett County AGP 786, ex-LST 786)	LT 516 (ex-AE 516)	Dravo Corp., Pittsburgh, PA	28 Aug 1944

Displacement, tons: 1,620 standard; 2,472 beaching; 4,080 full load
Dimensions, feet (metres): 328 × 50 × 14 (100 × 15.2 × 4.3)
Main machinery: 2 GM 12-567A diesels; 1,800 hp (1.34 MW); 2 shafts
Speed, knots: 10
Complement: Varies-approx 60-110 (depending upon employment)
Military lift: 2,100 tons, 18 tanks or 10 tanks plus 200 troops
Guns: 6 US/Bofors 40 mm (2 twin, 2 single) or 4 Oerlikon 20 mm (in refitted ships).
Radars: Navigation: Raytheon SPS-64(V)2; I-band.

Programmes: Transferred from US Navy in 1976 with exception of LT 87 and LT 516 which were used as light craft repair ships in South Vietnam and have retained amphibious capability (transferred to Vietnam 1970 and to Philippines 1976, acquired by purchase 5 April 1976). LT 86 transferred (grant aid) 17 November 1975. LT 501 and 504 commissioned in Philippine Navy 8 August 1978 and LT 507 on 18 October 1978.

Modernisation: Several have had major refits including replacement of frames and plating as well as engines and electrics and provision for four 20 mm guns to replace the 40 mm guns.

Structure: Some of the later ships have tripod masts, others have pole masts.

Operational: All are used for general cargo work in Philippine service. Fourteen were deleted in 1989 and one sank in 1991. Two paid off in 1992 and one in 1993. *South Cotabato* was also paid off in 1993 but brought back in to service in 1994. *Benguet* broke down in the South China Sea in April 1995 and had to be taken in tow. *Benguet* again grounded in the Spratly Islands on 3 November 1999 and after a month on the rocks is probably beyond economical repair. One further ship, *Sierra Madre* is reported to be used as an observation post in the Spratly Islands. Replacements are needed but have not been given priority.

LANAO DEL NORTE

1993, Philippine Navy / 0506163

1 ACHELOUS CLASS (REPAIR SHIP) (ARL)

Name	No	Builders	Commissioned
YAKAL (ex-Satyr ARL 23, ex-LST 852)	AD 617 (ex-AR 517)	Chicago Bridge & Iron	20 Nov 1944

Displacement, tons: 4,342 full load
Dimensions, feet (metres): 328 × 50 × 14 (100 × 15.2 × 4.3)
Main machinery: 2 GM 12-567A diesels; 1,800 hp (1.34 MW); 2 shafts
Speed, knots: 11.6
Complement: 220 approx
Guns: 4 US/Bofors 40 mm (quad), 10 Oerlikon 20 mm (5 twin)

Comment: Transferred from the US to the Philippines on 24 January 1977 by sale (Originally to South Vietnam 30 September 1971). Converted during construction Extensive machine shop, spare parts stowage, and logistic support.

YAKAL 1994, Philippine Navy / 0081545

42 LCM/LCU

Comment: Ex-US minor landing craft mostly transferred in the mid-1970s. 11 LCM 6, five LCM 8, eight LCU, 14 RUC and two LCVP. Used as transport vessels.

LCU 286 5/1998, van Ginderen Collection / 0052705

1 ALAMOSA CLASS (SUPPLY SHIP) (AK)

Name	No	Builders	Commissioned
MACTAN (ex-Kukul, ex-Coiquith)	AC 90 (ex-TK 90)	Froemming, Milwaukee	22 Sep 1944

Displacement, tons: 2,500 light, 7,570 full load
Dimensions, feet (metres): 338.5 × 50 × 13 (103.2 × 15.2 × 5.5)
Main machinery: 1 Nordberg diesel; 1,700 hp (1.27 MW); 1 shaft
Speed, knots: 11
Complement: 85
Guns: 2—12.7 mm MGs.

Comment: Transferred from the US Coast Guard on 1 March 1972. Used to supply military posts and lighthouses in the Philippine archipelago. Was to have been paid off in 1994 but has been kept in service.

MACTAN 4/1996, Philippine Navy / 0508312

1 TRANSPORT VESSEL (AP)

Name	No	Builders	Commissioned
ANG PANGULO (ex-The President, ex-Roxas, ex-Lapu-Lapu)	AT 25 (ex-TP 777)	Ishikawajima, Japan	1959

Displacement, tons: 2,239 standard; 2,727 full load
Dimensions, feet (metres): 257.6 × 42.6 × 21 (78.5 × 13 × 6.4)
Main machinery: 2 Mitsui DE642/VBF diesels; 5,000 hp(m) (3.68 MW); 2 shafts
Speed, knots: 18. **Range, a miles:** 6,900 at 15 kt
Complement: 81 (8 officers)
Guns: 3 Oerlikon 20 mm/70 Mk 4, 8—7.62 mm MGs.
Radars: Navigation RCA CRMN-1A-75; I-band

Comment: Built as war reparation; launched in 1958. Was used as presidential yacht and command ship with accommodation for 50 passengers. Originally named *Lapu-Lapu* after the chief who killed Magellan; renamed *Roxas* on 9 October 1962 after the late Manuel Roxas, the first President of the Philippines Republic. Renamed *The President* in 1967 and *Ang Pangulo* in 1975. In early 1987 was earmarked to transport President Marcos to Hong Kong and exile. The ship is now used as an attack transport, and still as a Presidential Yacht.

ANG PANGULO 5/1998, John Mortimer / 0081546

2 YWTYPE (WATER TANKERS) (AWT)

Name	No	Builders	Commissioned
LAKE BULUSAN	AW 33 (ex-YW 111)	Marine Iron, Duluth	1 Aug 1945
LAKE PAOAY	AW 34 (ex-YW 130)	Leatham D Smith, Sturgeon Bay	28 Aug 1945

Displacement, tons: 1,237 full load
Dimensions, feet (metres): 174 × 32.7 × 13.2 (53 × 10 × 4)
Main machinery: 2 GM 8-278A diesels; 1,500 hp (1.12 MW); 2 shafts
Speed, knots: 7.5
Complement: 29
Cargo capacity: 200,000 gallons
Guns: 1 Bofors 40/60 1 Oerlikon 20 mm.

Comment: Basically similar to YOG type but adapted to carry fresh water. Transferred from the US to the Philippines on 16 July 1975.

LAKE PAOAY 5/1998, van Ginderen Collection / 0052708

2 YOG TYPE (TANKERS) (YO)

Name	No	Builders	Commissioned
LAKE BUHI (ex-YOG 73)	AF 78 (ex-YO 78)	Puget Sound, Bremerton	28 Nov 1944
LAKE TAAL (ex-YOG 72)	AF 72 (ex-YO 72)	Puget Sound, Bremerton	14 Apr 1945

Displacement, tons: 447 standard; 1,400 full load
Dimensions, feet (metres): 174 × 32.7 × 13.2 (53 × 10 × 4)
Main machinery: 2 GM 8-278A diesels; 1,500 hp (1.12 MW); 2 shafts
Speed, knots: 8
Complement: 28
Cargo capacity: 6,570 barrels diesel and gasoline
Guns: 2 Oerlikon 20 mm/70 Mk 4.

Comment: Former US Navy gasoline tankers. Transferred in July 1967 on loan and by purchase 5 March 1980.

LAKE BUHI 1993, Philippine Navy / 0506194

614 Philippines/Auxiliaries — Coast guard

4 FLOATING DOCKS (YFD)

YD 200 (ex-AFDL 24) YD 204 (ex-AFDL 20) YD 205 (ex-AFDL 44) — (ex-AFDL 40)

Comment: Floating steel dry docks built in the USA; all are former US Navy units with YD 200 transferred in July 1948, YD 204 in October 1961 (sale 1 August 1980), YD 205 in September 1969 and AFDL 40 in 1994.

Capacities: YD 205, 2,800 tons; YD 200 and YD 204, 1,000 tons. In addition there are two floating cranes, YU 206 and YU 207, built in US in 1944 and capable of lifting 30 tons.

TUGS

Notes: A number of harbour tugs have been acquired from the US. The latest type is ex-Army of 390 tons, a speed of 12 kt and a bollard pull of 12 tons.

HARBOUR TUG

5/1998, John Mortimer / 0052709

COAST GUARD

Notes: (1) Some of the PCF craft listed are manned by the Navy as is the buoy tender *Mangyan*.

(2) The Coast Guard also operates one LCM 6 (BM 270), one LCVP (BV 182) and a River Utility Craft VU 463.

(3) Ten Rodman 101 and four Rodman 38 were ordered for delivery to the Police by 2005.

4 SAN JUAN CLASS (WPBO)

PALAWAN (ex-PGM 42)	PG 64	Tacoma, WA	June 1960

Displacement, tons: 124 full load
Dimensions, feet (metres): 100.3 × 18.6 × 6.9 (30.6 × 5.7 × 2.1)
Main machinery: 2 MTU MB 12V 493 TY57 diesels; 2,200 hp(m) (1.6 MW) sustained; 2 shafts
Speed, knots: 17
Range, n miles: 1,400 at 11 kt
Complement: 26-30
Guns: 2 Oerlikon 20 mm, 2—12.7 mm MGs, 1—81 mm mortar
Radars: Surface search: Alpelco DFR-12; I/J-band.

Comment: Steel-hulled craft built under US military assistance programmes. Assigned US PGM-series numbers while under construction. Transferred upon completion. These craft are lengthened versions of the US Coast Guard 95 ft Cape class patrol boat design. Operational status is doubtful.

AGUSAN 1994, Philippine Navy / 0081550

10 PCF 46 CLASS (COASTAL PATROL CRAFT) (PB)

DB 411	DB 417	DB 422	DB 428	DB 435
DB 413	DB 419	DB 426	DB 431-432	

Displacement, tons: 21 full load
Dimensions, feet (metres): 45.9 × 14.5 × 3.3 (14 × 4.4 × 1)
Main machinery: 2 Cummins diesels, 740 hp (552 kW); 2 shafts
Speed, knots: 25
Range, n miles: 1,000 at 15 kt
Complement: 8
Guns: 2—12.7 mm (twin) MGs, 1—762 mm M60 MG
Radars: Surface search: Kelvin Hughes 17; I-band.

Comment: Built by Marcelo Yard, Manila and were to have been delivered 1976-78 at the rate of two per month. By the end of 1976, 26 had been completed but a serious fire in the shipyard destroyed 12 new hulls and halted production. Some deleted.

DB 435

1993, Philippine Navy / 0505166

12 PCF 50 (SWIFT MK 1 AND MK 2) CLASS (COASTAL PATROL CRAFT) (PB)

DF 300-303	DF 305	DF 307-313
------------	--------	------------

Displacement, tons: 22.5 full load
Dimensions, feet (metres): 50 × 13.6 × 4 (15.2 × 4.1 × 1.2) (Mk 1) 51.3 × 13.6 × 4 (15.6 × 4.1 × 1.2) (Mk 2)
Main machinery: 2 GM 12-71 diesels; 680 hp (504 kW) sustained; 2 shafts
Speed, knots: 28
Range, n miles: 685 at 16 kt
Complement: 6
Guns: 2—12.7 mm (twin) MGs, 2 M—79 40 mm grenade launchers.
Radars: Surface search: Decca 202; I-band.

Comment: Most built in the USA. Built for US military assistance programmes and transferred in the late 1980s. Some built in 1970 in the Philippines (ferro-concrete) with enlarged superstructure. DF 300-303 are Swift Mk 1. DF 305 and DF 307-313 are Swift Mk 2.

DF 308

5/1998, van Ginderen Collection / 0081552

10 PCF 65 (SWIFT MK 3) CLASS (COASTAL PATROL CRAFT) (PB)

DF 325-332	DF 334	DF 347
------------	--------	--------

Displacement, tons: 29 standard; 37 full load
Dimensions, feet (metres): 65 × 16 × 3.4 (19.8 × 4.9 × 1)
Main machinery: 3 GM 12V-71T1 diesels; 840 hp (616 kW) sustained; 3 shafts
Speed, knots: 25
Complement: 8
Guns: 2—12.7 mm MGs
Radars: Surface search: Kodan; I-band.

Comment: Improved Swift type inshore patrol boats built by Peterson and delivered 1975-76. Aluminium construction. Some that were laid up have been returned to service. New radars fitted.

DF 347

5/1998, Sattler & Steele 0057/11

3 DE HAVILLAND CLASS (PB)

DF 321-323

Displacement, tons: 25 full load
Dimensions, feet (metres): 54.8 × 16.4 × 4.3 (16.7 × 5 × 1.3)
Main machinery: 2 diesels; 740 hp (552 kW); 2 shafts
Speed, knots: 25
Range, n miles: 450 at 14 kt
Complement: 8
Guns: 2—12.7 mm MGs.

Comment: Locally built in the mid-1980s. Others of this type have been paid off and numbers are uncertain.

DF 321 5/1998, van Ginderen Collection / 0052/13

1 CORREGIDOR CLASS (BUOY TENDER) (ABU)

<i>Name</i>	<i>No</i>	<i>Builders</i>	<i>Commissioned</i>
CORREGIDOR	AG 891	Nigata Engineering, Japan	2 Mar 1938

Displacement, tons: 1,130 full load
Dimensions, feet (metres): 186.7 × 26.1 × 12.5 (56.9 × 11.0 × 3.8)
Main machinery: 2 Niigata diesels; 2 shafts
Speed, knots: 13
Range, n miles: 4,000 at 11 kt
Complement: 37
Radars: Navigation, I-band

Comment: Lighthouse and buoy tender. Similar to *Jedayat* in service in Indonesia.

11 CUTTERS (PBR)

CGC 103 CGC 110 CGC 115 CGC 128-130 CGC 132-136

Displacement, tons: 13 full load
Dimensions, feet (metres): 40 × 13.6 × 3 (12.2 × 4.1 × 0.9)
Main machinery: 2 Detroit diesels; 560 hp (418 kW); 2 shafts
Speed, knots: 28
Complement: 5
Guns: 1—12.7 mm MG, 1—7.62 mm MG.

Comment: Built at Cavite Yard from 1984. One deleted in 1994. Used for harbour patrols. There are also some small unarmed Police craft.

CGC 130 1994, Philippine Navy / DOB155.1

Poland MARYNARKA WOJENNA

Country Overview

The modern democratic era of the Republic of Poland began in 1989 after forty-two years of communist rule. Situated in central Europe, the country has an area of 120,725 square miles and is bordered to the north by Russia (Kaliningrad), to the east by Lithuania, Belarus, and Ukraine, to the south by the Czech Republic and Slovakia and to the west by Germany. It has a 265 n mile coastline with the Baltic Sea. Warsaw is the capital and largest city while Gdansk, Szczecin and Gdynia are the principal ports. Territorial seas (12 n miles) are claimed but while it has claimed a 200 n mile EEZ, its limits have not been fully defined by boundary agreements.

Headquarters Appointments

Commander-in-Chief:
 Vice Admiral Andrzej Karweta
Deputy Commander-in-Chief
 Rear Admiral Waldemar Gluszeko
Chief of Naval Training:
 Vice Admiral Maciej Wąglewski
Commander Maritime Operations Centre:
 Rear Admiral Jerzy Patz
Commander 3rd Flotilla:
 Rear Admiral Marek Kurzyk
Commander 8th Flotilla:
 Rear Admiral Jerzy Lenda

Diplomatic Representation

Defence and Naval Attache in London:
 Colonel K Szymanski

Personnel

(a) 2009: 14,100
 (b) 12 months' national service

Prefix to Ships' Names

4 SOKÓL (KOB BEN) (TYPE 207) CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned	Recommissioned
SOKÓL (ex-Stord)	294 (ex-S 308)	Rhein Stahl – Nordseewerke, Emden	1 Apr 1966	2 Sep 1966	14 Feb 1967	4 June 2002
SEP (ex-Skolpen)	295 (ex-S 306)	Rhein Stahl – Nordseewerke, Emden	1 Nov 1965	24 Mar 1966	17 Aug 1966	16 Aug 2002
BIELIK (ex-Svanne)	296 (ex-S 309)	Rhein Stahl – Nordseewerke, Emden	8 Sep 1966	27 Jan 1967	12 Jun 1967	8 Sep 2003
KONDOR (ex-Kunna)	297 (ex-S 319)	Rhein Stahl – Nordseewerke, Emden	3 Mar 1964	16 Jul 1964	29 Oct 1964	20 Oct 2004

Displacement, tons: 459 standard, 524 dived

Dimensions, feet (metres): 155.5 x 15 x 14
(47.4 x 4.6 x 4.3)

Main machinery: Diesel-electric; 2 MTU 12V 493 AZ80 GA31L diesels; 1,200 hp(m) (880 kW) sustained, 1 motor; 1,800 hp(m) (1.32 MW) sustained; 1 shaft

Speed, knots: 12 surfaced, 18 dived

Range, n miles: 5,000 at 8 kt (snorting)

Complement: 21 (5 officers)

Torpedoes: 8–21 in (533 mm) bow tubes.

Countermeasures: ESM: Argo radar warning.

Weapons control: Kongsberg MSI-70U TFCS.

Radars: Surface search: Kelvin Hughes 1007; I-band.

Sonars: Atlas Elektronik CSU 83; passive search and attack; medium/high frequency.

Programmes: Commissioned into the Norwegian Navy from 1964, the original building cost was shared between the Norwegian and US governments. Decommissioned from the Norwegian Navy in 2001. Following announcement on 18 January 2002, four submarines transferred to the Polish Navy. A fifth, ex-Kobben, was transferred for spares and as a floating training base

The contract also includes provision of in-service support. These submarines are understood to be a stop-gap measure to maintain a submarine capability until about 2012 when these may be replaced.

Modernisation: All modernised at Urivale Shipyard, Bergen between 1989–1992

Structure: A development of the German Type 205 class, they have a diving depth of 650 ft (200 m). Pilkington optonics CK 30 search periscope.

Operational: Based at Gdynia

1 KILO CLASS (PROJECT 877EM) (SSK)

Name	No	Builders	Commissioned
ORZEL	291	Sudomekh, Leningrad	29 Apr 1986

Displacement, tons: 2,457 surfaced; 3,180 dived
Dimensions, feet (metres): 238.2 x 32.5 x 21.3 (72.6 x 9.9 x 6.5)
Main machinery: Diesel-electric; 2 DL 42M diesels; 3,650 hp(m) (2.68 MW); 2 generators; 6 MW; 1 PG 141 motor; 5,900 hp(m) (4.34 MW); 1 shaft; 2 auxiliary motors; 204 hp(m) (150 kW); 1 economic speed motor; 130 hp (95 kW)
Speed, knots: 10 surfaced; 17 dived; 9 snorting
Range, n miles: 6,000 at 7 kt snorting; 400 at 3 kt dived
Complement: 60 (16 officers)
Missiles: SAM: 8 SA-N-5 (Strela 2M)
Torpedoes: 6–21 in (533 mm) tubes. Combination of 53-65, anti-surface, passive/wake homing to 19 km (10.3 n miles) at 45 kt; warhead 300 kg and TEST-71; anti-submarine; active/passive homing to 15 km (8.1 n miles) at 40 kt; warhead 205 kg 53-56 WA and SET 53 M can also be carried. Total of 18 torpedoes.
Mines: 24 in lieu of torpedoes.
Countermeasures: ESM: Brick Group (MRP-25); radar warning, Quad Loop HF D/F
Weapons control: Murena MWU 110TFCS.
Radars: Surface search: Racal Decca Bridgemaster; I-band
Sonars: Shark Teeth (MGK-400); hull-mounted; passive search and attack (some active capability); low/medium frequency
Mouset Roar (MG 519); active mine detection; high frequency
Programmes: This was the second transfer of this class, the first being to India and others have since gone to Romania, Algeria, Iran and China. It was expected that more than one would be acquired as part of an exchange deal with the USSR for Polish-built amphibious ships, but this class is considered too large for Baltic operations and subsequent transfers were of the Foxtrot class.
Structure: Diving depth, 240 m (787 ft). Has two torpedo tubes modified for wire guided anti-submarine torpedoes.
Operational. Based at Gdynia

5/2007, J Cielak / 1166588

FRIGATES

0 + 2 (5) PROJECT 621 GAWRON II (MEKO A 100) CLASS (FSGHM)

Name	No	Builders	Laid down	Launched	Commissioned
-	-	Naval Shipyard, Gdynia	28 Oct 2001	2009	2011
-	-	Naval Shipyard, Gdynia	2003	2009	2012

Displacement, tons: 2,035 full load
Dimensions, feet (metres): 312.3 x 43.6 x 11.8 (95.2 x 13.13 x 3.6)
Main machinery: CODAG; 1 General Electric LM 2500 gas turbine; 2 diesels; 2 shafts
Speed, knots: 30
Range, n miles: 4,000 at 15 kt
Complement: 74

Missiles: SSM: 8 Saab RBS-15 Mk 3
 SAM: Raytheon RIM-162 Evolved Sea Sparrow; VLS
Guns: 1–3 in (76 mm)/62 2–35 mm. RAM
A/S mortars: 2 ASW 601
Countermeasures: Decoys: 1-10 barrellled Jastrzab 122 mm; chaff and IR flares
ESM: Radar warning
TCM: C310 torpedo decoy system
Combat data systems: Signaal TACTICOS or Saab Tech 9LV.

PROJECT 621

(Scale 1 : 900), Ian Sturton / 052683/

Radars: Air/surface search; fire control; navigation
Sonars: Hull mounted; active; medium frequency.
Helicopters: Platform for 1 medium

Programmes: Design definition by German Corvette Consortium (Blohm + Voss, Lürssen, Thyssen and HDW) which is to act as subcontractor to the shipbuilder

There are options for a further five vessels. Details of the design and of the building programme have not been released but, given continuing funding problems, it is unlikely that the first of class will enter service before 2011
Structure: The design is based on the MEKO A 100

PROJECT 621

2001, Polish Navy / 0114/88

2 OLIVER HAZARD PERRY CLASS (FFGHM)

Name	No	Builders	Laid down	Launched	Commissioned	Recommissioned
GENERAL KAZIMIERZ PUŁASKI (ex-Clark)	272 (ex-FFG 11)	Bath Iron Works	17 July 1978	24 Mar 1979	9 May 1980	15 Mar 2000
GENERAL TADEUSZ KOŚCIUSZKO (ex-Wadsworth)	273 (ex-FFG 9)	Todd Shipyards, San Pedro	13 July 1977	29 July 1978	28 Feb 1980	28 June 2002

Displacement, tons: 2,750 light; 3,638 full load
Dimensions, feet (metres): 445 x 45 x 14.8; 24.5 (sonar)
 (135.6 x 13.7 x 4.5; 7.5)
Main machinery: 2 GE LM 2500 gas turbines; 41,000 hp
 (30.59 MW) sustained; 1 shaft, cp prop
 2 auxiliary retractable props, 650 hp (484 kW)
Speed, knots: 29
Range, n miles: 4,500 at 20 kt
Complement: 200 (15 officers) including 19 aircrew

Missiles: SSM: 4 McDonnell Douglas Harpoon Block 1G; active radar homing to 95 km (51 n miles) at 0.9 Mach; warhead 227 kg
SAM: 36 Raytheon SM-1MR Block VI; command guidance; semi-active radar homing to 38 km (20.5 n miles) at 2 Mach
 1 Mk 13 Mod 4 launcher for both SSM and SAM missiles
Guns: 1 OTO Melara 3 in (76 mm)/62 Mk 75; 85 rds/min to 16 km (8.7 n miles) anti-surface; 12 km (6.6 n miles) anti-aircraft, weight of shell 6 kg.
 1 General Electric/General Dynamics 20 mm/76 6-barrelled Mk 15 Vulcan Phalanx; 3,000 rds/min combined to 15 km
 4 -12.7 mm MGs
Torpedoes: 6-324 mm Mk 32 (2 triple) tubes; 24 Whitehead A244 Mod 3. To be replaced by Mu-90 Impact from 2002
Countermeasures: Decoys: 2 Loreal Hycor SRBOC 6-barrelled fixed Mk 36; IR flares and chaff to 4 km (2.2 n miles). T-Mk 6 Fanfare/SLO-25 Nixie; torpedo decoy.

PUŁASKI

(Scale 1 : 1,200), Ian Sturton / 0105279

ESM/ECM: SLO-32(V)2; radar warning. Sidekick modification adds jammer and deception system.
Combat data systems: NTDS with Link 11 and 14. SATCOM SRR-1, WSC-3 (UHF)
Weapons control: SWG-1 Harpoon LCS. Mk 92 (Mod 2), WCS with CAS (Combined Antenna System). The Mk 92 is the US version of the Signal WM28 system. Mk 13 weapon direction system. 2 Mk 24 optical directors.
Radars: Air search: Raytheon SPS-49(V)4; C/D-band
 Surface search: ISC Cardion SPS 55; I-band
 Fire control: Lockheed STIR (modified SPG-60); I/J-band
 Sperry Mk 92 (Signal WM28); I/J-band
 Navigation: Furuno; I-band
 Tacan. URN 25. IFF Mk XII AIMS UPX-29.

Sonars: SQQ 89(V)2 (Raytheon SQS 56 and Gould SQR 19); hull mounted active search and attack, medium frequency and passive towed array; very low frequency.

Helicopters: 2 Kaman SH-2G Seasprite

Programmes: Pułaski approved for transfer from US by grant in 1999

Modernisation: Harpoon missiles are to be replaced by RBS 15 Mk 2 missiles from about 2009

Structure: Details given are for the ship in service with the JS Navy

Operational: Based at Gdynia.

1 KASZUB CLASS (PROJECT 620) (FSM)

Name	No	Builders	Laid down	Launched	Commissioned
KASZUB	240	Northern Shipyard, Gdansk	9 June 1994	11 May 1995	15 Mar 1997

Displacement, tons: 1,051 standard; 1,183 full load
Dimensions, feet (metres): 270 × 32.8 × 10.2; 16.1 (sonar)
 (82.3 × 10 × 3.1; 4.9)
Main machinery: CODAD; 4 Cegielski-Sulzer AS 16V 25/30 diesels; 16,900 hp(m) (12.42 MW); 2 shafts; cp props
Speed, knots: 27. **Range, n miles:** 3,500 at 14 kt; 350 at 26 kt
Complement: 82 (10 officers)

Missiles: SAM: 2 SA-N-5 quad launchers ●; IR homing to 10 km (5.5 n miles) at 1.5 Mach. VLS system to replace after 23 mm gun.

Guns: 1 USSR 3 in (76 mm)/59 AK 176 ●; 120 rds/min to 16 km (8.5 n miles); weight of shell 5.9 kg
 6 ZU-23-2M Wrobel 23 mm/87 (3 twin) ●; 400 rds/min combined to 2 km

Torpedoes: 4–21 in (533 mm) (2 twin) tubes ●. SET-53M, passive homing to 15 km (8.1 n miles) at 29 kt; warhead 100 kg.

A/S mortars: 2 RBU 6000 12-tubed trainable ●; range 6,000 m; warhead 31 kg; 120 rockets.

Depth charges: 2 rails. 12 charges.

Countermeasures: Decoys: 1–10 barrelled 122 mm Jastrzab launcher ● for chaff.

ESM: Intercept

Weapons control: Drakon TFCS.

Radars: Air/surface search: Strut Curve (MR 302) ●; F-band.

Surface search: Racal Bridgmaster C-252 ●; I-band.

Navigation: Racal Bridgmaster C-341; I-band.

IFF: RAWAR SA-10M2

Sonars: MG 322T; hull-mounted; active search; medium frequency.

MG 329M; stern-mounted dipping type mounted on the transom; active; high frequency.

Programmes: Second of class cancelled in 1989 and a class of up to ten more ships based on the Kaszub hull

KASZUB

(Scale 1 : 900), Ian Sturton / 0081558

KASZUB

5/2008*, J. Cisiak / 1353258

and specialised for anti-submarine warfare has been shelved.

Structure: Design based on Grisha class but with many alterations. The 76 mm gun was fitted in late 1991. New

decoy system fitted in 1999. There is space for a fire-control director on the bridge roof
Operational: Based at Gdynia.

KASZUB

7/2006, A. A. de Kruijf / 1164451

3 ORKAN (SASSNITZ) CLASS (PROJECT 660 (ex-151)) (FSGM)

Name	No	Builders	Launched	Commissioned
ORKAN	421	Peenewerft/Northern Shipyard, Gdansk	29 Sep 1990	18 Sep 1992
PIORUN	422	Peenewerft/Northern Shipyard, Gdansk	19 Oct 1990	11 Mar 1994
GROM (ex-Huragan)	423	Peenewerft/Northern Shipyard, Gdansk	11 Dec 1990	28 Mar 1995

Displacement, tons: 331 standard; 326 full load
Dimensions, feet (metres): 163.4 oa; 147.6 wl × 28.5 × 7.2
 (49.8; 45 × 8.7 × 2.2)

Main machinery: 3 Type M 520T diesels; 16,000 hp(m) (11.93 MW) sustained; 3 shafts

Speed, knots: 38. **Range, n miles:** 1,600 at 14 kt

Complement: 36 (4 officers)

Missiles: SSM: 8 (2 quad) launchers; Saab RBS-15 Mk 3; active radar homing to 200 km (108 n miles) at 0.8 Mach, warhead 150 kg.

SAM: SA-N-5 Grail quad launcher; manual aiming; IR homing to 8 km (3.2 n miles) at 1.5 Mach, warhead 1.5 kg.

Guns: 1 USSR 3 in (76 mm)/59 AK 176; 120 rds/min to 16 km (8.5 n miles); weight of shell 5.9 kg

1–30 mm/65 AK 630, 6 barrels; 3,000 rds/min combined to 2 km

Countermeasures: Decoys: 8–9 barrelled Jastrzab 81 mm and 1–10 barrelled Jastrzab 122 mm chaff and IR launchers.

ESM: PIT intercept.

Combat data systems: Signaal/TACTICOS.

Weapons control: Thales STING optronic director

Radars: Surface search: AMB Sea Giraffe, G-band

Fire control: Bass Tilt MR-123, H/I-band

Navigation: PIT; I-band.

IFF: Square Head; Salt Pot.

Programmes: Originally six of this former GDR Sassnitz class were to be built at Peenewerft for Poland. Three units were acquired and completed at Gdansk.

Modernisation: Contract with Thales Naval Nederland (TNNL) as prime contractor for upgrade of all three ships signed 29 June 2001. New equipment includes RBS-15 Mk 3 missiles, TACTICOS combat data system, STING optronic director, AMB Sea Giraffe surveillance radar, PIT navigational radar and ESM equipment, improved communications and Link 11. Refit of *Piorun* was completed by 2003 and the other two ships in 2006. RBS 15 Mk 3 missiles are to replace Mk 2 missiles from 2009

Structure: Unlike the German Coast Guard vessels of the same class, these ships have retained three engines.

Operational: Based at Gdynia.

PIORUN

5/2008*, J. Cisiak / 1353259

SHIPBORNE AIRCRAFT

Numbers/Type: 4 Kaman SH-2G (P) Seasprite.

Operational speed: 130 kt (241 km/h).

Service ceiling: 22,500 ft (6,860 m)

Range: 367 n miles (697 km)

Role/Weapon systems: First two delivered in 2002. Second pair in August 2003. Sensors: LN66/HP radar; ALR 66 ESM, ALE-39 ECM, AQS-81(V)2 MAD, AAQ-16 FLIR, ARR 57/84 sonobuoy receivers. Weapons: ASW: two A244S torpedoes (Mu 90 from 2002), ASV: one 762 mm MG.

SH-2G

7/2006, J Ciślak / 1164448

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Notes: In addition there are 6TS training aircraft.

Numbers/Type: 10/2/1/2 PZL Mielec M-28 B1R/M-28E/M-28RF/M-28TD Bryza.

Operational speed: 181 kt (335 km/h).

Service ceiling: 13,770 ft (4,200 m)

Range: 736 n miles (1,365 km).

Role/Weapon systems: Based on the USSR Cash light transport and used for maritime patrol and SAR. First one delivered in January 1995. B1R upgrade programme includes MSC-400 mission system, ARS-400 radar (with SAR/ISAR modes), torpedoes, sonobuoys, MAD, direction finder and Link 11. Sensors: Search radar ARS 400; ESM. Weapons: 2 SAB 100 bombs.

M-28 B1R

5/2008*, J Ciślak / 1353260

Numbers/Type: 10/3 Mil Mi-14PL Haze A/Mi-14PS Haze C.

Operational speed: 120 kt (222 km/h).

Service ceiling: 16,000 ft (4,870 m)

Range: 500 n miles (1,100 km).

Role/Weapon systems: PL for ASW, PS for SAR. PL operates in co-operation with surface units. Adapted for landing and taking off from water. Sensors: I-2ME search radar, APM-60, MAD, sonobuoys, MGM 329M VDS. Weapons: ASW; Whitehead A 244 torpedoes, depth bombs and mines. Arming with Penguin ASM is also under consideration.

Mi-14PL

8/2008*, J Ciślak / 1353761

Numbers/Type: 2/7 PZL Świdnik W-3 Soko/W-3RM Anakonda

Operational speed: 119 kt (220 km/h)

Service ceiling: 19,672 ft (6,000 m).

Range: 335 n miles (620 km).

Role/Weapon systems: W-3 for transport, W-3RM for SAR. Operates in co-operation with surface units. Adapted for landing and taking off from water. Sensors: RDS-82 VP Meteo, FLIR.

W-3RM

5/2008*, J Ciślak / 1353262

Numbers/Type: 3/1 Mil Mi-2RM Hoplite/Mi-2D.

Operational speed: 100 (180 km/h).

Service ceiling: 13,200 ft (4,000 m).

Range: 300 n miles (550 km).

Role/Weapon systems: Mi 2D is for transport aircraft and Mi-2RM is for SAR.

Mi-2RM

7/2000, J Ciślak / 0105737

Numbers/Type: 2 Mi-17 Hip.

Operational speed: 124 kt (230 km/h).

Service ceiling: 16,400 ft (5,000 m).

Range: 324 n miles (600 km).

Role/Weapon systems: Transport aircraft. First one delivered in 2001

Mi-17

7/2006, J Ciślak / 1164445

AMPHIBIOUS FORCES

5 LUBLIN CLASS (PROJECT 767) (LST/MINELAYERS) (LST/ML)

Name	No	Builders	Launched	Commissioned
LUBLIN	821	Northern Shipyard, Gdansk	12 July 1988	12 Oct 1989
GNIEZNO	822	Northern Shipyard, Gdansk	7 Dec 1988	23 Feb 1990
KRAKOW	823	Northern Shipyard, Gdansk	7 Mar 1989	27 June 1990
POZNAN	824	Northern Shipyard, Gdansk	5 Jan 1990	8 Mar 1991
TORUN	825	Northern Shipyard, Gdansk	8 June 1990	24 May 1991

Displacement, tons: 1,350 standard; 1,745 full load
Dimensions, feet (metres): 313 × 35.4 × 6.6 (95.4 × 10.8 × 2)
Main machinery: 3 Cegielski 6ATL25D diesels; 5,390 hp(m) (3.96 MW, sustained, 3 shafts)
Speed, knots: 16
Range, n miles: 1,400 at 16 kt
Complement: 50 (5 officers)
Military lift: 9 Type T-72 tanks or 9 APC or 17 medium or light trucks. 80 troops plus equipment (821-823); 125 troops plus equipment (824); 135 troops and equipment (825)
Missiles, SAM/Guns: 8 ZU-23-2MR 23 mm Wrobel II (4 twin); combination of 2 SA-N-5 missiles, IR homing to 6 km (3.2 n miles) at 1.5 Mach; warhead 1.5 kg and guns; 400 rds/min combined
Depth charges: 9 throwers for counter-mining.
Mines: 50-134
Countermeasures: Decoys: 2 12-barrelled 70 mm Derkacz chaff launchers (821 and 825), 2 12-barrelled Jastrzab chaff launchers (822 824).
Radars: Navigation SRN 7453 and SRN 443XTA; I-band.

Comment: Designed with a through deck from bow to stern and can be used as minelayers as well as for amphibious landings. Folding bow and stern ramps and a stern anchor are fitted. The ship has a pressurised cttedel for NBC defence and an upper deck washdown system. Mining capabilities upgraded in 1997/98. Based at Swinoujscie.

GNIEZNO 8/2008, J Cisiak / 1353263

3 DEBA CLASS (PROJECT 716) (LCU)

Name	No	Builders	Launched	Commissioned
KD 11	851	Naval Shipyard, Gdynia	13 Nov 1987	7 Aug 1988
KD 12	852	Naval Shipyard, Gdynia	2 July 1990	2 Jan 1991
KD 13	853	Naval Shipyard, Gdynia	26 Oct 1990	3 May 1991

Displacement, tons: 176 full load
Dimensions, feet (metres): 122 × 23.3 × 5.6 (37.2 × 7.1 × 1.7)
Main machinery: 3 Type M 401A diesels; 3,000 hp(m) (2.2 MW); 3 shafts
Speed, knots: 21
Range, n miles: 430 at 16 kt
Complement: 12
Military lift: 1 tank or 2 vehicles up to 20 tons and 50 troops
Guns: 2 ZU-23-2M 23 mm (twin).
Radars: Surface search SRN 207A; I-band

Comment: The plan was to build 12 but the programme was suspended at three through lack of funds. A similar design has been assembled in Iran. Can carry up to six launchers for strung-out charges. Based at Swinoujscie.

KD 11 8/2003, J Cisiak / 0567514

MINE WARFARE FORCES

Notes: The next generation Mine Countermeasures programme (Kormoran II) is under consideration.

3 KROGULEC CLASS (PROJECT 206FM) (MHCM)

Name	No	Builders	Commissioned
FLAMING	621	Gdynia Shipyard	11 Oct 1966
MEWA	623	Gdynia Shipyard	21 May 1967
CZAJKA	624	Gdynia Shipyard	23 June 1967

Displacement, tons: 550 full load
Dimensions, feet (metres): 190.9 × 25.3 × 6.9 (58.2 × 7.7 × 2.1)
Main machinery: 2 Sulzer/Cegielski 6AL 25/30 diesels; 2,203 hp(m) (1.62 MW); 2 shafts; LIPS cp props
Speed, knots: 17
Range, n miles: 2,000 at 12 kt
Complement: 52 (6 officers)

Missiles: SAM: 2 Fasta-4M quad launchers SA-N-5.
 2 SA N 10 (Grom) to be fitted in due course
Guns: SAM/guns: 2 Wrobel ZU-23-2MR 23 mm (twin) with 2 SA-N-5 missiles.
Depth charges: 2 racks.
Mines: 6–12 depending on type.
Countermeasures: Decoys: 6–9 barrelled Jastrzab 2 launchers for chaff ECM. PIT Bren system being fitted.
MCM: 2 Bofors MT2W mechanical, 1 TEM-PE 2MA magnetic and 1 MTA-2 acoustic sweeps.
CTM Ukwiak ROV with sonar, TV and charges. 10 ZHH 230 sonobuoys.
Combat data systems: CTM Pstrokosz command support system
Radars: Navigation: Racal Decca Br dgemaster, I-band.
IFF: RAWAR SC-10D2
Sonars: CTM SHL-100MA hull mounted; active minehunting; high frequency; Politechnica Gdansk SHL200VDS

Comment: All taken out of service in 1997. New armament and minehunting equipment installed. Divers recompression chamber carried. Mewa returned to service in May 1999, Czajka in May 2000 and Flaming in 2001. Life extended by 10 years. Based at Swinoujscie.

CZAJKA 5/2008, J Cisiak / 1353764

13 GOPLO (NOTEC) CLASS (PROJECT 207P/207DM) (MINESWEEPERS/HUNTERS—COASTAL) (MHC)

Name	No	Builders	Launched	Commissioned
GOPLO	830	Naval Shipyard, Gdynia	16 Apr 1981	13 Mar 1982
GARDNO	831	Naval Shipyard, Gdynia	23 June 1993	31 Mar 1984
BUKOWO	832	Naval Shipyard, Gdynia	26 July 1984	23 June 1985
DABIE	833	Naval Shipyard, Gdynia	21 June 1985	11 May 1986
JAMNO	834	Naval Shipyard, Gdynia	11 Feb 1986	11 Oct 1986
MIELNO	835	Naval Shipyard, Gdynia	27 June 1986	9 May 1987
WICKO	836	Naval Shipyard, Gdynia	20 Mar 1987	12 Oct 1987
RESKO	837	Naval Shipyard, Gdynia	1 Oct 1987	26 Mar 1988
SARBSKO	838	Naval Shipyard, Gdynia	10 May 1988	12 Oct 1988
NECKO	839	Naval Shipyard, Gdynia	21 Nov 1988	9 May 1989
NAKLO	840	Naval Shipyard, Gdynia	29 May 1989	2 Mar 1990
DRUZNO	841	Naval Shipyard, Gdynia	29 Nov 1989	21 Sep 1990
HANCZA	842	Naval Shipyard, Gdynia	9 July 1990	1 Mar 1991

Displacement, tons: 216 full load
Dimensions, feet (metres): 126.3 × 24.3 × 5.9 (38.5 × 7.4 × 1.8)
Main machinery: 2 M 401A diesels, 1,874 hp(m) (1.38 MW) sustained, 2 shafts
Speed, knots: 14
Range, n miles: 1,100 at 9 kt
Complement: 29 (6 officers)
Guns: 2 ZU-23-2MR 23 mm (twin); 400 rds/min combined to 2 km
Depth charges: 24
Mines: 6-24
Countermeasures: MCM: MMTK1 mechanical; MTA 1 acoustic and TEM-PE 1 magnetic sweeps
Radars: Navigation: Bridgemaster; I-band.
Sonars: MG 89 or MG 79; active minehunting; high frequency

Comment: Goplo is an experimental prototype numbered 207D. The 23 mm guns have replaced the original 25 mm. GRP hulls. All are to be upgraded to 207DM for minehunting, and to carry divers. Named after lakes. Goplo based at Gdynia, the remainder at Swinoujscie.

GOPLO 5/2008, J Cisiak / 1353265

**4 MAMRY (NOTEC II) CLASS (PROJECT 207M)
(MINESWEEPERS/HUNTERS—COASTAL) (MHSCM)**

Name	No	Builders	Launched	Commissioned
MAMRY	643	Naval Shipyard, Gdynia	20 Sep 1991	25 Sep 1992
WIGRY	644	Naval Shipyard, Gdynia	28 Nov 1992	14 May 1993
SNIARDWY	645	Naval Shipyard, Gdynia	20 June 1993	28 Jan 1994
WDZYDZE	646	Naval Shipyard, Gdynia	24 June 1994	2 Dec 1994

Displacement, tons: 216 full load
Dimensions, feet (metres): 126.3 x 24.3 x 5.9 (38.5 x 7.4 x 1.8)
Main machinery: 2 M 401A diesels, 1,874 hp(m) (1.38 MW); 2 shafts
 2 auxiliary motors; 816 hp(m) (60 kW)
Speed, knots: 14
Range, n miles: 865 at 14 kt
Complement: 27 (5 officers)
Missiles, SAM/Guns: 2 ZU-23-2MR 23 mm Wrobel II (twin); combination of 2 SA-N-5 missiles; IR homing to 6 km (3.2 n miles) at 1.5 Mach; warhead 1.5 kg and guns; 400 rde/mn combined to 2 km.
Mines: 6-24 depending on type
Countermeasures: MCM, MMTK 1m mechanical, MTA 2 acoustic and TEM-PE 1m magnetic sweeps.
Radars: Navigation, SRN 401XTA; I-band.
Sonars: SHL 100/200; hull mounted/VDS; active minehunting; high frequency.

Comment: Modified version of the 207P and equipped to carry divers. Identical hull to the 207P. All based at Gdynia. An enlarged design, the Type 207 MCMV with a length of 43.5 m, is a longer term project.

SNIARDWY 6/2007, Frank Findler / 1166573

HEWELIUSZ 5/2008, J Ciślak / 1353265

2 SURVEY CRAFT (PROJECT 4234) (AGSC)

Name	Builders	Commissioned
K 10	Wisła, Gdansk	6 Feb 1989
K 4	Wisła, Gdansk	25 Sep 1989

Displacement, tons: 45 full load
Dimensions, feet (metres): 62 x 14.4 x 4.9 (18.9 x 4.4 x 1.5)
Main machinery: 1 Wola DM 150 diesel; 160 hp(m) (117 kW) sustained; 1 shaft
Speed, knots: 9
Complement: 10
Radars: Navigation: SRN 207A; I-band.

Comment: Coastal survey craft based at Gdynia. There are a number of survey launches and buoy tenders listed under Auxiliaries.

K 10 5/2000, J Ciślak / 0105248

SURVEY AND RESEARCH SHIPS

2 MODIFIED FINIK 2 CLASS (PROJECT 874) (AGS)

Name	No	Builders	Launched	Commissioned
HEWELIUSZ	265	Northern Shipyard, Gdansk	11 Sep 1981	27 Nov 1982
ARCTOWSKI	266	Northern Shipyard, Gdansk	20 Nov 1981	27 Nov 1982

Displacement, tons: 1,135 standard; 1,218 full load
Dimensions, feet (metres): 202.1 x 35.4 x 10.8 (61.6 x 10.8 x 3.3)
Main machinery: 2 Cegielski-Sulzer 6AL25/30 diesels; 1,920 hp(m) (1.4 MW); 2 auxiliary motors; 204 hp(m) (150 kW); 2 shafts; cp props; bow thruster
Speed, knots: 13
Range, n miles: 5,900 at 11 kt
Complement: 49 (10 officers)
Radars: Navigation: SRN 7453 Nogat; SRN 743X; I-band.

Comment: Sister ships to Russian class which were built in Poland, except that *Heweliusz* and *Arctowski* have been modified and have no buoy handling equipment. Equipment includes Atlas Deso, Atlas Ra.og and Atlas Dolog survey. Both ships are based at Gdynia. One sister ship, *Planeta*, is civilian operated and the other, *Zodiak*, was decommissioned in 2003.

ARCTOWSKI 5/2007, J Ciślak / 1166597

4 SURVEY CRAFT (PROJECT III/C) (AGSC)

M 35	M 38-40
------	---------

Displacement, tons: 10 full load
Dimensions, feet (metres): 36.1 x 10.5 x 2.3 (11 x 3.2 x 0.7)
Main machinery: 1 Puck Rekin SW 400/MZ diesel; 95 hp(m) (70 kW); 1 shaft
Speed, knots: 8
Range, n miles: 184 at 8 kt
Complement: 5
Radars: Navigation: SRN 207A; I-band.

Comment: Based at Gdynia and Swinoujście (M 35)

M 40 3/2003, J Ciślak / 0567515

INTELLIGENCE VESSELS

2 MODIFIED MOMA CLASS (PROJECT 863) (AGI)

Name	No	Builders	Commissioned
NAWIGATOR	262	Northern Shipyard, Gdansk	17 Feb 1975
HYDROGRAF	263	Northern Shipyard, Gdansk	8 May 1976

Displacement, tons: 1,677 full load
Dimensions, feet (metres): 240.5 × 35.4 × 12.8 (73.3 × 10.8 × 3.9)
Main machinery: 2 Zgoda-Sulzer 6TD48 diesels; 3,300 hp(m) (2.43 MW) sustained; 2 shafts
Speed, knots: 17
Range, n miles: 7,200 at 12 kt
Complement: 87 (10 officers)
Missiles: 2 Fasta-4M quad launchers. SA-N-5.
Guns: 4—25 mm (2 twin) (262)
Countermeasures: ESM/ECM: intercept and jammer
Radars: Navigation: 2 SRN 7453 Nogat; I-band

Comment: Much altered in the upperworks and unrecognisable as Momas. The forecastle in *Hydrograf* is longer than in *Nawigator* and one deck higher. *Hydrograf* fitted for but not with two twin 25 mm gun mountings. Forward radome replaced by a cylindrical type in *Nawigator* and after ones removed on both ships. Based at Gdynia.

NAWIGATOR 5/2007, M Declerck / 1166598

HYDROGRAF 7/2008, A Sheldon-Duplax / 1353257

TRAINING SHIPS

Notes: The three masted sailing ship *Dar Mlodziezy* is civilian owned and operated but also takes naval personnel for training

1 WODNIK CLASS (PROJECT 888) (AXTH)

Name	No	Builders	Launched	Commissioned
WODNIK	251	Northern Shipyard, Gdansk	19 Nov 1975	28 May 1976

Displacement, tons: 1,697 standard; 1,745 full load
Dimensions, feet (metres): 234.3 × 38.1 × 14.8 (72.2 × 11.9 × 4.1)
Main machinery: 2 Zgoda-Sulzer 6TD48 diesels; 2,650 hp(m) (1.95 MW) sustained; 2 shafts; cp props
Speed, knots: 16
Range, n miles: 7,200 at 11 kt
Complement: 56 (24 officers) plus 101 midshipmen
Guns: 4 ZU-23-2MR Wrobel 23 mm (2 twin). 2—30 mm AK 230 (1 twin).
Radars: Navigation: 2 SRN 7453 Nogat; I-band.
Helicopters: Platform for 1 light.

Comment: Sister to former GDR *Wilhelm Piack* and two Russian ships. Converted to a hospital ship (150 beds) in 1990 for deployment to the Gulf. Armament removed as part of the conversion but partially restored in 1992. Based at Gdynia. Second of class in reserve from 1999.

WODNIK 7/2008, B Przewin / 1353256

1 ISKRA CLASS (PROJECT B79) (SAIL TRAINING SHIP) (AXS)

Name	No	Builders	Launched	Commissioned
ISKRA	263	Gdansk Shipyard	6 Mar 1982	11 Aug 1982

Displacement, tons: 498 full load
Dimensions, feet (metres): 160.8 × 26.6 × 13.1 (49 × 8.1 × 4.0)
Main machinery: 1 Wola 75H12 diesel, 310 hp(m) (228 kW); 1 auxiliary shaft; cp prop
Speed, knots: 9 (diesel)
Complement: 14 (6 officers) plus 50 cadets
Radars: Navigation: SRN 206; I-band

Comment: Barquentine with 1,040 m² of sail. Used by the Naval Academy for training with a secondary survey role. Based at Gdynia.

ISKRA 6/2005, Michael Nitz / 1151322

AUXILIARIES

Note: Procurement of up to four Strategic Support Ships is under development. The broad requirement is for ships of approximately 10,000 tons with the capability of transporting about 500 troops plus some 20 vehicles and up to six helicopters.

1 PROJECT 890 CLASS (LOGISTICS SUPPORT VESSEL) (AKHM/APHM/AGI)

Name	No	Builders	Commissioned
KONTRADMIRAL X CZERNICKI	511	Northern Shipyard, Gdansk	1 Sep 2001

Displacement, tons: 2,250 full load
Dimensions, feet (metres): 242.1 × 45.3 × 14.1 (73.8 × 13.8 × 4.3)
Main machinery: 2 Cegielski-Sulzer AL25D diesels; 2,934 hp(m) (2.16 MW) sustained; 2 shafts
Speed, knots: 14.1
Range, n miles: 7,000 at 12 kt
Complement: 38
Military lift: 140 troops with full individual armament or ten 20 ft containers or four 20 ft containers and six STAR 266 army trucks
Missiles: SAM/Guns. 1 ZU 23-2MR Wrobel I/II mounts: combination of 2 Strela 2M (Grail) missiles and 2—23 mm guns.
Countermeasures: Decoys: 4 WNP81/9 9-barrelled 81 mm Jastrzab chaff launchers.
ESM: PIT intercept
Radars: Surface search. SRN; E/F-band
Navigation: SRN; I-band.
Helicopters: Platform for 1 helicopter (up to 10 ton).

Comment: Conversion from a Project 130 Degaussing Vessel to Logistic Support Ship in Northern Shipyard, Gdansk, included new upper and forward hull sections, provision of a helicopter deck and NBC protection. The ship has a 16 ton hydraulic crane and after ramp. The multirole ship is capable of sealift, acting as a forward maintenance unit and maritime surveillance and reconnaissance (using containerised ESM sensors) and replenishment at sea. Based at Swinoujscie.

KONTRADMIRAL X CZERNICKI 3/2006, Frank Findler / 1154318

1 BALTYK CLASS (PROJECT ZP 1200) (TANKER) (AORL)

Name	No	Builders	Commissioned
BALTYK	Z 1	Naval Shipyard, Gdynia	11 Mar 1991

Displacement, tons: 2,937 standard; 3,049 full load
 Dimensions, feet (metres): 278.2 x 43 x 15.4 (84.8 x 13.1 x 4.7)
 Main machinery: 2 Cegielski 8 ASL 25 diesels, 4,025 hp(m) (2.96 MW); 2 shafts; cp props
 Speed, knots: 15
 Range, n miles: 4,250 at 12 kt
 Complement: 34 (4 officers)
 Cargo capacity: 1,184 tons fuel, 92.7 tons lub oil
 Guns: 4 ZU-23-2M Wrobel 23 mm (2 twm)
 Radars: Navigation: SRN 7453 and SRN 207A; I-band

Comment: Beam replenishment stations, one each side. First of a projected class of four, of which the others were cancelled. Based at Gdynia.

BALTYK 1/2008, J Cisiak / 1353268

1 MOSKIT CLASS (PROJECT B 199) (TANKER) (AOTL)

Name	No	Builders	Launched	Commissioned
MEDUZA	Z 8	Rzeczna, Wroclaw Shipyard	14 Sep 1969	21 July 1970

Displacement, tons: 1,225 full load
 Dimensions, feet (metres): 190.3 x 30.5 x 10.8 (58 x 9.3 x 3.3)
 Main machinery: 1 Magdeburg diesel, 965 hp(m) (720 kW); 1 shaft
 Speed, knots: 10
 Range, n miles: 1,200 at 10 kt
 Complement: 21 (3 officers)
 Cargo capacity: 656.5 tons
 Guns: 4 ZU-23-2M 23 mm (2 twm)
 Radars: Navigation: TRN 823; I-band

Comment: Z 3 decommissioned in 2007. Based at Swinoujscie.

MEDUZA 7/2004, J Cisiak / 1044484

1 KORMORAN CLASS (YPT)

No	Builders	Launched	Commissioned
K 8	Naval Shipyard, Gdynia	26 Aug 1970	3 July 1971

Displacement, tons: 150 full load
 Dimensions, feet (metres): 114.8 x 19.7 x 5.2 (35 x 6 x 1.6)
 Main machinery: 2 Type M 50F5 diesels; 2,200 hp(m) (1.6 MW); 2 shafts
 Speed, knots: 19
 Range, n miles: 550 at 15 kt
 Complement: 24
 Guns: 2 ZU-23-2M Wrobel 23 mm (twin)
 Radars: Navigation: SRN 206/301; I-band

Comment: Armament updated in 1993. Both based at Gdynia.

K 8 6/2008, J Cisiak / 1353272

2 MROWKA CLASS (PROJECT B 208) (DEGAUSSING VESSELS) (YDG)

Name	No	Builders	Commissioned
WRONA	SD 11	Naval Shipyard, Gdynia	10 Oct 1971
-	SD 13	Naval Shipyard, Gdynia	16 Dec 1972

Displacement, tons: 660 full load
 Dimensions, feet (metres): 144.4 x 26.6 x 9.5 (44 x 8.1 x 2.9)
 Main machinery: 1 6NV D36 diesel, 957 hp(m) (704 kW); 1 shaft
 Speed, knots: 9.5 Range, n miles: 2,230 at 9.5 kt
 Complement: 37
 Guns: 2—25 mm (twin) (SD 11 and 13); 2 ZU-23-2M Wrobel 23 mm (twin) (SD 12).
 Radars: Navigation: SRN 206; I-band

Comment: SD 12 decommissioned in 2005. SD 11 based at Swinoujscie and SD 13 based at Gdynia

SD 13 5/2008, J Cisiak / 1353269

2 PIAST CLASS (PROJECT 570M) (SALVAGE SHIPS) (ARS)

Name	No	Builders	Commissioned
PIAST	281	Northern Shipyard, Gdansk	26 Jan 1974
LECH	282	Northern Shipyard, Gdansk	30 Nov 1974

Displacement, tons: 1,887 full load
 Dimensions, feet (metres): 238.5 x 39.0 x 13.4 (72.7 x 11.9 x 4.1)
 Main machinery: 2 Zgoda-Sulzer 6TD48 diesels; 3,300 hp(m) (2.43 MW) sustained; 2 shafts; cp props
 Speed, knots: 15 Range, n miles: 3,000 at 12 kt
 Complement: 56 (8 officers) plus 12 spare
 Missiles: SAM 2 Fasta 4M twin launchers for SA-N-5.
 Guns: 4—25 mm (2 twm).
 Radars: Navigation: 2 SRN 7453 Nogat; I-band

Comment: Basically a Morna class hull with towing and firefighting capabilities. Ice-strengthened hulls. Wartime role as hospital ships. Carry three-man diving bells capable of 100 m depth and a decompression chamber. ROV added and other salvage improvements made in 1997/98. Based at Gdynia. Guns may not be carried.

PIAST 6/2008, J Cisiak / 1353270

2 ZBYSZKO CLASS (PROJECT B 823) (SALVAGE SHIPS) (ARS)

Name	No	Builders	Commissioned
ZBYSZKO	R 14	Ustka Shipyard	8 Nov 1991
MACKO	R 15	Ustka Shipyard	20 Mar 1992

Displacement, tons: 380 full load
 Dimensions, feet (metres): 114.8 x 26.2 x 9.8 (35 x 8 x 3)
 Main machinery: 1 Sulzer 6AL20/24D; 750 hp(m) (551 kW); 1 shaft
 Speed, knots: 11. Range, n miles: 3,000 at 10 kt
 Complement: 15
 Radars: Navigation: SRN 402X; I-band.

Comment: Type B-823 ordered 30 May 1988. Carries a decompression chamber and two divers. Mobile gantry crane on the stern. Based at Gdynia.

MACKO 5/2008, J Cisiak / 1353271

1 TRANSPORT CRAFT (PROJECT MS-3600) (YFB)

M 1

Displacement, tons: 74 full load
 Dimensions, feet (metres): 94.2 x 19 x 4.3 (28.7 x 5.8 x 1.3)
 Main machinery: 3 M50F5 diesels; 3,600 hp(m) (2.65 MW); 3 shafts
 Speed, knots: 27
 Complement: 7 plus 30
 Radars: Navigation: SRN 207A; I-band

Comment: Can be used as emergency patrol craft. Based at Gdynia as an Admirals' launch

M1 5/2007, J Ciślak / 1165603

6 MISCELLANEOUS HARBOUR CRAFT (YFB)

B 3 B 7 B 11 M 12 M 21 M 22

Comment: M numbers are patrol launches, B numbers are freighters and oil lighters.

TUGS

2 H 960 CLASS (ATA)

H 8 H 8

Displacement, tons: 340 full load
 Dimensions, feet (metres): 91.2 x 26.2 x 12.1 (27.8 x 8 x 3.7)
 Main machinery: 1 Sulzer GATL 25 D diesels; 1,306 hp(m) (960 kW); 1 shaft
 Speed, knots: 12. Range, n miles: 1,150 at 12 kt
 Complement: 17 (1 officer)
 Radars: Navigation: SRN 401 XTA; I-band.

Comment: Built at Nauta Ship Repair Yard, Gdynia and commissioned 25 September 1992 and 19 March 1993 respectively. Based at Swinoujscie (H 8) and Gdynia (H 8)

H 8 6/2008*, J Ciślak / 1353275

5 HARBOUR TUGS (PROJECTS H 900, H 800, H 820) (YTB/YTM)

H 4 (Project 900) H 5 (Project 900) H 7 (Project 900) H 9 (Project 820) H 10 (Project 820)

Displacement, tons: 218 full load
 Dimensions, feet (metres): 84 x 22.3 x 11.5 (25.6 x 6.8 x 3.5)
 Main machinery: 1 Cegielski-Sulzer 6AL20/24H diesel; 935 hp(m) (687 kW); 1 shaft
 Speed, knots: 11. Range, n miles: 1,500 at 10 kt
 Complement: 17
 Radars: Navigation: SRN 206; I-band

Comment: Details given are for H 4, 5 and 7. Completed 1979-81. Have firefighting capability except H 9-10. H 9-10 completed in 1993

H 5 10/2007, J Ciślak / 1166506

SEA DETACHMENT OF THE BORDER GUARD (MOSG)

Headquarters Appointments

Commandant MOSG:
 Captain Piotr Stocki
 Deputy Commandant
 Commander Wojciech Heninborch
 Deputy Commandant:
 Commander Roman Słowiński

Bases

Gdansk (HO and Kaszubski Division)
 Swinoujscie (Pomorski Division)

General

MOSG (Morski Oddział Strazy Granicznej) formed on 1 August 1991. Vessels have blue hulls with red and yellow striped insignia. Superstructures are painted white. The use of ships' names was discontinued in 2004. MOSG also operates one PZL M 20 Mewa, one W-3 AM Anakonda helicopter and one M-28 Skytruck.

PATROL FORCES

2 KAPER CLASS (PROJECT SKS-40) (LARGE PATROL CRAFT) (WPB)

No	Builders	Commissioned
SG-311	Wisla Yard, Gdansk	21 Jan 1991
SG-312	Wisla Yard, Gdansk	3 Apr 1992

Displacement, tons: 470 full load
 Dimensions, feet (metres): 139.4 x 27.6 x 9.2 (42.5 x 8.4 x 2.8)
 Main machinery: 2 Sulzer BATL25/30 diesels, 4,720 hp(m) (3.47 MW); 2 shafts; cp props
 Speed, knots: 17. Range, n miles: 2,800 at 14 kt
 Complement: 15
 Guns: 2 - 7.62 mm MGs
 Radars: SRN 207; I-band
 Navigation: Racal Decca; I-band.

Comment: Kaper I completed at Wisla Yard, Gdansk in January 1991, Kaper II on 1 October 1994. Have Simrad fish-finding sonars fitted. Used for Fishery Protection. 311 based at Gdansk and 312 at Kołobrzeg.

SG-311 5/2004, J Ciślak / 1044493

**6 WISLOKA CLASS (PROJECT 90)
(COASTAL PATROL CRAFT) (WPB)**

SG-142 SG-144-146 SG-150 SG-152

Displacement, tons: 45 full load
Dimensions, feet (metres): 69.6 × 14.8 × 5.2 (21.2 × 4.5 × 1.6)
Main machinery: 2 Wola 31 ANM28 H12A diesels; 1,000 hp(m) (735 kW); 2 shafts
Speed, knots: 18
Range, n miles: 300 at 18 kt
Complement: 6
Guns: 2 – 12.7 mm MGs (twin).
Radars: Surface search: SRN 207, I-band.

Comment: Built at Wisla Shipyard, Gdansk and completed between October 1973 and August 1977. Three are based at Gdansk and three at Swinoujscie.

SG-152 4/2004, Hartmut Ehlers / 1044494

1 PATROL LAUNCH (PROJECT M-35) (WYFL)

SG 036

Displacement, tons: 41 full load
Dimensions, feet (metres): 35.3 × 14.4 × 5.2 (10.7 × 4.4 × 1.6)
Main machinery: 1 Wola DM 150 diesel; 150 hp (112 kW)
Speed, knots: 8
Complement: 4

Comment: Built in 1985. Similar to those in Polish naval service.

SG 036 3/2006, J Ciślak / 1164431

**6 SPORTIS CLASS (PROJECT 7500)
(FAST INTERCEPT CRAFT) (WPBF)**

SG-002-007

Displacement, tons: 2
Dimensions, feet (metres): 24.6 × 9.2 × 1.3 (7.5 × 2.8 × 0.4)
Main machinery: Volvo Penta 230 hp (170 kW)
Speed, knots: 42
Complement: 3

Comment: Built in Bojano in 1996. Four craft are to be replaced by 9.5 m fast intercept craft in late 2009.

SG-007 3/2006, J Ciślak / 1164430

1 PATROL CRAFT (PROJECT MI-6) (WPB)

SG-008

Displacement, tons: 16
Dimensions, feet (metres): 42.7 × 12.14 × 3.6 (13.0 × 3.7 × 1.1)
Main machinery: 1 Wola; 200 hp (147 kW); 1 shaft
Speed, knots: 11
Complement: 4

Comment: Harbour craft built at Wisla Shipyard, Gdansk, 1989.

SG-008 3/2006, J Ciślak / 1164429

4 IC 16 M III (PBF)

SG 213-216

Displacement, tons: 19 full load
Dimensions, feet (metres): 52.2 × 13.0 × 2.95 (15.9 × 3.96 × 0.9)
Main machinery: 2 Scania diesels; 1,580 hp(m) (1.18 MW); 2 Rolls-Royce FF 410 waterjets
Speed, knots: 42 Range, n miles: 330 at 32 kt
Complement: 4
Radars: Surface search: Furuno M 1934C; I-band.

Comment: Four ordered from Dockstavarvet, Sweden and entered into service October-November 2007.

SG-213 6/2008, J Ciślak / 1353278

SG-215 10/2007, J Ciślak / 1166609

2 STRAZNIK CLASS (PROJECT SAR-1500) (WPBF)

No	Builders	Commissioned
SG-211	Damen Yard, Gdynia	28 Apr 2000
SG-212	Damen Yard, Gdynia	7 July 2000

Displacement, tons: 26
Dimensions, feet (metres): 49.9 × 17.7 × 2.95 (15.2 × 5.39 × 0.90)
Main machinery: 2 MAN D2848 diesels; 1,360 hp (1,000 kW); water jet system
Speed, knots: 35 Range, n miles: 200 at 30 kt
Complement: 4 (1 officer)
Guns: 1 – 7.62 mm MG
Radars: Surface search: SIMRAD, I-band.

Comment: Contract between MOSG and Damen Shipyard signed 5 October 1999. Based on Dutch SAR 1500 lifeboat. Hull and superstructure of aluminium alloy

SG-211 10/2007, J Ciślak / 1166607

**6 MODIFIED SPORTIS CLASS (PROJECT S-6100)
(FAST INTERCEPT CRAFT) (WPBF)**

SG 061-066

Displacement, tons: 19
Dimensions, feet (metres): 20.0 x 7.5 x 1.3 (6.1 x 2.3 x 0.4)
Main machinery: 2 Johnson outboard motors; 120 hp (89.6 kW)
Speed, knots: 35
Complement: 2

Comment: Built at Bojano in 2001. Located at Border units along the coast.

SG 063

6/2003, MOSG / 0567506

2 GRIFFON 2000 TDX CLASS (HOVERCRAFT) (UCAC)

SG 411-412

Displacement, tons: 3.5 full load
Dimensions, feet (metres): 39.0 x 15.7 (11.9 x 4.8)
Main machinery: 1 Deutz BF 8M 1015 CP diesel, 442 hp (330 kW)
Speed, knots: 30
Range, n miles: 450 at 35 kt
Complement: 3
Radars: Navigation: SIMRAD RA 83P; I-band.

Comment: Built by Griffon Hovercraft, Southampton and delivered in 2006. Aluminium hull. Employed as patrol craft in shallow waters and rivers.

6/2008*, J Ciśiak / 1363211

Portugal

MARINHA PORTUGUESA

Country Overview

The Republic of Portugal is situated in south-western Europe in the western portion of the Iberian Peninsula. It is bordered to the north and east by Spain and has a 967 n mile coastline with the Atlantic Ocean. The Azores and Madeira Islands in the Atlantic are integral parts of the republic, the total area of which is 35,553 square miles. Lisbon is the capital, largest city and principal port. There are further ports at Leixões (near Oporto), Setúbal, and Funchal. (Madeira) Territorial seas (12 n miles) and an EEZ (200 n miles) are claimed.

Headquarters Appointments

Chief of Naval Staff:
 Admiral Fernando José Ribeiro de Melo Gomes
Deputy Chief of Naval Staff:
 Vice Admiral Rui Cardoso de Telles Palhinha
Naval Commander:
 Vice Admiral José Carlos Torrado Saldanha Lopes
Azores Maritime Zone Commander:
 Rear Admiral Agostinho Ramos da Silva
Madeira Maritime Zone Commander:
 Captain António Manuel de Carvalho Coelho Cândido
Marine Corps Commander:
 Rear Admiral Luís Miguel de Matos Cortes Piccolochi

Diplomatic Representation

Defence and Naval Attaché in Dublin and The Hague:
 Lieutenant Colonel Jorge Manuel da Costa Ramos
Defence Attaché in Washington and Ottawa:
 Captain Carlos Nelson Lopes da Costa
Defence Attaché in Luanda, Kinshasa, Brazzaville and Windhoek:
 Colonel Jorge Dias Teixeira
Defence Attaché in Maputo, Lillongwe, Harare and Dar-Es-Salam:
 Colonel Joaquim Humberto Arnaga da Câmara Stone
Defence Attaché in Madrid, Cairo and Athens:
 Captain António Manuel Henriques Gomes
Defence Attaché in S. Tome and Libreville:
 Captain João Francisco Franco Facada

Diplomatic Representation — continued

Defence Attaché in Bissau, Conakry and Dakar:
 Colonel Francisco António Coelho Nogueira
Defence Attaché in Brasilia:
 Colonel Jorge Esteves Pereira Nunes dos Santos
Defence Attaché in Berlin, Prague, Copenhagen, Stockholm and Oslo:
 Lieutenant Colonel José Fernando Alves Gaspar
Defence Attaché in Warsaw, Budapest, Kiev, Bucharest and Bratislava:
 Colonel José Carlos de Almeida Marques
Defence Attaché in Canberra, Dili and Jakarta:
 Colonel Cipriano Fernando Mendes Figueiredo
Defence Attaché in Paris, Luxembourg and Brussels:
 Colonel Paulo José Reis Mateus
Defence Attaché in Rabat and Tunis:
 Colonel João Guilherme Machado Vieira
Defence Attaché in Praia:
 Colonel José António Sardinha Teles Alfaiça
Defence Attaché in Moscow and Sofia:
 Colonel Cláudio Martins Lopes
Défense Attaché in Rome, Tel-Aviv and Ankara:
 Lieutenant Colonel Eduardo Jorge Pontes de Albuquerque Faria

Personnel

2009: 10,100 (1,570 officers) including 1,350 marines

Marine Corps

2 battalions, 1 special operations detachment, 1 naval police unit

Naval

Main Base: Lisbon-Alferte
 Dockyard: Arsenal do Alfeite
 Fleet Support: Porto, Portimão, Funchal, Ponta Delgada, Tróia
 Air Base: Montijo (Lisbon)

Naval Air

The helicopter squadron was formally activated on 23 September 1993 at Montijo air force base, Lisbon. Operational and logistic procedures are similar to the air force.

SUBMARINES

1 ALBACORA (DAPHNÉ) CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
BARRACUDA	S 184	Dubigeon-Normandie, Nantes	19 Oct 1965	24 Apr 1967	4 May 1968

Displacement, tons: 869 surfaced; 1,043 dived
Dimensions, feet (metres): 189.6 × 22.3 × 17.1 (57.8 × 6.8 × 5.2)
Main machinery: Diesel-electric; 2 SEMT-Pielstick 12 PA4 V 185 diesels; 2,450 hp(m) (1.8 MW); 2 Jeumont Schneider alternators, 17 MW; 2 motors, 2,600 hp(m) (1.9 MW); 2 shafts
Speed, knots: 13.5 surfaced; 16 dived
Range, n miles: 2,710 at 12.5 kt surfaced, 2,130 at 10 kt snorting
Complement: 54 (7 officers)

Torpedoes: 12—21.7 in (550 mm) (8 bow, 4 stern) tubes. ECAN E14; anti-surface; passive homing to 12 km (6.6 n miles) at 25 kt; warhead 300 kg or ECAN L3; anti-submarine; active homing to 5.5 km (3 n miles) at 25 kt; warhead 200 kg. No reloads
Countermeasures: ESM ARUR, radar warning.
Weapons control: DLT D3 torpedo control.
Radars: Surface search Kelvin Hughes KH 1007; I band.
Sonars: Thomson Sintra DSUV 2; passive search and attack; medium frequency.

OUUA 2; active search and attack; 8.4 kHz.
L3 ELAK NAUTIK LOPAS 8300; passive search.

Modemisation: New radar fitted in 1993–94
Structure: Diving depth, 300 m (984 ft).
Operational: *Albacora* paid off mid 2000 and cannibalised for spares. *Delfin* decommissioned in 2005 and is to become a museum ship at Viana do Castelo. *Barracuda* expected to remain in service until December 2009.

BARRACUDA

9/2006, B Prázelin / 1153409

0 + 2 TYPE 209PN CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
TRIDENTE	S 170	Howaldtswerke, Kiel	7 Mar 2005	15 July 2008	2010
ARPAO	S 171	Howaldtswerke, Kiel	5 July 2008	2009	2011

Displacement, tons: 1,700 (surfaced); 1,970 (dived)
Dimensions, feet (metres): 222.8 × 20.7 × 21.8
 (679 × 6.3 × 6.8)
Main machinery: 2 MTU 16V 396 diesels; 5,600 hp (m)
 (4.17 MW); 1 Siemens Permasyn motor; 1 shaft; 2 HDW
 PEM fuel cells, 240 kW
Speed, knots: 20 (dived), 12 (surfaced)
Complement: 32 (5 officers)

Torpedoes: 8–21 in (533 mm) bow tubes, WASS Black
 Shark; wire (fibre optic cable)-guided; active/passive
 homing to 50 km (27 n miles) at 50 kt; warhead 250 kg.
 16 weapons including torpedoes and SSM

Countermeasures: To be announced
Weapons control: Atlas Elektronik ISUS 90/50
Radars: To be announced

Sonars: Cylindrical array with intercept passive array,
 passive range sonar, flank array and mine-avoidance
 sonar.

Programmes: Contract signed on 21 April 2004 with
 German Submarine Consortium (GSC) for construction
 and delivery of two boats with option for a third. The
 consortium consists of Howaldtswerke-Deutsche Werft,
 Kiel, Nordseewerke, Emden (NSWE) and Ferrostaal,
 Essen

Structure: Very similar to the Type 214 Air-Independent
 Propulsion (AIP) submarines under construction for
 Greece. Diving depth likely to be about 400 m (1,300 ft).

Operational: To form 5 Squadron on commissioning

 (mounted inside the after superstructure) ●. Honeywell
 Mk 46 Mod 5; anti-submarine; active/passive homing to
 11 km (5.9 n miles) at 40 kt; warhead 44 kg

Countermeasures: Decoys: 2 Loral Hycor SRBOC 8-tubed
 fixed Mk 36 quad launchers, IR flares and chaff to 4 km
 (2.2 n miles).
 SLQ-25 Nixie towed torpedo decoy.

ESM/ECM: Argo APECS II (includes AR 700) ESM) ●;
 intercept and jammers.

Combat data systems: Signaal SEWACO VIB action data
 automation; Link 11. SATCOM ●. WSC-6 twin serials.

Weapons control: Signaal IRSCAN infra-red detector.
 Signaal VESTA helo transponder.

Radars: Air/surface search: Signaal SMART ●; 3D, F-band.
 Air search: Signaal LW08 ●; D-band
 Surface search: Signaal Scout ●; I-band.
 Navigation: Racal Decca 1226; I-band.

Fire control: 2 Signaal STIR ●; I/J/K-band; range 140 km
 (76 n miles) for 1 m² target.

Sonars: Signaal PHS-36, hull-mounted; active search and
 attack; medium frequency.
 Thomson Sintra Anaconda DSBV 61; towed array;
 passive low frequency.

Helicopters: 1 Super Sea Lynx Mk 95 ●.

Programmes: The Declaration of Intent to purchase two ex-
 Netherlands frigates was announced on 1st November
 2006. The ships are to replace the João Belo-class
 frigates. This is to be followed by a contract for the
 supply of the two ships, a support package, weapons
 transfer, joint upgrades and crew training. Ex-Van Nes
 transferred in late 2008 and ex-Van Galen is to transfer
 on 1 November 2009.

Modernisation: A modernisation package is expected to be
 implemented before transfer.

Structure: The VLS SAM is similar to Canadian Hawkfish and
 Greek MEKO classes. The ship is designed to reduce radar

and IR signatures and has extensive NBCD arrangements.
 Full automation and roll stabilisation fitted. The APECS
 jammers are mounted starboard forward of the bridge
 and port aft corner of the hangar.

3 VASCO DA GAMA (MEKO 200 PN) CLASS (FFGH)

Name	No	Builders	Laid down	Launched	Commissioned
VASCO DA GAMA	F 330	Blohm + Voss, Hamburg	1 Feb 1989	26 June 1989	18 Jan 1991
ALVARES CABRAL	F 331	Howaldtswerke, Kiel	2 June 1989	6 June 1990	24 May 1991
CORTE REAL	F 332	Howaldtswerke, Kiel	24 Nov 1989	6 June 1990	22 Nov 1991

Displacement, tons: 2,700 standard; 3,300 full load
Dimensions, feet (metres): 380.3 oa; 357.6 pp x 48.7 x 20 (115.9; 109 x 14.8 x 6.1)
Main machinery: CODLOG; 2 GE LM 2500 gas turbines; 53,000 hp (39.5 MW) sustained; 2 MTU 12V 1163 TB83 diesels; 8,840 hp (m) (6.5 MW); 2 shafts, cp props
Speed, knots: 32 gas; 20 diesel
Range, n miles: 4,900 at 18 kt; 9,600 at 12 kt
Complement: 182 (23 officers) (including aircrew of 16 (4 officers)) plus 16 Flag Staff

VASCO DA GAMA

(Scale 1 : 1,200), Ian Sturton / 0567520

Missiles: SSM. 8 McDonnell Douglas Harpoon (2 quad) launchers; active radar homing to 130 km (70 n miles) at 0.9 Mach, warhead 227 kg.
SAM Raytheon Sea Sparrow Mk 29 Mod 1 octuple launcher; RIM-7MP; semi-active radar homing to 16 km (8.5 n miles) at 2.5 Mach; warhead 38 kg. Space left for VLS Sea Sparrow.
Guns: 1 Creusot-Loire 3.9 in (100 mm)/55 Mod 68 CADAM; 60 rds/min to 17 km (9 n miles) anti-surface; 8 km (4.4 n miles) anti-aircraft; weight of shell 13.5 kg.
 1 General Electric/General Dynamics Vulcan Phalanx 20 mm Block 1B; 6 barrels per mounting, 3,000 rds/min combined to 1.5 km.
 2 Oerlikon 20 mm (on VLS deck) can be carried.
Torpedoes: 6 - 324 mm US Mk 32 (2 triple) tubes; Honeywell Mk 48 Mod 5, anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg
Countermeasures: Decoys: 2 Loral Hycor Mk 36 SRBOC 6-barrelled chaff launchers; Sea Gnat.
 SLQ-25 Nixie, towed torpedo decoy.
ESM/ECM: APECS II; intercept and jammer.

Combat data systems: Signal SEWACO action data automation with STACOS tactical command; Link 11 and 14. Matra Marconi SCOT 3 SATCOM (1 set between 3 ships).
Weapons control: SWG 1A(V) for SSM. Vesta Helo transponder with datalink for OTHH.
Radars: Air search: Signal MW08 (derived from Smart 3D); 3D; G-band.
 Air/surface search: Signal DA08; F-band.
 Navigation: Kelvin Hughes Type 1007; I-band.
Fire control: 2 Signaal STIR; I/J/K-band; range 140 km (76 n miles) for 1 m² target.
 IFF Mk 12 Mod 4
Sonars: Computing Devices (Canada) SQS-510(V); hull-mounted; active search and attack; medium frequency.

a consortium of builders. As well as Portugal, which provided 40 per cent of the cost, assistance was given by NATO with some missile, CIWS and torpedo systems being provided by the US.
Modernisation: Full mid-life refits are planned 2011-2017. Upgrades are likely to include improvements to the combat data system, increased force protection capabilities and measures to counter asymmetric threats.
Structure: All-steel construction. Stab. lifiers fitted. Full RAS facilities. Space has been left for a sonar towed array and for VLS Sea Sparrow.
Operational: Designed primarily as ASW ships. SCOT SATCOM rotated between the three ships. 20 mm guns can be mounted on the VLS deck. Three year running cycles include 18 months at full readiness, three months training and six months refit.

Programmes: The contract for all three was signed on 25 July 1986. These are Meko 200 type ordered from

BAPTISTA DE ANDRADE	F 486	Empresa Nacional Bazán, Cartagena	1 Sep 1972	13 Mar 1973	19 Nov 1974
JOÃO ROBY	F 487	Empresa Nacional Bazán, Cartagena	1 Dec 1972	3 June 1973	18 Mar 1975
AFONSO CERQUEIRA	F 488	Empresa Nacional Bazán, Cartagena	10 Mar 1973	6 Oct 1973	26 June 1975

Displacement, tons: 1,203 standard; 1,380 full load

Dimensions, feet (metres): 277.5 × 33.8 × 10.2
(84.6 × 10.3 × 3.1)

Main machinery: 2 OEW Pielstick 12 PC2.2 V 400 diesels;
12,000 hp(m) (8.82 MW) sustained; 2 shafts

Speed, knots: 22

Range, n miles: 5,900 at 18 kt

Complement: 71 (7 officers)

Guns: 1 Creusot-Loire 3.9 in (100 mm)/55 Mod 1968, 80 rds/min to 17 km (9 n miles) anti-surface; 8 km (4.4 n miles) anti-aircraft; weight of shell 13.5 kg.
2 Bofors 40 mm/70; 300 rds/min to 12 km (6.6 n miles); weight of shell 0.96 kg.

Radars: Navigation: 1 Racal Decca RM 316P and 1 KH 5000 Nucleos 2; I-band.

Helicopters: Platform only.

Programmes: Reclassified as corvettes.

Modernisation: Communications equipment updated 1988-91. Previous modernisation programme was abandoned in 1998. Between 1999 and 2001 ASW and weapons control systems removed.

Operational: Class is used for Maritime Law Enforcement/SAR/Fishery Protection and for Humanitarian Operations. To be replaced by Viana do Castelo class by 2019. To be decommissioned 2009-18.

4 JOÃO COUTINHO CLASS (FSH)

Name	No	Builders	Laid down	Launched	Commissioned
ANTONIO ENES	F 471	Empresa Nacional Bazán, Cartagena	10 Apr 1968	16 Aug 1969	18 June 1971
JOÃO COUTINHO	F 475	Blohm + Voss, Hamburg	24 Dec 1968	2 May 1969	28 Feb 1970
JACINTO CANDIDO	F 476	Blohm + Voss, Hamburg	10 Feb 1969	16 June 1969	29 May 1970
GENERAL PEREIRA D'EÇA	F 477	Blohm + Voss, Hamburg	21 Apr 1969	28 July 1969	10 Oct 1970

Displacement, tons: 1,203 standard; 1,380 full load

Dimensions, feet (metres): 277.5 × 33.8 × 10.8
(84.6 × 10.3 × 3.3)

Main machinery: 2 OEW Pielstick 12 PC2.2 V 400 diesels;
12,000 hp(m) (8.82 MW) sustained; 2 shafts

Speed, knots: 22 Range, n miles: 5,900 at 18 kt

Complement: 70 (7 officers)

Guns: 2 US 3 in (76 mm)/50 (twin) Mk 33; 50 rds/min to 12.8 km (7 n miles); weight of shell 6 kg.

2 Bofors 40 mm/60 (twin); 300 rds/min to 12 km (6.6 n miles); weight of shell 0.89 kg.

Weapons control: Mk 51 GFCS for 40 mm.

Radars: Air/surface search; Kelvin Hughes 1007; I-band.

Navigation: Racal Decca RM 1226C; I-band.

Helicopters: Platform only.

Programmes: Reclassified as corvettes.

Modernisation: A programme for this class to include SSM and PDMS has been shelved. In 1989-91 the main radar was updated and SATCOM (INMARSAT) installed. Also fitted with SIFICAP which is a Fishery Protection data exchange system by satellite to the main database ashore.

Operational: A/S equipment no longer operational and laid apart on shore. Crew reduced as a result. To be replaced by Viana do Castelo class by 2019. To be decommissioned 2009-18.

ANTONIO ENES

12/2007, Diego Quevedo / 1335417

SHIPBORNE AIRCRAFT

Notes: Procurement of three further Lynx helicopters is under consideration. Options include Mk 95 aircraft, Super Lynx 300 (including upgrade of current aircraft) or second-hand aircraft.

Numbers/Type: 5 Westland Super Navy Lynx Mk 95
Operational speed: 125 kt (231 km/h).
Service ceiling: 12,000 ft (3,660 m).
Range: 320 n miles (593 km).
Role/Weapon systems: Ordered 2 November 1980 for MEKO 200 frigates; two are updated HAS 3 and three were new aircraft, all delivered in August and November 1993. Sensors: Bendix 1500B radar; Bendix AQS-18V dipping sonar; Racal RNS 252 datalink. Weapons: Mk 46 torpedoes, 1–12.7 mm MG

SUPER LYNX 9/2002, H M Steele / 0534127

LAND-BASED MARITIME AIRCRAFT

Notes: All Air Force manned

Numbers/Type: 5/2 CASA C-212-200 Aviocar/C-212 300 Aviocar.
Operational speed: 190 kt (353 km/h).
Service ceiling: 24,000 ft (7,315 m).
Range: 1,650 n miles (3,095 km).
Role/Weapon systems: The first five are for short-range SAR support and transport operations. The last pair were ordered in February 1993 for maritime patrol and fisheries surveillance off the Azores and Madeira. Sensors: Search radar and MAD. FLIR and datalink (last pair). Weapons: Unarmed.

CASA 212 6/2001, Adolfo Ortigueira GH / 0529552

Numbers/Type: 6 Lockheed P-3 CUP Orion.
Operational speed: 410 kt (760 km/h).
Service ceiling: 29,300 ft (8,925 m).
Range: 4,000 n miles (7,410 km).
Role/Weapon systems: Five P-3P long-range surveillance aircraft acquired from Australia and modernised to 3P standard in 1987. These aircraft have been replaced by five P-3 CUP aircraft acquired from the Netherlands in 2005. Contract signed with Lockheed Martin on 3 January 2008 for upgrade work on all five aircraft. This is to include upgrade of the mission system and provision of improved ESM, acoustic processing, communications and sensor systems. First upgraded aircraft to be delivered late 2009 and programme to be completed by late 2012. Sensors: APS-134/137 radar, ASQ-81 MAD, AQS-901 sonobuoy processor, AQS-114 computer, IFF, ALR-66 ECM/ESM. Weapons: ASW, eight Mk 46 torpedoes, depth bombs or mines, ASV; 10 underwing stations for Harpoon.

P-3 CUP 2/2006, Portuguese Airforce / 1130518

Numbers/Type: 6/2/4 AgustaWestland EH 101 Mk 514/Mk 515/Mk 516.
Operational speed: 160 (296 km/h).
Service ceiling: 15,000 ft (4,572 m).
Range: 550 n miles (1,019 km).
Role/Weapon systems: Contract in 2001 for a total of 12 utility variants of the EH 101. Six Mk 514 are configured for SAR duties, two Mk 515 for fishery protection and four Mk 516 for Combat SAR. The aircraft are designed for rapid role-change. Military lift is 28 troops and up to four tonnes underslung. Sensors: Galileo search radar, FLIR and defensive aids suite. Weapons: unarmed.

EH 101 6/2007, Portuguese Navy / 1166094

PATROL FORCES

2 + 2 (6) VIANA DO CASTELO (NPO 2000) CLASS (PSOH)

Name	No	Builders	Commissioned
VIANA DO CASTELO	P 360	Viana do Castelo Shipyards	Mar 2009
FIGUEIRA DA FOZ	P 361	Viana do Castelo Shipyards	June 2009
PONTEA DELGADA	P 362	Viano do Castelo Shipyards	2011
SINES	P 363	Viano do Castelo Shipyards	2012

Displacement, tons: 1,716 full load
Dimensions, feet (metres): 272.6 × 42.5 × 12.1 (83.1 × 12.95 × 3.69)
Main machinery: 2 Wärtsilä 12V 26 diesels; 10,480 hp (7.8 MW); 2 shafts
Speed, knots: 20
Range, n miles: 5,000 at 15 kt
Complement: 38 (5 officers)
Guns: 1 Bofors 40 mm/60. 2–12.7 mm MGs.
Weapons control: Sagem optronic director.
Radars: Surface search/navigation; 2 Kelvin Hughes; E/F/I-band.
Helicopters: Platform for one Lynx Mk 95

Comment: Designed for EEZ patrol duties. Contract on 15 October 2002 with Viana do Castelo Shipyards for two Offshore Patrol vessels. Construction started in 2003 and the first two ships were floated out on 1 October 2005; a further six are planned to be delivered by 2019 to replace the corvettes. Two further modified vessels, a Buoy Tender and a Pollution Control Ship, were ordered in May 2004 and are to be delivered in 2011 and 2012.

FIGUEIRA DA FOZ 6/2007, Massimo Anneti / 1166693

4 CACINE CLASS (LARGE PATROL CRAFT) (PBO)

Name	No	Builders	Commissioned
CACINE	P 1140	Arsenal do Alfeite	May 1969
QUANZA	P 1144	Estaleiros Navais do Mondego	May 1969
ZAIRE	P 1146	Estaleiros Navais do Mondego	Nov 1970
SAVE	P 1181	Arsenal do Alfeite	May 1973

Displacement, tons: 292.5 standard, 310 full load
Dimensions, feet (metres): 144 × 25.2 × 7.1 (44 × 7.7 × 2.2)
Main machinery: 2 MTU 12V 538 TB80 diesels; 3,750 hp(m) (2.76 MW) sustained; 2 shafts
Speed, knots: 20. **Range, n miles:** 4,400 at 12 kt
Complement: 33 (3 officers)
Guns: 1 Bofors 40 mm/60. 1 Oerlikon 20 mm/65.
Radars: Surface search: Kelvin Hughes Type 1007; I/J-band.

Comment: Originally mounted a second Bofors aft but most have been removed as has the 37 mm rocket launcher. Have SIFICAP satellite data handling system for Fishery Protection duties. An RIB is carried. Two of the class are based at Madeira on a two month rotational basis. Re-engined in 1992–94. To be decommissioned 2009–12 and replaced by LFC 2005 vessels from 2011.

CACINE 12/2003, Martin Mokrus / 1044180

ZAIRE 5/2006, A A de Kruijff / 1040764

4 CENTAURO CLASS (RIVER PATROL CRAFT) (PBR)

Name	No	Builders	Commissioned
CENTAURO	P 1155	Arsenal do Alfeite	20 Mar 2000
ORION	P 1156	Arsenal do Alfeite	27 Mar 2001
PÉGASO	P 1157	Estaleiros Navais do Mondego	27 Mar 2001
SAGITARIO	P 1158	Estaleiros Navais do Mondego	27 Mar 2001

Displacement, tons: 89 full load
Dimensions, feet (metres): 93.2 × 19.5 × 4.6 (28.4 × 5.95 × 1.4)
Main machinery: 2 Cummins KTA-50-M2 diesels; 3,600 hp(m) (2.64 MW); 2 shafts
Speed, knots: 26. **Range, n miles:** 640 at 20 kt
Complement: 8 (1 officer)
Guns: 1 Oerlikon 20 mm/65.
Radars: 1 Furuno FCR 1411 MK3.

Comment: Similar to Argos class but of aluminium hull. Capable of full speed operation up to Sea State 3. Carries a semi-rigid boat with a 50 hp outboard engine. The boat is recoverable via a stern well at up to 10 kt. To be refitted 2012–13.

SAGITARIO 10/2006, Adolfo Ortigueira Gil / 1040677

2 ALBATROZ CLASS (RIVER PATROL CRAFT) (PBR)

Name	No	Builders	Commissioned
AGUIA	P 1165	Arsenal do Alfeite	28 Feb 1975
CISNE	P 1167	Arsenal do Alfeite	31 Mar 1976

Displacement, tons: 45 full load
Dimensions, feet (metres): 77.4 × 18.4 × 5.2 (23.6 × 5.6 × 1.6)
Main machinery: 2 Cummins diesels, 1,100 hp (820 kW); 2 shafts
Speed, knots: 20. **Range, n miles:** 2,500 at 12 kt
Complement: 8 (1 officer)
Guns: 1 Oerlikon 20 mm/65. 2–12.7 mm MGs
Radars: Surface search: Decca RM 316P, I-band

Comment: One other is used for harbour patrol duties. Two transferred to East Timor in 2001. Expected to be decommissioned 2012–13.

AGUIA 10/2006, Adolfo Ortigueira Gil / 1335470

5 ARGOS CLASS (RIVER PATROL CRAFT) (PBR)

Name	No	Builders	Commissioned
ARGOS	P 1150	Arsenal do Alfeite	2 July 1991
DRAGÃO	P 1151	Arsenal do Alfeite	18 Oct 1991
ESCORPIÃO	P 1152	Arsenal do Alfeite	26 Nov 1991
CASSIOPEIA	P 1153	Conafi	11 Nov 1991
HIDRA	P 1154	Conafi	18 Dec 1991

Displacement, tons: 94 full load
Dimensions, feet (metres): 89.2 × 19.4 × 4.6 (27.2 × 5.9 × 1.4)
Main machinery: 2 MTU 12V 396 TE84 diesels; 3,700 hp(m) (2.73 MW); sustained; 2 shafts
Speed, knots: 26. **Range, n miles:** 1,350 at 15 kt
Complement: 12 (1 officer)
Guns: 2–12.7 mm MGs (1150–1154).
Radars: Navigation: Furuno 1505 DA or Furuno FR 1411; I-band.

Comment: First five ordered in 1989 and 50 per cent funded by the EC. Of GRP construction, capable of full speed operation up to Sea State 3. Carries a RIB with a 37 hp outboard engine. The boat is recoverable via a stern well at up to 10 kt.

HIDRA 9/2007, Marco Ghigliano / 1170064

0 + 8 COASTAL (LFC 2005) PATROL CRAFT (PBO)

Displacement, tons: 660 full load
Dimensions, feet (metres): 196.5 × 32.4 × 8.8 (59.9 × 9.9 × 2.7)
Main machinery: 4 diesels; 12,100 hp (9 MW); 2 shafts
Speed, knots: 25. **Range, n miles:** To be announced
Complement: 20 (3 officers)
Guns: 1 Bofors 40 mm/60. 1–12.7 mm MG.
Weapons control: Optronic director.
Radars: To be announced.

Comment: Preliminary contract with Viana do Castelo Shipyard for the construction of eight patrol vessels was let on 19 December 2005. Designed for EEZ patrol and fishery protection, the ships are to replace the Cacine class and are to enter service 2011–14.

LFC (not to scale), Ian Sturton / 1154415

1 RIO MINHO CLASS (RIVER PATROL CRAFT) (PBR)

Name	No	Builders	Commissioned
RIO MINHO	P 370	Arsenal do Alfeite	1 Aug 1991

Displacement, tons: 72 full load
Dimensions, feet (metres): 73.5 × 19.7 × 2.6 (22.4 × 6 × 0.8)
Main machinery: 2 KHD-Deutz diesels, 664 hp(m) (488 kW); 2 Schottel pumpjets
Speed, knots: 9.5. **Range, n miles:** 420 at 7 kt
Complement: 8 (1 officer)
Guns: 1–7.62 mm MG.
Radars: Navigation. Furuno FR 1505DA; I-band.

RIO MINHO 6/2008*, Portuguese Navy / 1335421

AMPHIBIOUS FORCES

Notes: Four new LCMs are to be constructed as part of the LPD (NAVPOL) contract.

0 + 1 AMPHIBIOUS TRANSPORT SHIP (LPD)

Name	No	Builders	Laid down	Launched	Commissioned
ALFONSO DE ALBUQUERQUE	—	Viana do Castelo Shipyard	2012	2013	2014

Displacement, tons: 10,500 full load
Dimensions, feet (metres): 531.5 × 82.0 × 17.1 (162.0 × 26.0 × 5.2)
Flight deck, feet (metres): To be announced
Main machinery: Diesel-electric; 4 diesels; 18,775 hp (14 MW); 2 shafts
Speed, knots: 19. **Range, n miles:** 6,000 at 14 kt
Complement: 150
Military lift: 650 troops; 4 LCM, 76 vehicles (including 40 light armoured vehicles), 53 light inflatable boats, 3,000 m³ of storage space

Missiles: SAM. 2 RAM 21-cell/ Mk 49 launchers.
Guns: Medium calibre and CIWS.
Countermeasures: To be announced
Combat data systems: To be announced
Weapons control: To be announced
Radars: Air/surface search: 3D radar to be announced
Surface search: To be announced
Navigation: To be announced.

Helicopters: Landing spots for 4 EH-101 or 6 Lynx.

Programmes: The Portuguese Ministry of Defence signed a Declaration of Intentions on 16 February 2005 with ENVC Shipyard for the design and construction of a Landing Platform Dock (LPD). The contract is understood to be part of an offset agreement arising from the contract with the German Submarine Consortium for two Type 209PN submarines. The project is known as Navio Polivalente Logístico (NAVPOL). Construction of LCMs is understood to be included in the contract.

Structure: The design is very similar to the Scheide Enforcer 1300 and is to include a dock, flight deck, hangar, vehicle garage and hospital.

Operational: Following endorsement of the Portuguese National Defence Strategic Concept (NDSC) in 2003, the new LPD is to be the centrepiece of the future Portuguese Navy and is to be designed to support worldwide joint operations of national and allied armed forces, including humanitarian aid and/or disaster relief. The ship is to be capable of projecting and supporting a battalion of troops.

NAVPOL (Scale 1 : 1,500), Ian Sturton / 1153007

1 BOMBARDA CLASS (LCU)

Name	No	Builders	Commissioned
BACAMARTE	LDG 203	Arsenal do Alfeite	Dec 1985

Displacement, tons: 652 full load
 Dimensions, feet (metres): 184.3 x 38.7 x 6.2 (56.2 x 11.8 x 1.9)
 Main machinery: 2 MTU MB diesels; 910 hp(m) (669 kW); 2 shafts
 Speed, knots: 9.5 Range, n miles: 2,600 at 9 kt
 Complement: 21 (3 officers)
 Military lift: 350 tons
 Guns: 2 Oerlikon 20 mm.
 Radars: Navigation Decca RM 316P; I-band

Comment: Similar to French EDIC. To be decommissioned in 2015.

BACAMARTE 10/2008, Adolfo Ortigueira GN / 1040678

SURVEY SHIPS

2 STALWART CLASS (AGS)

Name	No	Builders	Commissioned
D. CARLOS I (ex-Audacious, ex-Dauntless)	A 522 (ex-T-AGOS 11)	Tacoma Boat	18 June 1989
ALMIRANTE GAGO COUTINHO (ex-Assurance)	A 523 (ex-T-AGOS 5)	Tacoma Boat	1 May 1985

Displacement, tons: 2,285 full load
 Dimensions, feet (metres): 224 x 43 x 15.9 (68.3 x 13.1 x 4.6)
 Main machinery: Diesel-electric; 4 Caterpillar D 398B diesel generators; 3,200 hp (2.39 MW); 2 GE motors; 1,600 hp (1.2 MW); 2 shafts; bow thruster, 550 hp (410 kW)
 Speed, knots: 11 Range, n miles: 4,000 at 11 kt; 6,450 at 3 kt
 Complement: 31 (6 officers) plus 15 scientists
 Radars: Navigation: 2 Raytheon; I-band

Comment: Paid off from USN in November 1995. First one acquired 21 July 1996. Refitted to serve as a hydrographic ship, operating predominantly off the west coast of Africa. Recommissioned 9 December 1996. A second of class acquired by gift 30 September 1999, has been similarly refitted and recommissioned 26 January 2000.

D. CARLOS I 11/2006, Marco Ghiglino / 1164952

2 ANDROMEDA CLASS (AGSC)

Name	No	Builders	Commissioned
ANDROMEDA	A 5203	Arsenal do Alfeite	1 Feb 1987
AURIGA	A 5205	Arsenal do Alfeite	1 July 1987

Displacement, tons: 245 full load
 Dimensions, feet (metres): 103.3 x 25.4 x 8.2 (31.5 x 7.7 x 2.5)
 Main machinery: 1 MTU 12V 396 TC62 diesel; 1,200 hp(m) (880 kW) sustained; 1 shaft
 Speed, knots: 12
 Range, n miles: 1,980 at 10 kt
 Complement: 17 (3 officers)
 Radars: Navigation. Koden; I-band.

Comment: Both ordered in January 1984. Aurga has a research submarine ROV Phantom S2 and a Klein side scan sonar. Mostly used for oceanography.

1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Commissioned
SAGRES (ex-Guanabara, ex-Albert Leo Schlageter)	A 520	Biohm + Voss, Hamburg	10 Feb 1938

Displacement, tons: 1,725 standard; 1,940 full load
 Dimensions, feet (metres): 231 w; 295 2 oa x 39.4 x 17 (70.4, 90 x 12 x 5.2)
 Main machinery: 2 MTU 12V 183 TE92 auxiliary diesels; 1 shaft
 Speed, knots: 10.5
 Range, n miles: 5,450 at 7.5 kt on diesel
 Complement: 182 (12 officers)
 Radars: Navigation: 1 Racal Decca and 1 KH 1500 Nucleos 2; I-band

Comment: Former German sail training ship launched 30 October 1937. Sister of US Coast Guard training ship *Eagle* (ex-German *Horst Wessel*) and Soviet *Tovarisch* (ex-German *Gorch Fock*). Taken by the USA as a reparation after the Second World War in 1945 and sold to Brazil in 1948. Purchased from Brazil and commissioned in the Portuguese Navy on 2 February 1962 at Rio de Janeiro and renamed *Sagres*. Sail area, 20,793 sq ft. Height of main mast, 142 ft. Phased refits 1987-88 and again in 1991-92 which included new engines, improved accommodation, hydraulic crane and updated navigation equipment. A further refit is planned 2011 13.

SAGRES 7/2006, B Prézeln / 1040679

1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Commissioned
CREOULA	UAM 201	Lisbon Shipyard	1937

Displacement, tons: 818 standard; 1,055 full load
 Dimensions, feet (metres): 221.1 x 32.5 x 13.8 (67.4 x 9.9 x 4.2)
 Main machinery: 1 MTU 8V 183 TE92 auxiliary diesel; 665 hp(m) (490 kW); 1 shaft

Comment: Ex-deep sea sail fishing ship used off the coast of Newfoundland for 36 years. Bought by Fishing Department in 1976 to turn into a museum ship but because she was still seaworthy it was decided to convert her to a training ship. Recommissioned in the Navy in 1987. Refit completed in 1992 including a new engine and improved accommodation. A life-extension refit is under consideration.

CREOULA 6/2005, Portuguese Navy / 1153417

1 SAIL TRAINING YACHTS (AXS)

POLAR (ex-Anne Linde) A 5204

Displacement, tons: 70

Dimensions, feet (metres): 75 x 16 x 8.2 (22.9 x 4.9 x 2.5)

Radars: Navigator: Raytheon; I-band.

Comment: Sail number P-551 is displayed.

POLAR

6/2007, Portuguese Navy / 1166892

2 SAIL TRAINING YACHTS (AXS)

BELLATRIX UAM 813 CANOPUS UAM 814

Displacement, tons: 12 (Bellatrix); 10 (Canopus)

Dimensions, feet (metres): 47.4 x 14.4 x 8.9 (14.45 x 4.4 x 2.7) (Bellatrix)

47.6 x 13.9 x 6.9 (14.52 x 4.23 x 2.1) (Canopus)

Complement: 8

Radars: Furuno, I-band.

Comment: Both attached to the naval school at Lisbon.

BELLATRIX

6/2007, Portuguese Navy / 1166891

AUXILIARIES

Notes: (1) Two craft are employed on Pollution Control tasks. *Vazante* (UAM 687) is 14 tons and *Enchente* (UAM 688) is 65 tons. *Barrocas* (UAM 854) is an accommodation barge. *Marateca* (UAM 304) and *Meuro* (UAM 305) are fuel lighters. (2) Studies for the procurement of a new AOR, to enter service in about 2016, are in progress.

1 BUOY TENDER (ABU)

Name	No	Builders	Commissioned
GUIA	UAM 676	S Jacinto, Aveiro	30 Jan 1986

Displacement, tons: 70 full load

Dimensions, feet (metres): 72.2 x 25.9 x 7.2 (22 x 7.9 x 2.2)

Main machinery: 1 Deutz MWM SBA6M816 diesel; 465 hp(m) (342 kW) sustained;

1 Schottel Navigator prop

Speed, knots: 8.5 (3.5 on auxiliary engine)

Complement: 6

Comment: Belongs to the Lighthouse Service.

GUIA

6/2005, Portuguese Navy / 1153416

1 ROVER CLASS (REPLENISHMENT TANKER) (AORLH)

Name	No	Builders	Launched	Commissioned
BÉRRIO (ex-Blue Rover)	A 5210 (ex-A 270)	Swan Hunter	11 Nov 1969	15 July 1970

Displacement, tons: 4,700 light; 11,522 full load

Dimensions, feet (metres): 461 x 63 x 24 (140.6 x 19.2 x 7.3)

Main machinery: 2 SEMT-Pielstick 16 PA4 185 diesels; 15,360 hp(m) (11.46 MW); 1 shaft;

Kamewa cp prop, bow thruster

Speed, knots: 19

Range, n miles: 15,000 at 15 kt

Complement: 54 (7 officers)

Cargo capacity: 6,600 tons fuel

Guns: 2 Oerlikon 20 mm.

Countermeasures: Decoys: 2 Vickers Corvus launchers. 2 Plessey Shield launchers.

1 Graseby Type 182; towed torpedo decoy.

Radars: Navigation: Kelvin Hughes Type 1006; I-band.

Helicopters: Platform for 1 medium.

Comment: Transferred from UK and recommissioned 31 March 1993. Small fleet tanker designed to replenish oil and aviation fuel, fresh water, limited dry cargo and refrigerated stores under all conditions while under way. Full refit in 1990-91 gave a service life expectancy until 2005 and a further refit is to be undertaken to prolong life until about 2015. No hangar but helicopter landing platform is served by a stores lift, to enable stores to be transferred at sea by 'vertical lift'. Capable of HIFR. Can pump fuel at 600 m³/h. Others of the class in service in Indonesia and the UK.

1 BUOY TENDER (ABU)

Name	No	Builders	Commissioned
SCHULTZ XAVIER	A 521	Alfete Naval Yard	14 July 1972

Displacement, tons: 900 full load

Dimensions, feet (metres): 184 x 33 x 12.5 (56 x 10 x 3.8)

Main machinery: 2 diesels; 2,400 hp(m) (1.76 MW); 2 shafts

Speed, knots: 14.5

Range, n miles: 3,000 at 12.5 kt

Complement: 54 (4 officers)

Comment: Used for servicing navigational aids and as an occasional tug. Expected to be decommissioned in 2013 and replaced by Viano do Castelo class.

SCHULTZ XAVIER

12/2006, Marco Ghigino / 1164951

Comment: GRP hull. Built by Rodman, Vigo in 1985-87

RODMAN 38 10/2006, Adolfo Ortigueira Gil / 1040675

Qatar

Country Overview

Formerly a British protectorate from 1916, the State of Qatar gained its independence in 1971. Situated on the eastern side of the Arabian Peninsula, it occupies the Qatar Peninsula which has a 304 n mile coastline with the Gulf. With an area of 4,416 square miles, it is bordered to the south by Saudi Arabia and the United Arab Emirates. The dispute with Bahrain over sovereignty of the Hawar islands was settled on 16 March 2001. The capital, largest city and principal port is Doha. Territorial seas (12 n miles) are claimed. An EEZ (200 n miles) has been claimed but the limits are not defined

Headquarters Appointments

Commander Naval Force:
 Commodore Mohammed Nasir Al-Muhannadi
 Commander Coast Guard:
 Colonel Ali al-Manna'i

Personnel

2009: 1,800 officers and men (including Marine Police)

Bases

Doha (main); Halul Island (secondary)

Coast Defence

Two truck-mounted batteries of Exocet MM 40 quad launchers

Prefix to Ships' Names

QENS (Qatar Emiri Navy)

PATROL FORCES

Notes: A programme for the replacement of some or all of the attack craft inventory was launched in October 2007

4 BARZAN (VITA) CLASS (PGGFM)

Name	No	Builders	Laid down	Launched	Commissioned
BARZAN	Q04	Vosper Thornycroft	Feb 1994	1 Apr 1995	9 May 1996
HUWAR	Q05	Vosper Thornycroft	Aug 1994	15 July 1995	10 June 1996
AL UDEID	Q06	Vosper Thornycroft	Mar 1995	21 Mar 1996	16 Dec 1996
AL DEEBEL	Q07	Vosper Thornycroft	Aug 1995	31 Aug 1996	3 July 1997

Displacement, tons: 376 full load
 Dimensions, feet (metres): 185.7 × 29.5 × 8.2
 (56.3 × 9 × 2.6)
 Main machinery: 4 MTU 20V 538 TB93 diesels; 18,740 hp (m) (13.8 MW) sustained; 4 shafts
 Speed, knots: 35
 Range, n miles: 1,800 at 12 kt
 Complement: 35 (7 officers)

Missiles: SSM: 8 Aerospatiale MM 40 Exocet (Block II) ●, inertial cruise; active radar homing to 70 km (40 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.
 SAM: Matra Sadral sextuple launcher for Mistral ●, IR homing to 4 km (2.2 n miles); warhead 3 kg
 Guns: 1 OTO Melara 76 mm/62 Super Rapid ●, 120 rds/min to 16 km (8.7 n miles); weight of shell 6 kg
 1 Signaal Goalkeeper 30 mm ●, 7 barrels; 4,200 rds/min combined to 2 km. 2—12.7 mm MGs.
 Countermeasures: Decoys: CSEE Dagare Mk 2 ● for chaff and IR flares.
 ESM: Thomson-CSF DR 3000S ●, intercept
 ECM: Dassault Salamandre ARBB 33 ●, jammer.
 Combat data systems: Signaal SEWACO FD with Thomson-CSF TACTICOS; Link Y.
 Weapons control: Signaal STING optronic director. Signaal IRSCAN electro-optical tracker ●.
 Radars: Air/surface search: Thomson-CSF MRR ●, G-band. Navigation: Kelvin Hughes 1007 ●, I band.
 Fire control: Signaal STING ●, I-J band.

Programmes: Order announced on 4 June 1992 by Vosper Thornycroft. First steel cut 20 July 1993.

Structure: Vita design derivative based on the hull used for Oman and Kenya in the 1980s. Steel hull and aluminium superstructure. CSEE Sidewind EW management system is installed and a Racal Thorn data distribution system is used. Baffles have been added around the ECM aeriels to prevent mutual interference with other sensors. An advanced machinery control and surveillance system allows one-man operation of main propulsion, electrical generation and auxiliary systems from the bridge. The bridge staff are also able to monitor the state of all compartments for damage control purposes.

Operational: First pair arrived in the Gulf in August 1997, second pair in May 1998. All of the class carry 40 kt RIBs with twin 80 hp outboards.

3 DAMEN POLYCAT 1450 CLASS (COASTAL PATROL CRAFT) (PB)

Q 31-36 series

Displacement, tons: 18 full load

Dimensions, feet (metres): 47.6 × 15.4 × 4.9 (14.5 × 4.7 × 2.1)

Main machinery: 2 Detroit 12V-71TA diesels; 840 hp (627 kW) sustained; 2 shafts

Speed, knots: 26

Complement: 11

Guns: 1 Oerlikon 20 mm

Radars: Navigation. Racal Decca; I-band

Comment: Three remain of six delivered February-May 1980.

Q 33

3/1980, Damen SY / 0081617

AUXILIARIES

Notes: There are a number of amphibious craft including an LCT *Rabha* of 160 ft (48.8 m) with a capacity for three tanks and 110 troops, acquired in 1986-87. Also four Rotork craft and 30 Sea Jeeps in 1985. It is not clear how many of the smaller craft are for civilian use.

POLICE

Notes: (1) Requirements have been reported for patrol craft, two of 24 m, two of 22 m and 19 of 12 m. Also for two hovercraft.

(2) Two Halmatic 18 m pilot boats (based on Arun class lifeboat hull) delivered in 2000.

4 CRESTITALIA MV-45 CLASS (PB)

RG 91-94

Displacement, tons: 17 full load

Dimensions, feet (metres): 47.6 × 12.5 × 2.6 (14.5 × 3.8 × 0.8)

Main machinery: 2 diesels; 1,270 hp(m) (933 kW); 2 shafts

Speed, knots: 32

Range, n miles: 275 at 29 kt

Complement: 6

Guns: 1 Oerlikon 20 mm. 2- 7.62 mm MGs.

Radars: Surface search. I-band.

Comment: Built by Crestitalia and delivered in mid-1989. GRP construction.

4 DV 15 FAST INTERCEPT CRAFT (HSIC)

Displacement, tons: 12 full load
Dimensions, feet (metres): 50.9 × 9.8 × 2.6 (15.5 × 3.0 × 0.8)
Main machinery: 2 diesels; 2 surface drives
Speed, knots: 55
Range, n miles: 400 at 30 kt
Complement: 4
Guns: 1—12.7 mm MG
Radars: Surface search: I-band.

Comment: Built by CMN Cherbourg and delivered in 2006 to replace P 1200 class. The option for a further two craft has not been taken up. Composite hull construction similar to those in Yemeni service. Roles include coastal protection and security of offshore oil and gas installations.

DV 15 class

2/2003, CMN / 0531701

3 HALMATIC M 160 CLASS (PB)

Displacement, tons: 20 full load
Dimensions, feet (metres): 62.5 × 15.4 × 4.6 (16 × 4.7 × 1.4)
Main machinery: 2 MTU diesels; 520 hp (im) (388 kW) sustained; 2 shafts
Speed, knots: 27
Range, n miles: 500 at 17 kt
Complement: 6
Guns: 1—7.62 mm MG
Radars: Surface search: Racal Decca; I-band.

Comment: Order confirmed on 11 October 1995. Delivered to Police in November 1996. Similar to Police craft obtained by Caribbean countries.

HALMATIC 739

3/2008*, Michael Nitz / 1353278

**Romania****Country Overview**

Situated in south-eastern Europe, the Republic of Romania has an area of 91,700 square miles and is bordered to the north by Ukraine and Moldova, to the west by Hungary and Serbia, and to the south by Bulgaria. The River Danube forms much of the southern border. Romania has a coastline of 121 n miles with the Black Sea on which Constanta, linked to the Danube port of Cernavoda by canal, is the principal seaport. Prominent river ports include Galati and Braila on the lower Danube, and Giurgiu, which has pipeline connections to the Ploesti oil fields. The capital and largest city is Bucharest. Territorial waters (12 n miles) are claimed. An EEZ (299 n miles) is claimed but the limits have not been defined.

Headquarters Appointments

Commander-in-Chief of the Navy:
Rear Admiral Dorin Dănilă

Personnel

- a) 2009: 8,215 Navy
b) Reserves: 500

Organisation

The Navy is composed of the Naval Forces Staff (Bucharest), the Naval Operational Command, Fleet Command, Naval Academy, Hydrographic Directorate, Naval Academy, Diving Centre, Electronic Warfare Unit, Logistic Base and one Naval Infantry Battalion

Bases

Black Sea-Mangalia (Training); Constanta (Naval Operational Command and Naval Logistic Base)
Danube-Brăila, Tulcea

Border Guard

Responsible for land and sea borders and has four brigades, two of which have sea forces based at Orsova and Constanta.

 Sonars: Ferranti/Thomson Sintra Type 2050; hull-mounted search and attack.

Helicopters: Platform for 1 medium.

Programmes: Originally successors to the UK Leander class, these ships entered RN service in 1987 but were withdrawn, half-way through their ships' lives, as a result of the 1998 UK Defence Review. Sale agreement signed on 14 January 2003 included platform overhaul, installation of reconditioned engines and combat system modernisation. Training is also included in the package. Following trials and sea training, *Regele Ferdinand* arrived in Romania on 10 December 2004 and *Regina Maria* in 2005. A 15-year through-life support contract with BAE Systems was signed in October 2005.

Modernisation: BAE Systems was prime contractor and FSL sub-contractor for reactivation and modernisation.

REGELE FERDINAND

(Scale 1 : 1,200), Ian Sturton / 1044184

REGELE FERDINAND

11/2004, John Brodie / 1133559

The CACS command system was upgraded and 76 mm gun installed. A second-phase upgrade is to be undertaken in Romania although a firm timetable is yet to be announced. This is expected to include a towed-array sonar, air-defence and anti-ship weapons, an improved EW suite and small calibre guns.

Structure: Broadsword Batch 2 ships were stretched versions of Batch 1. The flight decks are capable of embarking medium helicopters.

Operational: Trials with a Puma helicopter were conducted in May 2008.

1 MARASESTI CLASS (FFGH)

Name	No	Builders	Laid down	Launched	Commissioned
MARASESTI (ex-Muntenia)	111	Mangalia Shipyard	7 Aug 1979	4 June 1981	3 June 1985

Displacement, tons: 5,790 full load
Dimensions, feet (metres): 474.4 × 48.6 × 23
 (144.6 × 14.8 × 7)
Main machinery: 4 diesels, 32,000 hp(rn) (23.5 MW); 4 shafts
Speed, knots: 27
Complement: 270 (25 officers)

Missiles: SSM: 8 SS-N-2C Styx ●; active radar or IR homing to 83 km (45 n miles) at 0.9 Mach; warhead 513 kg.
Guns: 4 USSR 3 in (76 mm)/59 AK 726 (2 twin) ●; 90 rds/min to 16 km (8.5 n miles); weight of shell 5.9 kg.
 4–30 mm/65 ●; 6 barrels per mounting, 3,000 rds/min to 2 km.

Torpedoes: 6–21 in (533 mm) (2 triple) tubes ●. Russian 53–65; passive/wake homing to 25 km (13.5 n miles) at 50 kt; warhead 300 kg.

A/S mortars: 2 RBU 6000 ●; 12-tubed trainable, range 6,000 m; warhead 31 kg

Countermeasures: Decoys: 2 PK 16 chaff launchers.

ESM/ECM: 2 Watch Dog; intercept, Bell Clout and Bell Slam.

Radars: Air/surface search, Strut Curve ●, F-band.

Surface search: Plank Shave ●; E-band.

Fire control: Two Drum Tilt ●; H/I-band.

Hawk Screech ●; I-band.

Navigation: Nayada (MR 212); Rascal Decca; I-band.

IFF: High Pole B

Sonars: Hull mounted; active search and attack; medium frequency.

Helicopters: 2 IAR-316 Alouette III ●.

Modernisation: Attempts have been made to modernise some of the electronic equipment. Also topweight problems have been addressed by reducing the height of the mast structures and lowering the Styx missile launchers by one deck. Two RBU 6000s have replaced the RBU 1200. Communications have been upgraded to enable NATO interoperability but there are no further modernisation plans.

Structure: A distinctive Romanian design. Originally thought to be powered by gas turbines but a diesel configuration including four shafts is now confirmed.

MARASESTI

(Scale 1 : 1,200), Ian Sturton / 1044186

MARASESTI

1/2001, van Ginderen Collection / 0106855

Operational: Deactivated in June 1988 due to manpower and fuel shortages but modernisation work was done from 1990 to 1992 and sea trials started in mid-1992. Carried out a major naval exercise in September 1993,

which included firing the Styx missile. Deployed to the Mediterranean in September 1994 for a short cruise, in 1995 on two occasions and again in March 1998. Reclassified as frigate in 2001. Based at Constanta

MARASESTI

6/2004, C D Yaxell / 0580801

MARASESTI

7/1995, Diego Quisvado / 0057162

CORVETTES

Notes. The multifunction corvette programme is for a class of four corvettes to replace the Tetal and Improved Tetal classes. The broad requirement is for a 2,000-ton ship that is fully compatible with NATO requirements. The ships, to be built in Romania, are likely to have ASW, ASuW and crisis-stabilisation roles. The procurement process is expected to start in 2009.

2 TETAL CLASS (FS)

Name	No	Builders	Launched	Commissioned
ADMIRAL PETRE BARBUNEANU	260	Mangalia Shipyard	23 May 1981	4 Feb 1983
VICE ADMIRAL EUGENIU ROSCA	263	Mangalia Shipyard	11 July 1985	23 Apr 1987

Displacement, tons: 1,440 full load
Dimensions, feet (metres): 303.1 × 38.4 × 9.8
 (92.4 × 11.7 × 3)
Main machinery: 4 diesels, 13,000 hp(m) (9.6 MW); 4 shafts
Speed, knots: 24
Complement: 98

Guns: 4 USSR 3 in (76 mm)/59 AK 726 (2 twin) ●; 90 rds/min to 16 km (8.5 n miles); weight of shell 5.9 kg
 4 USSR 30 mm/65 (2 twin) ●; 500 rds/min to 4 km (2.2 n miles); weight of shell 0.54 kg.
 2—14.5 mm MGs ●

Torpedoes: 4—21 in (533 mm) (2 twin) tubes ●. Russian 53-65; passive/wake homing to 25 km (13.5 n miles) at 50 kt; warhead 300 kg

A/S mortars: 2 RBU 2500 16-tubed trainable ●; range 2,500 m; warhead 21 kg
Countermeasures: Decoys: 2 PK 16 chaff launchers ●
ESM: 2 Watch Dog; intercept.

ADMIRAL PETRE BARBUNEANU

(Scale 1 : 900), Ian Sturton / 1167410

Radars: Air/surface search: Strut Curve ●; F-band.
 Fire control: Drum Tilt ●; H/I-band. Hawk Screech ●; F-band.
 Navigation: Nayada; I-band.
 IFF: High Pole.
Sonars: Hercules (MG 322); Hull-mounted; active search and attack, medium frequency.

Programmes: Building terminated in 1987 in favour of the improved design with a helicopter platform.
Structure: A modified Soviet Koni design.
Operational: Both based at Constanta. Two decommissioned in 2004.

ADMIRAL PETRE BARBUNEANU

5/2008, C D Yaylali / 1353292

2 IMPROVED TETAL CLASS (FSH)

Name	No	Builders	Launched	Commissioned
CONTRE ADMIRAL EUSTATIU SEBASTIAN	264	Mangalia Shipyard	12 Apr 1988	30 Dec 1989
ADMIRAL HORIA MACELARIU	265	Mangalia Shipyard	15 May 1994	29 Sep 1997

Displacement, tons: 1,500 full load
Dimensions, feet (metres): 303.1 × 38.4 × 11
 (92.4 × 11.7 × 3.1)

Main machinery: 4 diesels; 13,000 hp(m) (9.6 MW); 4 shafts
Speed, knots: 24
Complement: 95

Guns: 1 USSR 3 in (76 mm)/59 AK 176 ●; 120 rds/min to 16 km (8 n miles); weight of shell 5.9 kg
 2—30 mm/65 AK 630 ●; 6 barrels per mounting, 3,000 rds/min to 2 km.
 2—30 mm/85 AK 306 ●; 6 barrels per mounting, 3,000 rds/min to 2 km.

Torpedoes: 4—21 in (533 mm) (2 twin) tubes ●. Russian 53-65; passive/wake homing to 25 km (13.5 n miles) at 50 kt; warhead 300 kg.

A/S mortars: 2 RBU 6000 ●; 12-tubed trainable; range 6,000 m; warhead 31 kg.

Countermeasures: Decoys: 2 PK 16 chaff launchers ●.

ESM: 2 Watch Dog; intercept

Radars: Air/surface search: Strut Curve ●; F-band.

Fire control: Drum Tilt ●; H/I-band.

Navigation: Nayada; I-band

IFF: High Pole.

Sonars: Hull-mounted; active search and attack; medium frequency.

Helicopters: 1 IAR-316 Alouette III ●.

Programmes: Follow on to Tetal class. Second of class was delayed when work stopped for a time in 1993-94.

Structure: As well as improved armament and a helicopter deck, there are superstructure changes from the original Tetals, but the hull and propulsion machinery are the same.

Operational: Both based at Mangalia

ADMIRAL HORIA MACELARIU

(Scale 1 : 900), Ian Sturton / 1044187

CONTRE ADMIRAL EUSTATIU SEBASTIAN

4/2007, C D Yaylali / 1167803

ADMIRAL HORIA MACELARIU

11/2007, Selim San / 1353283

SHIPBORNE AIRCRAFT

Numbers/Type: 5 IAR-316B Alouette III.

Operational speed: 113 kt (210 km/h).

Service ceiling: 10,500 ft (3,200 m).

Range: 290 n miles (540 km).

Role/Weapon systems: ASW helicopter. Sensors: Nose-mounted search radar. Weapons: ASW; two lightweight torpedoes.

Numbers/Type: 3 IAR Brasov 330 Puma.

Operational speed: 139 kt (257 km/h).

Service ceiling: 15,750 ft (4,800 m).

Range: 297 n miles (550 km).

Role/Weapon systems: Eurocopter Puma built under license in Romania. Three aircraft procured by Romanian Navy in 2008. All upgraded to SOCAT configuration undertaken by IAR Brasov and Elbit Systems, Israel. The upgrade includes improved avionics. The helicopters are used in utility and SAR roles but could be upgraded with sensors and weapons in parallel with the Type 22 frigate modernisation programme.

IAR 330

8/2005, MOD Romania / 1169422

LAND-BASED MARITIME AIRCRAFT

Numbers/Type: 5 Mil Mi-14PL Haze A.

Operational speed: 124 kt (230 km/h).

Service ceiling: 15,000 ft (4,570 m).

Range: 432 n miles (800 km).

Role/Weapon systems: Medium-range ASW helicopter. Sensors: Short Horn search radar, dipping sonar, MAD, sonobuoys. Weapons: ASW; internally stored torpedoes, depth mines and bombs.

HAZE PL (Polish colours)

8/2000 / 0105235

PATROL FORCES

Notes: There is a total of about 20 river patrol boats. These include three 27 ft Boston Whalers presented by the US in March 1993 for Customs/Police patrols on the Danube in support of UN sanctions operations. There is also a hovercraft built at Mangalia in 1998

5 BRUTAR II CLASS (RIVER MONITORS) (PGR)

Name	No	Builders	Commissioned
RAHOVA	176	Mangalia Shipyard	14 Apr 1988
OPANEZ	177	Mangalia Shipyard	24 July 1990
SMARDAN	178	Mangalia Shipyard	24 July 1990
POSADA	179	Mangalia Shipyard	14 May 1992
ROVINE	180	Mangalia Shipyard	30 June 1993

Displacement, tons: 410 full load

Dimensions, feet (metres): 150 x 26.4 x 4.9 (45.7 x 8 x 1.5)

Main machinery: 2 diesels; 2,700 hp(m) (2 MW); 2 shafts

Speed, knots: 16

Guns: 1—100 mm (tank turret), 2—30 mm (twin), 10—14.5 mm (2 quad, 2 single) MGs.

2—122 mm BM-21 rocket launchers; 40-tubed trainable.

Radars: Navigation: I-band

Comment: Operational as patrol craft on the Danube. The first is a Brutar I. The next pair are Brutar IIs based at Tulcea and the last two are Brutar IIs based at Mangalia.

OPANEZ

10/2003, Freddy Phillips 0689804

ROVINE

8/2008, Lemachko Collection / 1353281

12 VD 141 CLASS (RIVER PATROL CRAFT) (PBR)

141-185 series

Displacement, tons: 97 full load

Dimensions, feet (metres): 109 x 15.7 x 2.8 (33.3 x 4.8 x 0.9)

Main machinery: 2 diesels, 870 hp(m) (640 kW); 2 shafts

Speed, knots: 13

Guns: 4—14.5 mm (2 twin) MGs.

Mines: 6

Radars: Navigation: Nayada; I-band.

Comment: Built in Romania at Dobreta Severin Shipyard 1976-84. Ex river minesweepers now employed as patrol craft on the Danube.

VD 159

8/2008, Lemachko Collection / 1353279

3 KOGALNICEANU CLASS (RIVER MONITORS) (PGR)

Name	No	Builders	Recommissioned
MIKHAIL KOGALNICEANU	45	Dobeta Santierul, Turnu Severin	19 Dec 1993
I C BRATIANU	46	Dobeta Santierul, Turnu Severin	28 Dec 1994
LASCAR CATARGIU	47	Dobeta Santierul, Turnu Severin	22 Nov 1996

Displacement, tons: 575 full load

Dimensions, feet (metres): 170.5 x 29.5 x 5.6 (52 x 9 x 1.7)

Main machinery: 2 24-H-165 RINS diesels, 4,400 hp(m) (3.3 MW); 2 shafts

Speed, knots: 18

Guns: 2—100 mm (tank turrets), 4—30 mm (2 twin), 4—14.5 mm (2 twin).

2—122 mm BM-21 rocket launchers

Radars: Navigation: I-band.

Comment: Based at Braila.

I C BRATIANU

8/1999, Romanian Navy / 0081622

1 NEUSTADT CLASS (PB)

GENERAL PARASCHIV VASILESCU (ex-Bayreuth) 10 (ex-BG 17)

Displacement, tons: 218 full load

Dimensions, feet (metres): 127.1 x 23 x 5 (38.5 x 7 x 2.2)

Main machinery: 2 MTU MD diesels; 8,000 hp(m) (4.41 MW); 1 MWM diesel; 685 hp(m)

(500 kW); 3 shafts

Speed, knots: 30

Range, n miles: 450 at 27 kt

Complement: 17

Guns: 2 762 mm MGs.

Radars: Surface search Selenia ARP 1645, I-band

Navigation: Racal Decca Bridgemaster MA 180/4, I-band.

Comment: Built in 1970 by Lürssen, Vegesack. Transferred from German Border Guard on 10 January 2004. Operated by the Romanian Border Guard and based in Constanta.

3 ZBORUL (TARANTUL I) CLASS (PROJECT 1241 RE) (FSG)

Name	No	Builders	Commissioned
ZBORUL	188	Petrovsky Shipyard	Dec 1990
PESCARUSUL	189	Petrovsky Shipyard	Feb 1992
LASTUNUL	190	Petrovsky Shipyard	Feb 1992

Displacement, tons: 385 standard; 455 full load
Dimensions, feet (metres): 184.1 x 37.7 x 8.2 (56.1 x 11.5 x 2.6)
Main machinery: COGAG; 2 Type DR 77 gas turbines; 16,016 hp(m) (11.77 MW) sustained; 2 Nikolayev Type DR 76 gas turbines with reversible gearboxes; 4,993 hp(m) (3.67 MW) sustained, 2 shafts
Speed, knots: 36
Range, n miles: 2,000 at 20 kt; 400 at 36 kt
Complement: 41 (5 officers)

Missiles: 4 SS-N-2C Styx (2 twin); active radar or IR homing to 83 km (45 n miles) at 0.9 Mach; warhead 513 kg
Guns: 1 USSR 3 in (76 mm)/59 AK 176; 120 rds/min to 15 km (8 n miles); weight of shell 5.9 kg
 2—30 mm/65 AK 630; 6 barrels per mounting, 3,000 rds/min to 2 km.
Countermeasures: 2 PK 16 chaff launchers.
ESM: 2 Watch Dog; intercept
Weapons control: hood Wink optronic director
Radars: Air/surface search: Plank Shave; E-band.
Fire control: Bass Tilt, H/I-band.
Navigation: Spin Trough; I-band.
IFF: Square Head. High Pole.

Comment: Built in 1985 and later transferred from the USSR. Export version similar to those built for Poland, India and Yemen. Based at Mangalia. *Pescarusul* carried out SS-N-2C firing on 28 May 2006.

LASTUNUL 6/1998, Valentino Cluru / 0052785

MINE WARFARE FORCES

Notes: The MCMV programme is for a class of four ships to replace the Corsar and Musca classes. The broad requirement is for a minehunter equipped with mine-detection sonar, unmanned vehicles for mine-detection and destruction and a decompression chamber for EOD teams. The procurement process is expected to start in 2009.

1 CORSAR CLASS (MINELAYER/MCM SUPPORT SHIP) (ML/MCS)

Name	No	Builders	Commissioned
VICE ADMIRAL CONSTANTIN BAILESCU	274	Mangalia Shipyard	16 Nov 1981

Displacement, tons: 1,450 full load
Dimensions, feet (metres): 259.1 x 34.8 x 11.8 (79 x 10.6 x 3.6)
Main machinery: 2 diesels; 6,400 hp(m) (4.7 MW); 2 shafts
Speed, knots: 19
Complement: 75
Guns: 1—57 mm/70, 4—30 mm/65 (2 twin) AK 230, 8—14.5 mm (2 quad) MGs.
A/S mortars: 2 RBU 1200 5-tubed fixed, range 1,200 m; warhead 34 kg.
Mines: 200.
Countermeasures: ESM. Watch Dog; intercept.
Radars: Air/surface search: Strut Curve; F-band.
Navigation: Don 2; I-band
Fire control: Muff Cob; G/H-band. Drum Tilt; H/I-band
Sonars: Tamir II; hull-mounted; active search; high frequency.

Comment: Has a large crane on the after deck. Similar to survey ship *Grigore Antipa*. Based at Constanta.

VICE ADMIRAL CONSTANTIN BAILESCU 6/1999, Romanian Navy / 0081677

4 MUSCA CLASS (MINESWEEPERS—COASTAL) (MSC)

Name	No	Builders	Commissioned
LIEUTENANT REMUS LEPRI	24	Mangalia Shipyard	23 Apr 1987
LIEUTENANT LUPU DUNESCU	25	Mangalia Shipyard	8 Jan 1989
LIEUTENANT DIMITRIE NICOLESCU	29	Mangalia Shipyard	7 Dec 1989
SUB LIEUTENANT ALEXANDRU AXENTE	30	Mangalia Shipyard	7 Dec 1989

Displacement, tons: 790 full load
Dimensions, feet (metres): 194.2 x 31.1 x 9.2 (59.2 x 9.5 x 2.8)
Main machinery: 2 diesels; 4,800 hp(m) (3.5 MW); 2 shafts
Speed, knots: 17
Complement: 60
Missiles: SAM: 2 quad SA-N-5 launchers.
Guns: 4—30 mm/65 (2 twin) AK 230
A/S mortars: 2 RBU 1200 5-tubed fixed; range 1,200 m; warhead 34 kg.
Radars: Surface search: Krivach; I-band
Fire control: Drum Tilt, H/I-band.
Navigation: Nayada; I-band.
Sonars: Hull-mounted; active search; high frequency

Comment: Reported as having a secondary mining capability but this is not confirmed. Based at Mangalia

SUB LIEUTENANT ALEXANDRU AXENTE 8/2004, 113357

SURVEY AND RESEARCH SHIPS

1 CORSAR CLASS (RESEARCH SHIP) (AGOR)

Name	No	Builders	Commissioned
GRIGORE ANTIPA	75	Mangalia Shipyard	25 May 1980

Displacement, tons: 1,450 full load
Dimensions, feet (metres): 259.1 x 34.8 x 11.8 (79 x 10.6 x 3.6)
Main machinery: 2 diesels; 6,400 hp(m) (4.7 MW); 2 shafts
Speed, knots: 19
Complement: 75
Radars: Navigation Nayada; I-band.

Comment: Large davits aft for launching manned submersible. Same hull as Corsar class. Used as a research ship and for diving support. Based at Constanta.

GRIGORE ANTIPA 5/1998, Diego Quevedo / 0052770

1 RESEARCH SHIP (AGS)

Name	No	Builders	Commissioned
EMIL RACOVITA	115	Drobeta Severin Shipyard	30 Oct 1977

Displacement, tons: 1,900 full load
Dimensions, feet (metres): 229.9 x 32.8 x 12.7 (70.1 x 10 x 3.9)
Main machinery: 1 diesel; 3,285 hp(m) (2.4 MW); 1 shaft
Speed, knots: 11
Complement: 80

Comment: Modernised in the mid-1980s. Similar design to *Grigore Antipa*. Used as a hydrographic ship

EMIL RACOVITA 2001, Romanian Navy / 0114548

TRAINING SHIPS

Notes: *Neptun* belongs to the Merchant Navy.

1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Launched	Commissioned
MIRCEA	288	Blohm + Voss, Hamburg	29 Sep 1938	29 Mar 1939

Displacement, tons: 1,604 full load
Dimensions, feet (metres): 206, 266.4 (with bowsprit) × 39.3 × 16.5 (62.8; 81.2 × 12 × 5.2)
Main machinery: 1 MaK 6M 451 auxiliary diesel; 1,000 hp(m) (735 kW); 1 shaft
Speed, knots: 8
Range, n miles: 5,000 at 8 kt
Complement: 83 (5 officers) plus 140 midshipmen
Radars: Navigation: Decca 202; I-band.

Comment: Refitted at Hamburg in 1966. Sail area, 5,739 m² (18,830 sq ft). A smaller version of US Coast Guard cutter *Eagle*, German *Gorch Fock* and Portuguese *Sagres*. Based at Constanta.

MIRCEA

7/2007, Giorgio Ghiglione / 1353280

RINDUNICA

1/1995 / 0081637

2 DEGAUSSING SHIPS (ADG/AGI)

Name	No	Builders	Commissioned
ELECTRONICA	296	Braila Shipyard	6 Aug 1973
MAGNETICA	298	Mangalia Shipyard	18 Dec 1989

Displacement, tons: 299 full load
Dimensions, feet (metres): 134 × 21.6 × 10.7 (40.8 × 6.6 × 3.2)
Main machinery: Diesel-electric; 1 diesel generator; 600 kW; 1 shaft
Speed, knots: 12.5
Complement: 18
Guns: 2—14.5 mm (twin) MGs. 2 12.7 mm MGs.

Comment: Built for degaussing ships up to 3,000 tons displacement. Electronica is used as an AGI. Based at Tulcea.

AUXILIARIES

2 CROITOR CLASS (LOGISTIC SUPPORT SHIPS) (AETLMH)

Name	No	Builders	Commissioned
CONSTANTA	281	Braila Shipyard	15 Sep 1980
MIDIA	283	Braila Shipyard	26 Feb 1982

Displacement, tons: 2,850 standard; 3,500 full load
Dimensions, feet (metres): 354.3 × 44.3 × 12.5 (108 × 13.5 × 3.8)
Main machinery: 2 diesels; 6,500 hp(m) (4.8 MW); 2 shafts
Speed, knots: 16
Missiles: SAM: 2 SA-N-5 Grail quad launchers; manual aiming; IR homing to 6 km (3.2 n miles) at 1.5 Mach; warhead 1.5 kg.
Guns: 2—57 mm/70 (twin). 4—30 mm/65 (2 twin). 8—14.5 mm (2 quad) MGs
A/S mortars: 2 RBU 1200 5-tubed fixed; range 1,200 m; warhead 34 kg.
Countermeasures: ESM: 2 Watch Dog; intercept
Radars: Air/surface search: Strut Curve; F-band.
Navigation: Krivach; I-band.
Fire control: Muff Cob; G/H-band. Drum Tilt, H/I-band.
Sonars: Tamir II; hull-mounted; active attack, high frequency.
Helicopters: 1 IAR-316 Alouette III type.

Comment: These ships are a scaled down version of Soviet Don class. Forward crane for ammunition replenishment. Some ASW escort capability. Can carry Styx missiles and torpedoes. Based at Constanta.

CONSTANTA

6/2001, Schaeffer/Marsan / 0533268

1 FLAG OFFICERS BARGE (AOTL)

RINDUNICA

Displacement, tons: 40 full load
Dimensions, feet (metres): 78.7 × 16.4 × 3.6 (24 × 5 × 1.1)
Main machinery: 2 diesels; 2,200 hp(m) (1.6 MW); 2 shafts
Speed, knots: 28
Complement: 6

Comment: Used as a barge by the Commander-in-Chief.

MAGNETICA

6/1999, Romanian Navy / 0081637

2 COASTAL TANKERS (AOTL)

530-531

Displacement, tons: 1,042 full load
Dimensions, feet (metres): 181.2 × 30.9 × 13.4 (55.2 × 9.4 × 4.1)
Main machinery: 2 diesels; 1,800 hp(m) (1.3 MW); 2 shafts
Speed, knots: 12.5
Cargo capacity: 500 tons oil
Guns: 1—37 mm, 2—12.7 mm MGs.

Comment: Built by Braia Shipyard and both commissioned 15 June 1971. Based at Constanta.

531

6/1989, Romanian Navy / 0081636

1 TANKER (AOT)

TULCEA 532

Displacement, tons: 2,170 full load
Dimensions, feet (metres): 250.4 × 41 × 16.4 (76.3 × 12.5 × 5)
Main machinery: 2 diesels; 4,800 hp(m) (3.5 MW); 2 shafts
Speed, knots: 16
Cargo capacity: 1,200 tons oil
Guns: 2—30 mm/65 (twin), 4—14.5 mm (2 twin) MGs

Comment: First one built by Tulcea Shipyard and commissioned 24 December 1992. Second of class reported in 1997 but not confirmed. Based at Constanta.

TULCEA

2001, Romanian Navy / 0114547

TUGS

Notes: There are also a number of harbour and river tugs, some of which are armed. These include two Roslavl (101 and 116) at Mangalia.

HARBOUR TUG 570

12/1994 / 0081638

2 OCEAN TUGS (ATA)

GROZAVU 500 HERCULES 501

Displacement, tons: 3,600 full load
Dimensions, feet (metres): 212.6 × 47.9 × 18 (64.8 × 14.6 × 5.5)
Main machinery: 2 diesels; 5,000 hp(m) (3.7 MW); 2 shafts
Speed, knots: 12
Guns: 2—30 mm (twin), 8—14.5 mm (2 quad) MGs.

Comment: First one built at Oltonitza Shipyard and commissioned 29 June 1993. Second of class completed in 1995. Based at Constanta.

GROZAVU
 2001, Romanian Navy
 0114543

Russian Federation

ROSIYSKIY VOENNOMORSKY FLOT

Country Overview

Formerly a constituent republic of the Soviet Union, the Russian Federation was established as an independent state in 1991. The largest country in the world with an area of 8,592,850 square miles, it is bordered to the south by North Korea, China, Mongolia, Kazakhstan, Azerbaijan and Georgia and to the west by Norway, Finland, Latvia, Estonia, Ukraine and Belarus, which with Lithuania separates the Kaliningrad oblast (formerly Königsberg) from the rest of Russia. It has a 20,331 n mile coastline with the Arctic and Pacific Oceans and the Caspian, Baltic and Black Seas. These three seas are inter-connected by an extensive inland waterway system whose main components are the Volga and Don rivers, the Volga-Don canal and the Volga-Baltic Waterway. A canal also links the system to the capital and largest city, Moscow. The Amur River is the most important navigable river in the far east region. Offshore, principal islands in the Arctic Ocean include the Franz Josef Land and Severnaya Zemlya archipelagos, Novaya Zemlya, Vaygach Island, the New Siberian Islands and Wrangel Island. In the Pacific lie the Kuril Islands, which extend from the Kamchatka Peninsula, and Sakhalin Island. Principal seaports include Novorossiysk (Black Sea), St Petersburg and Kaliningrad (Baltic), Nakhodka, Vostochnyy, Vladivostok, and Vanino (Pacific) and Murmansk and Archangel (Arctic). Major river ports include Rybinsk, Nizhniy Novgorod, Samara, Volgograd, Astrakhan and Rostov-on-Don. Territorial waters (12 n miles) are claimed. An EEZ (200 n miles), is also claimed and the limits have been partly defined by boundary agreements.

Headquarters Appointments

Commander-in-Chief:
Admiral Vladimir Vysotskiy
Chief of Naval Staff:
Admiral Mikhail Abramov
Deputy Commander-in-Chief:
Admiral Alexander Tatarinov

Senior Appointments

Commander, Northern Fleet:
Vice Admiral Nikolai Maksimov
Commander, Pacific Fleet:
Vice Admiral Konstantin Sidenko
Commander, Black Sea Fleet:
Vice Admiral Alexander Kletsov
Commander, Baltic Fleet:
Vice Admiral Viktor Mardusin
Commander, Caspian Flotilla:
Rear Admiral Viktor Kravchuk

Personnel

(a) 2009: 181 000 not including naval aviation and naval infantry. The approximate division is 50,000 in the

North, 41,000 in the Pacific, 36,000 in the Baltic, 23,000 in the Black Sea and 11,000 in the Caspian
(b) Approximately 30 per cent volunteers (officers and senior ratings) – remainder two years' national service (or three years if volunteered)

Associated Navies

The Soviet Union was dissolved in December 1991. In 1992 a Commonwealth of Independent States was formed from the Republics of the former Union, but without the Baltic States. In the Baltic the Russian flotilla had withdrawn from the former East German and Polish ports by 1993 and from the Baltic Republics by the end of 1994. The Caspian flotilla divided with some units going to Azerbaijan, Kazakhstan and Turkmenistan. In the Black Sea the division of the Fleet between Russia and Ukraine was finally implemented in 1997. Facilities are shared in some Crimean ports.

Main Bases

North: Severomorsk (HQ), Polyarny, Gremika, Zapadnaya Litsa, Gardzhievo, Vidyayev
Baltic: Kaliningrad (HQ), St Petersburg, Kronshadt, Baltiysk
Black Sea: Sevastopol (HQ) (Crimea), Tuapse, Novorossiysk, Feodosiya
Caspian: Astrakhan (HQ), Makhachkala
Pacific: Vladivostok (HQ), Sovetskaya Gavan, Magadan, Petropavlovsk, Komsomolsk, Rybachiy, Pavlosk, Razboynik, Strelok, Rakushka Bay. A new submarine base is to be built at Vilyuchinsk, near Petropavlovsk.

Operational

From 1991 a shortage of funds to pay for dockyard repairs, spare parts and fuel meant that many major surface warships were rarely at sea, and few operated away from their local exercise areas. Activity levels temporarily rose from 1996 but many ships, although technically in commission, remained in harbour. Activity reached a low point in 2002 but, in recent years, improvements in the budgetary situation and the publication of a new naval doctrine have led to a higher operational tempo. A busier pattern of exercises and operations was initiated in 2003 and activity levels were maintained during 2007.

Coast Defence

The Command of Naval Infantry and Coastal Artillery and Missiles includes a Division of Coastal Artillery and three Mechanised Infantry (Coastal Defence Troops) Brigades, an Artillery Self-Propelled Brigade, plus the units of Naval Infantry (five Brigades and one Division) and a number of minor units. The force of Coastal Artillery includes 19 Missile Battalions (SSC-1 Sepal SS-C-3 Styx) and 11 Gun

Battalions (130 mm and 152 mm). Many of these units are in reserve. The Naval Infantry were deployed in Chechnya in 2000.

Pennant Numbers

There have been no major changes to pennant numbers since 1993 except when ships transfer fleets.

Class and Weapon Systems Names

Most Russian ship class names differ from those allocated by NATO. In such cases the Russian name is placed in brackets after the NATO name. Project numbers are also placed in brackets. Weapon systems retain their NATO names with the Russian name, when known, placed in brackets. Some equipment now has three names – NATO, Russian Navy and Russian export.

Civilian Support Ships

Previously, civilian manned research ships and some icebreakers were effectively under naval control and were therefore included in the former Soviet/Russian section. These ships have been removed as all are now employed solely for commercial purposes.

Strength of the Fleet

Type	Active	Building
Submarines (SSBN)	15	2 (5)
Submarines (SSGN/SSN)	26	1
Submarines (SSK)	20	2
Auxiliary Submarines (SSA(N))	7	–

SUBMARINES

Strategic Missile Submarines (SSBN)

3 TYPHOON (AKULA) CLASS (PROJECT 941/941U) (SSBN)

Name	No	Builders	Laid down	Launched	Commissioned
DMITRIY DONSKOY (TK 208)	824	Severodvinsk Shipyard	30 June 1976	23 Sep 1979	12 Dec 1981
ARKHANGELSK (TK 17)	828	Severodvinsk Shipyard	24 Feb 1985	Aug 1988	6 Nov 1987
SEVERSTAL (TK 20)	806	Severodvinsk Shipyard	6 Jan 1986	July 1988	4 Sep 1989

Displacement, tons: 18,500 surfaced; 26,500 dived
Dimensions, feet (metres): 562.7 oa; 541.3 wl x 80.7 x 42.7
 (171.5; 165 x 24.6 x 13)

Main machinery: Nuclear; 2 VM-5 PWR, 380 MW; 2 GT3A turbines; 81,600 hp(m) (60 MW); 2 emergency motors; 517 hp(m) (380 kW); 2 shafts, shrouded props; 2 thrusters (bow and stern); 2,860 hp(m) (1.5 MW)

Speed, knots: 25 dived; 12 surfaced

Complement: 176 (55 officers)

Missiles: SLBM: 20 Makeyev SS-N-20 (RSM 52/3M20) Sturgeon; three-stage solid fuel rocket; stellar inertial guidance to 8,300 km (4,500 n miles); warhead nuclear 10 MIRV each of 200 kT; CEP 500 m. 2 missiles can be fired in 15 seconds

SAM: SA-N-8 SAM capability when surfaced

A/S: Novator SS-N-15 Starfish; inertial flight to 45 km (24.3 n miles); warhead nuclear 200 kT or Type 40 torpedo

Torpedoes: 6–21 in (533 mm) tubes. Combination of torpedoes. The weapon load includes a total of 22 torpedoes and A/S missiles

Mines: Could be carried in lieu of torpedoes.

Countermeasures: Decoys: MG 34/44 tube launched decoys. ESM Rim Hat (Nekat M); radar warning. Park Lamp D/F.

Weapons control: 3R65 data control system.

Radars: Surface search: Snoop Pair (Albatros); I/J-band.

Sonars: Shark Gill; hull-mounted; passive/active search and attack; low/medium frequency.

Shark Rib flank array; passive; low frequency.

Mouse Roar; hull-mounted; active attack; high frequency.

Polamida towed array; passive search; very low frequency

Modernisation: First of class TK 208 started refit at Severodvinsk in 1994, was relaunched on 26 June 2002 and started sea trials in August 2004. It conducted the first submerged test launch of the Bulava missile on 21 December 2005 and is expected to remain in service as an operational unit, although it is unclear whether some or all missile tubes have been converted for Bulava firing. TK 20 may be converted to accommodate the Bulava missile in order to remain in service beyond 2010 but the future of TK 17 is unclear

Structure: This is the largest type of submarine ever built. Two separate 7.2 m diameter hulls covered by a single outer free-flood hull with anechoic Cluster Guard tiles plus separate 8 m diameter pressure-tight compartments in the fin and fore-ends. There is a

1.2 m separation between the outer and inner hulls along the sides. The unique features of Typhoon are her enormous size and the fact that the missile tubes are mounted forward of the fin. The positioning of the launch tubes mean a fully integrated weapons area in the bow section leaving space abaft the fin for the provision of two nuclear reactors, one in each hull. The fin configuration indicates a designed capability to break through ice cover up to 3 m thick; the retractable forward hydroplanes, the rounded hull and the shape of the fin are all related to under-ice operations. Diving depth, 1,000 ft (300 m).

Operational: Strategic targets are within range from anywhere in the world. Two VLF/ELF communication buoys are fitted. VLF navigation system for under-ice operations. Pert Spring SATCOM mast. Cod Eye radiometric sextant and Krommny 2 IFF. All based in the Northern Fleet at Zapadnaya Litsa. Of six boats completed, the second and third, TK 202 and TK 12 have been formally decommissioned while the fourth of class TK 13 is expected to follow TK 17 was damaged by fire during a missile loading accident in 1991 but was subsequently repaired. Old hulls are being disposed of under the Co-operative Threat Reduction Programme.

SEVERSTAL

1/1997 001639

6 DELTA IV (DELFIN) CLASS (PROJECT 667BDRM) (SSBN)

Name	No	Builders	Laid down	Launched	Commissioned
VERCHOTURE (K 51)	827	Severodvinsk Shipyard	23 Feb 1981	Jan 1984	29 Dec 1984
EKATERINBURG (K 84)	807	Severodvinsk Shipyard	Nov 1983	Dec 1984	Feb 1985
TULA (K 114)	805	Severodvinsk Shipyard	Dec 1985	Sep 1986	Jan 1987
BRIANSK (K 117)	820	Severodvinsk Shipyard	Sep 1986	Sep 1987	Mar 1988
KARELIA (K 18)	839	Severodvinsk Shipyard	Sep 1987	Nov 1988	Sep 1989
NOVOMOSKOVSK (K 407)	849	Severodvinsk Shipyard	Nov 1988	Oct 1989	1991

Displacement, tons: 10,800 surfaced; 13,500 dived
Dimensions, feet (metres): 544.6 oa; 518.4 wl x 39.4 x 28.5 (166; 158 x 12 x 8.7)
Main machinery: Nuclear; 2 VM-4 PWR, 180 MW; 2 GT3A-365 turbines; 37,400 hp(m) (275 MW); 2 emergency motors, 612 hp(m) (450 kW); 2 shafts
Speed, knots: 24 dived; 14 surfaced
Complement: 130 (40 officers)

Missiles: SLBM. 16 Makeyev SS-N-23 (R 29RM Sineva); 3-stage liquid fuel rocket; stellar inertial guidance to 8,300 km (4,500 n miles); warhead nuclear 4 10 MIRV each of 100 kT; CEP 500 m. Same diameter as SS-N 18 but longer
A/S: Novator SS-N-15 Starfish; inertial flight to 45 km (24.3 n miles); warhead nuclear 200 kT or Type 40 torpedo.
Torpedoes: 4-21 in (533 mm) tubes. Combination of 53 cm torpedoes. Total of 18 weapons
Countermeasures: ESM; Brick Pulp/Group; radar warning Park Lamp DJF

Raders: Surface search. Snoop Tray; I-band.
Sonars: Shark Gill; hull-mounted, passive/active search and attack; low/medium frequency.
 Shark Hide flank array; passive, low frequency
 Mouse Roar; hull-mounted; active attack; high frequency
 Pelamida towed array; passive search; very low frequency

Programmes: Construction first ordered 10 December 1975. This programme completed in late 1990 and included seven boats.

Modernisation: The Sineva missile is being progressively fitted throughout the class. A successful test firing from K 114 was conducted on 11 October 2008

Structure: A slim fitting is sited on the after fin which is reminiscent of a similar tube in one of the November class in the early 1980s. This is a dispenser for a sonar thin line towed array. The other distinguishing feature, apart from the size being greater than Delta III, is the pressure-tight fitting on the after end of the missile

tube housing, which may be a TV camera to monitor communications buoy and wire retrieval operations. This is not fitted in all of the class. Brick Spt optronic mast. Diving depth, 1,300 ft (400 m). The outer casing has a continuous acoustic coating and fewer free flood holes than the Delta III.

Operational: Two VLF/ELF communication buoys. Navigation systems include SATNAV, SINS, Cod Eye Pert Spring SATCOM. Missile launch is conducted at keel depth 55 m and at a speed of 6 kt

All operational units are part of the 12th Squadron based in the Northern Fleet at Saida Guba. Long refits have been completed as follows: K 51 (1999); K 84 (2002); K 114 (2005); K 117 (2007). The refit of K 18 was reported to have started in 2007 and was completed on 23 November 2008 when the boat was floated out. The refit of K 407 will complete the refit cycle. The class is likely to remain in service until about 2020. K 64 has been paid off, but there are reports that she may be undergoing conversion to an auxiliary submarine role.

DELTA IV

6/2003, Lemachko Collection / 1042305

SYVATOY GIORGIY POBEDONOSETS (K 433)	993	Severodvinsk Shipyard	Apr 1980	Nov 1980	Aug 1981

Displacement, tons: 10,550 surfaced; 13,250 dived
Dimensions, feet (metres): 524.9 oa, 498.7 wl x 39.4 x 28.5 (160, 152 x 12 x 8.7)

Main machinery: Nuclear; 2 VM-4 PWR, 180 MW; 2 GT3A-635 turbines; 37,400 hp(m) (27.5 MW); 2 emergency motors, 612 hp(m) (450 kW); 2 shafts

Speed, knots: 24 dived; 14 surfaced

Complement: 130 (20 officers)

Missiles: SLBM: 16 Makeyev SS-N-18 (RSM 50) Stingray (Volna); 2-stage liquid fuel rocket with post boost vehicle (PBV); stellar inertial guidance, 3 variants:

Mod 1; range 6,500 km (3,500 n miles); warhead nuclear 3 MIRV each of 200 kT; CEP 900 m.

Mod 2; range 8,000 km (4,320 n miles); warhead nuclear 450 kT; CEP 900 m.

Mod 3; range 6,500 km (3,500 n miles); warhead nuclear 7 MIRV 100 kT; CEP 900 m.

Mods 1 and 3 were the first MIRV SLBMs in Soviet service.

Torpedoes: 4-21 in (533 mm) and 2-400 mm tubes. Combination of torpedoes Total of 16 weapons.

Countermeasures: ESM: Brick Pulp/Group; radar warning Park Lamp D/F

Radars: Surface search: Snoop Tray, I-band

Sonars: Shark Teeth; hull-mounted; passive/active search and attack, low/medium frequency.

Shark Hide flank array; passive; low frequency.

Mouse Roar; hull-mounted; active attack; high frequency.

Pelamida towed array; passive search; very low frequency

Modernisation: The dispenser tube on the after fin has been fitted to most of the class. It was planned to retrofit SS-N-23 but this was shelved

Structure: The missile casing is higher than in the decommissioned Delta I class to accommodate SS-N 18 missiles. The outer casing has a continuous 'acoustic' coating but is less streamlined and has more free flood holes than the Delta IV. Brick Spit optronic mast. Diving depth, 1,050 ft (320 m).

Operational: ELF/VLF communications with floating aerial and buoy; UHF and SHF aeriels. Navigation equipment includes Cod Eye radiometric sextant, SATNAV, SINS and Omega. Pert Spring SATCOM. Kremmny 2 IFF Of the 14 hulls completed, the first of class (K 441) paid off in 1996, three more in 1997 and another two by 1999. Four of these (K 449, K 455, K 487 and K 490) are laid up in fleet bases. The operational state of the remaining six has been variously reported but it must be assumed that they can still fire missiles. K 44 test-fired an SS-N-18 on 1 August 2008 and thereafter conducted an Arctic transit to join the Pacific Fleet in September 2008. It became part of the 16th squadron based in Rybachiy (Kamchatka) in the Pacific. The remaining Northern Fleet unit, K 804, was decommissioned in 2008. The last hull of the class K 129 converted to a DSRV carrier with missile tubes removed. It is expected that the whole class is to have been decommissioned by about 2013.

1 + 2 (5) BOREY CLASS (PROJECT 955/955A) (SSBN)

Name	No	Builders	Laid down	Launched	Commissioned
YURI DOLGORUKY	-	Sevmashpredpriyatiye, Severodvinsk	2 Nov 1996	15 Apr 2007	2009
ALEXANDER NEVSKY	-	Sevmashpredpriyatiye, Severodvinsk	19 Mar 2004	2009	2010
VLADIMIR MONOMACH	-	Sevmashpredpriyatiye, Severodvinsk	19 Mar 2008	2010	2011

Displacement, tons: 14,720 surfaced, 19,400 dived
Dimensions, feet (metres): 557.7 x 22.3 x 29.5
 (170.0 x 13.5 x 9.0)

Main machinery: Nuclear; 2 VM-5 PWR; 380 MW; 2 GT3A turbines; 60,000 hp(m) (44.8 MW); 2 emergency motors, 517 hp(m) (380 kW); 1 shaft, pump jet propulsor

Speed, knots: 25 dived; 15 surfaced
Complement: 107

Missiles: SLBM: 16 Bulava 30 (R-30); three-stage solid fuel rocket, inertial guidance with stellar and Glonass update to 8,300 km (4,500 n miles); warhead nuclear 6-10 MIRV each of 150 KT; CEP 250 m.

A/S SAM: To be announced.

SSM: Possible Klub-S (a possible cruise missile capability has also been reported).

Torpedoes: 6-21 in (533 mm) tubes. Combination of torpedoes, A/S missiles and surface-to-surface missiles

Mines: Could be carried in lieu of torpedoes.

Countermeasures: To be announced

Weapons control: To be announced

Radars: Surface search. To be announced.

Sonars: Integrated sonar suite likely to include flank array, towed array, conformal bow array and mine avoidance.

Programmes. The programme was initiated in 1982, but has been frustrated both by funding difficulties and by missile development problems. A first of class was laid down in November 1996, at which stage the plan was to field a new strategic missile SS-NX-28. This missile programme was cancelled in 1998 and construction of the boat was subsequently halted while development of a new missile, a navalised version of the SS-27 Topol-M (known as Bulava 30), was undertaken. A class of eight boats is expected.

Structure: In order to accommodate the smaller Bulava missile, the new submarine class incorporates significant

modifications of the original *Yuri Dolgoruky*. Reportedly, the first of class includes the bow and stern pressure sections and propulsion train of Akula II K 337 *Coguar* whose construction was halted. Similarly, the second of class *Alexander Nevsky* (Project 955A) is said to include sections of Akula I K 333 *Rhys*. These are the first Russian nuclear submarines to be equipped with a pump-jet propulsor. Diving depth 450 m.

Operational: A full test launch of the 'Bulava' missile was conducted on 27 September 2005 from the Typhoon class SSBN, *Dmitriy Donskoy* and the first submerged launch on 21 December 2005. Unsuccessful tests followed on 7 September, 25 October and 24 December 2006. A further successful test was achieved on 28 June 2007. Tests in 2008 were conducted on 18 September (partial success), 28 November (success) and 23 December (failure). *Yuri Dolgoruky* is expected to begin sea trials by mid-2009 and is to be based in the Northern Fleet.

YURI DOLGORUKY

4/2007 / 116/179

YURI DOLGORUKY

4/2007 / 11/0713

Attack Submarines (SSN/SSGN)

Notes: Attack submarines are coated with Cluster Guard anechoic tiles. All submarines are capable of laying mines from their torpedo tubes. All SSNs are fitted with non-acoustic environmental sensors for measuring discontinuities caused by the passage of a submarine in deep water.

0 + 1 YASEN CLASS (PROJECT 885) (SSN/SSGN)

Name	No	Builders	Laid down	Launched	Commissioned
SEVERODVINSK (K 329)	-	Severodvinsk Shipyard	21 Dec 1993	2006	2010

Displacement, tons: 5,900 surfaced; 8,600 dived
Dimensions, feet (metres): 364.2 x 39.4 x 27.6
 (111 x 12 x 8.4)

Main machinery: Nuclear; 1 PWR; 195 MW; 2 GT3A turbines; 43,000 hp(m) (31.6 MW); 1 shaft; pump-jet propulsor; 2 spinners

Speed, knots: 28 dived; 17 surfaced
Complement: 80 (30 officers)

Missiles: SLCM/SSM Novator Alfa SS-N-27
 8 VLS launchers in after casing. Total of 24 missiles.

A/S SS-N-15: Fired from torpedo tubes.

Torpedoes: 8-21 in (533 mm) tubes. Inclined outwards.

Total of about 30 weapons.

Countermeasures: ESM. Radar warning.

Radars: Surface search. I-band.

Sonars: Irtysh Amfora system includes bow-mounted spherical array; passive/active search and attack; low frequency.

Flank and towed arrays; passive; very low frequency.

Programmes: Malakhit design. Confirmed building in 1993. Reported plans were for seven of the class

to replace the Victor III class. While it was initially reported that these were to be multipurpose SSNs derived from the Akula II class, delays in the programme suggest that there has been considerable scope for re-design and/or technical upgrade. The building of a second of class has been reported but not confirmed.

Structure: Some of the details given are speculative. VLS launchers for SSMs, cantod torpedo tubes and spherical bow sonars are all new to Russian designs.

SEVERODVINSK

6/2006, A Sheldon-Duplatz / 1158520

8 OSCAR II (ANTYEV) (PROJECT 949B) (SSGN)

Name	No	Builders	Laid down	Launched	Commissioned
KRASNOYARSK (K 173)	919	Severodvinsk Shipyard	4 Aug 1983	Mar 1986	24 Feb 1987

VILYACHINSK (K 456)	920	Severodvinsk Shipyard	1988	1990	1991
OREL (K 266) (ex-Severodvinsk)	847	Severodvinsk Shipyard	1989	22 May 1992	Dec 1992
OMSK (K 188)	947	Severodvinsk Shipyard	1990	8 May 1993	15 Dec 1993
TOMSK (K 150)	902	Severodvinsk Shipyard	1993	18 July 1996	28 Feb 1997

Displacement, tons. 13,900 surfaced; 18,300 dived
Dimensions, feet (metres): 505.2 x 59.7 x 29.5
 (154 x 18.2 x 9)

Main machinery: Nuclear; 2 VM-5 PWR, 380 MW; 2 GT3A turbines, 98,000 hp(m) (72 MW); 2 shafts, 2 spinners
Speed, knots: 28 dived; 15 surfaced
Complement: 107 (48 officers)

Missiles: SSM: 24 Chelomey SS-N-19 Shipwreck (Granit); inertial with command update guidance; active radar homing to 20-550 km (10.8-300 n miles) at 2.5 Mach, warhead 750 kg HE or 500 kT nuclear. Novator Alfa SS-N-27 may be carried in due course.

A/S: Novator SS-N-15 Starfish (Tsakra) fired from 53 cm tubes; inertial flight to 45 km (24.3 n miles); warhead nuclear 200 kT or Type 40 torpedo.

Novator SS-N-16 Stallion fired from 65 cm tubes; inertial flight to 100 km (54 n miles); payload nuclear 200 kT (Vodopad) or Type 40 torpedo (Veder)

Torpedoes. 4—21 in (533 mm) and 2—26 in (650 mm) tubes. Combination of 65 and 53 cm torpedoes. Total of 28 weapons including tube-launched A/S missiles.

Mines: 32 can be carried.

Countermeasures: ESM: Rim Hat; intercept.

Weapons control: Punch Bowl for third party targeting.

Radars: Surface search Snoop Pair or Snoop Half, I-band.

Sonars: Shark Gill; hull-mounted; passive/active search and attack; low/medium frequency.

Shark Rib flank array; passive; low frequency.

Mouse Roar; hull-mounted; active attack; high frequency.

Palamida towed array; passive search; very low frequency.

Programmes: Building of a class of 14 began in 1978. Two

Oscar Is and 11 Oscar IIs were completed. Work on the

12th Oscar II (K 139, *Belgorod*) was thought to have

stopped but it was announced by the Defence Minister

on 16 July 2004 that the boat would be completed.

Although a further announcement on 20 July 2006 said

that no further funding would be made available there

were reports that work had continued in 2007 but no

further reports in 2008.

Modernisation: Replacement of the SS-N-19 missiles is

reported to be under consideration.

Structure: SSM missile tubes are in banks of 12 either side and external to the 8.5 m diameter pressure hull; they are inclined at 40° with one hatch covering each pair, the whole resulting in the very large beam. The position of the missile tubes provides a large gap of some 4 m between the outer and inner hulls. Diving depth, 1,000 ft (300 m) although 2,000 ft (600 m) is claimed. There are 10 watertight compartments.

Operational: ELF/VLF communications buoy. All have a tube on the rudder fin as in Delta IV which is used for dispensing a thin line towed sonar array. Port Spring SATCOM. K 119, K 410 and K 266 are based at Litsa South in the Northern Fleet and K 442, K 186, K 150, K 173 and K 456 at Tarya Bay in the Pacific. In 1999 one Northern Fleet unit deployed for the first Russian SSGN patrol in the Mediterranean for 10 years. At the same time a Pacific Fleet unit sailed to the western seaboard of the United States. The two Oscar Is (K 206 and K 525) have been scrapped. K 148 and K 132 are laid up awaiting disposal and K 141 (*Kursk*) sunk as the result of an internal weapon explosion on 12 August 2000. The submarine was raised in late 2001 and broken up ashore.

VEPR (II) (K 157)	890	Severodvinsk Shipyard	1991	10 Dec 1994	Dec 1995
GEPARD (II) (K 335)	835	Severodvinsk Shipyard	1991	18 Aug 1999	29 July 2001

Displacement, tons: 7,500 surfaced; 9,100 (9,500 Akula II) dived

Dimensions, feet (metres): 360.1 oa; 337.9 wl x 45.9 x 34.1 (110; 103 x 14 x 10.4)

Main machinery: Nuclear; 1 VM-5 PWR; 190 MW; 2 GT3A turbines; 47,600 hp(m) (35 MW); 2 emergency propulsion motors; 750 hp(m) (552 kW); 1 shaft; 2 spinnars; 1,006 hp(m) (740 kW)

Speed, knots: 28 dived; 10 surfaced

Complement: 82 (31 officers)

Missiles: SLCM/SSM: Reduga SS-N-21 Sampson (Granat) fired from 21 in (533 mm) tubes, land-attack, inertial/terrain-following to 3,000 km (1,620 n miles) at 0.7 Mach, warhead nuclear 200 kT, CEP 150 m. Flies at a height of about 200 m.

Novator Alfa SS-N-27 subsonic flight with supersonic boost for terminal flight; 180 km (97 nm); warhead 200 kg. May be fitted in due course.

SAM: SA-N-5/8 Strela portable launcher, 18 missiles

AS: Novator SS-N-15 Starfish (Tsakra) fired from 53 cm tubes; inertial flight to 45 km (24.3 n miles); warhead nuclear 200 kT or Type 40 torpedo.

Novator SS-N-16 Stallion fired from 650 mm tubes; inertial flight to 100 km (54 n miles); payload nuclear 200 kT (Vodopad) or Type 40 torpedo (Veder).

Torpedoes: 4-21 in (533 mm) and 4-25.6 in (650 mm) tubes. Combination of 53 and 65 cm torpedoes. Tube liners can be used to reduce the larger diameter tubes to 533 mm. Total of 40 weapons. In addition the Improved Akulas and Akula IIs have six additional 533 mm external tubes in the upper bow area.

Countermeasures: ESM: Rim Hat; intercept.

Radars: Surface search: Snoop Pair or Snoop Half with back-to-back aereals on same mast as ESM

Sonars: Shark Gill (Skat MGK 503), hull-mounted; passive/active search and attack; low/medium frequency Mouse Roar; hull-mounted; active attack; high frequency.

Skat 3 towed array; passive; very low frequency

Programmes: Malakhit design. From K 461 onwards, the Akula Is were 'improved'. K 157 was the first Akula II to complete and she was followed by K 835. The fate of a third Akula II (K 337 Cougar) has not been confirmed but it is believed that the bow and stern pressure sections have been incorporated in the new SSBN *Yuri Dolgoruky*. Akula I K 152 had been building for nearly 20 years at Komsomolsk before being launched in 2006. The submarine is to be leased for 10 years by the Indian Navy from 2009 following certification by the Russian Navy.

Structure: The very long fin is particularly notable. Has the same broad hull as Sierra and has reduced radiated noise levels by comparison with Victor III of which she is the traditional follow-on design. A number of prominent non-acoustic sensors appear on the fin leading-edge and on the forward casing in the later Akulas. The engineering standards around the bridge and casing are noticeably to a higher quality than other classes. The design has been incrementally improved with reduced noise levels, boundary layer suppression and active noise cancellation reported in the later units. The improved hulls have an additional six external torpedo tubes and the two Akula IIs have been lengthened by 3.7 m to incorporate further noise reduction developments. There are six watertight compartments. Operational diving depth, 1,476 ft (450 m).

Operational: Pert Spring SATCOM. K 461, K 328, K 154, K 335, K 157 and K 317 are based in the Northern Fleet at Saida Guba. K 331, K 419, K 295 and K 985 are based in the Pacific Fleet at Taryia Bay. These submarines are the core units of the Russian SSN force. *Vepr* visited Brest in September 2004, the first visit by a Russian nuclear submarine to a foreign port. K 317 *Pantera* had a serious fire in November 2006. K 152 began sea trials in October 2008. In an accident on 8 November 2008, 20 people were killed by the accidental activation of a fire-extinguishing system.

1 SIERRA I (BARRACUDA) CLASS (PROJECT 945) (SSN)

Name	No	Builders	Laid down	Launched	Commissioned
KOSTROMA (K 276) (ex-Krab)	648	Nizhny Novgorod/Severodvinsk Shipyard	8 May 1982	29 June 1983	21 Sep 1984

Displacement, tons: 7,200 surfaced; 8,100 dived

Dimensions, feet (metres): 351 x 41 x 28.9 (107 x 12.5 x 8.8)

Main machinery: Nuclear; 1 VM-6 PWR; 190 MW; 1 GT3A turbine; 47,500 hp(m) (70 MW); 2 emergency motors; 2,004 hp(m) (1.5 MW); 1 shaft; 2 spinners; 1,006 hp(m) (740 kW)

Speed, knots: 34 dived; 10 surfaced

Complement: 61 (31 officers)

Missiles: SLCM Raduga SS-N-21 Sampson (Grenat) fired from 21 in (533 mm) tubes; land attack; inertial/terrain-following to 3,000 km (1,820 n miles) at 0.7 Mach; warhead nuclear 200 kT. CEP 150 m. Probably flies at a height of about 200 m.

A/S: Novator SS-N-15 Starfish (Tsakra) fired from 53 cm tubes; inertial flight to 45 km (24.3 n miles); warhead nuclear 200 kT or Type 40 torpedo.

Novator SS-N-16 Station fired from 65 cm tubes; inertial flight to 100 km (54 n miles); payload nuclear 200 kT (Vodopad) or Type 40 torpedo (Veder).

Torpedoes: 4-25.6 in (650 mm) and 4-21 in (533 mm) tubes. Combination of 65 and 53 cm torpedoes. Total of 40 weapons.

Mines: 42 in lieu of torpedoes.

Countermeasures: ESM: Rim Hat/Bald Head; Intercept, Park Lamp D/F

Radars: Surface search. Snoop Pair with back-to-back ESM aerial

Sonars: Shark Gill; hull-mounted; passive/active search and attack, low/medium frequency

Shark Rib flank array; passive; low frequency. Mouse Roar; hull-mounted; active attack; high frequency

Skat 3 towed array; passive; very low frequency.

Programmes: Launched at Gorky (Nizhny Novgorod) and transferred by river/canal to be fitted out at Severodvinsk.

Structure: Based on design experience gained with deleted Alfa class, pressure hull constructed of titanium alloy, providing deep diving capability. Magnetic signature also reduced. Distance between hulls increases survivability and reduces radiated noise. There are six watertight compartments. The pod on the after fin is larger than that in 'Victor III'. Bulbous casing at the after end of the fin is for a towed communications buoy. Diving depth 2,460 ft (750 m).

Operational: Pert Spring SATCOM. Based in the Northern Fleet at Ara Guba. It is believed that K 276 was in a collision with USS *Baton Rouge* on 11 February 1992. A second of class K 239 *Karp* is laid up.

KOSTROMA

6/2002, *Lemachko Collection* / 0547070

2 SIERRA II (KONDOR) CLASS (PROJECT 945B) (SSN)

Name	No	Builders	Laid down	Launched	Commissioned
PSKOV (K 336) (ex-Okun)	663	Nizhny Novgorod	May 1990	June 1992	12 Aug 1993
NIZHNY NOVGOROD (K 534) (ex-Zubstka)	602	Nizhny Novgorod	June 1986	June 1988	28 Dec 1990

Displacement, tons: 7,600 surfaced, 9,100 dived
Dimensions, feet (metres): 364.2 × 46.6 × 28.9
 (111 × 14.2 × 8.8)

Main machinery: Nuclear; 1 VM-5 PWR; 190 MW; 1 GT3A turbine; 47,500 hp(m) (70 MW); 2 emergency motors; 2,004 hp(m) (1.5 MW); 1 shaft; 2 spinners; 1,006 hp(m) (740 kW)

Speed, knots: 32 dived; 10 surfaced
Complement: 61 (31 officers)

Missiles: SLCM: Raduga SS-N-21 Sampson (Granat) fired from 21 in (533 mm) tubes; land-attack; inertial/terrain-following to 3,000 km (1,620 n miles) at 0.7 Mach; warhead nuclear 200 kT, CEP 150 m. Flies at a height of about 200 m.
SAM: SA-N-5/8 Strela portable launcher; 12 missiles.

A/S: Novator SS-N-15 Starfish (Tsakra) fired from 53 cm tubes; inertial flight to 45 km (24.3 n miles); warhead nuclear 200 kT or Type 40 torpedo.

Novator SS-N-16 Stallion fired from 65 cm tubes; inertial flight to 100 km (54 n miles); payload nuclear 200 kT (Vodopad) or Type 40 torpedo (Veder).

Torpedoes: 4—25.6 in (650 mm) and 4—21 in (533 mm) tubes. Combination of 65 and 53 cm torpedoes. Total of 40 weapons.

Mines: 42 in lieu of torpedoes.

Countermeasures: ESM, Rim Hat; Intercept, Park Lamp D/F
Radars: Surface search: Snoop Pair with back-to-back ESM aerial.

Sonars: Shark Gill; hull-mounted; passive/active search and attack; low/medium frequency.
 Shark Rib flank array; passive; low frequency.

Mouse Roar; hull-mounted; active attack, high frequency
 Skat 3 towed array; passive; very low frequency

Programmes: A third of class K 536 Mars, was scrapped before completion in July 1992.

Structure: Titanium hull. The towed communications buoy has been recessed. A 10 point environmental sensor is fitted at the front end of the fin. The standoff distance between hulls is considerable and has obvious advantages for radiated noise reduction and damage resistance. Diving depth, 2,460 ft (750 m). Numbers and sizes of torpedo tubes are uncertain with different figures given by Russian sources. There are seven watertight compartments.

Operational: Based in the Northern Fleet, at Ara Guba
 K 534 completed a refit/refuel in May 2008

SNEZHNOGORSK (B 388) (ex Petrozavodsk)	654	Admiralty, Leningrad	8 Sep 1987	3 June 1988	30 Nov 1988
OBNINSK (B 138)	618	Admiralty, Leningrad	7 Dec 1988	5 Aug 1989	10 May 1990
DANIL MOSKOVSKIY (B 414)	684	Admiralty, Leningrad	1 Dec 1988	31 Aug 1990	30 Dec 1990
TAMBOV (B 448)	661	Admiralty, Leningrad	31 Jan 1991	17 Oct 1991	24 Sep 1992

Displacement, tons: 4,850 surfaced, 6,300 dived

Dimensions, feet (metres): 351.1 × 34.8 × 24.3 (107 × 10.6 × 7.4)

Main machinery: Nuclear; 2VM-4 PWR; 150 MW; 2 turbines, 31,000 hp(m) (22.7 MW); 1 shaft; 2 spinners; 1,020 hp(m) (750 kW)

Speed, knots: 30 dived; 10 surfaced

Complement: 98 (17 officers)

Missiles: SLCM Raduga SS-N-21 Sampson (Granat) fired from 21 in (533 mm) tubes; land-attack; inertial/terrain-following to 3,000 km (1,820 n miles) at 0.7 Mach. CEP 150 m or Novator Alfa SS-N-27; to 180 km (97 n miles); warhead 200 kg.

A/S: Novator SS-N-15 Starfish (Tsakra) fired from 53 cm tubes; inertial flight to 45 km (24.3 n miles); Type 40 torpedo.

Novator SS-N-16 Stallion fired from 65 cm tubes; inertial flight to 100 km (54 n miles); payload nuclear 200 kT (Vodopad) or Type 40 torpedo (Veder).

Torpedoes: 4–21 in (533 mm) and 2–25.6 in (650 mm) tubes. Combination of 53 and 65 cm torpedoes. Can carry up to 24 weapons. Liners can be used to reduce 650 mm tubes to 533 mm

Mines: Can carry 36 in lieu of torpedoes.

Countermeasures: ESM Brick Group (Brick Spit and Brick Pulp); intercept. Park Lamp D/F.

Radars: Surface search SnoopTray 2; I-band.

Sonars: Shark Gill; hull-mounted; passive/active search and attack, low/medium frequency.

Shark Rib flank array; passive; low frequency

Moose Roar; hull-mounted; active attack; high frequency.

Scat 3 towed array; passive; very low frequency.

Programmes: The first of class was completed at Komsomolsk in 1978. With construction also being carried out at Admiralty Yard, Leningrad, there was a very rapid building programme up to the end of 1984. Construction then continued only at Leningrad and at

a rate of about one per year which terminated in 1991. The last of the class of 26 boats completed sea trials in October 1992. Of these, the first 21 hulls were designated Type 671RTM. The final five hulls were designated Type 671RTMK to reflect modifications to fire cruise missiles. The last four of these are in service.

Structure: The streamlined pod on the stern fin is a towed sonar array dispenser. Water environment sensors are mounted at the front of the fin and on the forward casing as in the Akula and Sierra classes. Diving depth, 1,300 ft (400 m).

Operational: VLF communications buoy VHF/UHF aeriels. Navigation equipment includes SINS and SATNAV. Pert Spring SATCOM. Kremmny 2 IFF. Much improved acoustic quietening puts the radiated noise levels at the upper limits of the USN Los Angeles class. All remaining operational units are based in the Northern Fleet at Ltse South or Are Guba although they rarely go to sea. Twenty two have paid off so far although up to nine of these are in reserve and laid up at anchorages in both Fleets.

DANIL MOSKOVSKY

7/2004 / 104231

Patrol Submarines (SSK)

Notes: (1) One remaining target submarine of the Bravo class (379) is used for alongside training and one remaining modified Romeo class submarine is used for trials. Both are based in the Black Sea.
 (2) Tango class B 380, previously reported as undergoing reactivation, has been decommissioned.

1 + 2 LADA CLASS (PROJECT 677) (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
SAINT PETERSBURG	477	Admiralty, St Petersburg	26 Dec 1997	28 Oct 2004	2009
KRONSTADT	-	Admiralty, St Petersburg	28 July 2005	2009	2010
SEVASTOPOL	-	Admiralty, St Petersburg	10 Nov 2008	2010	2011

Displacement, tons: 1,765 surfaced; 2,650 dived
Dimensions, feet (metres): 219.2 x 23.6 x 14.4
 (66.8 x 7.2 x 4.4)
Main machinery: Diesel-electric; 2 diesel generators; 3,400 hp(m) (2.5 MW); 1 motor; 5,576 hp(m) (4.1 MW); 1 shaft
Speed, knots: 21 dived; 10 surfaced
Range, n miles: 6,000 at 7 kt snorting
Complement: 37

Missiles: SLCM: Novator Alfa Klub SS-N-27 (3M-54 anti-ship missiles); active radar homing to 180 km (97.2 n miles) at 0.7 Mach (cruise) and 2.5 Mach (attack); warhead 450 kg. Novator Klub SS-N-30 (3M14) land-attack guidance to 300 km (162 n miles); at 0.7 Mach; warhead 450 kg.
Torpedoes: 6-21 in (533 mm) tubes. 18 weapons.
Mines: In lieu of torpedoes.

Countmeasures: ESM. Intercept.
Radars: Surface search. I-band.
Sonars: Conformal bow and flank arrays, active/passive, medium frequency. Towed array (low frequency).

Programmes: The national variant of this submarine is known as the Lada class. Work began on the first of class in 1996 and construction started in St Petersburg in 1997. A second and third of class are also under construction. The export version of the submarine is known as the Amur class of which there are six designs based on different surface displacements (550, 750, 950, 1450, 1650 and 1850). The 'Amur 1650'

SAINT PETERSBURG

6/2005, A Sheldon-Duplaix / 1177919

probably has the most export potential and it was possibly in anticipation of an order from India and China that work began on such a submarine in 1997 at the same time as the similar Lada class. Work was temporarily suspended in 1998, and the hull may have been resumed in the Lada construction programme.

Structure: The first Russian single-hulled submarine, built to a Rubin design based on the 'Amur 1650'. A fuel cell

plug (for AIP) of about 12 m can be inserted to allow installation of AIP although this is unlikely in the near future. Diving depth 820 ft (250 m). Anon-hull penetrating optronic periscope supplied by Elektropribor, is fitted.

Operational: Sea trials of the first of class started on 29 November 2005 and a second round of trials in August 2006. Apparent delays in achieving operational status suggest there may be technical problems.

Displacement, tons: 2,325 surfaced, 3,076 dived
Dimensions, feet (metres): 238.2; 242.1 (Project 636) × 32.5 × 21.7
 (72.6; 73.8 × 9.9 × 6.6)

Main machinery: Diesel-electric; Type 4-2DL-42M 2 diesels
 (Type 4-2AA-42M in Project 636); 3,650 hp(m) (2.68 MW);
 2 generators; 1 motor; 5,800 hp(m) (4.34 MW); 1 shaft,
 2 auxiliary MT-168 motors; 204 hp(m) (150 kW);
 1 economic speed motor; 130 hp(m) (95 kW)

Speed, knots: 17 dived; 10 surfaced; 9 snorting
Range, n miles: 6,000 at 7 kt snorting; 400 at 3 kt dived
Complement: 52 (13 officers)

Missiles: SSM Novator Alfa SS-N-27 may be fitted in due course

SAM: 6-8 SA-N-5/B; IR homing from 600 to 6,000 m at 1.65 Mach; warhead 2 kg; portable launcher stowed in a well in the fin between snort and W/T masts.

Torpedoes: 6-21 in (533 mm) tubes. 18 combinations of 53 cm torpedoes. USET-80 is wire-guided in the 4B version (from 2 tubes).

Mines: 24 in lieu of torpedoes.

Countermeasures: ESM. Squid Head or Brck Pulp; radar warning Quad Loop D/F.

Weapons control: MVU-110EM or MVU-119EM Murena torpedo fire-control system

Radars: Surface search: Snoop Tray (MRP-25); I-band.

Sonars: Shark Teeth/Shark Fin (MGK-400); hull-mounted, passive/active search and attack; medium frequency. Mouse Roar; hull-mounted; active attack; high frequency.

Programmes: Also known as the Vashavyanka class, first launched in 1979 at Komsomolsk and commissioned 12 September 1980. Subsequent construction also at Nizhny Novgorod. A total of 24 were built for Russia of which six were of the improved Project 636 variant.

Structure: Had a better hull form than the Tango class but was nevertheless considered fairly basic by comparison with contemporary western designs. Diving depth 790 ft (240 m) normal. Battery has a 9,700 kWh capacity. The basic 'Kilo' was the Project 877; 877K has an improved fire-control system and 877M includes wire-guided torpedoes from two tubes. Project 636 is an improved design with updated diesels, a propulsion motor rotating at half the speed (250 rpm), higher standards of noise reduction and an automated combat information system capable of providing simultaneous fire-control data on five targets. Pressure hull length is 170 ft (51.8 m) or 174 ft (53 m) for Project 636. Foreplanes on the hull are just forward of the fin. Project 636 can be identified by a vertical cut off to the after casing. B 871 has been fitted with a pump jet propulsor.

Operational: With a reserve of buoyancy of 32 per cent and a heavily compartmented pressure hull, this class is capable of being holed and still surviving. B 401, B 402, B 808, B 459, B 471, B 800 and B 177 are based in the Northern Fleet, B 260, B 445, B 494, B 190, B 345, B 187, B 464, B 439 and B 394 are based in the Pacific, B 806 and B 227 in the Baltic and B 871 in the Black Sea. Russian made batteries have been a source of problems in warm water operations.

Sales: Exports of Project 877 have been to Poland (one), Romania (one), India (ten), Algeria (two), Iran (three) and China (two). The only exports of Project 636 have been to China (two). A further eight were ordered by China in 2002. Export versions have the letter E after the project number.

Auxiliary Submarines (SSA(N))

Notes: (1) There are a number of Swimmer Delivery Vessels (SDV) in service including Siron (three-man) and Triton, Sever and Elbrus types.
 (2) A new auxiliary submarine (SSAN) was launched at Severodvinsk Shipyard on 6 August 2003. Nicknamed 'Losharik', she is likely to be used for scientific research and is reported to be similar to but not the same as the Uniform class. It is known both as Project 210 and as Project 10831. It has a pennant number of AS 12 and is reported to have become operational in 2007.
 (3) The Delta IV class K 64, which was decommissioned in about 2002, may be undergoing conversion to an auxiliary submarine role.

1 PROJECT 20120 EXPERIMENTAL SUBMARINE (SSA)

Name	No	Builders	Laid down	Launched	Commissioned
SAROV (B-90)	-	Nizhny Novgorod Shipyard/ Severodvinsk Shipyard	-	17 Dec 2007	7 Aug 2008

Displacement, tons: 4,000 approx
Dimensions, feet (metres): To be announced
Main machinery: Diesel-electric + nuclear
Speed, knots: To be announced
Complement: 52
Torpedoes: To be announced
Mines: To be announced
Countermeasures: ESM To be announced.
Radars: Surface search: To be announced
Sonars: To be announced.

Comment: It is reported that the design of the submarine was developed by Rubin in about 1989, that construction was initiated at Nizhny Novgorod and that, following transfer in about 2003, the boat was completed at the Sevmash Shipyard at Severodvinsk. It is thought to be equipped with a hybrid propulsion system which combines a diesel-electric plant with a small nuclear reactor. The function of the reactor is to keep a charge on the battery and thereby achieve an air-independent system with almost unlimited underwater endurance on relatively quiet

electric propulsion. While details of the submarine have not been confirmed, its length appears to be of the order of 100 m and there is evidence both of a raised area on the upper casing aft of the fin and also of bulges on the side of the forward casing. It is believed that the principal role of the submarine is to act as test bed for the development and testing of unmanned submersibles, weapons and underwater equipment. Operational experience of an auxiliary nuclear power plant was gained in the modified Juliett class (Project 651E) K-68 in the 1980s

SAROV

6/2008* / 1353370

3 PALTUS/X-RAY (PROJECT 1851) CLASS (SSAN/SSA)

AS 23 (X-Ray) AS 35 AS 21

Displacement, tons: 730 dived
Dimensions, feet (metres): 173.9 x 12.5 x 13.8
 (53 x 3.8 x 4.2)

Main machinery: Nuclear; 1 reactor; 10 MW; 1 shaft; ducted thrusters

Speed, knots: 6 dived
Complement: 14

Comment: Details given are for the two Paltus (Nelhma) class (A 21, AS 35). The first was launched at Sudomekh, St Petersburg in April 1991, a second of class in September 1994 and a third was started but not completed. This is a follow-on to the single 44 m 520 ton X-Ray (AS 23) class which was first seen in 1984 and after a long spell out of

service was back in operation in 1999. Paltus probably owes much to the USN NR 1. Paltus is associated with the Delta III Stretch SSAN which acts as a mother ship for special operations. Titanium hulled and very deep diving to 1,000 m (3,280 ft). Paltus based in the Northern Fleet at Olenya Guba, X-Ray at Yagri Island.

PALTUS (artist's impression)

1994 J506318

3 UNIFORM (KACHALOT) CLASS (PROJECT 1910) (SSAN)

No	Builders	Laid down	Launched	Commissioned
AS 13	Sudomekh, Leningrad	20 Oct 1977	25 Nov 1982	31 Dec 1986
AS 15	Sudomekh, Leningrad	23 Feb 1983	29 Apr 1988	30 Dec 1991
AS 33	Sudomekh, St Petersburg	16 July 1990	26 Aug 1995	Feb 1998

Displacement, tons: 1,340 surfaced; 1,580 dived
 Dimensions, feet (metres): 226.4 × 23.0 × 17.0
 (69.0 × 7.0 × 5.2)

Main machinery: Nuclear; 1 PWR; 15 MW; 2 turbines;
 10,000 hp(m) (7.35 MW); 1 shaft; 2 thrusters
 Speed, knots: 10 surfaced, 28 dived
 Complement: 36
 Radars: Navigation: Snoop Slab; I-band.

Comment: Research and development nuclear-powered submarines. Have single hulls and 'wheel' arches either side of the fin which house side thrusters. These are titanium hulled and very deep diving submarines (possibly down to 700 m (2,300 ft)), based in the Northern

Fleet at Olenya Guba, and are used mainly for ocean bed operations. Plans to build more of the class were thought to have been shelved. It is not clear whether an auxiliary submarine (AS 12) launched on 6 August 2003 is a fourth 'Uniform' or a different design.

UNIFORM

6/2004, Lemachko Collection / 1159818

1 DELTA III STRETCH (PROJECT 667 BDR) (SSAN)

Name	No	Builders	Laid down	Launched	Commissioned
ORIENBURG (BS 136 (ex-K 129))	656	Severodvinsk Shipyard	Feb 1979	Mar 1981	5 Nov 1981

Dimensions, feet (metres): 534.9 × 39.4 × 28.5
 (163 × 12 × 8.7)

Main machinery: Nuclear; 2 VM-4 PWR; 180 MW; 2 GT
 3A-635 turbines, 37,400 hp(m) (27.5 MW); 2 emergency
 motors; 612 hp(m) (450 kW); 2 shafts
 Speed, knots: 24 dived; 14 surfaced
 Complement: 130 (40 officers)

Torpedoes: 4—21 in (533 mm) and 2—400 mm tubes.
 Countermeasures: ESM, Brick Pulp/Group; radar warning.
 Radars: Surface search: Snoop Tray; I-band.
 Sonars: Shark Teeth; hull mounted, active/passive search;
 low/medium frequency
 Shark Hide; flank array; passive low frequency.
 Mouse Roar; hull mounted; active high frequency.

Comment: Originally launched in 1981, this former SSBN has been converted by replacing the central section with a 43 m plug, extending the overall hull length by 3 m. The submarine was reported to have returned to service in 2003 and has replaced the Yankee Stretch as the Paltus mother-ship. Based in the Northern Fleet

AIRCRAFT CARRIERS

Note: (1) Of the former aircraft carriers of the Kiev class, *Kiev* was sold to China for scrap in 2000; *Minsk* and *Novorossiysk* were sold to a South Korean Corporation in 1994. *Minsk* later became a tourist attraction in Shenzhen, China, while *Novorossiysk* was scrapped in India. *Admiral Gorshkov* (ex-Baku) has been sold to the Indian Navy and is undergoing refit and reactivation.
 (2) The requirement for a new class of four aircraft carriers was announced in mid-2005. This was re-stated by the Commander-in-Chief in 2008. While work has almost certainly begun on the project, funding could prove to be an obstacle.

For details of the latest updates to *Jane's Fighting Ships* online and to discover the additional information available exclusively to online subscribers please visit
jfs.janes.com

1 KUZNETSOV (OREL) CLASS (PROJECT 1143.5/6) (CVGM)

Name	No	Builders	Laid down	Launched	Commissioned
ADMIRAL KUZNETSOV (ex-Tbilisi, ex-Leonid Brezhnev)	063	Nikolayev South, Ukraine	1 Apr 1982	16 Dec 1985	25 Dec 1990

Displacement, tons: 45,900 standard, 58,500 full load
Dimensions, feet (metres): 999 oa; 918.6 wl x 229.7 oa; 121.4 wl x 34.4 (304.5, 280 x 70; 37 x 10.5)
Flight deck, feet (metres): 999 x 229.7 (304.5 x 70)
Main machinery: 8 boilers; 4 turbines, 200,000 hp(m) (147 MW); 4 shafts
Speed, knots: 30. **Range, n miles:** 3,850 at 29 kt; 8,500 at 18 kt
Complement: 1,980 (200 officers) plus 626 aircrew plus 40 Flag staff

Missiles. SSM. 12 Chelomey SS-N-19 Shipwreck (3M-45) launchers (flush mounted) ●; inertial guidance with command update; active radar homing to 20-550 km (10.8-300 n miles) at 2.5 Mach; warhead 500 kT nuclear or 750 kg HE.

SAM: 4 Altair SA-N-9 Gauntlet (Klinok) sextuple vertical launchers (192 missiles) ●; command guidance and active radar homing to 12 km (6.5 n miles) at 2 Mach; warhead 15 kg, 24 magazines; 192 missiles; 4 channels of fire.

SAM/Guns: 8 Altair CADS-N-1 (Kortik/Kashtan) ●, each has a twin 30 mm Gatling combined with 8 SA-N-11 (Grisson) and Hot Flash/Hot Spot fire-control radar/optronic director. Laser beam-riding guidance for missiles to 8 km (4.4 n miles); warhead 9 kg; 9,000 rds/min combined to 2 km (for guns).

Guns: 6-30 mm/65 ● AK 630, 6 barrels per mounting; 3,000 rds/min combined to 2 km. Probably controlled by Hot Flash/Hot Spot on CADS-N-1

A/S mortars: 2 RBU 12,000 ●; range 12,000 m; warhead 80 kg. UDAV-1M; torpedo countermeasure.

Countermeasures: Decoys: 10 PK 10 and 4 PK 2 chaff launchers. ESM/ECM: 8 Foot Ball. 4 Wine Flask (intercept). 4 Flat Track. 10 Ball Shield A and B.

Weapons control: 3 Tin Man optronic trackers. 2 Punch Bowl SATCOM datalink ● 2 Low Ball SATNAV ●. 2 Bell Crown and 2 Bell Push datalinks.

Radars: Air search: Sky Watch; four Planar phased arrays ●, 3D.

Air/surface search: Top Plate B ●; D/E-band.

Surface search: 2 Strut Pair ●; F-band

Navigation: 3 Palm Front; I-band.

Fire control: 4 Cross Sword (for SAM) ●, K-band, 8 Hot Flash; J-band

Aircraft control: 2 Fly Trap B; G/H-band.

Tacan: Cake Stand ●

IFF: 4 Watch Guard.

Sonars: Bull Horn and Horse Jaw, hull-mounted; active search and attack, medium/low frequency.

Fixed-wing aircraft: 18 Su-33 Flanker D; 4 Su-25 UTG Frogfoot.
Helicopters: 15 Ka-27 Helix. 2 Ka-31 RLD Helix AEW

ADMIRAL KUZNETSOV

10/2004, Ships of the World / 1042330

Programmes: This was a logical continuation of the deleted Kiev class. The full name of *Kuznetsov* is *Admiral Flota Sovetskogo Sojuza Kuznetsov*. The second of class, *Varyag*, was between 70 and 80 per cent complete by early 1993 at Nikolayev in the Ukraine. Building was then terminated after an unsuccessful attempt by the Navy to fund completion. Subsequently the ship was bought by Chinese interests and, having arrived at Dalian in March 2002 now appears to be undergoing re-activation by the PLA(N)

Structure: The hangar is 183 x 29.4 x 7.5 m and can hold up to 18 Flanker aircraft. There are two starboard side lifts, a ski jump of 14° and an angled deck of 7°. There are four arrestor wires. The SSM system is in the centre of the flight deck forward with flush deck covers. The ship has some 16.5 m of freeboard. There is no Bass Tilt radar and the ADG guns are controlled by Kashtan fire-control system. The ship suffers from severe water distillation problems.

Operational: AEW, ASW and reconnaissance tasks undertaken by Helix helicopters. The aircraft complement listed is based on the number which might be embarked for normal operations but the Russians claim a top limit of 60. *Kuznetsov* conducted extensive flight operations throughout the second half of both 1993 and 1994, and was at sea again by September 1995 after a seven month refit. Deployed to the Mediterranean for 80 days in early 1996 before returning to the Northern Fleet. Refitted from mid-1996 to mid-1998. Sailed for a VIP demonstration in August 1998 and then continued trials and training in area. There were limited local exercises in 2000 but no activity in 2001 and 2002. The ship left the jetty for Navy Days in 2003. The ship participated in Northern Fleet exercises in the North Atlantic in August-September 2005 and again in October 2006. A three-month Atlantic/Mediterranean deployment began in December 2007 and was repeated in 2008/09.

BATTLE CRUISERS

1 KIROV (ORLAN) CLASS (PROJECT 1144.1/1144.2) (CGHMN)

Name	No	Builders	Laid down	Launched	Commissioned
PYOTR VELIKIY (ex-Yuri Andropov)	099 (ex-183)	Baltic Yard 189, St Petersburg	11 Mar 1986	29 Apr 1989	9 Apr 1998

Displacement, tons: 19,000 standard; 24,300 full load
Dimensions, feet (metres): 826.8, 754.6 wl x 93.5 x 29.5 (252; 230 x 28.5 x 8.1)
Main machinery: CONAS; 2 KN-3 PWR; 300 MW; 2 oil-fired boilers; 2 GT3A-688 turbines; 140,000 hp(m) (102.9 MW); 2 shafts
Speed, knots: 30
Range, n miles: 14,000 at 30 kt
Complement: 726 (82 officers) plus 18 aircrew

Missiles: SSM: 20 Chelomey SS-N-19 Shipwreck (3M 45) [P-700 Granit] (improved SS-N-12 with lower flight profile) ●; inertial guidance with command update; active radar homing to 20-450 km (10.8-243 n miles) at 1.6 Mach, warhead 350 kT nuclear or 750 kg HE; no reloads.

SAM: 12 SA-N-6/SA-N-20 Grumble (Fort/Fort M) vertical launchers ●; 8 rounds per launcher; command guidance; semi-active radar homing to 100 km (54 n miles); warhead 90 kg (or nuclear?); 96 missiles.

2 SA-N-4 Gecko twin launchers ●; semi-active radar homing to 15 km (8 n miles) at 2.5 Mach; warhead 50 kg, altitude 9.1-3,048 m (30-10,000 ft); 40 missiles

2 SA-N-9 Gauntlet (Kinzhalt) octuple vertical launchers ●; command guidance, active radar homing to 12 km (6.5 n miles) at 2 Mach; warhead 15 kg; altitude 3.4-12,192 m (10-40,000 ft); 128 missiles, 4 channels of fire.

SAM/Guns: 6 CADS-N-1 (Kortik/Kashtan) ●; each has a twin 30 mm Gatling combined with 8 SA-N-11 (Grisson) and Hot Flash/Hot Spot fire-control radar/optronic director. Laser beam-riding guidance for missiles to 8 km (4.4 n miles); warhead 9 kg; 9,000 rds/min combined to 2 km (for guns).

A/S: Novator SS-N-15 (Starfish); inertial flight to 45 km (24.3 n miles); payload Type 40 torpedo or nuclear warhead; fired from fixed torpedo tubes behind shutters in the superstructure.

Guns: 2—130 mm/54 (twin) AK 130 ●; 70 rds/min to 22 km (12 n miles); weight of shell 33.4 kg.

Torpedoes: 10—21 in (533 mm) (2 quin) tubes. Combination of 53 cm torpedoes. Mounted in the hull adjacent the RBU 1000s on both quarters. Fixed tubes behind shutters can fire either SS-N-15 or Type 40 torpedoes.

A/S mortars: 1 RBU 12,000 ●; 10 tubes per launcher; range 12,000 m; warhead 80 kg.

2 RBU 1000 6-tubed aft ●; range 1,000 m; warhead 55 kg. UDAV-1M; torpedo countermeasures.

Countermeasures: Decoys: 2 twin PK 2 150 mm chaff launchers. Towed torpedo decoy.

ESM/ECM: 8 Foot Bell, 4 Wine Flask (intercept), 8 Bell Bash, 4 Bell Nip, Half Cup (laser intercept).

Combat data systems: Lesorub-44.

Weapons control: 4 Tin Man optronic trackers ●, 2 Punch Bowl C SATCOM ●, 4 Low Ball SATNAV, 2 Bell Crown and 2 Bel Push datalinks

Radars: Air search: Top Pair (Top Sail + Big Net) ●, 3D; C/D-band; range 366 km (200 n miles) for bomber, 183 km (100 n miles) for 2 m² target.

Air/surface search: Top Plate ●, 3D, D/E-band.

Nav gation: 3 Palm Front, I-band.

Fire control: Cross Sword ●, K-band (for SA-N-9), Top Dome for SA-N-6 ●; Tomb Stone J-band (for Fort M) ●, 2 Pop Group, F/H/I-band (for SA-N-4) ●, Kite Screech ●, H/K-band (for main guns), 6 Hot Flash for CADS-N-1; I/J-band.

Aircraft control: Flyscreen B; I-band

IFF: Salt Pot A and B

Tacan: 2 Round House B ●

Sonars: Horse Jaw (Polinom); hull-mounted, active search and attack; low/medium frequency, Horse Tail; VDS; active search; medium frequency. Depth to 150-200 m (492.1-656.2 ft) depending on speed.

Helicopters: 3 Ka-27 Helix ●

Programmes: Design work started in 1968. Type name is *atomny raketny kreyser* meaning nuclear-powered missile cruiser. A fifth of class was scrapped before being launched in 1989.

Structure: The Kirov class were the first Russian surface warships with nuclear propulsion. In addition to the nuclear plant a unique maritime combination with an auxiliary oil-fuelled system has been installed. This provides a superheat capability, boosting the normal steam output by some 50 per cent. The SS-N-19 tubes are set at an angle of about 45°. CADS-N-1 with a central fire-control radar on six mountings, each of which has two cannon and eight missile launchers. Two are mounted either side of the SS-N-19 forward and four on the after superstructure. Same A/S system as the frigate *Neustrashimy* with fixed torpedo tubes in ports behind shutters in the superstructure for firing SS-N-15 or Type 45 torpedoes. There are reported to be about 500 SAM of different types. *Velikiy*, the only operational ship, has a Tomb Stone fire-control radar instead of a forward Top Dome for SA-N-20 which is a maritime variant of SA-10C.

Operational: Based in the Northern Fleet. Over-the-horizon targeting for SS-N-19 provided by Punch Bowl SATCOM or helicopter. The first ship of the class of four, *Admiral Ushakov*, was formally decommissioned in 2004 and is to be scrapped. The second ship, *Admiral Lazarev* has also been decommissioned. And is also likely to be scrapped. Plans to refit the third ship, *Admiral Nakhimov*, laid up since 1999, appear to have been revived but funding continues to be problematical. The scope of the work is substantial and includes nuclear refuelling and replacement of the SS-N-19 missile system. The refit is likely to take up to four years to complete. *Pyotr Velikiy* conducted an extensive deployment in 2008-09. Visits were undertaken in the Mediterranean, Caribbean and South Africa. Exercises included INDRA-2009 with the Indian Navy.

CRUISERS

3 SLAVA (ATLANT) CLASS (PROJECT 1164) (CGHM)

Name	No	Builders	Laid down	Launched	Commissioned
MOSKVA (ex-Slava)	121	Nikolayev North (61 Kommuna), Ukraine	5 Nov 1976	27 July 1979	30 Dec 1982
MARSHAL USTINOV	055	Nikolayev North (61 Kommuna), Ukraine	5 Oct 1978	25 Feb 1982	15 Sep 1986
VARYAG (ex-Chervona Ukraine)	011	Nikolayev North (61 Kommuna), Ukraine	31 July 1979	28 Aug 1983	26 Dec 1989

Displacement, tons: 9,380 standard; 11,490 full load
Dimensions, feet (metres): 611.5 × 68.2 × 27.6
 (186.4 × 20.8 × 8.4)
Main machinery: COGAG; 4 gas-turbines; 88,000 hp(m)
 (64 68 MW); 2 M-70 gas-turbines; 20,000 hp(m) (14.7 MW);
 2 shafts
Speed, knots: 32
Range, n miles: 2,200 at 30 kt; 7,500 at 15 kt
Complement: 476 (62 officers)

Missiles: SSM: 16 Chelomey SS-N-12 (8 twin Sandbox (Bazalt) launchers ●, inertial guidance with command update; active radar homing to 560 km (300 n miles) at 1.7 Mach; warhead nuclear 350 kT or HE 1,000 kg.
 SAM: 8 SA-N-6 Grumble (Fort) vertical launchers ●, 8 rounds per launcher; command guidance; semi-active radar homing to 100 km (54 n miles); warhead 90 kg (or nuclear?); altitude 27,432 m (90,000 ft). 64 missiles.
 2 SA-N-4 Gecko twin retractable launchers ●, semi-active radar homing to 15 km (8 n miles) at 2.5 Mach; warhead 50 kg; altitude 9.1-3,048 m (30-10,000 ft); 40 missiles
Guns: 2—130 mm/54 (twin) AK 130 ●, 70 rds/min to 22 km (12 n miles); weight of shell 33.4 kg
 6—30 mm/65 AK 650; ● 6 barrels per mounting; 3,000 rds/min to 2 km
Torpedoes: 10—21 in (533 mm) (2 quin) tubes ●. Combination of 53 cm torpedoes
A/S mortars: 2 RBU 6000 12-tubed trainable ●, range 6,000 m; warhead 31 kg.
Countermeasures: Decoys: 2 PK 2 chaff launchers.
 ESM/ECM: 8 Side Globe (jammers), 4 Rum Tub (intercept).
Weapons control: 2 Tee Plinth and 3 Tilt Pot optronic directors, 2 Punch Bowl satellite data receiving/targeting systems, 2 Bell Crown and 2 Bell Push datalinks.
Radars: Air search: Top Pair (Top Sail + Big Net) ●, 3D; C/D-band; range 366 km (200 n miles) for bomber, 183 km (100 n miles) for 2 m² target.
 Air/surface search: Top Steer ● or Top Plate (Varyag); 3D; D/E-band
 Navigation: 3 Palm Frond; I-band.
 Fire control: Front Door ●, F-band (for SS-N-12), Top Dome ●, J-band (for SA-N-6), 2 Pop Group ●, F/H/I-band

VARYAG

10/2008*, Mick Prendergast / 1353324

(for SA-N-4), 3 Bass Tilt ●, H/I-band (for Gatlings), Kite Screech ●, H/I/K-band (for 130 mm)
 FF: Salt Pot A and B, 2 Long Head
Sonars: Bull Horn and Steer Hide (Platina); hull-mounted; active search and attack; low/medium frequency.

Helicopters: 1 Ka-27 Helix ●.

Programmes: Built at the same yard as the Kara class. This is a smaller edition of the dual-purpose surface warfare/ASW Kirov, designed as a conventionally powered back-up for that class. The fourth of class, originally being completed for Ukraine, was transferred to Russia in July 1995 but returned to Ukraine in February 1999 for completion. However, work was not finished due to lack of funds. Re-sale back to Russia is unlikely. A fifth of class was started but cancelled in October 1990.

Structure: The notable gap abaft the twin funnels (SA-N-6 area) is traversed by a large crane which stows between

the funnels. The hangar is recessed below the flight deck with an inclined ramp. The torpedo tubes are behind shutters in the hull below the Top Dome radar director aft. Air conditioned citadels for NBCD. There is a bridge periscope.

Operational: The SA-N-6 system effectiveness is diminished by having only one radar director. Over-the-horizon targeting for SS-N-12 provided by helicopter or Punch Bowl SATCOM. Moskva is based in the Black Sea Fleet at Sevastopol and conducted an Indian Ocean deployment in 2003. Her nine-year refit was beset by payment problems. Some funds were provided by the city of Moscow. Marshal Ustinov deployed to the Northern Fleet in March 1987 and completed refit at St Petersburg in May 1995 where she remained until January 1998, when she transferred back to the Northern Fleet and is based at Severomorsk and is active. Varyag transferred to Petropavlovsk in the Pacific in October 1990.

1 KARA (BERKOT-B) CLASS (PROJECT 1134B) (CGHM)

Name	No	Builders	Laid down	Launched	Commissioned
KERCH	713 (ex-711)	Nikolayev North (61 Kommuna), Ukraine	30 Apr 1971	21 July 1972	25 Dec 1974

Displacement, tons: 7,650 standard; 9,900 full load
Dimensions, feet (metres): 568 × 61 × 22
 (173.2 × 18.6 × 6.7)
Main machinery: COGAG; 4 gas turbines; 108,800 hp(m)
 (80 MW); 2 gas turbines; 13,600 hp(m) (10 MW); 2 shafts
Speed, knots: 32
Range, n miles: 9,000 at 15 kt cruising turbines; 3,000 at 32 kt
Complement: 390 (49 officers)

Missiles: SAM: 2 SA-N-3 Goblit twin launchers ●; semi-active radar homing to 55 km (30 n miles) at 2.5 Mach, warhead 80 kg; altitude 91.4-22,860 m (300-75,000 ft); 72 missiles.
 2 SA-N-4 Gecko twin launchers (twin either side of mast) ●; semi-active radar homing to 15 km (8 n miles) at 2.5 Mach, warhead 50 kg; altitude 9.1-3,048 m (30-10,000 ft); 40 missiles
 A/S: 2 Raduga SS-N-14 Silex (Rastrub) quad launchers ●; command guidance to 55 km (30 n miles) at 0.95 Mach; payload nuclear 5 kT or Type 40 torpedo or E53-72 torpedo. SSM version; range 35 km (19 n miles); warhead 500 kg.
Guns: 4 × 3 in (76 mm)/59 AK 726 (2 twin) ●; 90 rds/min to 16 km (8.5 n miles); weight of shell 5.9 kg.
 4 × 30 mm/65 ●; 6 barrels per mounting; 3,000 rds/min combined to 2 km.
Torpedoes: 10–21 in (533 mm) (2 quin) tubes ●. Combination of 53 cm torpedoes.
A/S mortars: 2 RBU 6000 12-tubed trainable ●; range 6,000 m; warhead 31 kg.
 2 RBU 1000 6-tubed (aft) ●; range 1,000 m; warhead 55 kg; torpedo countermeasures
Countermeasures: Decoys: 2 PK 2 chaff launchers. 1 BAT-1 torpedo decoy.
ESM/ECM: 8 Side Globe (ammers), 2 Bell Stem. 2 Bell Clout, 4 Hum Tub (Intercept) (fitted on mainmast).
Weapons control: 4 Tilt Pot optronic directors. Bell Crown, Bike Pump and Hat Box datalinks.
Radars: Air search: Flat Screen (may have been removed) ●; E/F-band
 Air/surface search: Head Net C ●; 3D; E-band; range 128 km (70 n miles).
Navigation: 2 Don Kay; I-band. Don 2 or Palm Frond, I-band
Fire control: 2 Head Light B/C ●; F/G/H-band (for SA-N-3 and SS-N-14). 2 Pop Group ●; F/H/I-band (for SA-N-4). 2 Owl Screech ●; G-band (for 76 mm). 2 Bass Tilt ●; H/I-band (for 30 mm)
Tacan: Fly Screen A or Fly Spike.
IFF: High Pole A. High Pole B.

KERCH

(Scale 1 : 1,500), Ian Sturton / J081651

KERCH

10/2008*, Laursen/Jarnesen / 1353325

Sonars: Bull Nose (Titan 2-MG 332), hull-mounted; active search and attack, low/medium frequency.
 Mare Tail; VDS (Vege-M 325) ●; active search; medium frequency.

Helicopters: 1 Ka-27 Helix ●.

Programmes: Type name is *bolshoy protivolodochny korabl*, meaning large anti-submarine ship.

Modernisation: The Flat Screen air search radar, replaced Top Sa1

Structure: The helicopter is raised to flight deck level by a lift. In addition to the 8 tubes for the SS-N-14 A/S system and the pair of twin launchers for SA-N-3 system with Goblit missiles, Kara class mounts the SA-N-4 system in

2 silos, either side of the mast. The SA-N-3 system has only 2 loading doors per launcher and a larger launching arm.

Operational: Two of the class started refits in July 1987 and have been scrapped by the Ukraine. One more was scrapped in the Pacific in 1996. *Petropavlovsk* is laid up in the Pacific and is unlikely to go to sea again. In the Black Sea, there have been several reports of work being done on *Ochakov*, but these have not been confirmed. Formally, she remains in service. *Azov* was cannibalised for spares in 1998. *Kerch* is based in the Black Sea at Sevastopol and completed a refit in 2005

DESTROYERS

Notes: There have been reports of a programme to replace the ageing Udaloy and Sovremenny class inventories. Project 21956 is reportedly for a 9,000-ton ship but the status of the project has not been confirmed.

1 KASHIN (PROJECT 61) CLASS (DDGM)

Name	No	Builders	Laid down	Launched	Commissioned
SMETLIVY	810	Nikolayev North, Ukraine	15 July 1965	26 Aug 1967	25 Sep 1969

Displacement, tons: 4,010 standard; 4,750 full load
Dimensions, feet (metres): 472.4 × 51.8 × 15.4
 (144 × 15.8 × 4.7)
Main machinery: COGAG; 4 DE 59 gas turbines; 72,000 hp(m)
 (52.9 MW); 2 shafts
Speed, knots: 32. Range, n miles: 4,000 at 18 kt; 1,520 at 32 kt
Complement: 280 (25 officers)

Missiles: SSM: 8 Zvezde SS-N-25 (KH 35 Uran) (2 quad) ●.
 SAM: 2 SA-N-1 Goa twin launchers ●; command guidance to 31.5 km (17 n miles) at 2 Mach; warhead 72 kg; altitude 91.4-22,860 m (300-75,000 ft); 32 missiles.
Guns: 2–3 in (76 mm)/59 AK 726 (1 or 2 twin) ●; 90 rds/min to 16 km (8.5 n miles); weight of shell 5.9 kg
Torpedoes: 5–21 in (533 mm) (quin) tubes ●. Combination of 53 cm torpedoes.
A/S mortars: 2 RBU 6000 12-tubed trainable ●; range 6,000 m; warhead 31 kg; 120 rockets.
Countermeasures: Decoys. PK 16 chaff launchers (modified) 2 towed torpedo decoys.
ESM/ECM: 2 Bell Shroud. 2 Watch Dog.
Weapons control: 3 Tec Plinth and 4 Tilt Pot optronic directors.
Radars: Air/surface search: Head Net C ●; 3D; E-band.
 Big Net ●; C-band.

SMETLIVY

(Scale 1 : 1,200), Ian Sturton / 0126351

Navigation: 2 Don 2/Don Kay/Palm Frond, I-band.

Fire control: 2 Peel Group ●; H/I-band (for SA-N-1). 1 Owl Screech ●; G-band (for guns).
 IFF: High Pole B.

Sonars: Bull Nose (MGK 336) or Wolf Paw; hull-mounted; active search and attack, medium frequency.
 Vege; VDS; active search; medium frequency.

Programmes: The first class of warships in the world to rely entirely on gas-turbine propulsion. Type name is *bolshoy protivolodochny korabl*, meaning large anti-submarine ship.

Modernisation: Modernised with a VDS a/L, vice the after gun, and fitted for SS-N-25 in place of the RBU 1000 launchers

Operational: Based in the Black Sea. Refitted from 1990 to 1996 but back in service in 1997. Deployed to the Indian Ocean in 2003 and remains active.

Sales: Additional ships of a modified design built for India. First transferred September 1980, the second in June 1982, the third in 1983, the fourth in August 1986 and the fifth and last in January 1988.

1 UDALOY II (FREGAT) CLASS (PROJECT 1155.1) (DDGHM)

Name	No	Builders	Laid down	Launched	Commissioned
ADMIRAL CHABANENKO	650 (ex-437)	Yantar, Kaliningrad 820	15 Sep 1988	14 Dec 1992	20 Feb 1999
Displacement, tons: 7,700 standard, 8,900 full load Dimensions, feet (metres): 536.4 × 63.3 × 24.6 (163.5 × 19.3 × 7.5)		A/S. Novator SS-N-15 (Starfish); inertial flight to 45 km (24.3 n miles); payload Type 40 torpedo or nuclear, fired from torpedo tubes.		Sonars: Horse Jaw (Polinom); hull-mounted; active search and attack; medium/low frequency. Horse Tail, VDS; active search; medium frequency.	
Main machinery: COGAG; 2 gas turbines; 48,600 hp(m) (35.72 MW); 2 gas turbines; 24,200 hp(m) (17.79 MW); 2 shafts		Guns: 2 – 130 mm/54 (twin) AK 130 ●; 70 rds/min to 22 km (12 n miles); weight of shell 33.4 kg.		Helicopters: 2 Ka-27 Helix A ●	
Speed, knots: 28 Range, n miles: 4,000 at 18 kt Complement: 249 (29 officers)		Torpedoes: 8 – 21 in (533 mm) (2 quad tubes) ● Combination of 53 cm torpedoes. The tubes are protected by flaps in the superstructure.		Programmes: A single ship follow-on class from the Udaloy. NATO designator Balcom 12. At least two more were projected with names <i>Admiral Basisty</i> and <i>Admiral Kucherov</i> ; <i>Basisty</i> was scrapped in March 1994, and <i>Kucherov</i> was never started.	
Missiles: SSM: 8 Raduga SS-N-22 Sunburn (3M 82 Moskit) (2 quad) ●; active/passive radar homing to 160 km (87 n miles) at 2.5 Mach (4.5 for attack); warhead nuclear or HE 300 kg; sea-skimmer.		A/S mortars: 2 RBU 6000 ●. 12-tubed trainable, range 6,000 m; warhead 31 kg.		Structure: Similar size to the Udaloy and has the same propulsion machinery. Improved combination of weapon systems owing something to both the <i>Sovremenny</i> and the <i>Neustrashimy</i> classes. The distribution of SA-N-9 launchers may be the same as Udaloy class. The torpedo tubes are protected by a hinged flap in the superstructure.	
SAM: 8 SA-N-9 Gauntlet (Klinok) vertical launchers ●; command guidance; active radar homing to 12 km (6.5 n miles) at 2 Mach; warhead 15 kg 64 missiles; 4 channels of fire.		Countermeasures: 8 PK 10 and 2 PK 2 chaff launchers ● ESM/ECM. 2 Wine Glass (intercept). 2 Bell Shroud. 2 Bell Squat. 4 Half Cup laser warner. 2 Shot Dome.		Operational: Sea trials started on 14 September 1995 from Baltiysk. Deployed to the Northern Fleet in March 1999 when the pennant number changed. Based at Severomorsk. Deployed with <i>Pyotr Velikiy</i> in 2008–09.	
SAM/Guns: 2 CADS-N-1 (Kashtan) ●; each with twin 30 mm Gatling; combined with 8 SA-N-11 (Grisson) and Hot Flash/Hot Spot fire-control radar/optronic director. Laser beam guidance for missiles to 8 km (4.4 n miles); warhead 9 kg, 9,000 rds/min combined to 1.5 km for guns.		Weapons control: M 145 radar and optronic system. 2 Bell Crown datalink. Band Stand ● datalink for SS-N-22. 2 Light Buib, 2 Round House and 1 Bell Nest datalinks.			
		Radars: Air search. Strut Pair II ●; F-band. Top Plate ●; 3D; D/E-band.			
		Surface search: 3 Palm Frond ●; I-band.			
		Fire control: 2 Cross Swords ●; K-band (for SA-N-9). Kite Screech ●; H/U/K-band (for 100 mm gun).			
		Band Stand (Mineral ME) ●; D-band (for SS-N-22).			
		CCA. Fly Screen B ●			
		IFF: Salt Pot B and C.

 (40.8 MW); 2 gas turbines; 13,600 hp(m) (10 MW);
 2 shafts
Speed, knots: 29
Range, n miles: 2,600 at 30 kt; 7,700 at 18 kt
Complement: 249 (29 officers)

Missiles: SAM. 8 SA-N-9 Gauntlet (Klinok) vertical launchers; command guidance; active radar homing to 12 km (6.5 n miles) at 2 Mach; warhead 15 kg, altitude 3.4-12,192 m (10-40,000 ft); 64 missiles; four channels of fire.
 The launchers are set into the ships' structures with 6 ft diameter cover plates-4 on the forecabin, 2 between the torpedo tubes and 2 at the forward end of the after deckhouse between the RBUs.

A/S: 2 Raduga SS-N-14 Silex (Rastrub) quad launchers; command guidance to 55 km (30 n miles) at 0.95 Mach; payload nuclear 5 kT or Type 40 torpedo or Type E53-72 torpedo. SSM version; range 35 km (19 n miles); warhead 500 kg

Guns: 2-3.9 in (100 mm)/70; 60 rds/min to 21.5 km (11.5 n miles); weight of shell 15.6 kg.
 4-30 mm/65 AK 630; 6 barrels per mounting;
 3,000 rds/min combined to 2 km.

Torpedoes: 8-21 in (533 mm) (2 quad) tubes. Combination of 53 cm torpedoes.
A/S mortars: 2 RBU 6000 12-tube trainable; range 6,000 m; warhead 31 kg.

Mines: Rails for 26 mines
Countermeasures: Decoys: 2 PK-2 and 8 PK-10 chaff launchers, US Masker type noise reduction.
ESM/ECM: 2 Foot Ball B (Levchenko onwards); 2 Wine Glass (intercept). 6 Half Cup laser warner (Levchenko onwards). 2 Bell Squat (jammers)

SEVEROMORSK

(Scale 1 : 1,200), Ian Sturton / 05060/9

Weapons control: MP 145 radar and optronic system. 2 Bell Crown and Round House C datalink.
Radars: Air search: Strut Pair; F-band. Top Plate; 3D; D/E-band.
Surface search: 3 Palm Front; I-band.
Fire control: 2 Eye Bowl; F-band (for SS-N-14). 2 Cross Sword; K-band (for SA-N-9). Kite Screech; H/I/K-band (for 100 mm guns). 2 Bass Tilt; H/I/K-band (for 30 mm guns).
IFF: Salt Pot A and B. Box Bar A and B.
Tacan: 2 Round House.
CCA: Fly Screen B (by starboard hangar); 2 Fly Spike B.
Sonars: Horse Jaw (Polinom), hull-mounted; active search and attack; low/medium frequency.
 Mouse Tail, VDS; active search; medium frequency

Helicopters: 2 Ka-27 Helix A

Programmes: Design approved in October 1972. Successor to Kresta II class but based on Krivak class. Type name is *bolshoy protivovodachny korabl* meaning large anti-submarine ship. Programme stopped at 12 in favour of Udaloy II class (Type 1155.1).

Structure: The two hangars are set side by side with inclined elevating ramps to the flight deck. Has pre-wetting NBCD equipment and replenishment at sea gear. Active stabilisers are fitted. The chaff launchers are on both sides of the foremast and inboard of the torpedo tubes. Cage Flask aerials are mounted on the mainmast spur and on the mast on top of the hangar. There are indications of a nuclear release mechanism, or interlock, on the lower tubes of the SS-N-14 launchers.

Operational: These general purpose ships have good sea-keeping and endurance and are the backbone of the fleet. Based as follows. Northern Fleet- Severomorsk, Kulakov, Kharlamov and Levchenko; Pacific Fleet- Shaposhnikov, Panteleyev, Vinogradov and Tributs. Vinogradov was in collision in April 2000 but was quickly repaired. Severomorsk deployed to St Petersburg for refit in June 1998 completing in late 2000, and Levchenko followed in November 1999 completing in 2001. The fourth of class, Zakharov was scrapped after a fire in March 1992. Tributs was in reserve in 1994 and had a machinery space fire in September 1995, was back in service in mid-1999. Udaloy and Spiridonov have been laid up or scrapped. Kulakov is expected to return to service in 2009 following a refit. Vasilevsky was decommissioned in 2007

BESPOKOINY	620	Zhdanov Yard, Leningrad (190)	18 Apr 1987	22 Feb 1992	29 Dec 1993
NASTOYCHIVY (ex-Moskovski Komsomolets)	610	Zhdanov Yard, Leningrad (190)	7 Apr 1988	15 Feb 1992	27 Mar 1993
ADMIRAL USHAKOV (ex-Besstrashny)	434	Zhdanov Yard, Leningrad (190)	16 Apr 1988	31 Dec 1992	17 Apr 1994

Displacement, tons: 6,500 standard; 7,940 full load
 Dimensions, feet (metres): 511.8 x 56.8 x 21.3
 (156 x 17.3 x 6.5)
 Main machinery: 4 KVN boilers; 2 GTZA-674 turbines, 99,500 hp/m (73.13 MW); sustained; 2 shafts; bow thruster
 Speed, knots: 32
 Range, n miles: 2,400 at 32 kt; 6,500 at 20 kt; 4,000 at 14 kt
 Complement: 296 (25 officers) plus 60 spare

Missiles: SSM, 8 Raduga SS-N-22 Sunburn (3M-80 Zubr) (2 quad) launchers, active/passive radar homing to 110 km (60 n miles) at 5 (4.5 for attack) Mach, warhead nuclear 200kT or HE 300 kg; sea-skimmer. From *Bespokoiny* onwards the launchers are longer and fire a modified missile (3M 82 Moskit) with a range of 160 km (87 n miles)
 SAM: 2 SA-N-7 Gadfly 3S 90 (Uragan), command/semi-active radar and IR homing to 25 km (13.5 n miles) at 3 Mach; warhead 70 kg, altitude 15-14,020 m (50-46,000 ft); 44 missiles. Multiple channels of fire. From *Bespokoiny* onwards the same launcher is used for the SA-N-7b Grizzly.
 Guns: 4—130 mm/54 (2 twin) AK 130, 70 rds/min to 22 km (12 n miles); weight of shell 33.4 kg
 4—30 mm/65 AK 630, 6 barrels per mounting; 3,000 rds/min combined to 2 km.
 Torpedoes: 4 21 in (533 mm)/(2 twin) tubes, combination of 53 cm torpedoes.
 A/S mortars: 2 RBU 1000 (Smerch 3) 6-barrelled, range 1,000 m; warhead 100 kg; 120 rockets carried. Torpedo countermeasure.
 Mines: Mino rails for up to 22.
 Countermeasures: Decoys: 8 PK 10 and 2 PK 2 chaff launchers.
 ESM/ECM: 4 Foot Ball (some variations including 2 Bell Shroud and 2 Bell Squat), 6 Half Cup laser warner.
 Combat data systems: Sapfir-U.
 Weapons control: 1 Squeeze Box optronic director and laser rangefinder, Band Stand datalink for SS-N-22 Bell Nest, 2 Light Bulb and 2 Tee Pump datalinks.

NASTOYCHIVY

7/2008, Per Körnefeldt / 1353329

Radars: Air search: Top Plate (MR-750 Fregat), 3D; D/E-band. Surface search: 3 Palm Front (MR 212/201), I-band
 Fire control: 6 Front Dome, G-band (for SA-N-7/17), Kite Screech (MR-184), H/I/K-band (for 130 mm guns).
 2 Bass Tilt, H/I-band (for 30 mm guns).
 Band Stand (Mineral ME), D-band (for SS-N-22)
 IFF: Salt Pot A and B, High Pole A and B, Long Head.
 Tacan: 2 Light Bulb.
 Sonars: Bull Horn (MGK-335 Platina) and Whale Tongue; hull-mounted; active search and attack; medium frequency.

Helicopters: 1 Kamov Ka-27 Helix

Programmes: Type name is *eskadrenny minonosets* meaning destroyer. From *Bespokoiny* onwards the class is known as 956A. Total of 17 built for Russia, two (hulls 18 and 19) for China, and one more (*Bulny*) which is unlikely to be completed unless for export.

Structure: Telescopic hanger. The fully automatic 130 mm gun was first seen in 1976. Chaff launchers are fitted on

both sides of the foremast and either side of the after SAM launcher. A longer range version of SS-N-22 has been introduced in the Type 956A. This has slightly longer launch tubes. Also the SAM system has been improved to take the SA-N-17. There are also some variations in the EW fit.

Operational: A specialist surface warfare ship complementing the ASW-capable *Udaloy* class. Based as follows: Northern Fleet—*Admiral Ushakov*, *Gremyashchly*, Pacific Fleet—*Burny*, *Bozboyznenny* and *Bystry*, Baltic Fleet—*Nastoychivy* and *Bespokoiny*. So far 11 others have paid off or are non-operational. *Bystry* completed refit in 2002 and *Bezboyznenny* in 2004. 434 renamed *Admiral Ushakov* in 2004. Steam-plant reliability has been a class problem.

Sales: Hulls 18 and 19 which were near completion in 1996, were sold to China and sailed in December 1999 and December 2000 respectively, from the Baltic to the South China Sea. A contract for the procurement of two new ships was signed by the Chinese government on 3 January 2002.

BYSTRY

(Scale 1 : 1,200), Ian Sturton / 1151086

BURNY

10/2005, Ships of the World / 1151154

FRIGATES

0 + 1 GROM CLASS (PROJECT 1244.1) (FFG)

Name	No	Builders	Laid down	Launched	Commissioned
BORODINO (ex-Novik)	—	Yantar, Kaliningrad	26 July 1997	2001	2009

Displacement, tons: 3,600 full load
 Dimensions, feet (metres): 400.3 x 49.2 x 31.2 (sonar)
 (122.0 x 15.0 x 9.5)
 Main machinery: CODAG; 2 gas turbines; 2 diesels; 2 shafts
 Speed, knots: 30

Missiles: SSM: Space for eight or 16 Zvezda SS-N-25 (KH 35 Uran) (2 quad); active radar homing to 130 km (70.2 n miles) at 0.9 Mach; warhead 145 kg, sea skimmer
 SAM: Space for VLS system
 Guns: 1—3 in (76 mm)/59 AK 176
 2—30 mm AK 630
 Radars: Air/surface search, Top Plate (Fregate M), 3D, D/E-band.
 Surface search: Cross Dome, E/F-band
 Fire control: Bass Tilt; H/I-band
 Sonars: Hull mounted and VDS.
 Helicopters: 1 Ka-29 Helix.

NOVIK

(Scale 1 : 1,200), Ian Sturton / 0019031

Programmes: Designed by Almaz. Considerable publicity when keel laid down in 1997 but the project stalled due to budget cuts. However, building was reported to have been restarted in 2003 and it is speculated that the ship was being modified to act as an unarmed

training ship in 2004. Building progress is very slow.
 Structure: Most details are speculative and are based on the original published export design.
 Operational: Likely to be based in the Baltic Fleet.

4 KRIVAK (PROJECT 1135/1135M/1135MP) CLASS (FFM)

Name	No	Type	Builders	Laid down	Launched	Commissioned
NEUKROTIMY	731	II	Yantar, Kaliningrad	22 Jan 1976	27 June 1977	30 Dec 1977

PYTLIVY	808	II	Yantar, Kaliningrad	27 June 1979	16 Apr 1981	30 Nov 1981

Displacement, tons: 3,100 standard, 3,650 full load
Dimensions, feet (metres): 405.2 x 46.9 x 24 (sonar)
 (123.5 x 14.3 x 7.3)
Main machinery: COGAG, 2 M8K gas-turbines, 55,500 hp(m)
 (40.8 MW); 2 M 62 gas-turbines; 13,600 hp(m) (10 MW);
 2 shafts
Speed, knots: 32. **Range, n miles:** 4,000 at 14 kt; 1,600 at 30 kt
Complement: 194 (18 officers)

Missiles: SSM, 8 Zvezda SS-N-25 (KH 35 Uran) (2 quad) (Krivak I after modernisation), fitted for but not with.
SAM: 2 SA-N-4 Gecko (Zif 122) twin launchers (Osa-M semi-active radar homing to 15 km (8 n miles) at 2.5 Mach; warhead 50 kg, altitude 9.1-3,048 m (30-10,000 ft); 40 missiles.
A/S: Raduga SS-N-14 Silex quad launcher (command guidance to 85 km (30 n miles) at 0.95 Mach; payload nuclear 5 kT or Type 40 torpedo or Type E53 72 torpedo. SSM version, range 35 km (19 n miles); warhead 500 kg.
Guns: 4-3 in (76 mm) 59 AK 726 (2 twin) (Krivak I) 90 rds/min to 16 km (8.5 n miles); weight of shell 5.9 kg 2-3.9 in (100 mm) 70 AK 100 (Krivak II) 60 rds/min to 21.5 km (11.5 n miles); weight of shell 15.8 kg
Torpedoes: 8 -21 in (533 mm) (2 quad) tubes. Combination of 53 cm torpedoes.
A/S mortars: 2 RBU 6000 12-tubed trainable (not in modernised Krivak I); range 6,000 m; warhead 3t kg.
Mines: Capacity for 16.
Countermeasures: Decoys: 4 PK 16 or 10 PK 10 chaff launchers. Towed torpedo decoy.
ESM/ECM: 2 Bell Shroud. 2 Bell Squat. Half Cup laser warning (In some).
Radars: Air search: Head Net C (3D, E-band; or Half Plate (Krivak I mod))
Surface search: Don Key or Palm Frond or Don 2 or Spin Trough (I-band).

KRIVAK I (mod)

(Scale 1 : 1,200), Ian Sturton / 0508284

KRIVAK II

(Scale 1 : 1,200), Ian Sturton / 0508284

Firecontrol: 2 Eye Bowl (F-band (for SS-N-14), 2 Pop Group (F/H/I-band (for SA-N-4), Owl Screech (Krivak I), G-band, Kite Screech (Krivak II), H/K band, Plank Shave (Harpun B) (for SS-N-25) not fitted
IFF: High Pole B.
Sonars: Bull Nose (MGK 335S or MG-332), hull-mounted; active search and attack; medium frequency. Mura Tail (MGK-345) or Stear Hide (some Krivak I's after modernisation); VDS (MG 325) (active search; medium frequency.

Programmes: Type name was originally *bolshoy protivolodochny korabl*, meaning large anti-submarine ship. Changed in 1977-78 to *storozhevoy korabl* meaning

escort ship. The naval Krivaks I and II are known as the Burevestnik class and the border guard ships Krivak III (listed separately) as Neray class.
Modernisation: Top Plate radar has replaced Head Net in some and a more modern VDS is also fitted. SS-N-25 launchers are fitted in *Pytky*. This programme has stopped and missiles are not embarked. The launchers replaced the RBU mountings.
Structure: The modified Krivak I class has a larger bow. Krivak II class has Y-gun mounted higher than in Krivak I and the break to the quarterdeck further aft apart from other variations noted above.
Operational: Black Sea: *Ladny, Pytlivy*. Baltic: *Pytky, Neukrotimyy*

PYTLIVY (II)

6/2006, Marco Ghigino / 1164810

LADNY (I)

7/2000, Hartmut Ehlers / 0105545

LADNY (I)

10/2007, Rafael Cabrera / 1170210

2 NEUSTRASHIMY (JASTREB) CLASS (PROJECT 1154) (FFHM)

Name	No	Builders	Laid down	Launched	Commissioned
NEUSTRASHIMY	712	Yantar, Kaliningrad	27 Mar 1987	25 May 1988	24 Jan 1993
YAROSLAV MUDRYY	727	Yantar, Kaliningrad	27 May 1988	1991	2009

Displacement, tons: 3,450 standard; 4,250 full load
Dimensions, feet (metres): 425.3 oa; 403.5 wl x 50.9 x 15.7 (129.6; 123 x 15.5 x 4.8)
Main machinery: COGAG; 2 gas turbines; 48,600 hp (m) (35.72 MW); 2 gas turbines; 24,200 hp (m) (17.79 MW); 2 shafts
Speed, knots: 30. **Range, n miles:** 4,500 at 16 kt
Complement: 210 (35 officers)

Missiles: SSM: Fitted for but not with 16 SS-N-25 (4 quad); SS-CX-5 Sapless (possibly a version of SS-N-22 (MoskitM)) may be carried (see *Torpedoes*).

SAM: 4 SA-N-9 Gauntlet (Klinok) octuple vertical launchers; command guidance; active radar homing to 12 km (6.5 n miles) at 2 Mach; warhead 15 kg. 32 missiles.

SAM/Guns: 2 CADS-N-1 (Koruk/Kashan) (3M87); each has a twin 30 mm Gatling combined with 8 SA-N-11 (Grison) and Hot Flash/Hot Spot fire-control radar/optronic director. Laser beam guidance for missiles to 8 km (4.4 n miles); warhead 9 kg; 9,000 rds/min (combined) to 1.5 km (for guns).

A/S: SS-N-15/16; inertial flight to 120 km (65 n miles); payload Type 40 torpedo or nuclear warhead; fired from torpedo tubes.

Guns: 1-3.9 in (100 mm) 59 A 190E; 80 rds/min to 21.5 km (11.5 n miles); weight of shell 15.6 kg.

Torpedoes: 6-21 in (533 mm) tubes combined with A/S launcher; can fire SS-N-15/16 missiles with Type 40 anti-submarine torpedoes or 53 cm torpedoes.

A/S mortars: 1 RBU 12,000; 10-tubed trainable; range 12,000 m; warhead 80 kg.

Mines: 2 rails

Countermeasures: Decoys: 8 PK 10 and 2 PK 16 chaff launchers.

NEUSTRASHIMY

(Scale 1 : 1,200, Ian Sturton / Osprey)

ESM/ECM: Intercept and jammers. 2 Foot Ball; 2 Half Hat; 4 Half Cup laser intercept.

Weapons control: 2 Bell Crown datalink.

Radars: Air search: Top Plate; 3D; D/E-band.

Air/surface search: Cross Dome; E/F-band.

Navigation: 2 Palm Frond; I-band.

Fire control: Cross Sword (for SAM), K-band. Kite Screech B (for SSM and guns); I-band.

IFF: 2 Salt Pot; 4 Box Bar.

Sonars: Ox Yoke and Whale Tongue; hull-mounted; active search and attack; medium frequency Ox Tail; VDS or towed sonar array.

Helicopters: 1 Ka-27 Helix.

Programmes: At least four of the class were planned. The first of the class started sea trials in the Baltic in December 1990. Second of class (*Yaroslav Mudryy*) was launched in May 1991, but in October 1988 the shipyard stated that the hull would be sold for scrap. However, after several years' inaction, work recommenced in 2002 and it was confirmed in 2005 that the ship is to

be completed. Sea trials began on 28 February 2009. The export version of the ship is known as 'Korsar'. The third ship (*Tuman*) was launched in July 1993 with only the hull completed and work stopped in December 1997 without any work being done. She is unlikely to be completed.

Structure: Slightly larger than the Krivak and has a helicopter which is a standard part of the armament of modern Western frigates. There are two horizontal launchers at main deck level on each side of the ship, angled at 18° from forward. These double up for A/S missiles of the SS-N-15/16 type using a 'plunge-fly-plunge' launch and flight and normal torpedoes. Similar launchers are behind shutters in the last three of the Kirov class. The helicopter deck extends across the full width of the ship. The after funnel is unusually flush decked but both funnels have been slightly extended after initial sea trials. Attempts have been made to incorporate stealth features. Main propulsion is the same as the Udaloy II class. Reported as having a basic computerised combat data system.

Operational: Based in the Baltic at Baltiysk.

NEUSTRASHIMY

 attack; medium frequency.

TATARSTAN (Scale 1 : 900), Ian Sturton / 1042094

TATARSTAN 6/2005, Lemachko Collection / 1154546

Programmes: Intended as a successor to the Korv class, the Gepard family of ships, of which there were some five variants, was developed with export in mind. The first of class *Yastreb* was laid down in 1988 but was later broken up in 1992. The second and third of class were to have been exported abroad but, following the completion of *Tatarstan* for the Russian Navy, a second ship *Dagestan* (ex-*Burevestnik*) is expected to follow in 2010
Operational: Flagship of the Caspian Flotilla, the newly commissioned *Tatarstan* took part in the large Caspian naval exercise in August 2002

 SA-N 10 (Igla).
Guns: 1-100 mm A-190 ●; 60 rds/min to 21.5 km
 (11.6 n miles) weight of shell 15.6 kg. 2-30 mm/65
 AK 630 ●; 6 barrels per mounting; 3,000 rds/min to 2 km.
 2-14.5 mm MGs.
Torpedoes: 8 Paket 324 mm (2 quad) tubes. MTT anti-
 torpedo; active/passive homing to 5 km (2.7 n miles);
 warhead 70 kg.
Countermeasures: Decoys: 4 PK 10 launchers.
 ESM/ECM. Pribor TK-25.
Combat data systems: MARS Sigma.
Weapons control: 2 MTK-201 optronic directors ●.
Radars: Air/surface search: Furko-E; 3D ●; E/F-band
 Surface search: Grant Monument; I-band.
 Fire control: Rateg 5P-10E Puma ●; I-band (for 100 mm
 gun)
 Navigation: I-band ●
Sonars: Zarya; bow-mounted. Vinyetka low frequency
 active/passive towed array.

STEREGUSHCHIY (Scale 1 : 900), Ian Sturton / 1170229

STEREGUSHCHIY 6/2007, Ships of the World / 1305154

Helicopters: 1 Ka-27 Helix ●
Programmes: Multipurpose frigate designed to replace the
 Grisha class. The first batch being built at St Petersburg
 consists of four ships. A second building line has been
 started at Komsomolsk where orders for at least a further
 two ships are expected. There is an export version
 known as Project 20382 Tigr.
Structure: Steel hull. Composite superstructure. Bulbous
 bow. Nine watertight sub-divisions. Combined bridge
 and command centre. Space and weight provision for
 eight SS-N-25 missiles ●
Operational: *Steregushchiy* started sea trials in November
 2006.

Displacement, tons: 950 standard; 1,200 full load

Dimensions, feet (metres): 233.6 x 32.2 x 12.1
 (712 x 9.8 x 3.7)

Main machinery: CODAG; 1 gas-turbine; 15,000 hp(m)

(11 MW); 2 diesels; 16,000 hp(m) (11.8 MW); 3 shafts

Speed, knots: 30

Range, n miles: 2,500 at 14 kt; 1,750 at 20 kt diesels, 950 at 27 kt

Complement: 70 (5 officers) (Grisha III); 60 (Grisha I)

Missiles: SAM: SA-N-4 Gecko twin launcher ●; semi-active radar homing to 15 km (8 n miles) at 2.5 Mach; warhead 50 kg; altitude 9.1-3,048 m (30-10,000 ft); 20 missiles (see Structure for SA-N-9).

Guns: 2-57 mm/80 (twin) ●; 120 rds/min to 6 km (3.3 n miles); weight of shell 2.8 kg.

1-3 in (76 mm)/59 AK 176 (Grisha V) ●; 120 rds/min to 15 km (8 n miles); weight of shell 5.9 kg.

1-30 mm/65 (Grisha III and V classes) ●; 6 barrels; 3,000 rds/min combined to 2 km

Torpedoes: 4-21 in (533 mm) (2 twin tubes) ●. Combination of 53 cm torpedoes.

A/S mortars: 2 RBU 6000 12-tubed trainable ●; range 6,000 m; warhead 31 kg. (Only 1 in Grisha Vs.)

Depth charges: 2 racks (12)

Mines: Capacity for 18 in lieu of depth charges

Countermeasures: Decoys: 4 PK 10 or 2 PK 16 chaff launchers

ESM: 2 Watch Dog.

Radars: Air/surface search: Strut Curve (Strut Pair in early Grisha Vs) ●; F-band; range 110 km (60 n miles) for 2 m² target.

Half Plate Bravo (in later Grisha Vs); E/F-band.

Navigation: Don 2; I-band.

GRISHA III

(Scale 1 : 900), Ian Sturton / 0506081

GRISHA V

(Scale 1 : 900), Ian Sturton / 0506082

Fire control: Pop Group ●; F/HI-band (for SA-N-4) Bass Tilt (Grisha III and V) ●; HI-band (for 57/76 mm and 30 mm).

IFF: High Pole A or B. Square Head. Salt Pot.

Sonars: Bull Nose; hull-mounted, active search and attack; high/medium frequency.

Elk Tail; VDS ●, active search; high frequency. Similar to

Hormona helicopter dipping sonar

Programmes: Grisha III 1973-85 (three remaining); Grisha V 1982 1996 onwards (22 remaining). All were built at Kiev, Kharbarovsk and Zelenodolsk. Type name is *maly protivolochny korabl* meaning small anti-submarine ship.

Structure: Grisha III class has Muff Cob radar removed, Bass Tilt and 30 mm ADG (fitted aft), and Rad-haz screen removed from abaft funnel as a result of removal of Muff Cob. Grisha V is similar to Grisha III with the after twin 57 mm mounting replaced by a single Tarantul type 76 mm gun.

Operational: Nine Grisha Vs are stationed in the Northern Fleet, two Grisha III and seven Vs in the Pacific and one III and five Vs in the Black Sea. The modified Grisha III, known as Grisha IV, has been decommissioned.

Sales: Two Grisha III to Lithuania in November 1992. One Grisha V in 1994 and four Grisha II in 1996 to Ukraine.

0 + 1 (19) ADMIRAL GORSHKOV (PROJECT 22350) CLASS (FFGH)

Name	No	Builders	Laid down	Launched	Commissioned
ADMIRAL GORSHKOV	—	Severnaya Verf, St Petersburg	1 Feb 2006	2011	2013

Displacement, tons: 4,500
Dimensions, feet (metres): 433 x 52.5 x 7
 (132 x 16 x 7)
Main machinery: To be announced
Speed, knots: To be announced
Range, n miles: To be announced
Complement: To be announced

Missiles: SSM: 8 SS-N-26 (Oniks) (3M55); inertial guidance and active/passive radar homing to 300 km (162 n miles) at 2.6 Mach; sea skimmer in terminal phase; warhead 250 kg; VLS silo.
SAM: SA-N-7 Gadfly (Uragan); command/semi-active radar and IR homing to 25 km (13.5 n miles) at 3 Mach; warhead 70 kg; VLS silo.
 1 CADS-N-1 (Kashtan), has 30 mm Gatling combined with 8 SA-N-11 (Grasson) and Hot Flash/Hot Spot radar/optronic director; laser beam for guidance for missiles to 8 km (4.4 n miles); warhead 9 kg, 9,000 rds/min to 1.5 km for guns.
A/S: Medvedka 2 (SS-N-29); inertial flight to 25 km (13.5 n miles); payload Type 40 torpedo.
Guns: 1—130 mm A 192.
Torpedoes: To be announced.
Countermeasures: To be announced

ADMIRAL GORSHKOV

(Scale 1 : 1,200), Ian Sturton / 1159411

Combat data systems: To be announced.
Weapons control: To be announced
Radars: Air search: To be announced.
 Surface search: To be announced.
Fire control: To be announced
Navigation: To be announced
Sonars: To be announced.
Helicopters: 1 Ka-32

Programmes: Severnaya Verf shipyard contracted on 21 October 2005 to build the lead Project 22350 frigate. Up to 20 ships of the class may be procured. Designed by the Severnoye Design Bureau, it is the first new class of major surface combatants to be procured in 15 years. The ship may be equipped with Brahmos rather than SS-N-26 missiles.
Structure: Slightly longer and wider than the Talwar class from which the design is reported to be developed.
Operational: The first ship is likely to be based in the Baltic.

Displacement, tons: 769 standard, 960 full load
Dimensions, feet (metres): 246.7 x 32.2 x 14.4
 (75.2 x 9.8 x 4.4)
Main machinery: 3 Type M 504A diesels; 10,812 hp(m)
 (795 MW) sustained; 3 shafts
Speed, knots: 26 **Range, n miles:** 2,500 at 12 kt
Complement: 70 (8 officers)

Missiles: SAM: 2 SA-N-5 Grail quad launchers, manual aiming; IR homing to 6 km (3.2 n miles) at 1.5 Mach; altitude to 2,500 m (8,000 ft); warhead 1.5 kg.
Guns: 1—3 in (76 mm)/59 AK 176, 120 rds/min to 15 km (8 n miles); weight of shell 5.9 kg
 1—30 mm/65 AK 630, 6 barrels; 3,000 rds/min combined to 2 km.
Torpedoes: 4—21 in (533 mm) (2 twin) tubes, combination of 53 cm torpedoes.
A/S mortars: 2 RBU 6000 12-tubed trainable, range 6,000 m; warhead 31 kg 96 weapons
Depth charges: 2 racks.
Mines: Rails fitted
Countermeasures: Decoys: 2 PK 16 chaff launchers.
 ESM 2 Watch Dog, intercept.
Weapons control: Hood Wink and Odd Box optronic systems.
Radars: Air/surface search: Cross Dome, E/F-band.
 Navigation: TSR 333 or Nayala or Kivach III; I-band

PARCHIM II

(Scale 1 : 600), Ian Sturton / 05062114

Fire control: Bass Tilt, H/I-band.
 IFF: High Pole A.
Sonars: Bull Horn, hull-mounted, active search and attack; medium frequency.
 Lamb Tail; helicopter type VDS; high frequency.
Programmes: Built in the GDR at Peenewerft, Wolgast for the USSR. First one commissioned 19 December 1986 and the last on 6 April 1990.

Structure: Similar design to the ex-GDR Parchim I class now serving with the Indonesian Navy but some armament differences
Operational: All operate in the Baltic and are based at Baltiysk or Kronstadt. All of the class refitted at Rostock in 1994–95. *Bashkortostan* (MPK 228) damaged by fire in 1999 and again in 2008. She is unlikely to be repaired.

ALEKSIN

7/2008, Hartmut Ehlers / 1353298

2 DERGACH (SIVUCH) (PROJECT 1239) CLASS (PGGJM)

Name	No	Builders	Launched	Commissioned
BORA (ex-MRK 27)	815	Zelenodolsk, Kazan	1987	20 May 1997
SAMUM (ex-MRK 17)	616 (ex-575, ex-890)	Zelenodolsk, Kazan	1982	31 Dec 1995

Displacement, tons: 1,050 full load
Dimensions, feet (metres): 211.6 × 55.8 × 12.5
(64.5 × 17 × 3.8)

Main machinery: CODOG; 2 gas turbines; 55,216 hp(m)
(40.6 MW); 2 diesels; 10,064 hp(m) (7.4 MW);
2 hydroprops; 2 auxiliary diesels, 2 props on retractable
pods

Speed, knots: 53 foil, 12 hullborne
Range, n miles: 600 at 50 kt; 2,500 at 12 kt
Complement: 67 (8 officers)

Missiles: SSM: 8 SS-N-22 (2 quad) Sunburn (3M-82 Moskit)
launchers ●; active radar homing to 160 km (87 n miles)
at 2.5 Mach; warhead nuclear or 200 kT or HE 300 kg,
sea-skimmer

SAM: SA-N-4 Gecko twin launcher ●; semi-active radar
homing to 16 km (8 n miles) at 2.5 Mach; warhead 50 kg;
20 missiles

Guns: 1–3 in (76 mm)/59 AK 176 ●; 120 rds/min to 15 km
(8 n miles); weight of shell 5.9 kg.
2–30 mm/65 AK 630 ●; 6 barrels per mounting; 3,000
rds/min combined to 2 km.

Countermeasures: Decoys: 2 PK 16 and 2 PK 10 chaff
launchers.

ESM/ECM: 2 Foot Ball A, 2 Half Hats.

Weapons control: 2 Light Bulb datalink ●, Bend Stand ●
datalink for SS-N-22, Bell Nest.

Radars: Air/surface search: Cross Dome ●; E/F-band.

Fire control: Base Tilt ●; H/I-band (for guns)

Pop Group ●; F/H/I-band (for SAM).

Band Stand (Mineral MEI) ●; D-band (for SS-N-22).

Navigation: SRN-207, I-band.

IFF: Square Head, Salt Pot.

Programmes: Almaz design approved 24 December
1980. Classified as a PGGA (Guided Missile Patrol
Air Cushion Vessels). Both did trials from 1989
(Bora) and 1993 (Samum) before being accepted into
service

Structure: Twin-hulled surface effect design. The auxiliary
diesels are for slow speed operations.

Operational: The design was unreliable but efforts were
made in 1996/97 to restore both to an operational
state. SS-N-22 missiles were test-fired in April 2003.
Both ships have camouflaged hulls and are based at
Sevastopol.

Dimensions, feet (metres): 184.1 x 37.7 x 8.2
 (56.1 x 11.5 x 2.5)

Main machinery: COGAG; 2 Nikolayev Type DR 77 gas turbines; 16,016 hp(m) (11.77 MW) sustained; 2 Nikolayev Type DR 76 gas turbines with reversible gearboxes; 4,993 hp(m) (3.67 MW) sustained; 2 shafts or CODOG with 2 CM 504 diesels; 8,000 hp(m) (5.88 MW), replacing second pair of gas-turbines in Tarantul I/Is

Speed, knots: 36. **Range, n miles:** 400 at 36 kt; 1,650 at 14 kt
Complement: 34 (5 officers)

Missiles: SSM: 4 Raduga SS-N-2D Styx (2 twin) launchers (Tarantul II); active radar or IR homing to 83 km (45 n miles) at 0.9 Mach; warhead 513 kg; sea skimmer at end of run.

4 Raduga SS-N-22 Sunburn (3M-82 Moskit) (2 twin) launchers (Tarantul III); active radar homing to 160 km (87 n miles) at 2.5 Mach, warhead nuclear 200 kT or HE 300 kg; sea-skimmer. Modified version in Type 1242.1

SAM SA-N-5 Grail quad launcher; manual aiming; IR homing to 6 km (3.2 n miles) at 1.5 Mach; altitude to 2,600 m (8,000 ft); warhead 1.5 kg.

Guns: 1-3 in (76 mm)/59 AK 176; 120 rds/min to 15 km (8 n miles); weight of shell 5.9 kg
 2-30 mm/65; 6 barrels per mounting; 3,000 rds/min to 2 km.

Countermeasures: Decoys: 2 PK 16 or 4 PK 10 (Tarantul III) chaff launchers.

ESM: 2 Foot Bail, 2 Half Hat (in some).

Weapons control: Hood Wink optronic director. Light Bulb datalink. Band Stand, datalink for SSM, Bell Nest

Raders: Air/surface search: Plank Shave or Positiv E (Tarantul 874); I-band.

Navigation: Kivach III, I-band.

Fire control: Bass Tilt; H/I-band

Band Stand (Mineral ME); D-band (for SS-N-22

IFF: Square Head, High Pole B.

Sonars: Foal Tail; VDS; active search; high frequency

Programmes: Tarantul II were built at Kolpino, Petrovsky, Leningrad and in the Pacific in 1980-86. Production of Tarantul IIs then continued until 1995. One more was launched in September 1997 at Rybinsk, and a Tarantul III at Kolpino completed in December 1999 for the Baltic Fleet. Type name is *raketny kuter* meaning missile cutter.

Modernisation: Tarantul III 874 served as a trials platform for a modified version of SS-N-22 with a longer range; the missile is distinguished by end caps on the launcher doors. Tarantul II 962 served as a trials platform for the CADS-N-1 point defence system in the Black Sea

SHIPBORNE AIRCRAFT

Notes: (1) A smaller variant of the Kamov Ka 60 is reported to have been offered to the Russian Navy. The Ka-40 anti-submarine helicopter has been under development as a potential replacement for the Ka-27 since 1990. There have been no recent developments. (2) Haze B helicopters have all been placed in reserve as have all Ka-25 Hormones. A few of the latter remain active and probably have a training role.

Numbers/Type: 17/2 Sukhoi Su-33 Flanker D/Su-33 UB
Operational speed: 1,345 kt (2,500 km/h).
Service ceiling: 59,000 ft (18,000 m).
Range: 2,160 + n miles (4,000 km).

Role/Weapon systems: Fleet air defence fighter. 20 production aircraft delivered of which 2 have been lost. 10 are believed to be operational. All based in the Northern Fleet. Most training is done from a simulated flight deck ashore. Sensors: Track-while-scan pulse Doppler radar, IR scanner. Weapons: One 30 mm cannon, 10 AAMs (AA-12, AA-11, AA-8).

FLANKER 2/1996 / 0506323

Numbers/Type: 5 Sukhoi Su-25UT Frogfoot UTG
Operational speed: 526 kt (975 km/h).
Service ceiling: 22,965 ft (7,000 m).
Range: 675 n miles (1,250 km).

Role/Weapon systems: The UTG version is the two seater ground attack aircraft used for deck training in the carrier *Kuznetsov*. About 40 more of these aircraft are Air Force. Sensors: Laser rangefinder, ESM, ECM. Weapons: One 30 mm cannon, AAMs (AA-8), rockets, bombs.

FROGFOOT 2/1996 / 0506324

Numbers/Type: 2 Kamov Ka-31 Helix RLD
Operational speed: 119 kt (220 km/h).
Service ceiling: 11,480 ft (3,500 m).
Range: 162 n miles (300 km).

Role/Weapon systems: AEW conversions with a solid-state radar under the fuselage. Eight sold to India. Sensors: Oko E-801 Surveillance radar, datalinks. Weapons: Unarmed.

HELIX RLD 9/1995 / 0506325

Numbers/Type: 58/28/5 Kamov Ka-27Pl Helix A/Ka-29 Helix B/Ka-32 Helix D.
Operational speed: 135 kt (250 km/h).
Service ceiling: 19,685 ft (6,000 m).
Range: 432 n miles (800 km).

Role/Weapon systems: ASW helicopter; three main versions — 'A' for ASW, 'B' for assault and D for SAR; deployed to surface ships and some shore stations. Sensors: Osminog Splash Drop search radar, VGS-3 dipping sonar, sonobuoys, MAD, ESM. Weapons: ASW; three APR-2 torpedoes, nuclear or conventional S3V depth bombs or mines. Assault type Two UV-57 rocket pods (2 x 32).

HELIX 6/2006*, *Ships of the World* / 1353315

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Notes: (1) The MiG-29 Fulcrum D has been abandoned by the Navy and the Ka-34 Hokum is not in production. Yak-41 Freestyle is not being developed but the prototype is for sale. Fitter C/D, Badgers and Bear D aircraft were out of service by 1995. Blenders and Bear G by 1997, and Mail and Haze A/C by 1999 (except for three still active in the Black Sea Fleet). (2) Tu-204P has been proposed as an ASW/reconnaissance aircraft to replace the 'May'. It would be a development of the commercial transport aircraft. (3) Two Ilyushin Il-20 Coat A Elint aircraft are probably non-operational.

Numbers/Type: 30 Ilyushin Il-38 May.
Operational speed: 347 kt (645 km/h).
Service ceiling: 32,800 ft (10,000 m).
Range: 3,887 n miles (7,200 km).

Role/Weapon systems: Long-range MR and ASW. 14 in the North, 16 in the Pacific. Test flights of an upgraded version started in 2002 and continued in 2003. Sensors: Wet Eye search/weather radar, MAD, sonobuoys. Weapons: ASW; internal storage for 6 tons weapons.

MAY 6/2004, *Paul Tompkins* / 0001128

Numbers/Type: 48 Tupolev Tu-22 M Backfire C.
Operational speed: 2.0 Mach
Service ceiling: 60,000 ft (18,300 m).
Range: 2,500 n miles (4,630 km).

Role/Weapon systems: Medium-range nuclear/conventional strike and reconnaissance. About 20 are operational. Sensors: Down Beat search/Fan Tail attack radars, EW. Weapons: ASW; 12 tons of 'iron' bombs or standoff missiles AS-4 Kitchen (Kh 22N(A)) and AS-6 Kickback (Kh 15P). Self-defence: two 23 mm cannon.

BACKFIRE 6/2003, *Paul Jackson* / 0547315

Numbers/Type: 23/10 Tupolev Tu-142 Bear F/Tu-142 Bear J.
Operational speed: 500 kt (925 km/h).
Service ceiling: 60,000 ft (18,300 m).
Range: 6,775 n miles (12,560 km).

Role/Weapon systems: Multimission long-range aircraft (ASW and communications variants) 36 in the North, remainder Pacific. Sensors: Wet Eye search radar, ESM; search radar, sonobuoys, EW, MAD (F), ELINT systems (J). The Bear J is reported to be equipped with VLF communications for SSBN connectivity. Weapons: ASW; various torpedoes, depth bombs and/or mines (F). Self-defence; some have two 23 mm or more cannon.

BEAR F 6/2006*, *Ships of the World* / 1353316

Numbers/Type: 9 Antonov An-12 Cub ('Cub B/C/D') ('Cub C/D' ECM/ASW).
Operational speed: 419 kt (777 km/h).
Service ceiling: 33,500 ft (10,200 m)
Range: 3,075 n miles (5,700 km).
Role/Weapon systems: Used either for intelligence gathering (B) or electronic warfare (C, D); is versatile with long range. Sensors: Search/weather radar, three EW blisters (B), tail-mounted EW/Eint equipment in addition (C/D) Weapons: Self-defence; two 23 mm cannon (B and D only).

Numbers/Type: 61 Sukhoi Su-24 Fencer D/E
Operational speed: 1.15 Mach
Service ceiling: 57,400 ft (17,500 m)
Range: 950 n miles (1,756 km).
Role/Weapon systems: Fitted for maritime reconnaissance (47) and strike (4) Sensors: Radar and EW. Weapons: 30 mm Gatling gun; various ASM missiles and bombs; some have 23 mm cannon.

FENCER E 6/1999, Jane's / 0048911

PATROL FORCES

1 + 2 (2) BUYAN (PROJECT 21630) CLASS (PG)

ASTRAKHAN 012 (ex-101) VOLGODONSK (ex-Kaspiysk) MAKHACHKALA

Displacement, tons: 520 full load
Dimensions, feet (metres): 203.4 x 31.5 x 6.7 (62.0 x 9.6 x 2.1)
Main machinery: 2 Zvezda M520 diesels; 9,900 hp (7.35 MW); 2 waterjets
Speed, knots: 26
Range, n miles: 1,500 at 15 kt
Complement: To be announced
Missiles: SAM: SA-16 Gubka (Strelets), IR homing to 5 km (2.7 n miles) at 2.6 Mach, warhead 1.3 kg.
Guns: 1—3.9 in (100 mm) A 190, 80 rds/min to 20 km (10.8 n miles); weight of shell 16 kg. 2—30 mm/65 AK 306, 6 barrels per mounting; 3,000 rds/min to 2 km. 2—14.5 mm MGs. 3—7.62 mm MGs. 1—122 mm UMS 73 Grad-M multibarrelled rocket launcher.
Countermeasures: Decoys: 2 KT 216 launchers
Radars: Air/surface search: Cross Dome (Positiv-E); E/F-band
Fire control: Bass Tilt (MR-123); I/J-band.
Navigation: I-band

Comment: Designed by Zelenodolsk Design Bureau and built by Almaz, St Petersburg. *Astrakhan* laid down on 30 January 2004 and launched on 7 October 2005. *Volgodonsk* laid down on 25 February 2005 and *Makhachkala* on 24 March 2006. Heavily armed gunboat designed for littoral operations. The design includes radar and IR signature reduction measures including below water-line exhaust. The first became operational in the Caspian Sea in mid-2007 but the second pair appear to be delayed. At least two further units are expected

ASTRAKHAN (old number) 6/2006, Lemachko Collection / 1159863

4 MATKA (VEKHR) CLASS (PROJECT 206MP) (FAST ATTACK CRAFT—MISSILE HYDROFOIL) (PGGK)

**BOROVSK (ex-R 25) 706 VOLGOCHERENSK (ex-R 44) 966
 KARACHEJEVO-CHEKKESSIA 701 BUDENOVSK 702**

Displacement, tons: 225 standard, 260 full load
Dimensions, feet (metres): 129.9 x 24.9 (41 over foils) x 6.9 (13.1 over foils) (39.6 x 7.6, 12.5 x 2.1; 4)
Main machinery: 3 Type M 604 diesels; 10,800 hp(m) (7.94 MW) sustained; 3 shafts
Speed, knots: 40. **Range, n miles:** 600 at 35 kt foilborne; 1,500 at 14 kt hullborne
Complement: 33
Missiles: SSM: 2 SS-N-2C/D Styx; active radar or IR homing to 83 km (45 n miles) at 0.9 Mach; warhead 513 kg; sea-skimmer at end of run. 8 SS-N-25 (in 966); radar homing to 130 km (70.2 n miles) at 0.9 Mach, warhead 145 kg, sea-skimmer.
Guns: 1—3 in (76 mm)/59 AK 176; 120 rds/min to 15 km (8 n miles); weight of shell 5.9 kg. 1—30 mm/65 AK 630; 6 barrels per mounting, 3,000 rds/min to 2 km
Countermeasures: Decoys: 2 PK 16 chaff launchers.
ESM: Clay Brick; intercept.
Weapons control: Hood Wink optronic directors.
Radars: Air/surface search: Plank Shave; E-band.
Navigation: SRN-207; I-band.
Fire control: Bass Tilt, H/I-band.
IFF: High Pole B or Salt Pot B and Square Head.

Programmes: In early 1978 the first of class was seen. Built at Kolpino Yard, Leningrad. Production stopped in 1983 being superseded by Tarantul class. Type name is *raketny kuter* meaning missile cutter.
Structure: Similar hull to the deleted Osa class with similar single hydrofoil system to Turya class. The combination has produced a better sea-boat than the Osa class. *Volgocherensk* in the Black Sea was the trials craft for the SS-N-25.
Operational: *Volgocherensk* is based in the Black Sea and the other three are based in the Caspian. Five units transferred to Ukraine in 1996

R 44 6/2003, Lemachko Collection / 0570917

1 MUKHA (SOKOL) (PROJECT 1145) CLASS (FAST ATTACK CRAFT—PATROL HYDROFOIL) (PGK)

VLADIMIRETS (ex-MPK 220) 060
Displacement, tons: 400 full load
Dimensions, feet (metres): 164 x 27.9 (33.5 over foils) x 13.1 (19.4 foils) (50 x 8.5; 10.2 x 4; 5.9)
Main machinery: CODOG; 2 Type NK 12M gas turbines, 23,046 hp(m) (16.95 MW) sustained; 2 diesels; 2,400 hp(m) (1.76 MW); 2 shafts
Speed, knots: 40; 12 hullborne
Complement: 45
Guns: 1—3 in (76 mm)/59 AK 176; 120 rds/min to 15 km (8 n miles); weight of shell 5.9 kg. 2—30 mm/65 AK 630, 6 barrels per mounting; 3,000 rds/min combined to 2 km
Torpedoes: 8—16 in (406 mm) (2 quad) tubes. SAET-40; anti-submarine; active/passive homing to 10 km (5.4 n miles) at 30 kt, warhead 100 kg
Countermeasures: Decoys: 2 PK 16 chaff launchers
ESM: Radar warning
Radars: Surface search: Peel Cone; E band
Navigation: SRN 206, I-band
Fire control: Bass Tilt; H/I-band
Sonars: Foal Tail; VDS; active search, high frequency

Comment: Built in 1986 at Feodosuja. Features include a hydrofoil arrangement with a single fixed foil forward, large gas-turbine exhausts aft, and trainable torpedo mountings. The only ship of the class, which was used as a trials platform for the Medveka ASW guided weapon, is based in the Black Sea. The vessel was badly damaged in a storm on 11 November 2007 and its future is unclear

VLADIMIRETS 10/2006, Laursen/Jarnesen / 1353337

AMPHIBIOUS FORCES

Notes: (1) It was announced in mid 2006 that a new large landing ship displacing 8,000-9,000 tons was to be laid down by late 2006. Further details have not been announced. (2) A new LCU, known as the Project 21820 Dyuigon class, was laid down in 2006. A larger version of the Serna class, it is under construction at Volga Shipyard.

0 + 1 (5) MODIFIED ALLIGATOR (PROJECT 11711E) CLASS (LSTHM)

Name	No	Builders	Laid down	Launched	Commissioned
IWAN GREN	-	Yantar, Kaliningrad	23 Dec 2004	2008	2010

Displacement, tons: 5,000 full load
Dimensions, feet (metres): 419.9 x 54.1 x 11.8 (128.0 x 16.5 x 3.6)
Main machinery: 2 diesels; 10,000 hp(m) (7.5 MW); 2 shafts
Speed, knots: 18. **Range, n miles:** 3,500 at 16 kt
Complement: 100
Military lift: 300 troops; 13-60 ton tanks or 36 armoured personnel carriers
Missiles: 2-140 mm multilaunch rocket system.
Guns: 1—3 in (76 mm)/60; AK-176, 120 rds/min to 15 km (8 n miles); weight of shell 7 kg. 2—30 mm/65 AK-630; 6 barrels per mounting, 3,000 rds/min to 2 km.
Radars: To be announced
Helicopters: 1 Ka-29 Helix B.

Comment: First of a new class of amphibious ship which, based on the Project number, is likely to be a modified version of the Alligator class landing ships which were built between 1966-76. Progress is slow but up to six ships, to replace the Alligator class, are expected

IWAN GREN (Scale 1 : 1,500), Ian Sturton / 1353317

14 ROPUCHA (PROJECT 775/775M) CLASS (LSTM)

North: OLENEGORSKIY GORNIAC 012
 Baltic: KALININGRAD 102
 Black: AZOV 151 (II)
 Pacific: BDK-98 055

GEORGIY POBEDONOSETS 018
 ALEXANDER SHABALIN 110
 YAMAL 156
 OSLYABYA (ex-Mukhter Avezov) 066

KONDOPOGA 027
 MINSK 127
 TSESAR KUNIKOV 158
 PERESVET (ex-Nicolay Korsakov) 077 (II)

ALEXANDER OTRAKOVSKIY 031
 KOROLEV 130 (II)

Displacement, tons: 4,400 full load
 Dimensions, feet (metres): 369.1 x 49.2 x 12.1
 (112.5 x 15 x 3.7)
 Main machinery: 2 Zgoda-Suzer 16ZV840/48 diesels,
 19,230 hp(m) (14.14 MW) sustained; 2 shafts
 Speed, knots: 17.5
 Range, n miles: 3,500 at 16 kt; 6,000 at 12 kt
 Complement: 95 (7 officers)
 Military lift: 10 MBT plus 190 troops or 24 AFVs plus 170
 troops or mines

Missiles: SAM: 4 SA-N-5 Grail quad launchers (in at
 least two ships); manual aiming; IR homing to 6 km
 (3.2 n miles) at 1.5 Mach; altitude to 2,500 m (8,000 ft);
 warhead 1.5 kg; 32 missiles.
 Guns: 4—57 mm/75 AK 725 (2 twin) (Ropucha II); 120 rds/min
 to 12.7 km (6.8 n miles); weight of shell 2.8 kg
 1—76 mm/59 AK 176 (Ropucha II); 120 rds/min to 15 km
 (8 n miles); weight of shell 5.9 kg.
 2—30 mm/65 AK 630 (Ropucha II).
 2—122 mm UMS-73 Grad-M (in some) 2—40-barrelled
 rocket launchers; range 9 km (5 n miles).
 Mines: 92 contact type
 Weapons control: 2 Squeeze Box optronic directors ●
 Hood Wink and Odd Box
 Radars: Air/surface search: Strut Curve ● (Ropucha I) or
 Cross Dome (Ropucha II); F-band.
 Navigation: Don 2 or Nayada; I-band.
 Fire control: Muff Cob ● (Ropucha I); G/H-band.
 Bass Tilt (Ropucha II); H/I-band.
 IFF: 2 High Pole A or Salt Pot A
 Sonars: Mouse Tail VDS can be carried

Programmes: Ropucha is completed at Northern Shipyard,
 Gdansk, Poland in two spells from 1974-78 (12 ships) and
 1980-88. Ropucha IIs started building in 1987 with the first
 one commissioning in May 1990. The third and last of the
 class completed in January 1992. Type name is *bolshoy*
desantny korabl (BDK) meaning large landing ship.
 Structure: A Ro-Ro design with a tank deck running the
 whole length of the ship. All have very minor differences
 in appearance. These ships have a higher troop-to-vehicle
 ratio than the Alligator class. At least five of the class
 have rocket launchers at the after end of the forecastle.
 The second type have a 76 mm gun forward in place of one
 twin 57 mm and an ADG aft instead of the second. Radar
 and EW suites are also different. The after mast has been
 replaced by a solid extension to the superstructure.
 Operational: Eleven more have been deleted so far.
 Sales: One to South Yemen in 1979, returned to Russia in
 late 1991 for refit and was back in Aden in 1993. One to
 Ukraine in 1996.

ROPUCHA I (Scale 1 : 1,200), Ian Sturton / 0506247

TSESAR KUNIKOV 8/2007, Marco Ghuglino / 1353338

4 ALLIGATOR (TAPIR) (PROJECT 1171) CLASS (LSTM)

SARATOV (ex-Voronezhsky Konsomolats) 50
 NIKOLAY FILCHENKOV 152

NIKOLAY VILKOV 081 (IV)
 ORSK (ex-Nicolay Obyenka) 148

Displacement, tons: 3,400 standard; 4,700 full load
 Dimensions, feet (metres): 370.7 x 50.8 x 14.7
 (113 x 15.5 x 4.5)
 Main machinery: 2 diesels; 9,000 hp(m) (6.6 MW); 2 shafts
 Speed, knots: 18. Range, n miles: 10,000 at 15 kt
 Complement: 100
 Military lift: 300 troops; 1,750 tons including about 20 tanks and various trucks, 40 AFVs

Missiles: SAM: 2 or 3 SA-N-5 Grail twin launchers, manual aiming, IR homing to 6 km
 (3.2 n miles) at 1.5 Mach, altitude to 2,500 m (8,000 ft); warhead 1.5 kg; 16 missiles.
 Guns: 2—57 mm/75 AK 725 (twin); 120 rds/min to 12 km (6.8 n miles); weight of shell 2.8 kg.
 4—25 mm/80 (2 twin) (Type 4); 270 rds/min to 3 km (1.6 n miles); weight of shell 0.34 kg.
 1—122 mm UMS-72 Grad-M; 2—40-barrelled rocket launchers (in Types 3 and 4); range
 9 km (5 n miles).
 Weapons control: 1 Squeeze Box optronic director (Types 3 and 4).
 Radars: Surface search: 2 Don 2; I-band.

Programmes: First ship commissioned in 1966 at Kaliningrad. Last of class in service
 completed in 1976. Type name is *bolshoy desantny korabl* meaning large landing ship.
 One more Type 3 in service with Ukraine.
 Structure: These ships have ramps on the bow and stern. In Type 3 the bridge structure
 has been raised and a forward deck house has been added to accommodate shore
 bombardment rocket launchers. Type 4 is similar to Type 3 with the addition of two twin
 25 mm gun mountings on centreline abaft the bridge superstructure. As well as a tank deck
 300 ft long stretching right across the hull there are two smaller deck areas and a hold.
 Operational: In the 1980s the class operated regularly off West Africa, in the Mediterranean
 and in the Indian Ocean, usually with Naval Infantry units embarked. Half the class have
 been scrapped or laid up. Of the remainder, *Vilkov* is in the Pacific and the others in
 the Black Sea.
 Sales: One to Ukraine in 1995

SARATOV 10/2008, Laursen/Jarnasen / 1353339

2 POMORNIK (ZUBR) (PROJECT 1232.2) CLASS (ACVM/LCUJM)

YEVGENIY KOCHESHKOV (ex-MDK-118) 770

MORDOVIYA (ex-MDK-94) 782

Displacement, tons: 550 full load
 Dimensions, feet (metres): 189 x 84 (57.6 x 25.6)
 Main machinery: 5 Type NK-12MV gas-turbines; 2 for lift, 23,672 hp(m) (17.4 MW) nominal;
 3 for drive, 35,508 hp(m) (26.1 MW) nominal
 Speed, knots: 63
 Range, n miles: 300 at 55 kt
 Complement: 31 (4 officers)
 Military lift: 3 MBT or 10 APC plus 230 troops (total 130 tons)

Missiles: SAM: 2 SA-N-5 Grail quad launchers; manual aiming; IR homing to 6 km
 (3.2 n miles) at 1.5 Mach; altitude to 2,500 m (8,000 ft); warhead 1.5 kg.
 Guns: 2—30 mm/65 AK 630; 8 barrels per mounting; 3,000 rds/min combined to 2 km.
 2—140 mm A-22 Ogon 22-barrelled rocket launchers.
 Mines: 2 rails can be carried for 80
 Countermeasures: Decoys: MS227 chaff launcher.
 ESM: Tool Box; intercept
 Weapons control: Quad Look (DWU-3) (modified Squeeze Box) optronic director.
 Radars: Surface search: Curl Stone; I-band.
 Fire control: Bass Tilt; H/I-band
 IFF: Salt Pot A/B Square Head.

Comment: First of class delivered 1986, commissioned in 1988. Last of class launched
 December 1994. Produced at St Petersburg and at Feodosiya. Bow and stern ramps for
 ro-ro working. Last survivors are based at Baltiysk and one is still operated by Ukraine.
 One (plus one from Ukraine) transferred and two new build for Greece by 2005. These
 are the first Former Soviet Union (FSU) naval platform sales to a NATO country.

1 POLNOCHNY B CLASS (PROJECT 771) CLASS (LSM)

VTR 140

Displacement, tons: 760 standard, 834 full load
 Dimensions, feet (metres): 246.1 × 31.5 × 7.5 (75 × 9.6 × 2.3)
 Main machinery: 2 Kolomna Type 40-D diesels; 4,400 hp(m) (3.2 MW) sustained; 2 shafts
 Speed, knots: 19
 Range, n miles: 1,000 at 18 kt
 Complement: 40-42
 Military lift: 180 troops; 350 tons including 6 tanks
 Missiles, SAM: 4 SA-N-5 Grail quad launchers.
 Guns: 2 or 4—30 mm (1 or 2 twin).
 2—140 mm WM-18 rocket launchers; 18 barrels.
 Weapons control: PED-1 system.
 Radars: Surface search, Spin Trough; I-band.
 Fire control: Drum Tilt; H/I-band (for 30 mm guns).
 IFF: High Pole A, Square Head.

Comment: Built at Northern Shipyard, Gdansk, Poland in 1970. VTR 140 serves in the Northern Fleet as a logistic support ship. Others of the class are in reserve.

VTR 140

6 ONDATRA (AKULA) (PROJECT 1176) CLASS (LCMS)

DKA 70 877 DKA 164 - DKA 464 -
 DKA 148 - DKA 325 799 DKA 704 640

Displacement, tons: 145 full load
 Dimensions, feet (metres): 78.7 × 16.4 × 4.9 (24 × 5 × 1.5)
 Main machinery: 2 diesels; 300 hp(m) (220 kW); 2 shafts
 Speed, knots: 10
 Range, n miles: 500 at 5 kt
 Complement: 5
 Military lift: 1 MBT

Comment: First completed in 1979 and associated with *Ivan Rogov*. 33 deleted so far. Tank deck of 45 × 13 ft Two to Yemen in 1983. Two of unknown pennant number are based in the Caspian. The remainder are in the Baltic.

DKA 70

6/2008*, 1353340

4 SERNA CLASS (LCU)

DKA 67 747 - 645 DKA 144 575 +1

Displacement, tons: 105 full load
 Dimensions, feet (metres): 86.3 × 19 × 5.2 (26.3 × 5.8 × 1.6)
 Main machinery: 2 M 503A3 diesels; 6,522 hp(m) (4.06 MW); 2 shafts
 Speed, knots: 30
 Range, n miles: 100 at 30 kt, 600 at 22 kt
 Complement: 6
 Military lift: 45 tons or 100 troops

Comment: High-speed utility landing craft capable of beaching and in service in May 1995. Have an 'air-lubricated' hull. Designed for both military and civilian use by the R Alexeyev Central Design Bureau and built at Nizhny Novgorod. Can be armed. DKA-67 is operational in the Baltic Fleet and two are reported to be in the Caspian. Three others have been sold commercially.

SERNA CLASS

2 AIST (DZHEYRAN) (PROJECT 1232.1) CLASS (ACV/LCUJ)

MDK 18 608

MDK 88 609

Displacement, tons: 298 full load
 Dimensions, feet (metres): 155.2 × 58.4 (47.3 × 17.8)
 Main machinery: 2 Type NK-12M gas turbines driving 4 axial lift fans and 4 propeller units for propulsion; 19,200 hp(m) (14.1 MW) nominal
 Speed, knots: 70
 Range, n miles: 120 at 50 kt
 Complement: 15 (3 officers)
 Military lift: 80 tons or 4 light tanks plus 50 troops or 2 medium tanks plus 200 troops or 3 APCs plus 100 troops
 Guns: 4—30 mm/66 (2 twin) AK 630, 6 barrels per mounting; 3,000 rds/min combined to 2 km
 Countermeasures: Decoys, 2 PK 16 chaff launchers
 Radars: Surface search, Kivach; I-band
 Fire control: Drum Tilt, H/I-band
 IFF: High Pole B, Square Head

Comment: First produced at Leningrad in 1970, subsequent production at rate of about six every four years. The first large hovercraft for naval use. Similar to UK SR. N4. Type name is *maly desantny korabl na vozdushnoy podushke* meaning small ACV. Modifications have been made to the original engines and some units have been reported as carrying two SA-N-5 quadruple SAM systems and chaff launchers. Based in the Caspian.

MINE WARFARE FORCES

Notes: (1) All remaining Yevgenya (Korond) class MHCs were laid up by 2001, except for two in the Caspian Sea which may still be used as patrol craft. These include RT 236 (259). (2) Some 40 to 50 craft of various dimensions, some with cable reels, some self-propelled and unmanned, some towed and unmanned are reported including the 8 m Kater and Volga unmanned mine clearance craft.

RT 236 7/2006, Lemachko Collection / 1305146

11 NATYA I (AKVAMAREN) (PROJECT 266M) CLASS (MINESWEEPERS—OCEAN) (MSOM)

North	Pacific	Black
MOTORIST 806	MT 265 718	VALENTIN PIKUL 770
KOMENDOR 831	MT 264 738	VITSEADMIRAL ZHUKOV 909
KONTRADMIRAL VLASOV		IVAN GOLUBETS (ex-Radist) 911
(ex-Machinist) 855		TURBINIST 912
		KOVROVETS 913
		VITSE-ADMIRAL ZAKHARIN 908 (ex-611)

Displacement, tons: 804 full load
Dimensions, feet (metres): 200.1 (219 8 Natya III) x 33.5 x 9.8 (61; 67 x 10.2 x 3)
Main machinery: 2 Type M 504 diesels, 5,000 hp(m) (3.67 MW) sustained; 2 shafts, cp props
Speed, knots: 16
Range, n miles: 3,000 at 12 kt
Complement: 67 (8 officers)

Missiles: SAM: 2 SA-N-5/8 Grail quad launchers (in some); manual aiming; IR homing to 6 km (3.2 n miles) at 1.5 Mach; altitude to 2,500 m (8,000 ft); warhead 1.5 kg; 18 missiles.
Guns: 4—30 mm/65 (2 twin) AK 230; 500 rds/min to 6.5 km (3.5 n miles); weight of shell 0.54 kg or 2—30 mm/65 AK 306; 6 barrels per mounting; 3,000 rds/min combined to 2 km
 4—25 mm/80 (2 twin); 270 rds/min to 3 km (1.6 n miles); weight of shell 0.34 kg
A/S mortars: 2 RBU 1200 5-tubed fixed; range 1,200 m; warhead 34 kg.
Depth charges: 62
Mines: 10.
Countermeasures: MCM: 1 or 2 GKT-2 contact sweeps; 1 AT-2 acoustic sweep, 1 TEM-3 magnetic sweep.
Radars: Surface search: Don 2 or Long Trough; I-band.
Fire control: Drum Tilt, H/I-band (not in all)
 IFF: 2 Square Head, High Pole B.
Sonars: MG 79/89; hull-mounted, active minehunting; high frequency.

Programmes: First reported in 1970. Built at Kolpino and Khabarovsk. Type name is *morskoy tralshchik* meaning seagoing minesweeper. MT 264 and MT 265 were a new variant commissioned in 1988 in which AK 306 mounts replaced the twin AK 230 mounts. One further unit, known as Natya III started construction in 1994. *Valentin Pikul*, left St Petersburg for the Black Sea in July 2002. A further development of the class (known as the Agat class), *Vitseadmiral Zakharin*, was launched at the Kolpino Yard on 26 May 2006.

Structure: Some have hydraulic gantries aft. Have aluminium/steel alloy hulls. Some have Gatling 30 mm guns and a different radar configuration without Drum Tilt. The Natya IIIs are 6 m longer than earlier ships.

Operational: Usually operate in home waters but have deployed to the Mediterranean, Indian Ocean and West Africa. Sweep speed is 14 kt.

Sales: India (two in 1978, two in 1979, two in 1980, one in August 1986, two in 1987, three in 1988). Libya (two in 1981, two in February 1983, one in August 1983, one in January 1984, one in January 1985, one in October 1986). Syria (one in 1985). Yemen (one in 1991) Ethiopia (one in 1991). Some have been deleted.

IVAN GOLUBETS 10/2008*, Laursen/Jarnasen / 1353341

KONTRADMIRAL VLASOV 6/2006, Lemachko Collection / 1305151

VALENTIN PIKUL 5/2006, C D Yaylali / 1159881

2 GORYA (TYPE 12660) CLASS (MINEHUNTERS—OCEAN) (MHOM)

Name	No	Builders	Laid down	Launched	Commissioned
A ZHELEZNYAKOV	901 (ex-811)	Kolpino Yard, Leningrad	28 Feb 1985	17 July 1986	30 Dec 1988
V GUMANENKO	811 (ex-812, ex-762)	Kolpino Yard, Leningrad	15 Sep 1985	4 Mar 1991	9 Jan 1994

Displacement, tons: 1,130 full load
Dimensions, feet (metres): 218.5 x 36.1 x 10.8 (66.0 x 11.0 x 3.3)
Main machinery: 2 M 503 diesels; 5,000 hp(m) (3.7 MW); 2 shafts
Speed, knots: 15
Range, n miles: 3,000 at 12 kt
Complement: 65 (7 officers)

Missiles: 2 SA-N-5 Grail quad launchers; IR homing to 6 km (3.2 n miles) at 1.5 Mach
Guns: 1—3 in (76 mm)/60 AK 176; 120 rds/min to 12 km (6.4 n miles); weight of shell 7 kg.
 1—30 mm/65 AK 630; 6 barrels, 3,000 rds/min to 2 km.
Countermeasures: Decoys: 2 PK 16 chaff launchers.
 ESM: Cross Loop, Long Fold
Radars: Surface search: Palm Frond; I-band.
 Navigation: Nayada, I-band
Fire control: Bass Tilt, H/I-band.
 IFF: Salt Pot C, 2 Square Head.
Sonars: Hull-mounted; active search; high frequency.

Programmes: A third of class was started but has been scrapped.
Structure: Appears to carry mechanical, magnetic and acoustic sweep gear and may have accurate positional fixing equipment. A remote-controlled submersible is housed behind the sliding doors in the superstructure below the AK 630 mounting. Two 406 mm torpedo tubes are reported as used for mine countermeasures.

Operational: 811 is based in the Black Sea. 812 transferred from the Baltic to the Northern Fleet in 2000

V GUMANENKO (old number) 6/2005, Lemachko Collection / 1159811

Displacement, tons: 450 full load
Dimensions, feet (metres): 157.4 x 28.9 x 6.6 (48 x 8.8 x 2)
Main machinery: 2 Kolomna Type 9-D-8 diesels; 2,000 hp(m) (1.47 MW) sustained; 2 shafts
Speed, knots: 15
Range, n miles: 3,000 at 10 kt
Complement: 43 (5 officers)
Missiles: SAM: 2 quad SA-N-5 launchers (in some).
Guns: 2 30 mm/65 AK 630 or 2—30 mm/65 (twin) and 2—25 mm/80 (twin).
Mines: 8.
Radars: Surface search: Don 2 or Kivach or Nayada, I-band.
IFF: 2 Square Head High Pole B.
Sonars: MG 69/79; hull-mounted; active minehunting; high frequency.

Comment: Wooden hull with GRP sheath. Built at about two a year at Petrozavodsk and at Ulis, Vladivostok (Pacific). First reported 1973 and the last one commissioned in January 1995. Type name is *bazovy tralshchik* meaning base minesweeper. Some have two twin 30 mm Gatling guns, others one 30 mm/65 (twin) plus one 25 mm (twin). In addition there are further 50 in reserve. At least one of the Caspian Sea units has been transferred to the Federal Border Guard.
Transfers: Bulgaria, four in 1981–85. Cuba, four in 1980–85. Syria, one in 1986. Vietnam, one in February 1987, one in February 1988, one in July 1989 and one in February 1990. Ethiopia, one in February 1991. Ukraine, two in 1996.

Displacement, tons: 135 full load
Dimensions, feet (metres): 103.3 x 21.3 x 6.2 (31.5 x 6.5 x 1.6)
Main machinery: 3 D12MM diesels; 900 hp(m) (690 kW); 3 shafts
Speed, knots: 12
Range, n miles: 650 at 10 kt
Complement: 14 (1 officer)
Guns: 1—30 mm/65 AK 630; 6 barrels, 3,000 rds/min to 2 km.
Countermeasures: MCM: AT-6 acoustic, SEMT-1 magnetic and GKT-3M wire sweeps.
Radars: Surface search, Pochora, MR241; I-band
Sonars: Kabarge I; minehunting; high frequency

Comment: Type name *Reydnny Tralshchik* meaning roadstead minesweeper. A follow-on to the Yevgenya class started construction in 1989 at Kolpino Yard, St Petersburg. Similar in appearance to Yevgenya. Building rate was about three a year to 1992 and then slowed to one a year until 1995. Some are painted a blue/grey colour. All are in the Baltic except RT 233 which is in the Caspian.

RT 273 7/2008*, Hartmut Ehlers / 1353285

(MINEHUNTERS—INSHORE) (MSB)

202	230	235
-----	-----	-----

Displacement, tons: 64 full load
Dimensions, feet (metres): 84.6 x 14.9 x 3.3 (25.8 x 4.5 x 1.0)
Main machinery: 2 Type 3D 6S11/235 diesels, 471 hp(m) (364 kW); 2 shafts
Speed, knots: 12
Range, n miles: 500 at 12 kt
Complement: 15
Guns: 2—25 mm/80 (twin).
Radars: Surface search/navigation: Don 2; I-band

Comment: Built in 1973–75 and, although believed to have been deleted in 2001, were reported in 2008 to have been reactivated

OLYA 202 7/2008*, Hartmut Ehlers / 1353284

3 TOLYA (PROJECT 696) CLASS
(MINEHUNTERS—COASTAL) (MSI)

229	+2
-----	----

Displacement, tons: 95 full load
Dimensions, feet (metres): 78.7 x 17.7 x 7.2 (24.0 x 5.4 x 2.2)
Main machinery: 2 diesels, 500 hp(m) (367 kW); 2 shafts
Speed, knots: 12
Range, n miles: 300 at 10 kt
Complement: 15
Guns: 2—12.7 mm MGs.
Radars: Navigation, Spin Trough; I-band.

Comment: The first ship commissioned in 1992 and the second pair in early 1993. Capable of drone control. Based in the Baltic. Although believed to have been deleted in 2001, were reported in 2008 to have been reactivated.

TOLYA 229 7/2008*, Hartmut Ehlers / 1353293

SURVEY AND RESEARCH SHIPS

Notes: (1) Civilian research ships are now all used for commercial purposes only or are laid up, and are no longer naval associated, although some can still be leased for short operations. The former section has therefore been deleted since 1998.

(2) A new Project 19920 hydrographic ship, *Victor Faleev* (BGK 797) was laid down by Vostochnaya Shipyard, Vladivostok on 17 October 2006 and launched on 22 July 2008. The vessel is approximately 1,000 tons displacement and is to be based in the Pacific Fleet.

VICTOR FALEEV

7/2008*, Lemachko Collection / 1353676

2 SIBIRIYAKOV (PROJECT 865) CLASS (AGOR)

SIBIRIYAKOV ROMZUALD MUKLEVITCH

Displacement, tons: 3,422 full load

Dimensions, feet (metres): 281.2 × 49.2 × 16.4 (85.7 × 15 × 5)

Main machinery: Diesel-electric, 2 Cegielski Sulzer 12AS25 diesels; 6,480 hp(m) (4.44 MW) sustained; 2 motors; 2 shafts; cp props; bow and stern thrusters

Speed, knots: 14. Range, n miles: 11,000 at 14 kt

Complement: 58 plus 12 scientists

Guns: 1–30 mm AK 630 can be carried.

Radars: Navigation: 2 Nayada; I-band.

Comment: Built in Northern Shipyard, Gdansk 1990–92. Has a pressurised citadel for NBC defence, and a dogaussing installation. Six separate laboratories for hydrographic and geophysical research. Two submarines can be embarked. Both ships are very active, *Sibiriyakov* in the Baltic at Kronstadt, and *Muklevitch* in the North.

SIBIRIYAKOV

5/2000 / 0105564

2 AKADEMIK KRYLOV (PROJECT 852/856) CLASS (AGORH)

LEONID DEMIN ADMIRAL VLADIMIRSKIY

Displacement, tons: 9,100 full load

Dimensions, feet (metres): 482.3 × 60.7 × 20.3 (147 × 18.5 × 6.2)

Main machinery: 4 Sulzer diesels; 14,500 hp(m) (10.7 MW); 2 shafts, bow and stern thrusters

Speed, knots: 20. Range, n miles: 36,000 at 15 kt

Complement: 120

Radars: Navigation: Nayada, Palm Frond and Don 2; I band

Helicopters: 1 Hormone

Comment: Built in Szczecin 1974–79. Carry two survey launches and have 26 laboratories. Based in the Baltic at Kronstadt. *Akademik Krylov* sold to a Greek company in 1993 and now flies the Cyprus flag. *Admiral Vladimirovsky*, previously inactive at Kronstadt, has been reactivated in the Baltic.

LEONID DEMIN

5/1994 / 0081696

7 MOMA (PROJECT 861) CLASS (AGS)

ANTARES SEVER (AGE) ANTARKTYDA MARS KRILON ANDROMEDA CHELEKEN

Displacement, tons: 1,550 full load

Dimensions, feet (metres): 240.5 × 36.8 × 12.8 (73.3 × 11.2 × 3.9)

Main machinery: 2 Zgoda-Sulzer 6TD48 diesels; 3,300 hp(m) (2.43 MW) sustained;

2 shafts; cp props

Speed, knots: 17. Range, n miles: 9,000 at 11 kt

Complement: 55

Radars: Navigation: Nayada and Don 2; I-band.

IFF: High Pole A.

Comment: Built at Northern Shipyard, Gdansk 1967–72. Some of the class are particularly active in ASW research associated operations. Four laboratories. One survey launch and a 7 ton crane. The AGE is fitted with bow probes. Two (*Krilon* and *Mars*) in the Northern Fleet, two (*Antarktyda* and *Antares*) in the Pacific, two (*Cheleken* and *Sever*) in the Black and one (*Andromeda*) in the Baltic. One transferred to Ukraine.

 Navigation: 3 Palm Front; I-band
 Helo control: Fly Screen B; I-band
 Space trackers: End Tray (balloons), Quad Leaf, 3 Quad Wedge, 4 smaller aerials.
 Tacan: 2 Round House
 Helicopters: 2-4 Ka-32 Helix C.

Comment: Completed at Admiralty Yard, Leningrad 23 February 1990. Fitted with a variety of space and missile associated electronic systems. Fitted for but not with six twin 30 mm/65 ADG guns and three Bass Tilt fire-control radars. Naval subordinated, the task is monitoring missile tests with a wartime role of command ship. The Ship Globe radome is for SATCOM. Based in the Pacific and active. Second of class defeted.

MARSHAL KRYLOV 10/1995, van Ginderen Collection / 0506249

1 PROJECT 19910 CLASS (AGS)

VAYGACH

Displacement, tons: To be announced
 Dimensions, feet (metres): 185.0 x 38.4 x 9.6 (56.4 x 11.7 x 2.94)
 Main machinery: Diesel-electric; 2 diesel generators, 2 motors; 1,475 hp (1.1 MW); 2 shafts
 Speed, knots: 12
 Complement: 20
 Radars: To be announced.

Comment: New class of hydrographic ship built by Vympel Shipyard, Rybinsk, and launched on 28 August 2006. Completed in 2007, she is based in the Baltic. Further ships are expected.

VAYGACH 9/2007, Lemachko Collection / 1305148

1 MOD SORUM (PROJECT 1454) CLASS (RESEARCH SHIP) (AGE)

TCHUSOVOY GS 31 (ex-OS 572)

Displacement, tons: 1,250 standard; 1,695 full load
 Dimensions, feet (metres): 193.9 x 41.3 x 15.1 (59.1 x 12.6 x 4.6)
 Main machinery: Diesel electric; 2 Type 5-2 DW2 diesel generators; 2,900 hp(m) (2.13 MW); 1 motor, 2,000 hp(m) (1.47 MW); 1 shaft
 Speed, knots: 14
 Range, n miles: 3,500 at 13 kt
 Complement: 60
 Radars: Navigation: 2 Don 2 or Nayada; I-band.

Comment: A variant of the Sorum class ocean tug design completed at Yaroslavl in 1987. The ship was originally built as a towed-array trials platform; the array and towing winch are contained in the aft superstructure. Based in the Northern Fleet, the ship is deployed on general research duties.

TCHUSOVOY 7/2008, / 1338045

1 ZVEZDOCHKA (PROJECT 20180) CLASS (AGE/ASR)

Name	No	Builders	Laid down	Launched	Commissioned
ZVEZDOCHKA	600	Zvezdochka Shipyard, Severodvinsk	3 Sep 2004	26 Dec 2007	2008

Displacement, tons: 5,000
 Dimensions, feet (metres): 314.9 x 7 x 7 (96.0 x 7 x 7)
 Main machinery: Diesel electric
 Speed, knots: To be announced
 Range, n miles: To be announced
 Complement: To be announced
 Radars: To be announced.

Comment: Multipurpose ship capable of conducting and supporting salvage operations, underwater research and transport of ammunition. The ship is capable of operating small submersibles and is equipped with a 150 ton crane and a forward helicopter deck.

ZVEZDOCHKA (Scale 1 : 1,200), Ian Sturton / 1353318

ZVEZDOCHKA 12/2007, Lemachko Collection / 1353294

INTELLIGENCE VESSELS

- Notes: (1) About half the AGIs are fitted with SA-N-5/8 SAM launchers.
- (2) SSV in pennant numbers of some AGIs is a contraction of *sudno svyazy* meaning communications vessel.
- (3) GS in pennant numbers of some AGIs is a contraction of *gidrograficheskoye sudno* meaning survey ship.
- (4) Activity reported in all Fleet areas, as well as in the Mediterranean, in 2008.

0 + 2 PROJECT 18280 CLASS (AGI)

Name	Builders	Laid down	Launched	Commissioned
ADMIRAL YURI IVANOV	Savernaya, St Petersburg	28 Dec 2004	2009	2010

Displacement, tons: 4,000
 Dimensions, feet (metres): 311.7 x 52.5 x 13.1 (95.0 x 16.0 x 4.0)
 Main machinery: To be announced
 Speed, knots: To be announced
 Range, n miles: To be announced
 Complement: 120
 Radars: To be announced.

Comment: A new class of AGI. The first is to be based in the Pacific Fleet and the second in the Northern Fleet

6 VISHNYA (PROJECT 864) CLASS (AGIM)

Name	No	Builders	Commissioned
TAVRIYA	SSV 169	Northern Shipyard, Gdansk	Dec 1987
VIKTOR LEONOV	SSV 175	Northern Shipyard, Gdansk	July 1988
PRIAZOVE	SSV 201	Northern Shipyard, Gdansk	Jan 1987
KURILY	SSV 208	Northern Shipyard, Gdansk	Apr 1987
VASSILY TATISCHEV (ex-Pelengator)	SSV 231	Northern Shipyard, Gdansk	Apr 1989
FEODOR GOLOVIN (ex-Meridian)	SSV 520	Northern Shipyard, Gdansk	July 1986

Displacement, tons: 3,470 full load
 Dimensions, feet (metres): 309.7 x 47.9 x 14.8 (94.4 x 14.6 x 4.5)
 Main machinery: 2 Zgoda 12AV25/30 diesels; 4,406 hp(m) (3.24 MW) sustained; 2 auxiliary electric motors; 286 hp(m) (210 kW); 2 shafts; cp props
 Speed, knots: 18
 Range, n miles: 7,000 at 14 kt
 Complement: 146
 Missiles: SAM 2 SA-N-5 Grail quad launchers; manual aiming, IR homing to 6 km (3.2 n miles) at 1.5 Mach, altitude to 2,500 m (8,000 ft); warhead 1.5 kg.
 Guns: 2-30 mm/65 AK 630, 6 barrels per mounting, 2-72 mm 4-tubed rocket launchers
 Radars: Surface search: 2 Nayada; I-band.
 Sonars: Lamb Tail VDS can be carried.

Comment: SSV 231 and 520 based in the Baltic, SSV 201 in the Black Sea, SSV 169 and SSV 175 in the Northern Fleet and SSV 208 in the Pacific. All have a full EW fit plus optronic systems and datalinks. Punch Bowl is fitted in SSV 231 and possibly in others. Some superstructure differences in all of the class. SSV 231 reported with modified mainmast in 2006. NBC pressurised citadels. Ice-strengthened hulls. All are comparatively active.

FEODOR GOLOVIN 6/2005, Lemachko Collection / 1159861

PRIAZOVE 9/2000, Lemachko Collection / 0176270

VASSILY TATISCHEV 5/2007, M Deckerck / 1170205

2 BALZAM (ASIA) (PROJECT 1826) CLASS (AGIM)

Name	No	Builders	Commissioned
PRIBALTIKA	SSV 080	Yantar, Kaliningrad	July 1984
BELOMORE	SSV 571	Yantar, Kaliningrad	Dec 1987

Displacement, tons: 4,500 full load
 Dimensions, feet (metres): 344.5 x 50.9 x 16.4 (105 x 15.5 x 5)
 Main machinery: 2 diesels; 18,000 hp(m) (13.2 MW); 2 shafts
 Speed, knots: 20
 Range, n miles: 7,000 at 16 kt
 Complement: 200
 Missiles: SAM: 2 SA-N-5 Grail quad launchers; manual aiming; IR homing to 6 km (3.2 n miles) at 1.5 Mach, altitude to 2,500 m (8,000 ft); warhead 1.5 kg; 16 missiles.
 Guns: 1-30 mm/65 AK 630; 6 barrels per mounting.
 Radars: Surface search: Palm Frond and Don Key; I-band.
 Sonars: Lamb Tail/Mouse Tail VDS can be fitted.

Comment: Notable for twin radomes. Full EW and optronic fits. The first class of AGI to be armed. SSV 571 based in the Northern fleet and SSV 080 is based in the Pacific. Capable of underway replenishment.

PRIBALTIKA 6/2006, Ships of the World / 1159979

3 MOMA (PROJECT 861M) CLASS (AGI/AGIM)

EKVATOR SSV 418	LIMAN SSV 824	KILDIN (mod) SSV 512
-----------------	---------------	----------------------

Displacement, tons: 1,240 standard; 1,600 full load
 Dimensions, feet (metres): 240.5 x 36.8 x 12.8 (73.3 x 11.2 x 3.9)
 Main machinery: 2 Zgoda-Suizer 6TD48 diesels; 3,300 hp(m) (2.43 MW) sustained; 2 shafts; cp props
 Speed, knots: 17
 Range, n miles: 9,000 at 11 kt
 Complement: 66 plus 19 scientists
 Missiles: SAM: 2 SA-N-5 Grail quad launchers in some.
 Radars: Surface search: 2 Don 2; I band

Comment: Modernised ships have a foremast in the fore well-deck and a low superstructure before the bridge. Non-modernised ships retain their cranes in the forward well-deck. Similar class operates as survey ships. Built at Gdansk, Poland between 1968-72. All based in the Black Sea. One to Ukraine in 1996.

EKVATOR AND KILDIN 10/2006*, Laursen/Jarnasen / 1353341

2 ALPINIST (PROJECT 503M/R) CLASS (AGIM)

ZHIGULEVSK GS 19	SYZRAN GS 39
------------------	--------------

Displacement, tons: 1,260 full load
 Dimensions, feet (metres): 177.1 x 34.4 x 13.1 (54 x 10.5 x 4)
 Main machinery: 1 SKL 8 NVD 48 AZU diesel, 1,320 hp(m) (970 kW) sustained; 1 shaft; bow thruster
 Speed, knots: 13
 Range, n miles: 7,000 at 13 kt
 Complement: 50
 Missiles: SAM: 1 SA-N-5 Grail quad launcher (GS 39).
 Countermeasures: ESM, 2 Watch Dog; intercept
 Radars: Surface search: Nayada and Kivach; I-band.
 Sonars: Paltus; active; high frequency.

Comment: Similar to Alpinist stern-trawlers which were built at about 10 a year at the Leninskaya Kuznitsa yard at Kiev and at the Volgograd shipyard. These AGIs were built at Kiev. In 1987 and 1988 fore-castle was extended further aft and the electronics fit upgraded. Both based in the Baltic. GS 7 probably non-operational in the Pacific. A fourth of class converted for ASW training was laid up in 1997.

ZHIGULEVSK 8/2007, Lemachko Collection / 1305144

DEEP SUBMERGENCE VEHICLES

1 BESTER CLASS RESCUE SUBMERSIBLES (PROJECT 18270) (DSRV)

AS 38

Displacement, tons: 50 dived
Dimensions, feet (metres): 57.4 x 12.8 x 16.7 (17.5 x 3.9 x 5.1)
Main machinery: Battery-powered; 1 propeller; 2 vertical thrusters; 2 horizontal thrusters
Speed, knots: 4. **Range, n miles:** 11.5 at 2.5 kt
Complement: 3 + 18 passengers

Comment: Designed by the Lazurit Central Design Bureau and built at the Krasnoye Sormovo Shipyard, Nizhny Novgorod in 1994. Can mate with hulls at angles of 45° to horizontal. Endurance 4 hours. Can be carried onboard rescue ship *Alagez* or the salvage *Mikhail Rudnitsky*. Reported diving depth of over 750 m. Has an underwater manipulation system and four viewing ports. AS 36 based in Northern Fleet.

BESTER 6/2004, S Breyer / 1127289

5 PRIZ (PROJECT 1855) CLASS (SALVAGE SUBMERSIBLES) (DSRV)

AS 22 AS 26 AS 28 AS 30 AS 34

Displacement, tons: 58 dived
Dimensions, feet (metres): 44.3 x 12.5 x 12.8 (13.5 x 3.8 x 3.9)
Speed, knots: 3.3. **Range, n miles:** 21 at 2.3 kt
Complement: 4 + 20 passengers

Comment: Designed by the Lazurit Central Design Bureau and built in Nizhny Novgorod 1986–89. Can be carried onboard rescue ship *Alagez* or from the salvage ship *Mikhail Rudnitsky*. Has titanium hull and reported diving depth of over 1,000 m. Endurance 2–3 hours submerged. Has an underwater manipulation system. One (possibly AS 32) was involved in the *Kursk* rescue attempt. AS 28 became trapped on the sea-bottom off the Kamchatka peninsula on 5 August 2005. It was later rescued with the help of the British submarine rescue system. AS 34 based in Northern Fleet. AS 28 in Pacific Fleet.

AS 34 6/2008*, Richard Scott / 1336057

3 UNDERWATER WORKING VEHICLES (PROJECT 1839)

AS 25 +2

Displacement, tons: 47 dived
Dimensions, feet (metres): 44.6 x 11.5 x 9.5 (13.6 x 3.5 x 2.9)
Speed, knots: 3.5
Complement: 3

Comment: Entered naval service from 1984. Designed to perform underwater technical work and to assist in submarine rescue operations in depths up to 500 m. Double-hulled

AS 25 6/2008*, Richard Scott / 1336054

4 SALVAGE SUBMERSIBLES (PROJECT 1837) (DSRV)

Displacement, tons: 45 dived
Dimensions, feet (metres): 41.7 x 11.5 x 10.7 (12.7 x 3.5 x 3.25)
Speed, knots: 3.6. **Range, n miles:** 16 at 2 kt
Complement: 3 + 11 passengers

Comment: Designed and built by Sudomekh, St Petersburg. Can be carried onboard Kashtan class SS 750 rescue ship and Elbrus class *Alagez*. Has double hull and diving depth of 500 m. Equipped with an underwater manipulation system. Twelve reported to have been built of which some were reported to have been decommissioned in the 1990s. Operational numbers are approximate.

1 RUS (PROJECT 16810) CLASS (RESEARCH SUBMERSIBLE)

AS 37

Displacement, tons: 25 dived
Dimensions, feet (metres): 28.2 x 12.8 x 12.6 (8.0 x 3.9 x 3.85)
Speed, knots: 3
Complement: 3

Comment: Entered naval service in 2000. Designed to perform research and technical underwater work at up to 6,000 m. Titanium spherical hull. Three horizontal propulsion motors, two vertical propulsion motors and one thruster. Based in Baltic fleet.

2 POISK-2 (PROJECT 1832) CLASS (RESEARCH SUBMERSIBLES)

Displacement, tons: 65 dived
Dimensions, feet (metres): 63.5 x 8.2 x 10.8 (19.3 x 2.5 x 3.3)
Speed, knots: 3
Complement: 3

Comment: Entered naval service in 1988 and 1989. Designed to perform research and technical underwater work at up to 2,000 m.

TRAINING SHIPS

Notes: The Mir class sail training ships have no military connections.

2 SMOLNY (PROJECT 887) CLASS

PEREKOP 200 SMOLNY 210

Displacement, tons: 9,160 full load
Dimensions, feet (metres): 452.8 x 53.1 x 21.3 (138 x 16.2 x 6.5)
Main machinery: 2 Zgoda Sulzer 12ZV 40/48 diesels; 15,000 hp(m) (11 MW); 2 shafts
Speed, knots: 20. **Range, n miles:** 9,000 at 15 kt
Complement: 137 (12 officers) plus 330 cadets
Guns: 4–3 in (76 mm)/60 (2 twin), 4–30 mm/65 (2 twin)
A/S mortars: 2 RBU 2500
Countermeasures: ES: 2 Watch Dog; radar warning
Radars: Air/surface search: Head Net C; 3D; E-band; range 128 km (70 n miles).
Navigation: 4 Don 2; I-band, Don Kay (*Perekop*); I-band.
Fire control: Owl Screech, G-band, Drum Tilt; H/I-band.
IFF: 2 High Pole A, Square Head
Sonars: Mouse Tail VDS, active, high frequency

Comment: Built at Szczecin, Poland. *Smolny* completed in 1976, *Perekop* in 1977. Have considerable combatant potential. Both are active in the Baltic.

PEREKOP 6/2007, Selim San / 1170204

10 PETRUSHKA (UK-3) CLASS (AXL)

MK 391 MK 1277 MK 1407–1411
 MK 408 MK 1303 MK 1556

Displacement, tons: 335 full load
Dimensions, feet (metres): 129.3 x 27.6 x 7.2 (39.4 x 8.4 x 2.2)
Main machinery: 2 Wola H12 diesels, 756 hp(m) (556 kW); 2 shafts
Speed, knots: 11. **Range, n miles:** 1,000 at 11 kt
Complement: 13 plus 30 cadets

Comment: Training vessels built at Wisla Shipyard, Poland; first one commissioned in 1989. Very similar to the SK 620 class used as ambulance craft. Used for seamanship and navigation training and may be commercially owned.

PETRUSHKA CLASS 6/2003, E & M Laursen / 0570909

AUXILIARIES

Notes: Two Belyanka-class tankers *Amur* and *Pinega* are used for stowing low level radioactive waste

2 AMGA (PROJECT 1791) CLASS
(MISSILE SUPPORT SHIPS) (AEM)

VETLUGA DAUGAVA

Displacement, tons: 6,100 (*Vetluga*), 6,350 (*Daugava*) full load
Dimensions, feet (metres): 354.3 × 69 × 14.8 (108 × 18 × 4.5) (*Vetluga*)
Main machinery: 2 diesels; 9,000 hp(m) (6.6 MW); 2 shafts
Speed, knots: 16
Range, n miles: 4,500 at 14 kt
Complement: 210
Guns: 4–25 mm/80 (2 twin)
Radars: Surface search: Strut Curve; F-band
Navigation: Don 2; I-band
IFF: High Pole B.

Comment: Built at Gorkiy Ships with similar duties to the Lama class. Fitted with a large 55 ton crane forward and thus capable of handling much larger missiles than their predecessors. Each ship has a different length and type of crane to handle later types of missiles. Designed for servicing submarines. *Vetluga* completed in 1976 and *Daugava* (5m longer than *Vetluga*) in 1981. Both are in the Pacific Fleet. A third of class is laid up in the North

DAUGAVA

3/2003, Lemachko Collection / 0573518

13 AMUR (PROJECT 304/304M) CLASS (REPAIR SHIPS) (AR)

AMUR I
PM 10 PM 15 PM 30 PM 56 PM 64 PM 82 PM 138 PM 140 PM 156
AMUR II
PM 59 PM 69 PM 86 PM 97

Displacement, tons: 5,500 full load
Dimensions, feet (metres): 400.3 × 55.8 × 16.7 (122 × 17 × 5.1)
Main machinery: 1 Zgoda 8 TAD-48 diesel; 3,000 hp(m) (2.2 MW); 1 shaft
Speed, knots: 12
Range, n miles: 13,000 at 8 kt
Complement: 145
Radars: Navigation: Kivach or Palm Frond or Nayada; I-band.

Comment: Amur I class general purpose depot and repair ships completed 1968–83 in Szczecin, Poland. Successors to the Oskol class. Carry two 5 ton cranes and have accommodation for 200 from ships alongside. Amur II class has extra deckhouse forward of the funnel. Built at Szczecin 1983–85. Three Amur IIs are based in the Pacific and one in the North. Three are laid up in the Baltic. PM 9 transferred to Ukraine

AMUR II PM 86

9/2000, J Cislak / 0105571

AMUR I PM 138

3/2002, Globke Collection / 0528330

1 MALINA (PROJECT 2020) CLASS
(NUCLEAR SUBMARINE SUPPORT SHIP) (AS)

PM 63

Displacement, tons: 10,500 full load
Dimensions, feet (metres): 449.5 × 69.9 × 18.4 (137 × 21 × 5.6)
Main machinery: 4 gas turbines; 60,000 hp(m) (44 MW); 2 shafts
Speed, knots: 17
Complement: 260
Radars: Navigation: 2 Palm Frond or 2 Nayada; I-band

Comment: Built at Nikolayev. First deployed to Pacific in 1986. PM is an abbreviation of *Plavuchaya Mestorskaya* (Floating workshop). A fourth of class (PM 16) launched early in 1992, was not completed. Designed to support nuclear-powered submarines and surface ships. Carry two 15 ton cranes. Based in the Northern Fleet. PM 12 and PM 74 are inactive

PM 74

7/1996 / 0081704

2 VYTEGRALES II (PROJECT 596P) CLASS
(SUPPLY SHIPS) (AKH/AGF)

APSHERON (ex-*Vagales*) 204 DAURIYA (ex-*Vyborgles*) 506

Displacement, tons: 6,150 full load
Dimensions, feet (metres): 400.3 × 55.1 × 22.3 (122.1 × 16.8 × 6.8)
Main machinery: 1 Burmeister & Wain 950VTBF diesel; 5,200 hp(m) (3.82 MW); 1 shaft
Speed, knots: 15
Complement: 48
Radars: Navigation: Nayada or Palm Frond or Spin Trough; I-band.
CCA. Fly Screen.
Helicopters: 1 Ka-25 Hormone C.

Comment: Standard timber carriers of a class of 27. These ships were modified for naval use in 1966–68 with helicopter flight deck. Built at Zhdanov Yard, Leningrad between 1963 and 1966. *Dauriya* has a deckhouse over the aft hold. The first of class, completed in 1962, was originally *Vytorales*, but this was later changed to *Kosmonaut Pavel Belyayev* and, with three other ships of this class, converted to Space Support Ships. The civilian-manned ships together with these naval ships are often incorrectly called Vostok or Beskunchak class. *Apsheron* and *Dauriya* are in the Black Sea, *Sevan* and *Yamal* have been decommissioned. Two others transferred to Ukraine in 1996.

DAURIYA

7/2000, Hartmut Ehlers / 0105572

30 BOLVA (PROJECT 688/688A) CLASS
(BARRACKS SHIPS) (YPB)

Displacement, tons: 6,500
Dimensions, feet (metres): 560.9 × 45.9 × 9.8 (171 × 14 × 3)
Cargo capacity: 350–400 tons

Comment: A total of 59 built by Valmet Oy, Helsinki between 1960 and 1984. Of the remaining 30 ships, six are Bolva 1, 16 are Bolva 2 and eight are Bolva 3. Used for accommodation of ships' companies during refit and so on. The Bolva 2 and 3 have a helicopter pad. Have accommodation facilities for about 400 people. No means of propulsion but can be steered. In addition there are several other types of Barracks Ships including five ex-*Atrek* class depot ships as well as converted merchant ships and large barges. At least 18 have been scrapped

IMATRA (at Sevastopol)

3/2002, Hartmut Ehlers / 0529613

5 BORIS CHILIKIN (PROJECT 1559V) CLASS (REPLENISHMENT SHIPS) (AOR)

BORIS BUTOMA **SEGEI OSIPOV (ex-Dnestr)** **GENRICH GASANOV**
IVAN BUBNOV **VLADIMIR KOLECHITSKY**

Displacement, tons: 23,450 full load
Dimensions, feet (metres): 531.5 × 70.2 × 33.8 (162.1 × 21.4 × 10.3)
Main machinery: 1 diesel; 9,600 hp(m) (7 MW); 1 shaft
Speed, knots: 17
Range, n miles: 10,000 at 16 kt
Complement: 75 (without armament)
Cargo capacity: 13,000 tons oil fuel and dieso; 400 tons ammunition; 400 tons spares; 400 tons victualling stores, 500 tons fresh water

Guns: 4–57 mm/80 (2 twin). Most are fitted for but not with the guns.
Radars: Air/surface search/fire control Strut Curve (fitted for but not with). Muff Cob (fitted for but not with)
Navigation: 2 Nayada or Palm Frond (plus Don 2 in V *Kolechitsky*), I-band.
IFF: High Pole B.

Programmes: Based on the Veliky Oktyabr merchant ship tanker design. Built at the Baltic Yard, Leningrad; *Vladimir Kolechitsky* completed in 1972, *Osipov* in 1973, *Ivan Bubnov* in 1975, *Genrich Gasanov* in 1977. Last of class *Boris Butoma* completed in 1978.

Structure: This is the only class of purpose-built underway fleet replenishment ships for the supply of both liquids and solids. Although most operate in merchant navy paint schemes, all wear naval ensigns.

Operational: Earlier ships can supply solids on both sides forward. Later ships supply solids to starboard, liquids to port forward. All can supply liquids either side aft and astern. *Osipov* and *Gasanov* are based in the North, *Bubnov* in the Black Sea, *Butoma* and *Kolechitsky* in the Pacific. Most are used for commercial purposes. *Boris Chilikin* transferred to Ukraine in 1997.

SERGEI OSIPOV

VLADIMIR KOLECHITSKY

3/2001, *Ships of the World* / 0126351

2 DUBNA CLASS (REPLENISHMENT TANKERS) (AOL/AOT)

DUBNA **PECHENGA**

Displacement, tons: 11,500 full load
Dimensions, feet (metres): 426.4 × 65.6 × 23.6 (130 - 20 × 7.2)
Main machinery: 1 Russkiy 8DRPH23/230 diesel, 6,000 hp(m) (4.4 MW); 1 shaft
Speed, knots: 16
Range, n miles: 7,000 at 16 kt
Complement: 70
Cargo capacity: 7,000 tons fuel, 300 tons fresh water; 1,500 tons stores
Radars: Navigation: 2 Nayada; I-band.

Programmes: Completed 1974 at Rauma-Repola, Finland.

Structure: *Dubna* has 1 ton replenishment stations forward. Normally painted in merchant navy colours.

Operational: *Dubna* can refuel on either beam and astern. *Pechenga* has had RAS gear removed. Based in North. One of the class transferred to Ukraine in 1997. *Irkut* is believed to have been sold commercially in 1999.

DUBNA

7/1996, *van Ginderen Collection* / 0019061

PECHENGA

6 MOD ALTAI CLASS (PROJECT 160) (REPLENISHMENT TANKERS) (AOL)

PRUT **KOLA** **YELNYA** **IZHORA** **ILIM** **YEGORLIK**

Displacement, tons: 7,250 full load
Dimensions, feet (metres): 348 × 51 × 22 (106.2 × 15.5 × 6.7)
Main machinery: 1 Burmeister & Wain 8M550VTBN110 diesel, 3,200 hp(m) (2.35 MW); 1 shaft
Speed, knots: 14. **Range, n miles:** 8,600 at 12 kt
Complement: 60
Cargo capacity: 4,400 tons oil fuel, 200 m³ solids
Radars: Navigation: 2 Don 2 or 2 Spin Trough; I-band.

Comment: Built from 1967–72 by Rauma-Repola, Finland. Modified for alongside replenishment. This class is part of 38 ships, being the third group of Rauma types built in Finland in 1967. *Ilim* and *Yegorlik* transferred to civilian companies in 1996/97 and operate in the Pacific with *Izhora*. *Prut* in the North, *Yelnya* and *Kola* in the Baltic.

KOLA

1/1997, *van Ginderen Collection* / 0019067

2 OLEKMA CLASS (PROJECT 92) (REPLENISHMENT TANKERS) (AORL)

OLEKMA **IMAN**

Displacement, tons: 7,300 full load
Dimensions, feet (metres): 344.5 × 47.9 × 22 (105.1 × 14.6 × 6.7)
Main machinery: 1 Burmeister & Wain diesel; 2,900 hp(m) (2.13 MW); 1 shaft
Speed, knots: 14. **Range, n miles:** 8,000 at 14 kt
Complement: 40
Cargo capacity: 4,500 tons oil fuel; 180 m³ solids
Radars: Navigation: Don 2 or Nayada and Spin Trough; I-band.

Comment: Built by Rauma-Repola, Finland in 1966. Modified for replenishment with refuelling rig abaft the bridge as well as astern refuelling. *Olekma* based in the Baltic and *Iman* in the Black Sea.

IMAN

6/2006 / 1164801

5 UDA CLASS (PROJECT 577D) (REPLENISHMENT TANKERS) (AOL)

LENA **TEREK** **VISHERA** **KOYDA** **DUNAY**

Displacement, tons: 5,500 standard; 7,126 full load
Dimensions, feet (metres): 400.3 × 51.8 × 20.3 (122.1 × 15.8 × 6.2)
Main machinery: 2 diesels; 9,000 hp(m) (6.6 MW); 2 shafts
Speed, knots: 17
Range, n miles: 4,000 at 15 kt
Complement: 85
Cargo capacity: 2,900 tons oil fuel, 100 m³ solids
Radars: Navigation: 2 Don 2 or Nayada/Palm Frond; I-band.
IFF: High Pole A.

Comment: Built between 1962 and 1967 at Vyborg Shipyard. All have a beam replenishment capability. Guns removed. *Vishera* and *Dunay* in the Pacific, *Terek* in the Northern Fleet, *Koyda* in the Black Sea and *Lena* in the Baltic.

LENA

8/2004 / 1042375

692 Russian Federation/Auxiliaries

2 MANYCH (PROJECT 1549) CLASS (WATER TANKERS) (AWT)

MANYCH TAGIL

Displacement, tons: 7,700 full load
Dimensions, feet (metres): 380.5 × 51.6 × 23.0 (116.0 × 16.7 × 7.6)
Main machinery: 2 diesels, 9,000 hp (6.6 MW); 2 shafts
Speed, knots: 18
Range, n miles: 7,500 at 16 kt
Complement: 90
Cargo capacity: 4,400 tons
Radars: Air/surface search: Strut Curve; E/F-band.
Navigation: Don Kay; I-band.

Comment: Distilled water carrier built at Vyborg and completed in 1972. Decommissioned and disarmed in 1996 but returned to service in 1998 after refit in Bulgaria. *Manych* based in the Black Sea

MANYCH 10/2008*, Laursen/Jarnasen / 1353348

1 KALININGRADNEFT CLASS (SUPPORT TANKER) (AORL)

VYAZMA (ex-Katun)

Displacement, tons: 8,600 full load
Dimensions, feet (metres): 380.5 × 58 × 21 (116 × 17 × 6.5)
Main machinery: 1 Russkiy Burmeister & Wain 5DKRP50/110-2 diesel; 3,850 hp (2.83 MW); 1 shaft
Speed, knots: 14
Range, n miles: 5,000 at 14 kt
Complement: 32
Cargo capacity: 5,400 tons oil fuel and other liquids
Radars: Navigation: Okean; I-band.

Comment: Built by Rauma-Repola, Finland in 1982. Can refuel astern. At least an additional 20 of this class operate with the fishing fleets. Operational in the Northern Fleet.

KALININGRADNEFT CLASS 11/1991, G Jacobs / 0506192

30 TOPLIVO CLASS (PROJECT 1844/1844D) CLASS (YO)

VTN series

Displacement, tons: 1,180 full load
Dimensions, feet (metres): 178.1 × 24.3 × 10.5 (54.3 × 7.4 × 3.2)
Main machinery: 1 diesel, 800 hp (450 kW); 1 shaft
Speed, knots: 10
Range, n miles: 1,500 at 10 kt
Complement: 20
Radars: Navigation: Don-2; I-band.

Comment: Details given are for the Toplivo-2 class, some of which were built in Egypt but the majority in the USSR. The Toplivo-3 class, built in the USSR, are slightly larger at 1,300 tons full load. Numbers remaining in service are approximate. All the original Toplivo-1 class are believed to have been decommissioned.

VTN 30 7/2008*, Hartmut Ehlers / 1353290

5 KHOBI CLASS (PROJECT 437M) CLASS (YO)

LOVAT SISOLA SOSHA ORSHA INDIGA (ex-Seyma)

Displacement, tons: 1,520 full load
Dimensions, feet (metres): 221.1 × 33.1 × 11.8 (674 × 10.1 × 3.6)
Main machinery: 1 diesel; 1,600 hp (1.2 MW); 2 shafts
Speed, knots: 13
Range, n miles: 2,000 at 10 kt
Complement: 30
Radars: Navigation: Don-2; I-band.

Comment: *Sisola* based in the North. *Sosha, Lovat* and *Orsha* in the Baltic and *Indiga* in the Black Sea. Used for the transport of all forms of liquids.

LOVAT 7/2008*, Hartmut Ehlers / 1353289

3 OB (PROJECT 320) CLASS (HOSPITAL SHIPS) (AHH)

YENISEI SVIR IRTYSH

Displacement, tons: 11,570 full load
Dimensions, feet (metres): 499.7 × 63.6 × 20.5 (1523 × 19.4 × 6.3)
Main machinery: 2 Zgoda-Sulzer 12ZV40/48, 15,600 hp (11.47 MW) sustained; 2 shafts; cp props
Speed, knots: 19
Range, n miles: 10,000 at 18 kt
Complement: 124 plus 83 medical staff
Radars: Navigation: 3 Don 2 or 3 Nayada; 1 band.
IFF: High Pole A.
Helicopters: 1 Ka-25 Hormona C.

Comment: Built at Szczecin, Poland. *Yenisei* completed 1981 and is based in the Black Sea. *Svir* completed in early 1989 and transferred to the Northern Fleet in September 1989. *Irtys* completed in June 1990, was stationed in the Gulf in 1990-91 and is now based in the Pacific. A fourth of class is derelict and a fifth was cancelled. Have 100 beds and seven operating theatres. The first purpose-built hospital ships in the Navy, a programme which may have been prompted by the use of several merchant ships off Angola for Cuban casualties in the 'war of liberation.' NBC pressurised citadel. Ship stabilisation system. Decompression chamber. All are in use, mostly as alongside medical facilities.

YENISEI 10/2008*, Laursen/Jarnasen / 1353351

3 KLASMA (PROJECT 1274) CLASS (CABLE SHIPS) (ARC)

DONETS INGURI YANA

Displacement, tons: 6,000 standard, 6,900 full load
Measurement, tons: 3,400 dwt; 5,786 gross
Dimensions, feet (metres): 427.8 × 52.5 × 19 (130.5 × 16 × 5.8)
Main machinery: Diesel-electric; 5 Wärtsilä Sulzer 624TS diesel generators (4 in *Inguri* and *Yana*, 5,000 hp (3.68 MW); 2 motors; 2,150 hp (1.58 MW); 2 shafts
Speed, knots: 14
Range, n miles: 12,000 at 14 kt
Complement: 118
Radars: Navigation: Spin Trough and Nayada; I-band.

Comment: *Yana* built by Wärtsilä, Helsingforsvarvet, Finland in 1962; *Donets* at the Wärtsilä, Åbovarvet in 1968-69. *Donets* is of a slightly modified design. *Inguri* completed in 1978. All are ice strengthened and can carry 1,650 miles of cable. *Yana* is distinguished by gantry right aft. *Donets* is in the Baltic, and the other two are in the North. All are active and can be leased for commercial use. One to Ukraine in 1997.

KLASMA 3/1992 / 0081709

4 EMBA (PROJECT 1172/1175) CLASS (CABLE SHIPS) (ARC)

SETUN (I) NEPRYADAVA (II) KEM (II) BIRIUSA (II)

Displacement, tons: 2,050 full load (Group I); 2,400 (Group II)
Dimensions, feet (metres): 249 x 41.3 x 9.8 (75.9 x 12.6 x 3) (Group I)
 282.4 x 41.3 x 9.9 (86.1 x 12.6 x 3) (Group II)
Main machinery: Diesel-electric; 2 Wärtsilä Vasa 6R22 diesel alternators; 2,350 kVA 60 Hz; 2 motors; 1,360 hp(m) (1 MW); 2 shafts (Group I)
 2 Wärtsilä Vasa 8R22 diesel alternators, 3,090 kVA 60 Hz; 2 motors; 2,180 hp(m) (1.6 MW); 2 shafts (Group II)
 The 2 turnable propulsion units can be inclined to the ship's path giving, with a bow thruster, improved turning movement
Speed, knots: 11
Complement: 40
Radars: Navigation: Kivsch and Don 2; I-band

Comment: Both Emba Is built in 1981. Designed for shallow water cable-laying. Carry 380 tons of cable. Order placed with Wärtsilä in January 1985 for two larger (Group II) ships; Kem completed on 23 October 1986. Can lay about 600 tons of cable. Designed for use off Vladivostok but also capable of operations in inland waterways. Setun is based in the Black Sea, Nepryadava in the Baltic, and Kem and Biriusa are in the Pacific. Both of the latter two were active in 2005

SETUN 6/2003, Lemachka Collection / 0573515

4 MIKHAIL RUDNITSKY (PROJECT 05360/1) CLASS (SALVAGE AND MOORING VESSELS) (ARS)

MIKHAIL RUDNITSKY GEORGY KOZMIN GEORGY TITOV SAYANY

Displacement, tons: 10,700 full load
Dimensions, feet (metres): 427.4 x 58.7 x 23.9 (130.3 x 17.3 x 7.3)
Main machinery: 1 S5DKRN62/140-3 diesel; 6,100 hp(m) (4.48 MW); 1 shaft
Speed, knots: 16
Range, n miles: 12,000 at 15.5 kt
Complement: 72 (10 officers)
Radars: Navigation: Palm Frond; Nayada, I-band.
Sonars: MG 89 (Sayany).

Comment: Built at Vyborg, based on Moskva Pioneer class merchant ship hull. First completed 1979, second in 1980, third in 1983 and fourth in 1984. Fly flag of Salvage and Rescue Service. Have two 40 ton and one 20 ton lift with cable fairleads forward and aft. This lift capability is adequate for handling small submersibles, such as Project 1855 Priz, one of which is carried in the centre hold. Sayany is also described as a research ship and has a high-frequency sonar. Rudnitsky and Titov in the Northern Fleet and the other two in the Pacific.

GEORGY TITOV 6/2008, Richard Scott / 1353357

8 KASHTAN (PROJECT 141) CLASS (BUOY TENDERS) (ABU/AGL/ARS)

ALEXANDR PUSHKIN (ex-KIL 926) KIL 498 SS 750 (ex-KIL 140)
 KIL 143 KIL 927 KIL 168
 KIL 164 KIL 158

Displacement, tons: 4,600 full load
Dimensions, feet (metres): 313.3 x 56.4 x 16.4 (95.5 x 17.2 x 5)
Main machinery: 4 Wärtsilä diesels; 29,000 hp(m) (2.31 MW); 2 shafts
Speed, knots: 13.5
Complement: 51 plus 20 spare berths
Radars: Navigation: 2 Nayada; I-band.

Comment: Enlarged Sura class built at the Neptun Shipyard, Rostock. Ordered 29 August 1986; Alexandr Pushkin handed over in June 1988 and is classified as an AGL in the Baltic; 927 to the Pacific in July 1989; 143 to the North in July 1989; 158 to the Black Sea in November 1989; 164 to the North in January 1990, 498 to the Pacific in November 1990 and 168 to the Pacific in mid-1991. Lifting capacity: one 130 ton lifting frame, one 100 ton derrick, one 12.5 ton crane and one 10 ton derrick. All are civilian operated except SS 750 in the Baltic which is used to support Project 1837 submersibles AS 22 and AS 26. 158 deployed to Tartous for several months in late 2002.

KIL 158 10/2008, Laurssen/Jarnesen / 1353353

KIL 168 6/2007, Ships of the World / 1306151

4 SURA (PROJECT 145) CLASS (BUOY TENDERS) (ABU)

KIL 22 KIL 27 KIL 29 KIL 31

Displacement, tons: 2,370 standard; 3,150 full load
Dimensions, feet (metres): 285.4 x 48.6 x 16.4 (87 x 14.8 x 5)
Main machinery: Diesel-electric, 4 diesel generators; 2 motors; 2,240 hp(m) (1.65 MW); 2 shafts
Speed, knots: 12 **Range, n miles:** 2,000 at 11 kt
Complement: 40
Cargo capacity: 900 tons cargo, 300 tons fuel for transfer
Radars: Navigation: 2 Don 2; I-band.

Comment: Heavy lift ships built as mooring and buoy tenders at Rostock in East Germany between 1965 and 1976. Lifting capacity: one 65 ton derrick and one 65 ton stern cage. Have been seen to carry 12 m DSRVs. KIL 27 is in the Pacific, KIL 29 in the Baltic and KIL 22 and KIL 31 in the North. Four others are laid up. One to Ukraine in 1997.

KIL 31 4/1996, van Ginderen Collection / 0506326

1 ELBRUS (OSIMOL) (PROJECT 537) CLASS (SUBMARINE RESCUE SHIP) (ASRH)

ALAGEZ

Displacement, tons: 19,000 standard, 22,500 full load
Dimensions, feet (metres): 575.8 x 80.4 x 27.9 (175.5 x 24.5 x 8.5)
Main machinery: Diesel-electric; 4 diesel generators; 2 motors, 20,000 hp(m) (14.7 MW); 2 shafts
Speed, knots: 17 **Range, n miles:** 14,500 at 15 kt
Complement: 420
Radars: Navigation, 2 Nayada and 2 Palm Frond; I-band.
Helicopters: 1 Ka-25 Hormone C.

Comment: Very large submarine rescue and salvage ship with icebreaking capability, possibly in view of under-ice capability of some SSBNs. Built at Nikolayev, and completed in 1982. Can carry two submersibles in store abaft the funnel which are launched from telescopic gantries. Based in the Pacific. Probably disarmed

ALAGEZ 6/2004, Ships of the World / 0583298

24 SHELON I/II (PROJECT 1388/1388M) CLASS (YPT/YAG)

TL and KRKH series

Displacement, tons: 270 full load
Dimensions, feet (metres): 150.9 x 19.7 x 6.6 (46 x 6 x 2)
Main machinery: 2 diesels; 8,976 hp(m) (6.6 MW); 2 shafts
Speed, knots: 26
Range, n miles: 1,500 at 10 kt
Complement: 14
Radars: Navigation: Spin Trough or Kivach; I-band.

Comment: Type I built 1978-84. Built-in weapon recovery ramp aft. Type II built 1985-87. Type IIs can be used as environmental monitoring ships. One is an Admirals' yacht in the Baltic, and others are used as personnel transports.

KRKH 1688 9/2008*, Frank Findler / 1353308

TL 1603 7/2008*, Hartmut Ehlers / 1353291

48 FLAMINGO (TANYA) (PROJECT 1415) CLASS (TENDERS) (YDT)

Displacement, tons: 42 full load
Dimensions, feet (metres): 72.8 x 12.8 x 4.6 (22.2 x 3.9 x 1.4)
Main machinery: 1 Type 3-D-12 diesel, 300 hp(m) (220 kW) sustained; 1 shaft
Speed, knots: 12
Complement: 8

Comment: Successor to Nyryat II. There are some 28 with RVK numbers (diving tenders). There are also about 20 (PSKA numbers) assigned to the Border Guard for harbour patrol duties. These are known as the Kulik class. Other craft have BSK, RK (workboats) PRDKA (counterswimmer cutter) and BGK (inshore survey) numbers.

RVK 1579 7/2008*, Hartmut Ehlers / 1353307

35 POLUCHAT I, II AND III CLASSES (PROJECT 364) (YPT)

TL series

Displacement, tons: 70 standard; 100 full load
Dimensions, feet (metres): 97.1 x 19 x 4.8 (29.6 x 5.8 x 1.5)
Main machinery: 2 M 60 diesels; 2,200 hp(m) (1.6 MW) sustained; 2 shafts
Speed, knots: 20
Range, n miles: 1,500 at 10 kt
Complement: 15
Guns: 2 - 14.5 mm (twin) MGs (in some)
Radars: Spin Trough; I-band

Comment: Employed as specialised or dual-purpose torpedo recovery vessels and/or patrol boats. They have a stern slipway. Several exported as patrol craft. Some used by the Border Guard.

Transfers: Algeria, Angola, Congo (three), Ethiopia (one), Guinea-Bissau, India, Indonesia (three), Iraq (two), Mozambique, Somalia (six), Syria, Tanzania, Vietnam (five), North Yemen (two), South Yemen.

POLUCHAT I 11/1991, MoD Bonn / 0081713

20 NYRYAT 2 (PROJECT 522) CLASS (DIVING TENDERS) (YDT)

RVK Series

Displacement, tons: 56 full load
Dimensions, feet (metres): 70.5 x 11.5 x 3.3 (21.5 x 3.5 x 1)
Main machinery: 1 Type 3-D-12 diesel, 300 hp(m) (220 kW) sustained; 1 shaft
Speed, knots: 12
Complement: 8
Guns: Some carry 1 - 12.7 mm MG on the forecastle.

Comment: Nyryat 2 are the diving tender variants of the 1950s PO 2 class workboat design widely used for both military and civilian use.

Transfers: Albania, Bulgaria, Cuba, Guinea, Iraq. Many deleted.

RVK 860 7/2006, Lemachko Collection / 1159850

30 NYRYAT I (PROJECT 1896) CLASS (TENDERS) (YDT)

Displacement, tons: 120 full load
Dimensions, feet (metres): 93 x 18 x 5.5 (28.4 x 5.5 x 1.7)
Main machinery: 1 diesel, 450 hp(m) (331 kW); 1 shaft
Speed, knots: 12.5. **Range, n miles:** 1,500 at 10 kt
Complement: 15
Guns: 1 - 12.7 mm MG (in some).

Comment: Built from 1955. Can operate as patrol craft or diving tender with recompression chamber. Similar hull and propulsion used for inshore survey craft. Some have BGK, VM or GBP (survey craft) numbers.

Transfers: Albania, Algeria, Cuba, Egypt, Iraq, North Yemen. Many deleted.

NYRYAT I 10/2008*, Laursen/Jarnesen / 1353354

VM 596 +2

Displacement, tons: 330 full load
 Dimensions, feet (metres): 121.7 x 25.3 x 8.2 (37.1 x 7.7 x 2.5)
 Main machinery: 2 diesels, 525 hp (385 kW); 2 shafts
 Speed, knots: 12.5
 Complement: 29

Comment: A new class of diving vessel designed by Almaz Central Design Bureau and built at Vympel Shipyard, Rybinsk. Construction started in the early 1990s but the building programme was suspended until new funds were assigned in 2002. The ship is designed to support diving and salvage operations down to a depth of 60 m and is equipped with the Falcon remote-controlled underwater equipment, which can work at depths up to 300 m. It also carries hydrological instruments and welding equipment for deep-sea work, a satellite television system and a barochamber. The lead vessel was commissioned in the Northern Fleet on 28 November 2004 and is based at Severomorsk. Two further units may also have been built.

10/2008*, Laursen/Jarnesen / 1353357

0 + 1 (1) IGOR BELOUSOV (PROJECT 23100) CLASS (SUBMARINE RESCUE SHIP) (ASRH)

Name	Builders	Launched	Commissioned
IGOR BELOUSOV	Admiralty Shipyard, St Petersburg	24 Dec 2005	2009

Displacement, tons: 5,300
Dimensions, feet (metres): 351.7 × 56.4 × 26.6 (107.2 × 17.2 × 8.1)
Main machinery: To be announced
Speed, knots: 15. **Range, n miles:** 3,000 at 12 kt
Complement: To be announced
Guns: To be announced
Radars: To be announced
Helicopters: To be announced.

Comment: Developed by the Almaz Central Marine Design Bureau. Initially, it is expected that two ships are to be built, one each for the Northern and Pacific fleets. The first of class is named after a former minister of shipbuilding of the USSR. A further two ships may be built in order to equip all four fleets. In addition to its principal submarine rescue role, it is likely to have a secondary role as a research ship. Equipment is likely to include a submergence vehicle capable of operation at a depth of down to 700 m, special-purpose deep diver equipment, and a helicopter. In addition, the ship is to be capable of deploying the British Seavey Panther Plus Remotely Operated Vehicle (ROV). The ROV is to be fitted with sonar, an acoustic tracking system, a suite of cameras to provide rescue planners with underwater pictures of the submarine on the seabed and various cutters and manipulators. The ROV is also capable of inserting emergency life support stores into a distressed submarine and of connecting hoses and lines to a submarine's salvage connections.

IGOR BELOUSOV

(Scale 1 : 1,200), Ian Sturton / 1353319

1 NEPA (PROJECT 530) CLASS (SUBMARINE RESCUE SHIP) (ASR)**KARPATY**

Displacement, tons: 9,800 full load
Dimensions, feet (metres): 424.9 × 63.0 × 21.0 (129.5 × 19.2 × 6.4)
Main machinery: Diesel-electric; 4 diesel generators; 2 motors; 8,000 hp(m) (5.88 MW); 2 shafts
Speed, knots: 16
Range, n miles: 8,000 at 14 kt
Complement: 270
Radars: Navigation: I-band.

Comment: Built at Nikolayev Shipyard and originally commissioned on 29 March 1967. Submarine rescue and salvage ship with a high stern which extends over the water to facilitate rescue operations. Equipped with two 750-ton lifts which can work in tandem. Also fitted with a 100-ton lift, one 60-ton derrick and two 10-ton derricks. Can carry rescue bells, two submersibles and decompression chambers. Based in the Baltic at Kronshadt and although previously reported decommissioned, appeared to be undergoing a refit during 2007.

1 LAMA (TYPE 323/323B) CLASS (MISSILE SUPPORT SHIP) (AEM)**GENERAL RYABIKOV**

Displacement, tons: 4,800 full load
Dimensions, feet (metres): 370 × 49.2 × 14.4 (112.8 × 15 × 4.4)
Main machinery: 2 diesels; 4,800 hp(m) (3 MW); 2 shafts
Speed, knots: 14
Range, n miles: 6,000 at 10 kt
Complement: 200
Missiles: SAM: 4 SA-N-5 Grail quad launchers
Guns: 4–25 mm/80
Radars: Surface search: Strut Curve; F band
Navigation: Don 2; I-band.
IFF: 2 Square Head. High Pole A.

Comment: Built 1968 at Nikolayev. The engines are sited aft to allow for a very large and high hangar or hold amidships for carrying missiles or weapons' spares for submarines, surface ships and missile craft. This is about 12 ft high above the main deck. There are doors at the forward end with rails leading in and a raised turntable gantry or 20 ton travelling cranes for armament supply. The well-deck is about 40 ft long, enough for most missiles to fit horizontally before being lifted for loading. Type name is *plavuchaya masterskaya* meaning floating workshop. Based in the Black Sea and used as a troopship during Black Sea operations in 2008. Voronezh has been renamed VTR 33 and is an alongside civilian-manned support ship.

GENERAL RYABIKOV

10/2008*, Laursen/Jarnesen / 1353348

1 MUNA (TYPE 1823) CLASS (AEL)**VTR 94**

Displacement, tons: 690 full load
Dimensions, feet (metres): 165 × 26.8 × 8.5 (50.3 × 8.2 × 2.9)
Main machinery: 1 diesel, 300 hp(m) (220 kW); 1 shaft
Speed, knots: 10
Range, n miles: 3,000 at 10 kt
Complement: 40
Radars: Navigation. Kivach; I-band

Comment: Built in the 1970s and converted at Nikolayev in 1990. Used as ammunition transport ship in the Black Sea.

VTR 94

10/2008*, Laursen/Jarnesen / 1353350

ICEBREAKERS

Notes: Only military icebreakers are shown in this section. Other icebreakers come under civilian management and are now used predominantly for commercial purposes. Civilian ships include the nuclear powered *Taymyr*, *Vaygach*, *Arktika*, *Rossiya*, *S Soyuz*, *Yamal*, all of which are operated by the Murmansk Shipping Company. Diesel powered ships include: 20,000 tons: *Ermak*, *Admiral Makarov*, *Kresin*; 15,400 tons: *Moskva*, *St Petersburg*; 14,600 tons: *Kapitan Sorokin*, *Kapitan Dranitsyn*, *Kapitan Nikolayev*, *Kapitan Khlebnikov*; 7,700 tons: *Mudyug*; 6,200 tons: *Magadan*, *Dikson*; 2,900 tons: *Afanasy Nikitin*, *Fedor Litke*, *Georgiy Sedov*, *Ivan Kruzenshtern*, *Ivan Moskvitin*, *Petr Pakhtusovov*, *Semen Chelyushkin*, *Semen Dezhnev*, *Vasily Poyarkov*, *Vladimir Rusanov*, *Yuriy Lisynsky*; 2,240 tons: *Kapitan Bukayev*, *Kapitan Chadayev*, *Kapitan Chechkin*, *Kapitan Krutov*, *Kapitan Plakhin*, *Kapitan Zarubin*; 2,200 tons: *Kapitan Babichev*, *Kapitan Borodkin*, *Kapitan Chudinov*, *Kapitan Damidov*, *Kapitan Evdokimov*, *Kapitan Metsayk*, *Kapitan Moshkin*, *Kapitan Yevdokimov*, *Ayvaamiy Zavenyagin*; 2,100 tons: *Kapitan A Radzhabov*, *Kapitan Kosolobov*, *Kapitan M Izmaylov*. The growing demand for oil tanker shipments in the Arctic region means that there is a potential shortage of icebreakers. This may be met by completing *50 Let Pobeda*, a 25,000 ton nuclear-powered vessel which has been at Baltic Shipyard, St Petersburg since 1989. Following post refit sea trials, she returned to service in 2007. *Arktika*, *Rossiya* and *Taymyr* are due life-extension refits.

Notes: SB means *Spasatelny Buksir* or Salvage Tug. MB means *Morskoy Buksir* or Seagoing Tug.

2 BAKLAZHAN (PROJECT 5757) CLASS (SALVAGE TUGS) (ATS)

NICOLAY CHIKER SB 131 FOTIY KRYLOV SB 135

Displacement, tons: 7,300 standard; 8,000 full load
Dimensions, feet (metres): 324.8 × 64.0 × 23.3 (99.0 × 19.5 × 7.7)
Main machinery: 4 Wärtsilä diesels; 24,120 hpm (18.0 MW); 2 shafts
Speed, knots: 18
Range, n miles: 11,000 at 16 kt
Radars: Navigation I-band.

Comment: Both ships constructed by Holmring, Rauma, Finland. Laid down in 1987 and entered service with the Soviet Navy in 1989. Under ownership of Russian company Sovfracht, operated by Greek company Tsavliris during the 1990s before returning to Russian naval service in about 2006. Both tugs are probably still available for commercial use. Equipped with three water cannons.

2 NEFTEGAZ (PROJECT B-92) CLASS (ATA)

ILGA KALAR

Displacement, tons: 4,013 full load
Dimensions, feet (metres): 264.8 × 53.5 × 16.4 (80.3 × 16.3 × 5.0)
Main machinery: 2 Sulzer diesels; 7,200 hp (5.3 MW); 2 shafts, cp props
Speed, knots: 15. **Range, n miles:** 5,000 at 12 kt
Complement: 23
Radars: Navigation: I-band.

Comment: Large oilfield support tugs built by A Warski SY, Szczecin, Poland. Taken over for naval service; some 40 others are in civilian service. Now employed as ocean-going rescue tugs with heavy towing and firefighting capabilities. *Kalar* also operates in the salvage role. Capacity of 600 tons cargo on deck and 1,000 m³ of liquid cargo. Entered naval service in 1983 (*Ilga*) and 1990 (*Kalar*). *Ilga* based in the Northern Fleet and *Kalar* in the Pacific.

RUSSIAN FEDERAL BORDER GUARD SERVICE (EX MARITIME BORDER GUARD)

General

(1) The Border Guard would be integrated with naval operations in a crisis. Formerly run by the KGB, the force came under the Ministry of Defence in October 1991 and was then given to the Ministry of Interior in December

1993. It merged with the Federal Security Service on 11 March 2003

(2) From 1993 the Border Guard started to fly its own ensign which is the St Andrews Cross with a white border on a green background. Diagonal stripes are painted on the hull which from 2004 have been painted blue

(3) Roles include Law Enforcement, Port Security, Counter Intelligence, Counter Terrorism and Fishery Protection.

Personnel

2009: 10,000 approx

 Speed, knots: 30. Range, n miles: 2,500 at 14 kt
 Complement: 83 (5 officers) (Grisha III); 79 (Grisha II)

Missiles: SAM. SA-N-4 Gecko twin launcher, semi-active radar homing to 15 km (8 n miles) at 2.5 Mach; warhead 50 kg, 20 missiles

Guns: 2 (4) - 57 mm/80 (twin/2 twin) (Grisha II/III); 120 rds/min to 6 km (3.3 n miles); weight of shell 2.8 kg.
 1-3 in 176 mm/60 (Grisha V); 120 rds/min to 15 km (8 n miles); weight of shell 5.9 kg.
 1-30 mm/65 (Grisha III and V classes) AK 630; 6 barrels; 3,000 rds/min combined to 2 km

Torpedoes: 4-21 in (533 mm) (2 twin) tubes. Combination of 53 cm torpedoes.

A/S mortars: 2 RBU 6000 12-tubed trainable, range 6,000 m; warhead 31 kg (Only 1 in Grisha V).

Depth charges: 2 racks (12)

Mines: Capacity for 18 in lieu of depth charges.

Countmeasures: Decoys: 4 PK 10 or 2 PK 16 chaff launchers.

ESM: 2 Watch Dog.

Radars: Air/surface search. Strut Curve (Strut Pair in Grisha V); F-band.

Navigation: Don 2, I-band.

Fire control: Pop Group; F/H/I-band (for SA-N-4). Bass Tilt (Grisha III and V), H/I-band (for 57/76 mm and 30 mm).

IFF: High Pole A or B. Square Head. Salt Pot.

Sonars: Bull Nose; hull-mounted; active search and attack, high/medium frequency.

Elk Tail; VDS, active search; high frequency. Similar to Hormone helicopter dipping sonar.

Programmes: Surviving ships of Grisha class variants built for the Border Guard. Some ships, previously reported to have been decommissioned, have been reported operational although the overall status of the class remains unclear. Grisha II (1973-74), Grisha III (1981-85) and Grisha V (1985 onwards). All were built at Kharbarovsk and Zelenodolsk.

Structure: Grisha III class has Muff Cob radar removed, Bass Tilt and 30 mm ADG (fitted aft), and Rad-haz screen removed from shaft funnel as a result of removal of Muff Cob. Grisha V is similar to Grisha III with the after twin 57 mm mounting replaced by a single 76 mm gun.

Operational: Divided between the Northern and Pacific Fleets.

7 KRIVAK III (NEREY) (PROJECT 1135MP) CLASS (FFHM)

Name	No	Builders	Laid down	Launched	Commissioned

VOROVSKY	160 (ex-052)	Kamish-Burun, Kerch	20 Feb 1990	28 July 1990	29 Dec 1990

Displacement, tons: 3,100 standard; 3,650 full load

Dimensions, feet (metres): 405.2 × 46.9 × 24 (sonar)
(123.5 × 14.3 × 7.3)

Main machinery: COGAG; 2 M8K gas-turbines, 55,500 hp(m)
(40.8 MW); 2 M 62 gas-turbines; 13,600 hp(m) (10 MW);
2 shafts

Speed, knots: 32

Range, n miles: 4,000 at 14 kt; 1,600 at 30 kt

Complement: 194 (18 officers)

Missiles: SAM: 1 SA-N-4 Gecko (Zif 122) twin launchers ●;
Osa-M semi-active radar homing to 15 km (8 n miles) at
2.5 Mach; warhead 50 kg; altitude 9.1-3,048 m (30-10,000 ft);
20 miss les.

Guns: 1-3.9 in (100 mm) 70 AK 100 ●; 60 rds/min to
21.5 km (11.5 n miles); weight of shell 15.6 kg.
2-30 mm/65 ●; 6 barrels per mounting; 3,000 rds/min
combined to 2 km.

Torpedoes: 8-21 in (533 mm) (2 quad) tubes ●. Combination
of 53 cm torpedoes (see table at front of section).

A/S mortars: 2 RBU 6000 12-tubed trainable ●; range
6,000 m; warhead 31 kg. MRG-7 55 mm grenade
launcher

Mines: Capacity for 16.

KRIVAK III

(Scale 1 : 1,200), Ian Sturton / 0506085

Countermeasures: Decoys: 4 PK 16 or 10 PK 10 chaff
launchers. Towed torpedo decoy
ESM/ECM: 2 Bell Shroud. 2 Bell Squat. Half Cup laser
warning (in some).

Radars: Air search: Top Plate ●; 3D; D/E-band.

Surface search: Peel Cone ●; I-band

Fire control: Pop Group ●; F/H-I band (for SA-N-4). Kite

Screech ●; H/I-K-band. Bass Tilt ●; H/I-band.

IFF: High Pole B. Salt Pot.

Sonars: Bull Nose (MGK-335S or MG-332); hull-mounted;
active search and attack; medium frequency.

Helicopters: 1 Ka-27 Helix ●.

Programmes: Type name was originally *bolshoy protivolodochny korabl*, meaning large anti-submarine ship. Changed in 1977-78 to *storozhevoy korabl* meaning escort ship. The naval Krivaks are known as the *Burevestnik* class.

Structure: Krivak III class built for the former KGB but now under Border Guard Control. The removal of SS-N-14 and one SA-N-4 mounting compensates for the addition of a hangar and flight deck

Sales: The Talwar class is an improved version of the Krivak III built for India. Three of the Krivak III class transferred to Ukraine in July 1997.

VOROVSKY

PSKOV

6/2005, Lemachko Collection / 1159852

PATROL FORCES

Notes: In addition to the patrol forces listed, *Pluton* 028 and *Strelets* 025, two Yug class former research vessels, are operated as patrol craft in Arctic waters.

8 ALPINIST (PROJECT 503) CLASS (PBO)

ANTIAS ARGAL BARS DIANA PALUYA PARELLA KURS GRINDA

Displacement, tons: 1,150 full load
Dimensions, feet (metres): 176.2 x 34.4 x 13.4 (53.7 x 10.5 x 4.1)
Main machinery: 1 diesel; 1 shaft; cp prop
Speed, knots: 12. Range, n miles: 7,000 at 12 kt
Complement: 44

Comment: Trawler design adapted for use as fishery protection role. The named ships were built at Volgograd and at Khabarovsk between 1997 and 2000 while the latest two (unnamed) ships were built at Yarslavl and entered service in late 2001.

ALPINIST 9/2006, *Globe Collection* / 1159884

4 KOMANDOR CLASS (PSO)

KOMANDOR SHKIPER GYEK HERLUF BIDSTRUP MANCHZHUR

Displacement, tons: 2,435 full load
Dimensions, feet (metres): 289.7 x 44.6 x 15.4 (88.3 x 13.6 x 4.7)
Main machinery: 2 Russkly SEMT-Pielstick 6 PC2 5 L400 diesels; 7,020 hp(m) (5.2 MW); 1 shaft; cp prop; bow thruster
Speed, knots: 20
Range, n miles: 7,000 at 19 kt
Complement: 42
Radars: Navigation: Furuno, I-band.
Helicopters: 2 Ka-32 Helix D for SAR

Comment: Specialist offshore patrol vessels ordered in December 1987 from Danyard, Frederikshaven, Denmark and delivered 1989-1990. The hangar is below the helicopter deck. Transferred from the Ministry of Fisheries to the Federal Border Guard and based in the Pacific.

MANCHZHUR 6/2003, *Lemachko Collection* / 0580538

5 IVAN SUSANIN (PROJECT 97P) CLASS (PATROL SHIPS) (PGH)

AISBERG 161 MURMANSK (ex-Dunay) 018 NEVA 170 ANADYR 173 VOLGA 183

Displacement, tons: 3,567 full load
Dimensions, feet (metres): 229.7 x 59.4 x 21 (70 x 18.1 x 6.4)
Main machinery: Diesel-electric; 3 Type 13-D-150 diesel generators; 3 motors; 5,400 hp(m) (4 MW); 3 shafts (1 fwd, 2 aft)
Speed, knots: 14.5
Range, n miles: 5,500 at 12.5 kt
Complement: 45
Guns: 2-3 in (76 mm)/59 AK 726 (twin), 90 rds/min to 16 km (8.5 n miles); weight of shell 5.9 kg, 2-30 mm/65 AK 630 (not in all).
Radars: Surface search: Strut Curve; F-band
Navigation: 2 Don Kay or Palm Frond, I-band.
Fire control: Hawk Scream; I-band.
Helicopters: Platform only.

Comment: Built at Admiralty Yard, Leningrad between 1974 and 1981. Generally similar to Dobrynya Nikitich class though larger with a tripod mast and different superstructure. Former icebreakers operated primarily as patrol ships. Two in the Pacific and three in the Northern Fleet. Two deleted so far.

VOLGA 11/2007, *Lemachko Collection* / 1353309

Displacement, tons: 1,660 full load
Dimensions, feet (metres): 190.2 x 41.3 x 15.1 (58 x 12.6 x 4.6)
Main machinery: Diesel-electric; 2 Type 5-2-DW2 diesel generators; 2,900 hp(m) (2.13 MW); 1 motor; 2,000 hp(m) (1.47 MW); 1 shaft
Speed, knots: 14
Range, n miles: 3,500 at 13 kt
Complement: 35
Guns: 4-30 mm/65 (2 twin) (all fitted for, but only Border Guard ships carry them).
Radars: Navigation: 2 Don 2 or Nayada; I-band
IFF: High Pole B.

Comment: A class of ocean tugs armed for use as patrol vessels in the North, Pacific, Baltic and Caspian. Built in Yaroslavl and Oktyabskoye from 1973 to 1989, design used for Ministry of Fisheries rescue tugs.

CHUKOTKA 5/2008, *Hachiro Nakai* / 1353292

1 + (9) SPRUT (PROJECT 6457S) CLASS (PSO)

Name	No	Builders	Laid down	Launched	Commissioned
SPRUT	-	Yantar Shipyard, Kaliningrad	27 May 2002	12 Oct 2007	2008

Displacement, tons: 900 standard
Dimensions, feet (metres): 216.2 x 34.8 x 11.5 (65.9 x 10.6 x 3.5)
Main machinery: 1 MTU 16V 1163 diesel; 7,000 hp(m) (5.2 MW); 1 shaft; fixed propeller
Speed, knots: 21.5
Range, n miles: 12,000 at 12 kt
Complement: 15 + 10 in temporary accommodation
Radars: Surface search: I-band.
Navigation: I-band
Helicopters: Platform for 1 light.

Comment: Specialist Fishery Protection vessel based on German Coast Guard Bad Bremstedt design. Steel hull with aluminium superstructure. Equipped with a high speed RHIB for interception. A class of ten is planned.

SPRUT 9/2008, *Frank Findler* / 1353310

 KOBCHIK (ex-PSKR-807) 078
 KRECHET (ex-PSKR-809) 099
 BERKUT (ex-PSKR-800) 152
 KORSHUN (ex-PSKR-805) 161
 VORON (ex-PSKR 801) 163

Displacement, tons: 440 full load
Dimensions, feet (metres): 189 × 33.5 × 10.8 (576 × 10.2 × 3.3)
Main machinery: 2 Type M 521 diesels; 16,184 hp(m) (11.9 MW) sustained; 2 shafts
Speed, knots: 32
Range, n miles: 2,400 at 14 kt
Complement: 38

Missiles: SAM SA-N-5 Grail quad launcher; manual aiming; IR homing to 6 km (3.2 n miles) at 1.5 Mach, altitude to 2,500 m (8,000 ft); warhead 1.5 kg; 8 missiles
Guns: 1–3 in (76 mm)/59 AK 178; 120 rds/min to 15 km (8 n miles); weight of shell 5.9 kg. 1–30 mm/65 AK 630, 6 barrels, 3,000 rds/min combined to 2 km.
Torpedoes: 4–16 in (406 mm) tubes. For torpedo details see table at front of section.
A/S mortars: 2 RBU 1200 5-tubed fixed, range 1,200 m; warhead 34 kg.
Depth charges: 2 racks (12).
Countermeasures: Decoys: 2 PK 16 or 4 PK 10 chaff launchers.
ESM: 3 Brick Plug and 2 Half Hat; radar warning.
Weapons control: Hood Wink optronic director.
Radars: Air/surface search: Peel Cone, E/F-band.
Surface search: Kivach or Pechora or SRN 207, I-band.
Fire control: Bass Tilt, H/I-band
Sonars: Foal Tail; VDS (mounted on transom); active attack; high frequency.

Programmes: First laid down in 1977 and completed in 1979. In series production at Yaroslavl in the Black Sea and at Vladivostok until 1988 when the Svetlyak class took over. Type name is *maly protivolodochny korabl* meaning small anti-submarine ship. An improved version building at Kharberovsk in 1995 was not completed.
Structure: An ASW version of the Tarantul class having the same hull form with a 1.8 m extension for dipping sonar. *Berkut*, *Voron* and *Kaliningrad* have a lower bridge than others. A modified version (Pauk II) with a longer superstructure, two twin 533 mm torpedo tubes and a radome similar to the Parchim class built for export.
Operational: Five in the Baltic, two in the Black Sea and the remainder in the Pacific. In addition five naval craft are laid up in the Baltic and one in the Black Sea.
Sales: One to Bulgaria in September 1989 and a second in December 1990. Two to Ukraine in 1996. A variant design built for Vietnam.

KRECHET

8/2008*, E & M Laursen / 1353262

3 TERRIER (PROJECT 14170) CLASS (PB)

001–003

Displacement, tons: 8.3 full load
Dimensions, feet (metres): 38.4 × 10.2 × 1.6 (11.7 × 3.1 × 0.5)
Main machinery: 2 diesels; 2 waterjets
Speed, knots: 32
Range, n miles: 120 at 30 kt
Complement: 6

Comment: Built at Zelenodolsk in 2000.

TERRIER 001

5/2006, Lemachko Collection / 1159853

2 PAUK II (PROJECT 1241 PE) CLASS (PCM)

NOVOROSSIYSK 043 KUBAN 149

Displacement, tons: 495 full load
Dimensions, feet (metres): 191.9 × 33.5 × 11.2 (58.5 × 10.2 × 3.4)
Main machinery: 2 Type M 521 diesels; 16,184 hp(m) (11.9 MW) sustained; 2 shafts
Speed, knots: 32
Range, n miles: 2,400 at 14 kt
Complement: 32

Missiles: SAM SA-N-5 quad launcher, manual aiming, IR homing to 10 km (5.4 n miles) at 1.5 Mach; warhead 1.1 kg.
Guns: 1 USSR 76 mm/50 AK 178; 120 rds/min to 15 km (8 n miles); weight of shell 5.9 kg. 1–30 mm/65 AK 630; 6 barrels; 3,000 rds/min combined to 2 km.
Torpedoes: 4–21 in (533 mm) (2 twin) fixed tubes.
A/S mortars: 2 RBU 1200 5-tubed fixed; range 1,200 m; warhead 34 kg.
Radars: Air/surface search: Cross Dome (Positiv E); E/F-band.
Navigation: Pechora; I-band
Fire control: Bass Tilt, H/I-band
Sonars: Rat Tail; VDS (on transom), attack; high frequency.

Comment: Built at Yaroslavl Shipyard and entered service in 1997–98 when they were transferred to the Border Guard. Originally intended for Iraq, export Pauk II variant of the type sold to India and Cuba. Has a longer superstructure than the Pauk I with a radome similar to the Parchim II class. The torpedo tubes must be trained out to launch. Both operate in the Black Sea.

3 MURAVEY (ANTARES) (PROJECT 133) CLASS (PCK)

DELFIN RYBA TUAPSE

Displacement, tons: 212 full load
Dimensions, feet (metres): 126.6 × 24.9 × 6.2, 14.4 (foils) (38.6 × 7.6 × 1.9, 4.4)
Main machinery: 2 gas turbines; 22,600 hp(m) (16.6 MW); 2 shafts
Speed, knots: 60
Range, n miles: 410 at 12 kt
Complement: 30 (5 officers)

Guns: 1–3 in (76 mm)/80; 120 rds/min to 15 km (8 n miles); weight of shell 7 kg. 1–30 mm/65 AK 630; 6 barrels, 3,000 rds/min combined to 2 km.
Weapons control: Hood Wink optronic director.
Radars: Surface search: Peel Cone; E band.
Fire control: Bass Tilt, H/I-band
Sonars: Rat Tail; VDS; active attack, high frequency; dipping sonar.

Comment: Thirteen hydrofoil craft built at Feodosiya in the mid-1980s for the USSR Border Guard. Three transferred to Ukraine and the remainder decommissioned. Two are reported to be operational.

Fire control: BassTilt (MP 123), H/I-band.
Navigation: Palm Frond B; I-band.
IFF: High Pole B. Square Head.
Sonars: Ret Tail; VDS, active search; high frequency

Comment: A class of attack craft for the Border Guard built at Vladivostok, St Petersburg and Yaroslavl. Series production after first of class trials in 1989. Although deliveries have been very slow in recent years, the class may still be building with the most recent launch in May 2000. A further two craft were delivered in 2007. One has a second AK 630 gun vice the 76 mm and no BassTilt radars. Six in the Northern Fleet, three in the Baltic, seven in the Pacific, two in the Caspian and two in the Black Sea are all known to be active. Two have been built for Vietnam. Three additional craft operated by the Navy.

IFF: High Pole. 2 Square Head
Sonars: Stag Ear or Foal Tail, VDS; high frequency; Hormone type dipping sonar.

Comment: Based on the hull design of the Osa class. Construction started in 1967 and continued at a rate of about five a year at Petrovsky, Leningrad and Vladivostok for the Border Guard. Programme terminated in 1989 at a total of 133 hulls. Type name is *pogranichny storozhevoy korabl* meaning border patrol ship. Four based in the Baltic, five in the Black Sea, one in the Pacific, and five in the Caspian Sea. Transfers include: Cuba, two in February 1985 and one in August 1985. Four to Cambodia in October 1985 and November 1987. Five transferred to Azerbaijan control in November 1992 and 10 more to Ukraine.

6/2000 / 0126309

1 + (3) SOKZHOI CLASS (PROJECT 14230) (PBF)

ALBATROS

Displacement, tons: 977 full load
Dimensions, feet (metres): 114.8 × 25.7 × 6.6 (35.0 × 7.85 × 2.0)
Main machinery: 2 Zvezda M535 diesels; 9,923 hp(m) (7.4 MW) sustained; 2 shafts
Speed, knots: 50
Range, n miles: 800
Complement: 16
Guns: 2—30 mm AK-306, 1—14.5 mm MG.

Comment: First of a new class of patrol craft launched at Volga Yard, Nizhny Novgorod on 23 June 2000. A feature of the design is that an air-cushion is generated below the hull to produce a planing effect to reduce drag. The machine-gun is mounted in a barbettes in the forward part of the craft. Project 14232 is a family of high-speed air-cavem vessels based on a unified platform design developed by the Alekseyev Hydrofoil Design Bureau, Nizhny Novgorod. Other variants of the design have different superstructure configuration, armament and equipment. These include two unarmed vessels of the sister Project 14232 Mercury class (*Petr Matveyev* (TS-100) and *Pavel Vereshchagin* (TS-101)) built for the customs service at Yaroslavl between 1996-2000. Two more of this type ship are to be completed in Yaroslavl and Khabarovsk.

9 + (11) MIRAZH (PROJECT 14310) CLASS (PBF)

117 401 402 +6

Displacement, tons: 126 full load
Dimensions, feet (metres): 114.2 × 21.7 × 6.1 (34.8 × 6.6 × 1.95)
Main machinery: 2 Zvezda M-521 diesels; 16,184 hp(m) (11.9 MW); 2 shafts
Speed, knots: 48
Range, n miles: 1,500 at 8 kt
Complement: 12 (2 officers)
Guns: 1—30 mm AK 306.
 2—7.62 mm MGs
Radars: Surface search: I-band

Comment: Designed by Almaz and built by Vympel Shipbuilding, Rybinsk. Aluminium-magnesium alloy construction. Three vessels authorised for construction in 1993 but only first of class was completed in 1998. It entered service with the Border Guard in 2001 and has been based in the Caspian Sea. Nine craft are believed to be in service and a class of 20 craft is reported to be required.

MIRAZH

6/2006* / 1353313

12 ZHUK (GRIF) (PROJECT 1400/1400M) CLASS (COASTAL PATROL CRAFT) (PB)

PSKA series

Displacement, tons: 39 full load
Dimensions, feet (metres): 78.7 × 16.4 × 3.9 (24 × 5 × 1.2)
Main machinery: 2 Type M 401B diesels; 2,200 hp(m) (1.6 MW) sustained; 2 shafts
Speed, knots: 30
Range, n miles: 1,100 at 15 kt
Complement: 11 (3 officers)
Guns: 2—14.5 mm (twin, fwd) MGs, 1—12.7 mm (aft) MG
Radars: Surface search: Spin Trough; I-band.

Comment: Under construction from 1976. Manned by the Border Guard. Export versions have twin (over/under) 14.5 mm aft. Some have twin guns forward and aft. Ukraine Border Guard and has received 12 from the Russians. Eight are in the Baltic and four in the Black Sea. These are the last operational units.

Transfers: Algeria (one in 1981), Angola (one in 1977), Benin (four in 1978–80), Bulgaria (five in 1977), Cape Verde (one in 1980), Congo (three in 1982), Cuba (40 in 1971–88), Equatorial Guinea (three in 1974–75), Ethiopia (two in October 1982 and two in June 1990), Guinea (two in July 1987), Iraq (five in 1974–75), Cambodia (three in 1985–87), Mauritius (two in January 1990), Mozambique (five in 1978–80), Nicaragua (eight in 1982–88), Seychelles (one in 1981, one in October 1982), Somalia (one in 1974), Syria (six in 1981–84), Vietnam (nine in 1978–88 (at least one passed on to Cambodia), five in 1990 and two in 1995), North Yemen (five in 1978–87), South Yemen (two in 1975). Many have been deleted.

VASILY ILYASHENKO ANDREY ROZHKOVA SVYATAYA KSENIYA +3

Displacement, tons: 28.7 standard
Dimensions, feet (metres): 64.0 × 15.1 × 3.8 (19.5 × 4.6 × 1.15)
Main machinery: 2 Zvezda M-470 diesels; 2 Arneson dive props
Speed, knots: 53
Range, n miles: 410 at 35 kt
Complement: 6
Guns: 2—14.5 mm MGs
Radars: Navigation: I-band

Comment: Prototype TS 300 built by Vympel, Rybinsk for the Customs service and completed in 1998. GRP construction. First Border Guard unit entered service in 2001. Further orders are expected.

MANGUST 601

6/2005, A Sheldon-Duplaix / 1164804

1 A-125 CLASS (PBF)

VALENTIN CHUJKIN

Displacement, tons: 26.0 full load
Dimensions, feet (metres): 57.7 × 13.8 × 3.3 (17.6 × 4.2 × 1.0)
Main machinery: 2 MTU 8V2000M90 diesels; 1,830 hp (1.34 MW); 2 waterjets
Speed, knots: 45
Complement: To be announced

Comment: Designed and built by Almaz, St Petersburg and delivered in 2004.

A-125

6/2005, A Sheldon-Duplaix / 1164803

27 TYPE 1496 CLASS (PBO)

Displacement, tons: 107 full load
Dimensions, feet (metres): 76.8 × 19.3 × 6.1 (23.4 × 5.9 × 1.9)
Main machinery: 1 diesel; 315 hp (230 kW); 1 shaft; fixed propeller
Speed, knots: 10
Range, n miles: 450 at 10 kt
Guns: 1—14.5 mm MG
Radars: Surface search/navigation: I-band.

Comment: Former tugs employed as patrol craft. Likely to be armed.

TYPE 1496

8/2006, Lemachko Collection / 1159858

0 + 1 PROJECT 22460 CLASS (PATROL SHIP) (PSO)

Displacement, tons: 630 full load
Dimensions, feet (metres): 205.0 × 7 × 7 (62.5 × 7 × 7)
Main machinery: To be announced
Speed, knots: 30
Range, n miles: 3,500 at 12 kt
Complement: 44
Helicopters: Platform for 1 medium.

Comment: First vessel of a new class of helicopter-capable patrol ships laid down at Almaz, St Petersburg on 3 September 2007.

17 KULIK (PROJECT 1415PV) CLASS (PB)

Displacement, tons: 54 full load
 Dimensions, feet (metres): 69.5 x 12.8 x 4.6 (21.2 x 3.9 x 1.4)
 Main machinery: 1 diesel; 300 hp (225 kW); 1 shaft
 Speed, knots: 12
 Range, n miles: 200 at 11 kt
 Complement: 4
 Radars: Navigation: I-band.

Comment: Harbour patrol craft built in the 1970/80s. Similar craft, known as the Flamingo class, built for the Navy

KULIK CLASS 6/2006, Lemachko Collection / 1305142

2 ENFORCER II CLASS (PATROL CRAFT) (PB)

Displacement, tons: 8.3 full load
 Dimensions, feet (metres): 37.3 x 9.8 x 2.9 (11.36 x 2.94 x 0.9)
 Main machinery: 2 Volvo Penta D9 diesels; 1,000 hp (736 kW); 2 Rolls Royce FF310 waterjets
 Speed, knots: 42
 Range, n miles: 200 at 30 kt
 Complement: 2

Comment: Built by Dockstarvarvet, Sweden, the craft are derived from the Combatboat 90 concept and are known as the HSPC 11.3M design. The aluminium construction craft are to be used for patrols on Russian inland waterways. Both delivered in June 2008.

ENFORCER II 6/2008, Lemachko Collection / 1305320

8 PIYAVKA (PROJECT 1249) CLASS (PBR)

PSKR 62 117	PSKR 64 146	PSKR 56 093	PSKR 58 123
PSKR 53 065	PSKR 55 013	PSKR 57 058	PSKR 58 189

Displacement, tons: 229 full load
 Dimensions, feet (metres): 136.5 x 20.7 x 2.9 (41.6 x 6.3 x 0.9)
 Main machinery: 3 diesels; 3,300 hp(m) (2.42 MW); 2 shafts
 Speed, knots: 17
 Complement: 30 (4 officers)
 Guns: 1—30 mm/65 AK 630, 6 barrels. 2—14.5 mm (twin) MGs.
 Radars: Surface search: Spin Trough; I-band.

Comment: Built at Khabarovsk 1979–84. Based in Amur Flotilla mostly for logistic support.

PSKR 58 6/2003, Lemachko Collection / 01580529

3 OGONEK (PROJECT 12130) CLASS (PBR)

Displacement, tons: 98 full load
 Dimensions, feet (metres): 109.6 x 13.8 x 2.6 (33.4 x 4.2 x 0.8)
 Main machinery: 2 diesels; 2 shafts
 Speed, knots: 25
 Complement: 17 (2 officers)
 Guns: 2—30 mm AK 630.

Comment: A smaller version of the Piyavka class built at Khabarovsk from 1999. Numbers in service are uncertain.

OGONEK 4/2006, Lemachko Collection / 1159869

RIVER PATROL FORCES

Notes. Attached to Black Sea and Pacific Fleets for operations on the Danube, Amur and Usuri Rivers, and to the Caspian Flotilla

2 YAZ (SLEPEN) (PROJECT 1208) CLASS (PGR)

BLAGOVESHCHENSK 066	SHKVAL 106
---------------------	------------

Displacement, tons: 440 full load
 Dimensions, feet (metres): 180.4 x 29.5 x 4.9 (55.9 x 9 x 1.5)
 Main machinery: 3 diesels; 11,400 hp(m) (8.39 MW); 3 shafts
 Speed, knots: 24
 Range, n miles: 1,000 at 10 kt
 Complement: 32 (4 officers)
 Guns: 2—115 mm tank guns (TB 62) or 100 mm/56.
 2—30 mm/65 AK 630; 6 barrels per mounting
 4—12.7 mm MGs (2 twin).
 2—40 mm mortars on after deckhouse
 Radars: Surface search: Spin Trough; I-band.
 Fire control: Bass Tilt; H/I-band.
 IFF: High Pole B. Square Head.

Comment: First entered service in Amur Flotilla 1978. Built at Khabarovsk until 1987. All but these last two have been placed in reserve.

BLAGOVESHCHENSK 6/1995, Lemachko Collection / 0570903

15 SHMEL (PROJECT 1204) CLASS (PGR)

PSKR series

Displacement, tons: 77 full load
 Dimensions, feet (metres): 90.9 x 14.1 x 3.9 (27.7 x 4.3 x 1.2)
 Main machinery: 2 Type M 50 diesels; 2,200 hp(m) (1.6 MW) sustained; 2 shafts
 Speed, knots: 25
 Range, n miles: 600 at 12 kt
 Complement: 12 (4 officers)
 Guns: 1—3 in (76 mm)/48 (tank turret). 1—25 mm/70 (later ships). 2—14.5 mm (twin) MGs (earlier ships). 5—7.62 mm MGs. 1 BP 6 rocket launcher, 18 barrels.
 Mines: Can lay 9.
 Radars: Surface search: Spin Trough; I-band

Comment: Completed at Kerch and Nikolayev North (81 Kommuna) 1967–74. Some of the later ships also mount one or two multibarrelled rocket launchers amidships. The 7.62 mm guns fire through embrasures in the superstructure with one mounted on the 76 mm. Can be carried on land transport. Type name is *artilleriskiy kater* meaning artillery cutter. About 70 have been scrapped or laid up so far including the last naval units. These last survivors are based on the Amur River and belong to the Border Guard. Transfers: Four to Cambodia (1984–85) (since decommissioned). Some have been taken over by Belorussian forces, and others allocated to Ukraine

SHMEL 6/2000, Lemachko Collection / 0106875

706 Russian Federation (BORDER GUARD)/River patrol forces — Amphibious forces

St Kitts and Nevis

Country Overview

The Federation of St Kitts and Nevis gained independence in 1983; the British monarch, represented by a governor-general, is the head of state. Located at the northern end of the Leeward Islands in the Lesser Antilles chain, the country comprises St Kitts (formerly Saint Christopher)

(68 square miles) and, 2 n miles to the southeast, Nevis (36 square miles). The constitution allows for the secession of Nevis from the federation. The capital of St Kitts and of the federation is Basseterre; Charlestown is the capital and largest town on Nevis. Territorial seas (12 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has been claimed but the limits

are not defined. The Coast Guard was part of the Police Force until 1997 when it transferred to the Regular Corps of the Defence Force

St Lucia

Country Overview

St Lucia gained independence in 1979; the British monarch, represented by a governor-general, is the head of state. The island (238 square miles) is one of the Windward Islands of the Lesser Antilles

chain and is located between Martinique to the north and St Vincent to the south. The capital, main town and principal port is Castries, on the northwestern coast. Territorial seas (12 n miles) are claimed. Exclusive Economic Zone (EEZ) limits will not be fully defined until outstanding

boundary disagreements have been resolved.

St Vincent and the Grenadines

Country Overview

St Vincent and the Grenadines gained independence in 1979; the British monarch, represented by a governor-general, is the head of state. Lying between St Lucia to the north and Grenada to the south, they form part of the Windward Islands in the Lesser Antilles chain and comprise the

island of St Vincent (133 square miles) and the 32 northernmost islands and cays of the Grenadines group including (north to south): Bequia, Mustique, Canouan, Mayreau, Union Island, Palm (formerly Prune) Island, and Petit St Vincent. The capital, largest town, and principal port is Kingstown, St Vincent. An archipelagic state, territorial seas (12 n miles) are claimed.

A 200 n mile Exclusive Economic Zone (EEZ) has been claimed but the limits are not defined.

Samoa

Country Overview

Samoa was a New Zealand-administered UN Trust territory until it became independent in 1962. At the same time a Treaty of Friendship delegated responsibility to New Zealand for foreign affairs. An island nation, it lies in the south Pacific Ocean, approximately midway between Hawaii and New Zealand, in the western portion of the Samoan archipelago. There are two main islands, Savai'i and Upolu, and several smaller islands, of which only two,

Apolima and Manono, are inhabited. The capital and chief port is Apia on Upolu. An archipelagic state, territorial seas (12 n miles) are claimed. An Exclusive Economic Zone (EEZ) (200 n miles) is also claimed but limits have not been fully defined by boundary agreements.

PATROL FORCES

1 PACIFIC CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
NAFANUA	–	Australian Shipbuilding Industries	5 Mar 1988

Displacement, tons: 165 full load
Dimensions, feet (metres): 103.3 × 26.6 × 6.9 (31.5 × 8.1 × 2.1)
Main machinery: 2 Caterpillar 3516TA diesels; 4,400 hp (3.28 MW) sustained; 2 shafts
Speed, knots: 20
Range, n miles: 2,500 at 12 kt
Complement: 17 (3 officers)
Guns: 2–7.62 mm MGs.
Radars: Surface search; Furuno FR 1510; I-band.

Comment: Under the Defence Co-operation Programme Australia has provided 22 Pacific class patrol craft to Pacific islands. Training, operational and technical assistance is provided by the Royal Australian Navy. *Nafanua* ordered 3 October 1985. Refitted in 1995. Following the decision by the Australian government to extend the Pacific Patrol Boat programme, a life-extension refit was undertaken at Townsville in 2005.

NAFANUA

6/2005, Samoa Police / 1177871

Saudi Arabia

Country Overview

The Kingdom of Saudi Arabia occupies most of the Arabian Peninsula and is bordered to the north by Jordan, Iraq, and Kuwait, to the south by Oman and the Republic of Yemen and to the east by Qatar and the United Arab Emirates. With an area of 864, 869 square miles, it has coastlines with the Red Sea (972 n miles) and the Gulf (454 n miles). The capital and largest city is Riyadh while the principal ports are Jiddah and Yanbu al Bahr on the Red Sea, and the major oil-exporting ports of Al Jabsyl, Ad Dammam, and Ras Tanura on the Gulf. Territorial seas (12 n miles) are claimed. An EEZ has not been claimed.

Headquarters Appointments

Chief of Naval Staff
 H H Vice Admiral Prince Fahad Bin Abdulrah Bin Mohammed Al Saud
Commander Eastern Fleet
 Rear Admiral Mohammad Abdul Khalij Al Asseri
Commander Western Fleet
 Rear Admiral Dakheel Allah Ahmed Al-Wakdani
Director Frontier Force (Coast Guard)
 Lieutenant General Mujib bin Muhammad Al-Qahtani

Personnel

(a) 2009: 15,500 officers and men (including 3,000 marines)
 (b) Voluntary service

Bases

Naval HQ: Riyadh
 Main bases: Jiddah (HQ Western Fleet), Al Jubail (HQ Eastern Fleet), Aziziah (Coast Guard), Jizan (Red Sea)
 Minor bases (Naval and Coast Guard): Ras Tanura, Al Dammam, Yanbu Al Bahr, Ras al-Mishab, Al Wajh, Al Qatif, Haqi, Al Sharmah, Qizen, Duba

General

Funding for the Navy has the lowest defence service priority. New programmes are slow to come forward, and the operational status of existing ships is variable.

Command and Control

The USA provided an update of command and control capabilities during the period 1991–95, including a commercial datalink to improve interoperability.

Coast Defence

Truck-mounted Otomat batteries.

Coast Guard

Part of the Frontier Force under the Minister for Defence and Aviation. 5,500 officers and men. It is not always clear which ships belong to the Navy and which to the Coast Guard.

Strength of the Fleet

Type	Active	Building
Frigates	7	–
Corvettes—Missile	4	–
Fast Attack Craft—Missile	9	–
Patrol Craft	56	–
Minehunters	3	–
Minesweepers—Coastal	4	–
Replenishment Tankers	2	–

SUBMARINES

Notes: (1) Orders for patrol submarines are a low priority although training has been done in France and Pakistan.
 (2) Interest has been shown in the acquisition of Midget Submarines.

FRIGATES

Notes: The programme to replace the Madina-class frigates is expected to make progress in 2009. A requirement for up to six ships is reported. Principal contenders are likely to be French FREMM class and one of the US Littoral Combat Ship variants.

3 AL RIYADH (MODIFIED LA FAYETTE) CLASS (TYPE F-3000S) (FFGHM)

Name	No	Builders	Laid down	Launched	Commissioned

Displacement, tons: 4,650 full load
Dimensions, feet (metres): 438.43 × 56.4 × 13.5 (133.6 × 17.2 × 4.1)
Main machinery: CODAD; 4 SEMT-Pielstick 18 PA6 STC diesels; 28,000 hp (m) (20.58 MW) sustained; 2 shafts; LIPS cp props, bow thruster
Speed, knots: 25. **Range, n miles:** 7,000 at 15 kt
Complement: 181 (25 officers); accommodation for 190

Missiles: SSM, 8 Aerospatiale MM 40 Block II Exocat ●, inertial cruise; active radar homing to 70 km (40 n miles) at 0.8 Mach; warhead 165 kg; sea-skimmer
SAM: Eurosam SAAM ●; 2 octuple Sylver A43 VLS for Aster 15; command guidance active radar homing to 15 km (8.1 n miles) anti-missile, at 30 km (16.2 n miles) anti-aircraft, 16 missiles.

Guns: 1 OTO Melara 3 in (76 mm)/62 Super Rapid ●, 120 rds/min to 16 km (8.7 n miles); weight of shell 6 kg.
 2 Gat 158 20 mm ●; 800 rds/min to 3 km; weight of shell 0.1 kg.
 2–12.7 mm MGs

Torpedoes: 4–21 in (533 mm) tubes; ECAN F17P; anti-submarine; wire-guided active/passive homing to 20 km (10.8 n miles) at 40 kt; warhead 250 kg.

Countermeasures: Decoys: 2 Matra Degaie Mk 2 ●; 10-barrelled trainable launchers; chaff and IR flares. SLAT anti-wake homing torpedoes system (when available).
RESM: Thomson-CSF (DR 3000-S2) ●; intercept. Sagem Telegon 10.

CESM: Thales Altesse; intercept.
ECM: 2 Thales Salamandre, jammers.

Combat data systems: Thales Senit 7.

Weapons control: Thales Castor II radar/EO tracker
Radars: Air search: Thales DRBV 26C Jupiter II ●; D-band. Surveillance/Fire control: Thomson-CSF Arabel 3D ●; I/J-band.

AL RIYADH

(Scale 1 : 1,200), Ian Sturton / 1044430

Fire control: Thomson-CSF Castor II UJ ●; J-band; range 15 km (8 n miles) for 1 m² target.
Navigation: 2 Racal Decca 1226 ●; I-band A second set fitted for helicopter control.

Sonars: Thomson Marconi CAPTAS 20; active low frequency; towed array

Helicopters: 1 Dauphin 2 ●.

Programmes: A provisional order was made on 11 June 1989, but this was not finally confirmed until 19 November 1994 when a contract for two ships was authorised under the Sawari II programme. Thomson-CSF was the prime contractor. On 25 May 1997 an order for a third ship was placed together with a substantial enhancement of the weapon systems in all three. First steel cut 13 December 1997. Following handover, 812 started an eight month training programme

which concluded in March 2003. 814 started sea trials on 9 September 2002 and 816 in mid-2003. SAM successfully tested in 816 in April 2004.

Structure: The design is a development of the French La Fayette class. Some 10 m longer, space and weight included for two more octuple SAM launchers or A50 launcher for Aster 30. Provision is made for a larger NH 90 type helicopter in the future. DCN Samahe helo handling system STAF stabilisers. Originally planned to be fitted with a 100 mm gun, the contract was amended to incorporate a 76 mm mounting instead.

Operational: OTHT link for helicopters and Air Force F-15s. *Makkah* seriously damaged in a grounding incident 80 miles north of Jiddah in December 2004. The ship was refloated by the Tsaviris Salvage Group in early 2005 and was towed to Jiddah. However, in view of the severity of damage, the ship is unlikely to be repaired.

AL QUYSUMAH	MSC 414	Peterson, WI	26 May 1977	15 Aug 1978
AL WADEEHAH	MSC 416	Peterson, WI	6 Sep 1977	7 Sep 1979
SAFWA	MSC 418	Peterson, WI	7 Dec 1977	2 Oct 1979

Displacement, tons: 320 standard, 407 full load
 Dimensions, feet (metres): 153 x 26.9 x 8.2 (46.6 x 8.2 x 2.5)
 Main machinery: 2 Waukesha L1616 diesels; 1,200 hp (895 kW); 2 shafts
 Speed, knots: 13
 Complement: 39 (4 officers)
 Guns: 1 Oerlikon 20 mm.
 Radars: Surface search ISC Cardion SPS 66; I/J-band
 Sonars: GE SQQ-14, VDS, active minihunting, high frequency.

Comment: Ordered on 30 September 1975 under the International Logistics Programme. Wooden structure. Fitted with fin stabilisers, wire and magnetic sweeps and also for minihunting. *Addriyah* based at Jiddah, the remainder at Al Jubail. Expected to be replaced by arrival of Sandowns but all are still in service mostly as patrol craft.

AL QUYSUMAH 6/1996, van Ginderen Collection / 0019090

**3 AL JAWF (SANDOWN) CLASS
(MINEHUNTERS—COASTAL) (MHC)**

Name	No	Builders	Launched	Commissioned
AL JAWF	420	Vosper Thornycroft	2 Aug 1989	12 Dec 1991
SHAQRA	422	Vosper Thornycroft	15 May 1991	7 Feb 1993
AL KHARJ	424	Vosper Thornycroft	8 Feb 1993	7 Aug 1997

Displacement, tons: 450 standard; 480 full load
 Dimensions, feet (metres): 172.9 x 34.4 x 6.9 (52.7 x 10.5 x 2.1)
 Main machinery: 2 Paxman 6RP200E diesels; 1,500 hp (1.12 MW) sustained; Voith-Schneider propulsion; 2 shafts; 2 Schötel bow thrusters
 Speed, knots: 13 diesels; 6 electric drive
 Range, n miles: 3,000 at 12 kt
 Complement: 34 (7 officers) plus 6 spare berths
 Guns: 2 Electronics & Space Emerlec 30 mm (twin); 1,200 rds/min combined to 6 km (3.3 n miles); weight of shell 0.35 kg
 Countermeasures: Decoys. 2 Loral Hycor SRBOC Mk 36 Mod 1 6-barrelled chaff launchers
 ESM Thomson-CSF Shiploc, intercept
 MCM. ECA mine disposal system; 2 PAP 104 Mk 5.
 Combat data systems: Plessey Nautis M action data automation.
 Weapons control: Contraves TMEO optronic director (Seahawk Mk 2)
 Radars: Navigation: Kelvin Hughes Type 1007; I-band.
 Sonars: Plessey/MUSL Type 2093; VDS; high frequency.

Comment: Three ordered 2 November 1988 from Vosper Thornycroft. Option for three more appears to have been abandoned. GRP hulls. Combines vectored thrust units with bow thrusters and Remote Controlled Mine Disposal System (RCMDS). *Al Jawf* sailed for Saudi Arabia in November 1995, *Shaqra* in November 1996, and *Al Kharj* in August 1997. All based at Al Jubail.

SHAQRA 3/2008*, Guy Toremans / 1353363

4 LCM 6 CLASS (TRANSPORTS) (YFU)

DHEBA 220 UMLUS 222 AL LEETH 224 AL QUONFETHA 226

Displacement, tons: 62 full load
Dimensions, feet (metres): 56.2 × 14 × 3.9 (17.1 × 4.3 × 1.2)
Main machinery: 2 GM diesels; 450 hp (336 kW); 2 shafts
Speed, knots: 9. **Range, n miles:** 130 at 9 kt
Complement: 5
Military lift: 34 tons or 80 troops
Guns: 2—40 mm Mk 19 grenade launchers.

Comment: Four transferred July 1977 and four in July 1980. The first four have been cannibalised for spares. Based at Jiddah.

ROYAL YACHTS

1 ROYAL YACHT (YACH)

Name	No	Builders	Commissioned
AL YAMAMA	—	Elsinore, Denmark	Feb 1981

Displacement, tons: 1,660 full load
Dimensions, feet (metres): 269 × 42.7 × 10.8 (82 × 13 × 3.3)
Main machinery: 2 MTU 12V 1163 TB82 diesels; 6,000 hp(m) (4.41 MW); 2 shafts; cp props, bow thruster; 300 hp(m) (221 kW)
Speed, knots: 19
Complement: 42 plus 56 spare
Helicopters: Platform for 1 medium

Comment: Ordered by Iraq but not delivered because of the war with Iran. Given to Saudi Arabia by Iraq in 1988. Based at Dammam.

1 PEGASUS CLASS (HYDROFOIL) (YAGJ)

AL AZIZIAH

Displacement, tons: 115 full load
Dimensions, feet (metres): 89.9 × 29.9 × 6.2 (27.4 × 9.1 × 1.9)
Main machinery: 2 Allison 501-KF20A gas turbines; 8,660 hp (6.45 MW) sustained; 2 waterjets (foilborne); 2 Detroit 8V92 diesels; 806 hp (452 kW) sustained; 2 shafts (hullborne)
Speed, knots: 46. **Range, n miles:** 890 at 42 kt
Guns: 2 General Electric 20 mm Sea Vulcan.
Weapons control: Kollmorgen GFCS; Mk 35 optronic director

Comment: Ordered in 1984 from Lockheed and subcontracted to Boeing, Seattle; delivered in August 1985. Mostly used as a tender to the Royal Yacht.

1 ROYAL YACHT (YACH)

Name	No	Builders	Commissioned
ABDUL AZIZ	—	Helsingør Waerft, Denmark	12 June 1984

Displacement, tons: 5,200 full load
Measurement, tons: 1,450 dwt
Dimensions, feet (metres): 482.2 × 59.2 × 16.1 (147 × 18 × 4.9)
Main machinery: 2 Lindholmen-Pielstick 12 PC2 5 V diesels; 15,600 hp(m) (11.47 MW) sustained; 2 shafts
Speed, knots: 22
Complement: 65 plus 4 Royal berths and 60 spare
Helicopters: 1 Bell 206B JetRanger type.

Comment: Completed March 1983 for subsequent fitting out at Vosper's Ship Repairers, Southampton. Helicopter hangar set in hull forward of bridge—covers extend laterally to form pad. Swimming pool. Stern ramp leading to garage. Based at Jiddah. Operated by the Coast Guard.

Displacement, tons: 210 full load
Dimensions, feet (metres): 126.6 × 26.2 × 6.2 (38.6 × 8 × 1.9)
Main machinery: 3 MTU 16 V 538 TB93 diesels; 11,265 hp(m) (8.28 MW) sustained; 3 shafts
Speed, knots: 38. **Range, n miles:** 1,700 at 15 kt
Complement: 20 (4 officers)
Guns: 2 Oerlikon GAM-BO1 20 mm, 2—12.7 mm MGs
Radars: Surface search Racal S 1690 ARPA; I-band.
Navigation: Racal Decca RM 1290A; I-band.

Comment: Ordered on 18 October 1987 from Blohm + Voss. First two completed 15 June 1989, second pair 20 August 1989. Steel hulls with aluminium superstructures. Hail and Najran based at Jiddah in the Red Sea and the others at Aziziah.

AL JOUF

6/1989, Blohm + Voss / 0080566

2 AL JUBATEL CLASS (WPB)**AL JUBATEL SALWA**

Displacement, tons: 95 full load
Dimensions, feet (metres): 86 × 19 × 6.9 (26.2 × 5.8 × 2.1)
Main machinery: 2 MTU 16V 396 TB94 diesels; 5,800 hp(m) (4.26 MW) sustained; 2 shafts
Speed, knots: 34
Range, n miles: 1,100 at 25 kt
Complement: 12 (4 officers)
Guns: 1 Oerlikon/GAM-BO1 20 mm, 2—12.7 mm MGs.
Radars: Surface search: Racal Decca AC 1290; I-band.

Comment: Built by Abeking & Rasmussen, completed in April 1987. Smaller version of Turkish SAR 33 Type. Steel construction. One based at Jizan and one at Al Wajh

AL JUBATEL 1987, Abeking & Rasmussen / 0080567

3 SLINGSBY SAH 2200 HOVERCRAFT (UCAC)

Dimensions, feet (metres): 34.8 × 13.8 (10.6 × 4.2)
Main machinery: 1 Deutz BF6L913C diesel; 192 hp(m) (141 kW) sustained; lift and propulsion
Speed, knots: 40
Range, n miles: 500 at 40 kt
Complement: 2
Military lift: 2.2 tons or 16 troops
Guns: 1 - 7.62 mm MG.

Comment: Supplied by Slingsby Amphibious Hovercraft, York in December 1990. Have Kevlar armour. These craft have replaced the SRN type.

SAH 2200 1990, Slingsby / 0080568

1 TRAINING SHIP (AXL)**TABBOUK**

Displacement, tons: 585 full load
Dimensions, feet (metres): 196.8 × 32.8 × 5.8 (60 × 10 × 1.8)
Main machinery: 2 MTU MD 16V 538 T880 diesels; 5,000 hp(m) (3.68 MW) sustained, 2 shafts
Speed, knots: 20
Range, n miles: 3,500 at 12 kt
Complement: 26 (6 officers) plus 70 trainees
Guns: 1 Oerlikon GAM-BO1 20 mm
Radars: Surface search: Racal Decca TM 1226; I-band.
Navigation: Racal Decca 2690BT; I-band.

Comment: Built by Bayerische, Germany and commissioned 1 December 1977. Based at Jiddah.

5 GRIFFON 8000 TD(M) CLASS (HOVERCRAFT) (LCAC)

Displacement, tons: 18.2; 24.6 full load
Dimensions, feet (metres): 69.5 × 36.1 × 1 (21.15 × 11 × 0.32)
Main machinery: 2 MTU 12V 183 TB32 V12 diesels; 1,600 hp (1.2 MW)
Speed, knots: 50
Range, n miles: 400 at 45 kt
Complement: 4 (2 officers) (accommodation for further 16)
Guns: 1 - 12.7 mm MG
Radars: Raytheon R-80; I-band.

Comment: Five hovercraft ordered from Griffon in 2000 for delivery in 2001. Payload of about 8 tonnes. Similar to those supplied to Indian Coast Guard but with different superstructure. Three based on west coast and two on east coast.

GRIFFON 8000 (Indian colours) 9/2000, Indian Coast Guard / 0104592

INSHORE PATROL CRAFT (PBI)

Numbers	Type	Date	Speed
12	Rapier 15.2 m	1978	28
2	Enforcer, USA, 9.4 m	1980s	30
30	Simonneau SM 331, 9.3 m	1992	40
40	Simonneau Naja 12	1990	50
60	Boston Whalers, 8.3 m	1980s	30

Comment: About 150 mostly Task Force Boats. Many are based at Jiddah with the rest spread around the other bases. Most are armed with MGs and the larger craft have I-band radars.

SIMONNEAU SM 331 6/1992, Simonneau Marine / 0080569

3 SMALL TANKERS (YO)**AL FORAT DAJLAH AL NIL**

Displacement, tons: 233 full load
Dimensions, feet (metres): 94.2 × 21.3 × 6.9 (28.7 × 6.5 × 2.1)
Main machinery: 2 Caterpillar D343 diesels; 2 shafts
Speed, knots: 12
Range, n miles: 500 at 12 kt
Radars: Navigation: Decca 110; I-band.

Comment: Al Nil based at Aziziah, the others at Jiddah

Senegal

MARINE SÉNÉGALAISE

**Country Overview**

The Republic of Senegal was a French colony until 1960 when it gained independence. Situated in western Africa, it has an area of 75,750 square miles and is bordered to the north by Mauritania and to the south by Guinea and Guinea-Bissau. Its 286 n mile coastline with the Atlantic Ocean is divided in two by the coast of Gambia with which the country was united to form the confederation

of Senegambia between 1981-89. The capital, largest city and principal port is Dakar. Territorial seas (12 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has been declared but its limits have only been partially defined by boundary agreements.

Headquarters Appointments

Head of Navy: Captain Ousmane Oumar Baïa Kane

Personnel

- (a) 2009 900 officers and men
 (b) 2 years' conscript service

Bases

Dakar, Elinkine (Casamance)

PATROL FORCES

Notes: Four RAIDCO 12 m RIBs (*Ibra Faye* P 16, *Ousmane Diop Coumba Pathe* P 17, *El Hadji Mbor Diagne* P 18, *Aliou Codou N'Doye* P 19) with waterjet propulsion, are operated by the Fishery Protection Directorate. They were procured in 2005.

1 IMPROVED OSPREY 55 CLASS (LARGE PATROL CRAFT) (PBO)

Name	No	Builders	Commissioned
FOUTA		Danyard A/S, Fredrikshavn	1 June 1987

Displacement, tons: 470 full load
Dimensions, feet (metres): 180.5 × 33.8 × 8.5 (55 × 10.3 × 2.6)
Main machinery: 2 MAN Burmeister & Wain Alpha 12V23/30-DVO diesels; 4,400 hp(m) (3.23 MW) sustained; 2 shafts; cp props
Speed, knots: 20. **Range, n miles:** 4,000 at 16 kt
Complement: 38 (4 officers) plus 8 spare
Guns: 1 Hispano Suiza 30 mm, 1 Giat 20 mm.
Radars: Surface search: Furuno FR 1411; I-band.
Navigation: Furuno FR 1221; I-band

Comment: Ordered in 1985. Intended for patrolling the EEZ rather than as a warship, hence the modest armament. A 25 kt rigid inflatable boat can be launched from a stern ramp which has a protective hinged door. Similar vessels built for Morocco.

FOUTA 5/2008*, B Prézélin / 1335793

1 PR 72M CLASS (PBO)

Name	No	Builders	Commissioned
NJAMBUUR	P 773	SFCN, Villeneuve-la-Garenne	Feb 1983

Displacement, tons: 451 full load
Dimensions, feet (metres): 191.0 × 26.9 × 7.2 (58.2 × 8.2 × 2.2)
Main machinery: 2 UD 33V16M6D diesels, 5,470 hp (4.08 MW) sustained; 2 shafts
Speed, knots: 16. **Range, n miles:** 2,160 at 15 kt
Complement: 46
Guns: 2 OTO Molar 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.7 n miles); weight of shell 6 kg
 2—20 mm Oerlikon 2—12.7 mm MGs
Weapons control: 2 CSEE Naja optical directors.
Radars: Surface search: FR 7112 and FR 2105; I-band

Comment: Ordered in 1979 and launched 23 December 1980. Completed September 1981 for shipping of armament at Lorient. Underwent overhaul at Lorient 2001–2002.

NJAMBUUR 5/2008*, B Prézélin / 1335296

2 PR 48 CLASS (LARGE PATROL CRAFT) (PBO)

Name	No	Builders	Launched	Commissioned
POPONGUINE	—	SFCN, Villeneuve-la-Garenne	22 Mar 1974	10 Aug 1974
PODOR	—	SFCN, Villeneuve-la-Garenne	20 July 1976	13 July 1977

Displacement, tons: 250 full load
Dimensions, feet (metres): 156 × 23.3 × 8.1 (47.5 × 7.1 × 2.5)
Main machinery: 2 SACM AGO V12 CZSHR diesels; 4,340 hp(m) (3.2 MW); 2 shafts
Speed, knots: 23. **Range, n miles:** 2,000 at 16 kt
Complement: 33 (3 officers)
Guns: 2 Bofors 40 mm/70 2—7.62 mm MGs
Radars: Surface search: Furuno; I-band

Comment: Ordered in 1973 and 1975. *Saint-Louis* decommissioned in 2003 and the operational status of the remaining two is doubtful.

PODOR 5/2008*, B Prézélin / 1335294

1 INTERCEPTOR CLASS (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
SÉNÉGAL II	—	Los Bateaux Turbec Ltd, Sainte Catherine, Canada	Feb 1979

Displacement, tons: 62 full load
Dimensions, feet (metres): 86.9 × 19.3 × 5.2 (26.5 × 5.8 × 1.6)
Main machinery: 2 diesels; 2,700 hp (2.01 MW); 2 shafts
Speed, knots: 32.5
Guns: 1—20 mm Giat
Radars: Surface search: Furuno; I-band

Comment: Used for EEZ patrol. *Sine-Saloum II* and *Casamance II* were decommissioned in 2004.

SÉNÉGAL II 5/2008*, B Prézélin / 1335795

2 PETERSON MK 4 CLASS (PB)

Name	No	Builders	Commissioned
MATELOT ALIOUNE SAMB	—	Peterson Builders Inc	28 Oct 1993
MATELOT OUMAR NDOYE	—	Peterson Builders Inc	4 Nov 1993

Displacement, tons: 22 full load
Dimensions, feet (metres): 51.3 × 14.8 × 4.3 (15.6 × 4.5 × 1.3)
Main machinery: 2 Detroit 6V-92TA diesels, 520 hp (388 kW); 2 shafts
Speed, knots: 24
Range, n miles: 500 at 20 kt
Complement: 6
Guns: 2—12.7 mm (twin) MGs 2—7.62 mm (twin) MGs
Radars: Surface search: Furuno; I-band

Comment: Ordered in September 1992. Same type delivered to Cape Verde, Gambia and Guinea-Bissau (since deleted) under FMS. Carries an RIB on the stern.

OUMAR NDOYE 5/2008*, B Prézélin / 1335201

2 VCSM CLASS (PB)

Name	No	Builders	Commissioned
ALPHONSE FAYE	—	RAIDCO Marine	July 2004
BAYE SOGUI	—	RAIDCO Marine	May 2005

Displacement, tons: 42
Dimensions, feet (metres): 85.8 × 17.1 × 4.9 (26.0 × 5.2 × 1.5)
Main machinery: 2 MAN V12 diesels; 2,000 hp (1.47 MW); 2 shafts
Speed, knots: 25. **Range, n miles:** 530 at 15 kt
Complement: 5
Guns: 1—7.62 mm MG
Radars: Navigation: Furuno; I-band

Comment: Two Raidco Marine RPB 20 class were procured in July 2004 and May 2005 respectively. Similar to French VCSM class. Operated by the Fishery Protection Directorate. Two others are operated by the Customs service.

BAYE SOGUI 6/2008*, Senegal Navy / 1335302

LAND-BASED MARITIME AIRCRAFT

Numbers/Type: 1 De Havilland Canada DHC-8 Twin Otter.
Operational speed: 168 kt (311 km/h).
Service ceiling: 23,200 ft (7,070 m).
Range: 1,480 n miles (2,705 km).
Role/Weapon systems: Procured in 1982. Used for coastal surveillance but effectiveness limited. Backed up by a French Navy Breguet Atlantique based at Dakar. Sensors: Search radar. Weapons: Unarmed.

AMPHIBIOUS FORCES

1 CTM (LCM)

CTM (ex-CTM 2, ex-CTM 5)

Displacement, tons: 150 full load
Dimensions, feet (metres): 78 × 21 × 4.2 (23.8 × 6.4 × 1.3)
Main machinery: 2 Poyaud 520 V8 diesels, 225 hp(m) (165 kW); 2 shafts
Speed, knots: 9.5
Range, n miles: 350 at 8 kt
Complement: 6
Military lift: 90 tons

Comment: Transferred from French Navy in September 1999. Has a bow ramp.

CTM 12/2001, 0525011

1 EDIC CLASS (LCT)

FALEMÉ II (ex-Javeline L 9070)

Displacement, tons: 710 full load
Dimensions, feet (metres): 194.9 × 39 × 5.9 (59.4 × 11.9 × 1.8)
Main machinery: 2 SACM Urt Diesel UD 30 V12 M1 diesels, 1,200 hp(m) (882 kW) sustained; 2 shafts
Speed, knots: 10.5
Range, n miles: 1,000 at 10 kt
Complement: 12
Military lift: 336 tons
Guns: Fitted for 2 Giat 20F2 20 mm.
Radars: Navigation: Racal Decca 1229; I-band.

Comment: Ex-Javeline was the first of the second series of EDICs. Originally commissioned in 1967, it was loaned to Senegal on 18 October 1995 and was formally transferred on 12 January 2000. The craft replaced a first series EDIC.

FALEMÉ II 5/2008*, B Prézelin / 1335299

1 EDIC 700 CLASS (LCT)

Name	No	Builders	Launched	Commissioned
KARABANE	841	SFCN, Villeneuve-la-Garenne	6 Mar 1986	30 Jan 1987

Displacement, tons: 736 full load
Dimensions, feet (metres): 193.5 × 39 × 5.8 (59 × 11.9 × 1.7)
Main machinery: 2 SACM MGO 176 V12 ASH diesels, 1,200 hp(m) (882 kW) sustained; 2 shafts
Speed, knots: 12
Range, n miles: 1,800 at 10 kt
Complement: 18 (33 spare billets)
Military lift: 12 trucks; 340 tons equipment
Guns: Fitted for 2 Giat 20 mm.
Radars: Navigation: Racal Decca 1226; I-band.

Comment: Ordered May 1985, delivered 23 June 1986 from France. Second of class from France in 1995 and returned again in 1998.

KARABANE 5/2008*, B Prézelin / 1335300

AUXILIARIES

Notes: There is also a 44 m buoy tender *Samba Laoba Fall*. Built by Océa des Sabes d'Olonne in 2007, it is civilian operated.

1 HARBOUR TUG (YTM)

CHEIKH OUMAR FALL (ex-Olivier)

Displacement, tons: 105
Dimensions, feet (metres): 68.9 × 22.6 × 10.5 (21.0 × 6.9 × 3.2)
Main machinery: 1 SACM-Wärtsilä UD 30 V12 diesel; 700 hp (515 kW); 1 shaft
Speed, knots: 10
Complement: 6
Radars: Navigation: Raytheon; I-band.

Comment: Former French navy tug, completed at St Nazaire in 1965, donated in 1999.

CHEIKH OUMAR FALL 5/2008*, B Prézelin / 1335298

1 FISHERIES RESEARCH VESSEL (AG)

ITAF DEME

Displacement, tons: 318
Dimensions, feet (metres): 124.7 × 26.2 × 11.2 (38.0 × 8.0 × 3.4)
Main machinery: 1 Yanmar diesel; 1,000 hp (810 kW); 1 shaft
Speed, knots: 12
Complement: 18
Radars: Navigation: Furuno; I-band.

Comment: Modified purse-seiner converted to a fishery research role. Operated by the navy.

ITAF DEME 5/2008*, B Prézelin / 1335291

Serbia

Country Overview

The Republic of Serbia was formed following a referendum on 21 May 2006 in which the people of Montenegro voted for independence and for the dissolution of the Federal Republic of Serbia and Montenegro; this itself was the rump of the former Yugoslavia. On 5 June 2006 the Serbian National Assembly decreed Serbia to be the continuing international personality of Serbia and Montenegro. With an area of 34,116 square miles, it is located in south-eastern Europe in the Balkan Peninsula and is bordered to the west by Montenegro, Bosnia and Croatia, to the north by Hungary, to the east by Romania and Bulgaria

and to the south by Albania and Macedonia. A land-locked country, the principal river is the Danube which enters the country from the north and after passing through the capital Belgrade goes on to form part of the eastern border. Other rivers include the Sava and Tisza.

The provisions of the Union Constitution were that, in the event of dissolution, the armed forces of Serbia and Montenegro would be split in such a way that each state keeps the assets in its territory. The former navy of Serbia and Montenegro transferred to Montenegro in June 2006, except for the former Danube Flotilla, which is now subordinate to the Serbian land forces as the River Detachment. While the future of the detachment is unclear,

it is likely to be reduced and reshaped to undertake civil authority missions, the responsibility for which may be transferred to the police.

Headquarters Appointments

Commander, Riverine Flotilla:
Captain Nebojša Joksimovic

Bases

Novi Sad and Pancevo.

PATROL FORCES

6 TYPE 20 BISCAYA CLASS (RIVER PATROL CRAFT) (PBR)

PC 211–216

Displacement, tons: 55 standard
Dimensions, feet (metres): 71.5 × 17 × 3.9 (21.8 × 5.3 × 1.2)
Main machinery: 2 diesels; 1,156 hp(m) (850 kW); 2 shafts
Speed, knots: 16. **Range, n miles:** 200 at 15 kt
Complement: 10
Guns: 2 Oerlikon 20 mm.
Radars: Surface search: Decca 110; I-band.

Comment: Completed in the late 1980s. Steel hull with GRP superstructure. All active with the Riverine Flotilla.

PC 215

1988, Yugoslav Navy / 0094261

1 RIVER PATROL BOAT (PBR)

PC 111

Displacement, tons: 29 full load
Dimensions, feet (metres): 79.1 × 13.5 × 2.9 (24.1 × 4.1 × 0.9)
Main machinery: 2 diesels; 652 hp(m) (486 kW); 2 shafts
Speed, knots: 17. **Range, n miles:** 720 at 17 kt
Complement: 6
Guns: 2–20 mm

Comment: Built for US Navy's Rhine River patrol and transferred in the 1950s.

PC 111

6/2008*, Freivogel Collection / 1335423

1 BOTICA CLASS (TYPE 16) (RIVER PATROL CRAFT) (PBR)

PC 302

Displacement, tons: 23 full load
Dimensions, feet (metres): 55.8 × 11.8 × 2.8 (17.0 × 3.6 × 0.8)
Main machinery: 2 diesels; 464 hp(m) (340 kW); 2 shafts
Speed, knots: 15. **Range, n miles:** 340 at 14 kt
Complement: 7
Guns: 1 Oerlikon 20 mm (fitted for). 2–7.62 mm MGs.

Comment: Built in about 1970 and reactivated having been decommissioned in the 1990s. Used for riverine patrols. Can carry up to 30 troops.

PC 302

5/2004, Sieche Collection / 0583300

 Speed, knots: 10
 Range, n miles: 660 at 10 kt
 Complement: 20
 Guns: 2 - 20 mm M71
 Radars: Navigation: Decca 101, I-band

Comment: Built in 1985. Used to degauss River vessels up to a length of 50 m.

SABAC

6/2008*, Freivogel Collection / 1335422

Seychelles

Country Overview

A former British colony, the Republic of the Seychelles became independent in 1976. Situated in the western Indian Ocean, northeast of Madagascar, the archipelago consists of some 90 islands, disposed over 13,000 square miles in two groups. The 40 islands of the northern group include the principal islands: Mahé (the largest), Praslin, Silhouette and La Digue. The 50 or so low-lying coral islands in the south are mostly uninhabited. Victoria (Mahé) is the capital,

largest town and principal port. Territorial seas (12 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has been declared but the limits have not been fully defined by boundary agreements.

Bases

Port Victoria, Mahé

Headquarters Appointments

Commander of the Coast Guard:
 Lieutenant Colonel D Gertrude

Personnel

2009: 300 including 80 air wing and 100 marines

LAND-BASED MARITIME AIRCRAFT

Numbers/Type: 1 Britten-Norman BN-2A21 Maritime Defender.
 Operational speed: 150 kt (280 km/h).
 Service ceiling: 18,900 ft (5,760 m).
 Range: 1,500 n miles (2,775 km).
 Role/Weapon systems: Coastal surveillance and surface search aircraft delivered in 1980.
 Sensors: Search radar. Weapons: Provision for rockets or guns.

Sierra Leone

Country Overview

A former British colony, Sierra Leone became independent in 1961. Located in west Africa, the country has an area of 27,699 square miles, a 217 n mile coastline with the Atlantic Ocean and is bordered to the north by Guinea and to the south by Liberia. The capital, largest city and principal port is Freetown. Territorial seas (12 n miles) and an EEZ (200 n miles) are claimed.

Headquarters Appointments

Commander Maritime Wing
Captain Daniel Mansaray

Personnel

(a) 2009: 270 (38 officers)
 (b) Voluntary service

Bases

Freetown (Murray Town) HQ and Training Base.
 Freetown (Government wharf) Main Base.
 Forward operating bases at Yeliboys, Tombo, Bonthe (Sherbo la) and Sulima.

PATROL FORCES

Notes: (1) Five small inshore patrol craft have been acquired to operate from Murray Town and the forward operating bases.
 (2) Acquisition of a surveillance aircraft and of further patrol craft is under consideration.

1 SHANGHAI III (TYPE 062/1) CLASS (PB)

Name	No	Builders	Commissioned
SIR MILTON PB 105			

Displacement, tons: 170 full load
Dimensions, feet (metres): 134.5 × 17.4 × 5.9 (41.0 × 5.3 × 1.8)
Main machinery: 4 Chinese L12-180A diesels; 4,400 hp (m) (3.22 MW) sustained; 4 shafts
Speed, knots: 25
Range, n miles: 750 at 17 kt
Complement: 43
Guns: 4 China 37 mm/63 (2 twin), 180 rds/min to 8.5 km (4.6 n miles); weight of shell 1.42 kg
 4 China 25 mm (2 twin)
Radars: Surface search: Pot Head or Anritsu 726; I-band

Comment: Transferred from China on 10 March 2006 to replace *Alimany Rassin*. Fully operational.

SIR MILTON

6/2006, RSLAF (MW) / 1164270

3 SEA ARK 32 ft CUTTERS (PB)

SEA ARK 01			

Displacement, tons: 5.5 full load
Dimensions, feet (metres): 32.0 × 12.0 × 3.2 (9.8 × 3.6 × 1.0)
Main machinery: 2 Yanmar 6LYAM-STP diesels; 740 hp (550 kW); 2 Konrad drives
Speed, knots: 34
Complement: 4
Radars: Nav gation. Furuno; I-band

Comment: Sea Ark Dauntless RAM design donated by the US on 26 May 2006. Although not permanently fitted with weapons, always patrol with light weapons. Fully operational.

SEA ARK 01

6/2006, RSLAF (MW) / 1164269

Singapore

Country Overview

Formerly under British rule, the Republic of Singapore became self-governing in 1959. It joined Malaysia in 1963, but separated from the Federation in 1965 to become a sovereign state. With an area of 247 square miles and a coastline of 104 n miles, the main island is separated from the southern tip of Malaysia by the narrow Johore Strait. There are 59 small adjacent islets. To the south the Singapore Strait, an important shipping channel linking the Indian Ocean with the South China Sea, separates the island from the Riau archipelago of Indonesia. Territorial seas (3 n miles) are claimed. An EEZ is not claimed.

Headquarters Appointments

Chief of the Navy:

Rear Admiral Chew Men Leong

Chief of Staff:

Rear Admiral Tan Kai Hoe

Fleet Commander:

Rear Admiral Ng Chee Peng

Commander Police Coast Guard:

Deputy Assistant Commissioner Teo Kian Teck

Personnel

- (a) 2009: 4,500 officers and men including 1,800 conscripts
 (b) National Service: two and a half years for Corporals and above, two years for the remainder
 (c) 5,000 reservists (operationally trained)

Bases

Tuas (Jurong), Changi, Sembawang

Organisation

Five Commands: Fleet, Naval Diving Unit, Coastal, Naval Logistics and Training

Fleet: First Flotilla (six Victory, six Sea Wolf)

Third Flotilla (four LSTs, Fast Craft at Civil Squadron)

Coastal Command: (11 Fearless, four Bedok, 12 PBs)

Coastal Command operates five unmanned Giraffe 100 air/surface surveillance radar sites at Changi, Pedra Branca, St John's Island, Sultan Shoal Lighthouse and Raffles Lighthouse. Air and surface track data is passed to HQ RSN.

Prefix to Ships' Names

RSS

Special Forces

Singapore's special forces include the Naval Diving Unit, Singapore Army Special Operations Force and Singapore Police Special Tactics and Rescue unit.

Police Coast Guard

The Police Coast Guard is a unit of the Singapore Police Force and was first established in 1924. Its role is to maintain coastal security within Singapore territorial waters and to support the Singapore Armed Forces in emergencies. Its four regional commands are Brani (SE sector), Gul (SW sector), Seletar (NE sector) and Lim Chu Kang (NW sector). The PCG HQ moved to a new site at Brani (near Sentosa) on 20 March 2006. The Coastal Patrol Squadron and Special Task Squadron operate under central control. All vessels have Police Coast Guard on the superstructure and a white-red-white diagonal stripe on the hull except for interceptor craft which have dark blue hulls with grey superstructures. Personnel numbers are about 1,000.

0 + 2 VÄSTERGÖTLAND (A 17) CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
— (ex-Västergötland)	—	Kockums, Malmö	10 Jan 1983	17 Sep 1986	27 Nov 1987
— (ex-Hälsingland)	—	Kockums, Malmö	1 Jan 1984	31 Aug 1987	20 Oct 1988

Displacement, tons: 1,500 surfaced; 1,600 dived

Dimensions, feet (metres): 198.5 × 20 × 18.4

(60.5 × 6.1 × 5.6)

Main machinery: Diesel Stirling-electric; 2 Hedemora V12A15 diesels; 2,200 hp(m) (1.62 MW); 2 Kockums Stirling Mk III AIP; 204 hp (150 kW); 1 Jeumont Schneider motor; 1,800 hp(m) (1.32 MW); 1 shaft, LIPS prop

Speed, knots: 10 surfaced; 20 dived

Complement: 27 (5 officers)

Torpedoes: 6—21 in (533 mm) tubes, 12 WASS Black Shark; wire (fibre-optic cable) guided, active/passive homing to 50 km (27 n miles) at 50 kt; warhead 250 kg; swim-out discharge

3—15.75 in (400 mm) tubes, 8 FFV Type 431/451; anti-submarine; wire-guided; active/passive homing to 20 km (10.8 n miles) at 25 kt; warhead 45 kg shaped charge or a small charge anti-intruder version is available

Mines: 12 Type 47 swim-out mines in lieu of torpedoes.

Countermeasures: ESM: Argo AR-700-S5; or Condor CS 3701; intercept

Weapons control: Ericsson IPS-17 (Sesub 900A) TFCS.

Radars: Navigation: Terma, I-band

Sonars: Atlas Elektronik CSU 83; hull-mounted, passive search and attack; medium frequency.

Flank array; passive search, low frequency.

Programmes: Original design contract awarded by the Swedish Navy to Kockums, Malmö on 17 April 1978. Contract for construction signed 8 December 1981. Following discussions between the governments of Sweden and Singapore in 2005, both submarines are to be transferred to the Singapore Navy as part of a package that includes modernisation refits to incorporate Air-Independent Propulsion (AIP) systems prior to delivery. On entry into Singapore service in about 2010, the boats are likely to replace two of the Challenger class, also procured from Sweden, that entered service from 2000.

Modernisation: The modernisation package is expected to be similar to those given to the Södermanland class. This included the installation of Air Independent Propulsion (Stirling Mk 3 AIP) by the insertion of a 12 m plug in the

pressure hull. Other work included the installation of a pressurised diver's lock-out in the base of the sail to facilitate special forces operations and a new climate control system. The Thales Optronics CK 038 periscope was upgraded with a thermal imaging camera and an improved image intensifier. A new active sonar suite, Subac, may also be installed.

Structure: Single hulled with an X-type rudder/after hydroplane design. Diving depth 300 m (984 ft). Anechoic coating

Operational: See trials of the first boat are likely to start in 2009

Opinion: The A 14 submarines transferred to Singapore in the mid-1990s under projects Riken I and Riken II gave the Singapore Navy its first experience of submarine operations. The procurement of *Västergötland* and *Hälsingland* will offer a significant improvement in capability but may again serve as a stepping-stone towards procuring a class of next-generation submarines. In this respect, further collaboration with Sweden in its A 26 submarine programme is a possibility.

CHIEFTAIN (ex-Sjöhunden)	Kockums	1966	21 Mar 1968	25 June 1969

Displacement, tons: 1,130 surfaced; 1,210 dived

Dimensions, feet (metres): 167.3 x 20 x 19
(51 x 6.1 x 5.8)

Main machinery: Diesel-electric; 2 Hedemora-Pielstick V12A/A2/15 diesels; 2,200 hp(m) (1.62 MW); 1 ASEA motor; 1,500 hp(m) (1.1 MW); 1 shaft

Speed, knots: 12 surfaced; 20 dived

Complement: 23 (7 officers)

Torpedoes: 4–21 in (533 mm) bow tubes. 10 FFV Type 613; anti-surface; wire-guided; passive homing to 15 km (8.2 n miles) at 45 kt; warhead 250 kg.

2–16 in (400 mm) tubes: 4 FFV Type 431; anti-submarine; wire-guided; active/passive homing to 20 km (10.8 n miles) at 25 kt; warhead 45 kg shaped charge.

Mines: Minelaying capability

Weapons control: UDS SUBTICS.

Radars: Navigation Terma; I-band.

Sonars: Plessey Hydra, hull-mounted; passive search and attack; medium frequency.

Programmes: It was announced on 23 September 1995 that a submarine would be acquired from Sweden for training purposes only. Three more of the same class acquired in July 1997 for conversion plus one more for spares.

Modernisation: A contract for new periscope systems was awarded to Koilmorgen Electro Optical in January 2005. Options include Model 76 and Model 90

Structure: Albacore hull. Twin-decked. Diving depth, 150 m (492 ft). Air conditioning added for tropical service, together with battery cooling

Operational: Challenger re-launched on 28 September 1997, Conqueror and Centurion on 28 May 1999 and Chieftain on 22 May 2001. Conqueror was recommissioned in Singapore on 24 July 2000 and Chieftain on 24 August 2002. Challenger and Centurion remained in Sweden to support training until January 2004 when they were transported to Singapore. Ex-Sjöhasten was also shipped as a source of spares. Centurion was recommissioned on 26 June 2004. The four submarines form 171 squadron. Based at Changi

STALWART	72	Singapore SB and Marine	12 Nov 2005	9 Dec 2005	16 Jan 2009
SUPREME	73	Singapore SB and Marine	17 May 2005	9 May 2006	16 Jan 2009

Displacement, tons: 3,200 full load
 Dimensions, feet (metres): 374.0 x 52.5 x 16.4
 (114 x 16.0 x 5.0)
 Main machinery: CODAD; 4 MTU 20V 8000 M90 diesels;
 48,276 hp (36 kW); 2 shafts; cp props; bow thruster
 Speed, knots: 27. Range, n miles: 4,000 at 15 kt
 Complement: 71 + 15 aircrew

Missiles: SSM: 8 Boeing Harpoon ●, active radar homing to 130 km (70 n miles) at 0.9 Mach, warhead 227 kg.
 SAM Eurosam SAAAM, 2 octuple Sylver A 43VLS, 2 octuple Sylver A 50VLS ● for MBDA Aster 15; command guidance active radar homing to 15 km (8.1 n miles) anti-missile and to 30 km (16.2 n miles) anti-aircraft. 32 missiles
 Guns: 1 OTO Melara 3 in (76 mm) 62 Super rapid ●, 120 rds/ min to 16 km (8.7 n miles); weight of shell 6 kg. 2—20 mm. 2—12.7 mm MGs.

Torpedoes: 6—324 mm (2 triple (recessed)) ● tubes. Eurotorp A 244/S Mod 3; anti-submarine; active/passive homing to 7 km (3.8 n miles) at 33 kt; warhead 34 kg (shaped charge).
 Countermeasures: Decoys: 3 EADS NGDS 8-barrelled chaff ●, IR and anti-torpedo decoy launchers.
 ESM RAFAEL C-PEARL-M, intercept
 Combat data systems: DSTA/ST Electronics system
 Weapons Control: 2 EADS Nagir 2000 optronic directors ●.
 Radars: Air/search: Thales Herakles 3-D radar multifunction ●, E/F-band.
 Surface search/Navigation: 2 Terma Scanter 2001 ●, I-band.
 Sonars: EDO 980 ALOFTS VDS; low frequency (2 kHz).
 Helicopters: 1 S-70B Seahawk ●.

Programmes: Ordered from DCN International on 6 March 2000. First steel cut for hulls two and three on 2 October 2002. Prime Contractor is Singapore's Defence Science and Technology Agency (DSTA) who are also leading combat system integration in partnership with ST Electronics.

FORMIDABLE (Scale 1 : 1,200), Ian Sturton / 1153482

FORMIDABLE 5/2005, B Prézélin / 1133566

Structure: Derived from La Fayette class but there are notable differences to accommodate the weapon and sensor fit. Two of the four VLS modules are reported to be Sylver A 50, capable of launching the longer Aster 30 area-defence missile. Aster 15 successfully launched from Intrepid on 3 April 2008.
 Operational: The ships form 185 Squadron based at Changi.

STEADFAST 8/2006, Michael Nitz / 1353365

FORMIDABLE 10/2004, B Prézélin / 1044523

CORVETTES

6 VICTORY CLASS (FSGM)

Name	No	Builders	Launched	Commissioned
VICTORY	P 88	Lürssen Werft, Bremen	8 June 1988	18 Aug 1990
VALOUR	P 89	Singapore SB and Marine	10 Dec 1988	18 Aug 1990
VIGILANCE	P 90	Singapore SB and Marine	27 Apr 1989	18 Aug 1990
VALIANT	P 91	Singapore SB and Marine	22 July 1989	25 May 1991
VIGOUR	P 92	Singapore SB and Marine	1 Dec 1989	25 May 1991
VENGEANCE	P 93	Singapore SB and Marine	23 Feb 1990	25 May 1991

Displacement, tons: 595 full load

Dimensions, feet (metres): 204.7 oa; 190.3 wl × 27.9 × 10.2 (62.4; 58 × 8.5 × 3.1)

Main machinery: 4 MTU 16V 538 TB93 diesels, 15,020 hp (11 MW) sustained; 4 shafts

Speed, knots: 35

Range, n miles: 2,000 at 22 kt

Complement: 49 (8 officers)

Missiles: SSM: 8 McDonnell Douglas Harpoon ●; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg

SAM: 2 Octuple (AI/Rafael Barak 1 ● radar or optical guidance to 10 km (5.5 m) at 2 Mach; warhead 22 kg

Guns: 1 OTO Melara 3 in (76 mm)/62 Super Rapid ●; 120 rds/min to 16 km (8.7 n miles); weight of shell 6 kg. 4 CIS 50 12.7 mm MGs

Torpedoes: 6—324 mm Whitehead B 515 (2 triple tubes ●. Whitehead A 244S; anti-submarine; active/passive homing to 7 km (3.8 n miles) at 33 kt; warhead 34 kg (shaped charge).

Countermeasures: Decoys: 2 Plessey Shield 9-barrelled chaff launchers ●. 4 Rafael (2 twin) long-range chaff launchers to be fitted below the bridge wings.

ESM: Elisra SEWS ●; intercept.

ECM: Rafael RAN 1101; ● jammer.

Combat data systems: Elbit command system. SATCOM ●.

Weapons control: Elbit MSIS optronic director ●.

VICTORY

(Scale 1 : 600), Ian Sturton / 011480Z

Radars: Surface search: Ericsson/Radamec Sea Giraffe 150HC ●; G/H-band.

Navigation: Kelvin Hughes 1007; I-band.

Fire control: 2 Elta EL/M-2221(X) ●; I/J/K band

Sonars: Thomson Sintra TSM 2064; VDS ●; active search and attack.

Programmes: Ordered in June 1986 to a Lürssen MGB 62 design similar to Bahrain and UAE vessels.

Modernisation: Barak launchers fitted on either side of the VDS, together with a second fire-control radar on the platform aft of the mast and an optronic director on the bridge roof. Rudder roll stabilisation retrofitted to improve sea-keeping qualities. Unidentified EW antennae have been installed below RAN 1101

Operational: Form 188 Squadron, part of the First Flotilla Designated Missile Corvettes (MCI). First live Barak firing in September 1997.

VENGEANCE

5/2004, David Boey / 1044608

VENGEANCE

7/2008, John Mortimer / 1353366

SHIPBORNE AIRCRAFT

Numbers/Type: 6 Sikorsky S-70B Seahawk.
Operational speed: 135 kt (250 km/h).
Service ceiling: 10,000 ft (3,050 m).
Range: 600 n miles (1,110 km).

Role/Weapon systems: Contract placed 21 January 2005 for six new helicopters for operation from Formidable class frigates. Delivery by 2010. Roles ASW, ASV and surveillance. Weapons and sensors to be announced.

LAND-BASED MARITIME AIRCRAFT

Notes: (1) The Air Force also has 40 F-16D Block 52-, 28 F-5 S/T Tiger II and 20 F-16C. (2) There are also six CH-47D used for maritime tasks and 20 AH-64D Apache Longbow. (3) Plans to replace E-2C Hawkeye aircraft with four Gulfstream 550 (G 550) AEW aircraft were announced in May 2007.

Numbers/Type: 4 Northrop Grumman E-2C Hawkeye.
Operational speed: 323 kt (598 km/h).
Service ceiling: 30,800 ft (9,390 m).
Range: 1,000 n miles (1,850 km).

Role/Weapon systems: Delivered in 1987 for air control and surveillance of shipping in sea areas around Singapore. Form 111 Squadron. Sensors: APS-138 radar; datalink for SSM targeting. Weapons: Unarmed.

HAWKEYE 9/2003, David Booy / 056/531

Numbers/Type: 5 Fokker F50 Mk 2S Enforcer.
Operational speed: 220 kt (463 km/h).
Service ceiling: 29,500 ft (8,990 m).
Range: 2,700 n miles (5,000 km).

Role/Weapon systems: In service from September 1995. Part of Air Force 121 Squadron but with mixed crews and under naval op con. One possibly modified for Sigint. Sensors: Texas Instruments APS-134(V)7 radar; GEC FLIR; Elta ESM. Jammer fitted under wing-tip. Weapons: Harpoon ASM, mines, A-244S torpedoes.

FOKKER F 50 9/2003, David Booy / 056/532

PATROL FORCES

2 RAFAEL PROTECTOR UNMANNED SURFACE VEHICLES (USV)

Displacement, tons: To be announced
Dimensions, feet (metres): 29.5 x 7 x 7 (9.0 x 7 x 7)
Main machinery: 1 diesel; 1 waterjet propulsor
Speed, knots: 30
Guns: 1 Mini-Typhoon stabilised 12.7 mm MG.
Weapons control: Toplite EO sensor pod.

Comment: Developed jointly by Rafael and Aeronautics Defense Systems, Protector was first revealed in June 2003. It is an unmanned patrol craft based on an 9 m Rigid Inflatable Boat (RIB) with composite-materials superstructure that encloses the sensor pod, navigation radar, GPS antenna and gyro-stabilised inertial navigation system. Five video channels are used to transmit the outputs from the Toplite and two deck-mounted cameras back to a remote operator. The vessel also carries microphones and loudspeakers, allowing the operator to hail the crew of a suspicious vessel. With an endurance of about eight hours, it can be controlled by line-of-sight communications from ship or shore for various missions such as force protection, anti-terror surveillance and reconnaissance, mine warfare and electronic warfare. An unconfirmed number procured by the Singapore Navy in 2004 to support maritime security and interdiction operations in the Northern Arabian Gulf. They were operated by RSS *Resolution* during a deployment that ended in March 2005. The Singapore Navy also participates in the US Navy's Spartan technology demonstrator programme.

PROTECTOR 5/2005, Guy Toremans / 117/050

11 FEARLESS CLASS (PCM/PGM)

Name	No	Builders	Launched	Commissioned
FEARLESS	94	Singapore STEC	18 Feb 1995	5 Oct 1996
BRAVE	95	Singapore STEC	9 Sep 1995	5 Oct 1996
GALLANT	97	Singapore STEC	27 Apr 1996	3 May 1997
DARING	98	Singapore STEC	27 Apr 1996	3 May 1997
DAUNTLESS	99	Singapore STEC	23 Nov 1996	3 May 1997
RESILIENCE	82	Singapore STEC	23 Nov 1996	7 Feb 1998
UNITY	83	Singapore STEC	19 July 1997	7 Feb 1998
SOVEREIGNTY	84	Singapore STEC	19 July 1997	7 Feb 1998
JUSTICE	85	Singapore STEC	18 Oct 1997	7 Feb 1998
FREEDOM	86	Singapore STEC	18 Oct 1997	22 Aug 1998
INDEPENDENCE	87	Singapore STEC	18 Apr 1998	22 Aug 1998

Displacement, tons: 500 full load
Dimensions, feet (metres): 180.4 x 28.2 x 8.9 (55 x 8.6 x 2.7)
Main machinery: 2 MTU 12V 596 TE90 diesels; 8,564 hp(m) (6.29 MW) sustained, 2 Kamewa water-jets
Speed, knots: 20
Range, n miles: 1,800 at 15 kt
Complement: 32 (5 officers)

Missiles: SAM: Matra Simbad twin launcher; Mistral, IR homing to 4 km (2.2 n miles); warhead 3 kg
Guns: 1 OTO Melara 3 in (76 mm)/62 Super Rapid; 120 rds/min to 16 km (8.7 n miles); weight of shell 6 kg 4 CIS 50 12.7 mm MGs. 1—25 mm Bushmaster (B2).
Torpedoes: 6—324 mm Whitehead B515 (triple) tubes; (94-99) Whitehead A244S; active/passive homing to 7 km (3.8 m) at 33 kt; warhead 34 kg (shaped charge).
Countermeasures: Decoys: 2 GEC Marine Shield III 102 mm sextuple fixed chaff launchers
ESM: Elisra NS-9010C; intercept
Weapons control: ST 3100 WCS. Elbit MSIS optronic director.
Raders: Surface search and fire control, Elta EL/M-2228(X); I-band Navigation. Kelvin Hughes 1007; I-band.
Sonars: Thomson Sintra TSM 2362 Gudgeon; hull-mounted; active attack; medium frequency (94-99 only). Towed array fitted in *Brave*.

Programmes: Contract awarded on 27 February 1993 for 12 patrol vessels to Singapore Shipbuilding and Engineering.
Structure: First six are ASW specialist ships. All have water-jet propulsion. Second batch were to have been fitted with Gabriel II SSMs but this plan has been shelved. MSIS director being fitted. *Fearless* modified with new EW radome on mainmast. Simbad SAM in *Brave* replaced by towed array and in *Resilience* by 25 mm Bushmaster. *Sovereignty* has deck crane to facilitate special forces operations.
Operational: All serve with Coastal Command. The first five form 189 Squadron and the second six 182 Squadron. *Unity* is to be used as a test bed for new technologies including an Indep 21 combat system. *Courageous* badly damaged in collision on 3 January 2003 and unlikely to be repaired.

SOVEREIGNTY 5/2004, David Booy / 1044510

BRAVE (with VDS) 3/2004, Bob Fildes / 1044509

RESILIENCE 8/2007, Bob Fildes / 1353357

12 INSHORE PATROL CRAFT (PB)

FB 31-42

Displacement, tons: 20 full load
 Dimensions, feet (metres): 47.6 x 13.8 x 3.6 (14.5 x 4.2 x 1.1)
 Main machinery: 2 MAN D2848 LE 401 diesels; 1,341 hp(m) (1 MW); 2 Hamilton 362 water-jets
 Speed, knots: 30
 Complement: 5
 Guns: 1—40 mm grenade launcher, 1—12.7 mm MG, 2—7.62 mm MGs
 Radars: Surface search Racal Decca; I-band

Comment: Built by Singapore SBEC and delivered in 1990-91. Based at Tuas. Designated Fast Boats (FB). Some are kept in storage at Tuas. Similar to Police PT 1-19 class.

FB 35

5/2007, Guy Toremans / 115/601

100 LANDING CRAFT (LCVP/FCEP)

Displacement, tons: 4 full load
 Dimensions, feet (metres): 44.6 x 12.1 x 2 (13.6 x 3.7 x 0.6)
 Main machinery: 2 MAN D2866 LE diesels; 816 hp(m) (600 kW); sustained; 2 Hamilton 362 water-jets
 Speed, knots: 20. Range, n miles: 100 at 20 kt
 Complement: 3
 Military lift: 4 tons or 30 troops

Comment: Fast Craft, Equipment and Personnel (FCEP), built by Singapore SBEC from 1989 and are used to transport troops around the Singapore archipelago. They have a single bow ramp and can carry a rifle platoon. More than 25 are in service and the rest in storage. Have numbers in the 500 and 800 series except for those carried in LSTs.

LCVPs

8/2003, David Boey / 0567534

4 RPL TYPE (LCU)

RPL 60-63

Displacement, tons: 151 standard
 Dimensions, feet (metres): 120.4 x 28 x 5.9 (36.7 x 8.5 x 1.8)
 Main machinery: 2 MAN D2540MLE diesels, 860 hp(m) (632 kW); 2 Schottel props
 Speed, knots: 10.7
 Complement: 6
 Military lift: 2 tanks or 450 troops or 110 tons cargo (fuel or stores)

Comment: First pair built at North Shipyard Point, second pair by Singapore SBEC. First two launched August 1985, next two in October 1985. Cargo deck 86.9 x 21.6 ft (26.5 x 6.6 m). Bow ramp suitable for beaching

RPL 60

6/2001, John Mortimer / 0125301

AMPHIBIOUS FORCES

Notes: (1) The Tiger 40 hovercraft acquired in 1997 is beyond repair but the design may be used again for a repeat order
 (2) Trials of at least one hovercraft ACVI were reported in early 2005

ACVI

5/2005, Guy Toremans / 117/051

10 DIVING SUPPORT CRAFT (YTB)

Comment: Boston Whalers used by the Naval Diving Unit. Armed with 7.62 mm MGs and 40 mm grenade launchers.

BOSTON WHALER

8/2000, David Boey / 0105601

6 FAST INTERCEPT CRAFT (HSIC)

Displacement, tons: 12.5 full load
 Dimensions, feet (metres): 47.6 x 9.4 x 4.4 (14.5 x 2.85 x 1.35)
 Main machinery: Triple Seatek diesels coupled to Trimax drives
 Speed, knots: 55
 Guns: 2 CIS 40 mm AGL
 2 CIS 50 12.7 mm MGs
 1—7.62 mm GPMG
 Radars: Raytheon SL 72.

Comment: Details are of craft used by Naval Diving Unit. The multistep planing hull design is similar to that in UK service. At least five other planning and wave-piercing craft are reported to be in service with special forces units.

FIG 145

9/2002, David Boey / 0554779

450 ASSAULT CRAFT (LCA)

Dimensions, feet (metres): 17.7 x 5.9 x 2.3 (5.4 x 1.8 x 0.7)
Main machinery: 1 outboard, 50 hp(m) (37 kW)
Speed, knots: 12
Military lift: 12 troops
Guns: 1—7.62 mm MG or 40 mm grenade launcher.

Comment: Built by Singapore SBEC. Man-portable craft which can carry a section of troops in the rivers and creeks surrounding Singapore island. Numbers are approximate.

ASSAULT CRAFT

9/1995, David Booy / 0080598

30 LANDING CRAFT UTILITY (LCU)

300 series

Dimensions, feet (metres): 75.4 x 19.7 x 2.6 (23 x 6 x 0.8)
Main machinery: 2 MAN 2842 LZE diesels; 4,400 hp(m) (3.23 MW); 2 Kamewa water-jets
Speed, knots: 20. **Range, n miles:** 180 at 16 kt
Complement: 4
Military lift: 18 tons
Guns: 2—12.7 mm MGs or 40 mm grenade launchers.

Comment: This is a larger and much faster version of the LCVPs. Construction started in 1993. Designated Fast Craft Utility (FCU).

LCU 394

12/2007, Chris Sattler / 1353370

4 ENDURANCE CLASS (LPDM)

ENDEAVOUR	210	Singapore Technologies Marine, Banoi	15 Oct 1998	12 Feb 2000	7 Apr 2001

Displacement, tons: 8,500 full load
Dimensions, feet (metres): 462.6 pp x 68.9 x 16.4 (141 x 21 x 5)
Main machinery: 2 Ruston 16RK 270 diesels, 12,000 hp(m) (8.82 MW); 2 shafts; Kamewa cp props; bow thruster
Speed, knots: 15
Range, n miles: 10,400 at 12 kt
Complement: 65 (8 officers)
Military lift: 350 troops, 18 tanks; 20 vehicles; 4 LCPV

Missiles: SAM. 2 Matra Simbad twin launchers for Mistral ; IR homing to 4 km (2.2 n miles); warhead 3 kg. 2 Barak octuple launchers may be fitted in due course
Guns: 1 Otobrada 76 mm/62 Super Rapid ; 120 rds/min to 16 km (8.7 n miles); weight of shell 6 kg. 1—26 mm Bushmaster (can be fitted). 5—12.7 mm MGs.

Weapons control: CS Defense NAJIR 2000 optronic director
Radars: Air/surface search: Elta EL/M-2238 , E/F-band. Navigation: Kelvin Hughes Type 1007; I-band.
Helicopters: 2 Super Pumas.

Programmes: Ordered in September 1994 and confirmed in mid-1996.

Structure: US drive through design with bow and stern ramps. Single intermediate deck with three hydraulic ramps. Helicopter platform aft. Indal ASIST helo handling system. Dockwell for four LCUs and davits for four LCVPs. Two 25 ton cranes. Four 36 m self-propelled pontoons can be secured to winching points on the ships' sides. Protector unmanned surface vehicles were operated from *Resolution* in 2005.

Operations: *Endurance* completed the RSN's first round-the-world deployment in late 2000. *Resolution* deployed in November 2004 as part of coalition forces in northern Gulf. Based at Changi. Form 191 Squadron.

KATONG	M 107	Singapore Shipbuilding	8 Apr 1994	7 Oct 1995
PUNGGOL	M 108	Singapore Sh pbuilding	16 July 1994	7 Oct 1995

Displacement, tons: 360 full load
 Dimensions, feet (metres): 155.8 × 31.5 × 7.5 (47.5 × 9.6 × 2.3)
 Main machinery: 4 Saab Scania diesels; 1,592 hp(m) (1.17 MW); coupled in pairs to 2 Voith Schneider props
 Speed, knots: 15
 Range, n miles: 2,000 at 10 kt
 Complement: 31 (5 officers)

Guns: 1 Bofors 40 mm/70 4—12.7 mm MGs.
 Mines: 2 raia
 Weapons control: Thomson CSF TSM 2061 Mk II minehunting and mine disposal system. Signal WM20 director.
 Radars: Navigation, Norcontrol DB 2000; I-band
 Sonars: Thomson-CSFTSM 2022; hull-mounted; minehunting; high frequency.

Programmes: Kockums/Karlskrona design ordered in February 1991. *Bedok* started trials in Sweden in December 1993, and was shipped to Singapore in early 1994 to complete. Prefabrication work done for the other three in Sweden with assembly and fitting out in Singapore at Bonoi Basin.

Structure: GRP hulls. Two PAP 104 Mk V ROVs embarked. Recal Precision Navigation system. Two sets of Swedish SAM minesweeping system. Magnavox GPS

Operational: Form 194 Squadron, based at Tuas.

PUNGGOL 4/2004, John Mortimer / 1133564

BEDOK 2/2005, Chris Sattler / 1133563

AUXILIARIES

Notes: (1) There is one Floating Dock with a lift of 600 tons. *FD 2* at Changi.
 (2) A 2,700 ton oil rig supply ship *MV Kendrick*, built in Poland in 1985, is chartered to support submarine rescue operations. Additional roles include acting as a target ship for submarine torpedo firings and torpedo recovery
 (3) *MV Avatar*, a Ro-Ro vessel, is leased to support submarine rescue operations.
 (4) It was announced on 14 March 2007 that ST Marine had been awarded a contract to provide a new Submarine Support and Rescue Vessel (SSRV) to replace *Kendrick* and *Avatar* in mid-2009. The new ship is to act as mothership for a DSAR-5 submarine rescue vehicle

25 PATROL CRAFT (WPB)

PT 21-29 PT 31-39 PT 61-67

Dimensions, feet (metres) 69.1 x 17.7 x 3 (18 x 5.4 x 0.9)

Main machinery: 2 MTU 16V 2000M 90 diesels; 2 Hamilton 521 waterjets

Speed, knots: 40

Complement: 5

Guns: 2-762 mm MGs.

Comment: 18 patrol craft built by Geraldton Boats, Australia in 1999. A further seven patrol craft delivered late 2000.

PT 34

8/2007, Bob Fildes / 13533/1

19 PATROL CRAFT (WPB)

PT 1-19

Displacement, tons: 20 full load

Dimensions, feet (metres) 47.6 x 13.8 x 3.9 (14.5 x 4.2 x 1.2)

Main machinery: 2 MAN D2542MLE diesels, 1,076 hp(m) (791 kW); or MTU 12V 183 TC91 diesels; 1,200 hp(m) (882 kW) maximum; 2 shafts

Speed, knots: 30. **Range, n miles:** 310 at 22 kt

Complement: 4 plus 8 spare berths

Guns: 1-762 mm MG

Radars: Surface search: Furuno or Racal Decca Bridgemaster; I-band.

Comment: First 13 completed by Singapore SBEC between January and August 1984, two more completed February 1987 and eight more (including two Command Boats) in 1989. Of aluminium construction. Four are operated by Customs and Excise. There are differences in the deckhouses between earlier and later vessels. Employed on patrol duties in southern territorial waters.

PT 12

7/2007, Bob Fildes / 13533/2

11 INTERCEPTOR CRAFT (PBF)

SAILFISH PK 10

SPEARFISH PK 20

WHITE MARLIN PK 21

SILVER MARLIN PK 22

STRIPED MARLIN PK 23

BLACK MARLIN PK 24

BLUE MARLIN PK 25

JUMPING MARLIN PK 26

BILLFISH PK 30

SWORDFISH PK 40

SPIKEFISH PK 50

Dimensions, feet (metres): 42 x 10.5 x 1.6 (12.8 x 3.2 x 0.5)

Main machinery: 3 Mercruiser 502 Magnum diesels; 3 shafts

Speed, knots: 50

Complement: 5

Guns: 1-762 mm MG

Comment: First five built locally and delivered in 1995. Colours have been changed to dark blue hulls and grey superstructures, to make the craft less visible at sea. Six more ordered from Pro Marine/North Shipyard in 1999 to a slightly different design, with twin outboard motors.

0 + 10 DAMEN STAN PATROL 3507 (PATROL CRAFT) (WPB)

Displacement, tons: 140 full load

Dimensions, feet (metres): 114.8 x 24.3 x 5.7 (35.0 x 7.4 x 1.75)

Main machinery: 3 MTU 16V 4000 M71 diesels; 3 Hamilton waterjets

Speed, knots: 38

Range, n miles: 900 at 15 kt

Complement: 14 (plus 20 passengers)

Guns: 1-25 mm, 2-12.7 mm MGs.

Comment: Following initiation of the bid process in December 2004, five bids had been received by 18 April 2005. Contract for ten new craft, to replace the Shark class, awarded to Damen Shipyards, Singapore, on 20 June 2006. The craft are of aluminium monohull construction. The contract includes the provision of training, spares and other services. The first of class is to enter service in 2009 with the completion of the programme by 2011. The craft are to be equipped with night-vision equipment.

DAMEN 3507

Slovenia

Country Overview

Formerly a constituent republic of Yugoslavia, the Republic of Slovenia proclaimed its independence in 1991. Situated in south-eastern Europe, it is bordered to the north by Austria and Hungary, to the south by Croatia and to the west by Italy. With an area of 7,820 square miles, it has a short 25 n mile coastline with

the Adriatic Sea on which the port of Koper is located. The capital and largest city is Ljubljana. Territorial waters (12 n miles) are claimed.

Headquarters Appointments

Solomon Islands

Country Overview

Formerly a British protectorate, the Solomon Islands gained independence in 1978. Its head of state is the British sovereign, who is represented by a Governor-General. Situated in the southwest Pacific Ocean, east of New Guinea, the country comprises more than 35 islands and numerous atolls which extend some 650 n miles from east to west and includes most of the Solomon

Islands group. The six main islands are: Guadalcanal, Malaita, New Georgia, San Cristobal (now Makira), Santa Isabel and Choiseul. Vella Lavella, Ontong Java, Rennell, Bellona and the Santa Cruz islands are also part of the group, together with the Florida, Russell, Reef and Duff island groups. Honiara, on Guadalcanal, is the capital and principal port. An archipelagic state, territorial seas (12 n miles) are claimed. An Exclusive Economic Zone (EEZ)

(200 n miles) is also claimed but limits have not been fully defined by boundary agreements. Patrol boats are operated by the National Surveillance and Reconnaissance Force (NSRF)

2 PACIFIC CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
LATA	03	Australian Shipbuilding Industries	3 Sep 1988
AUKI	04	Australian Shipbuilding Industries	2 Nov 1991

Displacement, tons: 162 full load
Dimensions, feet (metres): 103.3 x 28.6 x 7.5 (31.5 x 8.1 x 2.3)
Main machinery: 2 Caterpillar 3516TA diesels; 4,400 hp (3.28 MW) sustained; 2 shafts
Speed, knots: 20
Range, n miles: 2,230 at 12 kt
Complement: 14 (1 officer)
Guns: 3–12.7 mm MGs.
Radars: Surface search: Furuno 8100-D; I-band.

Comment: Built under the Australian Defence Co-operation Programme. Training, operational and technical assistance provided by the Royal Australian Navy. Aluminium construction. Nominal endurance of 10 days. The Australian government has extended the Pacific Patrol Boat programme but, following suspension of most of support of the Solomon Islands' craft in 2001, an overdue half-life refit was not completed for *Auki* until 2002. Life-extension refit for *Lata* completed at Townsville in 2005. *Auki* is due for a similar refit in 2010

South Africa

Country Overview

The Republic of South Africa is bordered to the north by Namibia, Botswana, Zimbabwe, Mozambique and Swaziland. With an area of 472,731 square miles, it has a 1,512 n mile coastline with the south Atlantic and Indian Oceans. South Africa also has sovereignty over the Prince Edward Islands which lie some 950 n miles south-east of Port Elizabeth. The independent country of Lesotho forms an enclave in the eastern part of the country. The administrative capital of South Africa is Pretoria and the judicial capital is Bloemfontein. Cape Town is the legislative capital and a prominent port. There are further ports at Mossel Bay, Port Elizabeth, East London, Durban, Saldanha, and Richards Bay. Territorial seas (12 n miles) are claimed. It also claims a 200 n mile EEZ but its limits have not been fully defined.

SHIPBORNE AIRCRAFT

Numbers/Type: 4 Agusta-Westland Super Lynx 300.

Operational speed: 120 kt (222 km/h).

Service ceiling: 10,000 ft (3,048 m).

Range: 320 n miles (593 km).

Role/Weapon systems: Ordered on 14 August 2003 for delivery in 2007. Surveillance. Sensors: Telephonics APS-143 B(V)3 radar, ESM: Sea Raven 118; Cumulus Leo Mk II FLIR. Weapons: Unarmed (torpedoes and ASM may be fitted in future upgrades).

SUPER LYNX

3/2008*, Guy Toremans / 1335820

Numbers/Type: 8 Aerospatiale SA 330E/H/J Oryx.

Operational speed: 139 kt (258 km/h).

Service ceiling: 15,750 ft (4,800 m).

Range: 297 n miles (550 km).

Role/Weapon systems: Support helicopter; allocated by SAAF for naval duties and can be embarked in *Drakensberg*. Sensors: Doppler navigation with search radar. Weapons: Unarmed but can mount Armscor 30 mm Rattler.

ORYX

9/2008*, Michael Nitz / 1335819

LAND-BASED MARITIME AIRCRAFT

Notes: Alouette utility helicopters have been replaced by Agusta A-109

Numbers/Type: 5 Douglas Turbodaks.

Operational speed: 161 kt (298 km/h).

Service ceiling: 24,000 ft (7,315 m).

Range: 1,390 n miles (2,575 km).

Role/Weapon systems: A number of Dakotas has been converted for MR/SAR and other tasks. Additional fuel tanks extend the range to 2,620 n miles (4,800 km). Sensors: Elta M-2022 search radar and FLIR; Sysdel ESM; sonobuoy acoustic processor. Weapons: Unarmed.

DOUGLAS DC-3

6/2003, South African Navy / 0568890

PATROL FORCES

Notes: (1) It is planned to acquire an initial batch of six 80-95 m offshore patrol vessels to replace the *Warrior* and *River* classes. The ships are to be built between 2011-16 in a South African shipyard. To be armed with a 76 mm gun, and possibly a short-range air-defence system, the ships are to be capable of operating helicopters. (2) As a result of experience in peacekeeping operations, an Operational Boat Squadron has been established to support the Army in peacekeeping, in other operations on lakes and rivers and in coastal security operations. Fifteen new 10 m craft are to be acquired to replace or supplement the current inventory of *Namacurra* craft.

2 WARRIOR (EX-MINISTER) CLASS (PATROL SHIP) (PG)

Name	No	Builders	Commissioned
ISAAC DYOBHA (ex-Frans Erasmus)	P 1565	Sandock Austral, Durban	27 July 1979
GALESHEWE (ex-Hendrik Mentz)	P 1567	Sandock Austral, Durban	11 Feb 1983
Displacement, tons: 430 full load	Countermeasures: Decoys: 4 ACDS launchers for chaff.	The last of the class was finally christened in March 1992. Pennant numbers restored to the ships side and stern in 1994.	
Dimensions, feet (metres): 204 x 25 x 8 (62.2 x 7.6 x 2.4)	ESM: Delcon (ADS/Sysdel) EW system.	Modernisation: Ship life extension programme included a new communications fit, improvements to EW sensors, a third-generation target designation assembly, a computer-assisted action information system served by datalinks, improvements to fire control, and a new engine room monitoring system. P 1565 completed upgrade in April 1999, P 1567 in March 2000 and P 1569 in mid-2000.	
Main machinery: 4 Maybach MTU 16V 965 TB91 diesels, 15,000 hp(m) (11 MW) sustained; 4 shafts	ECM: Elta Rattler; jammer	Operational: All are based at Simon's Town. Likely to be decommissioned in 2009. Skerpioen missiles have been removed.	
Speed, knots: 32	Combat data systems: Air/surface search, ADS Diamant (after upgrade), Mini action data automation with Link.		
Range, n miles: 1,500 at 30 kt, 3,600+ at economical speed	Radars: Elta EL/M 2208, E/F-band.		
Complement: 52 (7 officers)	Fire control: Selenia RTN 10X; I/J-band.		
Guns: 2 OTO Melara 3 in (76 mm)/62 compact, 85 rds/min to 16 km (8.7 n miles); weight of shell 6 kg, 500 rounds per gun	Programmes: Contract signed with Israel in late 1974 for this class, similar to Saar 4 class. Three built in Haifa and reached South Africa in July 1978. The ninth craft launched late March 1986. Three more improved vessels of this class were ordered but subsequently cancelled.		
2 LIW Mk 1 20 mm 2-12.7 mm MGs.			

GALESHEWE

9/2008*, Michael Nitz / 1335818

3T CRAFT CLASS (PB)

Name	No	Builders	Commissioned
TOBIE	P 1552	T Craft International, Cape Town	18 July 2003
TERN	P 1553	T Craft International, Cape Town	18 July 2003
TEKWANE	P 1554	T Craft International, Cape Town	22 July 2003

Displacement, tons: 36 full load
Dimensions, feet (metres): 72.2 x 23 x 3 (22 x 7 x 0.9)
Main machinery: 2 ADE 444TI 12V diesels; 2,000 hp (1.5 MW); 2 Hamilton waterjets
Speed, knots: 32. **Range, n miles:** 530 at 22 kt
Complement: 16 (1 officer)
Guns: 1—12.7 mm MG
Weapons control: Hesis optical director.
Radars: Surface search: Racal Decca; I-band.

Comment: Twin hulled catamarans of GRP sandwich construction. Capable of carrying up to 15 people. Originally ordered in mid-1991 but not fully commissioned until 2003. Carries an RIB in the stern well. Three of this type built for Israel in 1997 *Tekwane* based at Durban, and the other two at Simon's Town.

TOBIE 9/2008*, Michael Nitz / 1335877

21 NAMACURRA CLASS (INSHORE PATROL CRAFT) (PB)

Y 1500 series

Displacement, tons: 5 full load
Dimensions, feet (metres): 29.5 x 8 x 2.8 (9 x 2.7 x 0.8)
Main machinery: 2 Yamaha outboards; 380 hp (279 kW)
Speed, knots: 32. **Range, n miles:** 180 at 20 kt
Complement: 4
Guns: 1—12.7 mm MG. 2—7.62 mm MGs
Depth charges: 1 rack
Radars: Surface search. Furuno, I-band.

Comment: Built in South Africa in 1980–81. Can be transported by road. Two transferred to Malawi in 1988 and 2008 and Y 1506 has sunk at sea. Y 1501 and Y 1510 donated to Namibia on 29 November 2002 and Y 1507 and Y 1530 donated to Mozambique in 2004. Two further craft donated to the Angolan Navy in 2006. Based at Simon's Town, Durban, Cape Town, Saldanha Bay, Gordon's Bay, Port Elizabeth and East London. Three are operated on Lake Tanganyika as part of a peace-keeping force in Burundi.

NAMACURRA 2/2008*, Guy Toremans / 1335816

MINE WARFARE FORCES

Notes: Mine countermeasures capability is likely to be replaced by autonomous underwater vehicles rather than by specialist ships.

3 RIVER CLASS (COASTAL MINEHUNTERS) (MHC)

Name	No	Builders	Commissioned
UMKOMAAS (ex-Navors I)	M 1498	Abeking & Rasmussen/Sandock Austral	13 Jan 1981
UMZIMKULU (ex-Navors III)	M 1142	Sandock Austral	30 Oct 1981
UMHLOTI (ex-Navors IV)	M 1212	Sandock Austral	15 Dec 1981

Displacement, tons: 380 full load
Dimensions, feet (metres): 157.5 x 27.9 x 8.2 (48 x 8.5 x 2.5)
Main machinery: 2 MTU 12V 652 TB81 diesels; 4,515 hp (3.32 MW); 2 Voith Schneider props
Speed, knots: 16. **Range, n miles:** 2,000 at 13 kt
Complement: 40 (7 officers)
Guns: 1 Derlikon 20 mm GAM-801 2—12.7 mm MGs. 2—7.62 mm MGs
Countermeasures: MCM: 2 PAP 104 remote-controlled submersibles.
Radars: Navigation; Decca; I-band.
Sonars: Klein VDS, side scan, high frequency

Comment: Ordered in 1978 as Research Vessels to be operated by the Navy for the Department of Transport. The lead ship *Navors I* was shipped to Durban from Germany in the heavy lift ship *Uhenfels* in June 1980 for fitting out, shortly followed by the second. The last pair were built in Durban. The vessels were painted blue with white upperworks and formed the First Research Squadron. Painted grey and renamed in 1982 but continued to fly the national flag and not the naval ensign. The prefix RV was only changed to SAS on 3 February 1988 when they were formally accepted as naval ships. Minehunting capability could be enhanced by substituting the diving container on the after deck with lightweight mechanical and acoustic sweeping gear. Carry an RIB and a decompression chamber. M1499 refitted in 2002. M 1213 placed in reserve in 2005 and unlikely to be re-activated. The remaining three are to continue in service until 2010.

SURVEY AND RESEARCH SHIPS

Notes: It is planned to acquire a new hydrographic survey ship to replace *Protea*. The ship is likely to be built in South Africa, in parallel with but distinct from the offshore patrol ship project, and is planned to enter service in about 2015.

1 HECLA CLASS (AGSH)

Name	No	Builders	Commissioned
PROTEA	A 324	Yarrow (Shipbuilders) Ltd	23 May 1972

Displacement, tons: 2,733 full load
Dimensions, feet (metres): 280.1 x 49.1 x 15.6 (79.3 x 15 x 4.7)
Main machinery: Diesel-electric; 3 MTU diesels; 3,840 hp (2.68 MW) sustained; 3 generators; 1 motor; 2,000 hp (1.49 MW); 1 shaft; cp prop; bow thruster
Speed, knots: 14
Range, n miles: 12,000 at 11 kt
Complement: 124 (10 officers)
Guns: 2—12.7 mm MGs
Radars: Navigation Racal Decca; I-band.
Helicopters: 1 Alouette III.

Comment: Laid down 20 July 1970. Launched 14 July 1971. Equipped for hydrographic survey with limited facilities for the collection of oceanographical data and for this purpose fitted with special communications equipment, Polaris survey system, survey launches *Malgas* and *Seemeeu* and facilities for helicopter operations. Hull strengthened for navigation in ice and fitted with a passive roll stabilisation system. New engines and full overhaul in 1995–96. Carries EGNW sidescan sonar and two survey boats. Fitted for two 20 mm guns.

PROTEA

3/2008*, Frank Findler / 1335810

1 ANTARCTIC SURVEY AND SUPPLY VESSEL (AGOBH)

Name	Builders	Launched	Commissioned
S A AGULHAS	Mitsubishi, Shimonoseki	30 Sep 1977	31 Jan 1978

Measurement, tons: 5,353 gross
Dimensions, feet (metres): 358.3 x 59 x 19 (109.2 x 18 x 5.8)
Main machinery: 2 Miralles-Blackstone K6 major diesels, 6,600 hp (4.49 MW); 1 shaft, bow and stern thrusters
Speed, knots: 14
Range, n miles: 8,200 at 14 kt
Complement: 40 plus 92 spare berths
Radars: Navigation; Racal Decca; I-band
Helicopters: 2 SA 330J Puma.

Comment: Red hull and white superstructure. A Department of Environmental Affairs vessel, civilian manned and operated by Smit Pentow Marine. Major refit March to October 1992, 25 ton crane moved forward, transverse thrusters and roll damping fitted, improved navigation and communications equipment. A hinged hatch has been fitted at the stern to recover towed equipment.

AGULHAS

5/2008*, M Declerck / 1335814

AUXILIARIES

Notes: It is planned to acquire two Strategic Support Ships to enter service from about 2014. The primary function is to transport, land and support some 1,500 troops with up to 350 vehicles either by sealift or by a combination of helicopters and landing craft. An LHD design is likely to be required to fulfil this and wider missions of disaster relief and logistic support. A third ship, configured as a replenishment ship, is planned to replace *Drakensberg* in about 2017.

1 FLEET REPLENISHMENT SHIP (AORH)

Name	No	Builders	Launched	Commissioned
DRAKENSBERG	A 301	Sandock Austral, Durban	24 Apr 1986	11 Nov 1987

Displacement, tons: 6,000 light; 12,500 full load
Dimensions, feet (metres): 482.3 × 64 × 25.9 (147 × 19.5 × 7.9)
Main machinery: 2 diesels; 16,320 hp(m) (12 MW); 1 shaft; cp prop; bow thruster
Speed, knots: 20+
Range, n miles: 8,000 at 15 kt
Complement: 96 (10 officers) plus 10 aircrew plus 22 spare
Cargo capacity: 5,500 tons fuel; 750 tons ammunition and dry stores; 2 Lima LCU's
Guns: 4 Oerlikon 20 mm GAM BO1 8—12.7 mm MGs.
Helicopters: 2 SA 330H/J Oryx.

Comment: The largest ship built in South Africa and the first naval vessel to be completely designed in that country. In addition to her replenishment role she is employed on SAR, patrol and surveillance with a considerable potential for disaster relief. There are two 10-ton cranes to lower/recover LCUs or Namacurra craft. Two abeam positions and astern fuelling, jackstay and vertrep. Two helicopter landing spots, one forward and one astern. Main secondary role is the transport of consumables, but can also be used to support small craft and transport a limited number of troops.

DRAKENSBERG

5/2008*, M Declerck / 1335R13

6 LIMA CLASS (LCU)

Displacement, tons: 7.3 full load
Dimensions, feet (metres): 29.8 × 11.6 × 2.3 (9.1 × 3.55 × 0.7)
Main machinery: 2 outboards; 400 hp (298 kW)
Speed, knots: 38
Range, n miles: 120 at 26 kt
Complement: 3

Comment: Built in 2003 by Stingray Marine, Cape Town. GRP construction. Capable of carrying 24 troops or 2.5 tons of cargo. Two craft can be carried in *Drakensberg*.

L 27

8/2003, Helmoed-Römer Heitman / 0630610

TUGS

Notes: There is also a harbour tug *De Neys*.

1 COASTAL TUG (YTB)

DE MIST

Displacement, tons: 275 full load
Dimensions, feet (metres): 112.6 × 25.6 × 11.1 (34.3 × 7.8 × 3.4)
Main machinery: 2 Mirlees-Blackstone diesels; 2,440 hp (1.82 MW); 2 Voith-Schneider props
Speed, knots: 12
Complement: 11

Comment: Completed by Dorbyl Long, Durban on 23 December 1978.

DE MIST

7/2006, Robert Pabst / 1305213

1 COASTAL TUG (YTB)

UMALUSI (ex-Golden Energy)

Displacement, tons: 315 full load
Dimensions, feet (metres): 98.5 × 32.8 × 17.1 (30 × 10 × 5.2)
Main machinery: 2 Caterpillar V6 diesels
Speed, knots: 10
Complement: 10

Comment: Completed in 1995 by Jaya Holding Ltd. Acquired from Taikong Trading Company in January 1997.

UMALUSI

3/2008*, M Declerck / 1335R12

2 HARBOUR TUGS (YAG/YTB)

INDLOVU TSHUKUDU

Displacement, tons: 110 full load
Dimensions, feet (metres): 67.3 × 19.8 × 8.9 (20.5 × 6.04 × 2.7)
Main machinery: 2 Cummins KTA19M4 diesels; 1,400 hp (1.05 MW); fixed props with Kort nozzles
Speed, knots: 11
Complement: 6

Comment: Built by Farocean Marine, Cape Town and delivered in April 2006. Principal role to assist submarine berthing but also employed as multirole tenders.

INDLOVU

5/2008*, Guy Toremans / 1335R11

GOVERNMENT MARITIME FORCES

Notes: (1) The Department of Environmental Affairs has three research vessels: *Ellen Khuzwayo* (600 grt, delivered in September 2007), *Africana* of 2 471 grt and *Algoa* of 760 grt. There are also three fishery protection vessels: *Patella*, *Polagus* and *Jasus*. A contract was signed in 2003 with Damen Shipyards, Gorinchem for the construction of one offshore and three inshore Fishery

and Environmental Protection vessels. *Sarah Baartman* is an 83 m offshore patrol vessel whose design is based on the Dutch fishery patrol vessel *Barend Bicsheuve*. Built at Damen Shipyards, Okean (Ukraine) and outfitted at Royal Schelde Yard, Vlissingen, delivery was made in June 2004. *Lilian Ngoyi*, *Ruth First* and *Victoria Mxenge* are three 47 m inshore patrol vessels whose design is based on

the Damen Stan Patrol 4207 in service with UK Customs and the Jamaican Coast Guard. Built by Farocean Marine, Cape Town, deliveries were made in November 2004, February 2005 and May 2005 respectively. There is also a 14 m interception craft *Florence Mkhize*. (2) A 60 m trawler, *Eagle Star*, is used as a training ship for the Department of Environmental Affairs.

RUTH FIRST

3/2008, M Declerck / 1335826

ELLEN KHUZWAYO

8/2007, Robert Pabst / 1305212

Spain

ARMADA ESPAÑOLA

Country Overview

The Kingdom of Spain is a constitutional monarchy that occupies the greater part of the Iberian Peninsula in southwest Europe. It is bordered to the north by France and Andorra and to the west by Portugal. It has a 2,678 n mile coastline with the Atlantic Ocean and Mediterranean Sea. With a total area of 194,897 square miles, the country comprises the mainland, the Balearic Islands in the Mediterranean and the Canary Islands in the Atlantic Ocean. There are also two small exclaves in Morocco, Ceuta and Melilla and three island groups near the Moroccan coast, Peñón de Vélez de la Gomera, the Alhucemas and the Chafarinas. The British dependency of Gibraltar is situated at the southern extremity of Spain. Madrid is the capital and largest city while Barcelona, Algeciras, Valencia and Bilbao are the principal ports. Territorial seas (12 n miles) and an EEZ (200 n miles) are claimed.

Headquarters Appointments

Chief of the Naval Staff:
Admiral Sebastián Zaragoza Soto
Second Chief of the Naval Staff:
Vice Admiral Manuel Rebollo García
Chief of Fleet Support:
Admiral Miguel Ángel Beltrán Bengoechea
Chief of Naval Personnel:
Admiral Emilio José Nieto Manzo

Commands

Commander-in-Chief of the Fleet (ALFLOT):
Admiral Fernando Armada Vadillo
Commander-in-Chief, Maritime Action (ALMART):
Admiral Juan Carlos Muñoz Delgado Díaz del Río
Commander, Spanish Maritime Forces (SPMARFOR):
Vice Admiral José Francisco Palomino Ulla
Commander, Logistic Support (Cartagena):
Vice Admiral Manuel Otero Penelas
Commander, Logistic Support (Cádiz):
Vice Admiral Juan Francisco Serón Martínez
Commander, Logistic Support (Ferrol):
Vice Admiral Francisco Cañete Muñoz
Commander-in-Chief, Canary Islands Zone (ALCANAR):
Vice Admiral Juan Tortosa Saavedra
Marines General Commander (COMGEIM):
Mayor General Juan Antonio Chicharro Ortega
Commander, Fleet Task Group (COMGRUFLOT):
Rear Admiral Santiago Bolívar Piñeiro
Commander, Northern Forces (AMARFER):
Rear Admiral Gonzalo Sirvent Zaragoza
Commander, Straits Forces (AMARDIZ):
Rear Admiral Fernando Hermánderx Morono

Diplomatic Representation

Naval Attaché in Brasilia:
Captain Francisco Avilés Benguistain
Naval Attaché in Lisbon:
Captain Juan Pablo Estrada Madariaga
Naval Attaché in London and Dublin:
Captain José Joaquín Crespo Páramo
Naval Attaché in Paris:
Commander Luis Fernando Soriano Huici
Naval Attaché in Rabat:
Commander Manuel Caridad Villaverde
Naval Attaché in Rome:
Commander Antonio González Llanos López
Naval Attaché in Santiago, Lima and La Paz:
Captain Antonio Manuel Pérez Fernández

Diplomatic Representation — continued

Naval Attaché in Washington:
Captain Juan Carlos San Martín Naya
Naval Attaché in Oslo, Stockholm and Helsinki:
Captain Ricardo Galán Moreno
Naval Attaché in Bangkok, Manila and Singapore:
Captain José Manuel Verdugo Páez
Naval Attaché in Pretoria:
Colonel (Marines) Juan Ángel López Díaz
Naval Attaché in Athens:
Captain Angel Cabrera Juega
Naval Attaché in Kuala Lumpur:
Captain Felipe Juste Pérez

Personnel

2009 Navy: 14,093 (2,594 officers)
Marines: 5,098 (497 officers)

Bases

Naval Zones are being re-organised into a single Area. Headquarters are to be in Cartagena with subordinate commands in Ferrol, Cádiz and Las Palmas. Ferrol: Cantabrian Zone HQ-Ferrol arsenal, support centre at La Graña, naval school at Marín, Pontevedra. Cádiz: Straits Zone HQ-La Carraca arsenal, fleet command HQ and naval air base at Rota, amphibious base at Puntales, Marines Brigade (TEAR) HQ at San Fernando, Cádiz. Cartagena: Maritime Action, HQ-Cartagena arsenal, underwater weapons and divers school at La Algameca; support base at Mahón, Minorca and at Soller and Porto Pi, Majorca, submarine weapons schools at La Algameca and Porto Pi base, Majorca. Naval Infantry school at Cartagena. Las Palmas: Canaries Zone HQ-Las Palmas arsenal.

Naval Air Service

The Naval Air Arm Flotilla is based at Rota.

Type	Escuadrilla
AB 212	3
Cessna Citation II	4
Sikorsky SH-3D/G Sea King	5
Sikorsky SH-3E Sea King (AEW)	6
Hughes 500M (Training)	9
EAV 8B Harrier II/Harrier Plus	6
Sikorsky SH-60B Seahawk	10

Guardia Civil del Mar

Started operations in 1992. For details, see end of section.

Fleet Deployment

- (1) Fleet (under Commander-in-Chief, Fleet)
- (a) *Príncipe de Asturias* (based at Rota)
- (b) *Escuadrillas de Escoltas:*
31st Squadron; 1 Baleares class plus 4 Álvaro de Bazan class (based at Ferrol)
41st Squadron; 6 Santa María class (based at Rota)
- (c) Amphibious Forces: (1 LST and 2 LPD at Rota, small units at Puntales, Cádiz)
Naval Infantry at San Fernando
- (d) *Fuerza de Medidas contra Minas:* (based at Cartagena)
6 MSCs, 1 MCCS

Fleet Deployment — continued

- (e) Flotilla de Submarinos: (based at Cartagena)
All submarines
- (2) Flotilla de Aeronaves: (based at Rota)
- (a) Maritime Action units (under Commander-in-Chief, Maritime Action)
- (b) Cantabrian Zone:
1 Ocean Tug, 8 Tugs, 4 Patrol Ships, 5 Large Patrol Craft, 7 Coastal Patrol Craft, 1 Logistics Support Ship, 4 Sail Training Ships, 5 Training Craft
- (c) Straits Zone:
1 oiler, 6 Oceanographic Ships, 1 Sail Training Ship, 4 Fast Attack Craft, 1 Transport, 1 Ocean Tug, 7 Tugs, 1 Water-boat
- (d) Mediterranean Zone:
4 Fast Attack Craft, 4 Patrol Ships, 1 Water-boat, 7 Tugs, 1 Frogman Support Ship
- (e) Canaries Zone
4 Patrol Ships, 2 Tugs
- (f) Minor auxiliaries. Identified by 'Y' pennant numbers and form Tren Naval

SUBMARINES

0 + 4 (4) S 80A CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
--	S 81	Navantia, Cartagena	13 Dec 2007	2011	2013
--	S 82	Navantia, Cartagena	2008	2012	2014
--	S 83	Navantia, Cartagena	2009	2013	2014
--	S 84	Navantia, Cartagena	2010	2014	2015

Displacement, tons: 2,198 surfaced, 2,426 dived

Dimensions, feet (metres): 233.0 × 23.9 × 20.3

(71.0 × 7.3 × 6.2)

Main machinery: Diesel electric; 3 MTU 16V 396 SE 84L diesels; 4,825 hp (3.6 MW); 1 motor; 3,500 hp (2.6 MW); 1 shaft; AIP (UTC ethanol reformer fuel cell) system; 300 kW

Speed, knots: 12 surfaced, 20 dived

Complement: 32 plus 8

Missiles: SLCM. Raytheon Tomahawk Block IV; land attack.

SSM: Boeing Sub Harpoon.

Torpedoes: 6 – 21 in (533 mm) bow tubes. Atlas Elektronik DM2A4 torpedoes.

Countermeasures: FSM: To be announced.

Decoys: 20 ejectors.

Weapons control: Lockheed Martin/Navantia system.

Radars: Indra Aries-S, I-band.

Sonars: SAES Solarsub towed passive array. Lockheed-Martin integrated sonar suite including cylindrical, passive ranging, flank, acoustic intercept and mine-detection arrays.

Programmes. Approval for the procurement of four submarines was given by the Spanish Cabinet on 5 September 2003. Contract awarded on 25 March 2004. Navantia (55 per cent) and Lockheed Martin contracted to develop core combat system in July 2005. This includes

the sonar suite and command and control module. A second batch of four boats may follow. Steel for the first-of-class cut in June 2006 and for the second on 13 December 2006.

Structure: The design includes Air-Independent Propulsion (AIP) accommodated in a 7.9 m section. Single hull construction. There is an attack periscope (with thermal imager) and a surveillance periscope (comprising HDTV, colour camera, thermal imager and laser rangefinder). There is a lock-in/lock-out hatch for special forces.

Operational. Endurance of 15 days at 4 kt on AIP propulsion is required.

4 GALERNA (AGOSTA) (S 70) CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
GALERNA	S 71	Bazán, Cartagena	5 Sep 1977	5 Dec 1981	22 Jan 1983
SIROCO	S 72	Bazán, Cartagena	27 Nov 1978	13 Nov 1982	5 Dec 1983
MISTRAL	S 73	Bazán, Cartagena	30 May 1980	14 Nov 1983	6 June 1985
TRAMONTANA	S 74	Bazán, Cartagena	10 Dec 1981	30 Nov 1984	27 Jan 1986

Displacement, tons: 1,490 surfaced; 1,740 dived
Dimensions, feet (metres): 221.7 × 22.3 × 17.7
 (676 × 6.8 × 5.4)

Main machinery: Diesel-electric; 2 SEMT-Pielstick 16 PA4 V 185 VG diesels; 3,800 hp(m) (2.7 MW); 2 Jeumont Schneider alternators; 1.7 MW; 1 motor; 4,600 hp(m) (3.4 MW); 1 cruising motor; 32 hp(m) (23 kW); 1 shaft
Speed, knots: 12 surfaced; 20 dived; 17.5 sustained
Range, n miles: 8,500 snorting at 9 kt; 350 dived on cruising motor at 3.5 kt
Complement: 54 (6 officers)

Torpedoes: 4—21 in (533 mm) tubes. 20 combination of (a) ECAN L5 Mod 3/4, dual purpose; active/passive homing to 8.6 km (5.1 n miles) at 35 kt; warhead 150 kg; depth to 550 m (1,800 ft).

(b) ECAN F17 Mod 2; wire-guided; active/passive homing to 20 km (10.8 n miles) at 40 kt; warhead 250 kg; depth 600 m (1,970 ft).

Mines: 19 can be carried if torpedo load is reduced to 9.
Countermeasures: ESM; THORN EMU/Insel Manta E; radar warning.

Weapons control: DLA-2ATFCS

Radars: Surface search: Thomson-CSF DRUA 33C, 1 band.

Sonars: Thomson Sintra DSUV 22; passive search and attack; medium frequency Thomson Sintra DUUA 2A/2B; active search and attack; 8 or 8.4 kHz active DUUX 2A/5; passive; rangefinding. Etedone; intercept. SAES Solarsub towed passive array; low frequency.

Programmes: First two ordered 9 May 1975 and second pair 29 June 1977. Built with some French advice. About 57 per cent of equipment and structure from Spanish sources.

Modernisation: Modernised with improved torpedo fire control, new ESM and IR enhanced periscopes. New main batteries installed with central control monitoring. *Galerne* started in April 1993 and completed in late 1994, *Siroco* in mid-1995, *Tramontana* in early 1997, and *Mistral* in 2000. The plan to fit SSM has been shelved. Solarsub towed arrays are being fitted to all of the class during overhauls. At least one submarine capable of being fitted with Dry Dock Shelter.

Structure: Diving depth, 300 m (984 ft).

Operational: Endurance, 45 days. Based at Cartagena.

AIRCRAFT CARRIERS

1 PRINCIPE DE ASTURIAS CLASS (CV)

Name	No	Builders	Laid down	Launched	Commissioned
PRÍNCIPE DE ASTURIAS (ex- <i>Almirante Carrero Blanco</i>)	R 11	Bazán, Ferro.	8 Oct 1979	22 May 1982	30 May 1988
Displacement, tons: 17,188 full load Dimensions, feet (metres): 642.7 oa; 615.2 pp × 79.7 × 30.8 (195.9; 187.5 × 24.3 × 9.4) Flight deck, feet (metres): 575.1 × 95.1 (175.3 × 29) Main machinery: 2 GE LM 2500 gas turbines; 46,400 hp (34.61 MW) sustained; 1 shaft; LIPS cp prop; 2 motors; 1,600 hp/m (1.18 MW); retractable prop Speed, knots: 25 (4.5 on motors) Range, n miles: 6,500 at 20 kt Complement: 555 (90 officers) plus 208 (Flag Staff (7 officers) and Air Group)		Combat data systems: Tritan Digital Command and Control System NTDS; Links 11 and 14. Marconi Matra SCOT 3 Secomsat ● SSR-1, WSC-3 (UHF). Weapons control: 4 Selenia directors (for Meroka). Radamec 2000 series. Radars: Air search: Hughes SPS-52C/D ●; 3D; E/F-band; range 439 km (240 n miles). Surface search: ISC Cardion SPS-55 ●; I/J-band. Aircraft control: ITT SPN-35A ●; J-band Fire control: 4 Sperry/Lockheed VPS 2 ●; I-band (for Meroka) RTN 11L/X; I/J-band; missile warning. Selenia RAN 12L (target designation); I/J-band. Tacan. URN 25.		to command and control systems and the addition of a Flag Bridge. Modernisation: After two years' service some modifications were made to the port after side of the island, to improve briefing rooms and provide sheltered parking space for FD vehicles. Also improved accommodation has been added on for six officers and 60 specialist ratings. A mid-life refit is expected when the Strategic Projection ship enters service. Structure: Based on US Navy Sea Control Ship design. 12° ski-jump of 46.5 m. Two flight deck lifts, one right aft. Two LCVPs carried. Two pairs of fin stabilisers. The hangar is 24,748 sq ft (2,300 m ²). The Battle Group Commander occupies the lower bridge. Two saluting guns have been mounted on the port quarter. Operational: Three Sea Kings have Searchwater AEW radar. Aircraft complement could be increased to 37 (parking on deck) in an emergency but maximum operational number is 29 (17 in hangar, 12 on deck). A typical air wing includes eight/ten AV-8B/AV-8B Plus, five SH-3 (including two AEW) and three/four AB-212. Based at Rota Sales: Modified design built for Thailand.	
Guns: 4 Bazán Meroka Mod 2A/2B 12-barrelled 20 mm/120 ●; 3,600 rds/min combined to 2 km. 2 Rheinmetall 37 mm saluting guns. Countermeasures: Decoys: 4 Loreal Hycor SR80C 6-barrelled fixed Mk 36; IR flares and chaff to 4 km (2.2 n miles). SLO-25 Nixie; towed torpedo decoy. US Prairie/Masker; hull noise/blade rate suppression. ESM/ECM: Electronica Netunel; intercept and jammers.		Fixed-wing aircraft: 6-12 AV-8B Harrier II/Harrier Plus. Helicopters: 6-10 SH-3 Sea Kings; 2-4 AB 212EW		Programmes. Ordered on 29 June 1977. Associated US firms were Gibbs and Cox, Dixencast, Bath Iron Works and Sperry SM. Commissioning delays caused by changes

FRIGATES

Notes: Studies for a new frigate class, to replace the Santa Maria class from about 2020, are in progress.

4 + 1 (1) ALVARO DE BAZÁN CLASS (FFGHM)

Name	No	Builders	Laid down	Launched	Commissioned
ALVARO DE BAZÁN	F 101	Navantia, Ferrol	14 June 1999	31 Oct 2000	19 Sep 2002
ALMIRANTE DON JUAN DE BORBÓN	F 102	Navantia, Ferrol	27 Oct 2000	28 Feb 2002	3 Dec 2003
BLAS DE LEZO	F 103	Navantia, Ferrol	28 Feb 2002	16 May 2003	16 Dec 2004
MENDEZ NUÑEZ	F 104	Navantia, Ferrol	16 May 2003	12 Nov 2004	21 Mar 2006
ROGER DE LAURIA	F 105	Navantia, Ferrol	Feb 2009	Nov 2010	July 2012

Displacement, tons: 5,853 full load
Dimensions, feet (metres): 480.3 oa; 437 pp × 61 × 23.6 (146.4; 133.2 × 18.6 × 7.2)
Flight deck, feet (metres): 86.8 × 56 (26.4 × 17)
Main machinery: CODAG; 2 GE LM 2500 gas turbines; 47,328 hp(m) (34.8 MW) sustained; 2 Bazán/Caterpillar diesels; 12,240 hp(m) (9 MW) sustained; 2 shafts; LIPS cp props
Speed, knots: 28
Range, n miles: 4,500 at 18 kt
Complement: 200 (35 officers)

Missiles: SSM: 8 Boeing Harpoon Block 2 (H); active radar homing to 124 km (67 n miles) at 0.9 Mach; warhead 227 kg.

SAM: Mk 41 VLS (48 cells) (H) 32 Raytheon SM-2MR (Block IIIA/IIIB); command/inertial guidance; semi-active radar homing to 167 km (90 n miles) at 2.5 Mach. 64 Evolved Sea Sparrow RIM 162 B (in quadpacks); semi-active radar homing to 18 km (9.7 n miles) at 3.6 Mach; warhead 39 kg.

Guns: 1 FMC 5 in (127 mm)/54 Mk 45 Mod 2 (ex-US), 20 rds/min to 23 km (12.6 n miles); weight of shell 32 kg (fitted for but not with) 2 Oerlikon 20 mm.

Torpedoes: 4–323 mm (2 twin) Mk 32 Mod 9 fixed launchers (H) Honeywell Mk 46 Mod 5, anti-submarine, active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

A/S mortars: 2 ABCAS/SSTDS launchers.

Countermeasures: Decoys: 4 SRBOC Mk 36 Mod 2 chaff launchers (H) SLQ-25A Nixie torpedo decoy.

ESM: Regulus Mk-9500; (H) intercept.

ECM: Caselva Aldebaran (H); jammer.

Combat data systems: Lockheed Aegis Baseline 5 Phase III (DANCS); Link 11/16. SCOT 3, SATURN 3S

Weapons control: Sirius optronic director (H); FABA Dorna GFCS Sainsel DLT 309TFCS. SQR-4 helo datalink.

Radars: Air/surface search: Aegis SPY-1D (H) E/F-band
 Surface search: DRS SPS-67 (RAN 12S) (H) G-band.

BLAS DE LEZO

(Scale 1 : 1,200), Ian Sturton / 1153003

Fire control: 2 Raytheon SPG-62 Mk 99 (for SAM) (H), I, J-band

Navigation: 1 Raytheon SPS-73(v) (H), I-band.

Sonars: Raytheon DE 1180 LF; hull-mounted; active search and attack; medium frequency. Possible ATAS active towed sonar

Helicopters: 1 SH-60B Seahawk Lamps III (H)

Programmes: Project definition from September 1992 to July 1995, and then extended to July 1996 to incorporate Aegis. Design collaboration with German and Netherlands shipyards started 27 January 1994. Spain withdrew from the APAR air defence radar project in June 1995 and decided to incorporate Aegis SPY-1D into the design. Production order for four Flight I ships agreed on 21 October 1996 and building approved 24 January 1997. FSC in November 1997. The acquisition of a fifth ship was authorised by the Spanish government

on 27 May 2005 and a contract was signed in July 2006. A sixth ship may be procured. These modified ships are likely to be fitted with SPY-1D(V) radar and are to be known as Flight II.

Modernisation: Flight I ships are to be upgraded to Baseline S-2 Standard in 2008–09. This may include a ballistic missile detect and track capability and possibly Tomahawk land-attack missiles. SM-2 Block IIIA missiles are likely to be replaced by Block IIIB.

Structure: The inclusion of SPY-1D radar increased the original size of the ship and caused major changes to the shape of the superstructure. Stealth technology incorporated. Indel RAST helicopter system. Hangar for one helicopter. 127 mm gun for gunfire support to land forces, taken from USN *Tarawa* class. RAM may be fitted vice Meroka.

Operational: All based at Ferrol as the 31st Squadron. F 101 operated as part of USS *Roosevelt* carrier strike group in 2005 and completed round the world deployment in 2007.

6 SANTA MARÍA CLASS (FFGHM)

Name	No	Builders	Laid down	Launched	Commissioned
SANTA MARÍA	F 81	Bazán, Ferrol	23 May 1982	24 Nov 1984	12 Oct 1986
VICTORIA	F 82	Bazán, Ferrol	16 Aug 1983	23 July 1986	11 Nov 1987
NUMANCIA	F 83	Bazán, Ferrol	8 Jan 1986	30 Jan 1987	8 Nov 1988
REINA SOFÍA (ex-América)	F 84	Bazán, Ferrol	12 Dec 1987	19 July 1989	18 Oct 1990
NAVARRA	F 85	Bazán, Ferrol	15 Apr 1991	23 Oct 1992	30 May 1994
CANARIAS	F 86	Bazán, Ferrol	16 Apr 1992	21 June 1993	14 Dec 1994

Displacement, tons: 3,610 standard; 3,969 full load

Dimensions, feet (metres): 451.2 × 46.9 × 24.6
(137.7 × 14.3 × 7.5)

Main machinery: 2 GE LM 2500 gas turbines; 41,000 hp (30.59 MW) sustained; 1 shaft, cp prop
2 auxiliary retractable props; 650 hp (484 kW)

Speed, knots, 29. Range, n miles: 4,500 at 20 kt

Complement: 223 (13 officers)

Missiles: SSM: 8 McDonnell Douglas Harpoon Block 1B, active radar homing to 92 km (50 n miles) at 0.9 Mach, warhead 227 kg

SAM: 32 Raytheon SM-1MR Block V; Mk 13 Mod 4 launcher; command guidance; semi-active radar homing to 38 km (20.5 n miles) at 2 Mach

Both missile systems share a common magazine

Guns: 1 OTO Melara 3 in (76 mm)/62; 85 rds/min to 16 km (8.7 n miles); weight of shell 6 kg.

1 Bazán 20 mm/120 12-barrelled Meroka Mod 2A or 2B; 3,600 rds/min combined to 2 km. 2—12.7 mm MGs

Torpedoes: 6—324 mm US Mk 32 (2 triple) tubes; Honeywell/Alliant Mk 46 Mod 5; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

Countermeasures: Decoys: 4 Loral Hycon SRBOC 6-barrelled fixed Mk 37 Mod 1/2; IR flares and chaff to 4 km (2.2 n miles).

Prairie/Masker: hull noise/blade rate suppression

SLQ-25 Nixie, torpedo decoy.

ESM/ECM: Rigel or MK 3600/3700, intercept and jammer

Combat data systems: IPN 10 action data automation, Link 11.

SQQ 28 LAMPS III helo datalink. Saturn and SCOT 3

Secomsat fitted

Weapons control: Loral Mk 92 Mod 2 (Mod 6 with CORT in

F 85 and 86) Enosa optronic tracker for Meroka 2B.

Radars: Air search: Raytheon SPS-49(V)4/6; C/D-band;

range 457 km (250 n miles)

Surface search Raytheon SPS-55; I-band.

Navigation: Raytheon 1650/9; I/J band.

Fire control: RCA Mk 92 Mod 4/6; I/J band.

Raytheon STIR; I/J band

Selenia RAN 12L; D-band (for Meroka).

Sperry/Lockheed VPS 2; I-band (for Meroka)

Tacan: URN 25.

Sonars: Raytheon SQS-56 (DE 1160); hull-mounted; active

search and attack; medium frequency.

Gould SQR-19(V)2 (F 85-86); tactical towed array

(TACTAS); passive; very low frequency.

REINA SOFÍA

(Scale 1 : 1,200), Ian Sturton / 0130395

CANARIAS

1/2005, Camil Busquets / Vilanova / 1153476

Helicopters: 2 Sikorsky SH-60B (only one normally embarked)

Programmes: Three ordered 29 June 1977. The execution of this programme was delayed due to the emphasis placed on the carrier construction. The fourth ship was ordered on 19 June 1986, and numbers five and six on 26 December 1989

Modernisation: F 85 and F 86 are fitted with the improved Mod 2B Meroka CIWS which includes an Enosa optronic tracker SCOT SATCOM fitted in F 85 and F 84. Others may be similarly fitted. All modernised with RAN 12L target designator for Meroka but VPS 2 fire-control radar is yet to be replaced by RAN 30X radar. A modernisation

programme was initiated in 2005. The programme includes improvements to habitability, hull systems upgrades (to extend ships' lives) and enhancements to sensors and displays. This includes a new sonar suite and new EW equipment (Rigel or Mk 3600/3700). Upgrades to F 81-84 have been completed and are to be followed by F 85-86.

Structure: Based on the US FFG 7 Oliver Perry class although broader in the beam and therefore able to carry more topweight. Fin stabilisers fitted. RAST helicopter handling system. Navarra and Canarias have an indigenous combat data system thereby increasing national inputs to 75 per cent.

Operational: All based at Rota as the 41st Squadron.

REINA SOFÍA

6/2007, John Brodie / 1166870

VICTORIA

11/2007, Adolfo Ortigueira Gil / 1170034

SHIPBORNE AIRCRAFT

Notes: An initial purchase of 11 NH90 helicopters, to replace the SH-3 and AB-212 fleets, was announced on 20 May 2005. This is likely to include a mixture of naval tactical, AEW and transport versions. Entry into service is expected in 2015.

Numbers/Type: 4/12/1 BAe/McDonnell Douglas EAV-8B (Harrier II)/EAV-8B (Harrier Plus)/TAV-8B

Operational speed: 562 kt (1,041 km/h).

Service ceiling: Not available.

Range: 480 n miles (889 km).

Role/Weapon systems: First batch of nine delivered in 1987-88 and a further eight in 1996-97. Four Harrier II to be upgraded to AV-8B with APG 65 radar plus FLIR by 2004. A further TAV-8B twin seat delivered in September 2000. Sensors: ECM; ALQ 164. Weapons: Strike; two 25 mm GAU-12/U cannon, two or four AIM-9L Sidewinders, two or four AGM-65E Mavericks; up to 16 GP bombs. AMRAAM AIM-120 in updated aircraft

HARRIER PLUS

2/2004, Guy Toremans / 1044547

Numbers/Type: 8 Sikorsky SH-3D/G/H Sea King

Operational speed: 116 kt (219 km/h).

Service ceiling: 14,700 ft (4,480 m).

Range: 542 n miles (1,005 km).

Role/Weapon systems: Former ASW helicopters converted to tactical transport and special forces role. ASW equipment fitted for but not with. Can be replaced in 48 hours. Converted to 3H standard in 1996-97. Sensors: APN-217 Doppler radar and IFF.

SH-3D

5/2008*, M Declerck / 1335862

Numbers/Type: 3 Sikorsky SH-3D Sea King AEW.

Operational speed: 110 kt (204 km/h).

Service ceiling: 14,700 ft (4,480 m).

Range: 542 n miles (1,005 km).

Role/Weapon systems: Three Sea King helicopters were taken in hand in 1986 for conversion to AEW role to provide organic cover; first entered service August 1987. Sensors: THORN EMI Searchwater (to be replaced by Racal 2000) radar, ESM. Weapons: Unarmed.

SEA KING AEW

10/2008*, Adolfo Ortigueira Gil / 1335864

Numbers/Type: 8 Agusta AB 212.

Operational speed: 106 kt (196 km/h).

Service ceiling: 14,200 ft (4,330 m).

Range: 230 n miles (426 km).

Role/Weapon systems: Surface search. All ASW equipment removed. Weapons: 1-12.7 mm MG and 70 mm rocket launchers.

AB 212

10/2007, Adolfo Ortigueira Gil / 1170032

Numbers/Type: 11 Sikorsky SH-60B Seahawk (LAMPB III)

Operational speed: 135 kt (249 km/h).

Service ceiling: 10,000 ft (3,050 m)

Range: 600 n miles (1,110 km)

Role/Weapon systems: ASW helicopter. First six delivered in 1988-89 for FFG 7 frigates.

Six more Block 1 acquired in 2002 for F 100 class. First six aircraft being upgraded to Block 1 with first three aircraft completed by 2005. The other three are to follow. Sensors: Search radar, FLIR (Block 1), sonobuoys, ECM/ESM. Weapons: ASW; two Mk 46 torpedoes or depth bombs. ASV, AGM-119B Penguin and AGM-114B/K Hellfire.

SH-60B

10/2008*, Adolfo Ortigueira Gil / 1335863

Numbers/Type: 9 Hughes 500MD

Operational speed: 110 kt (204 km/h).

Service ceiling: 10,000 ft (3,050 m)

Range: 203 n miles (376 km)

Role/Weapon systems: Used for training. secondary role is SAR and surface search. ASW role removed

500 MD

10/2007, Adolfo Ortigueira Gil / 1170031

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Notes: (1) The Air Force F/A-18 Hornet (C.15) and Eurofighter Typhoon (C.16) can be armed with Harpoon ASM. Air Force CN-235 are not used for maritime role.

(2) Three CASA C-212/400 are operated by the Fishery Department and are based at Torrejón (Madrid), Jerez and Alicante. Two Agusta A-109C and two Dauphin N3 helicopters are based at Alicante, Jerez and Santander and Canary Islands.

Numbers/Type: 3 Cessna Citation II (C 550).

Operational speed: 275 kt (509 km/h).

Service ceiling: 27,750 ft (8,458 m).

Range: 2,000 n miles (3,704 km).

Role/Weapon systems: Used for transport, training and reconnaissance.

CESSNA CITATION

6/2004, Adolfo Ortigueira Gil / 1044560

Numbers/Type: 14 CASA C-212 Aviocar

Operational speed: 190 kt (353 km/h)

Service ceiling: 24,000 ft (7,315 m).

Range: 1,650 n miles (3,055 km).

Role/Weapon systems: Operated by Air Force. Primary role SAR, secondary role surveillance. Based at Mallorca, Las Palmas and Madrid. Six are leased by Customs. Sensors: APS 128 radar, MAD, sonobuoys and ESM. Weapons (not SAR role) ASW; Mk 46 torpedoes or depth bombs. ASV; two rockets or machine gun pods.

C-212

5/2002, Adolfo Ortigueira Gil / 05288533

Numbers/Type: 3 Fokker F27 Maritime.
Operational speed: 250 kt (463 km/h).
Service ceiling: 29,500 ft (8,990 m).
Range: 2,700 n miles (5,000 km).
Role/Weapon systems: Canaries and offshore patrol by Air Force. Are to be replaced by CN-235 in due course. Sensors: APS-504 search radar, cameras. Weapons: none.

F-27 6/2004, Adolfo Ortigueira Gil / 1044bb2

Numbers/Type: 2/5 Lockheed P-3A Plus Orion/P-3B Plus Orion.
Operational speed: 410 kt (760 km/h).
Service ceiling: 28,300 ft (8,625 m).
Range: 4,000 n miles (7,410 km).
Role/Weapon systems: Air Force operation for long-range MR/ASW. Original P-3A aircraft supplemented in 1988 by P-3B Orions from Norway after Lockheed modernisation. P-3A aircraft upgraded to P-3A plus in 1995–97. The five P-3Bs are undergoing modernisation programme with improved acoustic signal processor, ALR-66 ESM, FLIR and new radar and communications. Sensors: APS-134 (Searchwater 2000 in due course); FLIR, search radar, AQS-81MAD, ALR 66 V(3) ECM/ESM, 87 sonobuoys. Weapons: ASW; eight torpedoes or depth bombs internally; 10 underwing stations. ASV; four Harpoon or 127 mm rockets.

P-3B 7/2002, Adolfo Ortigueira Gil / 0528935

Numbers/Type: 10 Eurocopter AS 332 Super Puma.
Operational speed: 130 kt (240 km/h).
Service ceiling: 15,090 ft (4,600 m).
Range: 672 n miles (1,245 km).
Role/Weapon systems: Air Force operated for SAR/CSAR. Based at Mallorca, Las Palmas and Madrid.

AS 332 7/2001, Adolfo Ortigueira Gil / 0528932

PATROL FORCES

6 DESCUBIERTA CLASS (PSOH/MCS/FSGM)

Displacement, tons: 1,233 standard; 1,666 full load
Dimensions, feet (metres): 291.3 x 34 x 12.5
 (888 x 10.4 x 3.8)
Main machinery: 4 MTU-Bazán 16V 956 TB91 diesels; 15,000 hp(m) (11 MW) sustained; 2 shafts; ep props
Speed, knots: 25
Range, n miles: 4,000 at 18 kt, 7,500 at 12 kt
Complement: 118 (10 officers) plus 30 marines

Guns: 1 OTO Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.7 n miles); weight of shell 6 kg, 2 Oerlikon 20 mm/120.
Countermeasures: ESM: Elisag Mk 1000 (part of Deneb system); or Mk 1600, intercept.
 ECM: Cesalsa Canopus, or Mk 1900, jammer.
Combat data systems: Tritan IV, Saturn SATCOM
Weapons control: Signaal WM25; GM 101.
Radars: Air/surface search: Signaal DA05/2 (not M 11); E/F-band, range 137 km (75 n miles) for 2 m² target.
Radars: Surface search: Signaal ZW06 (not M 11); I-band Navigation: 2 Furuno; I-band.
Fire control: Signaal WM22/41 or WM25 system (not M 11); I/J-band; range 46 km (25 n miles).

Programmes: Officially rated as Corvettes. *Diana* (tenth of the name) originates with the galley *Diana* of 1570. *Infanta Elena* and *Infanta Cristina* are named after the daughters of King Juan Carlos. Approval for second four ships given on 21 May 1976. First four ordered 7 December 1973 (83 per cent Spanish ship construction components) and two more from Bazán, Ferrol on 25 May 1976.

Structure: Original Portuguese 'João Coutinho' design by Comodoro de Oliveira PN developed by Blohm + Voss and considerably modified by Bazán including use of

INFANTA ELENA 11/2008*, M Declercq / 1335860

Y-shaped funnel. Noise reduction measures include Masker fitted to shafts, auxiliary gas-turbine generator fitted on upper deck, all main and auxiliary diesels sound-mounted. Fully stabilised. Automatic computerised engine and alternator control; two independent engine rooms; normal running on two diesels.
Operational: P 75 completed conversion to an OPV, with capability to act as helicopter platform,
Sales: F 37 and F 38 sold to Egypt prior to completion. One to Morocco in 1983.

DESCUBIERTA 11/2007, Adolfo Ortigueira Gil / 1335861

4 SERVIOIA CLASS (OFFSHORE PATROL VESSELS) (PSOH)

Name	No	Builders	Laid down	Launched	Commissioned
SERVIOIA	P 71	Bazán, Ferrol	17 Oct 1989	10 May 1990	22 Mar 1991
CENTINELA	P 72	Bazán, Ferrol	12 Dec 1989	30 Mar 1990	24 Sep 1991
VIGIA	P 73	Bazán, Ferrol	30 Oct 1990	12 Apr 1991	24 Mar 1992
ATALAYA	P 74	Bazán, Ferrol	14 Dec 1990	22 Nov 1991	29 June 1992

Displacement, tons: 1,147 full load
Dimensions, feet (metres): 225.4, 206.7 pp x 34 x 11
 (68.7, 63 x 10.4 x 3.4)

Main machinery: 2 MTU-Bazán 16V 956 TB91 diesels;
 7,500 hp(m) (5.5 MW) sustained; 2 shafts; LIPS cp props

Speed, knots: 19

Range, n miles: 8,000 at 12 kt

Complement: 42 (8 officers) plus 6 spare berths

Guns: 1 US 3 in (76 mm)/50 Mk 27; 20 rds/min to 12 km
 (6.6 n miles); weight of shell 6 kg

2-12.7 mm MGs

Countermeasures: ESM ULQ-13 (in P 71).

Weapons control: Bazán Alcor or MSP 4000 (P 73)
 optronic director. Hispano mini combat system.
 SATCOM

Radars: Surface search; Recal Decca 2459; I band
 Navigation: Recal Decca ARPA 2690 BT; I-band.

Helicopters: Platform for 1 AB 212

Programmes: Project B215 ordered from Bazán, Ferrol in
 late 1988. The larger Milano design was rejected as being
 too expensive.

Modernisation: The guns are old stock refurbished but
 could be replaced by an OTO Melara 76 mm/62 or a

Bofors 40 mm/70 Model 600 if funds can be found.
 Other equipment fits could include four Harpoon SSM,
 Meroka CIWS, Sea Sparrow SAM or a Bofors 375 mm
 ASW rocket launcher. No plans to carry out any of these
 improvements so far. EW equipment fitted in Serviola for
 training.

Structure: A modified Halcón class design similar to
 ships produced for Argentina and Mexico. Helicopter
 facilities enabling operation in up to Sea State 4
 using non-retractable stabilisers. Three firefighting
 pumps.

Operational: For EEZ patrol. *Vigia* based at Cádiz, *Serviola*
 and *Atalaya* at Ferrol and *Centinela* at Las Palmas.

1 PISCALONSO CLASS (OFFSHORE PATROL CRAFT) (PSO)

Name	No	Builders	Commissioned
CHILREU (ex-Pescalonso 2)	P 61	Gijón, Asturias	30 Mar 1992

Displacement, tons: 2,101 full load
 Dimensions, feet (metres): 222.4 x 36.1 x 15.4 (678 x 11 x 4.7)
 Main machinery: 1 MaK 6M-453K diesel; 2,460 hp(m) (1.81 MW) sustained; 1 shaft; cp prop
 Speed, knots: 12. Range, n miles: 1,500 at 12 kt
 Complement: 35 (7 officers)
 Guns: 1—12.7 mm MG
 Radars: Surface search: 2 Consilium Selesmar; E/F/I-band.

Comment: Launched 2 May 1988 and purchased by the Fisheries Department for the Navy to use as a Fishery Protection vessel based at Ferrol. Former stern ramp trawler Inmarsat fitted.

CHILREU 11/2007, B Przewin / 1168822

3 ALBORAN CLASS (OFFSHORE PATROL CRAFT) (PSOH)

Name	No	Builders	Commissioned
ALBORAN	P 62	Freire, Vigo	8 Jan 1997
ARNOMENDI	P 63	Freire, Vigo	13 Dec 2000
TARIFA	P 64	Freire, Vigo	14 June 2004

Displacement, tons: 1,963 full load
 Dimensions, feet (metres): 218.2 x 36.1 x 14.4 (66.5 x 11 x 4.4)
 Main machinery: 1 Krupp MaK 6 M 453C diesel; 2,400 hp(m) (1.76 MW) sustained (P 62), 1 Krupp MaK 8M25 diesel; 3,250 hp(m) (2.39 MW) sustained (P 63); 1 diesel generator and motor for emergency propulsion; 462 hp(m) (340 kW); 1 shaft; bow thruster; 350 hp(m) (257 kW)
 Speed, knots: 13 (P 62), 15.8 (P 63) (3.5 on emergency motor)
 Range, n miles: 20,000 at 13 kt
 Complement: 37 (7 officers) plus 9 spare
 Guns: 2—12.7 mm MGs
 Radars: Surface search: Furuno FAR-825, I-band
 Navigation: Furuno FR-2130S; I-band.
 Helicopters: Platform for 1 light.

Comment: *Alboran* launched in 1991 and purchased by the Fisheries Department to use as a Fishery Protection vessel based at Cartagena. *Arnomendi*, with a slightly larger bridge and more powerful engine, based at Las Palmas, Canary Islands. *Tarifa* is fitted with anti-pollution equipment and is based at Cartagena.

ALBORAN 10/2008, Adolfo Ortigueira Gil / 1335858

5 BARCELÓ CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
BARCELÓ	P 11	Lürssen, Vagesack	20 Mar 1976
LAYA	P 12	Bazán, La Carraca	23 Dec 1976
ORDÓÑEZ	P 14	Bazán, La Carraca	7 June 1977
ACEVEDO	P 15	Bazán, La Carraca	14 July 1977
CÁNDIDO PÉREZ	P 16	Bazán, La Carraca	25 Nov 1977

Displacement, tons: 145 full load
 Dimensions, feet (metres): 118.7 x 19 x 6.2 (36.2 x 5.8 x 1.9)
 Main machinery: 2 MTU-Bazán MD 16V 538 TB90 diesels; 8,000 hp(m) (4.41 MW) sustained; 2 shafts
 Speed, knots: 22 Range, n miles: 1,200 at 17 kt
 Complement: 19 (3 officers)
 Guns: 1 Breda 40 mm/70. 1 Oerlikon 20 mm/85. 2—12.7 mm MGs
 Torpedoes: Fitted for 2—21 in (533 mm) tubes.
 Weapons control: CSEE optical director.
 Radars: Surface search: Raytheon 1220/6XB, I/J-band.

Comment: Ordered 5 December 1973. All manned by the Navy although building cost was borne by the Ministry of Commerce. Of Lürssen/TNC 36 design. Reported as able to take two or four surface-to-surface missiles instead of 20 mm gun and torpedo tubes. 40 mm gun removed from *Barceló*. Plans to transfer to the Guardia Civil del Mar have been shelved. *Javier Quiroga* decommissioned in 2005. Speed much reduced from original 36 kt.

CÁNDIDO PÉREZ 8/2007, Marco Ghigliano / 1170221

4 CONEJERA CLASS (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
CONEJERA	P 31	Bazán, Ferrol	31 Dec 1981

ESPALMADOR	P 33	Bazán, Ferrol	10 May 1982
ALCANADA	P 34	Bazán, Ferrol	10 May 1982

Displacement, tons: 85 full load
 Dimensions, feet (metres): 106.6 x 17.4 x 4.6 (32.2 x 5.3 x 1.4)
 Main machinery: 2 MTU-Bazán MA 16V 362 SB80 diesels; 2,450 hp(m) (1.8 MW); 2 shafts
 Speed, knots: 13
 Range, n miles: 1,200 at 13 kt
 Complement: 12
 Guns: 1 Oerlikon 20 mm/120 Mk 10. 1—12.7 mm MG.
 Radars: Surface search: Furuno; I-band

Comment: Ordered in 1978, funded jointly by the Navy and the Ministry of Commerce. Naval manned. Speed reduced from original 25 kt. Basing: P 31 Malaga; P 32 Huelva; P 33/34 Barcelona.

CONEJERA 8/2007, Marco Ghigliano / 1170777

2 TORALLA CLASS (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
TORALLA	P 81	Viudes, Barcelona	29 Apr 1987
FORMENTOR	P 82	Viudes, Barcelona	23 June 1988

Displacement, tons: 102 full load
 Dimensions, feet (metres): 93.5 x 21.3 x 5.9 (28.5 x 6.5 x 1.8)
 Main machinery: 2 MTU-Bazán 8V 396 TB93 diesels; 2,100 hp(m) (1.54 MW) sustained; 2 shafts
 Speed, knots: 19
 Range, n miles: 1,000 at 12 kt
 Complement: 13
 Guns: 1 Browning 12.7 mm MG.
 Radars: Surface search: Racal Decca RM 1070; I-band.
 Navigation: Racal Decca RM 270; I-band.

Comment: Wooden hull with GRP sheath. Very similar to Customs Alcaravan class. *Formentor* refitted in 1996-97 Based at Cartagena.

TORALLA 10/2008, Adolfo Ortigueira Gil / 1335856

2 P 101 CLASS (PBR)

No	No
P 114	P 111

Displacement, tons: 18.5 standard; 20.8 full load
 Dimensions, feet (metres): 44.9 x 14.4 x 4.3 (13.7 x 4.4 x 1.3)
 Main machinery: 2 Baudouin-Interdiesel DNP-350; 768 hp(m) (564 kW); 2 shafts
 Speed, knots: 23.3
 Range, n miles: 430 at 18 kt
 Complement: 6
 Guns: 1—12.7 mm MG
 Radars: Surface search: Decca 110; I-band.

Comment: Ordered under the programme agreed 13 May 1977, funded jointly by the Navy and the Ministry of Commerce. Built to the Aresa LVC 160 design by Aresa, Arenys de Mar, Barcelona. GRP hull. Eight of the class conduct harbour auxiliary duties with Y numbers, the remainder paid off in 1993. P 111 transferred back again to patrol duties in 1996 and is based at Ayamonte (Huelva). P 114 is also used for patrol duties and is based at Ceuta.

Weapons control: Dorna optronic director.
Radars: Surface search: Indra Aries, I-band.
Fire control: Dorna; K-band.
Helicopters: Platform for 1 NH90

Comment: A programme for the procurement of a new class of up to eight multireole offshore patrol vessels known as Buques de Accion Maritima (BAM) was initiated in 2004. The modular design allows other variants of the BAM design to be capable of conducting intelligence, hydrographic and diving support tasks. Authorisation for the first batch of four patrol ships was made by the Spanish government on 20 May 2005 and a contract for their construction was signed with Navantia on 31 July 2006. The ships are to be capable of operating a helicopter and are to be equipped with two RIBs for boarding/interception operations.

BAM (Scale 1 : 900), Ian Sturton / 1153001

AMPHIBIOUS FORCES

2 NEWPORT CLASS (LSTH)

Name	No	Builders	Laid down	Launched	Commissioned
HERNÁN CORTÉS (ex-Barnstable County)	L 41 (ex-L 1197)	National Steel, San Diego	19 Dec 1970	2 Oct 1971	27 May 1972
PIZARRO (ex-Harlan County)	L 42 (ex-L 1196)	National Steel, San Diego	7 Nov 1970	24 July 1971	8 Apr 1972

Displacement, tons: 4,975 light; 8,550 full load
Dimensions, feet (metres): 522.3 (hull) × 69.5 × 18.2 (aft) (159.2 × 21.2 × 5.5)
Main machinery: 6 Alco 16-251 diesels; 16,500 hp (12.3 MW) sustained; 2 shafts; cp props; bow thruster
Speed, knots: 20
Range, n miles: 14,250 at 14 kt
Complement: 255 (15 officers)
Military lift: 374 troops; (20 officers) 500 tons vehicles, 2 LCVPs and 2 LCPLs on davits

Guns: 1 General Electric/General Dynamics 20 mm Vulcan Phalanx Mk 15. 2 Oerlikon 20 mm/86. 4—12.7 mm MGs.

Countermeasures: ESM Celessa Deneb
Radars: Surface search: Raytheon SPS-10F/67; G-band
Navigation: Marconi LN66; I-band.

Helicopters: Platform only for 3 AB 212.

Programmes: Transferred from the US on 26 August 1994 and 14 April 1995

Structure: The 3 in guns removed on transfer. The ramp is supported by twin derrick arms. A ramp just forward of the superstructure connects the lower tank deck with the main deck and a vehicle passage through the superstructure provides access to the parking

area amidships. A stern gate to the tank deck permits unloading of amphibious tractors into the water, or unloading of other vehicles into an LCU or on to a pier. Vehicle stowage covers 19,000 sq ft. Length over derrick arms is 562 ft (171.3 m); full load draught is 11.5 ft forward and 17.5 ft aft. Bow thruster fitted to hold position offshore while unloading amphibious tractors. SCOT 3 SATCOM fitted in 1995-96. Can carry four Mexeflotes, two of them powered.

Operational: Based at Rota. *Hernán Cortés* reported to have been decommissioned in 2006 but to remain in service until 2009. *Pizarro* to follow as the Strategic Projection Ship enters service.

 (160; 142 × 25 × 5.9)

Flight deck, feet (metres): 196.9 × 82 (60 × 25)

Main machinery: 2 Bazán/Caterpillar 3612 diesels, 12,512 hp (9.2 MW); 2 shafts; LIPS cp props; bow thruster 680 hp (500 kW)

Speed, knots: 20

Range, n miles: 6,000 at 12 kt

Complement: 115 plus 12 spare; 189 (L 52)

Military lift: 543 or 404 (L 52) fully equipped troops and 72 (staff and aircrew)

6 LCVP or 4 LCM or 1 LCU and 1 LCVP, 130 APCs or 33 MBTs

Guns: 1 Bazán 20 mm/120 12-barrelled Meroka (fitted for) 3,600 rds/min combined to 2 km. 2 Oerlikon GAM-B01 20 mm

Countermeasures: Decoys: 4 SRBOC chaff launchers.

ESM Intercept

Combat data systems: SICOA (L 52); SATCOM; Link 11.

Radars: Surface search: TRS 3D/16 (L 52) 3; G-band

Surface search: Kelvin Hughes ARPA 3; I-band.

Navigation/helo control: I-band.

Helicopters: 6 AB 212 or 4 SH-3D Sea King or 4 Eurocopter Tiger.

CASTILLA

(Scale 1 : 1,500), Ian Sturton / 0106549

Programmes: Originally started as a national project by the Netherlands. In 1990 the ATS was seen as a possible solution to fulfil the requirements for a new LPD Joint project definition study announced in July 1991 and completed in December 1993 and the first ship was authorised on 29 July 1994. The second of class ordered 9 May 1997

Modernisation: L 52 C² capabilities upgraded in 2002-03 to support Flagship requirements. L 52 embarked the HQ of the Spanish High Readiness Force (Maritime) in November 2003 as part of the NATO Response Force. Both ships are to be fitted with RAM CIWS

Structure: Able to transport a fully equipped battalion of marines providing a built-in dock for landing craft and a helicopter flight deck for debarkation in offshore conditions. Docking well is 885 m²; vehicle area 1,010 m². Access hatch on the starboard side. Hospital facilities. Built to commercial standards with military command and control and NBCD facilities. Castilla has improved command and control facilities with two operations centres, one for amphibious and one for a combat group. Operational: Alternatively can also be used for a general logistic support for both military and civil operations, including environmental and disaster relief tasks. Based at Rota

Name	No	Builders	Laid down	Launched	Commissioned
REY JUAN CARLOS I	L 61	Navantia, Ferrol	20 May 2005	10 Mar 2008	Dec 2009

Displacement, tons: 27,079 full load
Dimensions, feet (metres): 757.2 x 105.0 x 23.0 (230.8 x 32.0 x 7.0)
Flight deck, feet (metres): 663.9 x 105.0 (202.3 x 32)
Main machinery: CODAGE; 1 GE LM 2500 gas turbine; 26,550 hp (19.8 MW); 2 MAN 324016V; 21,080 hp (15.7 MW); 2 Siemens-Schottel podded propulsors; 29,500 hp (22 MW)
Speed, knots: 21. **Range, n miles:** 9,000 at 15 kt
Complement: 243 (plus 1,220 including flag staff, air group and 900 landing force)
Guns: 4 - 20 mm, 2 - 12.7 mm MGs.
Countermeasures: Decoys: Chaff launchers, SLQ-25a Nixie torpedo decoy.
Combat data systems: Link 11, 16, SATCOM.
Radars: Air search: Indra Lanza; D-band
Surface search/navigation: 3 Indra Aries; I-band.
Helicopters: 6 landing spots for helicopter or AV-8 operations.

REY JUAN CARLOS I

(Scale 1 : 2,400), Ian Sturton / 1164927

Programmes: Approval for the procurement of a Strategic Projection Ship was given by the Spanish Cabinet on 5 September 2003. Contract for design and construction was awarded in March 2004.

Structure: The hangar is 1,000 m². There are two 27-tonne aircraft elevators to the flight deck. Below the hangar there is a 2,000 m² garage. Typical transport configurations include: 46 tanks and 42 Leopard; 70 containers of 20 tons; 32 NH-90 or 19 AV-8 or 12 CH-47 or 12 NH 90 and 11 AV-8. The landing dock (69.3 x 16 m) is to be capable of operating four LCM (1E) landing craft or at least one landing craft air cushion. Medical facilities will include operating rooms, intensive care unit and sick bay. There is space and weight reserved for a point-defence system.
Operational: The principal roles are amphibious, strategic projection of land forces and disaster relief. The ship will also be capable of operating the fixed-wing aircraft of *Principe de Asturias*.

REY JUAN CARLOS I

7/2008*, Navantia / 1335825

Sales: Two similar ships are to be built for the Australian Navy

REY JUAN CARLOS I

3/2008*, Ships of the World / 1335830

14 LCM (1E)

L 601-614

Displacement, tons: 108 full load
Dimensions, feet (metres): 76.5 x 21 x 3.4 (23.3 x 6.4 x 1.1)
Main machinery: 2 MAN-D 2842-LE 402 diesels; 2,200 hp (m) (1.62 MW); 2 MJ-P660 DD waterjets
Speed, knots: 14
Range, n miles: 160 at 12 kt
Complement: 3
Military lift: 100 tons or one main battle tank

Comment: L 601-602 built by IZAR, San Fernando, for LPDs and delivered in early 2001. Bow and stern ramps. Steel construction with wheelhouse of composites. Maximum speed in ballast is 22 kt. Based at Punteles. An order for a further 12 craft made in November 2004. First three laid down in 2005 and completed by 2007. A further nine built by Navantia, San Fernando. All delivered by early 2008.

L 603

5/2007, Camil Busquets / Vilanova / 1170024

40 LANDING CRAFT

Comment: Apart from those used for divers there are 14 LCM 6 (L 161-167, L 261-267), 16 LCVP and 8 LCPL. All of the LCM 6, eight of the LCVPs and most of the LCPs were built in Spanish Shipyards 1986-88. There are also two tug pontoons (mexoflotes) (L 91-L 92) completed in 1995. Most of these craft are laid up.

LCM L 162

TURIA	M 34	Bazán, Cartagena	22 Nov 1999	16 Oct 2000
DUERO	M 35	Izar, Cartagena	28 April 2003	6 July 2004
TAJO	M 36	Izar, Cartagena	10 June 2004	10 Jan 2005

Displacement, tons: 530 full load
Dimensions, feet (metres): 177.2 oa; 167.3 wl x 35.1 x 7.2 (54, 51 x 10.7 x 2.2)
Main machinery: 2 MTU-Bazán 6V 396 T883 diesels; 1,523 hp(m) (1.12 MW); 2 motors (for hunting); 200 kW; 2 Voith Schneider props; 2 side thrusters; 150 hp(m) (110 kW)
Speed, knots: 14; 7 (hunting)
Range, n miles: 2,000 at 12 kt
Complement: 41 (7 officers)
Guns: 1 Bazán/Oerlikon 20 mm GAM-BO1.
Countermeasures: MCM: FABA/Inisel system. 2 Gayrobot Pluto Plus ROVs.
Combat data systems: FABA/SMYC Nautis.
Radars: Navigation: Kelvin-Hughes 1007; I-band
Sonars: Raytheon/ENOSA SQQ-32 multifunction VDS mine detection; high frequency.

Comment: On 4 July 1989 a technology transfer contract was signed with Vosper Thornycroft to allow Bazan to design a new MCM vessel based on the Sandown class. The order for four of the class was authorised on 7 May 1993, and an agreement signed on 26 November 1993 between DCN and Bazan provided for training in GRP technology. The first of class laid down 30 May 1995. Two more ordered on 28 January 2001. An option for two further ships is unlikely to be exercised. Sonar includes side scanning, and a towed body tracking and positioning system. M 35 and M 36 are to be fitted with the Minesniper mine disposal system. M 31-34 are to be retrofitted in due course. Form 1st MCM Squadron based at Cartagena.

Displacement, tons: 2,738 full load
Dimensions, feet (metres): 270.7 oa; 255.2 wl x 46.9 x 14.8 (82.5, 77.8 x 14.3 x 4.5)
Main machinery: Diesel-electric; 4 MAN-Bazán 14V20/27 diesels, 6,860 hp(m) (5 MW) sustained; 4 generators; 2 AEG motors; 3,800 hp(m) (2.8 MW); 1 shaft, bow and stern thrusters; 350 hp(m) (257 kW) each
Speed, knots: 15. **Range, n miles:** 12,000 at 13 kt
Complement: 39 (9 officers) plus 30 scientists
Radars: Surface search: Racal/Hispano ARPA 2690; I-band.
Navigation: Racal 2690 ACS; F-band.
Helicopters: 1 AB 212

Comment: Ordered in July 1988 from Bazán, Cartagena, by the Ministry of Education and Science. Laid down in 1989, launched 12 March 1990. Has 330 sq m of laboratories, Simbad ice sonar. Dome in keel houses several sensors. Ice-strengthened hull capable of breaking first year ice up to 45 cm at 5 kt. Based at Cartagena, the main task is to support the Spanish base at Livingston Island, Antarctica. Manned and operated by the Navy. Has a telescopic hangar. Modifications made to superstructure in 2004 to increase accommodation for scientific staff.

HESPERIDES 5/2006, Adolfo Ortigueira Gil / 1040691

1 RESEARCH SHIP (AGOB)

Name	No	Builders	Commissioned
LAS PALMAS (ex-Somiedo)	A 52	Astilleros Atlántico, Santander	1978

Displacement, tons: 1,450 full load
Dimensions, feet (metres): 134.5 x 38.1 x 18 (41 x 11.6 x 5.5)
Main machinery: 2 AESA/Sulzer 16ASV25/30 diesels; 7,744 hp(m) (5.69 MW); 2 shafts
Speed, knots: 13. **Range, n miles:** 27,000 at 12 kt
Complement: 33 (8 officers) plus 45 scientists
Guns: 2—12.7 mm MGs
Radars: Navigation: 2 Racal Decca; I-band

Comment: Built as a tug for Compania Hispano Americana de Offshore SA. Commissioned in the Navy 30 July 1981. Converted in 1988 for Polar Research Ship duties in Antarctica with an ice strengthened bow, an enlarged bridge and two containers aft for laboratories. Based at Cartagena.

LAS PALMAS 10/2008*, Adolfo Ortigueira Gil / 1335851

2 MALASPINA CLASS (SURVEY SHIPS) (AGS)

Name	No	Builders	Commissioned
MALASPINA	A 31	Bazán, La Carraca	21 Feb 1975
TORIÑO	A 32	Bazán, La Carraca	23 Apr 1975

Displacement, tons: 820 standard; 1,090 full load
 Dimensions, feet (metres): 188.9 × 38.4 × 12.8 (57.6 × 11.7 × 3.9)
 Main machinery: 2 San Carlos MWM TbRHS-345-61 diesels; 3,600 hp(m) (2.64 MW); 2 shafts; LIPS cp props
 Speed, knots: 15
 Range, n miles: 4,000 at 12 kt; 3,140 at 14.5 kt
 Complement: 63 (9 officers)
 Guns: 2 Oerlikon 20 mm.
 Radars: Navigation: Raytheon 1220/6XB, I/J-band.

Comment: Ordered mid-1972. Both named after their immediate predecessors. Developed from British Bulldog class. Fitted with two Atlas DESO-10 AN 1021 (280-1,400 m) echosounders, retractable Burnet 538-2 sonar for deep sounding, Egg Mark B side scan sonar, Raydist DR-S navigation system, Hewlett Packard 2100A computer inserted into Magnavox Transit satellite navigation system, active rudder with fixed pitch auxiliary propeller. *Malaspina* used for a NATO evaluation of a Ship's Laser Inertial Navigation System (SLINS) produced by British Aerospace. Based at Cadiz.

MALASPINA 11/2008*, Adolfo Ortigueira Gil / 1335850

2 LHT-130 CLASS (SURVEY MOTOR BOATS) (YGS)

Name	No	Builders	Commissioned
ASTROLABIO	A 91	Rodman, Vigo	30 Nov 2001
ESCANDALLO	A 92	Rodman, Vigo	27 Feb 2004

Displacement, tons: 8 full load
 Dimensions, feet (metres): 41.3 × 13.8 × 1.6 (12.6 × 4.2 × 0.5)
 Main machinery: 2 diesels, 700 hp (522 kW); 2 shafts
 Speed, knots: 30

Comment: Support craft of the Hydrographic Flotilla. Based at Puntales and transportable by road, rail, ship or aircraft.

ESCANDALLO 10/2008*, Adolfo Ortigueira Gil / 1335849

GUARDIAMARINA SALAS	A 124	Rodman, Vigo	2008

Displacement, tons: 36
 Dimensions, feet (metres): 67.2 × 18.0 × 3.1 (20.5 × 4.9 × 0.96)
 Main machinery: 2 Caterpillar diesels; 1,500 hp (1.1 MW); 2 shafts
 Speed, knots: 20
 Range, n miles: 500 at 15 kt
 Complement: 16
 Radars: Navigation: Furuno; I-band.

Comment: GRP hull. New craft which replaced Naval School tenders in 2007/08.

GUARDIAMARINA CHEREGUINI 12/2006, Adolfo Ortigueira Gil / 1167149

AUXILIARIES

Notes: There are plans to acquire a new submarine rescue ship to replace *Neptuno*.

0 + 1 FLEET REPLENISHMENT SHIP (AORH)

Name	No	Builders	Laid down	Launched	Commissioned
CANTABRIA	A 15	Navantia, San Fernando	18 July 2007	21 July 2008	Sep 2009

Displacement, tons: 19,500 full load
 Dimensions, feet (metres): 570.5 x 75.5 x 26.2 (173.9 x 23.0 x 8.0)
 Main machinery: 2 diesels; 29,200 hp (21.8 MW); 1 shaft
 Speed, knots: 21
 Range, n miles: 6,000 at 13 kt
 Complement: 112
 Cargo capacity: 6,400 tons diesel; 1,600 tons aviation fuel
 Guns: To be announced.
 Countermeasures: To be announced.
 Combat data systems: To be announced.
 Radars: To be announced.
 Helicopters: 2 SH 3D Sea King or 3 AB 212.

Comment: Similar in design to *Patino* class with improved capabilities including double-hull, container cargo capacity, enhanced sensors and a combat data system. Two RAS stations on each side and one stern refuelling station. There is to be a small hospital with 10 beds. Contract for construction of the ship signed on 30 December 2004.

CANTABRIA 10/2008*, Navantia / 1335823

1 PATIÑO CLASS (FLEET LOGISTIC TANKER) (AORH)

Name	No	Builders	Launched	Commissioned
PATIÑO	A 14	Bazán, Ferrol	22 June 1994	16 June 1995

Displacement, tons: 5,762 light; 17,045 full load
 Dimensions, feet (metres): 544.6 x 72.2 x 26.2 (166 x 22 x 8)
 Main machinery: 2 Bazán/Burmeister & Wain 16V40/45 diesels, 24,000 hp(m) (17.6 MW) sustained; 1 shaft; LIPS cp prop
 Speed, knots: 20
 Range, n miles: 13,440 at 20 kt
 Complement: 146 plus 19 aircrew plus 20 spare
 Cargo capacity: 6,815 tons diesel; 1,660 tons aviation fuel; 500 tons solids
 Guns: 2 Bazán 20 mm/120 Meroka CIWS (fitted for), 2 Oerlikon 20 mm/90
 Countermeasures: Decoys: 4 SRBOC chaff launchers. Nixie torpedo decoy.
 ESM/ECM: Aldebaran intercept and jammer.
 Radars: 3 navigation/helo control; I-band
 Helicopters: 2 SH-3D Sea King or 3 AB 212

Comment: The Bazán design AP 21 was rejected in favour of this joint Netherlands/Spain design. Ordered on 28 December 1991. Laid down 1 July 1993. Two supply stations each side for both liquids and solids. Stern refuelling. One *Ventrep* supply station, and workshops for aircraft maintenance. Medical facilities. Built to merchant ship standards with military NBC. Accommodation for up to 50 female crew members. SCOT 3 SATCOM to be fitted. Based at Ferrol.

PATIÑO 6/2007, Maritime Photographic / 1170043

1 TRANSPORT SHIP (AKRH)

Name	No	Builders	Commissioned
MARTIN POSADILLO (ex-Rivanerion, ex-Cala Portals)	A 04 (ex ET 02)	Duro Folguera, Gijón	1973

Displacement, tons: 1,920 full load
 Dimensions, feet (metres): 246.1 x 42.7 x 14.1 (75 x 13 x 4.3)
 Main machinery: 1 BMW diesel; 2,400 hp(m) (1.77 MW); 1 shaft
 Speed, knots: 10
 Complement: 18
 Military lift: 42 trucks plus 25 jeeps
 Helicopters: Platform for 1 Chinook.

Comment: Ro-Ro ship taken on by the Army in 1990 and transferred to the Navy on 14 February 2000. Based at Cartagena.

MARTÍN POSADILLO 4/2008*, Adolfo Ortigueira Gil / 1335848

1 TRANSPORT SHIP (APH)

Y 255	524	37.6 x 7 x 2.9	300	1981

Comment: All built by Bazán at Cádiz and Ferrol.

Y 251 11/2003, Diego Quevedo / 0570853

1 TRANSPORT SHIP (AKR)

Name	No	Builders	Commissioned
EL CAMINO ESPAÑOL (ex-Araguary, ex-Cyndia)	A 05 (ex-ET 03)	Maus, Rio de Janeiro	Oct 1984

Displacement, tons: 5,804 full load
 Dimensions, feet (metres): 313.6 x 59.8 x 15.2 (95.5 x 18.3 x 4.6)
 Main machinery: 2 Sulzer diesels; 6,482 hp(m) (4.76 MW); 2 shafts
 Speed, knots: 12
 Complement: 24 (3 officers) plus 40 Army
 Military lift: 24 tanks plus 15 trucks and 102 jeeps
 Radars: Navigation, I-band.

Comment: Acquired by the Army in early 1999 but commissioned into the Navy on 21 September 1999. Ro-Ro design converted for military use by Bazán in Cartagena. Used for logistic support of armed forces. Has two 25 ton cranes. Based at Cartagena.

EL CAMINO ESPAÑOL 10/2008*, Adolfo Ortigueira Gil / 1335845

756 Spain/Auxiliaries

1 FLEET TANKER (AORLH)

Name	No	Builders	Launched	Commissioned
MARQUÉS DE LA ENSENADA (<i>ex-Mar del Norte</i>)	A 11	Bazan, Ferrol	5 Oct 1990	3 June 1991

Displacement, tons: 13,592 full load
Dimensions, feet (metres): 403.9 oa; 377.3 wl x 64 x 25.9 (123.1; 115 x 19.5 x 7.9)
Main machinery: 1 MAN-Bazán 18V40/50A; 11,247 hp(m) (8.27 MW) sustained; 1 shaft
Speed, knots: 16
Range, n miles: 10,000 at 15 kt
Complement: 80 (11 officers)
Cargo capacity: 7,498 tons diesel; 1,746 tons JP-5; 120 tons deck cargo
Guns: 2—12.7 mm MGs.
Radars: Surface search. Racal Decca 2459, i/F-band
Navigation: Racal Decca ARPA 2690/9; I-band.
Helicopters: 1 AB 212 or similar.

Comment: Ordered 30 December 1988; laid down 16 November 1989. The deletion of the *Teide* left a serious deficiency in the Fleet's at sea replenishment capability which has been restored by the *Patino*. In addition, and as a stop gap, this tanker was built at one third of the cost of the larger support ship. Two Vartrep stations and a platform for a Sea King size helicopter. Replenishment stations on both sides and one astern. Provision for Meroka CIWS four chaff launchers as well as ESM. Has a small hospital. Based at Rota.

MARQUÉS DE LA ENSENADA 3/2008*, Michael Winter / 1335831

2 LOGISTIC SUPPORT SHIPS (ATF/AGDS)

Name	No	Builders	Commissioned
MAR CARIBE (<i>ex-Amatista</i>)	A 101	Duro Felguera, Gijón	24 Mar 1975
NEPTUNO (<i>ex-Mar Rojo, ex-Amapiola</i>)	A 20 (ex-A 102)	Duro Felguera, Gijón	24 Mar 1975

Displacement, tons: 1,860 full load
Dimensions, feet (metres): 176.4 x 38.8 x 14.8 (53.8 x 11.8 x 4.5)
Main machinery: 2 Echevarria-Burmeister & Wain 18V23HU diesels; 4,860 hp(m) (3.57 MW); 2 shafts; bow thruster
Speed, knots: 12
Range, n miles: 6,000 at 10 kt
Complement: 44

Comment: Two offshore oil rig support tugs were acquired and commissioned into the Navy 14 December 1988. Bollard pull, 80 tons. *Neptuno* converted as a diver support vessel and submarine rescue ship. She has a dynamic positioning system and carries a side scan mine detection high-frequency sonar as well as a semi-autonomous remote-controlled DSRV. The control cable restricts operations to within 75 m of an auxiliary diving unit. The DSRV is launched and recovered by a hydraulic arm. *Mar Caribe* works with Amphibious Forces and is based at Cadiz. *Neptuno* based at Cartagena.

MAR CARIBE 10/2008*, Adolfo Ortigueira Gil / 1335847

NEPTUNO 11/2002, A Campanera / Rovira / 0570952

Y 124 10/2008, Adolfo Ortigueira Gil / 1335843

GOVERNMENT MARITIME FORCES

POLICE (GUARDIA CIVIL – MARITIME SERVICE)

Notes: Created by Royal decree on 22 February 1981 and owned by the Ministry of Interior. Bases at Algeciras, Alicante, Almería, Barcelona, Bilbao, Cadiz, Cartagena, Castellón, Ceuta, Corralajo, Gijón, Huelva, La Coruña, Lanzarote, Las Palmas, Málaga, Main, Motril, Palma, Pontevedra, Santander, Tarragona, Valencia and Vizcaya. Personnel strength 1,000 (35 officers). The force has taken over the anti-terrorist role and some general patrol duties as a peacetime paramilitary organisation coming under the Ministry of Defence in war. In addition to the craft listed there are some 42 smaller craft (under 9 m). All vessels are armed. 18 BO 105, 8 BK-117 and 31 Eurocopter EC-135 helicopters are used for coastal patrols and are based at Tenerife, Seville, Valencia, Mallorca, Huesca, Logroño, Leon and La Coruña. Two EADS/CASA 235 maritime patrol aircraft are to enter service in 2009.

RESEARCH SHIPS

Notes: Nine civilian research ships are owned by the Government Science and Technology Ministry and by the Agriculture Fishery and Food Ministry. Those operated by the Instituto Español de Oceanografía (IEO) are Vizconde de Eza (1,400 tons), Cornida de Saavedra (1,113 tons), F P Navarro (178 tons), Odon de Buen (64 tons), Lura (34 tons), José Rioja (32 tons), J M Navaz (30 tons), Emma Bardán (209 tons) and Miguel Oliver (1,200 tons). Those operated by CSIC are Garcia del Cid (539 tons), Mytilus (170 tons) and Sarmiento de Gamboa (2,980 tons). The ships operate in co-operation with the Spanish Navy ship Hesperides and the French research ship Thalassa. A new ship is to be delivered to CSIC in 2006

VIZCONDE DE EZA 6/2005, Adolfo Ortigueira Gil / 1153454

SARMIENTO DE GAMBOA 5/2008*, Adolfo Ortigueira Gil / 1335834

CUSTOMS

Notes: Customs service is the responsibility of the Ministry of Treasure. All carry ADUANAS on ships' sides. Some of the larger vessels are armed with machine guns. Ships are based at 17 ports including Ceuta and Melilla in north Africa. There are also three MBB-105, one MBB-117 and two AS 365 Dauphin helicopters. Six CASA C-212 patrol aircraft were transferred to the Air Force in 1997 and are operated by the 37th Air Wing.

CASA C-212 3/2003, Adolfo Ortigueira Gil / 0570963

MARITIME RESCUE, SAFETY AND LOGISTIC SUPPORT

Notes: These roles are discharged by two services. SASEMAR (Sociedad Estatal de Salvamento y Seguridad Marítima) is under the direction of the Merchant Marine but may come under a Coast Guard service in due course. It operates 11 salvage tugs (*Don India, Clara Campoamor, Punta Mayor, Alfonso de Chaves, Ria de Vigo, Punta Salinas, Ofi Valencia, L'Albufera, Golfo de Vizcaya, Catalunya* and *Remolcanosa Cinco*), five anti-pollution ships and 55 fast rescue craft. Aircraft assets include three EADS/CASA C-235 and 10 helicopters (AW-139 and Sikorsky S-61). All ships are painted red with a white stripe on the hull. ISM (Instituto Social de la Mar) operates one specialised medical and logistic ship for support of fishing vessels. *Esperanza del Mar* (5,000 tons) is based at Las Palmas (Canary Islands) Naval Base and *Juan de la Cosa* is based at Santander.

Sri Lanka

Country Overview

Formerly known as Ceylon, the Democratic Socialist Republic of Sri Lanka gained independence in 1948. Situated off the southeast coast of India, from which it is separated by the Palk Strait and Gulf of Mannar, it has an area of 25,326 square miles and a coastline of 723 n miles with the Indian Ocean. The capital of Sri Lanka is Sri Jayawardenapura (Kotte) while Colombo is the largest city and principal port. There are further ports at Trincomalee, Kankasanthurai and Galle. Territorial waters (12 n miles) are claimed. A 200 n mile EEZ has been claimed although the limits have only been partly defined by boundary agreements.

Headquarters Appointments

Commander of the Navy:

Vice Admiral W K J Karannagoda, RSP, VSV, USP

Chief of Staff

Rear Admiral M R U Siriwardana, USP

Director General, Operations:

Rear Admiral D W A S Dissanayake, WV, RSP, VSV, USP

Area Commanders

Commander Western Naval Area

Rear Admiral W M K N Weerakoon, USP

Area Commanders – continued

Commander North Central Naval Area:

Rear Admiral W M LT B Illangakoon, RSP, USP

Commander Northern Naval Area:

Rear Admiral T S G Samarasinghe, RSP, VSV, USP

Commander Eastern Naval Area:

Rear Admiral S M B Weerasekera, RSP, USP

Commander Southern Naval Area:

Commodore R C Wijegunaratne, WV, RSP, USP

Personnel

- (a) 2009: 35,148 (1,720 officers) regulars
 (b) SLVNF: 7,351 (333 officers)
 (c) Reserve force (regular): 730 (7 officers)
 (d) Reserve force (volunteer): 143 (8)

Bases

Navy HQ: Colombo.

Western Command HQ: Colombo port (other bases at Welisara and Kalpitiya Training Centre at Thalathoya).

Eastern Command HQ: Trincomalee port (other bases at Nilaweli, Pulmudai, Sampoor, Thavulwewa and Thiriyaya, Naval Academy at Trincomalee)

Southern Command HQ: Galle port (other bases at Tangalle, Boossa training centre and Kirinda harbour).

Northern Command HQ: Kankasanthurai port (other bases at Madagal, Karainagar, Velerni Island, Mandathive Island, Nagadeepe Island and Pungudathive Island).
 North Central Command HQ: Medewachchiya (other bases at Punewa training centre, Silavathurai, Mullikulam, Mannar Town, Thalaimannar and Mannar Island)

PATROL FORCES

Notes: It is planned to acquire six fast attack craft and four 41 m patrol craft in 2009.

1 SUKANYA CLASS (OFFSHORE PATROL VESSEL) (PSOH)

Name	No	Builders	Launched	Commissioned
SAYURA (ex-Saryu)	P 620 (ex 54)	Hindustan SY, Vishakapatnam	16 Oct 1989	8 Oct 1991

Displacement, tons: 1,890 full load

Dimensions, feet (metres): 331.7 oa; 315 wl x 37.7 x 14.4 (101.1; 96 x 11.5 x 4.4)

Main machinery: 2 SEMT-Pielstick 16 PA6V 280 diesels, 12,800 hp(m) (9.41 MW) sustained, 2 shafts

Speed, knots: 21

Range, n miles: 5,800 at 15 kt

Complement: 140 (15 officers)

Guns: 1 Bofors 40 mm/80. 4 China 14.5 mm (twin) 4–12.7 mm MGs.

Radars: Surface search: Racal Decca 2459; I-band

Navigation: Bherat 1245; I-band.

Comment: Transferred from India and recommissioned on 9 December 2000.

SAYURA 12/2007, Chris Sattler / 1170045

1 RELIANCE CLASS (PSOH)

Name	No	Builders	Commissioned
SAMUDURA (ex-Courageous)	P 621 (ex-WMEC 622)	Coast Guard Yard, Baltimore	8 Dec 1967

Displacement, tons: 1,129 full load

Dimensions, feet (metres): 210.5 x 34 x 10.5 (64.2 x 10.4 x 3.2)

Main machinery: 2 Alco 16V-251 diesels; 6,480 hp (4.83 MW) sustained, 2 shafts; LIPS cp props

Speed, knots: 18. Range, n miles: 6,100 at 14 kt; 2,700 at 18 kt

Complement: 75 (12 officers)

Guns: 1 Boeing 25 mm/87 Mk 38 Bushmaster; 200 rds/min to 6.8 km (3.4 n miles). 2–12.7 mm MGs.

Radars: Surface search: Hughes/Furuno SPS-73; I-band.

Helicopters: Platform for one medium.

Comment: Transferred from USCG to Sri Lanka on 24 June 2004. During 34 years in USCG service, underwent Major Maintenance Availability (MMA) in 1989. The exhausts for main engines, ship service generators and boilers were run in a vertical funnel which reduced flight deck size. Capable of towing ships up to 10,000 tons.

SAMUDURA 6/2007, Sri Lanka Navy / 116/812

1 JAYASAGARA CLASS (OFFSHORE PATROL VESSEL) (PB)

Name	No	Builders	Launched	Commissioned
JAYASAGARA	P 601	Colombo Dockyard	26 May 1983	9 Dec 1983

Displacement, tons: 330 full load

Dimensions, feet (metres): 130.5 x 23 x 7 (39.8 x 7 x 2.1)

Main machinery: 2 MAN 8L20/27 diesels; 2,180 hp(m) (1.6 MW) sustained; 2 shafts

Speed, knots: 15

Range, n miles: 3,000 at 11 kt

Complement: 52 (4 officers)

Guns: 2 China 25 mm/80 (twin) 2 China 14.5 mm (twin) MGs. 2–12.7 mm MGs. 2–40 mm

AGL. 2–7.62 mm MGs.

Radars: Surface search. Anritsu RA 723; I band.

Comment: Ordered from Colombo Dockyard on 31 December 1981. Second of class sunk by Tamil forces in September 1994.

JAYASAGARA 6/2004, Sri Lanka Navy / 1044193

2 SAAR 4 CLASS (FAST ATTACK CRAFT—MISSILE) (PGG)

Name	No	Builders	Launched	Commissioned
NANDIMITHRA (ex-Moloch)	P 701	Israel Shipyard, Haifa	22 Mar 1979	May 1979
SURANIMALA (ex-Komamiut)	P 702	Israel Shipyard, Haifa	19 July 1978	Aug 1980

Displacement, tons: 415 standard; 450 full load

Dimensions, feet (metres): 190.6 x 25 x 8 (58 x 7.8 x 2.4)

Main machinery: 4 MTU/Bazán 16V 956TB91 diesels; 15,000 hp(m) (11.03 MW) sustained; 4 shafts

Speed, knots: 32

Range, n miles: 1,650 at 30 kt; 4,000 at 17.5 kt

Complement: 75

Missiles: 3 Gabriel II; radar or TV optical guidance; semi-active radar plus anti-radiation homing to 36 km (20 n miles) at 0.7 Mach; warhead 75 kg

Guns: 1 OTO Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.7 n miles); weight of shell 6 kg. Adapted for shore bombardment. 1–40 mm.

2 Rafael Typhoon 20 mm. 2–20 mm. 2–12.7 mm MGs. 2–40 mm AGL.

Radars: Air/surface search: Thomson-CSF TH-D 1040 Neptune; G-band; range 33 km (18 n miles) for 2 m² target

Fire control: Selenia Orion RTN 10X; I-band.

Comment: Transferred from Israel and recommissioned on 9 December 2000.

NANDIMITHRA 10/2003, Hartmut Ehlers / 05/0591

**5 SHANGHAI II (TYPE 062) CLASS

Complement: 44
Guns: 2 China 37 mm/63 (1 twin). 1—30 mm GCM-A03. 4 China 25 mm/60 (2 twin).
2—12.7 mm MGs 2—40 mm AGL.
Radars: Surface search: Anritsu 726UA; I-band.

Comment: Transferred from China by lift ship after delivery in 1995.

RANAWICKRAMA 6/2008, Sri Lanka Navy / 1335871

**2 MOD HAIZHUI (LUSHUN) (TYPE 062/1G) CLASS
(FAST ATTACK CRAFT—GUN) (PB)**

PRATHPA P 340 **UDARA** P 341

Displacement, tons: 212 full load
Dimensions, feet (metres): 149 × 21 × 5.6 (45.5 × 6.4 × 1.7)
Main machinery: 4 Type Z12V 190 BCJ diesels, 4,800 hp (3.53 MW); 4 shafts
Speed, knots: 28
Range, n miles: 750 at 16 kt
Complement: 44 (3 officers)
Guns: 4 China 37 mm/63 (2 twin) Type 76.
2 China 14.5 mm (1 twin) Type 82 MGs
2—12.7 mm MGs
2—40 mm AGL
Radars: Surface search. Racal Decca RM 1070A; I-band

Comment: Built at Lushun Dockyard, Darlin. Commissioned on 2 March 1998. Larger version of Haizhui class.

UDARA 6/2005, Sri Lanka Navy / 1153483

**28 COLOMBO MK I/II/III/IV CLASS
(FAST ATTACK CRAFT—GUN) (PBF)**

P 410-415	P 419-424	P 432-437	P 450-451	P 494
P 417	P 430	P 439	P 490-492	P 497

Displacement, tons: 56 full load
Dimensions, feet (metres): 79.7 × 18.6 × 3.9 (24.3 × 5.7 × 1.2)
Main machinery: 2 MTU 12V 396 TE94 diesels (Mk I/II) or 2 Deutz TBD 620 16V (Mk III/IV);
4,570 hp (3.36 MW); ASD 16 surface drives
Speed, knots: 45. **Range, n miles:** 850 at 16 kt
Complement: 20
Guns: 1 Rafael Typhoon 23 mm. 1 Oerlikon 20 mm. 4—12.7 mm MGs. 8—762 mm MGs.
2—40 mm AGL
Weapons control: Elop MSIS optronic director; Typhoon GFCS.
Radars: Surface search. Furuno FR 8250 or Corden Mk 2, I-band

Comment: Built by Colombo Dockyard to the Israeli Shaldag design. Deliveries of Mk I (P 450-451) began in 1996 and of Mk II (P 490-492, P 494, P 497) began in 1997. P 493 and P 496 sunk in action in 2000. Deliveries of Mk III (P 410-415, P 417, P 419-424) began in 2000 and of Mk IV (P 430, 432-439) in 2005. P 418 sunk in action in May 2006 and P 438 in March 2008.

COLOMBO MK II 6/2006, Sri Lanka Navy / 116412

COLOMBO MK III 6/2006, Sri Lanka Navy / 116411

6 SHALDAG CLASS (FAST ATTACK CRAFT—GUN) (PBF)

P 470 (ex-P 491) P 471 (ex-P 492) P 472 P 473 P 474 P 475

Displacement, tons: 58 full load
Dimensions, feet (metres): 81.4 × 19.7 × 3.9 (24.8 × 6 × 1.2)
Main machinery: 2 Deutz 620 TB 16V diesels; 5,000 hp(m) (3.68 MW); 2 LIPS or MJP water-jets
Speed, knots: 50
Range, n miles: 700 at 32 kt
Complement: 20
Guns: 1 Rafael Typhoon 23 mm, 1—20 mm 2—12.7 mm MGs, 6—7.62 mm MGs, 2—40 mm AGL.
Weapons control: ELOP compass optronic director, Typhoon GFCS
Radars: Surface search: MD 3220 Mk II; I-band

Comment: Originally launched in December 1988, first one acquired from the Israeli Shipyards, Haifa on 24 January 1996, second 20 July 1996 and third on 16 February 2000. Four more followed. Same hull used for the Colombo class. Also in service in Cyprus. P 476 sunk on 7 January 2006.

SHALDAG CLASS 6/2003, Sri Lanka Navy / 05/16989

4 SUPER DVORA MK I CLASS (FAST ATTACK CRAFT—GUN) (PBF)

P 440 (ex-P 465) P 441 (ex-P 466) P 442 (ex-P 467) P 443 (ex-P 468)

Displacement, tons: 54 full load
Dimensions, feet (metres): 73.5 × 18 × 5.8 (22.4 × 5.5 × 1.8)
Main machinery: 2 MTU 12V 396 TB93 diesels; 3,260 hp(m) (2.4 MW) sustained; 2 shafts
Speed, knots: 46
Range, n miles: 1,200 at 17 kt
Complement: 20 (1 off cer)
Guns: 2 Oerlikon 20 mm, 2—12.7 mm MGs, 4—40 mm AGL.
Radars: Surface search: Decca 926; I-band

Comment: Ordered from Israel Aircraft Industries in October 1986 and delivered in 1987–88. A more powerful version of the Dvora class. P 464 was destroyed by Tamil guerrillas on 29 August 1993 and P 463 on 29 August 1995. These craft have a deeper draft than the Mk II version with surface drives.

P 443 (ex-P 468) 1995, Sri Lanka Navy / 0130147

4 SUPER DVORA MK II CLASS (FAST ATTACK CRAFT—GUN) (PBF)

P 460 (ex-P 441) P 462 (ex-P 497) P 464 P 465

Displacement, tons: 64 full load
Dimensions, feet (metres): 82 × 18.4 × 3.6 (25 × 5.6 × 1.1)
Main machinery: 2 MTU 12V 396 TE94 diesels; 4,570 hp(m) (3.36 MW); ASD16 surface drives
Speed, knots: 50
Range, n miles: 700 at 30 kt
Complement: 20 (1 officer)
Guns: 1 Rafael Typhoon 23 mm, 4—12.7 mm MGs, 6—7.62 mm MGs, 2—40 mm AGL.
Weapons control: Elop MSIS optronic director; Typhoon GFCS
Radars: Surface search: Kodon MD 3220; I-band.

Comment: First four ordered from Israel Aircraft Industries Ramta in early 1995. A slightly larger version of the Mk I. First one delivered 5 November 1995, second 30 April 1996, third 22 June 1996 and fourth in December 1996. Two more were acquired on 9 June 1999 and 15 September 1999 respectively. The engines are an improved version of those fitted in the Israeli Navy craft. P 463 sunk in action in 2000. P 461 reported lost in action.

SUPER DVORA Mk II 11/1999 / 07061697

3 DVORA CLASS (FAST ATTACK CRAFT—GUN) (PBF)

P 401–403 (ex-P 420 (ex-P 453)–P 422 (ex-P 456))

Displacement, tons: 47 full load
Dimensions, feet (metres): 70.8 × 18 × 5.8 (21.6 × 5.5 × 1.8)
Main machinery: 2 MTU 12V 331 TC81 diesels; 2,605 hp(m) (1.91 MW) sustained; 2 shafts
Speed, knots: 36
Range, n miles: 1,200 at 17 kt
Complement: 18
Guns: 2 Oerlikon 20 mm, 2—12.7 mm MGs, 6—7.62 mm MGs, 2—40 mm AGL.
Radars: Surface search: Anritsu 721UA; I-band.

Comment: 'Dvora' class, first pair of which transferred from Israel early 1984, next four in October 1986. Built by Israel Aircraft Industries. One sunk by Tamil forces on 29 August 1995 and second on 30 March 1996. One more deleted in late 1996. Not downgraded to patrol craft as previously reported but speed may have been reduced.

DVORA CLASS 6/2003, A Sharma / 0570994

3 SOUTH KOREAN KILLER CLASS (FAST ATTACK CRAFT—GUN) (PBF)

P 404 (ex-P 430 (ex-P 473)) P 405 (ex-P 431 (ex-P 474)) P 406 (ex-P 432 (ex-P 475))

Displacement, tons: 56 full load
Dimensions, feet (metres): 75.5 × 17.7 × 5.9 (23 × 5.4 × 1.8)
Main machinery: 2 MTU 396 TB93 diesels; 3,260 hp(m) (2.4 MW) sustained; 2 shafts
Speed, knots: 40
Complement: 18
Guns: 2 Oerlikon 20 mm, 2—12.7 mm MGs, 6—7.62 mm MGs
Radars: Surface search: Racal Decca 926; I-band.

Comment: 'South Korean Killer' class, built by Korea SB and Eng, Busan. All commissioned February 1988. Not downgraded to patrol craft as previously reported but speed may have been reduced.

KILLER CLASS 6/2003, A Sharma / 0570994

5 TRINITY MARINE CLASS (FAST ATTACK CRAFT—GUN) (PBF)

P 480–481 P 483–485

Displacement, tons: 68 full load
Dimensions, feet (metres): 81.7 × 17.7 × 4.9 (24.9 × 5.4 × 1.5)
Main machinery: 2 MTU 12V 396TE94 diesels, 4,570 hp (m) (3.36 MW) sustained; 2 water-jets
Speed, knots: 47 **Range, n miles:** 600 at 17 kt
Complement: 20
Guns: 2 Derlikon 20 mm, 2—12.7 mm MGs, 2—762 mm MGs, 1 Grenade launcher.
Radars: Surface search: Raytheon R 1210; I-band.

Comment: All built at Equitable Shipyard, New Orleans. First three delivered in January 1997; second three in September 1997. All aluminium construction. P 482 sunk in action in 2000.

P 480 1/1997, Sri Lanka Navy / 0080/01

3 COASTAL PATROL CRAFT (PB)

P 201 P 211 P 215

Displacement, tons: 21 full load
Dimensions, feet (metres): 46.6 × 12.8 × 3.3 (14.2 × 3.9 × 1)
Main machinery: 2 Detroit 8V-71TA diesels; 460 hp (343 kW); 2 shafts
Speed, knots: 20 **Range, n miles:** 450 at 14 kt
Complement: 15 (1 officer)
Guns: 2—12.7 mm MGs.
Radars: Surface search: Furuno FR 2010; I-band.

Comment: Built by Colombo DY and commissioned in 1982 (P 201), June 1986 (P 211) and 1993 (P 215). P 241 and P 243 decommissioned in 2001 and P 214 and P 233 no longer in service.

P 201 6/2003, Sri Lanka Navy / 05/05B/

4 CHEVERTON CLASS COASTAL PATROL CRAFT (PB)

P 221 (ex-P 421) P 222 (ex-P 422) P 223 (ex-P 423) P 224 (ex-P 424)

Displacement, tons: 22 full load
Dimensions, feet (metres): 55.9 × 14.8 × 3.9 (17 × 4.5 × 1.2)
Main machinery: 2 Detroit 8V-71TA diesels; 460 hp (343 kW); 2 shafts
Speed, knots: 23 **Range, n miles:** 1,000 at 12 kt
Complement: 15
Guns: 1—12.7 mm MG
Radars: Surface search: Racal Decca 110; I-band.

Comment: Used for general patrol duties. Built by Cheverton Workboats, UK and commissioned in 1977. One paid off in 1996.

P 222 6/2004, Sri Lanka Navy / 104419Z

3 SIMONNEAU CLASS (PBF)

P 250 (ex-P 410, ex-P 483) P 252 (ex-P 412, ex-P 485) P 253 (ex-P 413, ex-P 486)

Displacement, tons: 28 full load
Dimensions, feet (metres): 56.8 × 16.1 × 4.6 (17.3 × 4.9 × 1.4)
Main machinery: 2 MTU 12V 183 TE93 diesels; 2,300 hp (m) (1.69 MW); 2 Hamilton water-jets
Speed, knots: 42 **Range, n miles:** 500 at 35 kt
Complement: 15
Guns: 1 DCN 20 mm 2—12.7 mm MGs 2—762 mm MGs.
Radars: Surface search: Racal Decca, I-band.

Comment: Simonneau Marine Type 508 craft. First pair completed in December 1993 and shipped to Colombo in 1994. Second pair built in Colombo and completed in 1995. The plan to build more was shelved. Downgraded to patrol craft on 1 August 2000. Speed likely to have been reduced. P 251 sunk in 2001.

SIMONNEAU CLASS 6/2004, Sri Lanka Navy / 1044191

42 INSHORE PATROL CRAFT (PBR)

P 106–107 (ex-P 151–152)	P 124 (ex-P 180)	P 140–145 (ex-P 120–125)
P 115–118 (ex-P 163–166)	P 126 (ex-P 182)	P 146–150 (ex-P 127–131)
P 119 (ex-P 169)	P 127–132 (ex-P 184–189)	P 151–156 (ex-P 133–138)
P 120–122 (ex-P 171–173)	P 133–136 (ex-P 191–194)	
P 123 (ex-P 175)	P 137–138 (ex-P 196–197)	

Displacement, tons: 10 full load
Dimensions, feet (metres): 44.3 × 9.8 × 1.6 (13.5 × 3 × 0.5)
Main machinery: 2 Cummins 6BTA5.9-M2; 584 hp (436 kW) sustained; 2 water-jets
Speed, knots: 33 **Range, n miles:** 330 at 25 kt
Complement: 5
Guns: 2—12.7 mm MGs, 2—762 mm MGs.
Radars: Surface search: Furuno 1941; I-band.

Comment: First pair (P 106, 107) built by TAOS Yacht Company, Colombo, and delivered in 1991. Next 23 (P 115–124, P 126–138) built by Blue Star Marine, Colombo and delivered between 1994 and 1998. There are minor superstructure differences between the first pair and the rest. P 140–156 built by SLN, IPCCP Welisara. P 162, P 168, P 174 and P 182 sunk in action. P 101 and P 104 decommissioned.

INSHORE PATROL CRAFT 6/2006, Sri Lanka Navy / 1164410

4 INSHORE PATROL CRAFT (TYPE BSM) (PBR)

P 145–147 P 149

Displacement, tons: 3.5 full load
Dimensions, feet (metres): 42 × 8 × 1.6 (12.8 × 2.4 × 0.5)
Main machinery: 2 outboard motors; 280 hp (209 kW)
Speed, knots: 30
Complement: 9
Guns: 1—12.7 mm MG.

Comment: Acquired in 1988 from Blue Star Marine. Similar to P 111 but with outboard engines. P 143 (ex-P 150) was mined and sunk in August 1991 and again sunk in 1995.

INSHORE PATROL CRAFT 6/2004, Sri Lanka Navy / 1044190

4 INSHORE PATROL CRAFT (TYPE CME) (PBR)

P 110 P 111 P 112 P 113

Displacement, tons: 5 full load
Dimensions, feet (metres): 44 × 9.8 × 1.6 (13.4 × 3 × 0.5)
Main machinery: 2 Yamaha D 343 diesels; 730 hp(m) (544 kW) sustained; 2 shafts
Speed, knots: 26
Complement: 5
Guns: 1—12.7 mm MG, 1—7.62 mm MG.
Radars: Surface search: Furuno FR 1941; I-band

Comment: Built by Consolidated Marine Engineers, Sri Lanka. First nine delivered in 1988, four more in 1992 and two more in 1994. Most of these craft have been destroyed.

P 111 6/2003, Sri Lanka Navy / 0570906

1 VIKRAM CLASS (OFFSHORE PATROL VESSEL) (PSOH)

Name	No	Builders	Launched	Commissioned
SAGARA (ex-Varaha)	P 622 (ex-41)	Goa Shipyard	5 Nov 1990	11 Mar 1992

Displacement, tons: 1,224 full load
Dimensions, feet (metres): 243.1 × 37.4 × 10.5 (74.1 × 11.4 × 3.2)
Main machinery: 2 SEMT-Pielstick 16 PA6V280 diesels; 12,800 hp (9.41 MW) sustained; 2 shafts, cp props
Speed, knots: 22
Range, n miles: 4,250 at 12 kt
Complement: 96 (11 officers)
Guns: 1—30 mm, 1—23 mm.
Radars: Surface search/navigation: Furuno 2127; I-band.
Helicopters: Platform for 1 light.

Comment: Former Indian Coast Guard ship donated and recommissioned on 25 February 2007.

SAGARA 6/2008*, Sri Lanka Navy / 1335872

12 MK III INSHORE PATROL CRAFT (PBF)

P 010-021

Displacement, tons: 8 full load
Dimensions, feet (metres): 46.6 × 7 × 7 (14.2 × 7 × 7)
Main machinery: 2 Yanmar 6LY2A STP diesels; 737 hp(m) (550 kW); 2 shafts
Speed, knots: 38
Complement: 8
Guns: 1—23 mm; 1—14.5 mm.
Radars: Surface search: Furuno; I-band.

Comment: Built by Sri Lanka Navy.

P 012 6/2008*, Sri Lanka Navy / 1335870

103 INSHORE PATROL CRAFT (PBF)

Z 101-203

Displacement, tons: 2.6 full load
Dimensions, feet (metres): 23.0 × 7 × 7 (7.0 × 7 × 7)
Main machinery: 2 outboard motors, 400 hp(m) (298 kW)
Speed, knots: 40
Complement: 8
Guns: 1—23 mm or 1—14.5 mm, 4—7.62 mm MGs

Comment: Built by Sri Lanka Navy.

Z 101 6/2008*, Sri Lanka Navy / 1335869

AMPHIBIOUS FORCES

1 YUHAI (WUHU-A) (TYPE 074) CLASS (LSM)

Name	No	Builders	Commissioned
SHAKTHI	L 880	China	22 May 1996

Displacement, tons: 799 full load
Dimensions, feet (metres): 191.6 × 34.1 × 8.9 (58.4 × 10.4 × 2.7)
Main machinery: 2 MAN 8 L 20/27 diesels; 4,900 hp(m) (3.6 MW); 2 shafts
Speed, knots: 14
Range, n miles: 1,000 at 12 kt
Complement: 60
Military lift: 150 tons
Guns: 10—14.5 mm/93 (5 twin) MGs, 6—12.7 mm MGs.
Radars: Navigation: Racal Decca; I-band

Comment: Transferred by lift ship from China arriving 13 December 1995. A planned second of class was built but not acquired.

SHAKTHI 5/1996, Sri Lanka Navy / 0080710

2 LANDING CRAFT (LCM)

Name	No	Builders	Commissioned
RANAGAJA	L 839	Colombo Dockyard	15 Nov 1991
RANAVIJAYA	L 836	Colombo Dockyard	21 July 1994

Displacement, tons: 268 full load
Dimensions, feet (metres): 108.3 × 26 × 4.9 (33 × 8 × 1.5)
Main machinery: 2 Caterpillar diesels; 1,524 hp (1.14 MW); 2 shafts
Speed, knots: 8
Range, n miles: 1,800 at 8 kt
Complement: 28 (2 officers)
Guns: 4 China 14.5 mm (2 twin), 2—12.7 mm MGs.
Radars: Navigation: Furuno FCR 1421; I-band.

Comment: Two built in 1983 and acquired in October 1985. Third of the class taken over by the Navy in September 1991 and a fourth in March 1992. *Kandula* sank in October 1992 and the hulk was salvaged in mid-December. *Pabbatha* sank in action in February 1998.

RANAVIJAYA 6/2008*, Sri Lanka Navy / 1335867

2 YUNNAN CLASS (TYPE 067)

L 820 L 821

Displacement, tons: 135 full load
Dimensions, feet (metres): 93.8 × 17.7 × 4.9 (28.6 × 5.4 × 1.5)
Main machinery: 2 diesels, 600 hp(m) (441 kW); 2 shafts
Speed, knots: 12
Range, n miles: 500 at 10 kt
Complement: 22 (2 officers)
Military lift: 46 tons
Guns: 4—14.5 mm (2 twin) MGs. 2—762 mm MGs
Radars: Surface search: Fuji, I-band

Comment: First one acquired from China in May 1991, second in May 1995.

L 821 6/2008*, Sri Lanka Navy / 1335868

A 543 6/2006, Sri Lanka Navy / 1164408

1 M 10 CLASS HOVERCRAFT (UCAC)

A 530

Displacement, tons: 18 full load
Dimensions, feet (metres): 67.6 × 28.9 (20.6 × 8.8)
Main machinery: 2 Deutz diesels; 1,050 hp(m) (772 kW)
Speed, knots: 40; 7 with cushion deflated
Range, n miles: 500 at 30 kt
Complement: 10
Military lift: 56 troops or 20 troops plus 2 vehicles
Guns: 1—12.7 mm MG.
Radars: Navigation Furuno; I-band.

Comment: Acquired from ABS Hovercraft/Vosper Thornycroft in April 1998 and designated a Utility Craft Air Cushion (UCAC). Has a Kevlar superstructure. More may be ordered in due course.

A 530 6/2006, Sri Lanka Navy / 1164409

3 FAST PERSONNEL CARRIERS (LCP)

Name	No	Builders	Commissioned
HANSAYA (ex-Offshore Pioneer)	A 540	Sing Koon Seng, Singapore	20 Dec 1987
(ex-Lanka Rani)	A 542	Kvaerner Fielstrand Ltd, Singapore	2000
(ex-Lanka Devi)	A 543	Kvaerner Fielstrand Ltd, Singapore	2000

Displacement, tons: 444 full load
Dimensions, feet (metres): 131.2 × 33.1 × 5.9 (40.0 × 10.1 × 1.8)
Main machinery: 2 MTU 16V 396 TE 74L; 1,800 hp(m) (1.32 MW); 2 shafts
Speed, knots: 30
Range, n miles: 650 at 20 kt
Complement: 30 (4 officers)
Military lift: 60 tons; 120 troops
Guns: 1 Oerlikon 20 mm. 2—12.7 mm MGs.
Radars: Navigation, Furuno FR 1012; I-band

Comment: A 540 acquired in January 1986 from Aluminium Shipbuilders. Catamaran hull built as oil rig tender. Now used as fast transport. A 541 decommissioned in 2002. Details are as for A 543 which was acquired from Ceylon Shipping Corporation.

1 SUPPORT/TRAINING SHIP (AA/AX)

Name	No	Builders	Commissioned
(ex-Simon Koghian)	A 521	BPKSKP, Gdynia, Poland	1972

Displacement, tons: 592 full load
Dimensions, feet (metres): 177.2 × 36.1 × 20.1 (54.0 × 11.0 × 6.3)
Main machinery: 1 DUVANT CREPELLE 8R26L diesel; 1,320 hp(m) (970 kW) sustained; 1 shaft
Speed, knots: 10
Range, n miles: 5,500 at 9 kt
Complement: 57 (7 officers)
Guns: 6—12.7 mm MGs. 2—40 mm AGLs.
Radars: Surface search/navigation: Furuno FR 2125; I-band

Comment: Former deep-sea fishing trawler donated by the Lorient-Matara Friendship Foundation of France and commissioned into the Sri Lanka Navy on 26 April 2005. The ship was donated on humanitarian grounds, following the tsunami of 26 December 2004, and it is understood that the vessel is used by the navy in support of fishing activities and as a training vessel.

A 521 6/2007, Sri Lanka Navy / 1167813

1 TRANSPORT SHIP (AP)

Name	No	Builders	Commissioned
(ex-Djursland)	A 545	Mjøllem & Karlsen	1971

Displacement, tons: 1,746 full load
Measurement, tons: 8,531 grt
Dimensions, feet (metres): 311.7 × 57.1 × 12.1 (95.0 × 17.4 × 3.7)
Main machinery: 4 MTU 20V 1163TB73 diesels, 2 shafts
Speed, knots: 24
Range, n miles: 1,800 at 18 kt
Complement: 107 (7 officers)
Guns: 6—12.7 mm MGs. 2—40 mm AGLs.
Radars: Surface search/navigation: Kelvin Hughes; E/F/I-band

Comment: Ro-Ro ferry on bare boat charter from Indonesia from 2006.

A 545 6/2006, Sri Lanka Navy / 1164405

Sudan

Country Overview

The Republic of Sudan is situated in north-eastern Africa. The largest country in Africa, it has an area of 967,500 square miles and is bordered to the north by Egypt, to the east by Eritrea and Ethiopia, to the south by Kenya, Uganda and the Democratic Republic of the Congo and to the west by the Central African Republic, Chad, and Libya. It has a 459 n mile coastline with the Red Sea. Khartoum is the capital and largest city and Port Sudan is the principal port. There are about 2,867 n miles of navigable waterways. Territorial waters (12 n miles) are claimed. An EEZ has not been claimed.

The country has been ravaged by civil war in recent years but a Comprehensive Peace Agreement was finally concluded on 9 January 2005. This allows for the south to become a self-administering region until 2011 by when its future status will be decided by referendum.

Naval Forces are part of the Army and have low budgetary priority.

Headquarters Appointments

Commander, Naval Forces:
Lieutenant General Ai-Zain Hamad Balla

Personnel

- (a) 2009: 1,300 officers and men
(b) Voluntary service

Establishment

The Navy was established in 1962 to operate on the Red Sea coast and on the River Nile

Bases

Port Sudan (HQ), Flamingo Bay (Red Sea), Khartoum (Nile), Kosti (Nile)

PATROL FORCES

4 KURMUK (TYPE 15) CLASS (INSHORE PATROL CRAFT) (PBR)

KURMUK 502 QAYSAN 603 RUMBEK 504 MAYOM 505

Displacement, tons: 19.5 full load
Dimensions, feet (metres): 55.4 × 12.8 × 2.3 (16.9 × 3.9 × 0.7)
Main machinery: 2 diesels, 330 hp(m) (243 kW), 2 shafts
Speed, knots: 16
Range, n miles: 160 at 12 kt
Complement: 6
Guns: 1 Oerlikon 20 mm; 2—7.62 mm MGs.

Comment: Delivered by Yugoslavia on 18 May 1989 for operations on the White Nile. All based at Flamingo Bay

KURMUK 1989, G Jacobs / 0506101

4 SEWART CLASS (INSHORE PATROL CRAFT) (PBR)

MAROUB 1161 FUJAB 1162 SALAK 1163 HALOTE 1164

Displacement, tons: 9.1 full load
Dimensions, feet (metres): 40 × 12.1 × 3.3 (12.2 × 3.7 × 1)
Main machinery: 2 GM diesels; 348 hp (260 kW); 2 shafts
Speed, knots: 31
Complement: 6
Guns: 1—12.7 mm MG

Comment: Transferred by Iranian Coast Guard in 1975. All are based at Flamingo Bay but operational status is doubtful

7 ASHOORA I CLASS (INSHORE PATROL CRAFT) (PBR)

Displacement, tons: 3 full load
Dimensions, feet (metres): 26.6 × 8 × 1.6 (8.1 × 2.4 × 0.5)
Main machinery: 2 Yamaha outboards; 400 hp(m) (294 kW)
Speed, knots: 42
Complement: 2
Guns: 1—7.62 mm MG

Comment: Acquired from Iran in 1992–94. Four based at Flamingo Bay and three at Khartoum but operational status is doubtful.

ASHOORA I 1992, IRI Marine Industries / 0081715

AUXILIARIES

Notes: (1) In addition there are two small miscellaneous support ships. *Baraka 21* a water boat, and a Rotork 512 craft. Both restored with Iranian assistance.
(2) Five Type II LCVPs were delivered from Yugoslavia in 1991 and are based at Kosti.

2 SUPPLY SHIPS (AFL)

SOBAT 221 DINDER 222

Displacement, tons: 410 full load
Dimensions, feet (metres): 155.1 × 21 × 7.5 (47.3 × 6.4 × 2.3)
Main machinery: 3 Gray Marine diesels, 495 hp (369 kW); 3 shafts
Speed, knots: 9
Complement: 15
Guns: 1 Oerlikon 20 mm 2—12.7 mm MGs.
Comment: Two Yugoslav MFPD class LCTs transferred in 1969. Used for transporting ammunition, petrol and general supplies.

Suriname

Country Overview

Formerly known as Dutch Guiana, the Republic of Suriname gained full independence in 1975. With an area of 63,037 square miles it has borders to the east with French Guiana, to the west with Guyana and to the south with Brazil; its 208 n mile coastline is on the Atlantic Ocean. The capital, largest city and chief port is Paramaribo. Territorial seas (12 n miles) and a fisheries zone (200 n miles) are claimed. There are further ports at Nieuw-Nickerke, Moengo, Paranam and Smalkalden. Territorial waters (12 n miles)

are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has also been claimed but the limits are not defined

Headquarters Appointments

Commander Marine Section:
Lieutenant Colonel Henk Mohamatsaid

Personnel

2009: 240 (25 officers)

Bases

Kruktu Tere, Paramaribo

Aircraft

Two CASA C-212-400 Aviocar aircraft acquired for maritime patrol in 1998/99.

PATROL FORCES

3 RODMAN 101 CLASS (PB)

JARABAKKA P 01 SPARI P 02 GRAMORGU P 03

Displacement, tons: 72 full load
Dimensions, feet (metres): 98.4 × 19.4 × 4.3 (30.0 × 5.9 × 1.3)
Main machinery: 2 MTU 12V 2000 diesels; 2,900 hp (2.16 MW) sustained; 2 Hamilton 571 water-jets
Speed, knots: 26
Range, n miles: 800 at 12 kt
Complement: 9
Guns: 1—40 mm grenade launcher.
Radars: Surface search; 2 Furuno; I-band.

Comment: Ordered in December 1997, from Rodman, Vigo. First one delivered in February 1999, second and third on 3 July 1999. Carry a RIB with twin outboards. Operational status doubtful.

SPARI 3/2001, Adolfo Ortigueira GH / 1305139

2 SÖDERMANLAND (A 17) CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
SÖDERMANLAND	—	Kockums, Malmö	2 Feb 1985	12 Apr 1988	21 Apr 1989
ÖSTERGÖTLAND	—	Kockums, Malmö	15 Oct 1985	9 Dec 1988	10 Jan 1990

Displacement, tons: 1,500 surfaced; 1,600 dived
Dimensions, feet (metres): 198.5 x 20 x 18.4
 (60.5 x 6.1 x 5.6)

Main machinery: Diesel-Stirling-electric; 2 Hedemora V12A/15 diesels; 2,200 hp(m) (1.62 MW); 2 Kockums Stirling Mk III AIP; 204 hp (150 kW); 1 Jeumont Schneider motor; 1,800 hp(m) (1.32 MW); 1 shaft, LIPS prop

Speed, knots: 10 surfaced; 20 dived
Complement: 27 (5 officers)

Torpedoes: 6—21 in (533 mm) tubes. 12 FFV Type 613; anti-surface; wire-guided; passive homing to 20 km (10.8 n miles) at 45 kt; warhead 240 kg. swim-out discharge.

3—15.75 in (400 mm) tubes. 6 FFV Type 431/451; anti-submarine, wire-guided; active/passive homing to 20 km (10.8 n miles) at 25 kt; warhead 45 kg shaped charge or a small charge anti-intruder version is available.

Mines: 12 Type 47 swim-out mines in lieu of torpedoes.

Countermeasures: ESM: Argo AR-700-S5; or Condor CS 3701, intercept

Weapons control: Ericsson IPS-17 (Sesub 900A) TFCS.

Radars: Navigation: Terma; I-band.

Sonars: Atlas Elektronik CSU 83; hull-mounted; passive search and attack; medium frequency.

Reson Subac; active search (from 2008)

Flank array; passive search; low frequency

Programmes: Design contract awarded to Kockums, Malmö on 17 April 1978. Contract for construction of these boats signed 8 December 1981. Kockums built midship section and carried out final assembly while Karlskrona built bow and stern sections.

Modernisation: Modernised variants of the Västergötland class. Mid-life refit of both boats began with *Södermanland* at Kockums in late 2000. The principal upgrade was

SÖDERMANLAND

5/2006, Michael Nitz / 1164723

the installation of Air Independent Propulsion (Stirling Mk 3 AIP) by the insertion of a 12 m plug in the pressure hull. Other work included the installation of a pressurised diver's lock-out in the base of the sail to facilitate special forces operations. The refit also included a new climate control system. Thales Optronics CK 038 periscope has been upgraded with a thermal imaging camera and an improved image intensifier. A new command and control system is to be installed in *Södermanland* during a further refit which began

in late 2008. Plans for a new active sonar suite, Subac, have been postponed.

Structure: Single hulled with an X type rudder/after hydroplane design. Diving depth 300 m (984 ft). Anechoic coating.

Operational: *Södermanland* relaunched on 8 September 2003 and, after six-months sea trials, returned to service in mid-2004. *Östergötland* was relaunched on 3 September 2004 and returned to service in 2005.

SÖDERMANLAND

5/2006, Frank Findler / 1159909

SÖDERMANLAND

6/2006, John Brodie / 1159976

3 GOTLAND (A 19) CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
GOTLAND	-	Kockums, Malmö	20 Nov 1992	2 Feb 1995	2 Sep 1996
UPPLAND	-	Kockums, Malmö	14 Jan 1994	9 Feb 1996	1 May 1997
HALLAND	-	Kockums, Malmö	21 Oct 1994	27 Sep 1996	1 Oct 1997

Displacement, tons: 1,494 surfaced; 1,599 dived
Dimensions, feet (metres): 198.2 x 20.3 x 18.4 (60.4 x 6.2 x 5.6)
Main machinery: Diesel-stirling-electric; 2 MTU diesels; 2 Kockums V4-275R Stirling AIP; 204 hp(m) (150 kW); 1 Jeumont Schneider motor; 1 shaft; LIPS prop
Speed, knots: 10 surfaced; 20 dived
Complement: 27 (5 officers)

Torpedoes: 4-21 in (533 mm) bow tubes; 12 FFV Type 613/62; anti-surface; wire-guided; passive homing to 20 km (10.8 n miles) at 45 kt; warhead 240 kg or Bofors Type 62 (2000); wire-guided, active/passive homing to 50 km (27 n miles) at 20-50 kt; warhead 250 kg, swim-out discharge.
 2-15.75 in (400 mm) bow tubes; 6 Swedish Ordnance Type 432/451; anti-submarine; wire-guided, active/passive

homing to 20 km (10.8 n miles) at 25 kt; warhead 45 kg. Shaped charge or a small charge anti-intruder version.
Mines: 12 Type 47 swim-out mines in lieu of torpedoes
Countermeasures: ESM: Racal THORN Manta S; radar warning
Weapons control: CelsiusTech IPS-19 (Sesub 940A); TFCS.
Radars: Navigation: Terma Scanter; I-band.
Sonars: STN/Atlas Elektronik CSU 90-2; hull-mounted; bow, flank and intercept arrays; passive search and attack. Reson Subac; active search (from 2008).

Programmes: In October 1986 a research contract was awarded to Kockums for a design to replace the Sjöormen class. Ordered on 28 March 1990.
Modernisation: A mid-life update for all three boats is planned. Upgrades are likely to include a new combat management system. Work is likely to start in 2010.

Structure: The design has been developed on the basis of the Type A 17 series but this class is the first to be built with Air Independent Propulsion as part of the design. This type of AIP runs on liquid oxygen and diesel in a helium environment. Space has been reserved to fit two more V4-275R engines in due course. Single electro-optic periscope. The periscope is the only hull penetrating mast. Anechoic coatings are being applied. The four 21 in torpedo tubes are mounted over the smaller 15.75 in tubes. The smaller tubes can be tandem-loaded with two torpedoes per tube.
Operational: Reported as being able to patrol at 5 kt for several weeks without snort charging. The Type 47 mine swims out to a predetermined position before laying itself on the bottom. *Gotland* participated in exercises with the USN on the west coast of the US 2005-07

KARLSTAD	K 35	Karlskronavarvet	Dec 1999	24 Aug 2006	2008

Displacement, tons: 620 full load
 Dimensions, feet (metres): 239.5 x 34.1 x 7.9
 (73.0 x 10.4 x 2.4)

Main machinery: CODOG, 4 AlliedSignal TF 50A gas turbines; 21,760 hp(m) (16 MW); 2 MTU 16V N90 diesels; 3,536 hp(m) (2.6 MW); 2 Kamewa 125 water-jets, bow thruster

Speed, knots: 35; 15 (diesels)
 Complement: 43 (10 officers)

Missiles: SSM 8 RBS 15 Mk II (Batch 2) inertial guidance; active radar homing to 110 km (54 n miles) at 0.8 Mach; warhead 150 kg

Guns: 1 Bofors 57 mm/70 SAK Mk 3 ● 220 rds/min to 17 km (9.3 n miles); weight of shell 2.4 kg. 2—12.7 mm MGs.

Torpedoes: 4 fixed 400 mm tubes ●. Type 45 anti-submarine/surface; wire guided active homing to 20 km (10.8 n miles) at 25 kt; warhead 45 kg shaped charge.

Mines: Can be carried.

Countermeasures: Decoys: Rheinmetall MASS-HIDD ●

MCMV: STN Atlas Seafox Combat (C) sonar/TV sensor; range 500 m at 6 kt; shaped charge. Saab Underwater Systems Double Eagle Mk III ROV fitted with Reson triple frequency sonar.

ESM: Condor Systems CS 3701; intercept and jammer.

Combat data systems: CelsiusTech BLV Mk 3E CETRIS with Link

Weapons control: Optronic director.

Radars: Air/surface search: Ericsson Sea Giraffe AMB 3D; G band.

Surface search: Terma Scanter 2001 ●; E/F/I-band

Fire control CEROS 200 Mk 3 ●; I/J-band.

VISBY CLASS

(Scale 1 : 600), Ian Sturton / 1166652

Sonars: General Dynamics Canada Hydra Suite; bow mounted active high frequency (86 kHz) plus passive towed array and VDS (26 kHz) active

Helicopters: Platform for 1 Agusta A 109M ●.

Programmes: Order for first two with an option for two more on 17 October 1995. Second pair ordered 17 December 1996 and third pair in mid-1999. However, due to cost overruns, order reduced on 9 October 2001 to five ships.

Structure: Stealth features developed from the trials vessel *Smyge* but without the twin hull design for which this ship was considered too large. A hanger for the helicopter is not to be included. The hull is of Carbon Fibre Reinforced Plastic used in a sandwich construction and the superstructure is covered with RAM. A Double

Eagle Mk III ROV-Swith active sonar is carried in the MCM role as well as expendable mini torpedoes for mine countermeasures. There is provision for a SAM system to be installed at a later date

Operational: The first of class, was launched at Karlskrona shipyard on 8 June 2000 but delays in outfitting schedule led to 10-month slippage of contractor's sea trials until 7 December 2001. The combat system was installed in *Visby* late 2002 followed by trials from late 2003. Other ships were fitted on build. The test and evaluation period has been exhaustive and there has been an overall 5-year slippage in the programme. A 10-month work-package, known as a Special Period (SP) has been defined to address signature, sensor integration, weapon integration, and safety issues. The first ship is to start SP in 2009 and is to become operational in 2010. The other ships are to follow at six-month intervals, the final vessel is to be completed in 2012.

Fire control: Philips 9LV 200 Mk 3 ●; J-band.

Sonars: Simrad SA 950; hull-mounted, active attack.

Thomson Sintra TSM 2642 Salmon ●; VDS; search, medium frequency.

Programmes: Orders placed in September 1981. Developed from Spica II class.

Modernisation: RBS 15 missile upgraded to Mk II from 1994. Improved A/S mortar fitted in 1988–89. Extensive mid-life upgrade carried out 1999–2002. Modernisation

included removal of the 21 in torpedo tubes and the aft 40 mm mounting and modification of the superstructure to reduce radar and IR signatures. The bridge wings have been removed and a pylon mast has replaced a lattice structure. Upgrades include a new propulsion system, combat data system and EW systems. The decoys are situated on either side of the gun turret. Both ships are to be fitted with CDC Hydra

Operational: Both ships are expected to remain in service beyond 2015. *Malmö* ran aground on 10 October 2006 but has since returned to service.

SHIPBORNE AIRCRAFT

Numbers/Type: 20 Agusta A 109M (Hkp-15).

Operational speed: 152 kt (280 km/h).

Service ceiling: 16,500 ft (5,029 m).

Range: 447 n miles (827 km).

Role/Weapon systems: Military version of A 109E with Turbomeca Arrius 2K2 engine. Swedish Armed Forces ordered 20 on 20 June 2001. Of these, eight are to be 'navalised' for operation from Visby class and from shore bases. First delivered on 3 Feb 2006 and the remainder by 2009. ASW and ASV roles.

Hkp-15

6/2006, Royal Swedish Navy / 1164715

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Notes: In addition 11 AS 332 Super Puma helicopters are used for SAR.

Numbers/Type: 18 NH Industries NH 90.

Operational speed: 157 kt (291 km/h).

Service ceiling: 13,940 ft (4,250 m).

Range: 621 n miles (1,150 km).

Role/Weapon systems: Eighteen aircraft to be procured for tactical troop transport and ASW role. Modular construction is to enable rapid re-roling. There are to be 5 sets of ASW sensors for delivery between 2007 and 2010. Sensors: Telephonics APS-143B(V) ocean eye radar, Galileo Avionica FLIR, Thales FLASH-S dipping sonar. Weapons: To be announced.

Complement: 9

Guns: 2 12.7 mm MGs.

A/S mortars: 4 Elma/Saab grenade launchers; range 300 m; warhead 4.2 kg shaped charge.

Depth charges: 18

Mines: 2 rails (in four of the class).

Radars: Surface search: 2 Racal Decca; I-band.

Sonars: Simrad; hull-mounted; active search; high frequency.

Comment: Seven Type 80 ordered from Djupviksvarvet in early 1992, and delivered between February 1993 and December 1995. Five more ordered in 1995 for delivery at six month intervals between December 1996 and January 1999. A Phantom HD-2 ROV is carried. This is equipped with a Tritech ST 525 imaging sonar.

1 COASTAL PATROL CRAFT (PB)

Name	No	Builders	Commissioned
ÖSTHAMMAR	SVK 11 (ex-V 11)	Djupviks Varvet	1 Mar 1985

Displacement, tons: 50 full load

Dimensions, feet (metres): 76.8 × 16.7 × 3.6 (23.4 × 5.1 × 1.1)

Main machinery: 2 MTU 8V396 TB83 diesels; 2,100 hp (1.6 MW); 2 shafts

Speed, knots: 30

Complement: 7 (3 officers)

Radars: Navigation: I-band.

Comment: Former patrol craft originally commissioned in 1985 and later decommissioned in 2002. Reactivated in 2008 as patrol craft in Sjövärnskåren (SVK).

ÖSTHAMMAR

7/2008, A Sheldon-Duplaix / 1338051

1 JÄGAREN CLASS (COASTAL PATROL CRAFT) (PC)

Name JÄGAREN	No V 150	Builders Bergens MV, Norway	Commissioned 24 Nov 1972
------------------------	--------------------	---------------------------------------	------------------------------------

Displacement, tons: 120 standard; 150 full load
Dimensions, feet (metres): 120 x 20.7 x 5.6 (36.6 x 6.3 x 1.7)
Main machinery: 2 Cummins KTA50-M; 2,500 hp (1.87 MW) sustained; 2 shafts
Speed, knots: 20. **Range, n miles:** 550 at 20 kt
Complement: 15 (3 officers)
Guns: 1 Bofors 40 mm/70.
Mines: 2 rails.
Radars: Surface search/navigation. To be announced.

Comment: Originally constructed as a prototype for the deleted Hugin class, the vessel was converted for patrol duties in 1988. Decommissioned in 2002, she was reactivated as a patrol and general duties craft in 2008 following a four month refit. The ship is reported to have been fitted with a new surface search radar and the aft of the ship to have been modified to provide stowage space for oil recovery equipment.

JÄGAREN 8/1997, Frank Behling / 0019191

AMPHIBIOUS FORCES

145 COMBATBOAT 90H/90HS (STRIDSBÅT) (LCPFM)

803-946	BLÅTUNGA 947
----------------	---------------------

Displacement, tons: 19 full load
Dimensions, feet (metres): 52.2 x 12.5 x 2.6 (15.9 x 3.8 x 0.8)
Main machinery: 2 Saab Scania DSI 14 diesels; 1,250 hp(m) (935 kW) (1,350 hp(m) in 90HS (1,000 kW)); 2 Kamewa water-jets
Speed, knots: 36-50, 20 (Sea State 3). **Range, n miles:** 240 at 30 kt
Complement: 3
Military lift: 20 troops plus equipment or 2.8 tons
Missiles: SSM. Rockwell RBS 17 Hellfire, semi-active laser guidance to 5 km (3 n miles) at 10 Mach; warhead 8 kg.
Guns: 3—12.7 mm MGs.
Mines: 4 (or 6 depth charges)
Radars: Navigation: Racal Decca; RD 360 or Furuno 8050, I-band.

Comment: The first two prototypes (801-802) ordered in January 1988 are no longer in service. Twelve more (803-814) built in 1991-92. There were 63 (815-877) ordered from Dockstavarvet and Gotlands Varv in mid-January 1992, with an option for 30 more (878-907) which was taken up in 1994. The building period for these completed in mid-1997. A further 40 (908-947) were ordered in August 1996 and delivery was completed in October 2003. Of these, the last 27 (90HS) units were all modified to undertake international peacekeeping operations by the inclusion of armoured protection, an NBC citadel and air conditioning. All have a 20' deadrise and all carry four six-man inflatable rafts. 947 is equipped as VIP craft. It is planned to upgrade a further 60-70 craft to the 90HS standard. There were 22 (90N) of the class delivered to Norway 1999, 40 (90 HEX) to Mexico, 17 (90H) to Malaysia and three (90 HEX) to the Hellenic Coast Guard.

COMBATBOAT 821 6/2006, Per Körnefeldt / 1159925

COMBATBOAT 825 5/2007, Per Körnefeldt / 1166719

5 COMBATBOAT 90E (STRIDSBÅT) (YH)

101 series

Displacement, tons: 9 full load
Dimensions, feet (metres): 39 x 9.5 x 2.3 (11.9 x 2.9 x 0.7)
Main machinery: 1 Scania AB DSI 14 diesel, 398 hp(m) (293 kW) sustained; FFJet 410 water-jet
Speed, knots: 40, 37 (laden)
Complement: 2
Military lift: 2 tons or 6-10 troops
Radars: Navigation: Furuno 8050; I-band.

Comment: Ambulance boats that may also be used for stores. First batch ordered from Storebro Royal Cruiser AB in 1995 for delivery from August 1995-98. Second batch ordered in 1997 for delivery in 1998-99. Of 54 that entered service, 49 have been decommissioned and sold or donated.

COMBATBOAT 90E 8/2002, E & M Laursen / 0529975

9 LCMs (TROSSBÅT)

603-606	608-610	653	657
----------------	----------------	------------	------------

Displacement, tons: 55 full load
Dimensions, feet (metres): 68.9 x 19.7 x 4.9 (21 x 6 x 1.5)
Main machinery: 2 Scania DSI 11/40 M2 diesels, 340 hp(m) (250 kW); 2 Schottel props
Speed, knots: 10
Military lift: 30 tons
Radars: Navigation: Racal Decca 914C; I-band.

Comment: Completed from 1980-88. Classified as Trossbåt (support boat). Built by Djupviksvarvet. Eight have been deleted.

LCM 609 5/2004, E & M Laursen / 1043535

0 + 1 (4) COMBATBOAT 2010M (PBF)

Displacement, tons: 56 full load
Dimensions, feet (metres): 79.1 x 17.2 x 3.8 (24.1 x 5.24 x 1.17)
Main machinery: 2 diesels; 2 waterjets
Speed, knots: 37
Guns: 1 Patria Hägglunds 120 mm advanced mortar system

Comment: Following trials in a converted Combatboat 90H, a prototype of a mortar-armed fast support craft has been ordered. The vessel is to be larger than the existing CB 90 series. A test and evaluation period was planned to start in the second half of 2008 and an initial production run of four vessels is projected to start in 2011.

COMBATBOAT 2010M (artist's impression) 5/2007, Dockstavarvet / 1184950

2 TRANSPORTBÅT 2000 (AGF/YFLB)

451 452

Displacement, tons: 43 full load
Dimensions, feet (metres): 77.1 × 16.7 × 3.3 (23.6 × 5.1 × 1)
Main machinery: 3 Saab Scania DSI 14 diesels or 3 Volvo Penta 163 diesels; 1,194 hp(m) (878 kW) sustained; 3 FFJet 450 or 3 Kamewa K40 waterjets
Speed, knots: 25
Complement: 3
Military lift: 45 troops or 10 tons
Guns: 2–12.7 mm MGs.
Radars: Navigation: Terma; I-band

Comment: Two similar prototypes ordered from Djupviks Shipyard in 1997. Both configured as command boats

TRANSPORTBÅT 452

6/2000, Michael Nitz / 0105593

3 GRIFFON 8100TD (TYPE 392) CLASS HOVERCRAFT (UCAC)

302-304

Displacement, tons: 18.2; 24.6 full load
Dimensions, feet (metres): 73.8 × 36.1 × 1 (22.5 × 11.0 × 0.32)
Main machinery: 2 Iveco diesels; 2,000 hp (1.5 MW)
Speed, knots: 42
Range, n miles: 400 at 45 kt
Complement: 13 (2 officers)
Guns: 1–12.7 mm MG
Radars: Raytheon; I-band.

Comment: Three hovercraft ordered in July 2005. The first delivered in October 2006 and the second two in 2007. The aluminium-hulled craft are stretched versions of the Griffon 8000TD. Capable of carrying an 11 ton payload, the craft are to be fitted with ballistic protection and NBC protection

GRIFFON 8100TD

9/2007, Richard Scott/NAVYPIX / 1169099

82 RAIDING CRAFT (GRUPPBÅT) (LCP)

Displacement, tons: 3 full load
Dimensions, feet (metres): 28.2 × 6.9 × 1 (8 × 2.1 × 0.3)
Main machinery: 1 Volvo Penta TAMD 42WJ diesel; 230 hp(m) (169 kW); 1 Kamewa 240 waterjet
Speed, knots: 30
Complement: 2
Military lift: 1 ton

Comment: Small raiding craft are used throughout the Archipelago. Some have been decommissioned.

GRUPPBÅT

5/2006, E & M Laursen / 1159938

MINE WARFARE FORCES

Notes: A transportable COOP system was ordered in 1991. The unit can be shifted from one ship to another and comprises a container, processing module and tactical display, an underwater positioning system, sonar, Sea Eagle ROV and mine disposal charge. Optimised for shallow water surveillance and can be used in conjunction with other MCM systems. The primary role is route survey.

5 SAM CLASS (MCM DRONES) (MSD)

SAM 01-02 SAM 04 SAM 06-07

Displacement, tons: 20 full load
Dimensions, feet (metres): 59.1 × 20 × 5.2 (18 × 6.1 × 1.6)
Main machinery: 1 Volvo Penta TAMD70D diesel; 210 hp(m) (154 kW); 1 Schottel prop
Speed, knots: 8
Range, n miles: 330 at 8 kt

Comment: Built by Karlskronavarvet in 1983. SAM 03 and 05 sold to the USA for Gulf operation in March 1991 and replaced in 1992/93. Remote-controlled catamaran magnetic and acoustic sweepers operated by the Landsort, Koster, Visby and Styrö classes. Six sold to Japan.

SAM 07

4/2003, Per Körnefeldt / 0512624

2 LANDSORT CLASS (MINEHUNTERS) (MHSCDM)

Name	No	Builders	Launched	Commissioned
LANDSORT	M 71	Karlskronavarvet	2 Nov 1982	19 Apr 1984
ARHOLMA	M 72	Karlskronavarvet	2 Aug 1984	23 Nov 1984

Displacement, tons: 270 standard, 360 full load
Dimensions, feet (metres): 155.8 × 31.5 × 7.3 (47.5 × 9.6 × 2.2)
Main machinery: 4 Saab-Scania DSI 14 diesels; 1,592 hp(m) (117 MW) sustained; coupled in pairs to 2 Voith Schneider props
Speed, knots: 15
Range, n miles: 2,000 at 12 kt
Complement: 29 (12 officers) plus 4 spare

Guns: 1 Bofors 40 mm/70 Mod 48; 240 rds/min to 12.5 km (6.8 n miles); weight of shell 0.86 kg. Bofors SeaTrinity CIWS trial carried out in *Vinga* (fitted in place of 40 mm/70). 2–7.62 mm MGs.

Countermeasures: Decoys: 2 Philips Philax fixed launchers can be carried with 4 magazines each holding 36 grenades, IR/chaff.

MCM: This class is fitted for mechanical sweeps for moored mines as well as magnetic and acoustic sweeps. In addition it is possible to operate two SAM drones (see separate entry). Fitted with 2 Sutek Sea Eagle or Double Eagle remote-controlled units with 600 m tether and capable of 350 m depth.

Weapons control: Philips 9LV 100 optronic director. Philips 9 MJ 400 minehunting system.

Radars: Navigation. Thomson-CSF Terma; I-band.

Sonars: Thomson-CSF TSM-2022; Racal Decca 'Meins' control system; hull-mounted, minehunting; high frequency.

Programmes: These first two of this class ordered in early 1981.

Modernisation: The other five ships of the class, now known as the Koster class, are being modernised. These two ships are not to be upgraded.

Structure: The GRP mould for the hull has also been used for the Coast Guard former KBV 171 class.

Operational: The integrated navigation and action data automation system developed by Philips and Racal Decca. Both ships likely to be decommissioned in 2012.

Sales: Four built for Singapore.

ARHOLMA

10/2007, Michael Nitz / 1166707

5 KOSTER CLASS

Name	No	Builders	Launched	Commissioned
KOSTER	M 73	Karlskronavarvet	16 Jan 1986	30 May 1986
KULLEN	M 74	Karlskronavarvet	15 Aug 1986	28 Nov 1986
VINGÅ	M 75	Karlskronavarvet	14 Aug 1987	27 Nov 1987
VEN	M 76	Karlskronavarvet	10 Aug 1988	12 Dec 1988
ULVÖN	M 77	Karlskronavarvet	4 Mar 1992	9 Oct 1992

Displacement, tons: 270 standard; 360 full load
Dimensions, feet (metres): 165.8 x 31.5 x 7.3 (47.5 x 9.6 x 2.2)
Main machinery: 4 Saab-Scania DSI 14 diesels, 1,592 hp(m) (1.17 MW) sustained; coupled in pairs to 2 Voith Schneider props
Speed, knots: 15
Range, n miles: 2,000 at 12 kt
Complement: 29 (12 officers) plus 4 spare

Guns: 1 Bofors 40 mm/70 Mod 48; 240 rds/min to 12.5 km (6.8 n miles); weight of shell 0.96 kg. Bofors Sea Trinity CIWS trial carried out in *Vinga* (fitted in place of 40 mm/70). 2 — 762 mm MGs.
Countermeasures: Decoys: 2 Philips Philax fixed launchers can be carried with 4 magazines each holding 36 grenades; IR/chaff
MCM: This class is fitted for mechanical sweeps for moored mines as well as magnetic and acoustic sweeps. In addition it is possible to operate two SAM drones (see separate entry). Fitted with Double Eagle Mk III ROV with variable depth sonar and Sea Fox C expendable mine disposal system.
Combat data systems: Atlas Elektronik integrated Mine Countermeasures System.
Weapons control: Saab Philips 9LV 200 Mk II radar and optronic director.
Radars: Navigation: Litton Marine Bridgemaster; I-band
Fire control: Saab Philips 9LV 200 Mk II; I-band
Sonars: Atlas Elektronik HMS-12M triple frequency high resolution. Kongsberg HIPAP 500 positioning system.

Programmes: The first four ordered in 1984 and the fifth in 1989
Modernisation: All five ships of the former Landsort class are undergoing a two-stage upgrade at Kockums, Karlskrona. The first phase, to enable participation in international operations, was undertaken in *Kullen* and *Ven* in 2003 and *Koster*, *Vinga* and *Ulvön* in 2005. A second more extensive mid-life modernisation includes installation of a new command system, an integrated mine countermeasures system (comprising hull-mounted sonar and VDS installed in Double Eagle ROV), and a mine-identification and disposal system based on the Atlas SeaFox. Delivery schedule: *Koster* (November 2008), *Vinga* (February 2009); *Ulvön* (July 2009); *Kullen* (January 2010), *Ven* (August 2010).

VEN 10/2007, Michael Nitz / 1166706

4 STYRSÖ CLASS (MINESWEEPERS/HUNTERS—INSHORE) (MHSDI/YDT)

Name	No	Builders	Launched	Commissioned
STYRSÖ	M 11	Karlskronavarvet	8 Mar 1996	20 Sep 1996
SPÄRO	M 12	Karlskronavarvet	30 Aug 1996	21 Feb 1997
SKAFTÖ	M 13	Karlskronavarvet	20 Jan 1997	13 June 1997
STURKÖ	M 14	Karlskronavarvet	27 June 1997	19 Dec 1997

Displacement, tons: 205 full load
Dimensions, feet (metres): 118.1 x 25.9 x 7.2 (36 x 7.9 x 2.2)
Main machinery: 2 Saab Scania DSI 14 diesels; 1,104 hp(m) (812 kW), 2 shafts; bow thruster
Speed, knots: 13
Complement: 17 (9 officers)
Guns: 2 — 12.7 mm MGs.
Countermeasures: MCM AK-90 acoustic, EI-90 magnetic, and mechanical sweeps. 2 Sutec Sea Eagle/Double Eagle ROVs equipped with Tritech SE 500 sonar and mine disposal charges
Combat data systems: Ericsson tactical data system with datalink
Radars: Navigation: Racal Bridgemaster; I-band
Sonars: Reson Sea Bat 8100; mine avoidance: active; high frequency. EG & G side scan; active for route survey; high frequency.

Comment: Contract awarded to KKV and Ericsoft AB on 11 February 1994. Capable of operating two SAM drones. *Späro* and *Sturkö* have been modified to act as diving support ships.

SKAFTÖ 10/2007, Harald Carstens / 1166705

1 MSF MK 1 CLASS (MSD)

SÖKAREN MRF 01
Displacement, tons: 128 full load
Dimensions, feet (metres): 86.9 x 23 x 6.9 (26.5 x 7 x 2.1)
Main machinery: 2 Scania DSI 14 diesels, 1,000 hp(m) (736 kW); 2 Schottel azimuth thrusters
Speed, knots: 12
Complement: 6
Radars: Navigation: Bridgewater E; I-band.
Sonars: STS 2054 side scan active; high frequency

Comment: MCMV drone with GRP hull transferred from Denmark in 2001 for evaluation following cancellation of SAM II drone project.

SÖKAREN 5/2004, E & M Laursen / 1043531

INTELLIGENCE VESSELS

1 ELECTRONIC SURVEILLANCE SHIP (AGIH)

Name	No	Builders	Launched	Commissioned
ORION	A 201	Karlskronavarvet	30 Nov 1983	7 June 1984

Displacement, tons: 1,400 full load
Dimensions, feet (metres): 201.1 x 32.8 x 9.8 (61.3 x 10 x 3)
Main machinery: 2 Hedemora V8A diesels; 1,800 hp(m) (1.32 MW) sustained; 2 shafts; cp props
Speed, knots: 15
Complement: 35
Radars: Navigation: Terma Scantec 009; I-band.
Helicopters: Platform for 1 light.

Comment: Ordered 23 April 1982. Laid down 28 June 1982. The communications aerials are inside the elongated dome

ORION 9/2006, Frank Findler / 1155910

RESCUE VEHICLES

1 RESCUE SUBMERSIBLE (DSRV)

URF
Displacement, tons: 52
Dimensions, feet (metres): 45.6 x 10.5 x 9.2 (13.9 x 3.2 x 2.8)
Main machinery: Electric/hydraulic: single shaft
Speed, knots: 3
Complement: 4

Comment: Rescue submersible URF (*Ubåts Räddnings Farkost*) was launched by Kockums on 17 April 1978 and commissioned in 1979. The double-hulled vehicle is capable of operating down to 460 m with an endurance of 85 hours. The URF can mate with the hull of a submarine at angles up to 45° and is equipped with a lockout chamber that can support two divers to 300 m. It has a rescue capacity of 35 per dive and submariners can be transferred directly from the pressurised hull of the submarine to a compression chamber on board the support ship *Belas*. The vehicle is normally based at the Naval Diving Centre at Berga but can be transported by road using a specially designed trailer to a site suitable for loading on to the support ship. URF is to be modernised in 2009 (plans to replace her with S-SRV have been shelved).

URF 8/2004, E & M Laursen / 1043538

TRAINING SHIPS

2 SAIL TRAINING SHIPS (AXS)

Name	No	Builders	Commissioned
GLADAN	S 01	Naval Dockyard, Stockholm	1947
FALKEN	S 02	Naval Dockyard, Stockholm	1947

Displacement, tons: 225 standard

Dimensions, feet (metres): 112.8 × 23.6 × 13.8 (34.4 × 7.2 × 4.2)

Main machinery: 1 diesel; 120 hp(m) (88 kW); 1 shaft

Comment: Sail training ships. Two masted schooners. Sail area, 512 sq m. Both had major overhauls in 1986–88 in which all technical systems were replaced.

FALKEN

5/2007, Derek Fox / 1166553

5 ALTAIR CLASS (TRAINING VESSELS) (YXT)

ALTAIR A 501 ANTARES A 502 ARCTURUS A 503 ARGO A 504 ASTREA A 505

Displacement, tons: 85 full load

Dimensions, feet (metres): 85.0 × 19.7 × 5.6 (25.9 × 6.0 × 1.7)

Main machinery: 2 MTU 12V 2000 M90 diesels; 2,500 hp (1.86 MW); 2 shafts

Speed, knots: 24. Range, n miles: 530 at 11 kt

Complement: 4 plus 6 cadets

Comment: Contract placed with Swede Ship Marine AB on 12 May 2006 for five training vessels of aluminium construction; the ships are to be built by Djupviks Varv. The vessels are to be used for cadets' seamanship and navigation training and are to replace the M 15 class minesweepers. The ships are to have a secondary SAR role. The first vessel was delivered in May 2008 and the remainder are to follow by May 2009.

ALTAIR

6/2008*, Swedish Navy / 1335876

AUXILIARIES

Notes: The Combat Support Ship (L 10) project is for two ships capable of conducting replenishment at sea, amphibious support, repair and maintenance, medical support and transport of about 170 troops. Conceptual work suggests that the requirement might be met by a modified Ro-Ro ferry design. The ships would be of about 145 m length, include bow doors and stern ramps, a vehicle deck of about 400 lane-metres, a hangar for two NH90 and a flight deck. There would be space on the upper deck for the stowage of 10 Combatboat 90H and two Combatboat 2010. Subject to approval of the project, a competitive tendering process is planned to lead to a construction contract in 2010 and delivery of the first ship in 2013.

1 TRANSPORT (AKR)

Name	No	Builders	Commissioned
SLEIPNER (ex-Arda)	A 343	Bergen	1980

Displacement, tons: 1,049 full load

Dimensions, feet (metres): 163.1 × 36.1 × 11.5 (49.7 × 11 × 3.5)

Main machinery: 1 Normo diesel; 1,300 hp(m) (956 kW); 1 shaft

Speed, knots: 12

Complement: 12

Cargo capacity: 260 tons

Comment: Former Ro-Ro vessel acquired in 1992 from a Norwegian Shipping Company. There is a stern ramp and side door.

SLEIPNER

7/2003, E & M Laursen / 057629

1 TROSSÖ CLASS (SUPPORT SHIP) (AGP)

Name	No	Builders	Commissioned
TROSSÖ (ex-Arnold Viemer, ex-Livonia)	A 264	Valmet, Finland	1 Jan 1984

Displacement, tons: 2,140 full load

Dimensions, feet (metres): 234.9 × 42 × 14.8 (71.6 × 12.8 × 4.5)

Main machinery: 2 Russkiy G74 36/45 diesels; 3,084 hp(m) (2.27 MW); 2 shafts

Speed, knots: 14

Complement: 64

Comment: Built as a survey ship for the USSR and used in the Baltic as an AGOR. Taken on by the Estonian Marine Institute and then transferred to Sweden on 23 September 1996. Converted as a depot ship for corvettes and patrol craft and back in service in 1997. Can act as a Headquarters Ship. A second vessel, *Ornö*, was purchased in 2001 but rebuilding of the ship was abandoned in November 2001 due to its poor material state.

TROSSÖ

10/2007, Michael Nitz / 1166703

1 CARLSKRONA CLASS (SUPPORT SHIP) (AG)

Name	No	Builders	Launched	Commissioned
CARLSKRONA	M 04	Karlskronavarvet	28 June 1980	11 Jan 1982

Displacement, tons: 3,600 full load

Dimensions, feet (metres): 346.7 × 49.9 × 13.1 (105.7 × 15.2 × 4)

Main machinery: 4 Nohab F212 D825 diesels, 10,660 hp(m) (7.76 MW); 2 shafts, cp props

Speed, knots: 20

Complement: 50 plus 136 trainees. Requires 118 as operational minelayer

Guns: 2 Bofors 57 mm/70. 2 Bofors 40 mm/70.

Mines: Can lay 105.

Countermeasures: 2 Philips Phifax chaff/IR launchers.

ESM: Argo AR 700; intercept

Radars: Air/surface search: Ericsson Sea Giraffe 50HC; G/H/I-band

Surface search: Raytheon; E/F-band.

Fire control: 2 Philips 9LV 200 Mk 2; I/J-band

Navigation: Terma Scantec 009; I-band

Helicopters: Platform only.

Comment: Ordered 25 November 1977, laid down in sections late 1979 and launched at the same time as Karlskrona celebrated its tercentenary. Former minelayer now employed on miscellaneous support and training tasks.

CARLSKRONA

7/2008*, 1335875

1 ÄLVSBERG CLASS (SUPPORT SHIP) (AKH)

Name	No	Builders	Launched	Commissioned
VISBERG	A 265	Karlskronavarvet	25 Jan 1975	6 Feb 1976

Displacement, tons: 2,400 standard; 2,650 full load

Dimensions, feet (metres): 303.1 × 48.2 × 13.2 (92.4 × 14.7 × 4)

Main machinery: 2 Nohab-Polar diesels; 4,200 hp(m) (3.1 MW); 1 shaft; cp prop; bow thruster: 350 hp(m) (257 kW)

Speed, knots: 18

Complement: 95

Guns: 3 Bofors 40 mm/70 SAK 48.

ESM: Argo 700; intercept.

Radars: Surface search: Raytheon; E/F-band.

Fire control: Philips 9LV 200 Mk 2; I/J-band.

Navigation: Terma Scantec 009; I-band.

Helicopters: Platform only.

Comment: Laid down on 18 October 1973. Formerly a minelayer, now supply ship for second surface flotilla. Sister ship transferred to Chile in 1996.

VISBERG

9/2007, Maritime Photographic / 1166704

1 FURUSUND CLASS (SALVAGE AND DIVING SUPPORT SHIP) (ARS)

Name	No	Builders	Launched	Commissioned
FURUSUND	20	ASI Verken	16 Dec 1982	10 Oct 1983

Displacement, tons: 225 full load
Dimensions, feet (metres): 106.9 × 26.9 × 7.5 (32.6 × 8.2 × 2.3)
Main machinery: Diesel electric; 2 Scania GAS 1 diesel generators; 2 motors; 416 hp(m) (306 kW); 2 shafts
Speed, knots: 11.5
Complement: 24
Guns: 1—12.7 mm MG
Mines: 22 tons
Radars: Navigation: Racal Decca 1226; I-band

Comment: Former minelayer built for the Coastal Artillery. Now employed as a salvage and diving support ship.

FURUSUND 5/2001, Per Körnefeldt / 0131140

2 ARKÖSUND CLASS (SERVICE SHIPS) (YAG)

GRUNDSUND 15	FÄRÖSUND (ex-Öresund) 18
--------------	--------------------------

Displacement, tons: 200 standard; 245 full load
Dimensions, feet (metres): 102.3 × 24.3 × 10.2 (31.2 × 7.4 × 3.1)
Main machinery: Diesel-electric; 2 Nohab/Scania diesel generators; 2 motors, 460 hp(m) (338 kW); 2 shafts
Speed, knots: 12
Complement: 24
Guns: 4—7.62 mm MGs
Mines: 2 rails, 26 tons
Radars: Navigation: Racal Decca 1226; I-band.

Comment: All completed by 1954–1957. Former Coastal Artillery craft for laying and maintaining minefields. One deleted in 1992, one in 1996, *Skramsösund* in 1998, *Kalmarsund* and *Barösund* in 2004 and *Arkösund* in 2006. 40 mm guns removed. Employed as general service craft.

FÄRÖSUND 10/2007, Michael Nitz / 1168702

1 DIVER SUPPORT SHIP (YDT/AGF)

ÅGIR (ex-Bloom Syrvæyar) A 212

Displacement, tons: 117 full load
Dimensions, feet (metres): 82 × 24.9 × 6.6 (25 × 7.6 × 2)
Main machinery: 2 GM diesels, 2 shafts
Speed, knots: 11
Complement: 15
Radars: Navigation: Terma; I-band.

Comment: Built in Norway in 1984. Acquired in 1989

ÅGIR 5/2006, Per Körnefeldt / 1159921

1 SALVAGE SHIP (ARSH)

Name	No	Builders	Recommissioned
BELOS III (ex-Energy Supporter)	A 214	De Hoop, Netherlands	Nov 1992

Measurement, tons: 5,096 grt
Dimensions, feet (metres): 344.2 × 59.1 × 16.7 (104.9 × 18 × 5.1)
Main machinery: 5 MAN 9ASL 25/30 diesel alternators; 8.15 MW; 2 motors; 5,110 hp(m) (3.76 MW); 2 azimuth thrusters and 3 bow thrusters
Speed, knots: 14
Complement: 50 (22 officers)

Comment: Bought from Midland and Scottish Resources in mid 1992 and arrived in Sweden in November 1992. Replaced the previous ship of the same name which paid off in April 1993. Ice-strengthened hull and fitted with a helicopter platform. Acts as the support ship for the rescue submersible URF. Equipped with Dynamic Positioning System MOSHIP. Life-extension refit completed in December 2005

BELOS III 8/2004, E & M Laursen / 1043539

1 TORPEDO AND MISSILE RECOVERY VESSEL (YPT)

Name	No	Builders	Commissioned
PELIKANEN	A 247	Djupviksvärvet	26 Sep 1963

Displacement, tons: 144 full load
Dimensions, feet (metres): 108.2 × 19 × 7.2 (33 × 5.8 × 2.2)
Main machinery: 2 MTU MB diesels; 1,040 hp(m) (764 kW); 2 shafts
Speed, knots: 14
Complement: 14
Radars: Navigation: Terma; I-band

Comment: Torpedo recovery and rocket trials vessel.

PELIKANEN 5/2005, E & M Laursen / 1153897

16 SUPPORT VESSEL (TROSSBÅT) (YAG)

662-677

Displacement, tons: 60 full load
Dimensions, feet (metres): 80.1 × 17.7 × 4.6 (24.4 × 5.4 × 1.4)
Main machinery: 3 Saab Scania DSI 14 diesels; 1,194 hp(m) (878 kW) sustained; 3 FFJet 450 water-jets
Speed, knots: 25; 13 (laden)
Complement: 3
Military lift: 22 tons
Guns: 1—12.7 mm MG
Radars: Navigation: Terma; I-band.

Comment: Prototype Trossbat built at Holms Shipyard in 1991 and capable of carrying 15 tons of deck cargo and 9 tons internal cargo or 17 troops plus mines. Aluminium hull with a bow ramp. Some ice capability. A second prototype delivered in late 1993, and the first production vessel in 1996. Eight vessels have been modified to undertake international peacekeeping operations by the inclusion of armoured protection, an NBC citadel and air conditioning

TROSSBÅT 668 8/2002, E & M Laursen / 0529906

1 SUPPORT SHIP (AKL)

Name	No	Builders	Commissioned
LOKE	A 344	Oskarsham Shipyard	Sep 1994

Displacement, tons: 455 full load
Dimensions, feet (metres): 117.8 × 29.5 × 8.6 (35.9 × 9 × 2.7)
Main machinery: 2 Scania diesels, 2 shafts
Speed, knots: 12
Complement: 8
Cargo capacity: 50 tons or 50 passengers
Radars: Navigation: Ternis; I-band.

Comment: General support craft which can be used as a ferry. Landing craft bow.

LOKE 4/2004, E & M Laursen / 1043540

TUGS**2 COASTAL TUGS (YTM)**

HEROS A 322	HERA A 324
-------------	------------

Displacement, tons: 185 standard; 215 full load
Dimensions, feet (metres): 80.5 × 22.6 × 13.1 (24.5 × 6.9 × 4)
Main machinery: 1 diesel, 600 hp(m) (441 kW); 1 shaft
Speed, knots: 11
Complement: 8

Comment: Details given for A 322 launched in 1957. Second is smaller at 127 tons and was launched in 1969-71. Both are icebreaking tugs.

HERA 6/2000, E & M Laursen / 0106591

9 COASTAL TUGS (YTL)

A 702-705	A 751	A 753-756
-----------	-------	-----------

Displacement, tons: 42 full load
Dimensions, feet (metres): 50.9 × 16.4 × 8.9 (15.5 × 5 × 2.7)
Main machinery: 1 diesel; 1 shaft
Speed, knots: 9.5
Complement: 6

Comment: Can carry 40 people. Icebreaking tugs. 702-703 used by Amphibious Corps. All can carry mines.

A 702 5/2005, Per Körnfeldt / 1153899

COAST GUARD (KUSTBEVAKNING)

Establishment: Established in 1638, and for 350 years was a part of the Swedish Customs administration. From 1 July 1988 the Coast Guard became an independent civilian authority with a Board supervised by the Ministry of Defence. Organised in four regions with a central Headquarters.

Duties: Responsible for civilian surveillance of Swedish waters, fishery zone and continental shelf. Supervises and enforces fishing regulations, customs, dumping and pollution regulations, environmental protection and traffic regulations. Also concerned with prevention of drug running and forms part of the Swedish search and rescue organisation.

Headquarters Appointments

Director General:
Christina Salomonson

Bases

HQ. Karlskrona
 Regional HQs: Karlskrona, Härnösand, Stockholm, Gothenburg
 There are 26 Coast Guard stations

Personnel

2009: 748

Aircraft: Two Bombardier Dash 8Q which were ordered in 2005

Ships: Pennant numbers prefixed by KBV but the KBV is not displayed. Vessels are not normally armed.

2 + 1 KBV 001 CLASS (MULTIPURPOSE VESSELS) (WPSO)

No	Builders	Launched	Commissioned
KBV 001	Damen Shipyard, Galati	20 Feb 2008	2009
KBV 002	Damen Shipyard, Galati	14 Aug 2008	2009
KBV 003	Damen Shipyard, Galati	2009	2009

Displacement, tons: 5,756 full load
Dimensions, feet (metres): 266.4 × 52.5 × 18.1 (81.2 × 16.0 × 5.5)
Main machinery: Diesel-electric; 3 Caterpillar 3516 diesel generators; 7,800 hp (5.82 MW); 2 Caterpillar 3512 diesel generators; 3,650 hp (2.72 MW); 2 Rolls Royce Aquamaster US 355 FP azimuth thrusters; 2 retractable bow thrusters (850 kW and 415 kW).

Speed, knots: 16
Complement: 15
Radars: Navigation: Sperry Bridgemaster; E/F/I-band.

Comment: Contract signed on 20 December 2005 with Damen Shipyards for the construction of two multipurpose vessels to be capable of towing, fire-fighting, oil recovery, environmental-control, fishery control, control of territorial waters, rescue operations and diving support. A third vessel was ordered on 19 April 2007. The ships are designed by Schelde Naval Shipbuilding and are being built and outfitted at Damen Shipyard, Galati, Romania. KBV 001 is to be based at Gothenburg and KBV 002 at Sigtuna, Gotland.

KBV 001 (artist's impression) 12/2005, Damen Shipyards / 1041661

3 KBV 101 CLASS (MEDIUM ENDURANCE CUTTERS) (WMEC/PB)

KBV 103-105

Displacement, tons: 65 full load
Dimensions, feet (metres): 87.6 × 16.4 × 7.2 (26.7 × 5 × 2.2)
Main machinery: 2 Cummins KTA38 M diesels, 2,120 hp (1.56 MW); 2 shafts
Speed, knots: 21 Range, n miles: 1,000 at 15 kt
Complement: 5 plus 2 spare
Sonars: Hull-mounted, active search; high frequency

Comment: Built 1969-73 at Djupviksvarvet. Class A cutters. All-welded aluminium hull and upperworks. Equipped for salvage divers. Modernisation with new diesels, a new bridge and new electronics completed in 1988. KBV 101 transferred to Lithuania in 1996.

KBV 103 5/2007, E & M Laursen / 1170090

1 KBV 181 CLASS (HIGH ENDURANCE CUTTER) (WHEC/PBO)

KBV 181

Displacement, tons: 991 full load
Dimensions, feet (metres): 183.7 oa, 167.3 wl x 33.5 x 15.1 (56; 51 x 10.2 x 4.6)
Main machinery: 2 Wärtsilä Vasa 8R22 diesels; 3,755 hp(m) (2.76 MW) sustained; 1 shaft; Kamewa cp prop, bow thruster
Speed, knots: 16 **Range, n miles:** 2,800 at 15 kt
Complement: 11
Guns: 1 Oerlikon 20 mm (if required).
Radars: Navigation: Furuno FAR 2630; I-band.
Sonars: Simrad Subsea, active search; high frequency.

Comment: Ordered from Rauma Shipyards in August 1989 and built at Uusikaupunki. Commissioned 30 November 1990. Unarmed in peacetime. Equipped as a Command vessel for SAR and anti-pollution operations. All-steel construction similar to Finnish *Tursas*.

KBV 181 6/2007, Swedish Coast Guard / 1170063

2 KBV 201 CLASS (HIGH ENDURANCE CUTTERS) (WHEC/PBO)

KBV 201-202

Displacement, tons: 476 full load
Dimensions, feet (metres): 170.6 x 28.2 x 7.9 (52 x 8.6 x 2.4)
Main machinery: 2 MWM 610 diesels; 5,440 hp(m) (4 MW); 2 MWM 616 diesels; 1,904 hp(m) (1.4 MW); 2 shafts; Kamewa cp props; 2 bow thruster 424 hp(m) (312 kW)
Speed, knots: 21 **Range, n miles:** 1,340 at 16 kt
Complement: 9
Radars: Navigation: E/F- and I-band.

Comment: Ordered from Kockurns in January 1999 and built at Karlskrona. First one delivered in March 2001 and second in September 2001. Steel hulls. Multitrole vessels for surveillance and environmental protection. Stern ramp for launching a RIB.

KBV 201 11/2007, Swedish Coast Guard / 1170052

3 KBV 288 CLASS (MEDIUM ENDURANCE CUTTERS) (WMEC/PBO)

KBV 288-290

Displacement, tons: 53 full load
Dimensions, feet (metres): 71.5 x 17.7 x 5.9 (21.8 x 5.4 x 1.8)
Main machinery: 2 Cummins KTA38-M or MWM diesels; 2,120 hp (1.56 MW); 2 shafts
Speed, knots: 24
Complement: 5
Radars: Navigation: Furuno; I-band.

Comment: An improved design of the KBV 281 class which entered service 1990-93

KBV 290 7/2008* / 1335874

6 KBV 281 CLASS (MEDIUM ENDURANCE CUTTERS) (WMEC/PB)

KBV 281-283

KBV 285-287

Displacement, tons: 45 full load
Dimensions, feet (metres): 71.5 x 16.4 x 6.2 (21.8 x 5 x 1.9)
Main machinery: 2 Cummins KTA38-M or MWM diesels; 2,120 hp (1.56 MW); 2 shafts
Speed, knots: 27
Complement: 4
Radars: Navigation: Furuno; I-band

Comment: Built by Djupviksvarvet and delivered at one a year from 1979. Last one commissioned in 1990. Aluminium hulls. Some of the class have an upper bridge

KBV 287 5/2004, P Marsan / 1043544

11 KBV 301 CLASS (MEDIUM ENDURANCE CUTTERS) (WMEC/PB)

KBV 301-311

Displacement, tons: 35 full load
Dimensions, feet (metres): 65.6 x 15.1 x 3.6 (20 x 4.6 x 1.1)
Main machinery: 2 MTU 183 TE92 diesels; 1,830 hp(m) (1.35 MW) sustained; 2 MTP 7500S or Kamewa water-jets
Speed, knots: 34
Range, n miles: 500 at 25 kt
Complement: 4
Radars: Navigation: 2 Kelvin Hughes 6000; I-band.

Comment: Built at Karlskronavarvet. First one delivered in May 1993 and the remainder ordered in December 1993. Three delivered in 1995, four in 1996 and the last three in 1997. Five deleted in 2006.

KBV 307 5/2007, E & M Laurson / 1170081

3 KBV 591 (GRIFFON 2000 TDX) CLASS (HOVERCRAFT) (UCAC)

KBV 591-593

Displacement, tons: 3.5 full load
Dimensions, feet (metres): 38.4 x 19.4 (11.7 x 5.9)
Main machinery: 1 Deutz BF8L diesel; 350 hp(m) (235 kW)
Speed, knots: 50
Range, n miles: 450 at 35 kt
Complement: 3
Radars: Navigation: Furuno 7010 D; I-band.

Comment: Built by Griffon Hovercraft, Southampton and delivered in 1992-93. Aluminium hulls. Based at Stockholm, Lulea and Umea.

KBV 591 6/2003, Swedish Coast Guard / 05/2610

60 COAST GUARD PATROL CRAFT (SMALL) (PB)

KBV 401-408 +52

Displacement, tons: 2.2 full load
 Dimensions, feet (metres): 29.7 × 8.5 × 2.9 (9.05 × 2.6 × 0.9)
 Main machinery: 2 Yamaha outboard engines; 500 hp (372 kW)
 Speed, knots: 65
 Range, n miles: 100 at 35 kt
 Complement: 2

Comment: Details are for KBV 401-408 built in 1994-95. There is a total of some 60 speed boats with Raytheon radars.

KBV 454

7/2008* / 1335873

POLLUTION CONTROL CRAFT (YPC)

Number	Displacement (tons)	Comment
KBV 004	450	Built by Lunde in 1978. Has helipad and carries salvage divers
KBV 005	990	Ice Class 1A built in 1980 and acquired in 1993
KBV 010	400	Built by Lunde in 1985. Oil spill clean-up craft
KBV 020	60	Catamaran design built by Djupviks in 1982
KBV 044	100	Class B Sea Trucks built by Djupviks in 1976. Oil spill clean-up craft
KBV 045	230	Pollution control craft built by Lunde 1980-83. Have bow ramp
KBV 046	230	Pollution control craft built by Lunde 1980-83. Have bow ramp

Switzerland

Country Overview

A landlocked western European country, the Swiss Confederation has an area of 15,940 square miles and is bordered by France, Germany, Austria, Liechtenstein and Italy. The largest city is Zurich and the capital is Bern. The principal lakes are Lake Geneva in the southwest and Lake

Constance in the northeast. Others not wholly within Swiss borders are Lake Lugano and Lake Maggiore. The river Rhine, whose source is in the Swiss Alps, is navigable northwards and downstream from the port of Basel. One company of patrol boats, part of the Swiss Army, is available for operations on lakes Constance, Geneva and Maggiore.

Diplomatic Representation

Defence Attaché in London:
Colonel D P Bader

ARMY

Notes: (1) There are also large numbers of flat bottomed raiding craft powered by single 40 hp outboard engines.
(2) There are a number of 6 m rescue craft equipped with a hydraulic ramp.

11 AQUARIUS CLASS (PATROUILLENBOOT 80) (PBR)

ANTARES	SATURN	PERSEUS	MARS
AQUARIUS	URANUS	SIRIUS	POLLUX
ORION	CASTOR	VENUS	

Displacement, tons: 7 full load
Dimensions, feet (metres): 35.1 x 10.8 x 3.6 (10.7 x 3.3 x 1.1)
Main machinery: 2 Volvo KAD 3 diesels; 460 hp(m) (338 kW); 2 shafts
Speed, knots: 35
Complement: 7
Guns: 2 - 12.7 mm MGs
Radars: Surface search: JFS Electronic 364, I band

Comment: Builders Müller AG, Spiez. GRP hulls, wooden superstructure. *Aquarius* commissioned in 1978, *Pollux* in 1984, the remainder in 1981. Re-engined with diesels which have replaced the former petrol engines.

AQUARIUS

10/1997, Swiss Army / 0019223

Syria

Country Overview

The Syrian Arab Republic was proclaimed in 1961 following brief federation with Egypt as the United Arab Republic from 1958. Situated in the Middle East, the country has an area of 71,498 square miles and is bordered to the north by Turkey, to the east by Iraq, to the south by Jordan and Israel and to the west by Lebanon. It has a 104 n mile coastline with the Mediterranean Sea. The capital and largest city is Damascus while the principal ports are Latakia and Tartous. It is the only country to claim 35 n mile Territorial seas. An EEZ is not claimed.

Headquarters Appointments

Commander-in-Chief Navy:
Major General Wae, Nasser

Organisation

Naval Forces come under the command of the Chief of General Staff, Commander of Land Forces.

Personnel

(a) 2009: 3,200 officers and men (2,500 reserves)
(b) 18 months' national service

Bases

Latakia, Tartous, Al-Mina-al-Bayda, Baniyas

Coast Defence

Coastal defence has been under naval control since 1984. A missile brigade is equipped with SS-C-1 Sepal and SS-C-3 Styx with sites at Tartous (2), Baniyas and Latakia. Two artillery battalions have a total of 36-130 mm guns and 12-100 mm guns. Coastal observation sites are manned by an Observation Battalion. There are two infantry brigades each of which is assigned to a coastal zone.

LAND-BASED MARITIME AIRCRAFT

Numbers/Type: 11/2 Mil Mi-14P Haze A/Mi-14P Haze C.

Operational speed: 124 kt (230 km/h).

Service ceiling: 15,000 ft (4,570 m).

Range: 432 n miles (800 km).

Role/Weapon systems: Medium-range ASW helicopter. Sensors: Short Horn search radar, dipping sonar, MAD, sonobuoys. Weapons: ASW; internally stored torpedoes, depth mines and bombs.

Numbers/Type: 2 Kamov Ka-28 Helix.

Operational speed: 135 kt (250 km/h).

Service ceiling: 19,685 ft (6,000 m).

Range: 432 n miles (800 km).

Role/Weapon systems: ASW helicopter. Delivered in February 1990. Sensors: Splash Drop search radar, dipping sonar, sonobuoys, MAD, ECM. Weapons: ASW; 3 torpedoes, depth bombs, mines.

PATROL FORCES

Notes: (1) Five Szkwal 12 m patrol launches are reported to be in service. Previously in service with the Polish Coast Guard, they were transferred in 1995.
(2) There is an unarmed 18 m diving tender *Palmyra* built by Ocea de Saint-Nazaire in 2005.

16 OSA (PROJECT 205) CLASS
(FAST ATTACK CRAFT—MISSILE) (PTFG)

21–26 (Osa I)

31–40 (Osa II)

Displacement, tons: 245 full load

Dimensions, feet (metres): 126.6 × 24.9 × 8.8 (39.6 × 7.6 × 2.7)

Main machinery: 3 Type M 504 (Osa II)/M 503 (Osa I) diesels; 8,025/10,900 hp(m) (6.0/8.1 MW) sustained; 3 shafts

Speed, knots: 35 (Osa I), 37 (Osa II) **Range, n miles:** 500 at 35 kt

Complement: 25 (3 officers)

Missiles: SSM: 4 SS-N-2C; active radar or IR homing to 83 km (43 n miles) at 0.9 Mach; warhead 513 kg; sea-skimmer at end of run.

Guns: 4–30 mm/65 (2 twin); 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg.

Countermeasures: Decoys: PK 16 chaff launcher.

Radars: Surface search: Square Tie; I-band

Fire control: Drum Tilt, H/I-band.

IFF: 2 Square Head High Pole A or B.

Programmes: Delivered: October 1979 (two), November 1979 (two), August 1982 (one), September 1982 (one) and May 1984 (two). Further craft acquired.

Structure: Two are modified (Nos 39 and 40).

Operational: Osa I are based at Tartous and Osa II based at Latakia. All are still fully operational and active. The Osa Is are fitted with SSN 2A/B.

OSA II 38

6/1998 / 0050214

6 TIR II (IPS 18) CLASS (INSHORE PATROL CRAFT) (PTFG)

Displacement, tons: 28.1 standard

Dimensions, feet (metres): 69.4 × 18.9 × 2.8 (21.1 × 5.8 × 0.9)

Speed, knots: 52

Complement: 6

Missiles: SSM: 2 Noor (C-802); active radar homing to 120 km (66 n miles) at 0.9 Mach; warhead 185 kg.

Comment: The first three craft with missile racks, but without missiles, were delivered in mid-2006. Probably built in Iran and based on those supplied in December 2002 by North Korea.

TIR II (artist's impression)

6/2007 / 1167967

8 ZHUK (GRIF) (PROJECT 1400M) CLASS
(COASTAL PATROL CRAFT) (PB)

1-8 2-8 3-8 4-8 5-8 6-8 7-8 8-8

Displacement, tons: 39 full load

Dimensions, feet (metres): 78.7 × 16.4 × 3.9 (24 × 5 × 1.2)

Main machinery: 2 Type M 401B diesels; 2,200 hp(m) (1.6 MW) sustained; 2 shafts

Speed, knots: 30 **Range, n miles:** 1,100 at 15 kt

Complement: 11 (3 officers)

Guns: 4–14.5 mm (2 twin) MGs

Radars: Surface search. Spin Trough; I-band.

Comment: Three transferred from USSR in August 1981, three on 25 December 1984 and two more in the late 1980s. Based at Tartous and Latakia. About half the craft are operational.

ZHUK 5-8

6/1998 / 0050215

AMPHIBIOUS FORCES

3 POLNOCHNY B CLASS (PROJECT 771) (LSM)

1-114

2-114

3-114

Displacement, tons: 760 standard; 834 full load

Dimensions, feet (metres): 246.1 × 31.5 × 7.5 (75 × 8.6 × 2.3)

Main machinery: 2 Kolomna Type 40-D diesels; 4,400 hp(m) (3.2 MW) sustained; 2 shafts

Speed, knots: 19

Range, n miles: 1,500 at 15 kt

Complement: 40

Military lift: 180 troops, 350 tons cargo

Guns: 4–30 mm/65 (2 twin), 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg.

2–140 mm rocket launchers; 18 barrels per launcher; range 9 km (5 n miles)

Radars: Surface search: Spin Trough, I-band

Fire control: Drum Tilt, H/I-band.

Comment: Built at Northern Shipyard, Gdansk. First transferred from USSR January 1984, two in February 1985 from Black Sea. All based at Tartous and still active.

POLNOCHNY B (Russian colours)

1988 / 0506104

MINE WARFARE FORCES

1 SONYA (YAKHONT) (PROJECT 12650) CLASS
(COASTAL MINEHUNTER) (MHC)

532

Displacement, tons: 450 full load

Dimensions, feet (metres): 157.4 × 28.9 × 6.6 (48 × 8.8 × 2)

Main machinery: 2 Kolomna Type 9-D-8 diesels; 2,000 hp(m) (1.47 MW) sustained; 2 shafts

Speed, knots: 15

Range, n miles: 3,000 at 10 kt

Complement: 43 (5 officers)

Missiles: SAM: 2 quad SA-N-6 launchers

Guns: 2–30 mm/65 AK 630 or 2–30 mm/65 (twin) and 2–25 mm/80 (twin).

Mines: 8

Radars: Surface search: Don 2 or Kivach or Nayada, I-band.

IFF: 2 Square Head, High Pole B.

Sonars: MG 69/79; hull-mounted; active minehunting; high frequency.

Comment: Wooden hull with GRP sheath. Transferred to Syria in 1986. Reported decommissioned in 2004 but apparently operational again in 2006.

SONYA CLASS (Russian colours)

6/2003, Guy Torrens / 0570933

1 NATYA (PROJECT 266M) CLASS (MSC/AGORM)

642
 Displacement, tons: 804 full load
 Dimensions, feet (metres): 200.1 x 33.5 x 10.8 (61 x 10.2 x 3)
 Main machinery: 2 Type 504 diesels; 5,000 hp(m) (3.67 MW) sustained; 2 shafts
 Speed, knots: 16
 Range, n miles: 3,000 at 12 kt
 Complement: 65
 Missiles: SAM: 2 SA-N-6 Grail quad launchers; manual aiming; IR homing to 6 km (3.2 n miles) at 1.5 Mach; altitude to 2,500 m (8,000 ft); warhead 1.5 kg; 18 missiles.
 Guns: 4–30 mm/65 (2 twin) can be fitted.
 Radars: Surface search: Don 2; I-band
 Fire control: Drum Tilt; H/I-band.

Comment: Arrived in Tartous from USSR in January 1985. Has had sweeping gear and guns removed and converted to serve as an AGOR. Painted white. Based at Latakia in reasonable condition. Reported active.

NATYA 642 6/1996 / 0080/54

5 YEVGENYA (PROJECT 1258) CLASS (MINESWEEPERS—INSHORE) (MSI/PC)

4-507 5-507 6-507 7-507 8-507
 Displacement, tons: 77 standard; 90 full load
 Dimensions, feet (metres): 80.7 x 18 x 4.9 (24.6 x 5.5 x 1.5)
 Main machinery: 2 Type 3-D-12 diesels; 600 hp(m) (444 kW); 2 shafts
 Speed, knots: 11
 Range, n miles: 300 at 10 kt
 Complement: 10
 Guns: 2–14.5 mm (twin) MGs (first pair). 2–25 mm/80 (twin) (second pair)
 Radars: Surface search: Spin Trough; I-band.
 IFF: High Pole.
 Sonars: MG-7, stern-mounted VDS; active; high frequency.

Comment: First transferred from USSR 1978, two in 1985 and two in 1986. Second pair by Ro-flow from Baltic in February 1985 being new construction with tripod mast. Based at Tartous, at least two are operational. Both 4-507 and 5-507, thought to have been deleted, were reported operational in 2006.

YEVGENYA (Ukraine colours) 6/2003, Ships of the World / 0572652

TRAINING SHIPS

1 TRAINING SHIP (AX/AKR)

AL ASSAD
 Displacement, tons: 3,500 full load
 Dimensions, feet (metres): 344.5 x 56.4 x 13.1 (105 x 17.2 x 4)
 Main machinery: 2 Zgoda-Sulzer 6ZL40/48 diesels; 8,700 hp(m) (6.4 MW); 2 shafts; bow thruster
 Speed, knots: 16
 Range, n miles: 4,500 at 15 kt
 Complement: 56 plus 140 cadets
 Radars: Navigation: Decca Seamaster; E/F- and I-band.

Comment: Built in Polnochny Shipyard, Gdansk and launched 18 February 1987. Delivered in late 1988. Ro-ro design used as a naval training ship. Unarmed but has minelaying potential. Based at Latakia and occasionally deploys on cruises.

AL ASSAD 6/2007, Camil Busquets / Vilanova 1167859

AL ASSAD 7/2003, B Prézelin / 0570897

**Taiwan
 REPUBLIC OF CHINA**

Country Overview

The Republic of China was established in 1949 when the Nationalist government of China withdrew to Taiwan (Formosa) and established its headquarters. Though in practice an autonomous state, Taiwan is still formally a province of China and, as such, is claimed by the People's Republic of China. The country comprises the island of Taiwan (area 13,900 square miles), the Pescadores, or P'eng-hu Islands, the Quemoy Islands off the mainland city of Amoy (Xiamen), and the Matsu group off Fuzhou (Fochow). It has a 783 n mile coastline with East China Sea, Pacific Ocean and South China Sea. The capital and largest city of Taiwan is Taipei while Chi-lung (Keelung), Hualien, Kao-hsiung and T'ai-chung are the principal ports. Territorial seas (12 n miles) are claimed. A 200 n mile EEZ and Fishery Zone have also been claimed.

Headquarters Appointments

Commander-in-Chief:
 Admiral Wang Li-Sheng
Commandant of Marine Corps:
 Lieutenant General Yu Shang-Wen

Senior Flag Officers

Fleet Commander:
 Vice Admiral Hu Chai-Kwei

Senior Flag Officers—continued

Director of Logistics:
 Vice Admiral Gan Ke-Chiang
Commander East Command:
 Vice Admiral Chang Hai-Ping

Personnel

(a) 2009: 46,500 in Navy, 15,000 in Marine Corps
 (b) 1 year 4 months conscript service

Bases

Tsoying HQ First Naval District (Southern Taiwan, Pratas and Spratly). Main Base, HQ of Fleet Command, Naval Aviation Group and Marine Corps. Base of southern patrol and transport squadrons. Officers and ratings training, Navy Academy, Naval shipyard
 Kaohsiung: Naval shipyard.
 Makung (Pescadores): HQ Second Naval District (Pescadores, Quemoy and Wu Ch'iu). Base for attack squadrons. Naval shipyard and training facilities.
 Keelung: HQ Third Naval District (Northern Taiwan and Matsu group) Base of northern patrol and transport squadrons. Naval shipyard.
 Hualien: Naval Aviation Command.
 Suao: East Coast Command, submarine depot and shipyard.

Minor bases at Hualien, Tamshui, Hsinchu, Wuchi and Anping. Building, Taitung.

Organisation

1 Fleet Command:
 124th Attack squadron, based at Tsoying
 142nd Support squadron, based at Kaohsiung
 146th Attack squadron, based at Pescadores
 151st Amphibious squadron, based at Tsoying
 168th Patrol squadron, based at Suao
 192nd Mine Warfare squadron, based at Tsoying
 256th Submarine Unit, based at Tsoying.
 2. Naval Aviation Command: There are two Groups. The fixed-wing Group based at Pingtung-North consists of two squadrons (133 and 134). The helicopter Group consists of three squadrons 501 squadron is based at Tsoying, 701 squadron at Hualien and 702 squadron at Tsoying

Coast Defence

The land-based SSM command has six squadrons equipped with Hsiung-Feng II SSM at Tonying Island of the Matsu Group, Siyu Island of the Pescadores, Shiao Liuchiu off Kaohsiung, north of Keelung harbour, Tsoying naval base and Hualien. The ROCMC deploy eight SAM Platoons, equipped with Chaparral SAM quad-launchers, to the offshore island of Wuchi, and Pratas islets in the South China Sea. There are also a number of 127 mm guns.

2 GUPPY II CLASS (SS)

Name	No	Builders	Laid down	Launched	Commissioned
HAI SHIH (ex-Cutlass SS 478)	791 (ex-SS 91)	Portsmouth Navy Yard	22 July 1944	5 Nov 1944	17 Mar 1945
HAI BAO (ex-Tusk SS 426)	792 (ex-SS 92)	Federal SB & DD Co, Kearney, New Jersey	23 Aug 1943	8 July 1945	11 Apr 1946

Displacement, tons: 1,870 standard; 2,420 dived
Dimensions, feet (metres): 307.5 × 27.2 × 18
 (93.7 × 8.3 × 5.5)

Main machinery: Diesel-electric; 3 Fairbanks-Morse diesels, 4,500 hp (3.3 MW); 2 Elliott motors; 5,400 hp (4 MW); 2 shafts

Speed, knots: 18 surfaced; 15 dived
Range, n miles: 8,000 at 12 kt surfaced
Complement: 75 (7 officers)

Torpedoes: 10–21 in (533 mm) (6 fwd, 4 aft) tubes. AEG SUT; active/passive homing to 12 km (6.5 n miles) at 35 kt; 28 km (15 n miles) at 23 kt; warhead 250 kg.
Countermeasures: ECM, WLR 1/3; radar warning.
Radars: Surface search US SS 2; I-band
Sonars: EDO BQR 2B, hull-mounted; passive search and attack; medium frequency.
 Raytheon/EDO BQS 4C; adds active capability to BQR 2B.
 Thomson Sintra DUUG 1B, passive ranging.

Programmes: Originally fleet-type submarines of the US Navy's Tench class, extensively modernised under the Guppy II programme. *Hai Shih* transferred in April 1973 and *Hai Bao* in October the same year.
Structure: After 56 years in service diving depth is very limited.
Operational: Kept in service because of difficulty in buying replacements, but operational status doubtful. Likely to have an alongside training role only. Belong to the 256th Submarine Unit based at Tsuying.

HAI BAO

11/2004, *Ships of the World* / 10/045/4

DESTROYERS

Notes: Acquisition of the Aegis Combat System remains a firm aspiration but, following the decision to procure the Kidd class DDGs as an interim measure, this is unlikely before 2012.

4 KEELUNG (KIDD) CLASS (DDGHM)

Name	No	Builders	Laid down	Launched	Commissioned
KEELUNG (ex-Chi Teh, ex-Scott)	1801 (ex-DD 995)	Inga's Shipbuilding	12 Feb 1979	1 Mar 1980	24 Oct 1981
SUAO (ex-Wu Teh, ex-Callaghan)	1802 (ex-DD 994)	Inga's Shipbuilding	23 Oct 1978	1 Dec 1979	28 Aug 1981
TSOYING (ex-Ming Teh, ex-Kidd)	1803 (ex-DD 993)	Inga's Shipbuilding	26 June 1978	11 Aug 1979	27 June 1981
MAKUNG (ex-Tong-Teh, ex-Chandler)	1805 (ex-DD 996)	Inga's Shipbuilding	7 May 1979	24 May 1980	13 Mar 1982

Displacement, tons: 6,950 light; 9,574 full load
Dimensions, feet (metres): 563.3 × 55 × 20
 (171.7 × 16.8 × 6.2)

Main machinery: 4 GE LM 2500 gas turbines, 86,000 hp (64.16 MW) sustained, 2 shafts

Speed, knots: 33. **Range, n miles:** 6,000 at 20 kt
Complement: 363 (31 officers)

Missiles: SSM. 4 McDonnell Douglas RGM 84L Block 2 Harpoon (1 quad) launchers; active radar homing to 124 km (67 n miles) at 0.9 Mach; warhead 227 kg

SAM: 37 Raytheon Standard SM 2 MR Block IIA, command/inertial guidance; semi-active radar homing to 167 km (90 n miles) at 2.5 Mach. 2 twin Mk 26 launchers

Guns: 2 FMC 5 in (127 mm)/54 Mk 45 Mod 0; 20 rds/min to 23 km (12.6 n miles); weight of shell 32 kg
 2 General Electric/General Dynamics 20 mm Vulcan Phalanx 6-barrelled Mk 15; 3,000 rds/min (4,500 in Block 1).
 4–12.7 mm MGs

Torpedoes: 6–324 mm Mk 32 (2 triple) tubes. Honeywell Mk 46 Mod 5; anti-submarine, active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg. Torpedoes fired from inside the hull under the hangar

Countermeasures: Decoys. 4 Loral Hycor SRBOC 6-barrelled fixed Mk 36; IR flares and chaff to 4 km (2.2 n miles) SLQ-25 Nixie; torpedo decoy.

Combat data systems: ACDS Block 1 Level 1 with datalinks

Weapons control: SWG-1A Harpoon LCS. 2 Mk 74 MFCS. Mk 86 Mod 5 GFCS. Mk 116 FCS for ASW. Mk 14 WDS SYS 2(V)2 IADT 4 SYR 3393 for SAM mid-course guidance

Radars: Air search: ITT SPS-48E; 3D, E/F-band Raytheon SPS-49(V)5; C/D-band.

Air/surface search: ISC Cardion SPS-55; I/J-band
Navigation: Raytheon SPS-64; I/J-band.

Fire control: 2 Raytheon SPG-51D; 1 Lockheed SPG-60; 1 Lockheed SPQ 9A

Sonars: General Electric/Hughes SQS-53D; bow-mounted; search and attack, medium frequency
 Gould SQR-19 (TACTAS), passive towed array (may be fitted).

Helicopters: 1 Sikorsky S-70C(M)

KEELUNG

(Scale 1 : 1,500), Ian Sturton / 116/441

KEELUNG

6/2006, *Defence International* / 116/511

Programmes: Originally ordered by the Iranian government in 1974, the contracts were taken over by the US Navy on 25 July 1979. All paid off from USN service in 1998–99. Offered to the Taiwan government, intention to buy confirmed on 2 October 2001.

Modernisation: All received major modernisation from 1988–90. Further package completed prior to transfer. ASROC has been removed.

Structure: Optimised for general warfare, mainmast and radar aerials are in different configuration than Spruance class.

Operational: *Keelung* and *Sua* arrived in Taiwan on 8 December 2005 and were recommissioned on 17 December 2005. *Tsoying* and *Makung* arrived in October 2006. All four ships are to be based initially at Suao while a deepwater jetty at Tsoying is completed.

FRIGATES

Notes: The Kuang Hua 7 programme has superseded the former Kuang Hua 5 programme for the procurement of a new class of frigates/corvettes to replace the Knox class frigates. It is understood that there is a requirement for up to eight new ships of above 2,000 tons with a main armament of Hsiung Feng II missiles. It is not clear whether the ships are to be procured abroad (ex-US Spruance class are a possibility) or built locally.

8 CHENG KUNG CLASS (KWANG HUA 1 PROJECT) (FFGHM)

Name	No	Builders	Laid down	Launched	Commissioned
CHENG KUNG	1101	China SB Corporation, Kaohsiung	7 Jan 1990	5 Oct 1991	7 May 1993
CHENG HO	1103	China SB Corporation, Kaohsiung	21 Dec 1990	15 Oct 1992	28 Mar 1994

TZUJ	1107	China SB Corporation, Kaohsiung	7 Aug 1994	13 July 1995	9 Jan 1997
PAN CHAO	1108	China SB Corporation, Kaohsiung	25 July 1995	4 July 1996	16 Dec 1997
CHANG CHEN	1109	China SB Corporation, Kaohsiung	4 Dec 1995	14 May 1997	1 Dec 1998
TIENTAN	1110	China SB Corporation, Kaohsiung	21 Feb 2001	15 Oct 2002	11 Mar 2004

Displacement, tons: 2,750 light; 4,105 full load
Dimensions, feet (metres): 453 × 45 × 14.8; 24.5 (sonar)
 (138.7 × 13.7 × 4.5, 7.5)
Main machinery: 2 GE LM 2500 gas turbines; 41,000 hp (30.59 MW) sustained, 1 shaft; cp prop
 2 auxiliary retractable props; 650 hp (484 kW)
Speed, knots. 29 Range, n miles: 4,500 at 20 kt
Complement: 234 (15 officers) including 19 aircrew

Missiles: SSM: 8 Hsiung Feng II/III (2 quad); inertial guidance; active radar/IR homing to 80 (200 Hsiung Feng III) km (43.2 (108) n miles) at 0.85 Mach (2 Mach); warhead 190 kg.

SAM: 40 Raytheon Standard SM-1 MR Block VIA; Mk 13 launcher (command guidance; semi-active radar homing to 38 km (20.5 n miles) at 2 Mach.

Guns: 1 OTO Melara 76 mm/62 Mk 75 (85 rds/min to 16 km (8.7 n miles); weight of shell 6 kg.
 2 Bofors 40 mm/70 (3--20 mm Type 75 (on hangar roof when fitted)
 1 GE/GD 20 mm/76 Vulcan Phalanx 6-barrelled Mk 15 (3,000 rds/min combined to 15 km.

Torpedoes: 6—324 mm Mk 32 (2 triple) tubes (Honeywell/Alliant Mk 46 Mod 5; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

Countermeasures: Decoys: 4 Kung Fen 8 chaff launchers or locally produced version of RBOC (114 mm). SLQ-25A Nixie; torpedo decoy

ESM/ECM: Chang Feng IV (locally produced version of SLQ-32(V)2 with Sidcock); combined radar warning and jammers.

Combat data systems: Norden SYS-2(V)2 action data automation with UYK 43 computer. Te Chen link (from Chi Kuang onwards and being backfitted)

CHENG KUNG

(Scale 1 : 1,200, Ian Sturton / 0019776)

Weapons control: Loral Mk 92 Mod 6. Mk 13 Mod 4 weapon direction system. Mk 114 ASW 2 Mk 24 optical directors. Mk 309 TFCS.

Radars: Air search: Raytheon SPS-49(V)5 or SPS-49A (1108-9) (C/D-band.

Surface search: ISC Cardion SPS-55 or Raytheon Chang Ba; I/J-band.

Fire control: USN UD 417 STIR (I/J-band
 Unisys Mk 92 Mod 6 (I/J-band.

Sonars: Raytheon SQS-56/DE 1160F, hull-mounted; active search and attack; medium frequency.

SQR-18A(V)2; passive towed array or BAe/Thomson Sintra ATAS active towed array (from Chi Kuang onwards).

Helicopters: 2 Sikorsky S-70C(M) (only 1 embarked).

Programmes: First two ordered 8 May 1989. Named after Chinese generals and warriors. An eighth of class was ordered in late July 1999. Originally this ship was planned to be the first of a Flight II design, which was scrapped.

Modernisation: Hsiung Feng III supersonic missiles have been installed in some ships including Cheng Kung. All eight ships are to be fitted. A mid life upgrade for the class is likely to include the installation of RAM PDMS and the replacement of Standard SM-1 with SM-2. The Mk 86 direction system is also likely to be upgraded to Mod 12.

Structure: Similar to the USS Ingham. RAST helicopter hauldown. The area between the masts had to be strengthened to take the Hsiung Feng II missiles. Prairie Masker hull acoustic suppression system fitted.

Operational: Form the 146th Squadron based at Makung (Pescadore).

Guns: 1 OTO Melara 76 mm/62 Mk 75 ●; 85 rds/min to
16 km (8.7 n miles); weight of shell 6 kg.

1 Hughes 20 mm/76 Vulcan Phalanx Mk 15 Mod 2 ●.

2 Bofors 40 mm/70 ● 2 CS 20 mm Type 75

Torpedoes: 6—324 mm Mk 32 (2 triple) tubes ●; Alliant
Mk 46 Mod 5, active/passive homing to 11 km (5.9 n miles)
at 40 kt; warhead 44 kg.

Countermeasures: Decoys: 2 CSEE Daga e chaff
launchers ●

ESM/ECM: Thomson-CSF DR 3000S; intercept and jammer.
Chang Feng IV (1206); intercept and jammer

Combat data systems: Thomson-CSF TACTICOS Link W
(Ta Chen)

Weapons control: CSEE Najir Mk 2 optronic director ●

KANG DING

Radars: Air/surface search: Thomson-CSF DRBV-26D

Jupiter II (with LW08 aerial) ●; D-band.

Surface search Thomson-CSF Triton G ●; G-band

Fire control: 2 Thomson-CSF Castor IIC ●; I/J-band.

Navigation/hero control: 2 Racal Decca 20V90; I-band.

Sonars: BAe/Thomson Sintra ATAS (V12); active towed

array

Thomson Sintra Spherion B; bow-mounted; active

search; medium frequency.

Helicopters: 1 Sikorsky S-70C(M)1 ● Thunderhawk.

Programmes: Sale of up to 16 of the class authorised by

the French government in August 1991. Contract for six

signed with Thomson-CSF in early 1992, manufactured

in France with some weapon assembly by China

SB Corporation at Kaohsiung in Taiwan. First one to
Taiwan in March 1996 and the last in January 1998.
Names are those of Chinese cities. Second batch of 10
to be built by China SB Corporation was planned but this
now seems unlikely.

Modemisation: There are plans to move Phalanx to the
bridge roof and fit two 10-round RAM launchers on the
hangar.

Structure: There are considerable differences with the
French 'La Fayette' design in both superstructure and
weapon systems. A comprehensive ASW fit has been
added as well as additional gun armament. There is also
no stern hatch for launching RIBs. Some of the weapons
were fitted after arrival in Taiwan. DCN Samahé helicopter
landing gear installed.

Operational: Form 124 Squadron based at Tsoying.

(Scale 1 : 1,200), Ian Sturton / 0121405

YI YANG (ex-Valdez)	939 (ex-FF 1096)	Avondale Shipyards	30 June 1972	24 Mar 1973	27 July 1974	18 Oct 1999

Displacement, tons: 3,011 standard; 3,877 (932, 935), 4,260 (933, 934) full load

Dimensions, feet (metres): 439.6 × 46.8 × 15; 24.8 (sonar) (134 × 14.3 × 4.6; 7.8)

Main machinery: 2 Combustion Engineering/Babcock & Wilcox boilers; 1,200 psi (84.4 kg/cm²); 950°F (510°C); 1 turbine; 35,000 hp (26 MW); 1 shaft

Speed, knots: 27 **Range, n miles:** 4,000 at 22 kt on 1 boiler

Complement: 288 (17 officers) including aircrew

Missiles: SSM. 8 McDonnell Douglas Harpoon ●; active radar homing to 130 km (70 n miles) at 0.9 Mach, warhead 227 kg

SAM: 10 General Dynamics SM-1-MR (2 triple, 2 twin) ●; command guidance; semi-active radar homing to 46 km (25 n miles) at 2 Mach (fitted in all but 932 and 937).

A/S: Honeywell ASROC Mk 16 octuple launcher with reload system (has 2 cells modified to fire Harpoon) ●; inertial guidance from 1.6-10 km (1-5.4 n miles); payload Mk 46 Mod 5 Nearip.

Guns: 1 FMC 5 in (127 mm)/54 Mk 42 Mod 9 ●; 20-40 rds/min to 24 km (13 n miles) anti-surface; 14 km (7.7 n miles) anti-aircraft; weight of shell 32 kg to be replaced by 1 OTO Melara 3 in (76 mm)/62 Mk 75, 85 rds/min to 16 km (8.7 n miles); weight of shell 6 kg.

1 General Electric/General Dynamics 20 mm/76 6-barrelled Mk 15 Vulcan Phalanx ●; 3,000 rds/min combined to 15 km.

4 Type 75 20 mm

Countermeasures: Decoys: 2 Loral Hycor SRBOC 6-barrelled fixed Mk 36 ●; IR flares and chaff to 4 km (2.2 n miles).

7 Mk 6 Fanfare/SQ-25 Nixie; torpedo decoy. Prairie Masker hull and blade rate noise suppression.

ESM/ECM: SLQ-32(V)2 ●; radar warning. Sidekick modification adds jammer and deception system.

Combat data systems: Link 14 receive only. Link W may be fitted. FFISTS (Frigate Integrated Shipboard Tactical System). RADDSS (Radar Displays and Distribution System).

Weapons control: SWG-1A Harpoon LCS Mk 88 GFCS. Mk 114 ASW FCS. Mk 1 target designation system. SRQ-4 for LAMPS.

Radars: Air search: Lockheed SPS-40B (fitted in 932, 937) ●; B-band or Signal DA 08; E/F-band.

Surface search: Raytheon SPS-10 or Norden SPS-67 ●; G-band. Navigation: Marconi LN66; I-band.

Fire control: Western Electric SPG-53A/D/F (fitted in 932, 937) ●; or Signal STIR; VJ-band

Tacan: SRN 15. IFF: UPX-12.

Sonars: EDO/General Electric SQS-26CX; bow-mounted; active search and attack; medium frequency.

EDO SQR-18A(V)1; passive towed array.

FONG YANG

(Scale 1 : 1,200, Ian Sturton / 1293480)

FONG YANG

12/2005, Ships of the World / 1151164

Helicopters: 1 MD 500 ●

Programmes: Fong Yang leased from the US on 23 July 1992, Chin Yang 7 August 1992 and Fang Yang 6 August 1993. Hae Yang leased 31 May 1994; Hwai Yang 21 June 1994 and Lan Yang 30 June 1994. The second batch of three were overhauled and upgraded by Long Beach Shipyard, California. Ning Yang and Yi Yang transferred by sale on 29 April 1998, and refitted at Denton Shipyard, South Carolina. The transfer of a third (ex-Pharris 1094) was declined as were further offers of ex-Whipple (1062) and ex-Downes (1070) for use as spares.

Modernisation: A programme to equip all eight ships with a limited air-defence capability has been initiated. SPS-40 radar is being replaced by DA-08; SPG 53A is being

replaced by STIR; 10 standard SM-1 MR (ex-Gearing class) are being installed on top of the hangar. The 127 mm gun is being replaced by the OTO Melara 76 mm/62

Structure: ASROC-torpedo reloading capability (note slanting face of bridge structure immediately behind ASROC). Four Mk 32 torpedo tubes are fixed in the midships structure, two to a side, angled out at 45°. The arrangement provides improved loading capability over exposed triple Mk 32 torpedo tubes. A 4,000 lb lightweight anchor is fitted on the port side and an 8,000 lb anchor fits into the after section of the sonar.

Operational: Seasprite helicopters were planned to be embarked but this now seems unlikely. All of the class are assigned to 168 Patrol Squadron at Suao. Lan Yang is the Flagship

SHIPBORNE AIRCRAFT

Notes: Negotiations to acquire SH-2F Seasprite helicopters for the Knox class, conducted for several years, have not been satisfactorily concluded.

Numbers/Type: 21 Sikorsky S-70C(M)1 Thunderhawks

Operational speed: 145 kt (269 km/h)

Service ceiling: 19,000 ft (5,790 m)

Range: 324 n miles (600 km)

Role/Weapon systems: First delivered in 1991. This is a variant of the SH-60B and became seaborne with the first Cheng Kung and Kang Ding class frigates. 701 and 702 Squadrons. Two modified for EW and Sigint role. Another 14 S-70B/C SAR and assault aircraft belong to the Air Force. Sensors: APS 128 search radar; Litton ALR 606(V)2 ESM; ARR 84 sonobuoy receiver with Litton ASN 150 data link; Allied AQS 18(V)3 dipping sonar; ASQ 504 MAD. Ta Chen data link to be fitted. Weapons: ASW; two Hughes Mk 46 Mod 5 torpedoes or two Mk 64 depth bombs. ASV; could carry ASM.

THUNDERHAWK

1/2000, C Chung / 0106599

Numbers/Type: 9 Hughes MD 500/ASW

Operational speed: 110 kt (204 km/h)

Service ceiling: 16,000 ft (4,880 m)

Range: 203 n miles (376 km)

Role/Weapon systems: Short-range ASW helicopter with limited surface search capability. 501 ASW Squadron. Sensors: Search radar, Texas Instruments ASQ 81(V)2 MAD. Weapons: ASW; one Mk 46 Mod 5 torpedo or two depth bombs. ASV; could carry machine gun pods.

MD 500

1/1995, L J Lamb / 0080778

LAND-BASED MARITIME AIRCRAFT

Notes: (1) Four Grumman E-2T Hawkeye AEW aircraft were acquired by the Air Force in February 1995. These are to be upgraded to the Hawkeye 2000 configuration.

(2) Plans, under the 2001 US arms package, to acquire 12 P-3C maritime patrol aircraft were confirmed on 16 February 2008. Eight of the aircraft are to be manufactured in Taiwan. To be delivered from 2011.

(3) Plans to acquire 12 MH 53E Sea Dragon minehunting helicopters were also agreed in the 2001 agreement but continue to be delayed.

Numbers/Type: 3/21 Grumman S-2E/S-2T (Turbo) Trackers.

Operational speed: 130 kt (241 km/h).

Service ceiling: 25,000 ft (7,620 m).

Range: 1,350 n miles (2,500 km).

Role/Weapon systems: Patrol and ASW tasks transferred to the Navy in July 1998; 21 aircraft updated with turboprop engines and new sensors. Based at Pintung. To be replaced by P-3C when they enter service. Sensors: APS 504 search radar, ESM, MAD, AAS 40 FLIR, SSQ-41B, SSQ-47B sonobuoys; AQS 902F sonobuoy processor; ASN 150 datalink. Weapons: ASW; four Mk 44 torpedoes, Mk 54 depth charges or Mk 64 depth bombs or mines ASV; Hsiung Feng II ASM; six 127 mm rockets.

TRACKER

6/2002, Adolfo Ortigueira Gil / 0569245

PATROL FORCES

Notes: All coastal patrol craft were transferred to the Maritime Police on 8 December 1992. The Maritime Police became the Coast Guard 1 February 2000.

12 + (12) JIN CHIANG CLASS (LARGE PATROL CRAFT) (PCG)

CHU CHIANG	617	China SB, Kaohsiung	25 Feb 2000	21 July 2000

Displacement, tons: 680 full load

Dimensions, feet (metres): 201.4 x 31.2 x 9.5 (61.4 x 9.5 x 2.9)

Main machinery: 2 MTU 20V 1163 TB93 diesels; 20,128 hp(m) (14.79 MW); 2 shafts

Speed, knots: 25

Range, n miles: 4,150 at 15 kt

Complement: 50 (7 officers)

Missiles: SSM: 4 Hsiung Feng I; radar or optical guidance to 36 km (19.4 n miles) at 0.7 Mach; warhead 75 kg or 4 Hsiung Feng II (606, 607); inertial guidance; active radar/IR homing to 80 km (43.2 n miles) at 0.85 Mach; warhead 190 kg.

4 Hsiung Feng II (in some); inertial guidance; active radar/IR homing to 80 km (43.2 n miles) at 0.85 Mach; warhead 190 kg

Guns: 1 Bofors 40 mm/70. 1 CS 20 mm Type 75. 2—12.7 mm MGs.

Depth charges: 2 racks

Mines: 2 rails for Mk 6.

Weapons control: Honeywell H 930 Mod 2 MFCS. Contraves WCS

Rafael Sea Eye FLIR; range out to 3 km.

Radars: Air/surface search: Marconi LN66, I-band.

Fire control: Hughes HR-76C5; I/J-band.

Navigation: Racal Decca Bridgemaster; I-band

Sonars: Simrad, search and attack; high frequency.

Programmes: Kwang Hua Project 3 design by United Ship Design Centre. First one laid down 25 June 1993. Eleven more ordered 26 June 1997. A further 12 were to have been delivered by 2010 but there have been no reports of progress.

Modernisation: Hsin Chiang and Feng Chiang have been upgraded with an Oto 76 mm gun and four Hsiung Feng II missiles. A mast to carry the datalink radome has also been added. All ships may be similarly modified in due course and it is likely that Hsiung Feng II missiles will be replaced with Hsiung Feng III.

PO CHIANG

12/2005, Ships of the World / 1151163

HSIN CHIANG

6/2006 / 1167508

2 LUNG CHIANG CLASS (FAST ATTACK CRAFT—MISSILE) (PGGF)

Name	No	Builders	Commissioned
LUNG CHIANG	601 (ex-PGG 581)	Tacoma Boatbuilding, WA	15 May 1978
SUI CHIANG	602 (ex-PGG 582)	China SB Corporation, Kaohsiung	31 Dec 1981

Displacement, tons: 270 full load

Dimensions, feet (metres): 164.5 x 23.1 x 9.5 (50.2 x 7.3 x 2.9)

Main machinery: CODAG; 3 Avco Lycoming TF-40A gas turbines; 12,000 hp (8.95 MW)

sustained; 3 Detroit 12V 149Ti diesels; 2,736 hp (2.04 MW) sustained; 3 shafts; cp props

Speed, knots: 20 kt diesels, 38 kt gas

Range, n miles: 3,100 at 12 kt on 1 diesel, 800 at 36 kt

Complement: 38 (5 officers)

Missiles: SSM: 4 Hsiung Feng I; radar or optical guidance to 36 km (19.4 n miles) at 0.7 Mach; warhead 75 kg.

Guns: 1 Oto Melara 3 in (76 mm)/62; 60 rds/min to 16 km (8.7 n miles); weight of shell 6 kg.

1 Bofors 40 mm/70. 2—12.7 mm MGs.

Countermessures: Decoys: 4 Israeli AV2 (601) or SMOC-4 (602) chaff launchers.

ESM: WD-2A; intercept.

Combat data systems: IPN 10 action data automation.

Weapons control: NA 10 Mod 0 GFCS. Honeywell H 930 Mod 2 MFCS (602)

Radars: Surface/air search: Selenia RAN 11 L/X; D/I-band.

Fire control: RCA HR 76; I/J-band (for SSM) (602)

Selenia RAN 11L/X; I/J-band for SSM (601).

Navigation: SPS-58(A); I-band

Programmes: Similar to the US Patrol Ship Multi-Mission Mk 5 (PSMM Mk 5). Second of class was built to an improved design. A much larger number of this class was intended, all to be armed with Harpoon. However at that time the US ban on export of Harpoon to Taiwan coupled with the high cost and doubts about seaworthiness caused the cancellation of this programme.

Structure: Fin stabilisers were fitted to help correct the poor sea-keeping qualities of the design. Both have had engine room fires caused by overheating in GT gearboxes.

Operational: Lung Chiang may be non-operational.

SUI CHIANG

4/1997, Ships of the World / 0019731

47 HAI OU CLASS (FAST ATTACK CRAFT—MISSILE) (PTG)

FABG 7-12	FABG 23-30	FABG 41-46	FABG 59
FABG 14-21	FABG 32-39	FABG 47-57	

Displacement, tons: 47 full load

Dimensions, feet (metres): 70.8 x 18 x 3.3 (21.6 x 5.5 x 1)

Main machinery: 2 MTU 12V 331TC82 diesels, 2,605 hp(m) (1.92 MW) sustained; 2 shafts

Speed, knots: 30

Range, n miles: 700 at 32 kt

Complement: 10 (2 officers)

Missiles: SSM: 2 Hsiung Feng I, radar or optical guidance to 36 km (19.4 n miles) at 0.7 Mach; warhead 75 kg

Guns: 1 CS 20 mm Type 75. 2—12.7 mm MGs.

Countermessures: Decoys: 4 Israeli AV2 chaff launchers.

ESM: WD-2A; intercept.

Weapons control: Kollmorgen Mk 35 optical director.

Radars: Surface search: Marconi LN66, I-band

Fire control: RCA R76 C5; I-band.

Programmes: This design was developed by Sun Yat Sen Scientific Research Institute from the basic Israeli Dvora plans. Built by China SB Corporation (Tsoying SY), Kaohsiung except for the first pair (FABG 5-6) which were the original Dvora class hulls and were commissioned on 31 December 1977.

Structure: Aluminium alloy hulls. The first series had a solid mast and the missiles were nearer the stern. Second series changed to a lattice mast and moved the missiles further forward allowing room for two 12.7 mm MGs right aft. One 20 mm has been added on the stern.

Operational: The prototype reached 45 kt on trials but top speeds are now reported as being much reduced. These craft often carry shoulder-launched SAMs. One task is to provide exercise high-speed targets in shallow waters. From 1997 organised in five divisions based at Makung, Tamsui, Tsoying, Suao and Keelung. Not all are operational and the class is likely to be paid off as the Kwang Hua 6 class enter service.

Sales: Two similar craft to Paraguay in 1996.

FABG 50

12/2005, Ships of the World / 1151167

1 + 2 (27) KWANG HUA 6 CLASS (PTG)

FACG 60

Displacement, tons: 180 standard
Dimensions, feet (metres): 112.2 x 24.9 x 6.2 (34.2 x 7.6 x 1.9)
Main machinery: 3 MTU 16V 4000 diesels; 9,600 hp (7.2 MW); 3 shafts
Speed, knots: 33 **Range, n miles:** 1,150 at 22 kt
Complement: 14
Missiles: SSM: 4 Hsiung Feng II; inertial guidance; active radar/IR homing to 80 km (43.2 n miles) at 0.85 Mach; warhead 190 kg
Guns: 2 CS 20 mm Type 75
Countermeasures: Decoys: Chaff launchers. ESM.
Weapons control: Optronic director.
Radars: Surface search. Fire control.

Comment: Funds allocated for the budget period July 1998 to June 2003 to build these craft in Taiwan to replace the Hai Ou class. First of class laid down in early 2001 and launched on 26 September 2002. Commissioned in October 2003 but subsequently damaged by typhoon in September 2008. Construction of remaining craft was delayed into 2007 when work on two boats was reportedly initiated.

FACG 60 12/2005, Ships of the World / 1151161

8 NING HAI CLASS (LARGE PATROL CRAFT) (PCF)

NING HAI PCL 1 AN HAI PCL 2 PCL 3 PCL 5-9

Displacement, tons: 143 full load
Dimensions, feet (metres): 105 x 29.5 x 5.9 (32 x 9 x 1.8)
Main machinery: 3 MTU 12V 396TB93 diesels; 4,890 hp (3.6 MW) sustained; 3 shafts
Speed, knots: 40
Complement: 18 (2 officers)
Guns: 1 Bofors 40 mm/60. 1 CS 20 mm Type 75.
Depth charges: 2 racks.
Radars: Surface search: Decca; I-band
Sonars: Hull-mounted; active search and attack; high frequency.

Comment: Built to Vosper QAF design by China SB Corporation, Kaohsiung in 1987-90. Previously reported numbers had been exaggerated. They are used mainly for harbour defence against midget submarines and frogmen and also for Fishery protection tasks.

PCL 5 6/2002, Ships of the World / 0569243

AMPHIBIOUS FORCES

1 CABILDO CLASS (LSDM)

Name	No	Builders	Commissioned
CHUNG CHENG (ex-Cornstock)	191 (ex-LSD 19)	Newport News, Virginia	2 July 1945

Displacement, tons: 4,790 standard; 9,375 full load
Dimensions, feet (metres): 475 x 76.2 x 18 (144.8 x 23.2 x 5.5)
Main machinery: 2 boilers; 435 psi (30.6 kg/cm²); 740°F (393°C); 2 turbines; 7,000 hp (5.22 MW); 2 shafts
Speed, knots: 15.4 **Range, n miles:** 8,000 at 15 kt
Complement: 316
Military lift: 3 LCUs or 18 LCMs or 32 LVTs in docking well
Missiles: SAM: 1 Sea Chaparral quadruple launcher.
Guns: 12 Bofors 40 mm/56 (2 quad, 2 twin).
Weapons control: US Mk 26 Mod 4.
Radars: Surface search: Raytheon SPS-5; G/H-band.
Navigation: Marconi LN66; I-band.

Comment: Launched 28 April 1945 and transferred to Taiwan on 1 October 1985 having been bought from a ship breaker. SAM system fitted in 1992. Collision with merchant ship on 28 June 2001 resulted in five months repair work. Second of class scrapped in mid-1999.

CHUNG CHENG 6/2000, Ships of the World / 1190409

1 ANCHORAGE CLASS (LSDH)

Name	No	Builders	Commissioned
SHIU HAI (ex-Pensacola)	LSD 193 (ex-LSD 38)	General Dynamics, Quincy	27 Mar 1971

Displacement, tons: 8,600 light; 13,700 full load
Dimensions, feet (metres): 553.3 x 84 x 20 (168.6 x 25.6 x 6)
Main machinery: 2 Foster-Wheeler boilers; 600 psi (42.3 kg/cm²); 870°F (467°C); 2 De Laval turbines; 24,000 hp (18 MW); 2 shafts
Speed, knots: 22
Range, n miles: 14,800 at 12 kt
Complement: 374 (24 officers)
Military lift: 366 troops (18 officers); 2 LCU or 18 LCM 6 or 9 LCM 8 or 50 LVT; 1 LCM 6 on deck; 2 LCPL and 1 LCVP on davits. Aviation fuel, 90 tons
Guns: 2 General Electric/General Dynamics 20 mm/76 6-barrelled Vulcan Phalanx Mk 15; 3,000 rds/min combined to 1.5 km. 2-25 mm Mk 38 8-12.7 mm MGs
Countermeasures: Decoys: 4 Loral Hyco SRBOC 6-barrelled Mk 36; IR flares and chaff to 4 km (2.2 n miles).
ESM: SLQ-32(V)1; intercept
Radars: Air search: Lockheed SPS-40B, B-band.
 Surface search: Raytheon SPS-10F; G-band.
Navigation: Marconi LN66, I-band.
Helicopters: Platform only

Comment: First one acquired from US Navy 30 September 1999 and arrived in Taiwan on 2 June 2000. Transfer of ex-Anchorage (LSD 36) did not take place as expected in 2004 although procurement of a further amphibious ship remains a requirement. Has a docking well 131.1 x 15.2 m and two 50 ton cranes. Based at Tsoying.

SHIU HAI 6/2000, Ships of the World / 1167449

2 NEWPORT CLASS (LSTH)

Name	No	Builders	Commissioned
CHUNG HO (ex-Manitowic)	232 (ex-LST 1180)	Philadelphia Shipyard	24 Jan 1970
CHUNG PING (ex-Sumter)	233 (ex-LST 1181)	Philadelphia Shipyard	20 June 1970

Displacement, tons: 4,975 light; 8,450 full load
Dimensions, feet (metres): 522.3 x 69.5 x 17.5 (159.2 x 21.2 x 5.3)
Main machinery: 6 ALCO 18-251 diesels; 16,500 hp (12.3 MW) sustained; 2 shafts; cp props; bow thruster
Speed, knots: 20
Range, n miles: 14,250 at 14 kt
Complement: 257 (13 officers)
Military lift: 400 troops; 500 tons vehicles; 3 LCVPs and 1 LCPL on davits
Guns: 1 General Electric/General Dynamics 20 mm Vulcan Phalanx Mk 15. 4-40 mm/60 (2 twin)
Countermeasures: ESM: WD-2A (233); intercept
ESM/ECM: Chang Feng III (232); intercept and jammer
Radars: Surface search: Raytheon SPS-67; G-band.
Navigation: Marconi LN66, I-band.
Helicopters: Platform only.

Comment: First pair transferred from USA by lease confirmed for both ships on 1 July 1995. Refitted at Newport News and recommissioned 8 May 1997, sailing for Taiwan after a short operational work-up. Purchased outright on 29 September 2000. Transfer of further ships is unlikely. These ships unload by a 112 ft ramp over their bow. The ramp is supported by twin derrick arms. A ramp just forward of the superstructure connects the lower tank deck with the main deck and a vehicle passage through the superstructure provides access to the parking area amidships. A stern gate to the tank deck permits unloading of amphibious tractors into the water, or unloading of other vehicles into an LCU or on to a pier. Vehicle stowage covers 19,000 sq ft. Length over derrick arms is 562 ft (171.3 m); full load draught is 11.5 ft forward and 17.5 ft aft. Bow thruster fitted to hold position offshore while unloading amphibious tractors.

CHUNG CHIH (ex-Sagadahoc County LST 1091) 226 (ex-655)
 CHUNG MING (ex-Sweetwater County LST 1152) 227 (ex-681)
 CHUNG PANG (ex-LST 578) 230 (ex-629)
 CHUNG YEH (ex-Sublette County LST 1144) 231 (ex-699)

Displacement, tons: 1,653 standard; 4,080 (3,640, 1-510 class) full load
Dimensions, feet (metres): 328 × 50 × 14 (100 × 15.2 × 4.3)
Main machinery: 2 GM 12-567A diesels; 1,800 hp (1.34 MW); 2 shafts
Speed, knots: 11.6. **Range, n miles:** 15,000 at 10 kt
Complement: Varies-100-125 in most ships
Guns: Varies-up to 10 Bofors 40 mm/56 (2 twin, 6 single) with some modernised ships rearmed with 2 USN 3 in (76 mm)/50 and 6-40 mm (3 twin) Several Oerlikon 20 mm (twin or single).
Radars: Navigation: US SO 1, 2 or 8, 1-band.

Comment: Constructed between 1943 and 1945. These ships have been rebuilt in Taiwan. Six transferred from US in 1946; two in 1947; one in 1948; eight in 1958, one in 1959, two in 1960, and one in 1961. Some have davits forward and aft. Pennant numbers have reverted to those used in the 1960s. One deleted in 1990, six more in 1993, one more in 1995 after going aground, and two more in 1997. The midships dock is occasionally used as a helicopter platform. These last 11 may be retained due to the cancellation of the programme for more locally built AKs.

Main machinery: 4 Detroit diesels; 1,200 hp (895 kW); 2 Kort nozzle props
Speed, knots: 11
Range, n miles: 1,200 at 10 kt
Complement: 16
Military lift: 180 tons or 350 troops
Guns: 2-12.7 mm MGs.

Comment: Locally built versions of US types. Ramps at both ends.

HO FONG 6/2000, DTM / 0569237

100 LCVPS AND ASSAULT CRAFT

Comment: Some ex-US, and some built in Taiwan. Most are armed with one or two 7.62 mm MGs. Two transferred to Indonesia in 1988. About 20 deleted in the last three years and 30 transferred to Honduras in 1996 for River operations. There are also a number of amphibious reconnaissance boats in the ARP 1000, 2000 and 3000 series. Form part of 151 Squadron.

TYPE 272

1989, (DTM (Raymond Cheung)) / 0506106

MINE WARFARE FORCES

Notes: There are plans to acquire eight GRP minehunters to replace the inventory of ageing wooden-hull minesweepers. The first two ships are to be two Osprey class, transferred from the US Navy, while a further six, probably based on the Lerici class, are to be built in Taiwan.

4 AGGRESSIVE CLASS (MINESWEEPERS) (MSO)

Name	No	Builders	Commissioned
YUNG YANG (ex- <i>Implicit</i>)	1306 (ex-455)	Wilmington Boat	10 Mar 1954
YUNG TZU (ex- <i>Conquest</i>)	1307 (ex-488)	Martenac, Tacoma	20 July 1955
YUNG KU (ex- <i>Gallant</i>)	1308 (ex-489)	Martenac, Tacoma	14 Sep 1956
YUNG TEH (ex- <i>Pledge</i>)	1309 (ex-492)	Martenac, Tacoma	20 Apr 1956

Displacement, tons: 720 standard; 780 full load
Dimensions, feet (metres): 172.5 x 35.1 x 14.1 (52.6 x 10.7 x 4.3)
Main machinery: 4 Packard ID-1700 or Waukesha diesels; 2,280 hp (1.7 MW); 2 shafts; cp props
Speed, knots: 14. **Range, n miles:** 3,000 at 10 kt
Complement: 86 (7 officers)
Guns: 2—12.7 mm MGs.
Radars: Navigation. Sperry SPS-53L; I-band.
Sonars: General Electric SQQ-14; VDS; active minehunting, high frequency.

Comment: Transferred by sale to Taiwan from the LSN 3 August and 30 September 1994. Delivery was delayed into 1995 while replanking work was carried out in the US. All recommissioned 1 March 1995. Second batch of three planned to transfer but were subsequently scrapped after cannibalisation for spares. All are fitted with SLQ-37 mechanical acoustic and magnetic sweeps and can carry an ROV. Plans to update the class with a Unisys SYQ-12 minehunting system and Pluto ROVs have probably been overtaken by the new MCMV programme.

YUNG KU

6/2000, DTM / 0569242

4 ADJUTANT AND MSC 268 CLASSES (MINESWEEPERS—COASTAL) (MSC)

YUNG CHUAN (ex- <i>MSC 278</i>) 158	YUNG REN (ex- <i>St Nicholas</i> , ex- <i>MSC 64</i>) 167
YUNG FU (ex- <i>Macaw</i> , ex- <i>MSC 77</i>) 162	YUNG SUI (ex- <i>Diskmude</i> , ex- <i>MSC 66</i>) 168

Displacement, tons: 375 full load
Dimensions, feet (metres): 144 x 27.9 x 8 (43.9 x 8.5 x 2.4)
Main machinery: 2 GM 8-268A diesels, 880 hp (656 kW); 2 shafts
Speed, knots: 13. **Range, n miles:** 2,500 at 12 kt
Complement: 35
Guns: 1 Oerlikon 20 mm.
Radars: Navigation: Decca 707; I-band.
Sonars: Simrad 950, hull-mounted, minehunting; high frequency

Comment: Non-magnetic, wood-hulled minesweepers built in the US in the 1950s specifically for transfer to allied navies. All refitted 1984-86. All are in very poor condition. Several deleted so far. Two put back in service in 1996 and one in 1997 to replace three others paid off.

YUNG CHUAN

6/2000, DTM / 0569241

4 YUNG FENG (MWV 50) CLASS (MINEHUNTERS—COASTAL) (MHC)

YUNG FENG 1301 YUNG CHIA 1302 YUNG TING 1303 YUNG SHUN 1305

Displacement, tons: 500 full load
Dimensions, feet (metres): 163.1 x 28.5 x 10.2 (49.7 x 8.7 x 3.1)
Main machinery: 2 MTU 8V 396 TB93 diesels; 2,180 hp(m) (1.6 MW) sustained; 2 shafts
Speed, knots: 14. **Range, n miles:** 3,500 at 14 kt
Complement: 45 (5 officers)
Guns: 1—20 mm, 2—12.7 mm MGs.
Radars: Navigation: I-band.
Sonars: TSM-2022; hull-mounted; active minehunting; high frequency.

Comment: Built for the Chinese Petroleum Corporation by Abeking & Rasmussen at Lemwerder, Germany. First four delivered in 1991 as offshore oil rig support ships and then converted for minehunting in Taiwan. Thomson Sintra IBIS V minehunting system is fitted and two STN Pinguin B3 ROVs are carried.

YUNG FENG

6/2000, DTM / 0569240

0 + 2 OSPREY CLASS (MINEHUNTERS—COASTAL) (MHC)

Name	No	Builders	Launched	Commissioned
— (ex- <i>Oriole</i>)	— (ex-MHC 55)	Intermarine, Savannah	22 May 1993	16 Sep 1995
— (ex- <i>Falcon</i>)	— (ex-MHC 59)	Intermarine, Savannah	3 June 1995	26 Oct 1997

Displacement, tons: 930 full load
Dimensions, feet (metres): 187.8 x 35.9 x 9.5 (57.2 x 11 x 2.9)
Main machinery: 2 Isotta Fraschini ID 36 SS 8V AM diesels; 1,600 hp(m) (1.18 MW) sustained; 2 Voith-Schneider props; 3 Isotta Fraschini ID 36 diesel generators; 984 kW
Speed, knots: 10. **Range, n miles:** 1,500 at 10 kt
Complement: 51 (5 officers)
Guns: 2—12.7 mm MGs.
Countermeasures: MCM: Alliant SLQ-48 mine neutralisation system ROV (with 1,070 m cable). Degeussing DGM-4.
Combat data systems: Unisys SYQ 13 and SYQ 109; integrated combat and machinery control system. USQ 119E(V), UHF Dama, and OTCIXS provide GCCS connectivity.
Radars: Surface search. Raytheon SPS-64(V)9; I-band.
Navigation: R41XX; I-band.
Sonars: Raytheon/Thomson Sintra SQQ 32(V)3; VDS; active minehunting; high frequency.

Programmes: Original design contract for Lerici-class minehunters was awarded in August 1986 to Intermarine USA which built eight of the 12 ships of the class for the US Navy. Authority to transfer both vessels to Taiwan was sought in 2007 and both are likely to be delivered in 2009.

Structure: Construction is of monocoque GRP throughout hull, with frames eliminated. Main machinery is mounted on GRP cradles and provided with acoustic enclosures. SQQ-32 is deployed from a central well forward. Fitted with Voith cycloidal propellers which eliminate need for forward thrusters during station keeping.

SURVEY AND RESEARCH SHIPS

1 ALLIANCE CLASS (AGOR)

Name	No	Builders	Launched	Commissioned
TA KUAN	1601	Fincantieri, Muggiano	17 Dec 1994	27 Sep 1995

Displacement, tons: 2,466 standard; 3,180 full load
Dimensions, feet (metres): 305.1 x 49.9 x 16.7 (93 x 15.2 x 5.1)
Main machinery: Diesel-electric; 3 MTU/AEG diesel generators, 5,712 hp(m) (4.2 MW); 2 AEG motors; 5,100 hp(m) (3.75 MW); 2 shafts; bow thruster; stern trainable and retractable thruster
Speed, knots: 15. **Range, n miles:** 12,000 at 12 kt
Complement: 82
Guns: 2—12.7 mm MGs
Radars: Navigation: H/I-band.

Comment: Ordered in June 1993 and laid down 8 April 1994. Almost identical to the NATO vessel. Designed for oceanography and hydrographic research. Facilities include laboratories, position location systems, and overside deployment equipment. Equipment includes a Simrad side scan sonar EM 1200, deep and shallow echo-sounders, two radars, Navsat and Satcom, an ROV for remote inspection, and a dynamic positioning system with bow thruster and stern positioning propeller.

TA KUAN

8/1997, C Chung / 0019239

AUXILIARIES

1 COMBAT SUPPORT SHIP (AOEHM)

Name	No	Builders	Launched	Commissioned
WU YI	530	China SB Corporation, Keelung	4 Mar 1989	23 June 1990

Displacement, tons: 7,700 light; 17,000 full load
Dimensions, feet (metres): 531.8 × 72.2 × 28 (162.1 × 22.2 × 8.6)
Main machinery: 2 MAN 14-cyl diesels; 25,000 hp(m) (18.37 MW); 2 shafts
Speed, knots: 21. **Range, n miles:** 9,200 at 10 kt
Cargo capacity: 9,300 tons
Missiles: SAM: 1 Sea Chaparral quad launcher.
Guns: 2 Bofors 40 mm/70, 2 Oerlikon 20 mm GAM-BO1, 4—12.7 mm MGs.
Countermeasures: Decoys: 2 chaff launchers.
ESM: Radar warning.
Radars: 2 navigation; I-band.
Helicopters: Platform for CH-47 or S-70C(M)1.

Comment: Largest unit built so far for the Taiwanese Navy. Design assisted by the United Shipping Design Center in the US. Beam replenishment rigs on both sides. SAM system on forecastle, 40 mm guns aft of the funnels.

WU YI 3/2004, Chris Sattler / 1044573

3 WU KANG CLASS (ATTACK TRANSPORTS) (AKM)

Name	No	Builders	Commissioned
YUEN FENG	524	China SB Corporation, Keelung	10 Sep 1982
WU KANG	525	China SB Corporation, Keelung	9 Oct 1984
HSIN KANG	526	China SB Corporation, Keelung	30 Nov 1988

Displacement, tons: 2,804 standard; 4,845 full load
Dimensions, feet (metres): 334 × 59.1 × 16.4 (101.8 × 18 × 5)
Main machinery: 2 diesels; 2 shafts; bow thruster
Speed, knots: 20. **Range, n miles:** 6,500 at 12 kt
Complement: 61 (11 officers)
Military lift: 1,400 troops
Missiles: SAM: 1 Sea Chaparral quad launcher
Guns: 2 Bofors 40 mm/60, 2 or 4—12.7 mm MGs
Countermeasures: ESM: WD-2A (524 only), Intercept

Comment: First three were built and then the programme stopped. Restarted with the fourth of class laid down in July 1994. The plan was to build at about one a year to a final total of seven, but the programme has been cancelled without the fourth ship being completed. With a helicopter platform, stern docking facility and davits for four LCVP, the design resembles an LPD. Used mostly for supplying garrisons in offshore islands, and on the Spratley and Pratas islands in the South China Sea. SAM launcher is mounted aft of the foremast. Accommodation is air conditioned. *Hsin Kang* was badly damaged in harbour in collision with a merchant ship in March 1996, but was back in service by mid-1999

HSIN KANG 6/2002, Ships of the World / 0569239

COAST GUARD

Headquarters Appointments

Director General of Maritime Patrol Directorate (Maritime Patrol):
Lin Fu-An

Director General of Coastal Patrol Directorate (Coastal Patrol):
Heh Shiang Tai

Notes: The Taiwan Coast Guard was established on 1 February 2000 by merging the former agencies of Maritime Police, Customs and Coastal Defense Command. It is responsible for the safety and security of Taiwan's coastline and waters. The missions are: coastal and harbour security, maritime law enforcement, anti-smuggling, anti-terrorism, SAR, fishery protection and pollution control. It consists of two major wings. The Maritime Patrol wing has 3,000 personnel in 21 patrol detachments around the coast. The Coastal Patrol wing has 14,701 personnel in four local coastal patrol offices: Northern, Central, Southern and Eastern.

Bases

HQ: Wunshan District, Taipei

2 HO HSING CLASS (OFFSHORE PATROL CRAFT) (WPSO)

HO HSING 101 WEI HSING 102

Displacement, tons: 1,823 full load
Dimensions, feet (metres): 270 × 38.1 × 13.5 (82.3 × 11.6 × 4.1)
Main machinery: 2 MTU 16V 1163 TB93 diesels; 15,470 hp(m) (11.5 MW) sustained; 2 shafts; cp props; bow thruster
Speed, knots: 22
Range, n miles: 6,000 at 16 kt
Complement: 80 (18 officers)
Guns: 1—20 mm, 2—12.7 mm MGs
Radars: Surface search/navigation: Furuno; E/F/I-bands

Comment: Built by the China SB Corporation, Keelung, to a Tacoma design and both delivered 26 December 1991. Four high-speed interceptor boats are carried on individual davits. This is a variant of the US Coast Guard Bear class.

HO HSING 6/2008*, Taiwan Coast Guard / 1353377

1 OFFSHORE PATROL VESSEL (WPSO)

SHUN HU 1

Displacement, tons: 1,126 full load
Dimensions, feet (metres): 193.2 × 31.5 × 12.8 (58.9 × 9.6 × 3.9)
Main machinery: 2 Yanmar T 260-ET diesels; 3,000 hp(m) (2.2 MW); 2 shafts
Speed, knots: 16
Range, n miles: 1,500 at 12 kt
Complement: 25
Radars: To be announced.

Comment: Commissioned in 1992

SHUN HU 1 6/2008*, Taiwan Coast Guard / 1353374

2 OFFSHORE PATROL CRAFT (WPSO)

MOU HSING 105 FU HSING 106

Displacement, tons: 866 full load
Dimensions, feet (metres): 223.1 × 31.5 × 10.5 (68.0 × 9.6 × 3.2)
Main machinery: 2 MTU 16V 1163 TB93 diesels; 15,470 hp(m) (11.5 MW) sustained; 2 shafts
Speed, knots: 28
Range, n miles: 4,500 at 12 kt
Complement: 50
Guns: 2—12.7 mm MGs
Radars: Surface search/navigation: Furuno; E/F/I-bands.

Comment: Ordered from Wilton Fijenoord in September 1986, and commissioned 14 June 1988.

FU HSING 9/2002, C Chung / 0534122

2 OFFSHORE PATROL VESSELS (WPBO)

SHUN HU 2 SHUN HU 3

Displacement, tons: 839 full load
Dimensions, feet (metres): 169.0 × 27.5 × 12.1 (51.5 × 8.4 × 3.7)
Main machinery: 1 DAIHATSU 6DLM-32F diesel; 2,500 hp(m) (1.8 MW); 1 shaft
Speed, knots: 16. **Range, n miles:** 10,000 at 12 kt
Complement: 22
Radars: To be announced

Comment: Commissioned in 1992

Complement: 7
Guns: 2—9 mm T75
Radars: Surface search: Furuno; I-band.

Comment: Transferred to Customs on 28 December 2000.

HAI YING CLASS 12/2000, Taiwan Customs 0114555

Tanzania

Country Overview

The United Republic of Tanzania was formed by the federation of the former British protectorates of Tanganyika and Zanzibar in 1984. It also includes Pemba, Mafia and other offshore islands. Situated in south-eastern Africa, it has a total area of 364,900 square miles and is bordered to the north by Uganda and Kenya, to the west by Rwanda, Burundi, Democratic Republic of Congo and Zambia and to the south by Mozambique and Malawi. It has a 767 n mile coastline with the Indian Ocean. The country also includes parts of Lake Tanganyika, Lake Victoria and Lake Malawi. Dodoma is the capital while the former capital, Dar es Salaam, is the largest city and principal port. Territorial seas (12 n miles) are claimed. A 200 n mile EEZ has also been

claimed but the limits are not fully defined by boundary agreements.

Headquarters Appointments

Chief of Naval Operations:
 Brigadier General Said Omar

General

The Tanzanian People's Defence Force includes the Army, Air Defence Command and a naval wing. There is a small Coastguard Service (KMKM), based on Zanzibar, which uses small boats for anti-smuggling patrols.

Personnel

(a) 2009: 1,050 (including Zanzibar)
 (b) Voluntary service

Coast Defence

85 mm mobile gun battery.

Bases

Dar Es Salaam, Zanzibar, Mtwara, Kigoma (Lake Tanganyika) and Mwanza (Lake Victoria).

PATROL FORCES

Notes: The Police have four Yulin class patrol boats which are probably non-operational.

2 SHANGHAI II CLASS (FAST ATTACK CRAFT—GUN) (PB)

MZIZI P 67 MZIA P 68

Displacement, tons: 134 full load
Dimensions, feet (metres): 127.3 x 17.7 x 5.6 (38.8 x 5.4 x 1.7)
Main machinery: 2 Type L12-180 diesels; 2,400 hp(m) (1.76 MW, (forward); 2 Type 12-D-6 diesels; 1,820 hp(m) (1.34 MW) (aft); 4 shafts
Speed, knots: 30. **Range, n miles:** 700 at 16.5 kt
Complement: 38
Guns: 4—37 mm/63 (2 twin). 4—25 mm/80 (2 twin).
Radars: Surface search: Skin Head; E/F-band.

Comment: Two transferred from China in June 1992. Based at Dar Es Salaam

MZIZI 11/2005, Rob Cabo / 1151073

2 HUCHUAN CLASS (FAST ATTACK CRAFT—TORPEDO) (PTK)

P 43-44

Displacement, tons: 39 standard; 45.8 full load
Dimensions, feet (metres): 71.5 x 20.7 oa x 11.8 (hullborne) (21.8 x 6.3 x 3.6)
Main machinery: 3 Type M 50 diesels; 3,300 hp(m) (2.4 MW); sustained; 3 shafts
Speed, knots: 50. **Range, n miles:** 500 at 30 kt
Complement: 16
Guns: 4—14.5 mm (2 twin) MGs.
Torpedoes: 2—21 in (533 mm) tubes
Radars: Surface search: Skin Head; E/F-band

Comment: Four transferred from the People's Republic of China 1975. After a major effort in 1992, were all operational and reported to be in good condition but by 1998 two had been laid up. Present operational status is unclear but one at least appears to have had torpedo tubes removed. Based at Dar Es Salaam.

HUCHUAN 6/2003, 058, / 794

2 PROTECTOR CLASS (PATROL CRAFT) (PB)

NGUNGURI (ex-Vincant) P 19 MAMBA (ex-Vigilant) P 20

Displacement, tons: 100 full load
Dimensions, feet (metres): 84.3 x 20.3 x 5.6 (25.7 x 6.2 x 1.7)
Main machinery: 2 Paxman diesels; 2,880 hp (2.15 MW); 2 shafts. 1 Perkins diesel; 200 hp (150 kW); 1 waterjet
Speed, knots: 25
Complement: 4
Radars: Navigation: 2 Decca; I-band.

Comment: Both built for UK Customs by FBM Marine in 1998 (ex-Vigilant) and 1993 (ex-Vincant). Subsequently sold to Damen Shipyards, Netherlands, in September 2004. Following refit, entered Tanzanian service in 2005. Based at Dar Es Salaam.

NGUNGURI 11/2005, Rob Cabo / 1151081

SUBMARINES

Notes: Acquisition of a submarine force remains a high priority but funding difficulties continue to frustrate plans.

AIRCRAFT CARRIERS

1 CHAKRI NARUEBET CLASS (CVM)

Name	No	Builders	Laid down	Launched	Commissioned
CHAKRI NARUEBET	911	Bazán, Ferrol	12 July 1994	20 Jan 1996	27 Mar 1997

Displacement, tons: 11,485 full load
Dimensions, feet (metres): 599.1 oa; 538.4 wl > 100.1 oa;
 73.8 wl × 20.3 (182.6; 164.1 × 30.5, 22.5 × 6.2)
Flight deck, feet (metres): 572.8 × 90.2 (174.6 × 27.5)
Main machinery: CODLOG; 2 GE LM 2500 gas turbines;
 44,250 hp (33 MW) sustained; 2 MTU 16V 1163 TB83
 diesels; 11,780 hp(m) (8.67 MW); 2 shafts; LIPS cp props
Speed, knots: 28; 16 (diesels) **Range, n miles:** 10,000 at 12 kt
Complement: 455 (62 officers) plus 146 aircrew plus
 4 (Royal family)

Missiles: SAM: 1 Mk 41 LCHR 8 cell VLS launcher (fitted for
 but not with) ●
 3 Matra Sadral sextuple launchers for Mistral ●,
 IR homing to 4 km (2.2 n miles); warhead 3 kg.
Guns: 2 30 mm. To be fitted
Combat data systems: Tritan derivative with Unisys UYK-3
 and 20 computers.
Radars: Air search: Hughes SPS-52C ●, E/F-band.
 Surface search: SPS-64 ●, I-band. To be fitted.
 Fire control, to be fitted.

Navigation: Kelvin Hughes; I-band
Aircraft control: Kelvin Hughes, E/F-band.
 Tacan: URN 25.

Fixed-wing aircraft: 6 AV-8S Matador (Harrier)
Helicopters: 6 S-708-7 Seahawk; Chinook capable

Programmes: An initial contract for a 7,800 ton vessel
 with Bremer Vulcan was cancelled on 22 July 1991
 and replaced on 27 March 1992 with a government
 to government contract for a larger ship to be built
 by Bazán. Fabrication started in October 1993. Sea
 trials conducted from November 1996 to January 1997
 followed by an aviation work-up at Rota from April 1997.
 The ship arrived in Thailand on 10 August 1997.

Structure: Similar to Spanish *Principe de Asturias*. 12' ski
 jump and two 20 ton aircraft lifts. Provision made to fit a
 Mk 41 VLS launcher, a surface search radar, EW systems,
 a hull mounted sonar and CIWS. Matra Sadral fitted in
 2001. Hangar can take up 10 Sea Harrier or Seahawk
 aircraft.

Operational: Main tasks are SAR co-ordination and
 EEZ surveillance. Secondary role is air support for all
 maritime operations. Due to funding shortages, the
 ship rarely goes to sea and fixed-wing flying has been
 conducted from shore bases.

FRIGATES

Notes: It was announced on 22 July 2003 that two frigates were to be procured from the UK. These were likely to be based on the design of those acquired by the Royal Malaysian Navy. This programme is likely to have been superseded by plans to acquire offshore patrol vessels for which UK shipbuilder BVT Surface Fleet is reported to be a leading, but not the only, contender.

2 NARESUAN CLASS (TYPE 25T) (FFGHM)

Name	No	Builders	Laid down	Launched	Commissioned
NARESUAN	421 (ex-621)	Zhonghua SY, Shanghai	Feb 1992	24 July 1993	15 Dec 1994
TAKSIN	422 (ex-622)	Zhonghua SY, Shanghai	Nov 1992	14 May 1994	28 Sep 1995

Displacement, tons: 2,500 standard; 2,980 full load
Dimensions, feet (metres): 393.7 × 42.7 × 12.5
 (120 × 13 × 3.8)

Main machinery: CODOG; 2 GE LM 2500 gas turbines, 44,250 hp (33 MW) sustained; 2 MTU 20 V 1163 TB83 diesels; 11,780 hp (m) (8.67 MW) sustained, 2 shafts; LIPS cp props

Speed, knots: 32

Range, n miles: 4,000 at 18 kt

Complement: 150

Missiles: SSM: 8 McDonnell Douglas Harpoon (2 quad) launchers; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.

SAM: Mk 41 LCHR 8 cell VLS launcher; Sea Sparrow RIM-7M, semi-active radar homing to 16 km (8.5 n miles) at 2.5 Mach; warhead 38 kg (fitted for but not with).

Guns: 1 FMC 5 in (127 mm)/54 Mk 45 Mod 2; 20 rds/min to 23 km (12.6 n miles); weight of shell 32 kg.
 4 China 37 mm/76 (2 twin) H/PJ 76 A; 180 rds/min to 8.5 km (4.6 n miles) anti-aircraft; weight of shell 1.42 kg

Torpedoes: 6—324 mm Mk 32 Mod 5 (2 triple) tubes; Honeywell Mk 46; active/passive homing to 11 km (5.9 n miles); at 40 kt, warhead 44 kg.

Countermeasures: Decoys: 4 China Type 945 GPJ 26-barrelled launchers; chaff and IR.

ESM/ECM: Elettronica Newton Beta EW System; intercept and jammer.

Weapons control: 1 JM-83H Optical Director

Radars: Air search: Signaal LW08; D-band.

Surface search: China Type 360; E/F-band.

Navigation: 2 Raytheon SPS-64(V)5; I-band.

Fire control: 2 Signaal STIR; I/J/K-band (for SSM and 127 mm). After one to be fitted.
 China 374 G (for 37 mm).

Sonars: China SJD-7; hull-mounted; active search and attack; medium frequency.

Helicopters: 1 Super Lynx in due course or 1 Sikorsky S-70B-7 Seahawk.

Programmes: Contract signed 21 September 1989 for construction of two ships by the China State SB

NARESUAN

(Scale 1 : 1,200), Ian Sturton 0543398

TAKSIN

8/2005, Chris Sattler / 1153917

Corporation (CSSC) with delivery in 1994. US and European weapon systems were fitted as funds became available. The first ship sailed for Bangkok without most weapon systems in January 1995 with the second following in October 1995.

Structure: Jointly designed by the Royal Thai Navy and China State Shipbuilding Corporation (CSSC). This is a design incorporating much Western machinery and

equipment and provides enhanced capabilities by comparison with the four Type 053 class. The anti-aircraft guns are Breda 40 mm types with 37 mm ammunition and they are controlled by a Chinese RTN-20 Dardo tracker.

Operational: Naresuan acted as one of the escorts for the aircraft carrier during her aviation work-up in Spanish waters in 1997.

4 CHAO PHRAYA CLASS (TYPES 053 HT AND 053 HT (H)) (FFG/FFGH)

Name	No	Builders	Laid down	Launched	Commissioned
CHAO PHRAYA	455	Hudong SY, Shanghai	1989	24 June 1990	5 Apr 1991
BANGPAKONG	456	Hudong SY, Shanghai	1989	25 July 1990	20 July 1991
KRABURI	457	Hudong SY, Shanghai	1990	28 Dec 1990	16 Jan 1992
SAIBURI	458	Hudong SY, Shanghai	1990	27 Aug 1991	4 Aug 1992

Displacement, tons: 1,676 standard; 1,924 full load
Dimensions, feet (metres): 338.5 x 37.1 x 10.2
 (103.2 x 11.3 x 3.1)
Main machinery: 4 MTU 20V 1163 TB83 diesels; 29,440 hp(m) (21.6 MW) sustained; 2 shafts; LIPS cp props
Speed, knots: 30
Range, n miles: 3,500 at 18 kt
Complement: 168 (22 officers)

Missiles: SSM 8 Ying Ji (Eagle Strike) (C-801) ●, active radar/IR homing to 85 km (45.9 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer This is the extended range version.
SAM 1 HQ-61 launcher for PL-9 or Matra Sadral for Mistral to be fitted
Guns: 2 (457 and 458) or 4 China 100 mm/56 (1 or 2 twin) ● 25 rds/min to 22 km (12 n miles); weight of shell 15.9 kg. 8 China 37 mm/76 (4 twin) H/PJ 76 A ●, 180 rds/min to 8.5 km (4.6 n miles) anti-aircraft; weight of shell 1.42 kg.
A/S mortars: 2 RBU 1200 (China Type 86) 5-tubed fixed launchers ●; range 1,200 m.
Depth charges: 2 BMB racks.
Countermeasures: Decoys: 2 China Type 945 GPJ 26-barrelled chaff launchers
ESM China Type 923(1), intercept.
ECM China Type 981(3); jammer
Combat data systems: China Type ZKJ-3 or STN Atlas mini COSYS action data automation being fitted
Radars: Air/surface search: China Type 354 Eye Shield ●, G-band
 Surface search/fire control: China Type 352C Square Tie ●, I-band (for SSM)
 Fire control: China Type 343 Sun Visor ●, I-band (for 100 mm) China Type 341 Rice Lamp ●, I-band (for 37 mm).
Navigation: Racal Decca 1290 A/D ARPA and Anritsu RA 71CA ●, I band.
IFF: Type 651
Sonars: China Type SJD-5A; hull-mounted, active search and attack; medium frequency

CHAO PHRAYA

(Scale 1 : 900), Ian Sturton / DORNDIEP

KRABURI

(Scale 1 : 900), Ian Sturton / DORNDIEP

Helicopters: Platform for 1 Bell 212 (457 and 458) ●
Programmes: Contract signed 18 July 1988 for four modified Jianghu class ships to be built by the China State SB Corporation (CSSC).
Modernisation: A mini COSYS system was acquired for two of the class in 1999
Structure: Thailand would have preferred only the hulls but China insisted on full armament. The first two ships are the Type III variant with 100 mm guns, fore and aft, and the second two are a variation with a helicopter platform

replacing the after 100 mm gun German communication equipment fitted. The EW fit is Italian designed.
Operational: On arrival in Thailand each ship was docked to make good poor shipbuilding standards and improve damage control capabilities. The ships are mostly used for rotating monthly to the Coast Guard, and for training, although Kraburi was part of the escort force for the aircraft carrier in Spanish waters in 1997. Kraburi damaged by the tsunami on 26 December 2004 but had been restored to operational service by February 2005.

BANGPAKONG

10/2002, John Mortimer / 0529998

SAIBURI

6/2008, Ships of the World / 1353389

2 KNOX CLASS (FFGHM)

Name	No	Builders	Laid down	Launched	Commissioned
PHUTTHA YOTFA CHULALOK (ex-Truett)	461 (ex-FF 1095)	Avondale Shipyards	27 Apr 1972	3 Feb 1973	1 June 1974
PHUTTHA LOETLA NAPHALAI (ex-Quellet)	462 (ex-FF 1077)	Avondale Shipyards	15 Jan 1969	17 Jan 1970	12 Dec 1970

Displacement, tons: 3,011 standard, 4,260 full load
Dimensions, feet (metres): 439.8 x 46.8 x 15; 24.8 (sonar) (134 x 14.3 x 4.6; 7.8)
Main machinery: 2 Combustion Engineering/Babcock & Wilcox boilers; 1,200 psi (84.4 kg/cm²); 950°F (510°C); 1 turbine; 36,000 hp (26 MW); 1 shaft
Speed, knots: 27. **Range, n miles:** 4,000 at 22 kt on 1 boiler
Complement: 288 (17 officers)

Missiles: SSM 8 McDonnell Douglas Harpoon, active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg

AS: Honeywell ASROC Mk 16 octuple launcher with reload system (has 2 starboard cells modified to fire Harpoon); inertial guidance to 1.6-10 km (1-5.4 n miles); payload Mk 46.

Guns: 1 FMC 5 in (127 mm)/54 Mk 42 Mod 9; 20-40 rds/min to 24 km (13 n miles) anti-surface; 14 km (7.7 n miles) anti-aircraft; weight of shell 32 kg.

1 General Electric/General Dynamics 20 mm/76 6-barrelled Mk 15 Vulcan Phalanx; 3,000 rds/min combined to 1.5 km.

Torpedoes: 4=324 mm Mk 32 (2 twin) fixed tubes; 22 Honeywell Mk 46; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

Countermeasures: Decoys: 2 Loral Hycor SRBOC 6-barrelled fixed Mk 36; IR flares and chaff to 4 km (2.2 n miles). T Mk-6 Fanfare/SLQ-25 Nixie; torpedo decoy, Prairie Masker hull and blade rate noise suppression.

ESM/ECM: SLQ-32(V)2; radar warning. Sidetick modification adds jammer and deception system.

Combat data systems: Link 14 receive only.
Weapons control: SWG-1A Harpoon LCS Mk 68 GFCS. Mk 114 ASW FCS Mk 1 target designation system. MMS target acquisition sight (for mines, small craft and low-flying aircraft).

Radars: Air search: Lockheed SPS-40B; B-band; range 320 km (175 n miles).
 Surface search: Raytheon SPS-10 or Norden SPS-67; G-band.
 Navigation: Marconi LN66; I-band.

Fire control: Western Electric SPG-53A/D/F; I/J-band.
 Tacan: SRN 15. IFF: UFX-12

Sonars: EDO/General Electric SQS-26CX, bow-mounted; active search and attack; medium frequency.
 EDO SQR-18(V) TACTASS; passive; low frequency.

PHUTTHA YOTFA CHULALOK

(Scale 1 : 1,200), Ian Sturton / 0543397

PHUTTHA LOETLA NAPHALAI

1/2001, Thai Navy League / 0105841

Helicopters: 1 Bell 212

Structure: Four Mk 32 torpedo tubes are fixed in the midships structure, two to a side, angled out at 45°. The arrangement provides improved loading capability over exposed triple Mk 32 torpedo tubes. A 4,000 lb lightweight anchor is fitted on the port side and an 8,000 lb anchor fits into the after section of the sonar dome.

Programmes: The first ship transferred on five year lease from the USA on 30 July 1994. This was renewed by grant in 1999. The second transferred on lease 27 November 1996 and arrived in Thailand in November 1998.

1 YARROW TYPE (FFH)

Name	No	Builders	Laid down	Launched	Commissioned
MAKUT RAJAKUMARN	433 (ex-7)	Yarrow Shipbuilders	11 Jan 1970	18 Nov 1971	7 May 1973

Displacement, tons: 1,650 standard, 1,900 full load
Dimensions, feet (metres): 320 x 36 x 18.1 (97.6 x 11 x 5.5)

Main machinery: CODOG; 1 RR Olympus TM3B gas turbine; 22,500 hp (16.8 MW) sustained; 1 Crossley-SEMT-Pielstick 12 PC2.2 V 400 diesel; 6,000 hp (4.4 MW) sustained; 2 shafts

Speed, knots: 26 gas; 18 diesel
Range, n miles: 5,000 at 18 kt; 1,200 at 26 kt
Complement: 140 (16 officers)

Guns: 2 Vickers 4.5 in (114 mm)/55 Mk 8; 25 rds/min to 22 km (12 n miles) anti-surface; 6 km (3.3 n miles) anti-aircraft; weight of shell 21 kg

2 Breda 40 mm/70 (twin); 300 rds/min to 12.5 km (6.8 n miles); weight of shell 0.98 kg
 2 Derlikon 20 mm.

Torpedoes: 6 Plessey PMW 49A tubes Mk 46; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg

Depth charges: 1 rack.
Countermeasures: Decoys: 2 Loral Mk 135 chaff launchers
 ESM/ECM: Electronica Newton; intercept and jammer. WLR-1, radar warning

Combat data systems: Signal Sewaco TH.
Radars: Air/surface search: Signaal DA05; E/F-band; range 137 km (75 n miles); for 2 m² target.
 Surface search: Signaal ZW06; I-band.

MAKUT RAJAKUMARN

(Scale 1 : 900), Ian Sturton / 1167964

Fire control: Signaal WM22/61; I/J-band; range 46 km (25 n miles).
 Navigation: Racal Decca; I-band.

Sonars: Atlas Elektronik DSQS-21C; hull-mounted; active search and attack; medium frequency.

Helicopters: A small helicopter can land when the Mortar Mk 10 well is closed

Programmes: Ordered on 21 August 1969
Modernisation: A severe fire in February 1984 resulted in extensive work including replacement of the Olympus

gas turbine, a new ER control room and central electric switchboard. Further modifications included the removal of Seacat SAM system and the installation of new EW equipment in 1993. In 1997 two Bofors 40 mm were fitted on the old Seacat mounting, and torpedo tubes replaced the old Bofors abreast the funnel. The Limbo mortar mountings have been removed.

Operational: The ship is largely automated with a consequent saving in complement, and has been most successful in service. Has lost its Flagship role to one of the Chinese-built frigates and is employed on general duties rather than as a training ship as previously reported.

MAKUT RAJAKUMARN

2/2004, Bob Fildes / 0589813

CORVETTES

2 + (2) PATTANI CLASS (OFFSHORE PATROL VESSELS) (PBOH)

Name	No	Builders	Laid down	Launched	Commissioned
PATTANI	511	Hudong Shipyard, Shanghai	2003	19 Sep 2004	16 Dec 2005
NARATHIWAT	512	Hudong Shipyard, Shanghai	2004	Mar 2005	16 Apr 2006

Displacement, tons: 1,300; 1,440 full load
 Dimensions, feet (metres): 313.3 × 38.0 × 10.2
 (95.5 × 11.6 × 3.1)
 Main machinery: 2 Ruston diesels; 15,660 hp (11.7 MW);
 2 shafts; cp props
 Speed, knots, 25
 Range, n miles: 3,500 at 15 kt
 Complement: 78 (18 officers)

Guns: 1 OTO Melara 3 in (76 mm)/62 ①; 85 rds/min to 16 km
 (8.6 n miles) 2—20 mm.
 Combat data systems: COSYS
 Weapons control: Optronic director combined with TMX.
 Radars: Air/surface search: Alenia Marconi SPS 791
 (RAN-30X/I) ②; I-band.
 Surface search ③: To be announced
 Fire control: Oerlikon/Contraves TMX ④; I/J-band.
 Navigation: I-band.

PATTANI

(Scale 1 : 900), Ian Sturton / 1353390

Helicopters: Platform for one medium.

Programmes: The contract for two Offshore Patrol Vessels was signed with China Shipbuilding Trading Company on 20 December 2002. A further two vessels are projected

Structure: Space and weight provision for the addition of eight SSM, CIWS (probably Matra Sadral) and ASW capabilities at a later date

Operational: *Pattani* arrived at Sattahip on 16 December 2005. *Narathiwat* followed on 4 May 2006.

PATTANI

10/2008, Michael Nitz / 1353392

NARATHIWAT

3/2007, Thai Navy League / 1353393

2 RATTANAKOSIN CLASS (FSGM)

Name	No	Builders	Laid down	Launched	Commissioned
RATTANAKOSIN	441 (ex-1)	Tacoma Boatbuilders, WA	6 Feb 1984	11 Mar 1986	26 Sep 1986
SUKHOTHAJ	442 (ex-2)	Tacoma Boatbuilders, WA	26 Mar 1984	20 July 1986	10 June 1987

Displacement, tons: 960 full load
Dimensions, feet (metres): 252 x 31.5 x 8
(76.8 x 9.6 x 2.4)

Main machinery: 2 MTU 20V 1163T883 diesels; 14,730 hp (m)

(10.83 MW) sustained; 2 shafts, Kamewa cp props

Speed, knots: 26. Range, n miles: 3,000 at 18 kt

Complement: 87 (15 officers) plus Flag Staff

Missiles: SSM: 8 McDonnell Douglas Harpoon (2 quad launchers) ●; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg (84A) or 258 kg (84B/C).

SAM: Selenia Elsig Albatros octuple launcher ●; 24 Aspide, semi-active radar homing to 13 km (7 n miles) at 2.6 Mach, height envelope 15-5,000 m (49.2-16,405 ft); warhead 30 kg.

Guns: 1 OTO Melara 3 in (76 mm)/62 ●; 60 rds/min to 16 km (8.7 n miles); weight of shell 6 kg.

2 Breda 40 mm/70 (twin) ●; 300 rds/min to 12.5 km (6.8 n miles); weight of shell 0.96 kg.

2 Rheinmetall 20 mm ●

Torpedoes: 6-324 mm US Mk 32 (2 triple tubes) ● MUSL Stingray; active/passive homing to 11 km (5.9 n miles) at 45 kt; warhead 35 kg (shaped charge); depth to 750 m (2,460 ft)

Countermasures: Decoys: CSEE Dagaie 6- or 10-tubed trainable, IR flares and chaff; H- to J-band.

ESM: Electronica; intercept.

Weapons control: Signaal Sewaco TH action data automation. Lirod 8 optronic director ●.

RATTANAKOSIN

(Scale 1 : 600), Ian Sturton / 0506173

Radars: Air/surface search: Signaal DA05 ●; E/F-band; range 137 km (75 n miles) for 2 m² target.

Surface search: Signaal ZW06 ●; I-band.

Navigation: Decca 1226, I-band

Fire control: Signaal WM25/41 ●; UJ-band; range 48 km (25 n miles)

Sonars: Atlas Elektronik DSQS-21C; hull-mounted, active search and attack; medium frequency

Programmes: Contract signed with Tacoma on 9 May 1983. Intentions to build a third were overtaken by the Vosper corvettes.

Structure: There are some similarities with the missile corvettes built for Saudi Arabia five years earlier. Space for Phalanx aft of the Harpoon launchers, but there are no plans to fit.

SUKHOTHAJ

7/2008*, John Mortimer / 1353394

3 KHAMRONSIN CLASS (FS)

Name	No	Builders	Laid down	Launched	Commissioned
KHAMRONSIN	531 (ex-1)	Ital/Thai Marine, Bangkok	15 Mar 1988	15 Aug 1989	29 July 1992
THAYANCHON	532 (ex-2)	Ital/Thai Marine, Bangkok	20 Apr 1988	7 Dec 1989	5 Sep 1992
LONGLOM	533 (ex-3)	Bangkok Naval Dockyard	15 Mar 1988	8 Aug 1989	2 Oct 1992

Displacement, tons: 630 full load

Dimensions, feet (metres): 203.4 oa, 186 wl x 26.9 x 8.2
(62, 56.7 x 8.2 x 2.5)

Main machinery: 2 MTU 12V 1163 TB93; 9,980 hp (m)

(7.34 MW) sustained; 2 Kamewa cp props

Speed, knots: 25. Range, n miles: 2,500 at 15 kt

Complement: 57 (6 officers)

Guns: 1 OTO Melara 76 mm/62 Mod 7 ●; 60 rds/min to 16 km (8.7 n miles); weight of shell 6 kg.

2 Breda 30 mm/70 (twin) ●; 800 rds/min to 12.5 km (6.8 n miles); weight of shell 0.37 kg

2-12.7 mm MGs

Torpedoes: 6 Plessey PMW 49A (2 triple launchers) ●; MUSL Stingray; active/passive homing to 11 km (5.9 n miles) at 45 kt; warhead 35 kg shaped charge

Combat data systems: Plessey Nautis P action data automation

Weapons control: British Aerospace Sea Archer 1A Mod 2 optronic GFCS ●

Radars: Air/surface search: Plessey AWS 4 ●; E/F-band. Navigation: Racal Decca 1226; I-band.

KHAMRONSIN

(Scale 1 : 600), Ian Sturton / 0577649

Sonars: Atlas Elektronik DSQS-21C; hull-mounted; active search and attack; medium frequency.

Programmes: Contract signed on 29 September 1987 with Ital Thai Marine of Bangkok for the construction of two ASW corvettes and for technical assistance with a third to be built in Bangkok Naval Dockyard. A fourth of the class with a different superstructure

and less armament was ordered by the Police in September 1989

Structure: The vessels are based on a Vosper Thornycroft Province class 56 m design stretched by increasing the frame spacing along the whole length of the hull. Depth charge racks and mine rails may be added.

THAYANCHON

12/2007, Michael Nitz / 1353395

2 TAPI (PF 103) CLASS (FS)

Name	No	Builders	Laid down	Launched	Commissioned
TAPI	431 (ex-5)	American SB Co, Toledo, OH	1 July 1970	17 Oct 1970	19 Nov 1971
KHIRIRAT	432 (ex-6)	Norfolk SB & DD Co	18 Feb 1972	2 June 1973	10 Aug 1974

Displacement, tons: 885 standard; 1,172 full load
Dimensions, feet (metres): 275 × 33 × 10, 14.1 (sonar)
 (83.8 × 10 × 3; 4.3)
Main machinery: 2 Fairbanks-Morse 38TD8-1/B-9 diesels,
 5,250 hp (3.9 MW) sustained; 2 shafts
Speed, knots: 20
Range, n miles: 2,400 at 18 kt
Complement: 135 (15 officers)

Guns: 1 OTO Melara 3 in (76 mm)/62 compact ①; 85 rds/min to 16 km (8.7 n miles) anti-surface; 12 km (6.6 n miles) anti-aircraft; weight of shell 6 kg.
 1 Bofors 40 mm/70 ②; 300 rds/min to 12.5 km (6.8 n miles); weight of shell 0.96 kg.
 2 Oerlikon 20 mm ③; 2—12.7 mm MGs.
Torpedoes: 6—324 mm US Mk 32 (2 triple) tubes ④.
 Honeywell Mk 46; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.
Depth charges: 1 rack.
Combat data systems: Signaal Sewaco TH.
Radars: Air/surface search: Signaal LW04 ⑤; D-band; range 137 km (75 n miles) for 2 m² target
 Surface search: Raytheon SPS-53E ⑥; I-band.

TAPI

(Scale 1 : 900), Ian Sturton / 0506109

Fire control: Signaal WM22-81 ⑦; I/J-band; range 46 km (25 n miles).
 IFF UPX-23
Sonars: Atlas Elektronik DSQS-21C; hull-mounted; active search and attack; medium frequency.

Programmes: TAPI was ordered on 27 June 1969. KHIRIRAT was ordered on 25 June 1971.

Modernisation: TAPI completed 1983 and KHIRIRAT in 1987. This included new gunnery and radars and a slight heightening of the funnel. Further modernisation in 1988–89 mainly to external and internal communications.
Structure: Of similar design to the Iranian ships of the Bayandor class.

Operational: Used for EEZ patrols

TAPI

6/2001, Royal Thai Navy / 0130171

SHIPBORNE AIRCRAFT

Numbers/Type: 4 Bell 214 ST.
Operational speed: 120 kt (228 km/h).
Service ceiling: 13,200 ft (4,025 m).
Range: 400 n miles (740 km).
Role/Weapon systems: Procured in 1987 for maritime surveillance and utility roles.

BELL 214

6/2004, Royal Thai Navy / 1044195

Numbers/Type: 7/2 BAe/McDonnell Douglas AV-8A (Harrier)/TAV-8A (Harrier).
Operational speed: 640 kt (1,186 km/h).
Service ceiling: 51,200 ft (15,600 m).
Range: 800 n miles (1,480 km).
Role/Weapon systems: AV-8S supplied via USA to Spain and transferred in 1996. Sensors: None. Weapons: Strike, two 30 mm Aden cannon, two AIM-9 Sidewinder or 20 mm/127 mm rockets and 'iron' bombs

HARRIER

1/2001, Thai Navy League / 0130153

Numbers/Type: 2 AgustaWestland Super Lynx 300.
Operational speed: 125 kt (231 km/h).
Service ceiling: 12,000 ft (3,660 m).
Range: 340 n miles (630 km).
Role/Weapon systems: Two helicopters ordered 7 August 2001 for ASW, ASV and surveillance roles. Delivered in 2005.

SUPER LYNX

9/2004, AgustaWestland / 0556704

Numbers/Type: 6 Sikorsky S-70B7 Seahawk.
Operational speed: 135 kt (250 km/h).
Service ceiling: 10,000 ft (3,050 m).
Range: 600 n miles (1,110 km).
Role/Weapon systems: Multimission helicopters delivered by June 1997. Plans to acquire ASW equipment have been abandoned. Sensors: Telephonics APS-143(V)3 radar; ASN 150 databus; provision for sonobuoys and dipping sonar; ALR 606(V)2 ESM. Weapons: Provision for ASM and MUSL Stingray torpedoes.

SEAHAWK

7/2005, Thai Navy League / 1153913

Numbers/Type: 4 Bell 212.
Operational speed: 100 kt (185 km/h).
Service ceiling: 13,200 ft (4,025 m).
Range: 200 n miles (370 km).

Role/Weapon systems: Commando assault and general support. At least two transferred from Army. May be sold to help pay for new shipborne helicopter. Mostly based ashore but operate from Normed class and frigates. Weapons: Pintle-mounted M60 machine guns.

BELL 212 6/2000, Thai Navy League / 0105847

Numbers/Type: 3/2 Fokker F27 Maritime 200ME/F27 Maritime 400M
Operational speed: 250 kt (463 km/h).
Service ceiling: 25,000 ft (7,620 m).
Range: 2,700 n miles (5,000 km).

Role/Weapon systems: Increased coastal surveillance and response is provided, including ASW and ASV action by 200ME. 400M is for transport. Sensors: APS-604 search radar, Bendix weather radar, ESM and MAD equipment. Weapons: ASW; four Mk 46 or Stingray torpedoes or depth bombs or mines. ASV; two Harpoon ASM

FOKKER 400 1994, Royal Thai Navy / 0053452

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Notes: There are also five Cessna Bird Dog light reconnaissance aircraft, 9 Cessna Skywagon and two UH-1H helicopters.

Numbers/Type: 4 Sikorsky S-76B.
Operational speed: 145 kt (269 km/h).
Service ceiling: 6,500 ft (1,980 m).
Range: 357 n miles (661 km).

Role/Weapon systems: Six originally acquired in 1996 for maritime surveillance and utility purposes. Sensors: Weather radar. Weapons: Unarmed.

S-76 8/1996, Royal Thai Navy / 0050241

Numbers/Type: 5 GAF N24A Searchmaster B (Nomad).
Operational speed: 168 kt (311 km/h).
Service ceiling: 21,000 ft (6,400 m).
Range: 730 n miles (1,352 km).

Role/Weapon systems: Short-range MR for EEZ protection and anti-smuggling operations. Sensors: Search radar, cameras. Weapons: Unarmed

NOMAD (US colours) 2/2004, ASTA / 0010167

Numbers/Type: 6 Dornier 228.
Operational speed: 200 kt (370 km/h).
Service ceiling: 28,000 ft (8,535 m).
Range: 940 n miles (1,740 km).

Role/Weapon systems: Coastal surveillance and EEZ protection. Three acquired in 1991, three more in 1996. Sensors: APS-128/504 search radar

DORNIER 228 6/1996, Royal Thai Navy / 0019267

Numbers/Type: 2/1 Lockheed P-3T Orion/UP-3T Orion.
Operational speed: 411 kt (761 km/h).
Service ceiling: 28,300 ft (8,625 m).
Range: 4,000 n miles (7,410 km).

Role/Weapon systems: Delivered in 1996. Two for ASW and one utility. Two more are required. Sensors: APS-116 radar, ECM/ESM. Weapons: ASW; Mk 46 or Stingray torpedoes. ASV; four Harpoon.

ORION 8/1997, Royal Thai Navy / 0019261

Numbers/Type: 2 Canadair CL-215.
Operational speed: 206 kt (382 km/h).
Service ceiling: 10,000 ft (3,050 m).
Range: 1,125 n miles (2,085 km).

Role/Weapon systems: Used for general purpose transport, SAR and fire-fighting.

CL-215 1993, Royal Thai Navy / 0053453

Numbers/Type: 13/4 Vought A-7E Corsair II/TA-7E Corsair II.
Operational speed: 600 kt (1,112 km/h).
Service ceiling: 50,000 ft (15,240 m).
Range: 2,000 n miles (3,705 km).

Role/Weapon systems: Delivered in 1996-97 from the US. Reconditioning programme in progress 2004. Weapons: AIM-9L Sidewinder; 1-20 mm cannon.

CORSAIR II 8/1996, Royal Thai Navy / 0053451

Numbers/Type: 7/2 Summit T-337SP/T-337G.
Operational speed: 200 kt (364 km/h).
Service ceiling: 20,000 ft (6,100 m).
Range: 900 n miles (1,650 km).

Role/Weapon systems: Maritime surveillance and targeting. Weapons: LAU 32 and 59A rocket launchers, CBU-14 bomblets and 12.7 mm MG

PATROL FORCES

3 HUA HIN CLASS (PSO)

Name	No	Builders	Laid down	Launched	Commissioned
HUA HIN	541	Asimar, Samut Prakarn	Mar 1997	3 Mar 1999	25 Mar 2000
KLAENG	542	Asimar, Samut Prakarn	May 1997	19 Apr 1999	17 Jan 2001
SI RACHA	543	Bangkok Naval Dockyard	Dec 1997	6 Sep 1999	17 Jan 2001

Displacement, tons: 645 full load
Dimensions, feet (metres): 203.4 × 29.2 × 8.9
 (62 × 8.9 × 2.7)
Main machinery: 3 Paxman 12VP 185 diesels; 10,372 hp(m)
 (7.63 MW) sustained; 3 shafts; 1 LIPS cp prop (centreline)
Speed, knots: 25. **Range, n miles:** 2,500 at 15 kt
Complement: 45 (11 officers)

Guns: 1—3 in (76 mm)/50 Mk 22 ●, 50 rds/min to 12 km
 (6.5 n miles); weight of shell 6 kg.
 1 Bofors 40 mm/60 ●, 2 Oerlikon 20 mm GAM-BO1 ●
 2—12.7 mm MGs.

Weapons control: Optronic director ●.
Radars: Surface search: Sperry Rascar ●, E/F-band.
Navigation: Sperry Apar; I-band.

Programmes: Ordered in September 1996 from Asian Marine. Delayed and reported cancelled by the Thai Navy

HUA HIN

(Scale 1 : 600), Ian Sturton / 0587563

In late 1997 but, despite being beset by building delays, all three ships had entered service by 2001.

Modernisation: Due to budgetary constraints, older weapon systems have been installed as a temporary measure.

A new 76 mm/62 gun and 40 mm/70 are planned to be fitted.

Structure: Derived from the Khamronsin design.

KLAENG

6/2001, Royal Thai Navy / 0130174

3 RATCHARIT CLASS (FAST ATTACK CRAFT—MISSILE) (PGGF)

Name	No	Builders	Commissioned
RATCHARIT	321 (ex-4)	CN Breda (Venezia)	10 Aug 1979
WITTHAYAKHOM	322 (ex-5)	CN Breda (Venezia)	12 Nov 1979
UDOMDET	323 (ex-6)	CN Breda (Venezia)	21 Feb 1980

Displacement, tons: 235 standard; 270 full load
Dimensions, feet (metres): 163.4 × 24.6 × 7.5 (49.8 × 7.5 × 2.3)
Main machinery: 3 MTU MD 20V 538 TB91 diesels; 11,520 hp(m) (8.47 MW) sustained,
 3 shafts; Kamewa cp props
Speed, knots: 37
Range, n miles: 2,000 at 15 kt
Complement: 45 (7 officers)

Missiles: SSM: 4 Aerospatiale MM 38 Exocet; inertial cruise; active radar homing to 42 km
 (23 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.

Guns: 1 OTD Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.7 n miles)
 anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg.
 1 Bofors 40 mm/70; 300 rds/min to 12.5 km (6.8 n miles); weight of shell 0.96 kg.
 2—12.7 mm MGs.

Countermeasures: ESM: Racal RDL-2; intercept

Radars: Surface search: Decca; I-band.

Fire control: Signaal WM25; I/J-band; range 46 km (25 n miles).

Programmes: Ordered June 1976. *Ratcharit* launched 30 July 1976, *Witthayakhom*
 2 September 1976 and *Udomdet* 28 September 1976.

Structure: Standard Breda BMB 230 design.

WITTHAYAKHOM

6/2007, Thai Navy League / 116/917

3 PRABPARAPAK CLASS (FAST ATTACK CRAFT—MISSILE) (PTFG)

Name	No	Builders	Commissioned
PRABPARAPAK	311 (ex-1)	Singapore SBEC	28 July 1976
HANHAQ SATTRU	312 (ex-2)	Singapore SBEC	6 Nov 1976
SUPHAIRIN	313 (ex-3)	Singapore SBEC	1 Feb 1977

Displacement, tons: 224 standard; 268 full load
Dimensions, feet (metres): 149 × 24.3 × 7.5 (45.4 × 7.4 × 2.3)
Main machinery: 4 MTU 16V 538 TB92 diesels; 13,640 hp(m) (10 MW) sustained; 4 shafts
Speed, knots: 40
Range, n miles: 2,000 at 15 kt; 750 at 37 kt
Complement: 41 (5 officers)

Missiles: SSM: 5 IAI Gabriel I (1 triple, 2 single) launchers; radar or optical guidance; semi-
 active radar homing to 20 km (10.8 n miles) at 0.7 Mach; warhead 75 kg.

Guns: 1 Bofors 57 mm/70; 200 rds/min to 17 km (9.3 n miles); weight of shell 2.4 kg.
 8 rocket illuminant launchers on either side of 57 mm gun.

1 Bofors 40 mm/70; 300 rds/min to 12 km (6.8 n miles); weight of shell 0.96 kg.

Countermeasures: ESM: Racal RDL-2; intercept.

Radars: Surface search: Kelvin Hughes Type 17; I-band.

Fire control: Signaal WM28/5 series; I/J-band.

Programmes: Ordered June 1973. Built under licence from Lürssen. Launch dates:
Prabparapak 29 July 1975, *Hanhak Sattru* 28 October 1975, *Suphairin* 20 February 1976.

Modernisation: There are plans to replace Gabriel possibly by RBS 15.

Structure: Same design as Lürssen standard 45 m class built for Singapore. Normally only
 three Gabriel SSM are carried.

PRABPARAPAK

6/2001, Royal Thai Navy / 0130172

3 CHON BURI CLASS (FAST ATTACK CRAFT—GUN) (PG)

Name	No	Builders	Commissioned
CHON BURI	331 (ex-1)	CN Breda (Venezia) Mestre	22 Feb 1983
SONGKHLA	332 (ex-2)	CN Breda (Venezia) Mestre	15 July 1983
PHUKET	333 (ex-3)	CN Breda (Venezia) Mestre	13 Jan 1984

Displacement, tons: 450 full load
Dimensions, feet (metres): 198 × 29 × 15 (60.4 × 8.8 × 4.5)
Main machinery: 3 MTU 20V 538TB92 diesels; 12,795 hp(m) (9.4 MW) sustained; 3 shafts, cp props
Speed, knots: 30
Range, n miles: 2,500 at 18 kt; 900 at 30 kt
Complement: 41 (6 officers)
Guns: 2 OTO Melara 3 in (76 mm)/62; 85 rds/min to 16 km (8.7 n miles); weight of shell 6 kg, 2 Breda 40 mm/70 (twin).
Countermeasures: Decoys, 4 Hycor Mk 135 chaff launchers.
ESM: Elettronica Newton; intercept
Weapons control: Signaal Lirod 8 optronic director.
Radars: Surface search: Signaal ZW06; I-band.
Fire control: Signaal WM22/61; VJ-band; range 46 km (25 n miles).

Comment: Ordered in 1979 (first pair) and 1981. Laid down – *Chon Buri* 15 August 1981 (launched 29 November 1982), *Songkhla* 15 September 1981 (launched 6 September 1982), *Phuket* 15 December 1981 (launched 3 February 1983). Steel hulls, alloy superstructure. Can be adapted to carry SSMs.

PHUKET

10/2001, Chris Sattler / 0130157

CHON BURI

9/2003, Hartmut Ehlers / 0572642

6 SATTAHIP (PSMM MK 5) CLASS (LARGE PATROL CRAFT) (PG)

Name	No	Builders	Commissioned
SATTAHIP	521 (ex-4)	Ital Thai (Samutprakarn) Ltd	16 Sep 1983
KLONGYAI	522 (ex-5)	Ital Thai (Samutprakarn) Ltd	7 May 1984
TAKBAI	523 (ex-6)	Ital Thai (Samutprakarn) Ltd	18 July 1984
KANTANG	524 (ex-7)	Ital Thai (Samutprakarn) Ltd	14 Oct 1985
THEPHA	525 (ex-8)	Ital Thai (Samutprakarn) Ltd	17 Apr 1986
TAIMUANG	526 (ex-9)	Ital Thai (Samutprakarn) Ltd	17 Apr 1986

Displacement, tons: 270 standard, 300 full load
Dimensions, feet (metres): 164.5 × 23.9 × 5.9 (50.1 × 7.3 × 1.8)
Main machinery: 2 MTU 16V 538TB92 diesels; 6,820 hp(m) (5 MW) sustained; 2 shafts
Speed, knots: 22
Range, n miles: 2,500 at 15 kt
Complement: 56
Guns: 1 OTO Melara 3 in (76 mm)/62 (in 521-523), 1 USN 3 in (76 mm)/50 Mk 26 (in 524-526), 1 Bofors 40 mm/70 or 40 mm/60, 2 Oerlikon 20 mm GAM-BO1 2–12.7 mm MGs.
Weapons control: NA 18 optronic director (in 521-523)
Radars: Surface search: Decca, I-band

Comment: First four ordered 9 September 1981, *Thepha* on 27 December 1983 and *Taimuang* on 31 August 1984.

TAKBAI

10/1999, Royal Thai Navy / 0080815

3 T 81 CLASS (COASTAL PATROL CRAFT) (PB)

T 81–83

Displacement, tons: 120 full load
Dimensions, feet (metres): 98.8 × 20.7 × 5.6 (30.1 × 6.3 × 1.7)
Main machinery: 2 MTU 16V 2000TE90 diesels; 3,600 hp(m) (2.56 MW); 2 shafts
Speed, knots: 25. **Range, n miles:** 1,300 at 15 kt
Complement: 28 (3 officers)
Guns: 1 Bofors 40 mm/70, 1 Oerlikon 20 mm, 2–12.7 mm MGs.
Radars: Surface search: Sperry SM 5000; I-band.

Comment: Ordered in October 1996 from ASC Silktine in Pranburi. First one commissioned 5 August 1999, second 9 December 1999 and the third in 2000. Plans for seven more have been shelved.

T 83

3/2004, Bob Fildes / 0589810

10 PGM 71 CLASS (COASTAL PATROL CRAFT) (PB)

T 11–19 T 110

Displacement, tons: 130 standard; 147 full load
Dimensions, feet (metres): 101 × 21 × 6 (30.8 × 6.4 × 1.9)
Main machinery: 2 GM diesels; 1,800 hp (1.34 MW); 2 shafts
Speed, knots: 18.5. **Range, n miles:** 1,500 at 10 kt
Complement: 30
Guns: 1 Bofors 40 mm/60, 1 Oerlikon 20 mm, 2–12.7 mm MGs.
 In some craft the 20 mm gun has been replaced by an 81 mm mortar/12.7 mm combined mounting aft
Radars: Surface search: Decca 303 (T 11 and 12) or Decca 202 (remainder); I-band

Comment: Built by Peterson Inc between 1966 and 1970. Transferred from US. Likely to be decommissioned as modified T 81 class enter service.

T 16

10/1999, Royal Thai Navy / 0080815

9 T 91 CLASS (COASTAL PATROL CRAFT) (PB)

T 91–99

Displacement, tons: 87.5 (T 91-92), 117 (remainder) standard
Dimensions, feet (metres): 103.4 × 17.6 × 4.9 (31.5 × 5.4 × 1.5) (T 91-92)
 111.6 × 18.7 × 4.9 (34.0 × 5.7 × 1.5) (remainder)
Main machinery: 2 MTU 12V 538TB81/82 diesels; 3,300 hp(m) (2.43 MW)/4,430 hp(m) (3.26 MW) sustained; 2 shafts
Speed, knots: 25. **Range, n miles:** 700 at 21 kt
Complement: 21 (T 91-92); 25 (remainder)
Guns: 2 or 1 Bofors 40 mm/60 (T 91 and T 99), 1 Oerlikon 20 mm GAM-BO1 (T 91 and T 99), 2–12.7 mm MGs (T 93-99).
Weapons control: Sea Archer 1A optronic director (T 99 only).
Radars: Surface search: Raytheon SPS 35 (1500B), I-band

Comment: Built by Royal Thai Naval Dockyard, Bangkok. T 91 commissioned in 1965; T 92-93 in 1973; T 94-98 between 1981 and 1984, T 99 in 1987. T 91 has an extended upperworks and a 20 mm gun in place of the after 40 mm. T 99 has a single Bofors 40/70, one Oerlikon 20 mm and two MGs. Major refits from 1983-86 for earlier vessels of the class.

T 96

10/2001, Chris Sattler / 0130457

3 + (6) T 991 CLASS (COASTAL PATROL CRAFT) (PB)

No	Builders	Launched	Commissioned
T 991	Bangkok Naval Dockyard	2006	30 Apr 2007
T 992	Marsun Shipyard	6 Sep 2007	Dec 2007
T 993	Marsun Shipyard	6 Sep 2007	Dec 2007

Displacement, tons: 186 full load
Dimensions, feet (metres): 127.0 x 21.2 x 5.9 (38.7 x 6.45 x 1.8)
Main machinery: 2 MTU 16V 4000 M 90 diesels, 7,400 hp (5.5 MW); 2 shafts
Speed, knots: 27
Complement: 30
Guns: 2 MSI DS-30M 30 mm 2-12.7 mm MGs
Weapons control: Thales Mirador optronic director.
Radars: Surface search/navigation. To be announced.

Comment: Modified versions of the T 91 class. First vessel laid down at Naval Dockyard on 9 September 2005. Two further craft delivered by December 2007. A further six craft are planned.

T 991 12/2007, M Mazumdar / 1353396

9 SWIFT CLASS (COASTAL PATROL CRAFT) (PB)

T 21-29
Displacement, tons: 22 full load
Dimensions, feet (metres): 50 x 13 x 3.5 (15.2 x 4 x 1.1)
Main machinery: 2 Detroit diesels, 480 hp (358 kW); 2 shafts
Speed, knots: 26
Range, n miles: 400 at 25 kt
Complement: 8 (1 officer)
Guns: 1 81 mm mortar 2-12.7 mm MGs
Radars: Surface search: Raytheon Pathfinder; I-band.

Comment: Transferred from US Navy from 1967-75.

T 21 7/2008, Thai Navy League / 1353397

13 T 213 CLASS (COASTAL PATROL CRAFT) (PB)

T 213-214 T 216-226
Displacement, tons: 35 standard
Dimensions, feet (metres): 64 x 17.5 x 5 (19.5 x 5.3 x 1.5)
Main machinery: 2 MTU diesels; 715 hp(m) (526 kW); 2 shafts
Speed, knots: 25
Complement: 8 (1 officer)
Guns: 1 Oerlikon 20 mm, 1-81 mm mortar with 12.7 mm MG.
Radars: Surface search, Racal Decca 110; I-band.

Comment: Built by Ital Thai Marine Ltd. Commissioned-T 213-214, 29 August 1980; T 216-218, 26 March 1981; T 219-223, 16 September 1981; T 224, 19 November 1982; T 225 and T 226, 28 March 1984. Construction of T 227-230 is not to have been completed. Of sloop construction. Used for fishery patrol and coastal control duties. T 215 damaged beyond repair by tsunami on 26 December 2004 and replaced by T 227

T 219 9/2003, Hartmut Ehlers / 0572643

1 T 227 CLASS (COASTAL PATROL CRAFT) (PB)

Displacement, tons: 42 full load
Dimensions, feet (metres): 70.0 x 17.4 x 4.9 (21.3 x 5.3 x 1.5)
Main machinery: 2 MTU diesels; 1,200 hp (895 kW); 2 shafts
Speed, knots: 28
Complement: 8 (1 officer)
Guns: 1-20 mm, 2-12.7 mm MGs
Radars: Surface search/navigation: I-band.

Comment: Larger variant of the T 213 class built by Marsun and launched on 1 September 2006 to replace T 215 which was lost in the tsunami of 26 December 2004.

T 227 12/2006, Marsun / 1190410

3 SEAL ASSAULT CRAFT (LCP)

Comment: Locally built for special forces operations. Details are not known but reported to be larger and faster than PBR Mk II craft. Equipped with stern ramp.

T 242 (SEAL) 5/1997, A Sharma / 0050242

13 PBR MK II (RIVER PATROL CRAFT) (PBR)

Displacement, tons: 8 full load
Dimensions, feet (metres): 32.1 x 11.5 x 2.3 (9.8 x 3.5 x 0.7)
Main machinery: 2 Detroit diesels; 430 hp (321 kW); 2 Jacuzzi water-jets
Speed, knots: 25
Range, n miles: 150 at 23 kt
Complement: 4
Guns: 2-7.62 mm MGs, 1-60 mm mortar.
Radars: Raytheon SPS-68, I-band.

Comment: Transferred from US from 1967-73. Employed on Mekong River. Reported to be getting old, numbers are reducing and maximum speed has been virtually halved. All belong to the Riverine and SEAL Squadron.

PBR MK II 6/2002, Thai Navy League / 0543380

3 SEA SPECTRE MK III CLASS (PB)

T 210-212
Displacement, tons: 28; 37 full load
Dimensions, feet (metres): 65.0 x 18.0 x 5.9 (19.8 x 5.5 x 1.8)
Main machinery: 3 Detroit diesels; 1,800 hp (1.34 MW); 3 shafts
Speed, knots: 30
Range, n miles: 450 at 20 kt
Complement: 9 (1 officer)
Guns: 2 Oerlikon 20 mm, 1-12.7 MG.
Radars: Surface search: Raytheon; I-band.

Comment: Aluminium hulled craft built by Peterson. Transferred from the US in 1975.

90 ASSAULT BOATS (LCP)

Displacement, tons: 0.4 full load
Dimensions, feet (metres): 16.4 x 6.2 x 1.3 (5 x 1.9 x 0.4)
Main machinery: 1 outboard; 150 hp (110 kW)
Speed, knots: 24
Complement: 2
Guns: 1—7.62 mm MG.

Comment: Part of the Riverine Squadron with the PBRs and two PCFs. Can carry six people. Numbers uncertain.

ASSAULT BOAT 6/2002, Thai Navy League / 0530060

AMPHIBIOUS FORCES

Note: There are approximately 24 landing craft of about 100 tons operated by the Army.

2 NORMED CLASS (LSTH)

Name	No	Builders	Launched	Commissioned
SICHANG	721 (ex-LST 6)	Ital Thai	14 Apr 1987	9 Oct 1987
SURIN	722 (ex-LST 7)	Bangkok Dock Co Ltd	12 Apr 1988	16 Dec 1988

Displacement, tons: 3,540 standard; 4,235 full load
Dimensions, feet (metres): 337.8; 357.6 (722) x 51.5 x 11.5 (103, 109 x 15.7 x 3.5)
Main machinery: 2 MTU 20V 1163 TB82 diesels; 11,000 hp(m) (8.1 MW) sustained; 2 shafts; cp props
Speed, knots: 16 **Range, n miles:** 7,000 at 12 kt
Complement: 53
Military lift: 348 troops; 14 tanks or 12 APCs or 850 tons cargo; 3 LCVP; 1 LCPL
Guns: 2 Bofors 40 mm/70. 2 Oerlikon GAM-CD¹ 20 mm. 2—12.7 mm MGs. 1—81 mm mortar.
Weapons control: 2 BAe Sea Archer Mk 1A optronic directors.
Radars: Navigation. Racal Decca 1226; I-band
Helicopters: Platform for 2 Bell 212.

Comment: First ordered 31 August 1984 to a Chantier du Nord (Normed) design. Second ordered to a modified design and lengthened to accommodate a battalion. The largest naval ships yet built in Thailand. Have bow doors and a 17 m ramp.

SURIN 11/2001, Maritime Photographic / 0130163

SICHANG 2/2004, Bob Fildes / 0589817

2 LSIL 351 CLASS

PRAB 741 (ex-LSIL 1)	SATAKUT 742 (ex-LSIL 2)
----------------------	-------------------------

Displacement, tons: 230 standard, 399 full load
Dimensions, feet (metres): 157 x 23 x 6 (47.9 x 7 x 1.8)
Main machinery: 4 GM diesels; 2,320 bhp (1.73 MW); 2 shafts
Speed, knots: 15. **Range, n miles:** 5,600 at 12.5 kt
Complement: 49 (7 officers)
Military lift: 101 tons or 76 troops
Guns: 1 US 3 in (76 mm)/50. 1 Bofors 40 mm/60. 2 Oerlikon 20 mm/70.
Radars: Surface search Raytheon SPS-35 (1500B); I-band.

Comment: Prab transferred to Thailand in October 1946. Satekut was refitted in the mid-1990s.

PRAB 6/2005, Thai Navy League / 1153910

4 LST 512-1152 CLASS (LST)

Name	No	Builders	Commissioned
CHANG (ex-Lincoln County LST 898)	712 (ex-LST 2)	Dravo Corporation	29 Dec 1944
PANGAN (ex-Stark County LST 1134)	713 (ex-LST 3)	Chicago Bridge and Iron Co, ILL	7 Apr 1945
LANTA (ex-Stone County LST 1141)	714 (ex-LST 4)	Chicago Bridge and Iron Co, ILL	9 May 1945
PRATHONG (ex-Dodge County LST 722)	715 (ex-LST 5)	Jefferson B & M Co, Ind	13 Sep 1944

Displacement, tons: 1,650 standard, 3,640/4,145 full load
Dimensions, feet (metres): 328 x 50 x 14 (100 x 15.2 x 4.4)
Main machinery: 2 GM 12-567A diesels; 1,800 hp (1.34 MW); 2 shafts
Speed, knots: 11.5 **Range, n miles:** 9,500 at 9 kt
Complement: 80; 157 (war)
Military lift: 1,230 tons max; 815 tons beaching
Guns: 1—3 in (76 mm).
 8 Bofors 40 mm/60 (2 twin, 4 single) (can be carried).
 2—12.7 mm MGs (Chang). 2 Oerlikon 20 mm (others).
Weapons control: 2 Mk 51 GFCS. 2 optical systems.
Radars: Navigation: Racal Decca 1229; IJ band.

Comment: Chang transferred from USA in August 1962. Pangan 16 May 1966, Lanta on 15 August 1973 (by sale 1 March 1979) and Prathong on 17 December 1975. Chang has a reinforced bow and waterline. Lanta, Prathong and Chang have mobile cranes on the well-deck. All have tripod mast.

LANTA 5/2002, Mick Prendergast / 0530001

3 MAN NOK CLASS (LCU)

Name	No	Builders	Launched	Commissioned
MAN NOK	781	Sahai Sant, Pratum Thani	1 May 2001	6 Dec 2001
MAN KLANG	782	Sahai Sant, Pratum Thani	1 May 2001	14 Nov 2001
MAN NAI	783	Sahai Sant, Pratum Thani	1 May 2001	6 Dec 2001

Displacement, tons: 170 light, 550 full load
Dimensions, feet (metres): 172 x 36.7 x 5.9 (52.4 x 11.2 x 1.8)
Main machinery: 2 Caterpillar 3432 DITA diesels; 700 hp(m) (515 kW); 2 shafts
Speed, knots: 12. **Range, n miles:** 1,500 at 10 kt
Complement: 30 (3 officers)
Military lift: 2 M80 tanks or 25 tons vehicles
Guns: 2 Oerlikon 20 mm.
Radars: Navigation: I-band.

Comment: Ordered from Sikline ASC in 1997. All three craft launched 1 May 2000.

MAN NAI 5/2002, Mick Prendergast / 0530000

0 + 1 ENDURANCE CLASS (LPD)

Displacement, tons: 8,500 full load
Dimensions, feet (metres): 462.6 pp x 68.9 x 16.4 (141 x 21 x 5)
Main machinery: 2 diesels; 12,000 hp(m) (8.82 MW); 2 shafts; Kamewa cp props; bow thruster
Speed, knots: 15. **Range, n miles:** 10,400 at 12 kt
Complement: 65 (8 officers)
Military lift: 350 troops; 18 tanks, 20 vehicles; 4 LCVP

Missiles: SAM. To be announced
Guns: To be announced
Radars: Air/surface search: To be announced
Navigation: To be announced.
Helicopters: Platform for 2.

Programmes: It was announced in November 2008 that ST Marine (Singapore) had been awarded the contract for the design and manufacture of an LPD that is reported to be similar to the Endurance class in service with the Singapore Navy. Construction is expected to start in 2009 with delivery planned for 2012.

Structure: The Endurance class is a US drive-through design with bow and stern ramps. Single intermediate deck with three hydraulic ramps. Helicopter platform aft. Indal ASIST helo handling system. Dockwell for four LCUs and davits for four LCVPs. Two 25 ton cranes. Four 36 m self-propelled pontoons can be secured to winching points on the ships' sides.

4 THONG KAEO CLASS (LCU)

Name	No	Builders	Commissioned
THONG KAEO	771 (ex-7)	Bangkok Dock Co Ltd	23 Dec 1982
THONG LANG	772 (ex-8)	Bangkok Dock Co Ltd	19 Apr 1983
WANG NOK	773 (ex-9)	Bangkok Dock Co Ltd	16 Sep 1983
WANG NAI	774 (ex-10)	Bangkok Dock Co Ltd	11 Nov 1983

Displacement, tons: 193 standard; 396 full load
 Dimensions, feet (metres): 134.5 × 29.5 × 6.9 (47 × 9 × 2.1)
 Main machinery: 2 GM 16V-71 diesels; 1,400 hp (1.04 MW); 2 shafts
 Speed, knots: 10
 Range, n miles: 1,200 at 10 kt
 Complement: 31 (3 officers)
 Military lift: 3 lorries; 150 tons equipment
 Guns: 2 Oerlikon 20 mm, 2—7.62 mm MGs.

Comment: Ordered in 1980

WANG NAI 5/1997, Maritime Photographic / 0019276

6 MATAPHON CLASS (LCM/LCVP/LCP)

MATAPHON 761 (ex-LCU 1260)	ADANG 763 (ex-LCU 861)	KOLAM 765 (ex-LCU 904)
RAWI 762 (ex-LCU 800)	PHETRA 764 (ex-LCU 1089)	TALIBONG 766 (ex-LCU 753)

Displacement, tons: 145 standard; 330 full load
 Dimensions, feet (metres): 120.4 × 32 × 4 (36.7 × 9.8 × 1.2)
 Main machinery: 3 Gray Marine 85 diesels; 675 hp (503 kW); 3 shafts
 Speed, knots: 10
 Range, n miles: 650 at 8 kt
 Complement: 13
 Military lift: 150 tons or 3-4 tanks or 250 troops
 Guns: 4 Oerlikon 20 mm (2 twin)
 Radars: Navigation: Raytheon Pathfinder; I-band

Comment: Transferred from US 1946-47 Employed as transport ferries.

TALIBONG 11/2001, Maritime Photographic / 0130180

40 LANDING CRAFT (LCM/LCVP/LCA)

Displacement, tons: 56 full load
 Dimensions, feet (metres): 56.1 × 14.1 × 3.9 (17.1 × 4.3 × 1.2)
 Main machinery: 2 Gray Marine 64 H93 diesels, 330 hp (264 kW); 2 shafts
 Speed, knots: 9. Range, n miles: 135 at 9 kt
 Complement: 5
 Military lift: 34 tons

Comment: Details given are for the 24 ex-US LCMs delivered in 1965-69. The 12 ex-US LCVPs can lift 40 troops and are of 1960s vintage. The four LCAs can lift 35 troops and were built in 1984 in Bangkok.

LCM 208 11/1998, Thai Navy League / 0050241

3 GRIFFON 1000 TD HOVERCRAFT (UCAC)

401-403

Dimensions, feet (metres): 27.6 × 12.5 (8.4 × 3.8)
 Main machinery: 1 Deutz BF6L913C diesel; 190 hp(m) (140 kW)
 Speed, knots: 33. Range, n miles: 200 at 27 kt
 Complement: 2
 Cargo capacity: 1,000 kg plus 9 troops
 Radars: Navigation: Raytheon; I-band.

Comment: Acquired in mid-1990 from Griffon Hovercraft. Although having an obvious amphibious capability they are also used for rescue and flood control

GRIFFON 401 6/1999, Royal Thai Navy / 0084413

0 + 2 LANDING CRAFT UTILITY (LCU)

Dimensions, feet (metres): 75.4 × 19.7 × 2.6 (23 × 6 × 0.8)
 Main machinery: 2 MAN 2842 LZE diesels; 4,400 hp(m) (3.23 MW); 2 Kamewa waterjets
 Speed, knots: 20. Range, n miles: 180 at 15 kt
 Complement: 4
 Military lift: 18 tons
 Guns: 2—12.7 mm MGs or 40 mm grenade launchers.

Comment: It was announced in November 2008 that ST Marine (Singapore) had been awarded the contract for the design and construction of two 23 m landing craft to be operated from the LPD, also under construction. The details of the craft are assumed to be similar to those in service in Singapore.

LCU (Singapore colours) 12/2005, Chris Sattler / 1164539

0 + 2 LANDING CRAFT (LCVP)

Displacement, tons: 4 full load
 Dimensions, feet (metres): 44.6 × 12.1 × 2 (13.6 × 3.7 × 0.6)
 Main machinery: 2 MAN D2866 LE diesels, 815 hp(m) (600 kW) sustained; 2 Hamilton 362 waterjets
 Speed, knots: 20. Range, n miles: 100 at 20 kt
 Complement: 3
 Military lift: 4 tons or 30 troops

Comment: It was announced in November 2008 that ST Marine (Singapore) had been awarded the contract for the design and construction of two 13 m landing craft to be operated from the LPD, also under construction. The details of the craft are assumed to be similar to those in service in Singapore. With a single bow ramp, they can carry a rifle platoon.

LCVPs 8/2003, David Boay / 0567534

MINE WARFARE FORCES**1 MCM SUPPORT SHIP (MCS)**

Name	No	Builders	Commissioned
THALANG	621 (ex-1)	Bangkok Dock Co Ltd	4 Aug 1980

Displacement, tons: 1,000 standard
 Dimensions, feet (metres): 185.5 × 33 × 10 (56.7 × 10 × 3.1)
 Main machinery: 2 MTU diesels; 1,310 hp(m) (963 kW); 2 shafts
 Speed, knots: 12
 Complement: 77
 Guns: 1 Bofors 40 mm/80. 2 Oerlikon 20 mm, 2—12.7 mm MGs.
 Radars: Surface search. Racal Decca 1226; I-band.

Comment: Has minesweeping capability. Two 3 ton cranes provided for change of minesweeping gear in MSCs—four sets carried. Design by Ferrostaal, Essen. Has dormant minelaying capability.

THALANG 11/2001, Maritime Photographic / 0130185

2 LAT YA (GAETA) CLASS (MINEHUNTERS/SWEEPERS) (MHSC)

Name	No	Builders	Launched	Commissioned
LAT YA	633	Intermarine, Sarzana	30 Mar 1998	18 June 1999
THA DIN DAENG	634	Intermarine, Sarzana	31 Oct 1998	18 Dec 1999

Displacement, tons: 680 full load
Dimensions, feet (metres): 172.1 x 32.4 x 9.4 (52.5 x 9.9 x 2.9)
Main machinery: 2 MTU 8V 396 TE74K diesels, 1,600 hp(m) (1.18 MW) sustained; 2 Vorth Schneider props, auxiliary propulsion; 2 hydraulic motors
Speed, knots: 14. **Range, n miles:** 2,000 at 12 kt
Complement: 50 (8 officers)
Guns: 1 MSI 30 mm.
Countermeasures: MCM: Atlas MWS 80-6 minehunting system. Magnetic, acoustic and mechanical sweeps; ADI Mini Dyad, Noise Maker, Bofors MS 106, 2 Pluto Plus ROVs
Radars: Navigation: Atlas Elektronik 9600M (ARPA); I-band.
Sonars: Atlas Elektronik DSQS-11M, hull-mounted; active; high frequency.

Comment: Invitations to tender lodged by 3 April 1996. Ordered 18 September 1996. Specifications include hunting at up to 6 kt and sweeping at 10 kt. No further ships are planned.

THA DIN DAENG 4/2004, John Mortimer / 1153969

2 BANG RACHAN CLASS (MINEHUNTERS/SWEEPERS) (MHSC)

Name	No	Builders	Commissioned
BANG RACHAN	631 (ex-2)	Lürssen Vegesack	29 Apr 1987
NONGSARAI	632 (ex-3)	Lürssen Vegesack	17 Nov 1987

Displacement, tons: 444 full load
Dimensions, feet (metres): 161.1 x 30.5 x 8.2 (49.1 x 9.3 x 2.5)
Main machinery: 2 MTU 12V 396 TB83 diesels; 3,120 hp(m) (2.3 MW) sustained, 2 shafts. Kamewa cp props; auxiliary propulsion; 1 motor
Speed, knots: 17; 7 (electric motor) **Range, n miles:** 3,100 at 12 kt
Complement: 33 (7 officers)
Guns: 3 Oerlikon GAM BO1 20 mm.
Countermeasures: MCM: MWS 80R minehunting system. Acoustic, magnetic and mechanical sweeps. 2 Gaymarine Pluto 15 remote-controlled submersibles.
Radars: Navigation: 2 Atlas Elektronik 8600 ARPA; I-band.
Sonars: Atlas Elektronik DSQS-11H; hull-mounted; minehunting; high frequency.

Comment: First ordered from Lürssen late 1984, arrived Bangkok 22 October 1987. Second ordered 5 August 1985 and arrived in Bangkok May 1988. Amagnetic steel frames and deckhouses, wooden hull. Motorola Miniranger MRS III precise navigation system. Draeger decompression chamber.

NONGSARAI 2/2005, Chris Sattler / 1153911

12 MSBS (MSR)

MLM 6-10 MSB 11-17

Displacement, tons: 25 full load
Dimensions, feet (metres): 50.2 x 13.1 x 3 (15.3 x 4 x 0.9)
Main machinery: 1 Gray Marine 64 H1N9 diesel; 165 hp (123 kW); 1 shaft
Speed, knots: 8
Complement: 10
Guns: 2—7.62 mm MGs.

Comment: Three transferred from USA in October 1963 and two in 1964. More were built locally from 1994. Wooden hulled, converted from small motor launches. Operated on Chao Phraya river.

MLM 11 10/1995, Royal Thai Navy / 00R027

2 BLUEBIRD CLASS (MINESWEEPERS—COASTAL) (MSC)

Name	No	Builders	Commissioned
BANGKEO (ex-MSC 303)	612 (ex-6)	Dorchester SB Corporation, Camden	9 July 1965
DONCHEDI (ex-MSC 313)	613 (ex-8)	Peterson Builders Inc, Sturgeon Bay, WI	17 Sep 1965

Displacement, tons: 317 standard; 384 full load
Dimensions, feet (metres): 145.3 x 27 x 8.5 (44.3 x 8.2 x 2.6)
Main machinery: 2 GM 8 268 diesels, 880 hp (656 kW); 2 shafts
Speed, knots: 13
Range, n miles: 2,750 at 12 kt
Complement: 43 (7 officers)
Guns: 2 Oerlikon 20 mm/80 (twin).
Countermeasures: MCM: UJS Mk 4 (V) Mk 6. US Type O2 magnetic.
Radars: Navigation: Decca TM 707; I-band
Sonars: UQS-1, hull-mounted; minehunting; high frequency.

Comment: Constructed for Thailand. One paid off in 1992 and one in 1995. The last two are in limited operational service and at least one is to be retained for training duties.

DONCHEDI 11/2001, Maritime Photographic / 0130164

SURVEY AND RESEARCH SHIPS

Notes: There is also a civilian research vessel *Chulab Horn* which completed in 1986.

1 SURVEY SHIP (AGSH)

Name	No	Builders	Laid down	Launched	Commissioned
PHARUEHATSABODI	813	Unithai Shipyard and Engineering, Laem Chabang	25 Aug 2006	14 Feb 2008	19 Aug 2008

Displacement, tons: To be announced
Dimensions, feet (metres): 217.5 x 50.2 x 10.2 (66.3 x 13.2 x 3.1)
Main machinery: Diesel-electric; 3 diesel generators; 2,652 hp(m) (1.95 MW); 1 motor; 1,073 hp(m) (800 kW); 2 azimuth thrusters; 1 bow thruster
Speed, knots: 12. **Range, n miles:** 3,000 at 12 kt
Complement: 13 (accommodation for 71)
Radars: Navigation: E/F- and I-band.
Sonars: Multi- and single-beam; high frequency; active.

Comment: Multipurpose hydrographic and oceanographic survey, training and mine countermeasures vessel ordered 22 December 2005 from a consortium comprising Scheide Naval Shipbuilding, Flushing, and Unithai Shipyard and Engineering, Thailand. The ship is a derivative of the Snellius class vessels built for the RNLN. The ship was built in Thailand. Hydrographic equipment includes an exploration computer system; multibeam echosounder; single beam echosounder; side-scan sonar; Ultra-Short Baseline (USBL); Motion and Reference Unit (MRU); draught indication system; tidal measurement system; seawater collection system; seawater measurement system; expendable bathythermograph/sound velocity meter; current flow measurement system; current meter system; sediment collection system; and oceanography equipment.

PHARUEHATSABODI 2/2008, Thai Navy League / 1353399

1 OCEANOGRAPHIC SHIP (AGOR)

Name	No	Builders	Commissioned
SUK	812	Bangkok Dock Co Ltd	3 Mar 1982

Displacement, tons: 1,450 standard; 1,526 full load
Dimensions, feet (metres): 206.3 × 36.1 × 13.4 (62.9 × 11 × 4.1)
Main machinery: 2 MTU diesels; 2,400 hp(m) (1.75 MW); 2 shafts
Speed, knots: 15
Complement: 86 (20 officers)
Guns: 2 Oerlikon 20 mm. 2—7.62 mm MGs.
Radars: Navigation: Racal Decca 1226; I-band

Comment: Laid down 27 August 1979, launched 8 September 1981. Designed for oceanographic and survey duties.

SUK 5/1999, van Ginderen Collection / 0080878

1 SURVEY SHIP (AGS)

Name	No	Builders	Commissioned
CHANTHARA	811 (ex-AGS 11)	Lurssen Werft	30 May 1961

Displacement, tons: 870 standard; 996 full load
Dimensions, feet (metres): 229.2 × 34.5 × 10 (69.9 × 10.5 × 3)
Main machinery: 2 KHD diesels; 1,090 hp(m) (801 kW); 2 shafts
Speed, knots: 13.25
Range, n miles: 10,000 at 10 kt
Complement: 68 (8 officers)
Guns: 2 Bofors 40 mm/60.

Comment: Laid down on 27 September 1960. Launched on 17 December 1960. Has served as a Royal Yacht

CHANTHARA 7/2008, Thai Navy League / 1353398

1 CANNON CLASS (FFT)

Name	No	Builders	Laid down	Launched	Commissioned
PIN KLAO	413	Western Pipe & Steel Co	1943	12 Sep 1943	30 May 1944

(ex-Hamminger DE 746)

Displacement, tons: 1,240 standard; 1,930 full load
Dimensions, feet (metres): 306 × 36.7 × 14 (93.3 × 11.2 × 4.3)
Main machinery: Diesel-electric; 4 GM 16-278A diesels; 6,000 hp (4.5 MW); 4 generators; 2 motors; 2 shafts
Speed, knots: 20
Range, n miles: 10,800 at 12 kt; 6,700 at 19 kt
Complement: 192 (14 officers)

Guns: 3 USN 3 in (76 mm)/50 Mk 22, 20 rds/min to 12 km (6.6 n miles); weight of shell 6 kg.
 6 Bofors 40 mm/60 (3 twin); 120 rds/min to 10 km (5.5 n miles); weight of shell 0.89 kg.
Torpedoes: 6—324 mm US Mk 32 (2 triple) tubes; anti-submarine.
A/S mortars: 1 Hedgehog Mk 10 multibarrelled fixed; range 250 m; warhead 13.6 kg; 24 rockets
Depth charges: 8 projectors; 2 racks.
Countermeasures: ESM-WLR-1; radar warning.
Weapons control: Mk 52 radar GFCS for 3 in guns. Mk 63 radar GFCS for aft gun only. 2 Mk 51 optical GFCS for 40 mm.
Radars: Air/surface search: Raytheon SPS-5; G/H-band
 Navigation: Raytheon SPS-21; G/H-band
Fire control: Western Electric Mk 34, I/J-band
 RCA/General Electric Mk 26, I/J-band
IFF SLR 1.
Sonars: SQS-11; hull-mounted, active attack; high frequency.

Programmes: Transferred from US Navy at New York Navy Shipyard in July 1959 under MDAP and by sale 6 June 1975

Modernisation: The three 21 in torpedo tubes were removed and the 20 mm guns were replaced by 40 mm. The six A/S torpedo tubes were fitted in 1966.

Operational: Used mostly as a training ship

PIN KLAO 6/1997, Royal Thai Navy / 0019254

TRAINING SHIPS

1 ALGERINE CLASS (AXL)

Name	No	Builders	Commissioned
PHOSAMTON	611 (ex-415, ex-MSF 1)	Reifern Construction Co	9 June 1945

(ex-Minstrel)

Displacement, tons: 1,040 standard; 1,335 full load
Dimensions, feet (metres): 225 × 35.5 × 11.5 (68.6 × 10.8 × 3.5)
Main machinery: 2 boilers; 2 reciprocating engines; 2,000 ihp (1.49 MW); 2 shafts
Speed, knots: 16
Range, n miles: 4,000 at 10 kt
Complement: 103
Guns: 1 USN 3 in (76 mm)/50. 1 Bofors 40 mm/60. 4 Oerlikon 20 mm
Radars: Navigation: Raytheon Pathfinder; I-band

Comment: Transferred from UK in April 1947. Received engineering overhaul in 1984. Minesweeping gear replaced by a deckhouse to increase training space. Vickers 4 in gun replaced

PHOSAMTON 8/2002, John Mortimer / 0529999

1 SIMILAN (HUDONG) CLASS (TYPE R22T)
(REPLENISHMENT SHIP) (AORH)

Name	No	Builders	Launched	Commissioned
SIMILAN	871	Hudong Shipyard, Shanghai	9 Nov 1995	12 Sep 1996

Displacement, tons: 23,000 full load
Dimensions, feet (metres): 562.3 × 80.7 × 29.5 (171.4 × 24.6 × 9)
Main machinery: 2 HD-SEMT-Pielstick 16 PC2 6V400; 24,000 hp(m) (17.64 MW); 2 shafts, Kamewa cp props
Speed, knots: 19
Range, n miles: 10,000 at 15 kt
Complement: 157 (19 officers) plus 26
Cargo capacity: 9,000 tons fuel, water, ammunition and stores
Radars: Air/surface search: Eye Shield (Type 354); E/F-band.
 Navigation: Racal Decca 1290 ARPA, I-band.
Helicopters: 1 Seahawk type

Comment: Contract signed with China State Shipbuilding Corporation on 29 September 1993. Fabrication started in December 1994. Two replenishment at sea positions each side and facilities for Vertrep. This ship complements the carrier and the new frigates to give the Navy a full deployment capability. Four twin 37 mm guns (Type 354) and associated Rice Lamp FC radar were not fitted.

SIMILAN 10/1998, Thai Navy League / 0060248

AUXILIARIES

1 REPLENISHMENT TANKER (AORL)

Name	No	Builders	Launched
CHULA	831 (ex-2)	Singapore SEC	24 Sep 1980

Displacement, tons: 2,000 full load
 Measurement, tons: 960 dwt
 Dimensions, feet (metres): 219.8 x 31.2 x 14.4 (67 x 9.5 x 4.4)
 Main machinery: 2 MTU 12V 396 TC62 diesels; 2,400 hp(m) (1.76 MW) sustained, 2 shafts
 Speed, knots: 14
 Complement: 39 (7 officers)
 Cargo capacity: 800 tons oil fuel
 Guns: 2 Oerlikon 20 mm
 Radars: Navigation: Racal Decca 1226; I-band

Comment: Replenishment is done by a hose handling crane boom

CHULA 6/1996, Royal Thai Navy / 0050249

4 HARBOUR TANKERS (YO)

Name	No	Builders
PRONG 833 (ex-YO 5)	SAMED 835 (ex-YO 10)	
PROET 834 (ex-YO 9)	CHIK 842 (ex-YO 11)	

Displacement, tons: 360 standard; 485 full load
 Dimensions, feet (metres): 122.7 x 19.7 x 8.7 (374 x 6 x 2.7)
 Main machinery: 1 GM 8-268A diesel; 500 hp(m) (368 kW); 1 shaft
 Speed, knots: 9
 Cargo capacity: 210 tons

Comment: Details are for 834, 835 and 842. Built by Bangkok Naval Dockyard, 834 commissioned 27 January 1967, remainder the same year. Details of 833 not known but reported to be approximately 180 tons.

SAMED 5/1999 / 0680029

1 HARBOUR TANKER (YO)

Name	No	Builders
SAMUI 832 (ex-YOG 60, ex-YO 4)		

Displacement, tons: 1,420 full load
 Dimensions, feet (metres): 174.5 x 32 x 15 (53.2 x 9.7 x 4.6)
 Main machinery: 1 Union diesel; 600 hp (448 kW); 1 shaft
 Speed, knots: 8
 Complement: 29
 Cargo capacity: 985 tons fuel
 Guns: 2 Oerlikon 20 mm can be carried.
 Radars: Navigation: Raytheon Pathfinder; I-band

SAMUI 12/1995 / 0506755

1 WATER TANKER (YW)

Name	No	Builders	Commissioned
CHUANG	841 (ex-YW 5)	Royal Thai Naval Dockyard, Bangkok	1965

Displacement, tons: 305 standard; 485 full load
 Dimensions, feet (metres): 136 x 24.6 x 10 (42 x 7.5 x 3.1)
 Main machinery: 1 GM diesel, 500 hp (373 kW); 1 shaft
 Speed, knots: 11
 Complement: 29
 Guns: 1 Oerlikon 20 mm.

Comment: Launched on 14 January 1965

CHUANG (alongside Proet) 5/1997, Maritime Photographic / 0019284

1 TRANSPORT SHIP (AKS)

Name	No	Builders	Commissioned
KLED KEO	861 (ex-AF-7)	Norjord, Norway	1948

Displacement, tons: 450 full load
 Dimensions, feet (metres): 150.1 x 24.9 x 14 (46 x 7.6 x 4.3)
 Main machinery: 1 CAT diesel; 900 hp(m) (662 kW); 1 shaft
 Speed, knots: 12
 Complement: 54 (7 officers)
 Guns: 3 Oerlikon 20 mm.

Comment: Former Norwegian transport acquired in 1956. Paid off in 1990 but back in service in 1997. Operates with the patrol boat squadron.

KLED KEO 6/1998, Royal Thai Navy / 0050250

1 BUOY TENDER (ABU)

Name	No	Builders	Commissioned
SURIYA	821	Bangkok Dock Co Ltd	15 Mar 1979

Displacement, tons: 690 full load
 Dimensions, feet (metres): 177.8 x 33.5 x 10.2 (54.2 x 10.2 x 3.1)
 Main machinery: 2 MTU diesels; 1,310 hp(m) (963 kW); 2 shafts; bow thruster; 135 hp(m) (99 kW)
 Speed, knots: 12
 Complement: 60 (12 officers)
 Radars: Navigation: Racal Decca; I-band

Comment: Can carry 20 mm guns.

SURIYA 11/2001, Maritime Photographic / 0130167

TUGS

2 COASTAL TUGS (YTB)

RIN 853 (ex-ATA 5) RANG 854 (ex-ATA 6)

Displacement, tons: 350 standard
 Dimensions, feet (metres): 106 × 29.7 × 15.2 (32.3 × 9 × 4.6)
 Main machinery: 1 MWM TBD441V/12K diesel; 2,100 hp(m) (1.54 MW); 1 shaft
 Speed, knots: 12 Range, n miles: 1,000 at 10 kt
 Complement: 19

Comment: Launched 12 and 14 June 1980 at Singapore Marine Shipyard. Both commissioned 5 March 1981. Bollard pull 22 tons.

RANG 1992, Royal Thai Navy / 0080830

2 SAMAESAN CLASS (COASTAL TUGS) (YTR)

SAMAESAN 855 RAET 856

Displacement, tons: 300 standard
 Dimensions, feet (metres): 82 × 27.9 × 7.9 (25 × 8.5 × 2.4)
 Main machinery: 2 Caterpillar 3512TA diesels; 2,350 hp(m) (1.75 MW) sustained;
 2 Aquamaster US 901 props
 Speed, knots: 10
 Complement: 6

Comment: Contract signed 23 September 1992 for local construction at Thonburi Naval dockyard. Completed in December 1993. Equipped for firefighting.

RAET 5/1997, A Sharma / 0050251

2 YTL 422 CLASS (YTL)

KLUENG BADAAN 851 (ex-YTL 2) MARN VICHAI 852 (ex-YTL 3)

Displacement, tons: 63 standard
 Dimensions, feet (metres): 64.7 × 16.5 × 6 (19.7 × 5 × 1.8)
 Main machinery: 1 diesel; 240 hp (179 kW); 1 shaft
 Speed, knots: 8

Comment: Built by Central Bridge Co, Trenton and bought from Canada 1953.

KLUENG BADAAN 11/2001, Maritime Photographic / 0130166

POLICE

Notes: (1) There is also a Customs service, subordinate to the Marine Police, which operates unarmed patrol craft with CUSTOMS on the hull, and a Fishery Patrol Service also unarmed but vessels are painted blue with broad white and narrow gold diagonal stripes on the hull. Two Hydrofoil craft are on loan from the Police to the Customs service. (2) There are large numbers of RIBs in service.

1 VOSPER THORNYCROFT TYPE (LARGE PATROL CRAFT) (PSO)

SRINAKARIN 1804

Displacement, tons: 630 full load
 Dimensions, feet (metres): 203.4 × 26.9 × 8.2 (62 × 8.2 × 2.5)
 Main machinery: 2 Deutz MWM BV16M628 diesels; 9,524 hp(m) (7 MW) sustained,
 2 shafts; Kamowa cp props
 Speed, knots: 25
 Range, n miles: 2,500 at 15 kt
 Complement: 45
 Guns: 4–30 mm (2 twin).
 Radars: Surface search: Racal Decca 1226, I-band.

Comment: Ordered in September 1989 from Ital Thai Marine. Same hull as the Khamronsin class corvettes for the Navy but much more lightly armed. Delivered in April 1992.

SRINAKARIN 6/2003, Royal Thai Navy / 0572648

2 HAMELN TYPE (LARGE PATROL CRAFT) (PBO)

DAMRONG RACHANUPHAP 1802

LOPSURI RAMES 1803

Displacement, tons: 430 full load
 Dimensions, feet (metres): 186 × 26.6 × 8 (56.7 × 8.1 × 2.4)
 Main machinery: 4 MTU diesels; 4,400 hp(m) (3.23 MW); 2 shafts
 Speed, knots: 23
 Complement: 45
 Guns: 2 Oerlikon 30 mm/75 (twin), 2 Oerlikon 20 mm.
 Radars: Surface search: Racal Decca 1226, I-band.

Comment: Delivered by Schiffwerft Hameln, Germany, on 3 January 1969 and 10 December 1972 respectively.

LOPSURI RAMES 6/2003, Royal Thai Navy / 0572647

2 SUMIDAGAWA TYPE (COASTAL PATROL CRAFT) (PB)

CHASANYABADEE 1101

PHROMYOTHEE 1103

Displacement, tons: 130 full load
 Dimensions, feet (metres): 111.5 × 19 × 9.1 (34 × 5.8 × 2.8)
 Main machinery: 3 Ikegai diesels; 4,050 hp(m) (2.98 MW); 3 shafts
 Speed, knots: 32
 Complement: 23
 Guns: 2–12.7 mm MGs.
 Radars: Surface search: Racal Decca; I-band.

Comment: Commissioned in August 1972 and May 1973 respectively.

PHROMYOTHEE 1990, Marine Police / 0080833

1 YOKOHAMA TYPE (COASTAL PATROL CRAFT) (PB)

CHAWENGSACK SONGKRAM 1102

Displacement, tons: 190 full load
 Dimensions, feet (metres): 116.5 x 23 x 11.5 (35.5 x 7 x 3.5)
 Main machinery: 4 lkagai diesels; 5,400 hp(m) (3.79 MW); 2 shafts
 Speed, knots: 32
 Complement: 18
 Guns: 2 Oerlikon 20 mm

Comment: Commissioned 13 April 1973. A second of class operates for the Customs with the number 1201

CHAWENGSACK SONGKRAM

1990, Marine Police / 0080834

3 CUTLASS CLASS (COASTAL PATROL CRAFT) (PB)

PHRAONGKAMROP 807

PICHARNPHOLAKIT 808

RAMINTHRA 809

Displacement, tons: 34 full load
 Dimensions, feet (metres): 65 x 17 x 8.3 (19.8 x 5.2 x 2.5)
 Main machinery: 3 Detroit 12V-71TA diesels; 1,020 hp(m) (761 kW) sustained; 3 shafts
 Speed, knots: 25
 Complement: 14
 Guns: 1 Oerlikon 20 mm. 2—7.62 mm MGs.

Comment: Delivered by Halter Marine, New Orleans, and all commissioned on 9 March 1969. Aluminium hulls.

PICHARNPHOLAKIT

6/1999 / 0080836

1 ITAL THAI MARINE TYPE (COASTAL PATROL CRAFT) (PB)

SRIYANONT 901

Displacement, tons: 52 full load
 Dimensions, feet (metres): 90 x 16 x 6.5 (27.4 x 4.9 x 2)
 Main machinery: 2 Deutz BA16M816 diesels; 2,680 hp(m) (1.97 MW) sustained; 2 shafts
 Speed, knots: 23
 Complement: 14
 Guns: 1 Oerlikon 20 mm. 2—7.62 mm MGs.
 Radars: Surface search; Racal Decca; i-band.

Comment: Commissioned 12 June 1986.

SRIYANONT

12/2001, Thai Navy League / 0130155

3 TECHNAUTIC TYPE (COASTAL PATROL CRAFT) (PB)

810-812

Displacement, tons: 50 full load
 Dimensions, feet (metres): 88.6 x 19.4 x 6.2 (27 x 5.9 x 1.9)
 Main machinery: 3 Isotta Fraschini diesels; 2,500 hp(m) (1.84 MW); 3 Castoldi hydrojets
 Speed, knots: 27
 Complement: 14
 Guns: 1 Oerlikon 20 mm GAM-BO1. 2—7.62 mm MGs

Comment: Delivered by Technautic, Bangkok in 1984.

812

1990, Marine Police / 0080837

1 BURESPADOONGKIT CLASS (COASTAL PATROL CRAFT) (PB)

BURESPADOONGKIT 813

Displacement, tons: 65 full load
 Dimensions, feet (metres): 80.5 x 19.4 x 6 (24.5 x 5.9 x 1.8)
 Main machinery: 2 SACM UD 23 V12 M5D diesels; 2,534 hp(m) (1.86 MW) sustained; 2 shafts
 Speed, knots: 28
 Range, n miles: 650 at 20 kt
 Complement: 14
 Guns: 1 Oerlikon GAM-CO1 20 mm; 2—7.62 mm MGs.

Comment: Built by Matsun, Thailand and commissioned 9 August 1995. Badly damaged in the Tsunami of 26 December 2004

BURESPADOONGKIT

6/1999, Marine Police / 0080835

5 ITAL THAI MARINE TYPE (COASTAL PATROL CRAFT) (PB)

625-629

Displacement, tons: 42 full load
 Dimensions, feet (metres): 64 x 17.5 x 5 (19.5 x 5.3 x 1.5)
 Main machinery: 2 MAN D2842LE diesels; 1,350 hp(m) (992 kW) sustained; 2 shafts
 Speed, knots: 27
 Complement: 14
 Guns: 1—12.7 mm MG.

Comment: Built in Bangkok 1987-90. Aluminium hulls. More of the class operated by the Fishery Patrol Service.

ITAL THAI 626

3/2004, Bob Filtes / 0589814

8 MARSUN TYPE (COASTAL PATROL CRAFT) (PB)

630-637

Displacement, tons: 38 full load
 Dimensions, feet (metres): 65.6 × 18.2 × 5 (20 × 5.6 × 1.5)
 Main machinery: 2 MAN D2840LXE diesels; 1,640 hp(m) (1.2 MW) sustained; 2 shafts
 Speed, knots: 25
 Complement: 11
 Guns: 1—12.7 mm MG.

Comment: Built by Marsun, Thailand and commissioned from 2 August 1994.

MARSUN 634

3/2004, Bob Fildes / 0589815

17 TECHNAUTIC TYPE (COASTAL PATROL CRAFT) (PB)

606-624

Displacement, tons: 30 full load
 Dimensions, feet (metres): 60 × 16 × 2.9 (18.3 × 4.9 × 0.9)
 Main machinery: 2 Isotta Fraschini ID 36 SS 8V diesels; 1,760 hp(m) (1.29 MW) sustained;
 2 Castoldi hydro, etc
 Speed, knots: 27
 Complement: 11
 Guns: 1—12.7 mm MG.

Comment: Built from 1983-87 in Bangkok. Operational status of some of these craft doubtful

TECHNAUTIC 609

11/2001, Maritime Photographic / 0130168

2 MARSUN TYPE (PB)

539-540

Displacement, tons: 30 full load
 Dimensions, feet (metres): 57 × 16 × 3 (17.4 × 4.9 × 0.9)
 Main machinery: 2 Detroit 12V-71TA diesels; 840 hp (627 kW) sustained; 2 shafts
 Speed, knots: 25
 Complement: 8
 Guns: 1—12.7 mm MG.

Comment: Built in Thailand. Both commissioned 26 March 1986.

MARSUN 539

11/2001, Maritime Photographic / 0130169

38 RIVER PATROL BOATS (PBR)

301-338

Displacement, tons: 5 full load
 Dimensions, feet (metres): 37.1 × 11.1 × 2.3 (11.3 × 3.4 × 0.7)
 Main machinery: 2 diesels; 2 shafts
 Speed, knots: 25

jfs.janes.com

26 SUMIDAGAWA TYPE (RIVER PATROL CRAFT) (PBR)

613-638

Displacement, tons: 18 full load
 Dimensions, feet (metres): 54.1 × 12.5 × 2.3 (16.6 × 3.8 × 0.7)
 Main machinery: 2 Cummins diesels; 800 hp (597 kW); 2 shafts
 Speed, knots: 23
 Complement: 6
 Guns: 1—12.7 mm MG.

Comment: First 21 built by Sumidagawa, last five by Captain Co, Thailand 1978-79.

SUMIDAGAWA 529

6/1999, Marine Police / 0060841

SUMIDAGAWA 526

6/2003, Royal Thai Navy / 0572646

20 CAMCRAFT TYPE (RIVER PATROL CRAFT) (PBR)

415-440 series

Displacement, tons: 13 full load
 Dimensions, feet (metres): 40 × 12 × 3.2 (12.2 × 3.7 × 1)
 Main machinery: 2 Detroit diesels; 540 hp (403 kW); 2 shafts
 Speed, knots: 25
 Complement: 6

Comment: Delivered by Camcraft, Louisiana. Aluminium hulls. Numbers uncertain.

CAMCRAFT 435

6/1999, Marine Police / 0060842

1 RIVER PATROL CRAFT (PBR)

339

Displacement, tons: 5 full load
 Dimensions, feet (metres): 37 × 11 × 6 (11.3 × 3.4 × 1.8)
 Main machinery: 2 diesels; 2 shafts
 Speed, knots: 25
 Complement: 4

Comment: Built in 1990.

RIVER PATROL CRAFT 339 (alongside Technautic 609)

7/2000 / 0106613

Togo

Country Overview

Formerly French Togoland, the Togolese Republic gained full independence in 1960 having rejected proposals to be united with Ghana. Situated in west Africa, it has an area of 21,925 square miles and borders to the east

with Benin and to the west with Ghana. Togo has a short coastline of 30 n miles with the Gulf of Guinea. Lomé is the capital, largest town and principal port. Togo is the only coastal state to claim territorial seas of 30 n miles. A 200 n mile Exclusive Economic Zone (EEZ) is also claimed

but this has not been defined by boundary agreements.

Headquarters Appointments

Commanding Officer, Navy:
Captain Atiogba Ametipe

Personnel

2009:
(a) 250
(b) Conscript (2 years)

Tonga

Country Overview

A former British protectorate, the Kingdom of Tonga became a sovereign state in 1970. Situated in the southwestern Pacific Ocean some 1,080 n miles northeast of New Zealand, the country consists of more than 170 islands and islets running generally north-south. There are three main groups, Tongatapu, Ha'apai and Vava'u, and several outlying islands. Nuku'alofa, on Tongatapu island, is the capital, largest town and principal port. Territorial seas (12 n miles) are claimed. An Exclusive Economic Zone (EEZ)

(200 n miles) is claimed but limits have not been fully defined by boundary agreements.

Headquarters Appointments

Trinidad and Tobago

Country Overview

Trinidad and Tobago gained independence in 1962 and became a republic in 1976. The country lies at the southern end of the Lesser Antilles chain and comprises the main islands of Trinidad (1,864 square miles), Tobago (116 square miles) and 21 minor islands and rocks. Trinidad is close to the northeastern coast of Venezuela and the mouth of the Orinoco River. The capital, largest town, and principal port is Port-of-Spain, Trinidad. An archipelagic state, territorial seas (12 n miles) are claimed. While a 200 n mile Exclusive Economic

Zone (EEZ) has been claimed, the limits have only been partly defined by boundary agreements.

Headquarters Appointments

Commanding Officer, Coast Guard:
Captain Jewah Ramoutar

Aircraft

The Coast Guard operates three Cessna (Types 172, 402B and 310R) for surveillance and two C26B acquired in 1999. These aircraft can be backed by Air Division

Gazelle and Sikorsky S-76 helicopters when necessary.

Personnel

Helicopters: Platform for one medium.

Comment: Contract for the design and construction of three offshore patrol vessels signed with VT Shipbuilding on 5 April 2007. First steel was cut on 23 January 2008. The ships are to be used for EEZ management, special operations and maritime law enforcement tasks. An improved River class design, the ships are to be equipped with a 16 tonne crane, space for ISO containers (for disaster relief or military stores) and a 39 kt Pacific 24 RIB. The first two ships are to be launched in 2009 and the third in 2010.

CG 001-002 CG 004-006 CG 012-018

Comment: CG 001-002 are 31 ft Bowen craft acquired in May 1991. They are capable of 40 kt. CG 004-006 are 25 ft RHIBs with Johnson outboards acquired from the US in 1993. They are capable of 45 kt. CG 012-013 are Midnight Express craft. CG 014-015 are 40 ft Formula 111 craft acquired from the US in 2005. They are capable of 60 kt. CG 016-018 are 40 ft Phantom Enforcer craft manufactured in Trinidad. They are capable of 60 kt.

CG 002 6/2007, Trinidad and Tobago Coast Guard / 1170215

CG 012 6/2007, Trinidad and Tobago Coast Guard / 1170214

2 OFFSHORE PATROL VESSEL (PBO)

GASPER GRANDE CG 21 CHACACHACARE CG 22

Displacement, tons: 200 full load
Dimensions, feet (metres): 151.9 x 29.8 x 7.9 (46.3 x 9.1 x 2.4)
Main machinery: 4 Cummins K38 diesels; 2 shafts
Speed, knots: 20
Range, n miles: 3,300 at 12 kt
Complement: 19
Guns: 2 – 30 mm, 2 – 12.7 mm MGs.
Radars: Surface search, E/F-band.
Navigation: I-band.

Comment: As part of the contract, signed with VT Shipbuilding on 5 April 2007, to build three new 90 m offshore patrol vessels, an interim patrol capability is being provided at least until the new vessels start entering service from 2009. Both vessels were commissioned on 23 April 2008. The interim vessels are former US oil-rig crew ships modified to undertake patrol tasks. The ships are equipped with a 39 kt Halmatic Pacific 24 RIB.

CHACACHACARE 1/2008, Trinidad and Tobago Coast Guard / 1170217

0 + 6 PATROL CRAFT (PB)

GC 231-236

Measurement, tons: 16 dwt
Dimensions, feet (metres): 98.4 × 21.0 × 4.9 (30.0 × 6.4 × 1.5)
Main machinery: 2 MTU 16V 2000 M92 diesels; 4,370 hp (3.26 MW); 2 Kamewa waterjets
Speed, knots: 40 **Range, n miles:** 1,000 at 10 kt
Complement: 12
Guns: 1—20 mm 3—12.7 mm MGs.
Radars: Surface search/Navigation. To be announced

Comment: The contract with Austal Shipbuilding for the construction of six patrol craft was announced on 18 March 2008. The monohull craft, of aluminium construction, are to be used for safety of shipping, environmental protection, counter-drugs and SAR duties. The contract includes a five-year support programme and training package. All six craft are to be delivered by early 2010.

Tunisia**Country Overview**

Formerly a French protectorate, the Tunisian Republic gained independence in 1956 and became a republic in 1957. Situated in northern Africa, it has an area of 63,170 square miles and is bordered to the west by Algeria and to the south by Libya. It has a 619 n mile coastline with the Mediterranean Sea. The capital and largest city is the seaport of Tunis. There are further ports at Bizerte,

Sousse, Sfax and Gabès while as-Sukhayrah, specialises in petroleum bunkering. Territorial seas (12 n miles) are claimed. An EEZ has not been claimed.

Headquarters Appointments

Naval Chief of Staff:
Rear Admiral Tarek Faouzi El Arbi

Personnel

(a) 2009: 4,800 officers and men (including 800 conscripts)
 (b) 1 year's national service

Bases

Bizerte, Sfax, La Goulette, Kelibia

PATROL FORCES**3 COMBATTANTE III M CLASS (FAST ATTACK CRAFT—MISSILE) (PGGF)**

Name	No	Builders	Launched	Commissioned
LA GALITÉ	501	CMN, Cherbourg	16 June 1983	27 Feb 1985
TUNIS	502	CMN, Cherbourg	27 Oct 1983	27 Mar 1985
CARTHAGE	503	CMN, Cherbourg	24 Jan 1984	28 Apr 1985

Displacement, tons: 345 standard; 425 full load
Dimensions, feet (metres): 183.7 × 26.9 × 7.2 (56 × 8.2 × 2.2)
Main machinery: 4 MTU 20V 538TB93 diesels; 18,740 hp(m) (13.8 MW) sustained; 4 shafts
Speed, knots: 38.5
Range, n miles: 700 at 33 kt; 2,800 at 10 kt
Complement: 35

Missiles: SSM 8 Aerospatiale MM 40 Exocet (2 quad) launchers, inertial cruise, active radar homing to 70 km (40 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.

Guns: 1 OTO Melara 3 in (76 mm)/62; 55-65 rds/min to 16 km (8.7 n miles); weight of shell 6 kg.
 2 Breda 40 mm/70 (twin); 300 rds/min to 12.5 km (6.8 n miles); weight of shell 0.96 kg
 4 Oerlikon 30 mm/75 (2 twin); 650 rds/min to 10 km (5.5 n miles); weight of shell 1 kg or 0.36 kg.

Countermeasures: Decoys: 1 CSEE Dagaia trainable launcher; IR flares and chaff.
 ESM: Thomson CSF, DR 2000, intercept.

Combat data systems: Tav tac action data automation.

Weapons control: 2 CSEE Naja optronic directors for 30 mm. Thomson-CSF Vega II for SSM, 76 mm and 40 mm.

Radars: Air/surface search: Thomson-CSF Triton S; G-band; range 33 km (18 n miles) for 2 m² target.

Fire control: Thomson-CSF Castor II; I/J-band; range 31 km (17 n miles) for 2 m² target.

Programmes: Ordered 27 June 1981.

Operational: CSEE Sylostat navigation system. All three ships operating but reported in need of refits.

GISCON (ex-Kormoran)	510 (ex-P 6120)	Lurssen, Vegesack	29 July 1977

Displacement, tons: 398 full load
 Dimensions, feet (metres): 189 × 25.6 × 8.5 (57.6 × 7.8 × 2.6)
 Main machinery: 4 MTU 16V 956TB91 diesels; 17,700 hp(m) (13 MW) sustained; 4 shafts
 Speed, knots: 40. Range, n miles: 1,300 at 30 kt
 Complement: 40 (4 officers)

Guns: 2 OTO Melara 3 in (76 mm)/62 compact, 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg.
 2—12.7 mm MGs (may be fitted).

Torpedoes: 2—21 in (533 mm) aft tubes. AEG Seel; wire-guided; active homing to 13 km (7 n miles) at 35 kt; passive homing to 28 km (15 n miles) at 23 kt; warhead 260 kg.

Countermeasures: Decoys: Buck-Wegmann Hot Dog/Silver Dog; IR/chaff dispenser. ESM/ECM: Rascal Octopus (Cutlass intercept, Scorpion jammer).

Combat data systems: AEG/Signal command and fire-control system; Link 11.

Weapons control: ORG73 optronics GPCS. STN Atlas WBA optronic sensor to be fitted.

Radars: Surface search/fire control: Signal WM27, I/J-band.

Navigation: SMA 3 RM 20; I-band.

Programmes: Sold to Tunisia on being decommissioned from the German Navy in 2005.

Structure: Wooden hulled craft.

Operational: 505 and 506 transferred on 4 July 2005, 507 and 508 in September 2005 and 509 and 510 on 13 December 2005. Exocet missiles were not transferred although the containers remain on board

Turkey

TÜRK DENİZ KUVVETLERİ

Country Overview

The modern Republic of Turkey was founded in 1923. Situated in south-east Europe and south-west Asia, the country has an area of 300,848 square miles and is bordered to the north-west by Bulgaria and Greece, to the north-east by Georgia and Armenia, to the east by Iran and to the south with Iraq and Syria. It has a 739 n mile coastline with the Black Sea and 3,149 n mile coastline with the Aegean and Mediterranean Seas. The capital is Ankara, while the leading ports are Istanbul (largest city) and Izmir. In addition, Black Sea ports include Trabzon, Giresun, Samsun, and Zonguldak while Iskenderun and Mersin lie on the Mediterranean. Territorial waters for Black Sea and Aegean (6 n miles) (12 n miles) are claimed and for Aegean (6 n miles). An EEZ (200 n miles) is claimed in the Black Sea only.

Pennant Numbers

From mid-1997 all pennant numbers have been repainted in non-reflective paint.

Marines

Total 3,000

One brigade of HQ company, three infantry battalions, one artillery battalion, support units.

Coast Guard (Sahil Güvenlik)

Formed in July 1982 from the naval wing of the Jandarma Prefix J replaced by SG and paint scheme is very light grey with a diagonal stripe forward. About 1,700 officers and men. Plans to establish a coastal surveillance system were announced in June 2008. The coastline is to be broken down into some 31 sectors in which radar and other sensors would be established. Requests for Proposals were issued to a large number of international and national companies.

Displacement, tons: 1,454 surfaced; 1,586 dived

Dimensions, feet (metres): 203.4 × 20.3 × 18
(67 × 6.2 × 5.5)

Main machinery: Diesel-electric; 4 MTU 12V 396 S883 diesels; 3,800 hp(m) (2.8 MW) sustained; 4 alternators; 1 Siemens motor; 4,000 hp(m) (3.38 MW) sustained; 1 shaft

Speed, knots: 10 surfaced/snorting, 21.5 dived

Range, n miles: 8,200 at 8 kt surfaced; 400 at 4 kt dived

Complement: 30 (8 officers)

Missiles: McDonnell Douglas Sub Harpoon; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.

Torpedoes: 8–21 in (533 mm) bow tubes. GEC-Marconi Tigerfish Mk 24 Mod 2; wire-guided, active/passive homing to 13 km (7 n miles) at 35 kt active; 29 km (15.7 n miles) at 24 kt passive; warhead 134 kg or STN Atlas DM 2A4 (S 357 onwards). Total of 14 torpedoes and missiles.

Mines: In lieu of torpedoes.

Countermeasures: ESM: Racal Porpoise or Racal Sealion (UAP) (S 357 onwards); intercept.

Weapons control: Atlas Elektronik ISUS 83-2 TFCS. Link 11 receive only

Radars: Surface search: I-band

Sonars: Atlas Elektronik CSU 83, passive/active search and attack, medium/high frequency.

Atlas Elektronik TAS-3; towed array; passive low frequency.

STN Atlas flank array; passive low frequency.

Programmes: Order for first two signed in Ankara on 17 November 1987 with option on two more taken up in 1993. Four more ordered 22 July 1998. All built with HDW prefabrication and assembly at Gölcük. The last four are called the Gur class.

Structure: Single hull design. Diving depth, 280 m (820 ft). Kollmorgen masts. Four torpedo tubes can be used for SSM. STN Atlas flank arrays fitted in 1998/99 to the first four

Operational: Endurance, 50 days.

DOLUNAY	S 352	Gölcük, Izmit	8 Mar 1981	22 July 1988	29 June 1990

Displacement, tons: 980 surfaced; 1,185 dived
Dimensions, feet (metres): 200.8 × 20.3 × 17.9
 (61.2 × 6.2 × 5.5)

Main machinery: Diesel-electric, 4 MTU 12V 493 TY60 diesels, 2,400 hp(m) (1.76 MW) sustained; 4 alternators; 1.7 MW, 1 Siemens motor, 4,600 hp(m) (3.38 MW) sustained; 1 shaft
Speed, knots: 11 surfaced; 22 dived
Range, n miles: 7,500 at 8 kt surfaced
Complement: 38 (9 officers)

Torpedoes: 8–21 in (533 mm) tubes, 14 AEG SST 4; wire-guided; active/passive homing to 28 km (15.3 n miles) at 23 kt; 12 km (6.6 n miles) at 35 kt; warhead 260 kg Swim-out discharge

Countermeasures: ESM: Thomson-CSF DR 2000 or Racal Sealion (UAP) or Racal Porpoise, intercept
Weapons control: Signal M8 (S 347-348). Signal Sinbads (remainder). Link 11 receive.

Radars: Surface search: S 638; I-band.
Sonars: Atlas Elektronik CSU 3; hull-mounted; passive/active search and attack, medium/high frequency

Programmes: Designed by Ingenieurkontor, Lübeck for construction by Howaldtswerke, Kiel and sold by Ferrosteal, Essen, all acting as a consortium. Last three built in Turkey with assistance given by HDW

Modernisation: Mid-life upgrades are planned, for the last four boats. The programme, which may include

command system and weapon system upgrades was planned to have started in 2006 although details have not been confirmed.

Structure: A single-hull design with two ballast tanks and forward and after trim tanks. Fitted with snort and remote machinery control. The single screw is slow revving. Very high-capacity batteries with GRP lead-acid cells and battery cooling-by Wilh Hagen. Active and passive sonar, sonar detection equipment, sound ranging gear and underwater telephone. Fitted with two periscopes, radar and Omega receiver. Fore-planes retract. Diving depth, 250 m (820 ft).

Operational: Endurance, 50 days. Some US Mk 37 torpedoes may also be carried.

0 + (6) TYPE 214 CLASS (SSK)

Displacement, tons: 1,700 surfaced; 1,860 dived
Dimensions, feet (metres): 213.3 × 20.7 × 19.7
 (65 × 6.3 × 6)

Main machinery: 1 MTU 16V 396 diesel; 4,243 hp (3.12 MW); 1 Siemens Permasyn motor; 3,875 hp(m) (2.85 MW); 1 shaft; 2 HDW PEM fuel cells, 240 kW; sodium sulphide high-energy batteries

Speed, knots: 20 dived, 12 surfaced
Complement: 27 (5 officers)

Torpedoes: 8–21 in (533 mm) bow tubes.

Countermeasures: Decoys: ESM

Weapons control: STN Atlas.

Radars: Surface search: I-band.

Sonars: Bow, flank and towed arrays.

Programmes: It was announced on 22 July 2008 that negotiations to procure six Type 214 submarines, equipped with Air Independent Propulsion (AIP), were

to be opened with HDW. The boats are to be built at Gölcük Shipyard and delivery of the first boat is planned in 2015.

Structure: The Type 214 is a synthesis of the proven Type 209 design with AIP from the Type 212. Turkey is the third customer for the Type 214. Details are based on those in South Korean service and may be different.

TYPE 214 CLASS

10/2008, Michael Nitz / 1353402

FRIGATES

Notes: The Turkish Frigate 2000 (TF 2000) project for a class of four ships is unlikely to be taken forward until further progress has been made with the MILGEM project.

Displacement, tons: 2,760 light, 3,638 full load
 Dimensions, feet (metres): 453 × 45 × 14.8, 24.5 (sonar)
 (138.1 × 13.7 × 4.5; 7.5)
 Main machinery: 2 GE LM 2500 gas turbines; 41,000 hp
 (30.59 MW) sustained; 1 shaft; cp prop
 2 auxiliary retractable props; 650 hp (484 kW)
 Speed, knots: 29
 Range, n miles: 4,500 at 20 kt
 Complement: 206 (13 officers) including 19 aircrew

Missiles: SSM: 4 McDonnell Douglas Harpoon Block 1B;
 active radar homing to 92 km (50 n miles) at 0.9 Mach;
 warhead 227 kg.
 SAM: 36 Raytheon Standard SM-1MR Block VIB;
 command guidance; semi-active radar homing to 38 km
 (20.5 n miles) at 2 Mach.
 1 Mk 13 Mod 4 launcher for both SSM and SAM missiles ●
 Guns: 1 OTO Melara 3 in (76 mm)/52 Mk 75 ●; 85 rds/min to
 16 km (8.7 n miles) anti-surface; 12 km (6.6 n miles) anti-
 aircraft; weight of shell 6 kg.
 1 General Electric/General Dynamics 20 mm/76
 6-barrelled Mk 15 Vulcan Phalanx ●; 3,000 rds/min
 combined to 1.5 km.
 4–12.7 mm MGs
 Torpedoes: 6–324 mm Mk 32 (2 triple) tubes ●.
 24 Honeywell Mk 46 Mod 5; anti-submarine; active/
 passive homing to 11 km (5.9 n miles) at 40 kt; warhead
 44 kg
 Countermeasures: Decoys: 2 Loral Hycon SRBOC
 6-barrelled fixed Mk 36 ●; IR flares and chaff to 4 km
 (2.2 n miles)
 T-Mk-6 Fanfare/SLO-25 Naxos; torpedo decoy.
 ESM/ECM: SLO-32(V)2 ●; radar warning. Sidekick
 modification adds jammer and deception system.

GÖKÇEADA

(Scale 1 : 1,200), Ian Sturton / 0587565

Combat data systems: NTDS with Link 11 and 14.
 SATCOM.

Weapons control: SWG-1 Harpoon LCS, Mk 92 Mod 4 WCS
 with CAS (Combined Antenna System). The Mk 92 is the
 US version of the Signaal WM28 system. Mk 13 weapon
 direction system. 2 Mk 24 optical directors.

Radars: Air search Raytheon SPS-49(V)4 ●; C/D-band.
 Surface search: ISC Cardion SPS-55 ●; I-band
 Fire control: Lockheed STIR (modified SPG-60) ●; I/J-band.
 Sperry Mk 92 (Signaal WM28) ●; I/J-band.
 Navigation: Furuno; I-band
 Tacan URN 25

Sonars: Raytheon SQS-56; hull-mounted; active search and
 attack; medium frequency.

Helicopters: 1 S-70B Seahawk ●

Programmes: Three approved for transfer by grant aid.
 Transfer delayed by Greek objections, and Turkish sailors

were sent home from the US in mid-1996. Congress
 authorised the go-ahead again on 27 August 1997. Two
 more approved for transfer by sale 30 September 1998,
 one in February 2000, one in April 2002 and one in April
 2003. At least one other *Duncan* FFG 10 for spares. The
 transfer of two further ships *George Philip* FFG 12 and
Sides FFG 14 is under consideration.

Modernisation: The combat data system is being upgraded
 under the 'Genesis' programme. F 492 was the first to
 be modernised and returned to service on 18 May 2007.
 The other ships are to follow. MilSoft awarded a contract
 in August 2006 to develop a Link 11/16 datalink system.
 Mk 41 VLS launchers are to be installed in four ships. The
 arrangement is likely to be similar to the Australian FFG
 upgrade programme.

Structure: A flight deck extension programme, to enable
 S-70 helicopters has been completed. The work involved
 angling the transom as in later USN ships of the class.
 Operational. Sonar towed arrays were not transferred

system. MMS target acquisition sight (for mines, small craft and low-flying aircraft).
Radars: Air search: Lockheed SPS-40B; B-band.
Surface search: Raytheon SPS-10 or Norden SPS-67; G-band.
Navigation: Marconi LN66; I-band.
Fire control: Western Electric SPG-53D/F; I/J band.
Tacan: SRN 15.
Sonars: EDO/General Electric SQS-26CX; bow-mounted; active search and attack; medium frequency.
Helicopters: 1 AB 212ASW

being hit by a Sea Sparrow missile. A second batch of four transferred in 1994. All eight purchased outright in 1999. F 251 decommissioned in 2000, F 257 in 2001, F 252 in 2002, F 254 in 2003, F 256 in 2005, F 255 in 2006 and F 250 in 2007.
Modernisation: Hangar and flight deck enlarged. In 1979 a programme was initiated to fit 3.5 ft bow bulwarks and spray strakes adding 9.1 tons to a displacement. Sea Sparrow SAM replaced by Phalanx 1982-88. Link 11 fitted after transfer. Project 'Kalyon-B' integrated new multipurpose consoles into the combat data system.
Structure: Improved ASROC torpedo reloading capability (note slanting face of bridge structure immediately behind ASROC). Four Mk 32 torpedo tubes are fixed in the midships structure, two to a side, angled out at 45°. The arrangement provides improved loading capability over exposed triple Mk 32 torpedo tubes. A 4,000 lb lightweight anchor is fitted on the port side and an 8,000 lb anchor fits into the after section of the sonar dome.

Programmes: In late 1992 the US offered Turkey four of the class. A proposal was put to Congress in June 1993 and four approved for transfer on a five year lease, plus one more, *Elmer Montgomery* for spares, on a grant basis under the Foreign Assistance Act. The latter replaced the former destroyer *Mauvenet* which was scrapped after

SHIPBORNE AIRCRAFT

Numbers/Type: 14 Agusta AB 212.

Operational speed: 106 kt (196 km/h).

Service ceiling: 14,200 ft (4,330 m).

Range: 230 n miles (426 km).

Role/Weapon systems: Multirole helicopter. Sensors: L3 AQS-18 dipping sonar (in seven aircraft); BAe Ferranti Sea Spray Mk 3 radar, ECM/ESM. Weapons: ASW: two Mk 46 or 244/S torpedoes. ASuW: two Sea Skua missiles.

AB 212

1/2002, M Declerck / 0533250

Numbers/Type: 7 Sikorsky S-70B Seahawk.

Operational speed: 135 kt (250 km/h).

Service ceiling: 10,000 ft (3,050 m).

Range: 600 n miles (1,110 km).

Role/Weapon systems: Contracts placed 3 June 1998 for first four. Second contract for four further aircraft on 31 December 1998. First three delivered 26 April 2002 and second four on 24 July 2003. One aircraft lost in accident. An order for a further 17 aircraft was placed on 24 June 2005. Deliveries to be made from 2009. Helras ASW weapon systems ordered. Sensors: APS-124 search radar; Helras dipping sonar. Weapons: ASW: 2 Mk 46 torpedoes, AGM-114B Hellfire II ASM

SEAHAWK S-70B

6/2002, Selçuk Emre / 0533251

LAND-BASED MARITIME AIRCRAFT

Numbers/Type: 6 CASA CN-235 D/K MPA.

Operational speed: 240 kt (445 km/h).

Service ceiling: 26,600 ft (8,110 m).

Range: 669 n miles (1,240 km).

Role/Weapon systems: Initial batch of two delivered in 2001 and a further four in 2002. First flight with mission systems took place on 18 June 2007. Thales AMACOS mission control system. Long-range maritime patrol for surface surveillance and ASW. Sensors: Ocean Master radar (SAR, ISAR, MTI and air-to-air modes); FLIR; AAR-60 missile warning, DR 3000 A ESM; MAD; Link 11. Weapons: 2 Mk-46 torpedoes.

CN-235

8/2006, Turkish Navy / 1158691

Numbers/Type: 10 Alenia ATR-72 ASW

Operational speed: 255 kt (472 km/h).

Service ceiling: 22,000 ft (6,705 m).

Range: 1,200 n miles (2,200 km).

Role/Weapon systems: Project Meltem-3. Contract signed on 20 July 2005 for ten maritime patrol aircraft which are to receive a modified Thales Airborne Systems Amascos mission and sensor suite. Alenia will conduct platform modifications and perform systems integration on the first aircraft with the assistance of Turkish companies. First flight planned for 2009 and deliveries to take place 2010–2012. Full details of weapons and sensors to be announced. The ATR72-ASW is based on the ATR72-500 which is a stretched version of the ATR42.

 Weapons control: LIROD Mk 2 optronic director.
 Radars: Surface search: Racal Decca 1226; I-band.
 Fire control: Signaal WM28/41; I/J-band.

Programmes: First ordered 3 August 1973 to a Lürssen FPB 57 design.

Modernisation: A mid-life programme includes upgrade to the combat data system, communications and ESM. Work on the first four was completed in 2002. Work on the second four has not been confirmed.

Structure: Aluminium superstructure; steel hulls. The last pair were built with optronic directors which are being retrofitted in all, together with an improved Signaal combat data system

VOLKAN 11/2005, Manuel Declerck / 1153003

8 KARTAL CLASS (FAST ATTACK CRAFT—MISSILE) (PTGF)

Name	No	Builders	Commissioned
DENİZKUŞU	P 321 (ex-P 336)	Lürssen, Vegesack	9 Mar 1967
ATMACA	P 322 (ex-P 335)	Lürssen, Vegesack	9 Mar 1967
ŞAHİN	P 323 (ex-P 334)	Lürssen, Vegesack	3 Nov 1966
KARTAL	P 324 (ex-P 333)	Lürssen, Vegesack	3 Nov 1966
PELİKAN	P 326	Lürssen, Vegesack	11 Feb 1970
ALBATROS	P 327 (ex-P 325)	Lürssen, Vegesack	18 Mar 1970
ŞİMŞEK	P 328 (ex-P 332)	Lürssen, Vegesack	6 Nov 1969
KASIRGA	P 329 (ex-P 338)	Lürssen, Vegesack	26 Nov 1967

Displacement, tons: 160 standard; 190 full load
 Dimensions, feet (metres): 139.4 × 23 × 7.9 (42.5 × 7 × 2.4)
 Main machinery: 4 MTU MD 16V 538 TB90 diesels; 12,000 hp(m) (8.82 MW) sustained; 4 shafts
 Speed, knots: 42
 Range, n miles: 500 at 40 kt
 Complement: 39 (4 officers)

Missiles: SSM: 2 or 4 Kongsberg Penguin Mk 2; IR homing to 27 km (14.6 n miles) at 0.8 Mach; warhead 120 kg.
 Guns: 2 Bofors 40 mm/70; 300 rds/min to 12 km (6.6 n miles); weight of shell 0.96 kg.
 Torpedoes: 2—21 in (533 mm) tubes; anti-surface
 Mines: Can carry 4.
 Radars: Surface search: Racal Decca 1226; I-band.

Operational: *Meltem* sunk in collision with Soviet naval training ship *Khasan* in Bosphorus in 1985. Subsequently salvaged but beyond repair. Although these craft are getting old, there are no plans to decommission them in the short term.

ŞİMŞEK 4/2004, Marco Ghigino / 1133592

1 HISAR (PC 1638) CLASS (LARGE PATROL CRAFT) (PBO)

Name	No	Builders	Commissioned
AKHISAR (ex-PC 1641)	P 114	Gunderson, Portland	Dec 1964

Displacement, tons: 325 standard; 477 full load
Dimensions, feet (metres): 173.7 × 23 × 10.2 (53 × 7 × 3.1)
Main machinery: 2 Fairbanks-Morse diesels, 2,800 hp (2.09 MW); 2 shafts
Speed, knots: 19. **Range, n miles:** 6,000 at 10 kt
Complement: 31 (3 officers)
Guns: 2 Bofors 40 mm/60
Depth charges: 4 projectors; 1 rack (9).
Radars: Surface search: Decca 707; I-band.

Comment: Transferred from the US on build, ASW equipment removed. Three paid off in 2000, one in 2002 and one in 2006. P 114 likely to be decommissioned in 2009 and converted into a museum.

HISAR CLASS

8/2002, C D Yaylali / 0533753

1 TRABZON CLASS (LARGE PATROL CRAFT) (PBO/AGI)

TERME (ex-Trinity) P 531 (ex-M 531)

Displacement, tons: 370 standard; 470 full load
Dimensions, feet (metres): 184 × 30.2 × 9.2 (56 × 9.2 × 2.8)
Main machinery: 2 GM 12-278A diesels; 2,200 hp (1.64 MW); 2 shafts
Speed, knots: 15. **Range, n miles:** 4,500 at 11 kt
Complement: 35 (4 officers)
Guns: 1 Bofors 40 mm/60. 2—12.7 mm MGs.
Radars: Surface search: Racal Decca 1226; I-band.

Comment: Transferred from Canada and recommissioned 31 March 1958. Built by Davie SB Co 1951-53. Of similar type to British Ton class. Pennant number changed in 1991 reflecting use as patrol ship with all minesweeping gear removed.

TRABZON CLASS

6/1999, Selim San / 0080879

6 VEGESACK CLASS (PBO/AGS)

Name	No	Builders	Commissioned
KARAMÜRSEL (ex-Worms)	P 307 (ex-M 620, M 1253)	Amiot, Cherbourg	30 Apr 1960
KEREMPE (ex-Datmold)	P 308 (ex-M 521, ex-M 1252)	Amiot, Cherbourg	20 Feb 1960
KILIMLI (ex-Siegen)	P 309 (ex-M 522, ex-M 1254)	Amiot, Cherbourg	9 July 1960
KOZLU (ex-Harmeln)	P 301 (ex-M 523, ex-M 1251)	Amiot, Cherbourg	15 Oct 1959
KUŞADASI (ex-Vegesack)	P 302 (ex-M 524, ex-M 1250)	Amiot, Cherbourg	18 Sep 1959
KEMER (ex-Passau)	A 582 (ex-M 525, ex-M 1255)	Amiot, Cherbourg	15 Oct 1960

Displacement, tons: 362 standard; 378 full load
Dimensions, feet (metres): 155.1 × 28.2 × 9.5 (473 × 8.6 × 2.9)
Main machinery: 2 MTU MB diesels; 1,500 hp (1.1 MW); 2 shafts, cp props
Speed, knots: 15
Complement: 33 (2 officers)
Guns: 2 Oerlikon 20 mm (twin).
Radars: Navigation: Decca 707; I-band.
Sonars: Simrad; active mine detection; high frequency.

Comment: Transferred by West Germany and recommissioned in the mid-1970s. Sonars were fitted from 1989. Kemer paid off in 1998 but returned as a survey ship in 1999. Kozlu and Kuşadası refitted as patrol ships in 1999 and Karamürsel, Kerempe and Kilimli in 2006.

KEMER

4/2005, Selim San / 1133591

6 TURK CLASS (LARGE PATROL CRAFT) (PC)

Name	No	Builders	Commissioned
AB 27	P 127 (ex-P 1227)	Haliç Shipyard	27 June 1969
AB 28	P 128 (ex-P 1228)	Haliç Shipyard	Apr 1969
AB 29	P 129 (ex-P 1229)	Haliç Shipyard	21 Feb 1969
AB 31	P 131 (ex-P 1231)	Haliç Shipyard	17 Nov 1971
AB 35	P 135 (ex-P 1235)	Taşkızak Shipyard	13 Apr 1976
AB 36	P 136 (ex-P 1236)	Taşkızak Shipyard	13 Apr 1976

Displacement, tons: 170 full load
Dimensions, feet (metres): 132 × 21 × 6.5 (40.2 × 6.4 × 1.7)
Main machinery: 4 SACM AGO V16CSHR diesels, 9,600 hp (7.06 MW)
 2 cruise diesels; 300 hp (220 kW); 2 shafts

Speed, knots: 22
Complement: 31 (3 officers)
Guns: 1 or 2 Bofors 40 mm/70.
 1 Oerlikon 20 mm (in those with 1—40 mm). 2—12.7 mm MGs
A/S mortars: 1 Mk 20 Mousetrap 4 rocket launcher; range 200 m; warhead 50 kg.
Depth charges: 1 rack
Radars: Surface search: Racal Decca; I-band.
Sonars: Plessey PMS 26; hull-mounted; active search and attack; high frequency.

Comment: Pennant numbers changed in 1991. Similar to SG 21 Coast Guard class. One to Georgia (AB 30) in December 1998, one to Azerbaijan (AB 34) in July 2000 and one to Kazakhstan (AB 26) in July 2001. AB 33 decommissioned in 2005.

4 PGM 71 CLASS (LARGE PATROL CRAFT) (PC)

AB 21-24 (ex-PGM 104-107) P121-124 (ex-P1221-1224)

Displacement, tons: 130 standard; 147 full load
Dimensions, feet (metres): 101 × 21 × 7 (30.8 × 6.4 × 2.1)
Main machinery: 3 GM diesels 2,040 hp (1.52 MW); 2 shafts
Speed, knots: 18.5. **Range, n miles:** 1,500 at 10 kt
Complement: 31 (3 officers)
Guns: 1 Bofors 40 mm/60. 4 Oerlikon 20 mm (2 twin). 1—7.62 mm MG
A/S mortars: 2 Mk 22 Mousetrap 8 rocket launchers; range 200 m; warhead 50 kg.
Depth charges: 2 racks (4).
Radars: Surface search: Raytheon 1500B; I band.
Sonars: EDO SQS-17A; hull-mounted; active attack; high frequency.

Comment: Built by Peterson, Sturgeon Bay and commissioned 1967-68. Transferred from US almost immediately after completion. Pennant numbers changed in 1991.

AB 24

11/2006, Manuel Declerck / 1153506

0 + 1 (5) DEARSAN PATROL CRAFT (PC)

Name	No	Builders	Laid down	Launched	Commissioned
-	-	Dearsan Shipyard, Istanbul	3 May 2008	2010	2011

Displacement, tons: 400 full load
Dimensions, feet (metres): 182.9 × 29.0 × 8.2 (55.75 × 8.85 × 2.5)
Main machinery: 2 MTU 16V 4000 M 90 diesels; 7,300 hp (5.44 MW); 2 shafts; cp props
Speed, knots: 25. **Range, n miles:** 2,000 at 12 kt
Complement: 34
Guns: 2—40 mm/70 (1 twin) 2—12.7 mm stabilised MGs.
A/S mortars: 2 Asefir 6-barrelled launchers.
Countermeasures: To be announced.
Combat data systems: To be announced.
Weapons control: Asefir 300
Radars: Surface search/navigation: I-band
Sonars: Simrad SP92; hull-mounted; high frequency; 20-30 kHz.

Comment: Contract signed with Dearsan Shipyard, Istanbul, on 23 August 2007 for the construction of 16 anti-submarine patrol craft to be built in four batches of four. The origin of the design has not been announced but may have been developed with foreign assistance. Steel hull and superstructure. The craft are to be employed on patrol duties in the vicinity of ports and bases.

DEARSAN PATROL CRAFT (model)

2/2007, C D Yaylali / 1167967

2 KAAN 15 CLASS (FAST INTERVENTION CRAFT) (HSIC)

Displacement, tons: 19 full load
Dimensions, feet (metres): 54.8 x 13.2 x 3.9 (16.7 x 4.04 x 1.2)
Main machinery: 2 MTU 12V 183 TE93 diesels; 2,588 hp(m) (1.93 MW); 2 Arneson ASD 12 B1L surface drives
Speed, knots: 65
Range, n miles: 350 at 35 kt
Complement: 2 plus 10 mission crew

Comment: Onuk MRTP 15 advanced composites design. Two delivered in 2002 for Turkish Special Forces

KAAN 15 CLASS 10/2000 / 0106641

2 ERTUĞRUL (TERREBONNE PARISH) CLASS (LSTH/ML)

Name	No	Builders	Commissioned
ERTUĞRUL (ex-Windham County LST 1170)	L 401	Christy Corporation	15 Dec 1954
SERDAR (ex-Westchester County LST 1167)	L 402	Christy Corporation	10 Mar 1954

Displacement, tons: 2,590 light; 5,800 full load
Dimensions, feet (metres): 384 x 55 x 17 (117.1 x 16.8 x 5.2)
Main machinery: 4 GM 16-278A diesels; 6,000 hp (4.48 MW); 2 shafts; cp props
Speed, knots: 15
Complement: 163 (14 officers)
Military lift: 395 troops, 2,200 tons cargo; 4 LCVPs
Guns: 8 USN 3 in (76 mm)/50 (3 twin).
Weapons control: 2 Mk 63 GFCS.
Radars: Surface search. Racal Decca 1226, I-band.
Fire control: 2 Western Electric Mk 34; UJ-band.

Comment: Transferred by US and recommissioned 3 October 1973 and 24 February 1975 respectively. Purchased outright 6 August 1987. Marisat fitted.

SERDAR 1/2006*, Guy Toremans / 1353413

AMPHIBIOUS FORCES

Notes: (1) The prefix 'Ç' for smaller amphibious vessels stands for 'Çıkarma Gemisi' (landing vessel) and indicates that the craft are earmarked for national rather than NATO control.

(2) A Request for Information for a new landing platform dock was issued on 6 April 2007. Capable of both military and humanitarian operations, the ship is expected to be of the order of 12-15,000 tons and to be capable of carrying 600 troops. Entry into service was planned to be 2012 although this may be delayed by funding constraints.

(3) Plans to acquire two Landing Ship Tank (LST) were announced on 19 January 2007.

1 OSMAN GAZI CLASS (LSTH/ML)

Name	No	Builders	Launched	Commissioned
OSMAN GAZI	NL 125	Taşkızak Yard, Istanbul	20 July 1990	27 July 1994

Displacement, tons: 3,773 full load
Dimensions, feet (metres): 344.5 x 52.8 x 15.7 (105 x 16.1 x 4.8)
Main machinery: 2 MTU 12V 1183 TB73 diesels; 8,800 hp(m) (6.47 MW); 2 shafts
Speed, knots: 17
Range, n miles: 4,000 at 15 kt
Military lift: 900 troops; 15 tanks; 4 LCVPs
Guns: 2 Oerlikon 35 mm/90 (twin), 4 Bofors 40 mm/70 (2 twin), 2 Oerlikon 20 mm.
Radars: Navigation: Racal Decca, I-band
Helicopters: Platform for 1 large.

Comment: Laid down 7 July 1989. Full NBCD protection. Equipped with a support weapons co-ordination centre to control amphibious operations. The ship has about a 50 per cent increase in military lift capacity compared with the Sarucabey class. Secondary role as minelayer. Second of class cancelled in 1991 and *Osman Gazi* took a long time to complete. Marisat fitted.

OSMAN GAZI 5/2007, Selim San / 1167875

2 SARUCABEY CLASS (LSTH/ML)

Name	No	Builders	Launched	Commissioned
SARUCABEY	NL 123	Taşkızak Naval Yard	30 July 1981	17 July 1984
KARAMÜRSELBEY	NL 124	Taşkızak Naval Yard	26 July 1984	19 June 1987

Displacement, tons: 2,600 full load
Dimensions, feet (metres): 301.8 x 45.9 x 7.5 (92 x 14 x 2.3)
Main machinery: 3 diesels, 4,320 hp (3.2 MW); 3 shafts
Speed, knots: 14
Military lift: 600 troops, 11 tanks, 12 jeeps; 2 LCVPs
Guns: 4 Bofors 40 mm/70, 4 Oerlikon 20 mm (2 twin)
Mines: 150 in lieu of amphibious lift.
Radars: Navigation: Racal Decca 1226; I-band
Helicopters: Platform only

Comment: *Sarucabey* is an enlarged *Çakabey* design more suitable for naval requirements. Dual-purpose minelayers. NL 124 has superstructure one deck lower

KARAMÜRSELBEY 9/2007, C D Yaylalı / 1353401

1 EDICTYPE (LCT)

Ç 120

Displacement, tons: 580 full load
Dimensions, feet (metres): 186.9 x 39.4 x 4.6 (57 x 12 x 1.4)
Main machinery: 3 GM 6-71 diesels, 522 hp (390 kW) sustained; 3 shafts
Speed, knots: 8.5
Range, n miles: 600 at 10 kt
Complement: 15
Military lift: 100 troops; up to 5 tanks
Guns: 2 Oerlikon 20 mm, 2—12.7 mm MGs.
Radars: Navigation: Racal Decca; I-band.

Comment: Vessel built at Gölcük Naval Shipyard in 1973. French EDIC type.

EDICTYPE 2/1996, C D Yaylalı / 0106688

OSMAN GAZI 6/2004, Cemil Busquets i Vilanova / 1133590

SURVEY SHIPS

Notes: *Kemer A 582* (ex-M 525) is listed under *Vegesack* class in *Patrol Forces*.

2 SILAS BENT CLASS (AGS)

Name	No	Builders	Commissioned
ÇESME (ex- <i>Silas Bent</i>)	A 599 (ex-TAGS 26)	Amer can SB Co, Lorain	23 July 1965
ÇANDARLI (ex- <i>Kane</i>)	A 588 (ex-TAGS 27)	Christy Corp, Sturgeon Bay	19 May 1967

Displacement, tons: 2,843 full load
 Dimensions, feet (metres): 285.3 × 48 × 16.1 (87 × 14.6 × 4.6)
 Main machinery: Diesel-electric; 2 Alco diesel generators; 1 Westinghouse/GE motor; 3,600 hp (2.69 MW); 1 shaft; cp prop; bow thruster 350 hp (261 kW)
 Speed, knots: 15
 Range, n miles: 12,000 at 14 kt
 Complement: 31 plus 28 spare
 Radars: Navigation: RM 1650/SX; I-band.

Comment: Çesme transferred from US on 28 October 1999 and Çandarlı on 14 March 2001.

ÇANDARLI 11/2005, Manuel Declercq / 1153306

1 SURVEY SHIP (AGS)

Name	No	Builders	Launched	Commissioned
ÇUBUKLU (ex- <i>Y 1251</i>)	A 594	Gölcük	17 Nov 1983	24 June 1987

Displacement, tons: 680 full load
 Dimensions, feet (metres): 132.8 × 31.5 × 10.5 (40.5 × 9.6 × 3.2)
 Main machinery: 1 MWM diesel; 820 hp(m) (603 kW); 1 shaft, cp prop
 Speed, knots: 11
 Complement: 37 (6 officers)
 Guns: 2 Oerlikon 20 mm
 Radars: Navigation: Racal Decca; I-band.

Comment: Qubit advanced integrated navigation and data processing system fitted in 1991.

ÇUBUKLU 7/2006, Selim San / 1353414

2 SURVEY CRAFT (AGSC)

MESAHA 1 Y 35 MESAHA 2 Y 36

Displacement, tons: 38 full load
 Dimensions, feet (metres): 52.2 × 14.8 × 4.3 (15.9 × 4.5 × 1.3)
 Main machinery: 2 GM 6-71 diesels; 348 hp (260 kW) sustained; 2 shafts
 Speed, knots: 10 Range, n miles: 600 at 10 kt
 Complement: 9

Comment: Completed in 1994 and took the names and pennant numbers of their deleted predecessors.

MESAHA 2 8/1994, C D Yaylali / 0080868

Displacement, tons: 94 full load
Dimensions, feet (metres): 94.5 x 19.7 x 6.2 (28.8 x 6 x 1.9)
Main machinery: 1 MTU diesel; 1 shaft
Speed, knots: 12. **Range, n miles:** 240 at 12 kt
Complement: 15

Comment: Naval Academy training craft ordered in 1998.

E 1 7/1999, Selçuk Emre / 0080892

AUXILIARIES

Notes: (1) The tendering process for the procurement of a Submarine Rescue Mother Ship and for two tenders was initiated by the issue of a Request for Information on 25 July 2006. The broad requirement is for a national rescue system which would be interoperable with NATO assets.
 (2) A Request for Information for two Rescue and Towing ships was released on 25 July 2006.

1 TRANSPORT SHIP (AK)

Name	No	Builders	Commissioned	Recommissioned
ISKENDERUN	A 1600	Camialti Shipyard, Istanbul	1991	25 July 2002

Measurement, tons: 10,583 gross; 3,872 net
Dimensions, feet (metres): 418.4 x 64.0 x 17.7 (127.5 x 19.5 x 5.4)
Main machinery: 4 Skoda and Sulzer diesels; 16,800 hp (12.52 MW); 2 shafts
Speed, knots: 15.5
Complement: 129 (11 officers)

Comment: Car ferry (214 cars and passengers) built to Polish design. Commissioned in Turkish Navy on 25 July 2002.

ISKENDERUN 3/2004, Selim San / 0587559

2 FLEET SUPPORT SHIPS (AORH)

Name	No	Builders	Laid down	Launched	Commissioned
AKAR	A 580	Gölcük Naval Dockyard	5 Aug 1982	17 Nov 1983	9 Sep 1987
YARBAY KUDRET GÜNGÖR	A 595	Sedaf Shipyard, Istanbul	5 Nov 1993	15 Nov 1994	24 Oct 1995

Displacement, tons: 19,350 full load
Dimensions, feet (metres): 475.9 x 74.8 x 27.6 (145.1 x 22.8 x 8.4)
Main machinery: 1 diesel, 6,500 hp(m) (4.78 MW); 1 shaft
Speed, knots: 16
Range, n miles: 6,000 at 14 kt
Complement: 203 (14 officers)
Cargo capacity: 16,000 tons oil fuel (A 580); 9,980 tons oil fuel (A 595), 2,700 tons water (A 595), 80 tons hub oil (A 595); 500 m³ stores (A 595)
Guns: 2–3 in (76 mm)/50 (twin) Mk 34 (A 580), 1–20 mm/76 Mk 15 Vulcan Phalanx (A 595), 2 Bofors 40 mm/70
Weapons control: Mk 63 GFCS (A 580)
Radars: Fire control: SPG-34; I-band (A 580)
Navigation: Racal Decca 1226; I-band.
Helicopters: Platform for 1 medium.

Comment: Helicopter flight deck aft. *Akar* is primarily a tanker whereas the second ship of the same type is classified as logistic support vessel. *Gungör* was the first naval ship to be built at a civilian yard in Turkey.

YARBAY KUDRET GÜNGÖR 5/2007, Selim San / 1167869

1 SUPPORT TANKER (AOTL)

Name	No	Builders	Launched	Commissioned
TAŞKIZAK	A 570	Teşizak Naval DY, Istanbul	28 July 1983	14 Aug 1985

Displacement, tons: 1,440 full load
Dimensions, feet (metres): 211.9 x 30.8 x 11.5 (64.6 x 9.4 x 3.5)
Main machinery: 1 diesel; 1,400 hp(m) (1.03 MW); 1 shaft
Speed, knots: 13
Complement: 57
Cargo capacity: 800 tons
Guns: 1 Bofors 40 mm/60, 2 Oerlikon 20 mm.
Radars: Navigation: Racal Decca 1226; I-band.

Comment: Laid down 20 July 1983.

TAŞKIZAK (Doğan class in background) 5/1990, A Sheldon Duplax / 0080893

2 SUPPORT TANKERS (AOT)

Name	No	Builders	Commissioned
ALBAY HAKKI BURAK	A 571	RMK Marine, Tuzla, Istanbul	21 Nov 1999
YUZBASIIHSAN TOLUNAY	A 572	RMK Marine, Tuzla, Istanbul	8 June 2000

Displacement, tons: 3,300 full load
Measurement, tons: 6,750 dwt
Dimensions, feet (metres): 359.2 x 56.4 x 23.0 (109.5 x 17.2 x 7.0)
Main machinery: 2 Caterpillar 3606TA diesels; 5,522 hp(m) (4.06 MW); 2 shafts
Speed, knots: 13
Complement: 50
Cargo capacity: 2,355 m³ dieso

Comment: Ordered in 1998.

ALBAY HAKKI BURAK 6/2002, Selçuk Emre / 0533258

1 SUPPORT TANKER (AORL)

Name	No	Builders	Commissioned
BINBAŞI SADETTİN GÜRCAN	A 573	Taşkızak Naval DY, İstanbul	4 Sep 1970

Displacement, tons: 1,505 standard; 4,460 full load
 Dimensions, feet (metres): 294.2 × 38.7 × 17.7 (89.7 × 11.8 × 5.4)
 Main machinery: Diesel-electric; 4 GM 16 567A diesels; 5,600 hp (4.12 MW); 4 generators; 2 motors, 4,400 hp (3.28 MW); 2 shafts
 Speed, knots: 16
 Complement: 63
 Guns: 2 Oerlikon 20 mm.
 Radars: E/F-band.

Comment: Main armament removed. Can be used for replenishment at sea.

BINBAŞI SADETTİN GÜRCAN 6/1995, Turkish Navy / 0080895

3 WATER TANKERS (AWT)

SÖĞÜT (ex-FW 2) A 598 (ex-Y 1217)	KAVAK (ex-FW 4) A 800	ÇINAR (ex-FW 1) A 581
-----------------------------------	-----------------------	-----------------------

Displacement, tons: 626 full load
 Dimensions, feet (metres): 144.4 × 25.6 × 8.2 (44.1 × 7.8 × 2.5)
 Main machinery: 1 MWM diesel; 230 hp(m) (169 kW); 1 shaft
 Speed, knots: 9.5
 Range, n miles: 2,150 at 9 kt
 Complement: 12
 Cargo capacity: 340 tons

Comment: Söğüt acquired from West Germany and commissioned 12 March 1976. Pennant number changed in 1991. Kavak transferred from Germany 12 April 1991 and Çınar in early 1996.

KAVAK 6/2007, Selim San / 1167857

2 WATER TANKERS (AWT)

Name	No	Builders	Commissioned
VAN	A 597 (ex-Y 1208)	Camialti Shipyard	12 Aug 1968
ULUBAT	A 596 (ex-Y 1209)	Camialti Shipyard	3 July 1969

Displacement, tons: 1,250 full load
 Dimensions, feet (metres): 174.2 × 29.5 × 9.8 (53.1 × 9 × 3)
 Main machinery: 1 diesel; 650 hp(m) (478 kW); 1 shaft
 Speed, knots: 14
 Complement: 39 (3 officers)
 Cargo capacity: 700 tons
 Guns: 1 Oerlikon 20 mm.
 Radars: Racal Decca 707, I-band

Comment: Pennant numbers changed in 1991.

VAN 6/2003, Turkish Navy / 0567542

4 WATER TANKERS (YW)

PINAR 2 Y 112 (ex-Y 1212)	PINAR 4 Y 114 (ex-Y 1214)
PINAR 3 Y 113 (ex-Y 1213)	PINAR 6 Y 116 (ex-Y 1216)

Displacement, tons: 300 full load
 Dimensions, feet (metres): 110.2 × 27.9 × 5.9 (33.6 × 8.5 × 1.8)
 Main machinery: 1 GM diesel; 225 hp (168 kW); 1 shaft
 Speed, knots: 11
 Complement: 12
 Cargo capacity: 150 tons

Comment: Built by Taşkızak Naval Yard. Details given for Pinar 3, 4 and 6, sisters to harbour tankers H 500-502. Pinar 2 built in 1958 of 1,300 tons full load, 167.3 × 27.9 ft (51 × 8.5 m).

PINAR 3

4/2007, C D Yaylali / 1167951

3 HARBOUR TANKERS (YW)

H 500-502 Y 140-142 (ex-Y 1231-1233)

Displacement, tons: 300 full load
 Dimensions, feet (metres): 110.2 × 27.9 × 5.9 (33.6 × 8.5 × 1.8)
 Main machinery: 1 GM diesel; 225 hp(m) (165 kW); 1 shaft
 Speed, knots: 11
 Complement: 12
 Cargo capacity: 150 tons

Comment: Sisters of water tankers of Pinar series. Built at Taşkızak in early 1970s

H 501

5/2007, Selim San / 1167968

1 HARBOUR TANKER (YO)

GÖLCÜK Y 50

Displacement, tons: 310 full load
 Dimensions, feet (metres): 108.8 × 19.2 × 9.2 (33.2 × 5.8 × 2.8)
 Main machinery: 1 diesel; 650 hp(m) (404 kW); 1 shaft
 Speed, knots: 12
 Complement: 12

GÖLCÜK

7/1992, Selçuk Emre / 0080938

1 DIVER CLASS (SALVAGE SHIP) (ARS)

Name	No	Builders	Launched	Commissioned
İŞİN (ex-Safeguard ARS 25)	A 589	Besalt Rock, Napa	20 Nov 1943	31 Oct 1944

Displacement, tons: 1,530 standard; 1,970 full load
 Dimensions, feet (metres): 213.5 × 41 × 13 (65.1 × 12.5 × 4)
 Main machinery: Diesel-electric; 4 Cooper-Bessmer GSB-8 diesels; 3,420 hp (2.65 MW); 4 generators; 2 motors; 2 shafts
 Speed, knots: 14.8
 Complement: 110
 Guns: 2 Oerlikon 20 mm.

Comment: Transferred from US 28 September 1979 and purchased outright 6 August 1987.

İŞİN

4/2005, C D Yaylali / 1133575

842 Turkey/Auxiliaries

1 CHANTICLEER CLASS (SUBMARINE RESCUE SHIP) (ASR)

Name	No	Builders	Launched	Commissioned
AKIN (ex-Graenlet ASR 10)	A 585	Moore SB & DD Co	12 July 1942	29 May 1943

Displacement, tons: 1,653 standard; 2,321 full load
 Dimensions, feet (metres): 251.5 x 44 x 16 (76.7 x 13.4 x 4.9)
 Main machinery: Diesel-electric; 4 Alco 539 diesels; 3,532 hp (2.63 MW); 4 generators; 1 motor; 1 shaft
 Speed, knots: 15
 Complement: 111 (9 officers)
 Guns: 1 Bofors 40 mm/60. 4 Oerlikon 20 mm (2 twin).
 Radars: Navigation. Racal Decca 1226; I-band.

Comment: Transferred from US, recommissioned 23 December 1970 and purchased 15 February 1973. Carries a Diving Bell.

AKIN 9/2008*, Arda Mevlutoglu / 1353415

1 TRANSPORT (AKS/AWT)

Name	No	Builders	Commissioned
KARADENİZ EREĞLİ	A 592 (ex-Y 1167)	Erdem	30 Aug 1982

Displacement, tons: 820 full load
 Dimensions, feet (metres): 166.3 x 26.2 x 9.2 (50.7 x 8 x 2.8)
 Main machinery: 1 diesel; 1,440 hp (1.06 MW); 1 shaft
 Speed, knots: 10
 Complement: 23 (3 officers)
 Cargo capacity: 300 tons
 Guns: 1 Oerlikon 20 mm

Comment: Funnel-aft coaster type. Pennant number changed in 1991. Used as a stores ship.

2 BARRACK SHIPS (YPB)

YÜZBAŞI NAŞİT ÖNGÖREN (ex-US APL 47) Y 38 (ex-Y 1204)
 BINBAŞI METİN SÜLÜŞ (ex-US APL 53) Y 39 (ex-Y 1205)

Comment: Ex-US barrack ships transferred on lease: Y 1204 in October 1972 and Y 1205 on 8 December 1974. Y 1204 based at Ereğli and Y 1205 at Golcük. Purchased outright June 1987. Pennant numbers changed in 1991.

12 SMALL TRANSPORTS (YFB/YE)

ŞALOPA 11-12 ŞALOPA 18 ŞALOPA 22-24 ŞALOPA 27 ŞALOPA 30-33 YAKIT Y 139

Comment: Of varying size and appearance. Pennant numbers changed in 1991.

1 BOOM DEFENCE VESSEL (ABU)

Name	No	Builders	Commissioned
AG 6 (ex-AN 93, ex-Netherlands Cerberus A 895)	P 306	Bethlehem Steel Corporation, Staten Island, NY	10 Nov 1952

Displacement, tons: 780 standard, 855 full load
 Dimensions, feet (metres): 165 x 33 x 10 (50.3 x 10.1 x 3)
 Main machinery: Diesel-electric; 2 GM 8-268A diesels; 880 hp (656 kW); 2 generators; 1 motor; 1 shaft
 Speed, knots: 12.8
 Range, n miles: 5,200 at 12 kt
 Complement: 32 (3 officers)
 Guns: 1 USN 3 in (76 mm)/50 4 Oerlikon 20 mm.
 Radars: Navigation: Racal Decca 1226; I-band.

Comment: Netlayer. Transferred from US to Netherlands in December 1952. Used first as a boom defence vessel and latterly as salvage and diving tender since 1981 but retained her netlaying capacity. Handed back to US Navy on 17 September 1970 but immediately turned over to the Turkish Navy under grant aid.

AG 6 7/1995, Frank Behling / 0080905

1 BOOM DEFENCE VESSEL (ABU)

Name	No	Builders	Commissioned
AG 5 (ex-AN 104)	P 305	Kröger, Rendsburg	25 Feb 1962

Displacement, tons: 960 full load
 Dimensions, feet (metres): 173.8 x 35 x 13.5 (53 x 10.7 x 4.1)
 Main machinery: Diesel-electric; 1 MAN G7V40/60 diesel generator; 1 motor; 1,470 hp (1.08 MW); 1 shaft
 Speed, knots: 12
 Range, n miles: 6,500 at 11 kt
 Complement: 32 (3 officers)
 Guns: 1 Bofors 40 mm/60. 3 Oerlikon 20 mm.
 Radars: Navigation: Racal Decca 1226; I-band.

Comment: Netlayer P 305 built in US offshore programme for Turkey.

AG 5 8/2008*, C D Yaylali / 1353415

DEĞIRMENDERE (ex-Cantauro)	A 576 (ex-A 674)	Chantiers de la Rochelle	14 May 1974

Displacement, tons: 1,454 full load
 Dimensions, feet (metres) 167.3 x 37.8 x 18.6 (51 x 11.5 x 5.7)
 Main machinery: 2 SACM AGO 240 V12 diesels; 4,600 hp(m) (3.38 MW); 1 shaft; Kort nozzle
 Speed, knots: 13
 Range, n miles: 9,500 at 13 kt
 Complement: 37 (3 officers)
 Radars: Racal Decca RM 1226 and Racal Decca 060, I-band

Comment: Transferred from French Navy 16 March 1999. Recommissioned after refit 22 July 1999. Bollard pull 60 tons.

DEĞIRMENDERE 1/2008, Selim San / 1353419

1 OCEANTUG (ATR)

DARICA A 578 (ex-Y 1125)

Displacement, tons: 750 full load
Dimensions, feet (metres): 134.2 x 32.2 x 12.8 (40.9 x 9.8 x 3.9)
Main machinery: 2 ABC diesels; 4,000 hp (2.94 MW); 2 shafts
Speed, knots: 14
Range, n miles: 2,500 at 14 kt

Comment: Built at Taşkızak Naval Yard and commissioned 13 June 1991. Equipped for firefighting and as a torpedo tender. Pennant number changed in 1991.

DARICA 11/1994, van Ginderen Collection / 0080910

COAST GUARD (SAHIL GÜVENLIK)

Notes: (1) A Request for Information for the procurement of up to 16 patrol craft has been issued. The broad requirement is for craft of about 50 m and 400 tons capable of speeds of over 25 kt.

(2) Patrol craft based in north Cyprus include KKTC SG 101 (*Raif Denktas*), two 40 m craft (KKTC SG 01-02), two Kaan 15 class (KKTC SG 11, KKTC SG 12), two 14 m craft (KKTC SG 102-103) and a converted cabin cruiser KKTC SG 104.

(3) Four Vigilante class Boston Whalers were acquired by the Police in September 1999.

KKTC SG 104 6/2004, Selçuk Emre / 1133570

0 + 4 OFFSHORE PATROL VESSELS (PSOH)

Name	No	Builders	Laid down	Launched	Commissioned

Displacement, tons: 1,520 full load
Dimensions, feet (metres): 290.0 x 40.0 x 15.1 (88.4 x 12.2 x 4.6)
Main machinery: 2 diesels; cp props, bow thruster
Speed, knots: 22 **Range, n miles:** 3,500 at 14 kt
Complement: 60 (5 officers)
Guns: 1—76 mm 2—25 mm
Weapons control: To be announced
Radars: Surface search: To be announced.
Fire control: To be announced
Navigation: To be announced.
Helicopters: 1 AB 412

Comment: Contract signed with RMK Marine on 16 January 2007 for the construction of four offshore patrol vessels to carry out SAR and EEZ patrol duties. The design, based on the Italian Sirio class, includes a telescopic hangar, two high-speed RIBs, two firefighting monitors and anti-pollution equipment.

OPV 10/2007, Turkish Navy / 1167863

14 LARGE PATROL CRAFT (WPB)

SG 80-91 KKTC SG 01-02

Displacement, tons: 195 full load
Dimensions, feet (metres): 133.5 x 23.3 x 7.2 (40.7 x 7.1 x 2.2)
Main machinery: 2 diesels; 5,700 hp(m) (4.19 MW); 2 shafts
Speed, knots: 27
Complement: 25
Guns: 1 Breda 40 mm/70, 2—12.7 mm MGs.
Radars: Surface search: Racal Decca, I-band

Comment: All built at Taşkızak Shipyard except SG 89 which was built at İstanbul Shipyard SG 80-82 commissioned in 1996, 83-84 in 1997, 85 in 1998, 86-87 in 2000, 89-90 in 2001, 88 in 2002 and 91 in 2004. Two based in northern Cyprus with pennant numbers KKTC SG 01-02

SG 90 6/2008, C D Yaylali / 1353420

KKTC SG 02 6/2004, Selçuk Emre / 1044200

14 LARGE PATROL CRAFT (WPB)

SG 121-134

Displacement, tons: 180 full load
Dimensions, feet (metres): 132 x 21 x 6.5 (40.2 x 6.4 x 1.7)
 131.2 x 21.3 x 4.9 (40 x 6.5 x 1.5) (SG 130-134)
Main machinery: 2 SACM AGO 195 V16 CSHR diesels; 4,800 hp(m) (3.53 MW) sustained
 2 cruise diesels; 300 hp(m) (220 kW); 2 shafts
Speed, knots: 22
Complement: 25
Guns: 1 or 2 Bofors 40 mm/60, 2—12.7 mm MGs.
Radars: Surface search: Racal Decca 1226, I-band.

Comment: SG 121 and 122 built by Gölcük Naval Yard, remainder by Taşkızak Naval Yard. SG 134 commissioned in 1977, remainder 1968-71. SG 130-134 have minor modifications—knuckle at bow, radar stirrup on bridge and MG on superstructure sponsons. These are similar craft to the Turk class listed under *Patrol Forces* for the Navy

SG 131 6/2007, C D Yaylali / 1167963

10 SAR 33 TYPE (LARGE PATROL CRAFT) (WPB)

SG 61-70

Displacement, tons: 180 full load
Dimensions, feet (metres): 113.5 x 28.3 x 9.7 (34.6 x 8.6 x 3)
Main machinery: 3 SACM AGO 195 V16 CSHR diesels; 7,200 hp(m) (5.29 MW) sustained;
 3 shafts; cp props
Speed, knots: 33. **Range, n miles:** 450 at 24 kt; 550 at 18 kt
Complement: 24
Guns: 1 Bofors 40 mm/60, 2—12.7 mm MGs.
Radars: Surface search: Racal Decca; I-band

Comment: Prototype Sarter design ordered from Abeking & Rasmussen, Lemwerder in May 1976. The remainder were built at Taşkızak Naval Yard, İstanbul between 1979 and 1981. Fourteen of this class were to have been transferred to Libya but the order was cancelled. Two delivered to Saudi Arabia. The engines have been governed back and the top speed correspondingly reduced from the original 12,000 hp and 40 kt.

SG 67 5/2004, Martin Mokrus / 0589878

4 SAR 35 TYPE (LARGE PATROL CRAFT) (WPB)

SG 71-74

Displacement, tons: 210 full load
Dimensions, feet (metres): 120 × 28.3 × 6.2 (36.6 × 8.6 × 1.9)
Main machinery: 3 SACM AGO 195 V16 CSHR diesels; 7,200 hp(m) (5.29 MW) sustained; 3 shafts, cp props
Speed, knots: 33
Range, n miles: 450 at 24 kt, 550 at 18 kt
Complement: 24
Guns: 1 Bofors 40 mm/60 2—12.7 mm MGs.
Radars: Surface search: Racal Decca 1226; I-band

Comment: A slightly enlarged version of the Serter designed SAR 33 Type built by Taşkızak Shipyard between 1985 and 1987. A contract was signed on 21 May 2007 with Istanbul Denizcilik Gemi İnşaa Shipyard for the modernisation of the main machinery.

SG 71 8/2000, C D Yeylali / 0108645

9 KAAN 29 CLASS (LARGE PATROL CRAFT) (WPBF)

SG 101-109

Displacement, tons: 98 full load
Dimensions, feet (metres): 104.0 × 22.0 × 4.6 (31.7 × 6.7 × 1.4)
Main machinery: 2 MTU 16V 400 M90 diesels; 7,393 hp(m) (5.44 MW); 2 MJP 753DD waterjets
Speed, knots: 49
Range, n miles: 750 at 20 kt
Complement: 13 (2 officers)
Guns: 4—12.7 mm MGs.
Radars: Surface search/navigation: Raytheon; I-band

Comment: All built at Yonca Shipyard. Onuk MRTP 29 design. Advanced composites structure. TCSG 101-103 commissioned 25 July 2001, TCSG 104-105 on 25 July 2002, TCSG 106-108 in 2003 and TCSG 109 in February 2004. A stabilised machine gun is under development for installation in the Kaan 29 and 33 classes.

SG 107 6/2007, Turkish Coast Guard / 1353421

13 + 9 KAAN 33 CLASS (LARGE PATROL CRAFT) (WPBF)

SG 301-313

Displacement, tons: 115 full load
Dimensions, feet (metres): 116.8 × 22.0 × 4.7 (35.6 × 6.7 × 1.4)
Main machinery: 2 MTU 16V 4000 M90 diesels; 7,396 hp(m) (5.44 MW); 2 MJP 753DD waterjets
Speed, knots: 47
Range, n miles: 650 at 20 kt
Complement: 18 (2 officers)
Guns: 4—12.7 mm MGs
Radars: Navigation: Raytheon; I-band.

Comment: All built at Yonca Shipyard. Onuk MRTP 33 design. Advanced composites structure TCSG 301 commissioned in July 2004, TCSG 302 in July 2005, TCSG 303 in September 2005, TCSG 304-306 in September 2006, TCSG 307 in December 2006, TCSG 308 (April 2007), TCSG 309 (July 2007), TCSG 310 (April 2008), TCSG 311 (July 2008), TCSG 312 (October 2008) and TCSG 313 (January 2009). A further nine craft have been ordered. ASELSAN stabilised gun (STAMP) fitted in some Kaan 33 and 29 craft

SG 307 (with STAMP mounting) 6/2008, Yonca-Onuk / 1353422

4 KW 15 CLASS (LARGE PATROL CRAFT) (WPB)

SG 113-114 SG 118-119

Displacement, tons: 70 full load
Dimensions, feet (metres): 94.8 × 15.4 × 4.6 (28.9 × 4.7 × 1.4)
Main machinery: 2 MTU diesels; 2,700 hp(m) (1.98 MW); 2 shafts
Speed, knots: 20. **Range, n miles:** 550 at 16 kt
Complement: 16
Guns: 1 Bofors 40 mm/60. 2 Oerlikon 20 mm
Radars: Surface search: Racal Decca; I-band

Comment: Built by Schweers, Bardenfleth. Commissioned 1961-62

SG 119 9/2002, Selim San / 0533264

18 KAAN 15 CLASS (FAST INTERVENTION CRAFT) (WPBF)

SG 1-18

Displacement, tons: 20 full load
Dimensions, feet (metres): 54.8 × 13.2 × 3.9 (16.7 × 4.04 × 1.2)
Main machinery: 2 MTU 12V 183TE93 diesels; 2,300 hp(m) (1.69 MW); 2 Arneson ASD 12 B1L surface drives
Speed, knots: 54. **Range, n miles:** 350 at 35 kt
Complement: 4 plus 8 mission crew
Guns: 2—12.7 mm MGs.
Radars: Surface search: Raytheon; I-band

Comment: Contract for first six with Yonca Technical Investment signed in May 1997, second order for six more in February 1999, and third for 6 more in August 2000. All built at Tuzla-Istanbul shipyard. Three delivered in 1998, seven in 1999, two in April 2000, four in July 2001 and two in July 2002. Onuk MRTP 15 design. Advanced composites structure. Two based in northern Cyprus with pennant numbers KKTC SG 11-12

SG 1 6/2007, Turkish Coast Guard / 1353423

SG 11 6/2007, Maritime Photographic / 1167866

3 KAAN 19 CLASS (FAST INTERVENTION CRAFT) (WPBF)

SG 19-21

Displacement, tons: 38 full load
Dimensions, feet (metres): 74.0 × 15.6 × 4.3 (22.55 × 4.76 × 1.3)
Main machinery: 2 MTU 12V 2000 M 92 diesels; 3,600 hp(m) (2.7 MW); 2 MJP waterjets
Speed, knots: 60
Range, n miles: 350 at 35 kt
Complement: 5
Guns: 2—12.7 mm MGs.

Comment: Yonuk MRTP 20 (enlarged MRTP 15) design built at Yonca shipyard. Prototype completed in 2006. An order for two further craft was made on 2 March 2007

SG 19 6/2008, Yonca-Onuk / 1353424

11 COASTAL PATROL CRAFT (WPB)

SG 50-58 KKTCSG 102-103

Displacement, tons: 29 full load
Dimensions, feet (metres): 47.9 x 13.7 x 3.6 (14.6 x 4.2 x 1.1)
Main machinery: 2 diesels; 700 hp(m) (514 kW); 2 shafts
Speed, knots: 15
Complement: 7
Guns: 1 12.7 mm MG or 1 Oerlikon 20 mm (SG 102-103)
Radars: Surface search: Raytheon; I-band

Comment: KKTCSG 102-103 were built for North Cyprus and have been based there since August 1990 and July 1991 respectively. Both these craft were given a heavier gun in 1992. Second batch of three completed by Taşkızak in October 1992, three more in June 1993, three more in December 1993.

SG 58 6/2007, Maritime Photographic / 1167865

1 INSHORE PATROL CRAFT (WPB)

RAIF DENKTAŞ 101 (ex-74)

Displacement, tons: 10 full load
Dimensions, feet (metres): 38 x 11.5 x 2.4 (11.6 x 3.5 x 0.7)
Main machinery: 2 Volvo Aquamatic AQ200F petrol engines; 400 hp(m) (294 kW); 2 shafts
Speed, knots: 28
Range, n miles: 250 at 25 kt
Complement: 6
Guns: 1—12.7 mm MG
Radars: Surface search Raytheon; I-band

Comment: Built by Protokson, Istanbul. Transferred to North Cyprus 23 September 1988. Can be equipped with a rocket launcher.

RAIF DENKTAŞ 6/2004, Selçuk Emre / 1044201

1 HARBOUR PATROL CRAFT (WPB)

SG 41

Displacement, tons: 35
Dimensions, feet (metres): 55.8 x 16.4 x 3.3 (17 x 5 x 1)
Main machinery: 2 diesels; 1,050 hp(m) (771 kW)
Speed, knots: 20
Complement: 7
Radars: Surface search: I-band.

Comment: Used for anti-smuggling duties. Probably confiscated drug smuggling craft.

SG 41 5/2006, C D Yaylali / 1158735

10 SECURITY AND SAFETY CRAFT (PBR)

Displacement, tons: To be announced
Dimensions, feet (metres): 25.4 x 9.5 x 1.6 (7.75 x 2.9 x 0.5)
Main machinery: 2 outboard motors; 180 hp (135 kW)
Speed, knots: 36
Complement: 3

Comment: Rigid-inflatable hull with fibre cabin

SECURITY CRAFT 9/2008, C D Yaylali / 1153475

20 SECURITY AND SAFETY CRAFT (PBR)

Displacement, tons: To be announced
Dimensions, feet (metres): 31.1 x 9.8 x 1.6 (9.5 x 3.0 x 0.5)
Main machinery: 2 outboard motors; 350 hp (260 kW)
Speed, knots: 40
Complement: 3

Comment: Rigid-inflatable hull with fibre cabin.

SECURITY CRAFT 6/2007, Turkish Coast Guard / 1170048

10 SAFETY CRAFT (PBR)

Displacement, tons: To be announced
Dimensions, feet (metres): 19.0 x 7.2 x 2.6 (5.8 x 2.2 x 0.8)
Main machinery: 2 outboard motors; 140 hp (105 kW)
Speed, knots: 30
Complement: 7

Comment: Inflatable hull craft.

SAFETY CRAFT 6/2007, Turkish Coast Guard / 1170046

45 CONTROL CRAFT (PBR)

Displacement, tons: To be announced
Dimensions, feet (metres): 19.0 x 7.2 x 2.6 (5.8 x 2.2 x 0.8)
Main machinery: 2 outboard motors; 100 hp (75 kW)
Speed, knots: 35
Complement: 3

Comment: inflatable hull craft.

CONTROL CRAFT

6/2007, Turkish Coast Guard / 1170047

AB 412

6/2007, Turkish Coast Guard / 1353477

Numbers/Type: 3 Casa CN 235
Operational speed: 240 kt (445 km/h).
Service ceiling: 25,600 ft (8,110 m)
Range: 669 n miles (1,240 km).
Role/Weapon systems: Three delivered in July 2002. Long range maritime patrol for surveillance.

CN-235

6/2007, Turkish Coast Guard / 1353475

LAND-BASED MARITIME AIRCRAFT

Numbers/Type: 8 Agusta AB 412 EP
Operational speed: 122 kt (226 km/h).
Service ceiling: 17,000 ft (5,180 m).
Range: 374 n miles (686 km).
Role/Weapon systems: Nine aircraft ordered 15 April 1999. One lost on 30 July 2005. A further six ordered in early 2005. Operated by Coast Guard/Frontier Force for patrol SAR. Sensors: Radar and FLIR. Weapons: Unarmed.

Turkmenistan**Country Overview**

Formerly part of the USSR, the Republic of Turkmenistan declared its independence in 1991. Situated in Central Asia, it has an area of 188,460 square miles and is bordered to the north by Kazakhstan, to the east by Uzbekistan and Afghanistan and to the south by Iran

It has a 954 n mile coastline with the Caspian Sea. Türkmenbashi, the principal port, is linked by rail to Ashgabat, the capital and largest city. Maritime claims in the Caspian Sea are yet to be resolved. The Navy acts under the operational control of the Border Guard but is the weakest component of the Turkmen armed forces.

Personnel:

2009. 700

Türkmenbashi (formerly Krasnovodsk)

**PATROL FORCES**

Notes: One 40 m Stenka class patrol craft has been reported operational.

1 POINT CLASS (WPB)

Name	No	Builders	Commissioned
MERJEN (ex-Point Jackson)	PB-129 (ex-82378)	USCG Yard Curtis Bay	3 Aug 1970

Displacement, tons: 66; 69 full load
Dimensions, feet (metres): 83 x 17.2 x 5.8 (25.3 x 5.2 x 1.8)
Main machinery: 2 Caterpillar 3412 diesels; 1,600 hp (1.19 MW); 2 shafts
Speed, knots: 23.5
Range, n miles: 1,200 at 8 kt
Complement: 10 (1 officer)
Guns: 2 – 12.7 mm MGs.
Radars: Surface search: Hughes/Furuno SPS-73; I-band.

Comment: Steel hulled craft with aluminium superstructure. Transferred from United States on 30 May 2000.

MERJEN (inboard ship)

11/2000, Selim San / D104495

4 KALKAN (PROJECT 50030) M CLASS (INSHORE PATROL CRAFT) (PBI)

Displacement, tons: 8.5 full load
Dimensions, feet (metres): 38.1 x 10.8 x 2.0 (11.6 x 3.3 x 0.6)
Main machinery: 1 Type 475K diesel, 496 hp (370 kW); 1 waterjet
Speed, knots: 34
Complement: 2
Guns: 1 – 12.7 mm MG

Comment: Four craft delivered during 2002. Further craft were expected but reportedly not delivered. Built by Moryc Feodosiya (Ukraine) and constructed with aluminium hulls and GRP superstructure. Can be armed with 7.62 mm or 12.7 mm MGs.

KALKAN

6/2003, Moryc 05/3598

5 GRIF-T CLASS (PB)

Displacement, tons: 39 full load
Dimensions, feet (metres): 80.05 x 17.1 x 5.1 (24.4 x 5.2 x 1.57)
Main machinery: 2 MTU 12V 2000 M 90 diesels; 2,700 hp (2 MW); 2 shafts
Speed, knots: 40. **Range, n miles:** 500 at 15 kt
Complement: 13 (1 officer)
Guns: 1 – 20 mm. 1 – 12.7 mm MG.
Radars: Surface search: I-band.

Comment: Built by Moryc Shipyard, Feodosia, Ukraine and delivered in about 2005. Modified versions of Zhuk class. Aluminium construction.

Tuvalu

Country Overview

Tuvalu, formerly the Ellice Islands, is a south Pacific island group which gained independence in 1978; the other part of the former British colony, the Gilbert Islands, became independent as Kiribati the following year. Situated some 1,600 n miles east of Papua New Guinea,

the country comprises nine atolls of which Funafuti is the location of the capital, Fongafale, and home to more than 30 per cent of the population. An archipelagic state, territorial seas (12 n miles) are claimed. An Exclusive Economic Zone (EEZ) (200 n miles) is also claimed but limits have not been fully defined by boundary agreements.

Headquarters Appointments

Commander Maritime Wing:
Inspector Motulu Pedro

PATROL FORCES

1 PACIFIC CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
TE MATAILI	801	Transfield Shipbuilding, WA	8 Oct 1994

Displacement, tons: 165 full load

Dimensions, feet (metres): 103.3 x 26.6 x 6.5 (31.5 x 8.1 x 2.1)

Main machinery: 2 Caterpillar 3516TA diesels; 4,400 hp (3.28 MW) sustained; 2 shafts

Speed, knots: 18 **Range, n miles:** 2,500 at 12 kt

Complement: 18 (3 officers)

Guns: Can carry 1 – 12.7 mm MG but is unarmed.

Radars: Navigation: Furuno 1011; I-band.

Comment: This is the 18th of the class to be built by the Australian Government for Exclusive Economic Zone (EEZ) patrols in the Pacific islands. The programme originally terminated at 15 but was re-opened on 19 February 1993 to include construction of five more craft for Fiji, Kiribati and Tuvalu. Training and support assistance is given by the Australian Navy. Half-life refit completed at Gladstone in 2001. Following the decision by the Australian government to extend the Pacific Patrol Boat programme, *Te Mataili* will require a life-extension refit in 2011 in order to achieve a 30-year ship life.

TE MATAILI
2000, RAN
0106647

Ukraine

Country Overview

Formerly part of the USSR, Ukraine declared its independence in 1991. Situated in eastern Europe, it has an area of 233,090 square miles and is bordered to the north by Belarus, to the east by Russia, to the south-west by Romania and Moldova and to the west by Hungary, Slovakia and Poland. It has a 1,501 n mile coastline with the Black Sea and the Sea of Azov. Kiev is the capital and largest city while Sevastopol, Odessa, Kerch, and Mariupol are the principal ports. Territorial Seas (12 n miles) have been claimed. An EEZ (200 n miles) has been claimed but the limits have not been defined.

Division of the former Soviet Black Sea Fleet between Russia and Ukraine had been achieved on 28 May 1997. The agreement allows for the leasing of port facilities to the Russian Navy until 2017.

Headquarters Appointments

Commander of the Navy:
Vice Admiral Igor Tenukh
First Deputy Commander of the Navy and Chief of Staff:
Rear Admiral Mykola Kostrov

Border Guard

The Maritime Border Guard is an independent subdivision of the State Committee for Border Guards, and is not part of the Navy. It has three cutter brigades, based in Kerch, Odessa and Balaklava, to patrol the 827 mile coastline and two river brigades, which include a gunship squadron, a minesweeping squadron, an auxiliary ship group and a training division. Pennant numbers changed in July 1999

SUBMARINES

Notes: The Foxtrot-class submarine *Zaporizya* was expected to return to operational service in 2004 but repairs were not completed and, in 2007, the Defence Minister stated that the boat was to be sold. Meanwhile, the submarine remains at Balaklava. Although plans for repairs were announced in early 2009, the future of the submarine is uncertain.

FRIGATES

1 KRIVAK III (NEREY) CLASS (PROJECT 1135.1) (FFHM)

Name	No	Builders	Laid down	Launched	Commissioned
HETMAN SAGAIDACHNY (ex-Kirov)	U 130 (ex-201)	Kamysh-Burun, Kerch	5 Oct 1990	29 Mar 1992	5 July 1993

Displacement, tons: 3,100 standard; 3,650 full load
Dimensions, feet (metres): 405.2 × 46.9 × 16.4
 (123.5 × 14.3 × 5)

Main machinery: COGAG; 2 gas turbines; 55,500 hp(m)
 (40.8 MW); 2 gas turbines; 13,600 hp(m) (10 MW); 2 shafts

Speed, knots: 32

Range, n miles: 4,600 at 20 kt; 1,600 at 30 kt

Complement: 180 (18 officers)

HETMAN SAGAIDACHNY

(Scale 1 : 1,200), Ian Sturton / 0506208

Missiles: SAM: 1 SA-N-4 Gecko twin launcher ●; semi-active radar homing to 15 km (8.7 n miles) at 2.5 Mach; warhead 50 kg; altitude 9.1-3,048 m (30-10,000 ft); 20 missiles. The launcher retracts into the mounting for stowage and protection, rising to fire and retracting to reload. The two mountings are forward of the bridge and abaft the funnel.

Guns: 1—3.9 in (100 mm)/70 AK 100 ●; 60 rds/min to 21.5 km (11.5 n miles); weight of shell 15.6 kg
 2—30 mm/65 ●; 6 barrels per mounting; 3,000 rds/min combined to 2 km.

Torpedoes: 8—21 in (533 mm) (2 quad) tubes ●
 Combination of Russian 53 cm torpedoes.

A/S mortars: 2 RBU 6000 12-tubed trainable ●; range 6,000 m; warhead 31 kg.

Countermeasures: Decoys: 4 PK 16 chaff launchers. Towed torpedo decoy.

ESM 2 Bell Shroud; intercept.

ECM 2 Bell Squat; jammers.

Radars: Air search: Top Plate ●; 3D; D/E-band

Surface search: Spin Trough ●; I-band. Peel Cone ●;

E-band.

Fire control: Pop Group ●; F/H/I-band (for SA-N-4)

Kite Screech ●; H/I/K-band. Bass Tilt (Krivak III) ●;

H/I-band

Navigation: Kivach; I-band.

IFF: Salt Pot (Krivak III).

Sonars: Bull Nose (MGK 335MS); hull-mounted; active search and attack; medium frequency.

Helicopters: 1 Ka-27 Helix ●.

Programmes: This is the last of the 'Krivak IIIs' originally designed for the USSR Border Guard. The seven others are based in the Russian Pacific Fleet. A ninth of class was not completed.

Operational: *Sagaidachny* has so far not been sighted with a helicopter embarked. Deployed to the Mediterranean in 1994 and late 1995, to the Indian Ocean in early 1995 and to the US in late 1996. Three further Krivak class have been decommissioned: 'Krivak II' *Sevastopol* (U 132) is probably being used for spares while 'Krivak I' *Mikolaiv* is to be scrapped. *Dnipropetrovsk* is reported to have sunk in the Black Sea in 2005.

HETMAN SAGAIDACHNY

7/2000 / 0106650

HETMAN SAGAIDACHNY

6/2003, *Ships of the World* / 0577651

3 GRISHA CLASS (PROJECT 1124EM/P) (FFLM)

Name	No	Builders	Laid down	Launched	Commissioned
LUTSK	U 205	Leninskaya Kuznitsa, Kiev	-	12 May 1993	12 Feb 1994
VINNITSA (ex-Dnepri)	U 206	Zelenodolsk	23 Dec 1975	12 Sep 1976	31 Dec 1976
TERNOPIL	U 209	Leninskaya Kuznitsa, Kiev	-	20 Mar 2002	16 Feb 2006

Displacement, tons: 950 standard; 1,150 full load
 Dimensions, feet (metres) 233.6 x 32.2 x 12.1
 (71.2 x 9.8 x 3.7)
 Main machinery: CODAG; 1 gas turbine; 15,000 hp(m)
 (11 MW); 2 diesels; 16,000 hp(m) (11.8 MW); 3 shafts
 Speed, knots: 30
 Range, n miles: 2,500 at 14 kt; 1,750 at 20 kt diesels; 950 at 27 kt
 Complement: 70 (5 officers)

(Scale 1 : 900), Ian Sturton / 0506709

Missiles: SAM: SA-N-4 Gecko twin launcher (Lutsk), semi-active radar homing to 15 km (8 n miles) at 2.5 Mach; warhead 50 kg; altitude 9.1-3,048 m (30-10,000 ft); 20 missiles.
 Guns: 1-3 in (76 mm)/59 AK 176 (Lutsk and Ternopil); 120 rds/min to 15 km (8 n miles); weight of shell 5.9 kg
 4-57 mm/75 AK 725 (twin) (Vinnitsa); 120 rds/min to 12.7 km (6.8 n miles); weight of shell 2.8 kg.
 1 -30 mm/65 (Lutsk and Ternopil); 6 barrels; 3,000 rds/min combined to 2 km
 Torpedoes: 4-21 in (533 mm) (2 twin) tubes (SAE T-60; passive homing to 15 km (8.1 n miles) at 40 kt; warhead 400 kg
 A/S mortars: 1 or 2 RBU 6000 12-tubed trainable (range 6,000 m; warhead 31 kg

LUTSK
 Depth charges: 2 racks (12)
 Mines: Capacity for 18 in lieu of depth charges.
 Countermasures: ESM. 2 Watch Dog. 2 PK 16 chaff launchers.
 Radars: Air/surface search: Half Plate B (Lutsk and Ternopil); E/F-band
 Strut Curve (Vinnitsa); F-band.
 Navigation: Don 2; I-band.
 Fire control: Pop Group (Lutsk and Ternopil); F/H/I-band (for SA-N-4). Bass Tilt (Lutsk and Ternopil); H/I-band (for 76 mm and 30 mm).
 Muff Cobb (Vinnitsa); G/H-band.
 IFF: High Pole A or B. Square Head. Salt Pot.

Sonars: Bull Nose (MGK 335MS); hull-mounted; active search and attack, high/medium frequency
 Elk Tail VDS (active search); high frequency.
 Programmes: Lutsk is a 'Grisha V' (Type 1124EM) launched 12 May 1993 and completed 27 November 1993. Ternopil is also a Grisha V and was the first new ship to join the fleet since 1992 when it commissioned in 2006. Vinnitsa is a 'Grisha II' (Type 1124P) ex-Russian Border Guard ship transferred in 1996 Two 'Grisha I' were also transferred but have been deleted
 Operational: All three are active. Vinnitsa damaged in storm on 11 November 2007.

VINNITSA

LAND-BASED MARITIME AIRCRAFT

Notes: The Naval Aviation Force is based at Sevastopol. It comprises 17 Ka-25 Hormone ASW helicopters, 2 Ka-27 Helix A ASW helicopter, 30 Mi-14 Haze, 5 An-12 Cub, 5 An-26 Curl and 11 Be-12 Mail. The Air Force inventory includes 100 Su-24 Fencer and 170 MiG-29 Fulcrum

PATROL FORCES

Notes: A new corvette class is reported to be under development.

2 PAUK I (MOLNYA) (PROJECT 1241P) CLASS (PCM)

KHMELNITSKY (ex-MPK 116) U 208 UZHGOROD (ex-MPK 93) U 207

Displacement, tons: 440 full load
Dimensions, feet (metres): 189 × 33.5 × 10.8 (57.6 × 10.2 × 3.3)
Main machinery: 2 Type M 521 diesels; 16,184 hp(m) (11.9 MW) sustained; 2 shafts
Speed, knots: 32 **Range, n miles:** 2,400 at 14 kt
Complement: 32

Missiles: SAM: SA-N-5 Grail quad launcher, manual aiming; IR homing to 6 km (3.2 n miles) at 1.5 Mach; altitude to 2,500 m (8,000 ft); warhead 1.5 kg; 8 missiles
Guns: 1–3 in (76 mm)/59 AK 176; 120 rds/min to 15 km (8 n miles); weight of shell 5.9 kg
 1–30 mm/65 AK 630; 6 barrels, 3,000 rds/min combined to 2 km.
Torpedoes: 4–16 in (406 mm).
A/S mortars: 2 RBU 1200 5-tubed fixed; range 1,200 m; warhead 34 kg.
Depth charges: 2 racks (12).
Countermeasures: Decoys: 2 PK 16 or 4 PK 10 chaff launchers.
ESM: 3 Brick Plug and 2 Half Hat; radar warning.
Weapons control: Hood Wink optronic director
Radars: Air/surface search: Peel Cone; E/F-band
 Surface search: Kivach or Pechora; I-band.
Fire control: Bass Tilt; H/I-band.
Sonars: Foal Tail; VDS (mounted on transom); active attack; high frequency

Programmes: Built at Yaroslavl in 1985. Transferred from Black Sea Fleet Border Guard in 1996. Others of this class are in the Ukraine Border Guard
Structure: ASW version of the Russian Tarantul class.
Operational: Second of class *Uzhgorod* was reportedly back in service in 2006 but operational status has not been confirmed.

KHMELNITSKY 7/2000, Hartmut Ehlers / 0106553

1 ZHUK (GRIF) CLASS (PROJECT 1400M) (PB)

SKADOVSK (ex-AK 327) U 120

Displacement, tons: 39 full load
Dimensions, feet (metres): 78.7 × 16.4 × 3.9 (24 × 5 × 1.2)
Main machinery: 2 Type M 401B diesels; 2,200 hp(m) (1.6 MW) sustained; 2 shafts
Speed, knots: 30
Range, n miles: 1,100 at 15 kt
Complement: 13
Guns: 2–14.5 mm (twin). 1–12.7 mm MG
Radars: Surface search: Spin Trough; I-band

Comment: Transferred from Russia in 1997 and became operational in 2000. Others of the class are in service with the Border Guard

SKADOVSK 7/2000, Hartmut Ehlers / 0106555

2 TARANTUL II (MOLNYA) (PROJECT 1241.1/2) CLASS (FSGM)

PRIDNEPROVYE (ex-Nikopol, ex-R-54) U 155 KREMENCHUK (ex-R 63) U 156

Displacement, tons: 385 standard; 455 full load
Dimensions, feet (metres): 184.1 × 37.7 × 8.2 (56.1 × 11.5 × 2.5)
Main machinery: COGAG: 2 Nikolayev Type DR 77 gas turbines; 16,016 hp(m) (11.77 MW), 2 Nikolayev DR 76 gas turbines with reversible gearboxes; 4,993 hp(m) (3.67 MW) sustained 2 shafts; cp props
Speed, knots: 36
Range, n miles: 1,650 at 14 kt
Complement: 34 (5 officers)

Missiles: SSM: 4 Raduga SS-N-2D Styx (2 twin); active radar or IR homing to 83 km (45 n miles) at 0.9 Mach; warhead 513 kg, sea skimmer at end of run
SAM: 1 SA-N-5 Grail quad launcher; manual aiming; IR homing to 6 km (3.2 n miles) at 1.5 Mach; warhead 1.5 kg.
Guns: 1–3 in (76 mm)/59 AK 176; 120 rds/min to 15 km (8 n miles); weight of shell 5.9 kg
 2–30 mm/65 AK-630; 6 barrels per mounting; 3,000 rds/min to 2 km.
Countermeasures: Decoys: 4 PK 16 chaff launchers.
Weapons control: Hood Wink optronic director. Light bulb datalink. Band Stand; I-band (datalink).
Radars: Plank Shave; I-band.
Fire control: Bass Tilt; H/I-band (for guns).
 Band Stand (Mineral ME), D-band (for SS-N-2D)
Navigation: Kivach III; I-band
 IFF: High Pole B

Programmes: Built at Kolpino. U 155 originally commissioned in 1983 and U 156 in 1985. Both transferred in 1997 and recommissioned in 2002.

PRIDNEPROVYE 3/2002, Hartmut Ehlers / 0529997

2 MATKA (VEKHR) CLASS (PROJECT 206MP)
(FAST ATTACK CRAFT — MISSILE HYDROFOIL) (PGGK)

PRILUKI (ex-R-262) U 153 KAHOVKA (ex-R 265) U 154

Displacement, tons: 225 standard; 260 full load
Dimensions, feet (metres): 129.9 × 24.9 (41 over foils) × 6.9 (13.1 over foils) (39.6 × 7.6; 12.5 × 2.1; 4)
Main machinery: 3 Type M 504 diesels; 10,800 hp(m) (7.94 MW) sustained; 3 shafts
Speed, knots: 40
Range, n miles: 600 at 35 kt foilborne; 1,500 at 14 kt hullborne
Complement: 33

Missiles: SSM: 2 SS-N-2C/D Styx; active radar or IR homing to 83 km (45 n miles) at 0.9 Mach; warhead 513 kg; sea skimmer at end of run.
Guns: 1–3 in (76 mm)/59 AK 176; 120 rds/min to 15 km (8 n miles); weight of shell 5.9 kg
 1–30 mm/65 AK 630; 6 barrels per mounting; 3,000 rds/min to 2 km
Countermeasures: Decoys: 2 PK 16 chaff launchers.
ESM: Clay Brick; intercept
Weapons control: Hood Wink optronic directors.
Radars: Air/surface search: Plank Shave; E-band.
Navigation: SRN-207; I-band.
Fire control: Bass Tilt; H/I-band.
 IFF: High Pole B or Salt Pot B and Square Head

Comment: Five Russian Black Sea Fleet units transferred in 1996. Built between 1978 and 1983 with similar hulls to the Osa class. One was transferred to Georgia in 1999 and two others (*Uman* and *Tsurupinsk*) have been cannibalised for spares.

PRILUKI 6/2006, Lemachko Collection / 1307219

AMPHIBIOUS FORCES

Notes: Two Vydra class LCU's, *Korosten* U 862 and *Bilyivka* U 904, are used as trials and transport craft. There are also two non-operational Ondatra class LCM, *Svatova* U 430 and *Vii* U 537 and a T-4LCM *Terpan* U 538 which are laid up.

1 ROPUCHA I (PROJECT 775) CLASS (LST)

KONSTANTIN OLSHANSKY (ex-BDK 56) U 402

Displacement, tons: 4,400 full load
Dimensions, feet (metres): 370.7 × 47.6 × 11.5 (113 × 14.5 × 3.6)
Main machinery: 2 Zgoda-Sulzer 16ZV840/48 diesels; 19,230 hp(m) (14.14 MW) sustained; 2 shafts
Speed, knots: 17.5. **Range, n miles:** 3,500 at 16 kt
Complement: 95 (7 officers)
Military lift: 10 MBT plus 190 troops or 24 AFVs plus 170 troops
Missiles: SAM: 4 SA-N-5 Grail quad launchers.
Guns: 4—57 mm/75 AK 725 (2 twin); 120 rds/min to 12.7 km (6.8 n miles); weight of shell 2.8 kg.
Weapons control: 2 Squeeze Box optronic directors.
Radars: Strut Curve; F-band.
Navigation: Don 2; I-band.
Fire control: Muff Cob; G/H-band.
IFF: High Pole B.

Comment: Built at Gdansk, Poland in 1978 and transferred from Russia in 1996. Can be used to carry mines. Ro-Ro design with 540 m² of parking space between the stern gate and the bow doors.

KONSTANTIN OLSHANSKY 10/2008*, *Laurson/Jarnason* / 1353566

1 POLNOCHNY C (PROJECT 773 I) CLASS (LSM)

KIROVOGRAD (ex-SDK 123) U 401

Displacement, tons: 1,120 standard; 1,150 full load
Dimensions, feet (metres): 266.7 × 31.8 × 7.9 (81.3 × 9.7 × 2.4)
Main machinery: 2 Kolomna Type 40-D diesels; 4,400 hp(m) (3.2 MW) sustained; 2 shafts
Speed, knots: 18. **Range, n miles:** 2,000 at 12 kt
Complement: 40-42
Military lift: 350 tons including 6 tanks; 180 troops
Missiles: 4 SA-N-5 Grail quad launchers; manual aiming, IR homing to 6 km (3.2 n miles) at 1.5 Mach; warhead 1.5 kg; 32 missiles.
Guns: 4—30 mm/65 (2 twin), 2—140 mm 18-tubed rocket launchers.
Radars: Surface search: Spin Trough; I-band.
Fire control: Drum Tilt; H/I-band (for 30 mm guns).

Comment: Built in 1970s and transferred from Russian Fleet in 1994. Reported operational again in 2001 following refit.

KIROVOGRAD 6/2003, *Ships of the World* / 0572650

1 POMORNIK (ZUBR) (PROJECT 1232.2) CLASS (ACV/LCUJM)

DONETSK U 420

Displacement, tons: 550 full load
Dimensions, feet (metres): 189 × 70.5 (57.6 × 21.5)
Main machinery: 5 Type NK-12MV gas turbines; 2 for lift, 23,672 hp(m) (17.4 MW) nominal, 3 for drive, 35,508 hp(m) (26.1 MW) nominal
Speed, knots: 60. **Range, n miles:** 300 at 55 kt
Complement: 31 (4 officers)
Military lift: 3 MBT or 10 APC plus 230 troops (total 170 tons)
Missiles: SAM: 2 SA-N-5 Grail quad launchers; manual aiming; IR homing to 6 km (3.2 n miles) at 1.5 Mach; altitude to 2,500 m (8,000 ft); warhead 1.5 kg.
Guns: 2—30 mm/65 AK 630, 6 barrels per mounting, 3,000 rds/min combined to 2 km. 2 retractable 122 mm rocket launchers.
Mines: 80
Countermeasures: Decoys, TSP 41 chaff
ESM: Tool Box, Intercept
Weapons control: Quad Look (modified Squeeze Box) (DWJ 3) optronic director.
Radars: Air/surface search: Cross Dome (Ekran); I-band.
Fire control: Bass Tilt MR 123; H/I-band.
IFF: Salt Pot A/B, Square Head.

Comment: *Donetsk* was completed by Morye, Feodosiya on 20 July 1993. Sister *U 421* was incomplete in 1999 when procured by Greece, delivery being made in 2001. Three further craft were transferred from Russia in 1996. Of these, *U 423* (ex-MDK 123) was also sold to Greece, *U 422* (ex-MDK 57) and *U 424* (ex-MDK 93) have been decommissioned.

2 NATYA I CLASS (PROJECT 266M) (MSO)

CHERNIGIV (ex-Zhovti Vody, ex-Zemitchik) U 310

CHEKASY (ex-Razvedchik) U 311

Displacement, tons: 804 full load
Dimensions, feet (metres): 200.1 × 33.5 × 9.8 (61 × 10.2 × 3)
Main machinery: 2 Type M 504 diesels; 5,000 hp(m) (3.67 MW) sustained; 2 shafts; cp props
Speed, knots: 16. **Range, n miles:** 3,000 at 12 kt
Complement: 67 (8 officers)
Guns: 4—30 mm/65 (2 twin) AK 306 or 2 30 mm/65 AK 630; 4—25 mm/80 (2 twin)
A/S mortars: 2 RBU 1200 5-tubed fixed
Depth charges: 62.
Mines: 10.
Countermeasures: MCM: 1 or 2 GKT-2 contact sweeps; 1 AT-2 acoustic sweep. 1 TEM-3 magnetic sweep
Radars: Surface search: Long Trough; E-band
Fire control: Drum Tilt; H/I-band.
IFF: 2 Square Head, High Pole B.
Sonars: MG 79/89; hull-mounted; active minehunting; high frequency.

Comment: Built in the mid-1970s. Transferred from Russia in 1996. Both are operational.

ZHOVTI VODY 9/2002, *C D Vaylali* / 0530030

2 SONYA (YAKHONT) (PROJECT 1265) CLASS (MHSC)

MELITOPOL (ex-BT 79) U 330

MARIUPOL (ex-BT 126) U 331

Displacement, tons: 460 full load
Dimensions, feet (metres): 157.4 × 28.9 × 6.6 (48 × 8.8 × 2)
Main machinery: 2 Kolomna diesels; 2,000 hp(m) (1.47 MW) sustained; 2 shafts
Speed, knots: 15. **Range, n miles:** 3,000 at 10 kt
Complement: 43
Guns: 2—30 mm/65 (twin), 2—25 mm/80 (twin)
Mines: 8.
Radars: Surface search: Don 2, I-band
IFF: Two Square Head.
Sonars: MG 69/79; hull-mounted; active, high frequency.

Comment: Built in 1978. Transferred from Russia in 1996. Wooden hull

MELITOPOL 10/2006*, *Laurson/Jarnason* / 1353555

1 YEVGENYA (KOROND) (PROJECT 1258) CLASS (MHC)

GENICHESK (ex-RT 214) U 360

Displacement, tons: 77 standard; 90 full load
Dimensions, feet (metres): 80.7 × 18 × 4.9 (24.6 × 5.6 × 1.5)
Main machinery: 2 Type 3-D-12 diesels; 600 hp(m) (440 kW) sustained; 2 shafts
Speed, knots: 11. **Range, n miles:** 300 at 10 kt
Complement: 10
Guns: 2—14.5 mm (twin) MGs.
Mines: 8 racks
Radars: Surface search: Spin Trough or Mius; I-band.
IFF: Salt Pot.
Sonars: A small MG-7 sonar is lifted over stern on crane; a TV system may also be used.

Comment: Transferred from Russia in 1996. Reported as being operational

GENICHESK 6/2003, *Ships of the World* / 0572652

SURVEY SHIPS

Notes: (1) Also transferred in 1997 were two Muna class AGIs, *Pereyaslav* U 512 and *Dzhankoi* U 754. Both are used as transports, mostly for commercial goods.
 (2) Ten former Russian civilian research ships were transferred in 1996/97. All are now in commercial service
 (3) There is an Onega class, *Severodonetsk* U 812.

1 MOMA (PROJECT 861M) CLASS (AGS)

SIMFEROPOL (ex-*Jupiter*) U 511

Displacement, tons: 1,600 full load
 Dimensions, feet (metres): 240.5 x 36.8 x 12.8 (73.3 x 11.2 x 3.9)
 Main machinery: 2 Zgoda-Sulzer diesels; 3,300 hp(m) (2.43 MW) sustained, 2 shafts, cp props
 Speed, knots: 17. Range, n miles: 9,000 at 11 kt
 Complement: 56
 Radars: Navigation. Don 2; I-band.

Comment: U 511 transferred from Russia in February 1996 and is active. A second of class U 602 has been decommissioned.

SIMFEROPOL 7/2000, Hartmut Ehlers / 0106659

1 BIYA (PROJECT 870) CLASS (AGS)

ALCHEVSK U 601 (ex-GS 212)

Displacement, tons: 766 full load
 Dimensions, feet (metres): 190.4 x 32.1 x 8.5 (55 x 9.8 x 2.6)
 Main machinery: 2 diesels; 1,200 hp(m) (882 kW); 2 shafts; cp props
 Speed, knots: 13. Range, n miles: 4,700 at 11 kt
 Complement: 25
 Radars: Navigation: Don 2; I-band.

Comment: Built at Northern Shipyard, Gdansk 1972–76. Transferred from Russia in 1997. Laboratory and one survey launch, and a 5 ton crane.

ALCHEVSK 6/2005, Lemachko Collection / 1305218

TRAINING SHIPS

Note: In addition there is one *Bryza* class training cutter U 544.

3 PETRUSHKA (UK-3) CLASS (AXL)

CHIGIRIN U 540 **SMILA** U 541 **NOVA KAHOVKA** (ex-*Darnicha*) U 542

Displacement, tons: 335 full load
 Dimensions, feet (metres): 129.3 x 27.6 x 7.2 (39.4 x 8.4 x 2.2)
 Main machinery: 2 Wola H12 diesels; 756 hp(m) (556 kW); 2 shafts
 Speed, knots: 11. Range, n miles: 1,000 at 11 kt
 Complement: 13 plus 30 cadets

Comment: Training vessels built at Wisla Shiyard, Poland in 1989. Transferred from Russia in 1997. Used for seamanship and navigation training

CHIGIRIN 10/2008*, Laursen/Jarnasen / 1353564

AUXILIARIES

Notes: Other ships transferred from Russia in 1997, and possibly still in limited service, are a *Keyla II* class tanker, *Krivyj Rig* U 753, two *Toplivo* class tankers, *Fastiv* U 760 and *Bahmach* U 759 and a *Shalanda* class trials craft *Kamyanka* U 860.

FASTIV 10/2008*, Laursen/Jarnasen / 1353563

1 AMUR (PROJECT 304) CLASS SUPPORT SHIP (AGF/AR)

DONBAS (ex-*Krasnodon*) U 500 (ex-U 803)

Displacement, tons: 5,500 full load
 Dimensions, feet (metres): 400.3 x 55.8 x 16.7 (122 x 17 x 5.1)
 Main machinery: 1 Zgoda 8TAD-48 diesel; 3,000 hp(m) (2.2 MW); 1 shaft
 Speed, knots: 12
 Range, n miles: 13,000 at 8 kt
 Complement: 145
 Radars: Navigation: Don 2; I-band.

Comment: Transferred in 1977. Completed refit in 2001 to serve as command ship and support ships for surface ships and submarines based at Sevastopol. Has two 3-ton cranes and one 1.5-ton crane.

DONBAS 10/2008*, Laursen/Jarnasen / 1353569

1 VODA (PROJECT 561) CLASS (WATER TANKER) (AWT)

SUDAK (ex-*Sura*) U 756

Displacement, tons: 982 standard; 2,250 full load
 Dimensions, feet (metres): 266.8 x 37.4 x 11.3 (81.3 x 11.4 x 3.44)
 Main machinery: 2 diesels; 2 shafts
 Speed, knots: 12
 Range, n miles: 2,900 at 10 kt
 Complement: 22
 Radars: Navigation: Don 2; I-band.

Comment: Transferred in 1977. Has a 3 ton derrick.

SUDAK 10/2008*, Laursen/Jarnasen / 1353561

1 BEREZA CLASS (PROJECT 18061) (ADG)

BALTA U 811 (ex-SR 568)

Displacement, tons: 1,850 standard; 2,051 full load
Dimensions, feet (metres): 228 x 45.3 x 13.1 (69.5 x 13.8 x 4)
Main machinery: 2 Zgoda-Sulzer 8AL26/30 diesels; 2,938 hp(m) (2.16 MW) sustained;
 2 shafts
Speed, knots: 14
Range, n miles: 1,000 at 14 kt
Complement: 88
Radars: Navigation; Kivach, I-band.

Comment: Built at Northern Shipyard, Gdansk in 1987. Transferred from Russia in 1997. Degaussing vessel with an NBC citadel and three laboratories

BALTA 10/2008, Laursen/Jarnesen / 1353562

1 BAMBUK (PROJECT 12884) CLASS (AGFHM)

Name	No	Builders	Launched	Commissioned
SLAVUTICH	U 510 (ex-800, ex-SSV 189)	Nikolayev	12 Oct 1990	28 July 1992

Displacement, tons: 5,403 full load
Dimensions, feet (metres): 350.1 x 52.5 x 19.7 (106.7 x 16 x 6)
Main machinery: 2 Skoda 6L2511 diesels; 6,100 hp(m) (4.5 MW); 2 shafts
Speed, knots: 16
Range, n miles: 8,000 at 12 kt
Complement: 178
Missiles: SAM: 2 SA-N-5/8 Grail quad launchers; manual aiming; IR homing to 6 km (3.2 n miles) at 1.5 Mach; altitude to 2,500 m (8,000 ft); warhead 1.5 kg.
Guns: 2-30 mm/65 AK 630; 6 barrels per mounting
Countermeasures: Decoys: 2 PK 16 chaff launchers.
Radars: Navigation; 3 Palm Frond; I-band.
CCA: Fly Screen, I-band
Tacan: 2 Round House.

Comment: Laid down on 20 March 1988. Second of a class built for acoustic research but taken over before completion and used as a command ship by the Ukrainian Navy. The ship is not capable of helicopter operations as previously reported.

SLAVUTICH 10/2008, Laursen/Jarnesen / 1353560

1 SURA (PROJECT 145) CLASS (ABU)

SHOSTKA (ex-Kil 33) U 852

Displacement, tons: 2,370 standard; 3,150 full load
Dimensions, feet (metres): 285.4 x 48.8 x 16.4 (87 x 14.8 x 5)
Main machinery: Diesel-electric; 4 diesel generators; 2 motors; 2,240 hp(m) (1.65 MW); 2 shafts
Speed, knots: 12
Range, n miles: 2,000 at 11 kt
Complement: 40
Cargo capacity: 900 tons cargo; 300 tons fuel for transfer
Radars: Navigation; 2 Don 2; I-band.

Comment: Transferred from Russia in 1997. Heavy lift ship built at Rostock in 1973. Lifting capacity includes one 65 ton derrick and one 65 ton stern cage. Can carry a 12 m DSRV, although this has not been seen in Ukrainian service.

SHOSTKA 10/2008, Laursen/Jarnesen / 1353550

1 YELVA (PROJECT 535M) CLASS (DIVING TENDER) (YDT)

NETISIN (ex-VM 114) U 700

Displacement, tons: 295 full load
Dimensions, feet (metres): 134.2 x 26.2 x 6.6 (40.9 x 8 x 2)
Main machinery: 2 Type 3-D-12A diesels, 630 hp(m) (463 kW) sustained; 2 shafts
Speed, knots: 12.5
Range, n miles: 1,870 at 12 kt
Complement: 30
Radars: Navigation; Spin Trough; I-band.

Comment: Diving tender built in mid-1970s. Transferred from Russia in 1997. Carries a 1 ton crane and diving bell. Operational.

YELVA CLASS (to left) 6/1998, van Ginderen Collection / 0050315

12 HARBOUR CRAFT (YDT/VFL/YPT)

FEODOSIYA U 240 U 241 U 631-634	SKVYRA U 635 U 732 ILLICHIVSK U 783	SHULYAVKA U 853 KHERSON (ex-Monastirishze) U 891 U 926
---------------------------------------	---	--

Displacement, tons: 42 full load
Dimensions, feet (metres): 72.8 x 12.8 x 4.6 (22.2 x 3.9 x 1.4)
Main machinery: 1 diesel, 300 hp(m) (220 kW) sustained; 1 shaft
Speed, knots: 12
Complement: 8

Comment: Details given are for the Flamingo class harbour patrol craft of which there are four (U 240, U 241, U 634, U 732). There are also four 'Nyrvat1' diving tenders and inshore survey craft (U 631, U 632, U 633, U 635) and one PO 2 class tender (U 926). There is also one Shelon class YPT (U 891), an ambulance craft (U 783) and a flag officers' yacht (U 853).

ILLICHIVSK 7/2003, Lemachko Collection / 1043554

KHERSON 9/2004, Hartmut Ehlers / 1043553

1 SK 620 CLASS (DRAKON) (YH/TFL)

SOKAL U 782

Displacement, tons: 236 full load
Dimensions, feet (metres): 108.3 x 24.3 x 6.9 (33 x 7.4 x 2.1)
Main machinery: 2 56ANM30-H12 diesels, 620 hp(m) (456 kW) sustained, 2 shafts
Speed, knots: 12
Range, n miles: 1,000 at 12 kt
Complement: 14 plus 3 spare

Comment: Built at Wisla Shipyard, Poland as a smaller version of the Petrushka class training ship. Transferred from Russia in 1997. Used as a general purpose craft. The status of two other craft, Akar and Suvar is not known.

2 POZHARNY (PROJECT 364) CLASS (FIREFIGHTING CRAFT) (YTR)

BORSZIV U 722 EVPATORIYA U 728

Displacement, tons: 180 full load
Dimensions, feet (metres): 114.5 x 20 x 6 (34.9 x 6.1 x 1.8)
Main machinery: 2 Type M 50 diesels; 2,200 hp(m) (1.6 MW) sustained; 2 shafts
Speed, knots: 12. **Range, n miles:** 250 at 12 kt
Complement: 26

Comment: A total of 84 built from mid-1950s to mid 1960s. Two craft transferred to Ukraine in 1996 and another 27 remain in Russian naval service

BORSZIV 8/2006, Lemachko Collection / 1159410

KREMENETS U 705 KORETS U 830 KRASNOPEREKOPSK U 947
IZYASLAV U 706 KOVEL U 831 DUBNO U 953

Comment: All transferred from Russia in 1997. U 706 and U 831 are Okhtensky class coastal tugs built in 1958. U 705 is a Goryn class ocean going tug with a bollard pull of 45 tons, U 830 is a Sorum class and U 947 a Prometay class large tug. U 953 is a Sidehole II class harbour tug.

KORETS 10/2008*, Laursen/Jarnesen / 1353557

BORDER GUARD (MORSKA OKHORONA)

Notes: (1) There are plans to build new patrol cutters of the 'Kordon' (47 m) and 'Afalina' (44 m) classes, and new patrol boats of the 'Scif' (26 m) class. These new designs are also on offer for export by the Feodosiya Shipbuilding Association Morye. A 67 m OPV design, by Nikolayev 61 Kommuna shipyard, is also in the export market.
 (2) The river brigades also include four minesweeping boats, and 16 training craft. Not all of these are operational.
 (3) Border Guard vessels are painted dark grey with a thick yellow and thin blue diagonal line on the hull. From July 1999, pennant numbers were changed and are preceded by the letters BG.
 (4) BG 01 Krym is a 45 m craft used for VIP duties.

1 SSV-10 CLASS (SUPPORT SHIP) (AGF)

DUNAI BG 80 (ex-500)

Displacement, tons: 340 full load
Dimensions, feet (metres): 129.3 x 23 x 3.9 (39.4 x 7 x 1.2),
Main machinery: 2 diesels, 2 shafts
Speed, knots: 12
Complement: 20 (4 officers)

Comment: Headquarters ship built in 1940. Taken over from the Russian Danube Flotilla and now acts as the command ship for the river brigades. Based at Odessa.

DUNAI (old number) 4/1998, Ukraine Coast Guard / 0060322

Comment: Inshore patrol craft originally designed in the 1960s by the Redan boat building yard in St Petersburg.

**United Arab Emirates****Country Overview**

The United Arab Emirates was formed on 2 December 1971 by the federation of seven states (formerly the Trucial States) lying along the east-coast of the Arabian Peninsula. With an area of 30,000 square miles, the country includes Abu Dhabi, Ajman, Dubai, al-Fujairah, Ras al Khaimah, Sharjah and Umm al-Qaiwain. It is bordered to the north by Qatar and to the south by Saudi Arabia. To the east lies Oman which is separated from its small exclave on the Musandam peninsula. There is a coastline of 713 n miles with the Gulf and with the Gulf of Oman. The city of Abu Dhabi is the capital and largest city while Dubai is the principal port and commercial centre. Territorial Seas

(12 n miles) are claimed. An EEZ (200 n miles) has also been claimed but its limits have not been defined.

Following a decision of the UAE Supreme Defence Council on 6 May 1976 the armed forces of the member states were unified and the organisation of the UAE armed forces was furthered by decisions taken on 1 February 1978.

Headquarters Appointments

Commander, Naval Forces:
 Rear Admiral Ahmed Al Sabab Al Tenajji
Deputy Commander, Naval Forces:
 Brigadier Mohammed Mahmoud Al Madini

Personnel

(a) 2008: 2,400 (200 officers) Navy, 1,200 (110 officers) Coast Guard
 (b) Voluntary service

Abu Dhabi (main base).
 Mina Rashid and Mina Jebel Ali (Dubai).
 Mina Saqr (Ras al Khaimah), Mina Sultan (Sharjah),
 Khor Fakkan (Sharjah-East Coast).

SUBMARINES

Notes: Submarine training has been conducted in the past but acquisition of submarines is understood to be a long-term aspiration.

10 SWIMMER DELIVERY VEHICLES (SDV)

Comment: Two classes of indigenously built Long Range Submersible Carriers (LRSC) have been developed by Emirates Marine Technologies. The 7.35 x 0.95 m Class 4 variant, of which approximately ten are believed to have been in service with UAE Special Forces since 1998, is capable of deploying a 200 kg payload. These are likely to be augmented by the larger 9.1 x 1.15 m Class 5 variant which can deliver 450 kg. Constructed of glass and carbon fibres, both variants are manned by two people, have a top speed of 7 kt, a range of 60 n miles at 6 kt and an operational depth of 30 m. They are equipped with depth-sounder, sonar and built-in breathing system.

CLASS 5 LRSC
2001, Emirates Marine Technologies
(A91256)

Signaal WM25 ●; I/J-band; range 46 km (25 n miles).

Sonars: Westinghouse SQS-505; bow-mounted; active search and attack; medium frequency.

Helicopters: 2 Eurocopter AS 565 Panther ●

Programmes: Contract signed on 2 April 1996 to transfer two Netherlands frigates, after refits by Royal Schelde. First one recommissioned in December 1997, second one in May 1998. Further transfers are unlikely.

Structure: Harpoon SSM and Goalkeeper CIWS has been purchased separately, as have the Scout radars. Additional air conditioning has been fitted.

Operational: Based at Jebel Ali. *Al Emirat* was sold in late 2007 for conversion into a luxury yacht and it is likely that *Abu Dhabi* is also to be decommissioned.

ABU DHABI

7/2007, M Declerck / 1170240

CORVETTES

Notes: Plans to procure a new anti-submarine corvette were announced in March 2009. The ship, to be built by Fincantieri, is to be based on the Comandante class in service in the Italian Navy. The ship is to be delivered in 2011 and there is reported to be an option for a second ship. This order has probably superseded Project Yas.

2 MURAY JIB (MGB 62) CLASS (FSGHM)

Name	No	Builders	Commissioned	Recommissioned
MURAY JIB	P 161 (ex-CM 01, ex-P 6501)	Lürssen, Bremen	Mar 1989	Nov 1990
DAS	P 162 (ex-CM 02, ex-P 6502)	Lürssen, Bremen	May 1989	Jan 1991

Displacement, tons: 630 full load
Dimensions, feet (metres): 206.7 x 30.5 x 8.2
 (63 x 9.3 x 2.6)
Main machinery: 4 MTU 16V 538 TB92 diesels; 13,640 hp(m) (10 MW) sustained; 4 shafts
Speed, knots: 32
Range, n miles: 4,000 at 16 kt
Complement: 43

Missiles: SSM: 8 Aerospatiale MM 40 Exocet (Block II) ☉, inertial cruise; active radar homing to 70 km (40 n miles); at 0.9 Mach; warhead 165 kg; sea-skimmer
SAM: Thomson-CSF modified Crotale Navale octuple launcher ☉; radar guidance; IR homing to 13 km (7 n miles) at 2.4 Mach; warhead 14 kg.
Guns: 1 OTO Melara 3 In (76 mm) 62 Super Rapid ☉; 120 rds/min to 16 km (8.7 n miles); weight of shell 8 kg
 1 Signaal Goalkeeper with GE 30 mm 7-barrelled ☉; 4,200 rds/min combined to 2 km
 2—12.7 mm MGs.
Countermeasures: Decoys: 2 Degaie launchers ☉; IR flares and chaff
ESM/ECM: Racal Cutlass/Cygnus ☉; intercept/jammer
Weapons control: CSSE Najir optronic director ☉
Radars: Air/surface search Bofors Ericsson Sea Giraffe 50HC ☉; G-band.
Navigation: Racal Decca 1226, I-band.
Fire control: Bofors Electronic 9LV 223 ☉; J-band (for gun and SSM)
 Thomson-CSF DRBV 51C ☉; J-band (for Crotale).

Helicopters: 1 Aerospatiale Alouette SA 316 ☉.

Programmes: Ordered in late 1986. Similar vessels to Bahrain craft. Delivery in October 1991.

Structure: Lürssen design adapted for the particular conditions of the Gulf. This class has good air defence and a considerable anti-ship capability. The helicopter hangar is reached by flight deck lift.

Operational: Pennant numbers changed in 2002.

0 + 6 BAYNUNAH CLASS (FAST ATTACK CRAFT—MISSILE) (PGGMH)

Name	No	Builders	Laid down	Launched	Commissioned
-	-	CMN, Cherbourg	8 Sep 2005	2009	2010
-	-	Abu Dhabi Shipbuilding	6 July 2006	2010	2011
-	-	Abu Dhabi Shipbuilding	21 June 2007	2010	2011
-	-	Abu Dhabi Shipbuilding	5 Dec 2007	2010	2012
-	-	Abu Dhabi Shipbuilding	26 Oct 2008	2011	2013
-	-	Abu Dhabi Shipbuilding	2009	2012	2014

Displacement, tons: 630 full load

Dimensions, feet (metres): 229.6 x 36.1 x 9.2
(70.0 x 11.0 x 2.8)

Main machinery: 4 MTU 12V 595 TE 90 diesels; 22,500 hp
(16.8 MW); 3 (2-112 SII, 1-125 SII) Kamewa waterjets

Speed, knots: 32

Range, n miles: 2,400 at 15 kt

Complement: 37 (accommodation for 45)

Missiles: SSM: 8 MBDA MM 40 Block III; inertial cruise; active radar homing to 70 km (40 n miles) at 0.9 Mach; warhead 165 kg.

SAM: Raytheon Evolved Sea Sparrow RIM 162 Mk 56 8-cell VLS; semi-active homing to 18 km (9.7 n miles) at 3.6 Mach; warhead 38 kg.

1 GMLS Mk 49 RAM RIM-116B 21-cell launcher; passive IR/anti-radiation homing to 9.8 km (5.2 n miles) at 2.5 Mach; warhead 9.1 kg. 21 rounds.

Guns: 1 OTO Melara 3 in (76 mm)/62 Super Rapid; 120 rds/min to 16 km (8.7 n miles) weight of shell 6 kg. 2 Rheinmetall MLG 27 mm.

Countermeasures: Decoys: 2 Rheinmetall MASS 2L launchers.

RESM Electronics

Combat data systems: Alenia Marconi Systems IPN S. Link 11 and Link Y Mk 2

Weapons control: Sagem-EOMS optronic director

Radars: Air/surface search: Ericsson Sea Giraffe; G/H-band

BAYNUNAH CLASS

(Scale 1 : 600), Ian Sturton / 1305263

Surface search: Terma Scantar 2001; I-band. Fire control: 1 Alenia Marconi NA-25/XM; I-band. Sonars: L-3 ELAC Nautik NDS 3070 mine avoidance sonar

Helicopters: 1 Eurocopter AS 565 Panther

Comment: Project Baynunah succeeded Project LEWA 1 for the procurement of patrol boats and is a joint venture between Abu Dhabi Shipbuilding (ADSB) (Prime

Contractor) and CMN of France. Systems integration is being undertaken by Abu Dhabi Systems Integration, a joint venture between ADSB and Selex Sistemi Integrati. Contract signed 28 December 2003 for four ships and option for a further two exercised in 2005. Based on a CMN BR67 design, it has a steel hull and aluminium superstructure. The first of class is under construction at Cherbourg while CMN is providing materials for follow-on vessels to be built by ADSB.

SHIPBORNE AIRCRAFT

Numbers/Type: 4 Aerospatiale SA 316/319S Alouette.

Operational speed: 113 kt (210 km/h).

Service ceiling: 10,500 ft (3,200 m).

Range: 290 n miles (540 km).

Role/Weapon systems: Reconnaissance and general purpose helicopters. Sensors: radar. Weapons: Unarmed.

Numbers/Type: 7 Eurocopter AS 565SB Panther.

Operational speed: 165 kt (305 km/h).

Service ceiling: 16,700 ft (5,100 m).

Range: 483 n miles (895 km).

Role/Weapon systems: Ordered in March 1995 and delivered from 2001. Sensors: Thomson-CSF Agnion radar. Weapons: ASV; Aerospatiale AS 15TT ASM.

COUGAR

6/1994 0080927

PATROL FORCES

Notes: Three Fast Intercept Craft are reported to be in service.

6 ARDHANA CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
ARDHANA	P 3301 (ex-P 1101)	Vosper Thornycroft	24 June 1975
ZURARA	P 3302 (ex-P 1102)	Vosper Thornycroft	14 Aug 1975
MURBAN	P 3303 (ex-P 1103)	Vosper Thornycroft	16 Sep 1975
AL GHULLAN	P 3304 (ex-P 1104)	Vosper Thornycroft	16 Sep 1975
RADOOM	P 3305 (ex-P 1105)	Vosper Thornycroft	1 July 1976
GHANADHAN	P 3306 (ex-P 1106)	Vosper Thornycroft	1 July 1976

Displacement, tons: 110 standard; 175 full load

Dimensions, feet (metres): 110 x 21 x 8.6 (33.5 x 6.4 x 2)

Main machinery: 2 Paxman 12CM diesels; 5,000 hp (3.73 MW) sustained; 2 shafts

Speed, knots: 30

Range, n miles: 1,800 at 14 kt

Complement: 26

Guns: 2 Oerlikon/BMARC 30 mm/75 A32 (twin); 650 rds/min to 10 km (5.6 n miles); weight of shell 1 kg or 0.35 kg.

1 Oerlikon/BMARC 20 mm/80 A41A; 800 rds/min to 2 km.

2—51 mm projectors for illuminants

Radars: Surface search, Racal Decca TM 1626; I-band.

Comment: A class of round bilge steel hull craft. Originally operated by Abu Dhabi. New pennant numbers in 1996. To be replaced by the Project Baynunah craft from approximately 2009.

AL GHULLAN

2/1997, A Sharma / 0567566

AS 565SB

10/2002, Eurocopter/Patrick Penna / 0576393

LAND-BASED MARITIME AIRCRAFT

Notes: (1) Procurement of an AEW capability is under consideration. Contenders include the Northrop Grumman E-2D and the Boeing 737

(2) Acquisition of four maritime patrol aircraft is under consideration. The EADS-CASA C-295M was selected in March 2001 but the contract was not finalised. Another possibility is the Alenia Aeronautica ATR-72.

Numbers/Type: 2 Pilatus Britten-Norman Maritime Defender.

Operational speed: 150 kt (280 km/h).

Service ceiling: 18,900 ft (5,760 m).

Range: 1,500 n miles (2,775 km).

Role/Weapon systems: Coastal patrol and surveillance aircraft although seldom used in this role. Sensors: Nose-mounted search radar, underwing searchlight. Weapons: Underwing rocket and gun pods.

Numbers/Type: 5 Aerospatiale AS 332B/Super Puma.

Operational speed: 150 kt (280 km/h).

Service ceiling: 15,090 ft (4,600 m).

Range: 335 n miles (620 km).

Role/Weapon systems: Former transport helicopters. Five updated from 1995 with ASW equipment. Two others used as VIP transports. Sensors: Omara ORB 30 radar, Thomson Marconi HS 312 dipping sonar. Weapons: ASV; one AM 39 Exocet ASM. ASW; A 2445 torpedoes and mines.

2 MUBARRAZ CLASS
(FAST ATTACK CRAFT—MISSILE) (PGGFM)

Name	No	Builders	Commissioned
MUBARRAZ	P 141 (ex-P 4401)	Lürssen, Bremen	Aug 1990
MAKASIB	P 142 (ex-P 4402)	Lürssen, Bremen	Aug 1990

Displacement, tons: 260 full load
Dimensions, feet (metres): 147.3 x 23 x 7.2 (44.9 x 7 x 2.2)
Main machinery: 2 MTU 20V 538TB93 diesels; 9,370 hp(m) (6.9 MW) sustained; 2 shafts
Speed, knots: 40 **Range, n miles:** 500 at 38 kt
Complement: 40 (5 officers)

Missiles: SSM 4 Aerospatiale MM 40 Exocet; inertial cruise; active radar homing to 70 km (40 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.
SAM: 1 Matra Sadral sextuple launcher; Mistral; IR homing to 4 km (2.2 n miles); warhead 3 kg.
Guns: 1 OTO Melara 3 in (76 mm)/62 Super Rapid; 120 rds/min to 16 km (8.7 n miles); weight of shell 6 kg
 2 Rheinmetall 20 mm.
Countermeasures: Decoys: 2 Degaie launchers; IR flares and chaff.
ESM/ECM: Racal Cutlass/Cygnus; intercept/jammer.
Weapons control: CSEE Najir optronic director (for SAM).
Radars: Air/surface search: Bofors Ericsson Sea Giraffe 50HC, G-band.
Navigation: Racal Decca 1226, I-band
Fire control: Bofors Electronic 9LV 223; J-band (for gun and SSM).

Programmes: Ordered in late 1986 from Lürssen Werft at the same time as the two Type 62 vessels. Delivered in February 1991.
Modernisation: Mid-life refits for both vessels to be undertaken by Abu Dhabi Shipbuilding from 2004.
Structure: This is a modified TNC 38 design, with the first export version of Matra Sadral. The radome houses the jammer. The 20 mm guns are mounted on the bridge deck aft of the mast.

MAKASIB 2/2002, A Sharma / 0534063

MUBARRAZ 9/2000 / 0121415

6 BAN YAS (TNC 45) CLASS
(FAST ATTACK CRAFT—MISSILE) (PGGF)

Name	No	Builders	Commissioned
BAN YAS	P 151 (ex-P 4501)	Lürssen Vegesack	Nov 1980
MARBAN	P 152 (ex-P 4502)	Lürssen Vegesack	Nov 1980
RODDM	P 153 (ex-P 4503)	Lürssen Vegesack	July 1981
SHAHEEN	P 154 (ex-P 4504)	Lürssen Vegesack	July 1981
SAGAR	P 155 (ex-P 4505)	Lürssen Vegesack	Sep 1981
TARIF	P 156 (ex-P 4506)	Lürssen Vegesack	Sep 1981

Displacement, tons: 260 full load
Dimensions, feet (metres): 147.3 x 23 x 8.2 (44.9 x 7 x 2.5)
Main machinery: 4 MTU 16V 538TB92 diesels; 13,640 hp(m) (10 MW) sustained; 4 shafts
Speed, knots: 40
Range, n miles: 500 at 38 kt
Complement: 40 (5 officers)

Missiles: SSM: 4 Aerospatiale MM 40 Exocet Block III; inertial cruise, active radar homing to 70 km (40 n miles) at 0.9 Mach; warhead 165 kg, sea-skimmer.
Guns: 1 OTO Melara 3 in (76 mm)/62; 80 rds/min to 16 km (8.7 n miles); weight of shell 6 kg.
 2 Breda 40 mm/70 (twin), 300 rds/min to 12.5 km (6.8 n miles); weight of shell 0.96 kg.
 2—7.62 mm MGS.
Countermeasures: Decoys: 1 CSEE trainable Degaie; IR flares and chaff
ESM: Thales DR 3000; intercept.
Combat data systems: Saab Systems 9LV Mk 3E CETRIS.
Weapons control: Sagem EOMS optronic tracker.
Radars: Surface search: Bofors Ericsson Sea Giraffe 50HC, G-band.
Navigation: Signaal Scout; I-band
Fire control: Philips 9LV 200 Mk 2/3; J-band.

Programmes: Ordered in late 1977. First two shipped in September 1980 and four more in Summer 1981. This class was the first to be fitted with MM 40.
Modernisation: Upgrade contract for ship and propulsion systems given to Newport News. Work done by Abu Dhabi Shipbuilding Company. First pair completed in late 1998, second pair in mid-1999 and the third pair in mid-2000. Further modernisation is being undertaken at ADSB under Project Tarif-45. The upgrade includes replacement of the combat data system with the Saab Systems 9LV Mk 3E, upgrade of the 9LV 200 radar with TV, IR and laser range-finder modules and modification of the Sea Giraffe surveillance radar. Exocet is being upgraded to Block III. The programme began in February 2004 and the first ship, *Ban Yas*, was completed in 2006.

TARIF 3/2008*, Guy Toremans / 1353501

20 RAIDING CRAFT (PBF)

Displacement, tons: 4 full load
Dimensions, feet (metres): 27.9 x 9.7 x 2 (8.5 x 3 x 0.6)
Main machinery: 2 outboards, 450 hp (336 kW)
Speed, knots: 38
Complement: 1 plus 11 troops

Comment: There are eight Arctic 28 RIBs ordered from Halmatic, Southampton in June 1992 and delivered in mid-1993. GRP hulls. Speed given is fully laden. Used by Special Forces. There are also 12 Al-Shaali type ordered in 1994 and built in Dubai.

ARCTIC 3/1995, H M Steele / 0080976

MINE WARFARE FORCES

2 FRANKENTHAL CLASS (TYPE 332)
(MINEHUNTERS—COASTAL) (MHC)

Name	No	Builders	Launched	Commissioned
AL MURJAN (ex-Frankenthal)	M 02 (ex-M 1066)	Lürssenwerft	6 Feb 1992	16 Dec 1992
AL HASBAH (ex-Weiden)	M 01 (ex-M 1060)	Abeking & Rasmussen	14 May 1992	30 Mar 1993

Displacement, tons: 650 full load
Dimensions, feet (metres): 178.8 x 30.2 x 8.5 (54.5 x 9.2 x 2.6)
Main machinery: 2 MTU 16V 396TB84 diesels; 5,550 hp(m) (4.08 MW) sustained; 2 shafts, cp props, 1 motor (minehunting)
Speed, knots: 18
Complement: 37 (5 officers)

Missiles: SAM: 2 Stinger quad launchers.
Guns: 1 Bofors 40 mm/70; being replaced by Mauser 27 mm
Combat data systems: STN MWS 80-4
Radars: Navigation: Raytheon SPS-64, I-band.
Sonars: Atlas Elektronik DSQS-11M; hull-mounted; high frequency.

Programmes: Originally ordered for the German Navy in September 1988 with STN Systemtechnik Nord as main contractor. *Al Murjan* laid down at Lürssen 6 December 1989. Agreement for the purchase of both ships to UAE concluded in early 2006. Following decommissioning from the German Navy and recommissioning in the UAE Navy on 28 June 2006, both ships undertook refit work at the Neue Jadewerft shipyard in Wilhelmshaven before being transported to Abu Dhabi. *Al Hasbah* arrived in August 2006 and *Al Murjan* in Autumn 2006. A training programme for the crews was conducted prior to transfer.

Structure: Built of amagnetic steel with same hull, similar superstructure and high standardisation as Type 333 and 352 in service with the German Navy. Equipped with two STN Systemtechnik Nord Penguin-83 drones with sonar, TV cameras and two countermining charges.

Operational: Weapons and sensors are as for the ships in German service and may be different.

AL MURJAN 9/2006, Frank Findler / 1167451

AMPHIBIOUS FORCES

Notes: There are also four civilian LCM ships, *El Nasirah 2*, *Baava 1*, *Makasib* and *Ghagha II*. Two Serna class LCUs are also civilian owned.

4 LCT

L 61-L 64 (ex-6401-6404)

Displacement, tons: 850 approx
Dimensions, feet (metres): 210 × 39.4 × 8.7 (64.0 × 12.0 × 2.7)
Main machinery: 2 Caterpillar diesels; 3,620 hp (2.7 MW); 2 shafts
Speed, knots: 12
Guns: 2—12.7 mm MGs.

Comment: Built at Abu Dhabi Naval Base and completed in 1996-99. Details are incomplete. Pennant numbers changed in 2001.

L 62 3/2006, *Ships of the World* / 1127282

3 LANDING CRAFT (LCT)

L 65-67

Displacement, tons: 850 approx
Dimensions, feet (metres): 210 × 39.4 × 8.7 (64.0 × 12.0 × 2.7)
Main machinery: 2 Caterpillar 3508 diesels, 3,620 hp (2.7 MW); 2 shafts
Speed, knots: 11
Complement: 19 (plus 56 troops)
Military lift: military vehicles

Comment: Fully designed in the UAE, the vessels were ordered from ADSB in November 2001 and laid down in early 2002 and delivery reportedly started in 2004. Details are speculative and based on the L 61 class. Weapons are expected to include medium calibre machine guns.

L 67 3/2008, *Guy Toremans* / 1353600

12 + 12 TRANSPORTBÅT 2000 (LCP)

P 201-212

Displacement, tons: 43 full load
Dimensions, feet (metres): 79.4 × 16.7 × 3.6 (24.2 × 5.1 × 1.1)
Main machinery: 2 MTU 12V 2000 diesels; 2,660 hp (2.0 MW); 2 Rolls Royce FF 550 waterjets
Speed, knots: 35
Complement: 3
Military lift: 42 troops or 10 tons
Guns: 2—12.7 mm MGs.
Raders: Navigation: Terna; I-band.

Comment: Project 'Ghannatha' was for 12 amphibious transport craft based on the Transportbåt 2000 craft in service with the Royal Swedish Navy. Three craft were constructed at the Djupviks yard in Sweden while ADSB built the other nine. Details of the aluminium craft are based on those in Swedish service. Delivery was completed in 2004. An order for a further 12 missile-armed craft was made in March 2009. These are to be stretched (26.5 m) variants equipped with MBDA Marte Mk 2 missiles. The original 12 craft are to be converted into two variants. Six are to be converted to a mortar-firing role and six to a gunboat role.

P 210 3/2008, *Michael Nitz* / 1353499

3 AL FEYI CLASS (LCU)

AL FEYI L 51 (ex-5401) DAYYINAH L 52 (ex-5402) JANANAH L 53 (ex-5403)

Displacement, tons: 650 full load
Dimensions, feet (metres): 164 × 36.1 × 9.2 (50 × 11 × 2.8)
Main machinery: 2 diesels; 1,248 hp (931 kW); 2 shafts
Speed, knots: 11
Range, n miles: 1,800 at 11 kt
Complement: 10
Military lift: 4 vehicles
Guns: 2 12.7 mm MGs

Comment: *Al Feyi* built by Siang Huet, Singapore; completed 4 August 1967. The other pair built by Argos Shipyard, Singapore to a similar design and completed in December 1988. Used mostly as transport ships. Pennant numbers changed in 2001.

DAYYINAH (old number) 6/1996 / 0080929

2 LANDING CRAFT (LCU)

L 41 UMM AL NARR L 42

Measurement, tons: 380 dwt
Dimensions, feet (metres): 145.5 × 32.8 × 7.2 (44.4 × 10.0 × 2.2)
Main machinery: 2 Caterpillar CAT 3406TA diesels; 730 hp (544 kW); 2 shafts
Speed, knots: 10
Range, n miles: 1,000 at 8.5 kt
Complement: 11 (3 officers) plus 40 troops
Military lift: Military vehicles

Comment: Fully designed in the UAE, these multimission landing craft were constructed by Abu Dhabi Shipbuilding in marine grade steel. The craft are equipped with three hydraulic deck cranes. The first ship was delivered to the navy in mid-2004 and the second to UAE Special Forces Command on 22 June 2006.

UMM AL NARR 6/2006, *Abu Dhabi Shipbuilding* / 1159231

4 FAST SUPPLY VESSELS (LCP)

L 22-25

Displacement, tons: 53 standard; 73 full load
Dimensions, feet (metres): 85.3 x 17.7 x 4.3 (26.0 x 5.4 x 1.3)
Main machinery: 2 MTU 16V 2000 M70 diesels; 2,775 hp (2.1 MW); 2 Rolls Royce FF 550 waterjets
Speed, knots: 32
Complement: 3
Military lift: 2-3 m containers plus 18 troops
Guns: 2-12.7 mm MGs.

Comment: A contract for the construction of four fast supply vessels was made with Abu Dhabi Shipbuilding on 27 June 2004. The aluminium craft were built to a SwedeShip Marine design, developed in conjunction with the Swedish Defence Material Administration. The principal design features include a hydraulically operated bow door and space for storage of two fully loaded 3 m containers or a vehicle. An NBC citadel includes the wheelhouse and medical quarters. The latter can accommodate four stretcher cases or 18 fully equipped troops. All four vessels had been delivered by March 2007.

L 22 2/2007, Patrick Allen/Jane's / 1311306

ANNAD 6/1994 D080930

2 HARBOUR TUGS (YTM)

TEMSAH A 51 UGAAB A 52

Displacement, tons: 90 full load
Dimensions, feet (metres): 54.1 x 16.4 x 5.9 (16.5 x 5.0 x 1.8)
Main machinery: 2 Volvo Penta TAMD-122A diesels; 760 hp (560 kW); 2 shafts

Comment: Ordered from Damen shipyard, Gorinchem in 1996 and entered service in 1998. Main role to attend Kortenaer class frigates. Equipped with fire-fighting platform abaft the mainmast.

TEMSAH 7/2007, M Doelrick / 1170241

AUXILIARIES

1 DIVING TENDER (YDT)

AL GAFFA D 1051

Displacement, tons: 100 full load
Dimensions, feet (metres): 103 x 22.6 x 3.6 (31.4 x 6.9 x 1.1)
Main machinery: 2 MTU 12V 396 TB93 diesels, 3,260 hp(m) (2.4 MW) sustained; 2 waterjets
Speed, knots: 26
Range, n miles: 390 at 24 kt
Complement: 6

Comment: Ordered from Croatia in December 1985 for Abu Dhabi and delivered in July 1987. GRP hull. Used primarily for mine clearance but also for diving training, salvage and SAR. Fitted with a decompression chamber and diving bell. Lengthened version of Italian *Alicide Pedretti*.

AL GAFFA 3/1997 / 0019363

1 COASTAL TUG (YTB)

ANNAD A 3501

Displacement, tons: 795 full load
Dimensions, feet (metres): 114.8 x 32.2 x 13.8 (35 x 9.8 x 4.2)
Main machinery: 2 Caterpillar 3606TA diesels; 4,180 hp (3.12 MW) sustained; 2 shafts, cp props; bow thruster; 362 hp (266 kW)
Speed, knots: 14
Range, n miles: 2,500 at 14 kt
Complement: 14 (3 officers)
Radars: Navigat.on: Racal Decca 2070; I-band

Comment: Built by Dunston Hessta, and completed in April 1989. Bollard pull, 55 tons. Equipped for SAR and is also used for logistic support.

POLICE BARRACUDA 1/2002, A Sharma / 0534111

COAST GUARD

Notes: (1) Under control of Minister of Interior. In addition to the vessels listed below there is a number of Customs and Police launches including Barracuda craft, three Swedish Boghammar 13 m craft of the same type used by Iran and delivered in 1985, two Baglietto police launches acquired in 1988, about 10 elderly Dhafeer and Spear class of 12 and 8 m respectively, and two Halmatic Arun class Pilot craft delivered in 1990-91; some of these launches carry light machine guns.

(2) Plans to procure a fleet of 34 fast intercept craft for the UAE Critical National Infrastructure Authority were announced in March 2009. Capable of 50 kt, the craft are to be based on the Yonca-Onuk MRTIP 16 design, which are extended versions of the Kaan 15 craft in service with the Turkish Coast Guard. The first 12 craft are to be built by Yonca-Onuk at Tuzla, Turkey, and the remaining 22 by Abu Dhabi Shipbuilding. Delivery of the first craft is expected in 2010.

2 PROTECTOR CLASS (WPB)

101 (ex-1101) 102 (ex-1102)

Displacement, tons: 180 full load
Dimensions, feet (metres): 108.3 x 22 x 6.9 (33 x 6.7 x 2.1)
Main machinery: 2 MTU 16V 396TE94 diesels, 5,911 hp(m) (4.35 MW) sustained; 2 shafts; LIPS propa
Speed, knots: 33
Complement: 14
Guns: 1 Mauser 20 mm, 2—12.7 mm MGs.
Weapons control: 1 SAGEM optronic director
Radars: Surface search; I-band.

Comment: Ordered from FBM Marine, Cowes in 1998. Aluminium hulls. First one laid down 15 June 1998. Both delivered in late 1999. More may be built by Abu Dhabi Shipbuilders. Similar to Bahamas and Chilean naval craft.

PROTECTOR 101 (old number)

11/1999, UAE Coast Guard / 0106675

5 CAMCRAFT 77 ft (COASTAL PATROL CRAFT) (WPB)

753-757

Displacement, tons: 70 full load
Dimensions, feet (metres): 76.8 x 18 x 4.9 (23.4 x 5.5 x 1.5)
Main machinery: 2 GM 12V-71TA diesels; 840 hp (627 kW) sustained; 2 shafts
Speed, knots: 25
Complement: 8
Guns: 2 Lawrence Scott 20 mm (not always embarked)
Radars: Surface search; Racal Decca; I-band.

Comment: Completed 1975 by Camcraft, New Orleans. Not always armed.

CAMCRAFT 755

6/1997 / 0019364

16 CAMCRAFT 65 ft (COASTAL PATROL CRAFT) (WPB)

650-665

Displacement, tons: 50 full load
Dimensions, feet (metres): 65 x 18 x 5 (19.8 x 5.5 x 1.5)
Main machinery: 2 MTU 6V 396TB93 diesels; 1,630 hp(m) (1.2 MW) sustained; 2 shafts (in 14)
 2 Detroit 8V-92TA diesels; 700 hp (522 kW) sustained; 2 shafts (in 2)
Speed, knots: 25
Complement: 8
Guns: 1 Oerlikon 20 mm GAM BO1
Radars: Surface search; Racal Decca; I-band.

Comment: Built by Camcraft, New Orleans and delivered by September 1978.

CAMCRAFT 655

12/2001, A Sharma / 0534118

6 BAGLIETTO GC 23 TYPE (COASTAL PATROL CRAFT) (WPBF)

758-763

Displacement, tons: 50.7 full load
Dimensions, feet (metres): 78.7 x 18 x 3 (24 x 5.6 x 0.9)
Main machinery: 2 MTU 12V 396TB93 diesels; 3,280 hp(m) (2.4 MW) sustained; 2 Kamewa water-jets
Speed, knots: 43
Range, n miles: 700 at 20 kt
Complement: 9
Guns: 1 Oerlikon 20 mm, 2—7.62 mm MGs.
Radars: Surface search; I-band.

Comment: Built by Baglietto, Varazze. First two completed in March and May 1986, second pair in July 1987 and two more in 1988. All were delivered to UAE Coast Guard in Dubai.

BAGLIETTO 758

1987, UAE Coast Guard / 0080934

3 BAGLIETTO 59 ft (COASTAL PATROL CRAFT) (WPBF)

501-503

Displacement, tons: 22 full load
Dimensions, feet (metres): 59.4 x 13.9 x 2.3 (18.1 x 4.3 x 0.7)
Main machinery: 2 MTU 12V 183TE92 diesels; 2 shafts
Speed, knots: 40
Complement: 6
Guns: 2—7.62 mm MGs.
Radars: Surface search; Racal Decca; I-band.

Comment: Ordered in 1992 and delivered in late 1993.

BAGLIETTO 503

10/1993, UAE Coast Guard / 0080935

For details of the latest updates to *Jane's Fighting Ships* online and to discover the additional information available exclusively to online subscribers please visit
jfs.janes.com

6 WATERCRAFT 45 ft (COASTAL PATROL CRAFT) (PB)

Displacement, tons: 25 full load
Dimensions, feet (metres): 45 x 14.1 x 4.6 (13.7 x 4.3 x 1.4)
Main machinery: 2 MAN D2542 diesels; 1,300 hp(m) (956 kW); 2 shafts
Speed, knots: 26
Range, n miles: 380 at 18 kt
Complement: 5
Guns: Mounts for 2—7.62 mm MGs.
Radars: Surface search: Racal Decca; I-band.

Comment: Ordered from Watercraft, UK in February 1982. Delivery in early 1983. Four deleted. Two similar craft built by Halmatic were delivered to the Dubai Port Authority in October 1997.

WATERCRAFT 45 ft 1984, UAE Coast Guard / 0506115

35 HARBOUR PATROL CRAFT (PB/YDT)

Comment: The latest are 11 Shark 33 built by Shaali Marine, Dubai and delivered in 1993-94. The remainder are a mixture of Barracuda 30 ft and FPB 22 ft classes. All are powered by twin outboard engines and most carry a 7.62 mm MG and have a Norden radar. There are also two Rotork craft used as diving tenders. Customs boats are operated separately by each of the UAE states. Some have been built for Kuwait.

BARRACUDA 271 12/2001, A Sharma / 0534117

0 + 12 AL SABER CLASS (PATROL BOATS) (PB)

Displacement, tons: 100
Dimensions, feet (metres): 111.5 x 23.0 x 5.2 (34.0 x 7.0 x 1.6)
Main machinery: 2 MTU diesels; 2 shafts
Speed, knots: 25
Range, n miles: 440 at 12 kt
Complement: 7
Guns: 1—25 mm, 1—12.7 mm MG.
Electro-optic systems: To be announced.
Radars: Surface search/navigation: I-band
Navigation: I-band.

Comment: The contract for the construction of 12 patrol craft was announced on 6 March 2008. The vessels, to be constructed in composite materials, are to be built by Abu Dhabi Shipbuilding. The design features a stern-ramp to enable the accommodation of a fast intercept craft in a mother-daughter arrangement. The vessels are to be delivered from 2009.

AL SABER CLASS 6/2008*, ADSB / 1353498

54 SEASPRAY ASSAULT BOATS (PB)

Displacement, tons: To be announced
Dimensions, feet (metres): 31.2 x 10.2 x 1.6 (9.5 x 3.1 x 0.5)
Main machinery: 2 outboards, 500 hp (375 kW)
Speed, knots: 50
Range, n miles: 450 at 17 kt
Complement: 5
Radars: Navigation: I-band.

Comment: Initial batch of 24 craft delivered in September 2003. A further thirty were ordered in early 2004. Designed by Sea Spray Aluminium Boats.

SEASPRAY 2/2004, ADSB / 0563487

1 + 11 HALMATIC WORK BOATS (PB)

Displacement, tons: 13.3
Dimensions, feet (metres): 52.6 x 13.1 x 2.3 (16.0 x 4.0 x 0.7)
Main machinery: 2 diesels, 2 waterjets
Speed, knots: 24
Complement: 5
Radars: Navigation: I-band.

Comment: Construction of 12 craft started at Abu Dhabi Shipbuilding Composites in mid-2006. The first of class was completed by March 2007 but the delivery schedule for the remainder has not been confirmed. Based on the VT Halmatic Sea Keeper design with an asymmetric catamaran hull, the craft are highly manoeuvrable and are capable of carrying a 10 tonne payload.

WORK BOAT 2/2007, Patrick Allen/Jane's / 1321982

United Kingdom

Country Overview

The United Kingdom of Great Britain and Northern Ireland is situated in north-western Europe. It has a coastline of 6,700 n miles with the English Channel, the North Sea, the Irish Sea and the Atlantic Ocean. With an area of 93,341 square miles, it comprises the island of Great Britain (England, Scotland and Wales) and the six counties of Ulster that remained a constituent part of UK after Irish independence in 1922. It also includes the Isle of Wight, Anglesey, the Scilly, Orkney, Shetland, and Hebridean archipelagos and numerous smaller islands. The Isle of Man and the Channel Islands are direct dependencies but are not part of the UK. Other dependent territories are: Anguilla, Bermuda; British Antarctic Territory; British Indian Ocean Territory (BIOT); British Virgin Islands; Cayman Islands; Cyprus Sovereign Base Areas; Falkland Islands; Gibraltar; Montserrat; Ducie, Henderson and Oeno; St Helena and Dependencies (Ascension and Tristan da Cunha); South Georgia and South Sandwich Islands and the Turks and Caicos Islands. London is the capital, largest city and a major port. Major oil ports are at Forth, Sullom Voe and Milford Haven and non-oil ports at Tees and Hartlepool, Grimsby and Immingham, Southampton, Liverpool, Felixstowe, Medway, and Dover. Territorial seas of 12 n miles are claimed around the UK mainland and many dependencies. An EEZ (200 n miles) is claimed for Bermuda, South Georgia and South Sandwich Islands and Pitcairn. A Fishery Zone (200 n miles) is claimed for the mainland and some dependencies.

Headquarters Appointments

Chief of the Naval Staff and First Sea Lord:

Admiral Sir Mark Stanhope, KCB, OBE

Commander-in-Chief, Fleet:

Admiral Sir Trevor Soar, KCB

Chief of Naval Personnel and Commander-in-Chief, Naval Home Command:

Vice Admiral A M Messay, CBE

Chief of Material (Fleet):

Vice Admiral A D H Matthews, CB

Controller of the Navy:

Rear Admiral A M Hussain

Assistant Chief of the Naval Staff:

Rear Admiral R G Cooling

Flag Officers, Operational and National Commanders

Chief of Joint Operations:

Lieutenant General Sir Nick Houghton, KCB, CBE

Deputy Commander-in-Chief, Fleet:

Vice Admiral R J Ibbotson, DSC

Chief of Staff (Capability) (Commandant General Royal Marines):

Major General A Salmon, OBE

Commander, Operations (Rear Admiral Submarines):

Rear Admiral M Anderson

Commander, UK Maritime Forces:

Rear Admiral P A Jones

Flag Officer, Sea Training:

Rear Admiral C A Snow

Flag Officer, Scotland, Northern England and Northern Ireland:

Rear Admiral M B Alabaster

Commander, British Forces Cyprus:

Air Vice-Marshal R Lacey, CBE

Commander United Kingdom Task Group:

Commodore D L Potts

Commander, UK Maritime Component, Bahrain:

Commodore T M Lowe

Commander Amphibious Task Group:

Commodore P D Hudson, CBE

Commander, 3 Commando Brigade:

Brigadier G K Messenger

Commander, British Forces Gibraltar:

Commodore M J Parr

Flag Officers, Operational and National Commanders—continued

Commander, British Forces South Atlantic Islands:

Air Commodore G Moulds, MBE

Commodore Royal Fleet Auxiliary:

Commodore W M Walworth

Commodore Portsmouth Flotilla:

Commodore M P Mansergh

Commodore Devonport Flotilla:

Commodore J S Westbrook, MBE

Captain Faslane Flotilla:

Captain S W Garrett, OBE

Hydrographer of the Navy:

Captain R G Stewart

Diplomatic Representation

Defence Attaché in Ankara:

Colonel C O Hodges MBE

Defence Attaché in Athens:

Colonel P Lodge

Notes:

(1) Joint Force Harrier (JFH) formed on 1 April 2000. Operating Harrier GR 9 aircraft and complemented by RN and RAF pilots, it comprises four squadrons. No 1(F) Sqn RAF, No 4 (AC) Sqn RAF and 800 and 801 Squadrons Naval Strike Wing (NSW).

(2) The Joint Helicopter Command (JHC) became operational on 1 April 2000 and brought all battlefield helicopters from all three services under one command at HQ Land, Wilton. Total helicopter assets number some 450. The command includes the Commando Helicopter Force (CHF), a group of four RN/RM squadrons, based at Yeovilton, which specialises in amphibious warfare and whose prime task is to support 3 Cdo Brigade.

(3) Mirach 100/5 subsonic drones are operated by 792 Squadron at Culdrose

(4) The Royal Navy SAR force comprises 771 Squadron (Culdrose) and the Gannet SAR flight (Prestwick). 771 Squadron covers the SW approaches and the Gannet SAR flight the NW approaches and northern Irish Sea. In the future a Joint Search and Rescue Service is to be provided for the UK SAR region under a single contract. The service is to be manned by military and civilian aircraw and is to be managed jointly by the MoD and Maritime Coast Guard Agency.

SUBMARINES

Notes: Three 6.7 m US-made Mk VIII Mod 1 Swimmer Delivery Vehicles were acquired in 1999. Battery-powered, they can transport six combat swimmers and have a radius of 67 km (36 n miles).

SDV Mk VIII

1/2002, M Declerck / 0137551

Attack Submarines (SSN)

Notes: Future submarine requirements are being taken forward in a twin-track approach. In the short-term, technology advances to an extended Astute class are under consideration. Conceptual studies are also investigating requirements for a 'Maritime Underwater Future Capability' (MUFC) post 2020. Options are likely to include a development of the Astute class and linkage to future SSBN concept work is also a possibility.

0 + 4 (3) ASTUTE CLASS (SSN)

Name	No	Builders	Laid down	Launched	Commissioned
ASTUTE	S 20	BAE Systems, Barrow	31 Jan 2001	8 June 2007	2009
AMBUSH	S 21	BAE Systems, Barrow	22 Oct 2003	Dec 2009	2010
ARTFUL	S 22	BAE Systems, Barrow	11 Mar 2005	Apr 2011	2012
AUDACIOUS	S 23	BAE Systems, Barrow	24 Mar 2009	2013	2015
—	—	BAE Systems, Barrow	2010	2015	2017

Displacement, tons: 6,500 surfaced; 7,400 dived
Dimensions, feet (metres): 318.2 x 37.0 x 32.8
 (97 x 11.27 x 10)

Main machinery: Nuclear; 1 RR PWR 2; 2 Aisthom turbines; 27,500 hp (20.5 MW); 1 shaft; pump jet propulsor; 2 turbo generators; 2 diesel alternators; 2 motors for emergency drive; 1 auxiliary retractable prop

Speed, knots: 29 dived
Complement: 140 (12 officers)

Missiles: SLCM: Raytheon Tomahawk Block IV; TERCOM and GPS aided navigation with DSMAC to 1,600+ km (865+ n miles) at 0.7 Mach; warhead (WDU 36B) 454 kg.

Torpedoes: 6–21 in (533 mm) tubes for Tomahawk, Sub Harpoon and Spearfish torpedoes. Total of 38 weapons.
Mines: In lieu of torpedoes.

Countermeasures: Decoys. ESM. Racal UAP 4, intercept.
Combat data systems: BAE Systems ACMS tactical data handling system. Links 11/16.

Radars: Navigation: I-band.

Sonars: Thomson Marconi 2076 integrated suite (bow, flank, fin and towed arrays)

Programmes: Invitations to tender issued on 14 July 1994 to build three of the class with an option for two more. GEC Marconi selected as prime contractor in December 1995. Contract to start building the first three placed on 17 March 1997. First steel cut late 1999 but although formal

ASTUTE

6/2007, Richard Scott / 1167735

keel-laying took place in 2001, design, engineering and programme management difficulties led to a three-year delay to the first of class. This was extended to four years by a range of emergent first of class issues. There were similar delays to the second and third of class. Approval for construction of the fourth of class was given on 21 May 2007. A contract funded initial manufacture work and a follow-on contract is expected in mid-2009 to cover the balance of construction. A further three boats are expected to be built to a 22-month production 'drumbeat'.

Structure: An evolution of the Trafalgar design with increased weapon load and reduced radiated noise

but with overall performance similar to Trafalgar after full modernisation. The fin is slightly longer and there are two Thales Optronics CM010 non-hull-penetrating optronic masts. A more advanced variant is to be fitted to *Audacious* and subsequent boats. The boats are to have a dry dock hangar capability (Project Chaffont). A fully reelable towed-array handling system is incorporated. A 'Thin Flank' array is to be fitted in *Audacious* and a lighter bow array in *Boat 5*.

Operational: Fitted with Core H, nuclear refuelling will not be necessary in the lifetime of the submarine. To be based at Faslane. Sea trials of *Astute* are to begin in mid-2009.

Dimensions, feet (metres): 272 x 32.3 x 28
 (82.9 x 9.8 x 8.5)

Main machinery: Nuclear; 1 RR PWR 1; 2 GEC turbines; 15,000 hp (11.2 MW); 1 shaft; pump jet propulsor; 2 WH Allen turbo generators; 3.6 MW; 1 Paxman diesel alternator; 1,900 hp (1.42 MW); 1 motor for emergency drive; 1 auxiliary retractable prop

Speed, knots: 30+ dived
Complement: 116 (13 officers)

Missiles: SLCM: Hughes Tomahawk Block III; TERCOM aided inertial navigation system with GPS back-up to 1,600+ km (865+ n miles) at 0.7 Mach; warhead (WDU 36B) 454 kg. Fitted in S 104 only

Torpedoes: 5–21 in (533 mm) bow tubes. Marconi Spearfish; wire-guided; active/passive homing to 26 km (14 n miles) at 65 kt; or 31.5 km (17 n miles) at 50 kt; attack speed 55 kt; warhead 300 kg directed charge; 20 reloads.

Mines: Can be carried in lieu of torpedoes.

Countermeasures: Decoys: SAWCS from 2002, 2 SSE Mk 6 launchers Type 2066 torpedo decoys.

ESM: Racal UAP; passive intercept

Combat data systems: Dowty Sema SMCS tactical data handling system. Link 11 can be fitted.

Radars: Navigation: Kelvin Hughes Type 1007; I-band

Sonars: TUSL Type 2074 LRE; hull-mounted; active/passive search and attack; low frequency.

TUSL Type 2046; towed array; passive search; very low frequency.

Ultra Electronics 2082; active intercept and ranging.

Marconi Type 2077; ice navigation; active; high frequency

Programmes: *Sceptre* ordered 1 November 1971.

Modernisation: Fitted with a PWR 1 Core Z during major refits to give a 8 to 10 year refit cycle (12 year life). *Sceptre* completed major refits in 1987 and 2001. Other improvements included acoustic elastomeric tiles, sonar processing equipment and improved decoys. Equipped with Tomahawk Block III in 2006

SWIFTSURE CLASS

9/2001, Lockheed Martin / 0131748

SWIFTSURE CLASS

1/2002, Ships of the World / 0131754

Structure: The pressure hull in the Swiftsure class maintains its diameter for much greater length than earlier classes. Control gear by MacTaggart, Scott & Co Ltd for: attack and search periscopes, snort induction and exhaust, radar and ESM masts. The forward hydroplanes house within the casing. Fitted with Pilkington

Optronics CK 33 search and CH 83 attack electro-optic periscopes.

Operational: Based at Faslane. *Swiftsure* paid off in 1992, *Splendid* in 2003, *Spartan* in early 2006, *Sovereign* on 26 September 2006 and *Superb* on 26 September 2008. *Sceptre* is to decommission in 2010

TALENT	S 92	Vickers Shipbuilding & Engineering, Barrow-in-Furness	13 May 1986	15 Apr 1988	12 May 1990
TRIUMPH	S 93	Vickers Shipbuilding & Engineering, Barrow-in-Furness	2 Feb 1987	16 Feb 1991	12 Oct 1991

Displacement, tons: 4,740 surfaced, 5,208 dived
Dimensions, feet (metres): 280.1 x 32.1 x 31.2 (85.4 x 9.8 x 9.5)
Main machinery: Nuclear; 1 RR PWR 1; 2 GEC turbines; 15,000 hp (11.2 MW); 1 shaft; pump jet propulsor; 2 WH Allen turbo generators; 3.2 MW; 2 Paxman diesel alternators; 2,800 hp (2.09 MW); 1 motor for emergency drive; 1 auxiliary retractable prop
Speed, knots: 32 dived
Complement: 130 (18 officers)

Missiles: SLCM: Raytheon Tomahawk Block IV; TERCOM and GPS aided inertial navigation system with DSMAC to 1,600 km (865+ n miles) at 0.7 Mach; warhead (WDU 36B) 454 kg. Being fitted to all from 2008.
Torpedoes: 5-21 in (533 mm) bow tubes. Marconi Spearfish; wire-guided; active/passive homing to 26 km (14 n miles) at 65 kt; or 31.5 km (17 n miles) at 50 kt, attack speed 55 kt; warhead 300 kg directed charge, 20 reloads.
Mines: Can be carried in lieu of torpedoes.
Countermeasures: Decoys. SAWCS from 2002. 2 SSE Mk 8 launchers. Type 2066 torpedo decoys.
RESM: Racal UAP 1; passive intercept.
CESM: Eddystone.
Combat data systems: BAE Systems SMCS tactical data handling system.
Weapons control: BAE Systems SMCS.
Radars: Navigation; Kelvin Hughes Type 1007; I-band.
Sonars: TUSL 2074 LRE; hull-mounted; passive/active, search and attack; low frequency. TUSL 2046; towed array,

passive search, very low frequency. Ultra Electronics 2082, active intercept and ranging.
 TUSL 2076 (S90-93) integrated sonar suite comprising flank array, towed array, conformal bow array, mine avoidance array.
 TUSL 2077; ice navigation.

Programmes: *Trafalgar* ordered 7 April 1977; *Turbulent* 28 July 1978; *Tireless* 5 July 1979; *Torbay* 26 June 1981; *Trenchant* 22 March 1983; *Talent* 10 September 1984; *Triumph* 3 January 1986

Modernisation: *Trafalgar* completed refuel in December 1995 and was fitted with SMCS and Spearfish torpedoes. *Turbulent* refuelled by mid-1997 and was refitted with sonar 2074, SMCS and Spearfish. *Tireless* completed similar modernisation and refuelling in January 1999. Refuel periods for the last four boats are being undertaken in parallel with a major tactical modernisation programme, the main feature of which is installation of the sonar 2076 integrated sonar suite to replace the 2074 bow array and 2046 towed array. Other upgrades include enhancements to SMCS, a new command console and improved signature reduction measures. *Torbay* and *Trenchant* were the first and second boats to complete a 2076 refit and refuel in 2003 and 2004 respectively. *Talent* completed her three-year refit in January 2007 and *Triumph* is expected to complete her refit in 2009. Meanwhile, an ongoing programme of software replacement will continue to realise capability improvements in the last four boats.

As a parallel programme, SMCS is being upgraded to SMCS NG and Tomahawk cruise missiles are being fitted to the whole class. *Triumph* and *Trafalgar* were completed by mid-2001, *Turbulent* in 2002 and *Trenchant* in 2004. *Tireless* and *Talent* were completed in 2006 and *Torbay* in 2007. Tomahawk Block IV missiles started to replace Block III missiles in March 2008. Following a joint UK/US feasibility study, a Torpedo-Tube Launched (TTL) variant of the missile was developed for UK use. A series of developmental tests began in 2005, culminating in the successful completion of a 650 n mile flight of a TTL missile, fired from *Trenchant*, on 21 June 2007. In parallel, the Tactical Tomahawk Weapons Control (TTWC) and Tomahawk Strike Network (TSN), first installed in *Trafalgar* in 2004, has been fitted in six of the class. *Triumph* is being upgraded during refit. Replacement of the CESM system was initiated in 2002 and upgrade of the RESM system UAP 1, was initiated in 2006.

Structure: The pressure hull and outer surfaces are covered with conformal anechoic noise reduction coatings. Retractable forward hydroplanes and strengthened fins for under ice operations. Diving depth in excess of 300 m (985 ft). Fitted with Pilkington Optronics CK 34 search and CH 84 attack periscopes.

Operational: Trials of a high-frequency active sonar (AN/BOS-15/A derivative) conducted in *Trenchant* in 2008. All of the class based at Devonport. The class is planned to pay off as follows: *Trafalgar* 2009; *Turbulent* 2011; *Tireless* 2013 and the remainder of the class by 2022.

Strategic Missile Submarines (SSBN)

Notes: It was announced on 4 December 2006 that the UK nuclear deterrent is to be maintained beyond the life of the Vanguard-class submarines. Detailed concept work on a next-generation nuclear-powered ballistic submarine (SSBN) began in 2007 with a view to a contract for their detailed design being let in 2012-14. Work on a common UK/US missile compartment was initiated in January 2009.

Replacement of the current fleet of SSBNs, assuming a life extension of five years, is required from 2024. The future SSBN force is to be comprised of three or four boats. In parallel, UK is to participate in the US Navy's Trident D5 life-extension programme that is to prolong missile life to about 2042. Decisions on whether to acquire a successor to the life-extended D5 missile, and what form it is to take, are

required in the 2020s. Policy to deploy up to 48 warheads on a single submarine is to continue and it was announced that the current inventory of operationally available warheads is to be reduced from 'fewer than 200' to 'fewer than 180'. Current warheads are expected to remain in service until the 2020s and a decision as to whether they are to be refurbished or replaced is expected by 2014.

4 VANGUARD CLASS (SSBN)

Name	No	Builders	Laid down	Launched	Commissioned
VANGUARD	S 28	Vickers Shipbuilding & Engineering, Barrow-in-Furness	3 Sep 1986	4 Mar 1992	14 Aug 1993
VICTORIOUS	S 29	Vickers Shipbuilding & Engineering, Barrow-in-Furness	3 Dec 1987	29 Sep 1993	7 Jan 1995
VIGILANT	S 30	Vickers Shipbuilding & Engineering, Barrow-in-Furness	16 Feb 1991	15 Oct 1995	2 Nov 1996
VENGEANCE	S 31	Vickers Shipbuilding & Engineering, Barrow-in-Furness	1 Feb 1993	19 Sep 1998	27 Nov 1999

Displacement, tons: 15,980 dived
Dimensions, feet (metres): 491.8 x 42 x 39.4
 (149.9 x 12.8 x 12)

Main machinery: Nuclear; 1 RR PWR 2; 2 GEC turbines; 27,500 hp (20.5 MW); 1 shaft; pump jet propulsor; 2 auxiliary retractable propulsion motors; 2 WH Allen turbo generators; 6 MW; 2 Paxman diesel alternators; 2,700 hp (2 MW)

Speed, knots: 25 dived
Complement: 135 (14 officers)

Missiles: SLBM: 16 Lockheed Trident 2 (D5) 3-stage solid fuel rocket; inertial guidance with stellar update to 12,000 km (6,500 n miles); cap 90 m. Each missile can carry up to 12 warheads of (reported) selected yield up to 100 kT although, following a 1990 government decision, a maximum of 48 warheads is carried in UK SSBNs. The precise number deployed depends on prevailing circumstances

Torpedoes: 4-21 in (533 mm) tubes. Marconi Spearfish; dual purpose; wire-guided; active/passive homing to 26 km (14 n miles) at 65 kt; or 31.5 km (17 n miles) at 50 kt; attack speed 55 kt; warhead 300 kg directed charge

Countermeasures: Decoys: 3 SSE Mk 10 launchers Type 2066 and 2071 decoys.
 ESM: Racal UAP 3; intercept.

Combat data systems: Alenia Marconi Systems SMCS NG.

Weapons control: Ultra Electronics Outfit DCM 4

Radars: Navigation: Kelvin Hughes Type 1007; I-band.

Sonars: TMSL Type 2054 composite multifunctioned sonar suite includes towed array, hull-mounted active/passive search and passive intercept and ranging. Type 2081 Environmental Sensor System.

Programmes: On 15 July 1980 the decision was made to buy the US Trident I (C4) weapon system. On 11 March 1982 it was announced that the government had opted for the improved Trident II weapon system, with the D5 missile, to be deployed in a force of four submarines. *Vanguard* ordered 30 April 1986; *Victorious* 6 October 1987; *Vigilant* 13 November 1990 and *Vengeance* 7 July 1992

Modernisation: *Vanguard* underwent LOP(R) at Devonport February 2002 to June 2005. *Victorious* started LOP(R) in April 2005 and completed in May 2008. *Vigilant* LOP(R) started in October 2008 and is to be completed in 2011. A contract for the upgrade of the inboard signal, data and display processing systems of sonar Type 2054 was let to Lockheed Martin in September 2006. The upgrade is to include open architecture processing based on the ARCI model in service in the US Navy. The first full system is to be in service in 2009. There are no plans to deploy conventional warheads on Trident or to modify

launch tubes to accommodate cruise missiles. Upgrade of UAP 3 RESM is planned. Invitations to tender for the SMART programme, which is to modernise the inboard portion of the equipment, were issued in June 2006.

Structure: A new reactor core, Core H, has been fitted to *Vanguard* and *Victorious* and is to be installed in the other two boats at their LOP(R). No further reactor fuelling will be required during their service lives. The outer surface of the submarine is covered with conformal anechoic noise reduction coatings. Fitted with Pilkington Optronics CK 51 search and CH 91 attack periscopes.

Operational: Three successful submerged launched firings of the D5 missile from USS *Tennessee* in December 1989 and the US missile was first deployed operationally in March 1990. *Vanguard* started sea trials in October 1992; the first UK missile firing was on 26 May 1994 and the first operational patrol in early 1995. The eighth successful UK firing of a D5 missile was made by *Vanguard* on 10 October 2005. At least one SSBN has been at immediate readiness to fire ballistic missiles since 1969, but as a result of the Strategic Defence Review in 1998, readiness to fire has been relaxed 'to days rather than minutes'. There are no plans to phase out the two crew system. Submarines on patrol can be given secondary tasks without compromising security. Based at Faslane.

Displacement, tons: 20,600 full load
Dimensions, feet (metres): 685.8 oa; 632 wl x 118 oa; 90 wl x 26 (screws) (209.1; 192.6 x 36; 275 x 8)

Flight deck, feet (metres): 550 x 44.3 (1678 x 13.5)

Main machinery: COGAG; 4 RR Olympus TM3B gas turbines; 97,200 hp (72.5 MW) sustained; 2 shafts

Speed, knots: 28

Range, n miles: 7,000 at 19 kt

Complement: 685 (80 officers) plus 366 (80 officers) aircrew plus up to 600 marines

Guns: 3 Signaal/General Electric 30 mm 7-barrelled Gatling Goalkeeper (R 06); 4,200 rds/min to 1.5 km
 3 General Dynamics 20 mm Phalanx Mk 15 (R 07) ●
 6 barrels/launcher; 4,500 rds/min to 1.5 km.
 2 Derikon/BMARC 20 mm GAM-801 ●
 4 M 323 Mk 44 7.62 mm Miniguns.

Countermeasures: Decoys: Outfit DLH; 8 Sea Gnat 6-barrelled 130 mm/102 mm dispensers ●.

ESM: Racal UAT Mod 1 ●; intercept.

Torpedo defence: Preina Masker noise suppression system Type 2170 (SLQ-25A).

Combat data systems: ADAWS 20 Ed 3; Link 11 and Siemens Plessey JTIDS Link 16. JMCIS. SCOT 5 SATCOM ● WECDIS. AIS. CSS BOWMAN.

Weapons control: Rademec optronic director

Radars: Air search Marconi/Signaal Type 1022 ●, D-band.

Air/surface search AMS Type 996 ●, E/F-band.

Navigation 2 Kelvin Hughes Type 1007 ●; I-band.

1 Racal Decca 1008, E/F-band.

CCA: Finmeccanica SPN 720 (V)5; I/J-band

Tacan: TRN 26(M)

Fixed-wing aircraft: Tailored air group of up to 24 aircraft including: BAE Harrier GR 9A ●

Helicopters: Westland Merlin HM.Mk 1 ●, Westland Sea King ASAC Mk 7. Chinook HC2 Apache AH1.

Programmes: The first of class (decommissioned in 2005), the result of many compromises, was ordered from Vickers on 17 April 1973. The order for the second ship was placed on 14 May 1976, the third in December 1978.

ARK ROYAL

8/2008*, Maritime Photographic / 1353550

Modernisation: In February 1994, R 06 completed modernisation which included a 12° ski ramp, space and support facilities for at least 21 aircraft, three Goalkeeper systems, Sea Gnat decoys, 996 radar, Flag and Command facilities and accommodation for an additional 120 aircrew and Flag Staff. Ski ramp was increased to 13°. Modifications to operate Harrier GR 7 were completed in both ships (R 06 – 1998 and R 07 – 2001). This included the removal of Sea Dart, increasing the flight deck area by 7 per cent (23 x 18 m) and fitting GR.7 support facilities. Both *Illustrious* (2004) and *Ark Royal* (2006) converted to undertake secondary role as LPH including the installation of additional accommodation, rework of magazines, improvement of amphibious command and control systems, including BOWMAN, and installation of the MARINARC mass escape system. TACAN and SPN 720(X) precision approach radar also fitted. Air planning spaces have also been refitted to undertake maritime strike role. Planned conversion of *Ark Royal* to replace Phalanx with Goalkeeper was cancelled.

Structure: The forward end of the flight deck (ski ramp) allows STOVL aircraft of greater all-up weight to operate more efficiently. *Illustrious* fitted with a composite third mast at the after end of the island structure to provide mountings for additional communications. She has also had substantial internal changes to accommodate troops in the LPH role. *Ark Royal* received an advanced technology mast in 2006 to house precision approach radar, 1007 radar and NEST.

Operational: The primary role of this class is to operate STOVL aircraft and helicopters. Sea Harriers were phased out in 2006 and the embarked fixed-wing air-group has migrated to an all Harrier GR Mk 9A ground-attack force. Following a restorative docking in 2006, *Ark Royal* returned to service in 2007. *Invincible* decommissioned in 2005 and to be maintained at extended (18 months) readiness until 2010. Decommissioning dates of the other two ships are likely to be 2013 (*Ark Royal*) and 2015 (*Illustrious*).

Name	No	Builders	Laid down	Launched	Commissioned
QUEEN ELIZABETH	—	BVT Surface Fleet Ltd/Babcock International	2009	2013	2015
PRINCE OF WALES	—	BVT Surface Fleet Ltd/Babcock International	2011	2015	2018

Displacement, tons: 68,600 full load
Dimensions, feet (metres): 931.7 x 127.9 x 32.5
 (284.0 x 39.0 x 9.9)
Flight deck, feet (metres): 908.8 x 239.5 (277.0 x 73.0)
Main machinery: Integrated Full Electric Propulsion; 2 Rolls-Royce MT 30 gas turbine alternators; 93,870 hp (70 MW); 4 Wärtsilä diesel generators; 53,064 hp (39.6 MW); 2 induction motors; 53,640 hp (40 MW); 2 shafts
Speed, knots: 26+ **Range, n miles:** To be announced
Complement: 572 (ship) + 810 (air group) + 95 (staff)

Guns: 3 General Dynamics 20 mm Phalanx ● 4—30 mm ● Miniguns.
Countermeasures: Torpedo defence, Type 2170 (SLQ-25A)
Combat data systems: BAE CMS-1, Link 16.
Weapons control: To be announced.
Radars: Air search: Thales Type 1046 (S 1850M) ●; D-band
Air/surface search: BAE Insyte ARTISAN ●; 3D; E/F-band.
Navigation: To be announced ●
CCA: Finmeccanica SPN 720(V)5; I-band.
Tacan: To be announced.

Fixed-wing aircraft: Approximately 40; typically a mix of 30 F-35B combat aircraft, six Merlin anti-submarine aircraft and four Maritime Airborne Surveillance & Control aircraft

Programmes: Following completion of the Demonstration Phase in 2007, it was announced on 25 July 2007 that approval (Main Gate) for the procurement of two aircraft carriers had been given. Approval for the Manufacturing Phase was announced on 20 May 2008 and, following the formation of BVT Surface Fleet Ltd (BAE Systems and VT Group joint venture) contracts for construction were signed on 3 July 2008. Construction of the ships is to be undertaken by the Aircraft Carrier Alliance (ACA) formed of BVT Surface Fleet Ltd, Thales UK, BAE Systems (Marine and Insyte), Babcock Marine and UK MoD as both client and participant. An Alliance Management Board, chaired by the UK MoD, leads and collectively manages the project; BVT Surface Fleet Ltd, is to be responsible for the integration of design, build, commissioning and acceptance of the ships; BAE Insyte has responsibility for mission systems design; Thales leads the management of the Stage 1 design of platform, power and propulsion and takes responsibility for the aviation interface. Construction and assembly of the ships is to be as follows: Blocks 3 and 4 (aft section) at BVTSF Govan; Block 2 (forward midships section) and the two superstructure islands at BVTSF Portsmouth; Block 1 (bow section) and final assembly at Babcock, Rosyth. The remaining 40 per cent of the ship (superstructure) is to be open to competition. Following a delay of up to two years to the construction programme announced on 11 December 2008, it is expected that *Queen Elizabeth* will be formally laid down in 2009. First steel was cut in December 2008.

Structure: The systems and structural design is to Lloyds Naval Ships Rules with some specific naval standards for certain equipments. Of steel construction, the principal design features include a two island arrangement, with flight control from the after island, two deck-edge aircraft lifts and a ski-jump to operate Short Take-Off and Vertical Landing (STOVL) aircraft. Planning assumptions are that CVF is to operate the F-35B STOVL variant of the Joint Strike Fighter, the preferred choice to meet the UK Joint Combat Aircraft requirement; UK signed the MoU for the PFSD phase on 12 December 2008. The flight-deck has a single runway and ramp; five landing spots are positioned on the runway and there is a sixth spot to starboard for helicopter landings only. The design is adaptable in that it allows for the retrofit of catapults and arrestor gear at a later date if required. Other features include eight internal decks, 19 watertight sections each of which

CVF

7/2008, Thales / 45451

CVF

9/2007, Thales / 1167814

contains vertical access trunks for fire-fighting, and an integrated waste management system which is fully MARPOL compliant. Key spaces, such as the Operations Room, have been designed with reconfigurability in mind. All major machinery is controlled and monitored by an Integrated Platform Management System

Air weapons are supplied from two automated deep stores by a Highly Mechanised Weapon Handling System which uses commercial warehousing techniques. Blown Fibre Optic technology is used to connect over 850 compartments via 112 km of fibre.
Operational. To be based at Portsmouth

EDINBURGH	D 97	Cammell Laird, Birkenhead	8 Sep 1980	14 Apr 1983	17 Dec 1985
YORK	D 98	Swan Hunter Shipbuilders, Wallsend-on-Tyne	18 Jan 1980	21 June 1982	9 Aug 1985

Displacement, tons: 4,500 standard; 5,200 full load
Dimensions, feet (metres): 462.8 oa; 434 wl x 49.9 x 19 (screws) (141.7; 132.3 x 15.2 x 5.8)
Main machinery: COGOG; 2 RR Olympus TM3B gas turbines, 50,000 hp (37.3 MW) sustained, 2 RR Tyne RM1C gas turbines (cruising); 10,680 hp (8 MW) sustained; 2 shafts; cp props
Speed, knots: 30+ **Range, n miles:** 4,000 at 18 kt
Complement: 287 (26 officers)

Missiles: SAM BAE Systems Sea Dart twin launcher ①; semi-active radar guidance to 40 km (21 n miles); warhead HE, 22 missiles; limited anti-ship capability.
Guns: 1 Vickers 4.5 in (114 mm)/55 Mk 8 Mod 1 ②; 25 rds/min to 27 km (14.6 n miles) anti-surface; weight of shell 21 kg. Mod 1 (range 33.5 km (18.7 n miles)) in D 97 and D 98.
 2 BMARC 20 mm GAM-801 ③; 1,000 rds/min to 2 km.
 2 General Dynamics 20 mm Phalanx Mk 15 Mod 1b ④; 6 barrels per launcher; 4,500 rds/min combined to 1.5 km.
 2 M 323 Mk 44 7.62 mm Miniguns 4—762 mm MGs.
Countermeasures: Decoys: Outfit DLH, 4 Sea Gnat 130 mm/102 mm 6-barrelled launchers ⑤. DLF-3 offboard decoys.
 ESM. Racal UAT Mod 1; intercept.
 Torpedo defence: Type 2170 (SLQ-25A).
Combat data systems: ADAWS 20 Ed 3.1 action data automation. SCOT 5 SATCOM ⑥; Link 11. JTIDS. Link 16. WECDIS. AIS. CSS BOWMAN.

MANCHESTER

(Scale 1 : 1,200), Ian Sturton / 0572735

Weapons control: GWS 30 Mod 2 (for SAM); GSA 1 secondary system. 2 Radamec 2100 series optronic surveillance directors.
Radars: Air search: Marconi/Signaal Type 1022 ⑦; D-band. Air/surface search: AMS Type 996 ⑧; E/F-band. Navigation. Kelvin Hughes Type 1007 ⑨; I-band and Racal Decca Type 1008 ⑩; E/F-band.
Fire control: 2 Marconi Type 909 Mod 1 ⑪; I/J-band.
Sonars: Ferranti/Thomson Type 2050 or Plessey Type 2016; hull-mounted; active search and attack.

Helicopters: 1 Westland Lynx HAS Mk 3/8 ⑫.

Programmes: The completion of the last three ships was delayed to allow for some modifications resulting from experience in the Falklands' campaign (1982).

Modemisation: Vulcan Phalanx replaced 30 mm guns 1987–89. D 97 had a partial conversion in 1990 with the Phalanx moved forward and a protective visor fitted around the bow of the ship but reverted to the standard armament in 1994. All have had a command system update. Sea Gnat decoy launchers can fire a variety of devices. Mk 8 Mod 1 gun is being progressively fitted.

Structure: A strengthening beam has been fitted on each side which increased displacement by 50 tons and beam by 2 ft. Torpedo tubes removed. Transom flaps, to improve fuel efficiency, fitted in D 95 in 2006.

Operational: The helicopter carries the Sea Skua air-to-surface weapon for use against lightly defended surface ship targets. Sonars not operational. Decommissioning plans: Manchester 2011; Gloucester 2011, York 2012; Edinburgh 2013. Based at Portsmouth.

DARING

(Scale 1 : 1,200), Ian Sturton / 1353511

Helicopters: Lynx Mk HMA 8 (first batch) or Merlin HM Mk 1 ●.

Programmes: This project has gone through many stages, the result of which has been a delay in the provision of a replacement anti-air warfare capability until 2010 and the concomitant extension of the ship-lives of the ageing Type 42s. Starting life as NFR 90 in the 1980s, it was taken forward via the Anglo-French Future Frigate, the tri-nation Common New Generation Frigate (Horizon) and finally, when UK withdrew from the collaborative ship programme on 25 April 1999, a national Type 45 ship project. The contract for the design and build of the first three ships (Batch 1) was placed with the prime contractor, BAE Systems, on 20 December 2000. This was amended in late 2001 to reflect a new procurement strategy in which commitment was made to the first six ships. The second three ships comprise Batch 2. Vosper Thornycroft is building and outfitting Blocks E/F, the forward section of each ship together with the masts and funnel. The remaining Blocks A-D are being built by BAES Surface Fleet Solutions. Final assembly of D 32 was at Scotstoun and assembly of follow-on ships is at Govan. It was announced on 19 June 2008 that plans to build two

Batch 3 ships had been cancelled. Procurement of the missile system was pursued separately and a contract for full development and initial production of PAAMS (Sea Viper) was placed with the tri-national consortium, EUROPAAMS, in August 1999. Test firings are being conducted from the trials barge *Longbow* from 2008–09. System qualification is expected by the end of 2009 and the first ship-launched firing is planned from *Dauntless* in 2010.

Structure: Built to Lloyd's Naval Ship Rules. Provision for future installation of CEC, 155 mm gun or a 16-cell VLS silo, SSM, CIWS and magazine-launched torpedoes. An integrated technology mast is another potential modification. The ships are designed to support and deploy at least 30 troops. OTC facilities are to be included. The suitability of the Type 45 as a BMD platform is being studied.

Operational: Stage 1 sea trials of *Daring* were completed in September 2008 and the ship was accepted off contract on 10 December 2008. Stage 2 trials are to be conducted during 2009. *Dauntless* began sea trials in November 2008. In-service dates are likely to be about a year after commissioning dates.

FRIGATES

Notes: The Sustained Surface Combatant Capability (S2C2) study, started in 2006 by a joint MoD/industry team as a MoD 'Pathfinder' initiative, was completed in March 2007. The aim of the study was to balance the future capability and structure of the surface fleet while safeguarding the UK's long-term complex warship shipbuilding capacity. The conclusions of the study included the plan to procure a new family of ships (collectively known as the Future

Surface Combatant (FSC)) to replace the Type 22 Batch 3 and Type 23 frigates and a range of minor war vessels. Reduction of whole-life costs is to be achieved by the use of common systems and equipment and open architecture technologies. Modular capabilities, particularly mine warfare, embarked military forces and unmanned vehicles will also be important features. The family is likely to include a high-capability multimission ASW and land-attack

capable combatant (C1), a lower capability stabilisation combatant (C2) and an ocean-capable patrol vessel (C3). C1 and C2 would replace the Type 22 and 23 classes and may use the same generic 6,000 ton hull. C3 is likely to be of the order of 2,000 tons. The Assessment Phase (Initial Gate) is to be launched in 2009, the Demonstration and Manufacture Phase (Main Gate) in 2011 and the first of class is to enter service in 2019.

13 DUKE CLASS (TYPE 23) (FFGHM)

Displacement, tons: 3,500 standard; 4,200 full load
Dimensions, feet (metres): 436.2 x 52.8 x 18 (screws), 24 (sonar) (133 x 16.1 x 6.5; 7.3)

Main machinery: CODLAG; 2 RR Spay SM1A (F 229-F 236) or SM1C (F 237 onwards) gas turbines (see *Structure*); 31,100 hp (23.2 MW) sustained; 4 Paxman 12CM diesels; 8,100 hp (6 MW); 2 GEC motors; 4,000 hp (3 MW); 2 shafts
Speed, knots: 28; 15 on diesel-electric
Range, n miles: 7,800 miles at 15 kt
Complement: 181 (13 officers)

Missiles: SSM: 8 McDonnell Douglas Harpoon (2 quad) launchers; active radar homing to 92 km (50 n miles) at 0.9 Mach; warhead 227 kg (84C). 4 normally carried.
 SAM: British Aerospace Seawolf GWS 26 Mod 1 VLS; command line of sight (CLOS) radar/TV tracking to 6 km (3.3 n miles) at 2.5 Mach; warhead 14 kg; 32 canisters.

Guns: 1 Vickers 4.5 in (114 mm)/55 Mk 8; 25 rds/min to 22 km (11.9 n miles); 275 km (14.8 n miles) Mod 1 anti-surface; weight of shell 21 kg. Mk 8 Mod 1 being progressively fitted.
 2 DES/MSI DS 30B 30 mm/75 (being replaced by 30 mm ASCG); 650 rds/min to 10 km (5.4 n miles) anti-surface; 3 km (1.6 n miles) anti-aircraft; weight of shell 0.36 kg.
 2 M 323 Mk 44 7.62 mm Miniguns. 4—7.62 mm MGs.

Torpedoes: 4 Cray Marine 324 mm fixed (2 twin) tubes; Marconi Stingray; active/passive homing to 11 km (5.9 n miles) at 45 kt; warhead 35 kg (shaped charge); depth to 750 m (2,460 ft). Reload in 9 minutes.

Countermeasures: Decoys: Outfit DLH; 4 Sea Gnat 6-barrelled 130 mm/102 mm launchers; DLF 2/3 offboard decoys. Type 2170 torpedo defence system.

ESM: Rascal UAT; intercept

Combat data systems: Insyte Surface Ship Command System (DNA); Link 11. 2 Matra Marconi SCOT 5 SATCOMs; BOWMAN RNCSS. WECDIS

Weapons control: BAe GSA 88/GPEOD optronic director; GWS 60 (for SSM). GWS 26 (for SAM).

Radars: Air/surface search. Plessey Type 996(I); 3D; E/F-band

Surface search: Rascal Decca Type 1008; E/F-band.

Navigation: Kelvin Hughes Type 1007; I-band.

Fire control: 2 Marconi Type 911; I/Ku-band.

IFF: 1010/1011 or 1018/1019.

Sonars: Ferranti/Thomson Sintra Type 2050, bow-mounted; active search and attack

Dowty Type 2031Z (F 229, 231, 234-236), towed array, passive search; very low frequency.

Thales Type 2087 (F 237, 238, 239, 82, 83, 81); active low-frequency (500 Hz) towed body with passive array (100 Hz).

Helicopters: 1 Westland Lynx HMA 3/8 or 1 Merlin HM 1 (Soner 2087 fitted ships).

Programmes: The first of this class was ordered from Yarrow on 29 October 1984. Further batches of three

IRON DUKE

(Scale 1 : 1,200), Ian Sturton / 0530055

PORTLAND

9/2008*, John Brodie / 1353506

ordered in September 1986, July 1988, December 1989, January 1992 and February 1996. Further orders are unlikely. F 229 pennant number changed, because 232 was considered unlucky, as it is the RN report form number for collisions and groundings.

Modernisation: Major improvement programmes are in progress. The Command System has been upgraded to Phase 5 and DNA(2) is to be progressively installed from 2009 (F 236 first ship). The Mk 8 Mod 1 gun is to be installed in the whole class by 2009. Modifications to improve the performance of Type 966 radar are being made and 996 radar is to be replaced by BAe Insyte ARTISAN 3D radar 2010-14. The SeaWolf system is being upgraded from 2008-2014; F 81 is the first ship to be upgraded, enhancements include improved I-band radar, an additional optronic tracker to improve low level performance and improved software. In a separate contract the Mk 4 SWELL (Seawolf Enhanced Low Level) fuze is being incorporated into existing rounds and in Block 2 missiles. Surface Ship Torpedo Defence, a development of Sonar 2070, is being fitted. Low Frequency Active Sonar (Type 2087) is replacing Type 2031 in eight ships. F 237, F 238, F 239, F 82, F 83 and F 81 have been fitted. F 78 and F 79 are to follow in 2010. Trial launch and recovery of a Scan Eagle UAV were conducted

in March 2006. The 30 mm gun is being replaced by the MSI Automated Small Calibre Gun (ASCG) from 2008 (F 82 first to be fitted).

Structure: Incorporates stealth technology to minimise acoustic, magnetic, radar and IR signatures. The design includes a 7° slope to all vertical surfaces, rounded edges, reduction of IR emissions and a hull bubble system to reduce radiated noise. The combined diesel electric and GT propulsion system provides quiet motive power during towed sonar operations. The SM1C engines although capable of 41 MW of power combined are constrained by output into the gearbox. MacTaggart Scott Helios hoist landing system. PRISM enhanced helicopter landing and handling system being fitted to all except F 231.

Operational: F 78, F 83, F 229, F 234, F 237 and F 239 are based at Portsmouth and the remainder, at Devonport. *Norfolk* and *Marlborough* decommissioned in 2005 and *Grafton* in March 2006. All three ships have been sold to Chile. Further decommissionings are not planned to start until 2023, thereby extending ship-life to up to 35 years. ASW trials to test and prove Sonar 2087 and the Merlin helicopter were conducted in the Indian Ocean during 2008.

SHIPBORNE AIRCRAFT

Notes: (1) The F-35B STOVL (Short Take-Off and Vertical Landing) variant of the Lockheed Martin Lightning II Joint Strike Fighter selected on 30 September 2002 to fulfil the Joint Combat Aircraft (JCA) requirement. The aircraft is to replace the RAF/RN aircraft operated by the Joint Force Harrier for operation both from the future carriers and from landbases. There are 138 aircraft planned, first delivery of which is expected to meet an in-service date of 2017. UK signed an MoU to begin full cooperation in the Production, Sustainment and Follow-on Development (PFSD) phase on 12 December 2005. The maiden flight of the F-35B took place on 11 June 2008 and the first full STOVL test is expected in 2009.

(2) Following the withdrawal from service of Sea Harrier, the Harrier force has migrated to an all GR force. 85 GR.7 and GR.7A and nine T10 aircraft to receive an avionics and weapons upgrade to GR 9/GR 9A/T.12 standard by late 2009.

(3) A programme to replace the current organic airborne early-warning capability in 2012 is in progress. Initial Gate for The Maritime Airborne Surveillance and Control (MASC) programme was passed in July 2005 with Main Gate decisions to follow in 2009. Potential solutions are likely to be based on rotary-wing platforms and UAVs. The V-22 Osprey is a further option.

(4) AgustaWestland Future Lynx selected on 27 March 2005 as preferred option to meet the requirement for the Maritime (Surface) Attack Helicopter. Entry into service is expected in 2015. Overall naval numbers are expected to be of the order of 28.

(5) Dauphin 2 helicopters with Royal Naval markings are leased by FOST for staff transfers.

(6) Proposals for a maritime version of the Chinook medium-lift helicopter were formalised in September 2004 with the launch of a three-year assessment phase.

DAUPHIN 2 9/2008*, Ian Harris / 1353541

Numbers/Type: 40 British Aerospace Harrier GR.7A/9A.
Operational speed: 575 kt (1,065 km/h).
Service ceiling: 45,000 ft (13,716 m).
Range: 594 n miles (1,101 km).
Role/Weapon systems: RAF all weather single-seat close support, battlefield interdiction night attack and reconnaissance aircraft, first operated from HMS *Illustrious* in 1994. All GR.7A (with upgraded engines) are being upgraded to GR.9A standard by late 2009. Sensors: FLIR, TIALD, Joint Recce pod, SNIPER Advanced Targeting Pod, ESM, ECM, chaff dispensers and BOL IR. Weapons: AAM; 2 or 4 AIM-9L Sidewinder ASRAAM CRV7. Ground attack: 'iron' bombs, Paveway II LGB, Paveway III LGB, Paveway IV Precision guided bomb, Maverick IR and TV, Brimstone advanced anti-armour weapon system.

HARRIER GR. 7A 6/2004, Royal Navy / 1043610

Numbers/Type: 42 Westland/Agusta Merlin HM Mk 1
Operational speed: 150 kt (277 km/h)
Service ceiling: 10,000 ft (3,048 m).
Range: 550 n miles (1,019 km).
Role/Weapon systems: Primary anti-submarine role with secondary anti-surface and troop-carrying capabilities. Contract for 44 signed 9 October 1991. In service with 814, 820, 824 and 829 Squadrons. A contract for a Capability Sustainment Programme (CSP) was awarded to Lockheed Martin UK on 21 December 2005. There are to be 30 (with an option for a further eight) aircraft upgraded from 2010 with the first modernised aircraft to enter service in 2013. CSP features include: upgrades to the sonar, radar, aircraft and tactical management systems and other key avionics systems. Sensors: GEC-Merconi Blue Kestrel 5000 radar, Thales Flash AQS 950 dipping sonar, GEC-Merconi sonobuoy acoustic processor AQS-903A, Thales Orange Reaper ESM, ECM, Link 11. Weapons: ASW; four Stingray torpedoes or Mk 11 Mod 3 depth bombs. ASV; DTHT for ship-launched SSM.

MERLIN HM MK 1 1/2008*, Shaun Jones / 1305161

Numbers/Type: 22/6 Westland/Agusta Merlin HC Mk 3/Merlin HC Mk 3A.
Operational speed: 150 kt (277 km/h).
Service ceiling: 13,125 ft (4,000 m).
Range: 550 n miles (1,019 km).
Role/Weapon systems: Operated by RAF Roles include cargo and troop transport and combat SAR. Military lift is 24 troops and up to four tonnes underslung. Sensors: integrated defensive aids including Raytheon laser detection, BAE Systems Sky Guardian 2000 RWR, Doppler-based MAWS, Northrop Grumman AN/AAQ-24 Nemesis DIRCM and BAE Systems North America AN/ALE-47 chaff/flare dispensers. Weapons: machine guns.

MERLIN Mk 3 8/2003, Paul Jackson / 05/2897

Numbers/Type: 15 Westland Sea King HU Mk 5.
Operational speed: 112 kt (207 km/h).
Service ceiling: 10,000 ft (3,050 m).
Range: 400 n miles (740 km).
Role/Weapon systems: Sea King HU Mk 5 is primary SAR platform and utilises night vision goggles for overland and overseas operations. Sensors: Sea Searcher radar, Orange Crop ESM (Mk 6 only). Weapons: The Mk 5 can be fitted with 7.62 mm MGs.

SEA KING HU MK 5 8/2007, B Sullivan / 1305160

Numbers/Type: 34/34 Westland Lynx HAS 3/Lynx HMA 8.
Operational speed: 120 kt (222 km/h).
Service ceiling: 10,000 ft (3,048 m).
Range: 320 n miles (593 km).
Role/Weapon systems: Primary role anti-surface warfare with capability to carry a variety of weapons. Embarked in a number of RN and RFA ships. All HMA Mk 8 variants to be upgraded with Saturn-capable radios by mid-2010. Sensors: Ferranti Sea Spray Radar, Orange Crop ESM, Sea Owl PID (Mk 8 only), Missile Approach Warner (Mk 8 only), IR Jemmer (Mk 8 only) and flare dispenser (Mk 8 only). Weapons: Up to four Sea Skua missiles, two Stingray torpedoes, Mk 11 depth charge, M3M 0.5 in Cl. Cabin mounted Heavy Machine Gun

LYNX HMA 8 7/2008*, B Sullivan / 1353540

LYNX HAS 3 4/2007, Maritime Photographic / 1305159

Numbers/Type: 13 Westland Sea King ASAC Mk 7.
Operational speed: 90 kt (167 km/h).
Service ceiling: 10,000 ft (3,050 m).
Range: 400 n miles (740 km).

Role/Weapon systems: Primary role Airborne Surveillance and Control (ASaC) for maritime strike, littoral manoeuvre and force protection operations. Conversion contract awarded in October 1996 to upgrade AEW Mk 2 Fleet to ASAC Mk 7. Programme completed mid-2004. Two aircraft lost in Iraq conflict have been replaced by conversion of two ex-Mk 6 aircraft. Sensors: Thales Searchwater 2000, Racal MIR-2 'Orange Crop' ESM, IFF Mk XII, Litton 100 g navigation system and JTIDS/Link 16. Weapons: None.

SEA KING ASAC MK 7 7/2008*, B Sullivan / 1353539

Numbers/Type: 37 Westland Sea King HC Mk 4.
Operational speed: 112 kt (208 km/h).
Service ceiling: 10,000 ft (3,050 m).
Range: 664 n miles (1,230 km).

Role/Weapon systems: Commando support helicopters capable of carrying most Commando Force equipment either internally or underslung. Current out of service date 2012. A Mk 4 Life Extension Programme, due for approval in 2009, would extend this date to 2018. Engines have been upgraded since 2003 to improve hot weather performance. In addition to Mk 4 aircraft, six HAS 6 ASW aircraft were converted to Mk 6C Commando configuration to provide temporary backfill during the HUMS modification programme. Sensors: AAR-47 ESM; IR jammer, chaff and IR flares ECM. Weapons: Can fit 7.62 mm GPMG or similar.

SEA KING HC MK 4 8/2004, B Sullivan / 1043561

Numbers/Type: 67 Westland/Boeing WAH-64D AH Mk 1.
Operational speed: 150 kt (278 km/h).
Service ceiling: 21,000 ft (6,400 m).
Range: 260 n miles (480 km).

Role/Weapon systems: Agusta Westland selected on 13 July 1995 to build UK AH Mk 1 based on AH-64D Longbow Boeing Apache. All-weather attack helicopter with day and night capability. One squadron of 6 earmarked for amphibious operations. Operable from surface ships (CVS/LPH/LPD/LSL). Initial operational capability achieved in late 2005. Sensors: Lockheed Martin/Northrop Grumman AN/APG-78 Longbow radar, Lockheed Martin Target Acquisition and Designation Sight (TV and direct view) and Pilot's Night Vision FLIR sensor (TADS/PNVIS) (being upgraded to M-TADS/MPNVIS 2008-10), Selex SAS HIDAS helicopter integrated defensive aids system, including Sky Guardian 2000 RWR Type 1223 Laser warning receiver, Thales (Vinten) Vicon 78 Srs 455 chaff/flare dispenser, BAE Systems AN/AAR-57(V) common missile warning system (CMWS) and Lockheed Martin AN/APR-48A radar frequency interferometer. Weapons: 16 Hellfire missiles or 78 CRV-7 70 mm rockets. 1—30 mm chain gun.

APACHE AH MK 1 3/2004, Royal Navy / 1153998

Numbers/Type: 6 Westland Lynx AH Mk 7.
Operational speed: 140 kt (259 km/h).
Service ceiling: 10,600 ft (3,230 m).
Range: 340 n miles (630 km).

Role/Weapon systems: Military general purpose with 847 Squadron. Weapons: Heavy and light machine guns.

LYNX AH MK 7 7/2005, Maritime Photographic / 1153995

Numbers/Type: 34/8/8 Boeing Chinook HC Mk 2/Chinook HC Mk 2A/Chinook HC Mk 3.
Operational speed: 140 kt (259 km/h).
Service ceiling: 10,140 ft (3,090 m).
Range: 651 n miles (1,207 km).

Role/Weapon systems: All-weather heavy-lift helicopter equivalent to CH-47D and operated by RAF. Operable from surface ships (CVS/LPH/LPD/LSL). Mk 2/2A capable of carrying 44 fully equipped troops or 54 light fighting order troops and up to 10 tonnes cargo. The Mk 3 was to be a Special Forces version but is now to enter service in 2009 in a support helicopter role. Sensors: defensive aids suite including missile approach warning, IR jammers and chaff/flare dispensers. Weapons: machine guns.

CHINOOK 6/2004, Royal Navy / 1043609

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Notes: Training and Liaison aircraft not listed include four Jetstream, Falcon 20 (under contract) and 16 Hawk (FRADU)

FALCON 20 6/2005, Paul Jackson / 1153997

Numbers/Type: 15 Hawker Siddeley Nimrod MR 2P/4.
Operational speed: 400 kt (741 km/h).
Service ceiling: 42,000 ft (12,800 m).
Range: 5,000 n miles (9,265 km).

Role/Weapon systems: Maritime patrol aircraft with focus on ASW, ASUW and SAR; Nimrod can also support OTH and C²I at long range from shore bases. Following years of development and the first flight of MR 4 prototype in 2004, the contract for production of 9 MR 4 (with option to complete three development aircraft to production standard) was awarded to BAE Systems on 18 July 2006. To enter service from 2010. MR 4 equipment includes Thales Searchwater 2000MR radar, Elta EL-8300 ESM, Ultra/GDC AQS 970 acoustics, CAE MAD, Ultra Sonobuoys and Northrop-Grumman Night Hunter EO turret. MR 2 equipment comprises Thales Searchwater radar, ECM, Yellowgate ESM, cameras, CAE MAD, Ultra sonobuoys, Ultra/GDC AQS 971 acoustics suite, WESCAM EO system, cameras, MR 2 weapons, ASW; 6.1 tons of Stingray torpedoes. Self-defence, four AIM-9L Sidewinder. MR 4 has additional wing hard-points and Mil-Std wiring to carry greater range of external stores.

NIMROD MR 2 6/2005, Michael Winter / 1153949

NIMROD MRA 4 8/2004, BAE Systems / 0577851

Numbers/Type: 7 Boeing E-3D Sentry AEW Mk 1
Operational speed: 460 kt (853 km/h)
Service ceiling: 36,000 ft (10,973 m)
Range: 870 n miles (1,610 km)

Role/Weapon systems: Airborne warning and control system aircraft with secondary role to provide coastal AEW for the Fleet; 6 hours endurance at the range given above.
Sensors: Westinghouse APY-2 surveillance radar, Bendix weather radar, Mk XII IFF, Yellow Gate, ESM, ECM. Weapons: Unarmed

E-3D 10/2001, *Ships of the World* / 0131206

PATROL FORCES

Notes: It is planned to replace the 16 Archer class training craft (two are based in Cyprus for patrol duties) and two Halmatic M 160 craft, based at Gibraltar, with a single class of patrol craft capable of undertaking patrol, force-protection and training roles.

1 ANTARCTIC PATROL SHIP (AGOBH)

Name	No	Builders	Commissioned
ENDURANCE (ex-Polar Circle)	A 171 (ex-A 176)	Ulstein Hatlo, Norway	21 Nov 1991

Displacement, tons: 6,500 full load
Dimensions, feet (metres): 298.6 × 57.4 × 27.9 (91 × 17.9 × 8.6)
Main machinery: 2 Bergen BRM8 diesels, 8,160 hp(m) (6 MW) sustained; 1 shaft; cp prop; bow and stern thrusters
Speed, knots: 16
Range, n miles: 6,500 at 12 kt
Complement: 112 (15 officers) plus 14 Royal Marines
Radars: Surface search: Raytheon R 84 and M 34 ARG, E/F- and I-bands
Navigation: Kelvin Hughes Type 1007; I-band
IFF-Type: 1011
Helicopters: 2 Westland Lynx HAS Mk 3.

Comment: Leased initially in late 1991 and then bought outright in early 1992 as support ship and guard vessel for the British Antarctic Survey. Hull is painted red. Inmarsat fitted. Main machinery is resiliently mounted. Ice-strengthened hull capable of breaking 1 m thick ice at 3 kt. Helicopter hangar is reached by lift from the flight deck. Equipped with Simrad EM 710 multibeam echo-sounder, Simrad EA 600 single-beam echo-sounder and Furuno CH 250 forward looking echo-sounder. Carries two Survey Motor Boats (*James Caird* and *Nimrod*). Based at Portsmouth.

ENDURANCE 11/2007, *Ian Harris* / 117077

2 SCIMITAR CLASS (PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
SCIMITAR (ex-Gray Fox) P 284	SABRE (ex-Gray Wolf) P 285	Vosper Thornycroft, Woolston	4 July 2003
SEVERN P 282		Vosper Thornycroft, Woolston	31 July 2003
MERSEY P 283		Vosper Thornycroft, Woolston	26 Mar 2004

Displacement, tons: 26 full load
Dimensions, feet (metres): 52.5 × 14.43 × 3.9 (16 × 4.4 × 1.2)
Main machinery: 2 MAN V10 diesels; 740 hp (603 kW); 2 shafts
Speed, knots: 32 **Range, n miles:** 260 at 19 kt
Complement: 5
Guns: 2 – 7.62 mm MGs.
Radars: Racal Decca Bridgemaster 360; I-band

Comment: Halmatic M160 craft operated in Northern Ireland from 1988 but transferred to Gibraltar in September 2002 to augment the Gibraltar squadron. Both vessels renamed and commissioned on 31 January 2003. After mid life refit and design modifications, the vessels replaced *Trumpeter* and *Ranger* as Gibraltar guard ships in 2004.

SABRE 2/2008, *Maritime Photographic* / 1353538

RANGER P 293		Vosper Thornycroft, Woolston	26 Mar 2004
TRUMPETER P 294		Vosper Thornycroft, Woolston	26 Mar 2004

Displacement, tons: 54 full load
Dimensions, feet (metres): 68.2 × 19 × 5.9 (20.8 × 5.8 × 1.8)
Main machinery: 2 RR CV 12 M800T diesels; 1,590 hp (1.19 MW); or 2 MTU diesels; 2,000 hp(m) (1.47 MW) (P 274-275); 2 shafts
Speed, knots: 22 or 25 (P 274-275)
Range, n miles: 550 at 15 kt
Complement: 5 (1 officer) plus 12 trainees
Guns: 2 – 7.62 mm MGs.
Radars: Navigation: Racal Decca 1216, I-band.

Comment: First 14 ordered from Watercraft Ltd, Shoreham. Commissioning dates: *Archer*, August 1985; *Example*, September 1985; *Explorer*, January 1986; *Biter* and *Smiter*, February 1986. The remaining nine were incomplete when Watercraft went into liquidation in 1986 and were towed to Portsmouth for completion in 1988 by Vosper Thornycroft. Initially allocated for RNR training but underused in that role and now employed as part of First Patrol Boat Squadron as training vessels for the University Royal Naval Units (URNU). *Ranger* (Sussex), *Trumpeter* (Bristol), *Puncher* (London), *Blazer* (Southampton), *Smiter* (Glasgow), *Charger* (Liverpool), *Archer* (Aberdeen), *Biter* (Manchester and Salford), *Exploit* (Birmingham), *Express* (Wales), *Example* (Northumbria) and *Explorer* (Yorkshire) Two more ordered from BMT in early 1997 to a modified design and built at Ailsa, Troon. *Tracker* and *Raider* commissioned January 1998 for Oxford and Cambridge University respectively. *Dasher* and *Pursuer* are based at Cyprus.

RANGER 5/2008, *Maritime Photographic* / 1353523

EXAMPLE 6/2008, *J Marechal* / 1353522

3 RIVER CLASS (OFFSHORE PATROL VESSELS) (PSO)

Name	No	Builders	Commissioned
TYNE P 281		Vosper Thornycroft, Woolston	4 July 2003
SEVERN P 282		Vosper Thornycroft, Woolston	31 July 2003
MERSEY P 283		Vosper Thornycroft, Woolston	26 Mar 2004

Displacement, tons: 1,700 full load
Dimensions, feet (metres): 261.7 × 44.6 × 12.5 (79.75 × 13.6 × 3.8)
Main machinery: 2 MAN 12RK 270 diesels; 11,063 hp (8.25 MW); 2 shafts; bow thruster, 375 hp (280 kW)
Speed, knots: 20
Range, n miles: 5,500 at 15 kt
Complement: 30 (plus 18 boarding party)
Guns: 1 – 20 mm Oerlikon/BMARC. 2 – 7.62 mm MGs.
Radars: Surface search: Kelvin Hughes Nucleus; E/F-band.
Navigation: Kelvin Hughes Nucleus; I-band.
Helicopters: Vertrep only.

Programmes: In the first agreement of its kind, Vosper Thornycroft contracted on 8 May 2001 for the construction, lease and support of three vessels over initial five-year period to replace five ships of island class. The lease was extended by a further five years in December 2006.

Structure: Based on Vosper Thornycroft EEZ Management Vessel concept design. The ships are capable of operating two RIBs. Fitted with a 3 tonne crane.
Operational: Part of Fishery Protection Squadron based at Portsmouth.

MERSEY 2/2008, *Maritime Photographic* / 1353537

1 MODIFIED RIVER CLASS (OFFSHORE PATROL VESSEL) (PSOH)

Name	No	Builders	Launched	Commissioned
CLYDE	P 257	VT Shipbuilding, Portsmouth	12 June 2006	30 Jan 2007

Displacement, tons: 1,847 full load
Dimensions, feet (metres): 267.4 × 44.6 × 12.5 (81.5 × 13.6 × 3.8)
Main machinery: 2 MAN 12RK diesels; 11,063 hp (8.25 MW); 2 shafts; bow thruster; 375 hp (280 kW); stern thruster; 248 hp (185 kW)
Speed, knots: 20
Range, n miles: 7,800 at 12 kt
Complement: 38 (plus 18 boarding party). Accommodation for 59
Guns: 1 DES/MSI DS 30B 30 mm; 650 rds/min to 10 km (5.4 n miles); weight of shell 0.36 kg
 2 M323 Mk 44 7.62 mm Miniguns.
 4—12.7 mm MGs.
Combat data systems: BAE Insyte CMS-1.
Radars: Surface search and navigation Terma Scantec 4100; E/F/I-bands.
Helicopters: Platform for one Merlin-sized

Comment: Contract let with VT Shipbuilding on the 28 February 2005 to build a modified River class to undertake Falkland Islands patrol duties. The ship is leased to the MoD with a Contractor Logistic Support (CLS) arrangement until 2012. The ship has been built to commercial standards with some military features. Following acceptance in January 2007, the ship assumed its role as Falkland Islands Guardship on 20 September 2007.

CLYDE

9/2007, Mario R V Carneiro / 1353502

AMPHIBIOUS FORCES

Notes: (1) Further amphibious ships and craft covered in Auxiliaries and Army sections. These include a Helicopter Support Ship, four LSD, and six LCLs.
 (2) QinetiQ awarded a contract in November 2006 to design, build, test and evaluate the Partial Air Cushion Supported Catamaran (PACSCAT) for littoral manoeuvre operations. The craft is a contender to fulfil the requirement for a Fast Landing Craft to enter service from about 2014. Such a craft, interoperable with amphibious ships, would be capable of carrying a payload of 55 tonnes at 25 kt. A class of up to six vessels is required

1 HELICOPTER CARRIER (LPH)

Name	No	Builders	Laid down	Launched	Commissioned
OCEAN	L 12	Vickers Shipbuilding/Kvaerner Govan	30 May 1994	11 Oct 1995	30 Sep 1998

Displacement, tons: 21,758 full load
Dimensions, feet (metres): 667.3 oa; 652.2 pp × 112.9 × 21.3 (203.4; 198.8 × 34.4 × 6.6)
Flight deck, feet (metres): 557.7 × 104 (170 × 31.7)
Main machinery: 2 Crossley Pielstick 12 PC2.6 V 400 diesels, 18,360 hp(m) (13.5 MW) sustained; 2 shafts; Kamewa fp props; bow thruster; 612 hp (450 kW)
Speed, knots: 19
Range, n miles: 8,000 at 15 kt
Complement: 285 plus 206 aircrew plus up to 830 Marines
Military lift: 4 LCVP Mk 5 (on davits); 2 Griffon hovercraft; 40 vehicles and equipment for most of a marine commando unit

Guns: 8 BMARC 20 mm GAM-B03 (4 twin) ①, 650 rds/min to 10 km (5.4 n miles); anti-surface; 3 km (1.6 n miles) anti-aircraft; weight of shell 0.36 kg.
 3 General Dynamics 20 mm Phalanx Mk 15 ②, 6 barrels per launcher; 4,500 rds/min combined to 1.5 km. 4 M323 Mk 44 7.62 mm Miniguns. 4—7.62 mm MGs.
Countermeasures: Decoys: Outfit DLH; 8 Sea Gnat 130 mm/102 mm launchers ③
ESM: Recal UAT Mod 1; intercept.
Torpedo defence: Type 2170 (SLQ-25A).
Combat data systems: Ferranti ADAWS 20 Ed 3.1; Link 11, Link 16, Marconi Matra SCOT 5 SATCOM ④ BOWMAN.
Radars: Air/surface search: AMSType 996 ⑤, E/F-band.
 Surface search: Recal Decca 1008 ⑥, E/F-band.
 Surface search/aircraft control: 2 Kelvin Hughes Type 1007 ⑦, I-band.
IFF: Type 1016/1017.

Helicopters: 12 Sea King HC.Mk 4/Merlin plus 6 Lynx (or WAH-64 Apache by 2005).

Programmes: Initial invitations to tender were issued in 1987. Tenders submitted in July 1989 were allowed to lapse and it was not until 11 May 1993 that a contract was placed. The hull was built on the Clyde by Kvaerner Govan and sailed under its own power to Vickers at Barrow in November 1996 for the installation of military equipment.

Modernisation: Command and control facilities upgraded in 2002 to facilitate UKMCC role. Attack helicopter infrastructure fitted 2004–05. The davits had been replaced by 2007 and BOWMAN installed to support amphibious warfare staffs. Replacement of the combat data system is expected in 2015 and MIDAS EW system in due course. BAE Insyte ARTISAN radar is to replace 996 radar. Further improvements to attack helicopter facilities, troop accommodation and storage areas made in refit 2007–08. Larger sponsons for Phalanx also installed. Phalanx 1B to be fitted in due course.

Structure: The hull form is based on the Invincible class with a modified superstructure. The deck is strong enough to take Chinook helicopters. Six landing and six parking spots for the aircraft. Accommodation for 972 plus 303 bunk overload. A garage is situated at the after end of the hangar. This is accessible from the after aircraft lift and via ramps through the ship's stern. Hull 'blisters' were fitted at waterline level port and starboard during 2002 to improve deployment and recovery of LCVPs

Operational: The LPH provides a helicopter lift and assault capability. The prime role of the vessel is embarking, supporting and operating a squadron of helicopters and carrying a Royal Marine Commando including vehicles, arms and ammunition. Up to 20 Sea Harriers can be carried but not supported. Operational sea trials started in June 1998 and completed in February 1999. Twin 20 mm guns are not always carried and may be replaced by single 20 mm. Based at Devonport.

Dimensions, feet (metres): 577.4 × 94.8 × 23.3
(176 × 28.9 × 7.1)

Main machinery: Diesel-electric; 2 Wärtsilä Vasa 16V 32E diesel generators; 17,000 hp (m) (12.5 MW); 2 Wärtsilä Vasa 4R 32LNE diesel generators; 4,216 hp (m) (3.1 MW); 2 motors; 2 shafts; LIPS props; 1 bow thruster; 1,176 hp (m) (865 kW)

Speed, knots: 18

Range, n miles: 8,000 at 15 kt

Complement: 325

Military lift: 305 troops; 710 troops (including overload); 67 support vehicles; 4 LCU Mk 10 or 2 LCAC (dock); 4 LCVF Mk 5 (davits)

Guns: 2—20 mm ● 2 Signaal/General Dynamics 30 mm 7-barrelled Goalkeeper; 4,200 rds/min to 1.5 km ● 4 M323 Mk 44 7.62 mm Miniguns. 4—7.62 mm MGs.

Countermeasures: Decoys: Outfit DLJ; 8 Sea Gnat launchers ● and DLH offboard decoys.

ESM/ECM: Racal Thorn UAT 1/4

Torpedo defence: Type 2170 (SLO-25A).

Combat data systems: ADAWS 20 Ed 3.1 Thomson-CSF/Redifon/BAeSEMA/CS comms system. Marconi Matra SCOT 5 SATCOM ● BOWMAN.

Weapons control: 2 Ultra UECCS EOSS optronic directors (L 15).

Radars: Air/surface search: Siemens Plessey Type 996 ●; E/F-band.

Surface search: Racal Decca 1008, E/F-band.

Navigation/aircraft control: 2 Racal Marine Type 1007 ●; I-band

IFF: Type 1016/1017

Helicopters: Platform for 3 Sea King Mk 4 ●. Chinook capable.

Programmes: A decision was taken in mid-1991 to replace the then existing LPDs. Project definition studies by YARD completed in February 1994. Invitations to tender for design and build of two ships were issued to VSEL

ALBION

(Scale 1 : 1,500), Ian Sturton / 0572733

ALBION

6/2007, Michael Nitz / 11/0773

and Yarrow on 18 August 1994 with an additional tender package to Vosper Thornycroft in November 1994. In March 1995 it was announced that only VSEL would bid, conforming to the rules governing non-competitive tenders. The contract to build the ships was awarded on 18 July 1996. First steel cut 17 November 1997

Modernisation: Davits have been replaced in both ships. BOWMAN installed to support amphibious warfare staffs. Replacement of the combat data system is expected in

2015 and MIDAS EW System in due course. BAE Insite ARTISAN radar is to replace 996 radar.

Structure: The design includes a floodable well deck, garage (with capacity for six Challenger tanks), stern gate and side ramp access. The Flight Deck has two helicopter landing spots. A large joint operations room contains substantial command and control facilities. The ships are built to military damage control standards.

Operational: Based at Devonport.

BULWARK

3/2008, Michael Nitz / 1353535

BULWARK

10/2007, John Brodie / 1305231

10 LCU MK 10

L 1001-1010

Displacement, tons: 170 light; 240 full load
Dimensions, feet (metres): 97.8 × 24.3 × 5.6 (29.8 × 7.4 × 1.7)
Main machinery: 2 MAN diesels; 2 Schottel propulsors; bow thruster
Speed, knots: 10. **Range, n miles:** 600 at 12 kt
Complement: 7
Military lift: 1 MBT or 4 vehicles or 120 troops
Radars: Navigation: I-band.

Comment: Ordered in 1998 from Ailsa Troon Yard. First pair delivered in November 1999 and, following extensive trials, modifications made to ballast tanks to improve beach landing capabilities. This work came out by BAE Systems Marine, Govan, from whom a further eight craft were ordered for delivery by mid-2003. Fitted with interlocking bow and stern ramps, they operate from the Albion class LPDs.

LCU MK 10

6/2008*, Michael Nitz / 1353534

3 LCU MK 9S

L 705 L 709 L 711

Displacement, tons: 115 light; 175 full load
Dimensions, feet (metres): 90.2 × 21.5 × 5 (27.6 × 6.8 × 1.6)
Main machinery: 2 Paxman or Dorman diesels, 474 hp (354 kW) sustained; Kort nozzles or Schottel propulsors
Speed, knots: 10. **Range, n miles:** 300 at 9 kt
Complement: 7
Military lift: 1 MBT or 60 tons of vehicles/stores or 90 troops
Radars: Navigation: Raytheon; I-band.

Comment: Last remaining craft of class of 14. Built in the mid-1960s and originally designated Mk 9M. Upgraded with Schottel propulsors in the 1990s and redesignated Mk 9S.

LCU Mk 9

3/2003, A Sharma / 05/26/1

4 GRIFFON 2000TDX(M) (LCAC(L))

C 21-24

Displacement, tons: 6.8 full load
Dimensions, feet (metres): 36.1 × 15.1 (11 × 4.6)
Main machinery: 1 Deutz BF8L513 diesel; 320 hp (239 kW) sustained
Speed, knots: 33. **Range, n miles:** 300 at 25 kt
Complement: 2
Military lift: 16 troops plus equipment or 2 tons
Guns: 1—7.62 mm MG.
Radars: Navigation: Raytheon; I-band.

Comment: Ordered 26 April 1993. Design based on 2000TDX(M) hovercraft. Aluminium hulls. Speed indicated is at Sea State 3 with a full load.

C 23

6/2005, Maritime Photographic / 1153990

11 LCVP MK 4

8401-8402

8407

8409

8411-8413

8619-8622

Displacement, tons: 10.5 light; 16 full load
Dimensions, feet (metres): 43.8 × 10.9 × 2.8 (13.4 × 3.3 × 0.8)
Main machinery: 2 Perkins T6.3544 diesels; 290 hp (216 kW); 2 shafts
Speed, knots: 15
Range, n miles: 150 at 14 kt
Complement: 3
Military lift: 20 Arctic equipped troops or 5.5 tons

Comment: Built by Souters and McTays. Introduced into service in 1986. Fitted with removable arctic canopies across well-deck. Some Royal Marines' craft replaced by LCVP Mk 5. Six craft operated by Royal Logistics Corps. These serve in rotation between the Falklands and UK.

LCVP MK 4

7/2008*, A A de Kruijf / 1353537

23 LCVP MK 5

LCVP 9473

9673-9692

9707-9708

Displacement, tons: 25 full load
Dimensions, feet (metres): 50.9 × 13.8 × 3 (15.5 × 4.2 × 0.9)
Main machinery: 2 Volvo Penta TAMD 72 WJ diesels; 2 PP 170 water-jets
Speed, knots: 25
Range, n miles: 210 at 18 kt
Complement: 3
Military lift: 35 troops plus 2 tons equipment or 8 tons vehicles and stores
Radars: Navigation: Raytheon 40; I-band.

Comment: Contract placed with Vosper Thornycroft on 31 January 1995 for one craft which was handed over on 17 January 1996. Four more ordered on 23 October 1996 for Ocean were delivered 6 December 1997; and two more for RM Poole in October 1998. Sixteen more ordered from FBM Babcock Marine in August 2001. Can beach fully laden on a 1 : 120 gradient. Speed 18 kt at full load.

LCVP MK 5

10/2008*, Maritime Photographic / 1353533

FAST INTERCEPT CRAFT (HSIC)

Comment: A new class of up to four 18 m high-speed insertion craft, reported to have been built by VT Halmatic, began to enter service in 2006. They are to replace the 16 m Very Slender Vessel craft which have been in service since the 1990s and also the two 15 m FB design FB 50 which entered service in 1996. The new craft feature a stepped planing hull and are powered by two MAN diesels driving twin Arneson drives. Top speed is likely to be in the region of 60 kt. Capable of operating in extreme climatic conditions, they are transportable by C 130.

FAST INTERCEPT CRAFT

7/2008*, A A de Kruijf / 1353531

RRC AND RIB

Comment: (1) 36 RRC Mk 3: 2.6 tons and 7.4 m (24.2 ft) powered by single Yamaha 220 hp (162 kW) diesel; 36 kt fully laden (40 light); carry 8 troops. Some used by the Army. In service 1996-98
 (2) RIBs: Halmatic Arctic 22/Pacific 22/Arctic 28/Pacific 28. Rolling contract for all four types. Capable of carrying 10 to 15 fully laden troops at speeds of 26 to 35 kt.
 (3) Offshore Raiding Craft: 9 m aluminium RIB hull with removable armour plating. Diesel powered and capable of up to 40 kt. Up to 46 craft to replace the RRC Mk 3.

ORC 7/2008*, A A de Kruif / 1353530

RRC 4/2005, Per Körnefeldt / 1153943

MINE WARFARE FORCES

Notes: (1) The long-term future of the current mine-countermeasures (MCM) force is under consideration. The future capability is likely to be based on the requirement to conduct MCM in support of joint expeditionary operations in littoral waters. Speed of deployment is an important consideration. Future capability is likely to be delivered by a combination of:

- (a) a portable, modular, self-contained system that could be delivered rapidly into theatre
 - (b) an organic mine reconnaissance capability, deployed from future classes of surface combatants
 - (c) a dedicated capability involving unmanned underwater vehicles deployed from auxiliary surface craft
- (2) Replacement of the Combined Influence Sweep (CIS), removed from the Hunt class, is under consideration. Plans

to replace CIS with a new Remote Influence Minesweeping System (RIMS) were cancelled in 2002. The Shallow Water Influence Minesweeping System (SWIMS), brought into service during operations in Iraq during 2003, has not been maintained. Future options under examination include an influence sweep system deployable from an Unmanned Surface Vehicle (USV). A two-year technology readiness programme, known as FAST, was initiated in 2007
 (3) The Remote Control Mine Disposal Systems Mk 1 (PAP Mk 3) and 2 (PAP Mk 5) are to be replaced by the Atlas Elektronik Seafox C expendable mine destructor. Stowage for 24 warshots and four surveillance vehicles is to be provided on each MCM platform.
 (4) Mine reconnaissance in very shallow waters (less than 30 m) is to be met by the Hydroid Remus 100 Unmanned

Underwater Vehicle (UUV). GPS-enabled, it is equipped with a high-frequency (900/1,800 kHz) side-scan sonar. Ten systems entered service in 2006
 (5) Mine reconnaissance in waters of 30-200 m is to be undertaken by the Hydroid Remus 600 UUV. Two vehicles are to be delivered by 2009. The vehicles are also capable of undertaking hydrographic survey and environmental monitoring. Secondary roles include support of search and salvage operations.
 (6) The capability to conduct Rapid Environmental Assessment (REA) using a UUV in water depths up to 200 m is under investigation. This may be filled by commercially available vehicles. Introduction into service is planned during 2009.

8 HUNT CLASS (MINESWEEPERS/MINEHUNTERS—COASTAL) (MHSC/PP)

Name	No	Builders	Launched	Commissioned
LEDBURY	M 30	Vosper Thornycroft, Woolston	5 Dec 1979	11 June 1981
CATTISTOCK	M 31	Vosper Thornycroft, Woolston	22 Jan 1981	16 June 1982
BROCKLESBY	M 33	Vosper Thornycroft, Woolston	12 Jan 1982	3 Feb 1983
MIDDLETON	M 34	Yarrow Shipbuilders, Glasgow	27 Apr 1983	16 Aug 1984
CHIDDINGFOLD	M 37	Vosper Thornycroft, Woolston	6 Oct 1983	10 Aug 1984
ATHERSTONE	M 38	Vosper Thornycroft, Woolston	1 Mar 1986	30 Jan 1987
HURWORTH	M 39	Vosper Thornycroft, Woolston	25 Sep 1984	2 July 1986
QUORN	M 41	Vosper Thornycroft, Woolston	23 Jan 1988	21 Apr 1989

Displacement, tons: 633 light; 740 full load
Dimensions, feet (metres): 187 wl; 197 oa x 32.8 x 9.5 (koel), 11.2 (screws)
 (57, 60 x 10 x 2.9; 3.4)

Main machinery: 2 Ruston-Paxman 9-59K Deltic diesels; 1,900 hp (1,422 MW); 1 Deltic Type 9-55B diesel for pulse generator and auxiliary drive; 780 hp (582 kW); 2 shafts; bow thruster

Speed, knots: 15 diesels; 8 hydraulic drive
Range, n miles: 1,500 at 12 kt
Complement: 45 (5 officers)

Guns: 1 DES/MSI DS 30B 30 mm/75; 650 rds/min to 10 km (5.4 n miles) anti-surface; 3 km (1.6 n miles) anti-aircraft; weight of shell 0.36 kg
 Dillon Aero M 134 7.62 mm Minigun, 6 barrels, 3,000 rds/min

Countermeasures: MCM: 2 PAP 104 Mk 3/105 (RCMDS 1) remotely controlled submersibles, (being replaced by Seafox C expendable mine-disposal system).

Combat data systems: BAE Insyte Nautis 3.

Radars: Navigation: Kelvin Hughes Type 1007; I-band.
Sonars: Thales 2193; hull-mounted, minehunting, 100/300 kHz. Hull-mounted; active; high frequency.

Programmes: A class of MCM Vessels combining both hunting and sweeping (at 30 days notice) capabilities.

Modernisation: RCMDS is being replaced by Seafox C. 30 mm gun has replaced the Bofors 40 mm. Drungrange Precise Fixing System fitted 2003-04. A new minehunting sonar (Sonar 2193) and NAUTIS III command system have been fitted in all eight ships 2004-05.

MIDDLETON 4/2008*, B Sullivan / 1353529

M 134 Minigun CIWS fitted in 2007. The influence sweeping system has been removed and is at 30 days notice

Structure: GRP hull. Combines conventional propellers with bow thrusters. Fitted with an improved two-man decompression chamber by 2005.

Operational: For operational deployments fitted with enhanced weapons systems. *Brecon*, *Cottesmore* and *Dulvertan* were decommissioned in 2005. All eight ships based at Portsmouth.
Sales: *Bicester* and *Berkeley* to Greece in July 2000 and February 2001 respectively.

HURWORTH 5/2008*, Michael Nitz / 1353528

CHIDDINGFORD 2/2008*, Maritime Photographic / 1353527

8 SANDOWN CLASS (MINEHUNTERS) (MHC/SRMH)

Name	No	Builders	Launched	Commissioned

PENZANCE	M 106	Vosper Thornycroft, Woolston	11 Mar 1997	14 May 1998
PEMBROKE	M 107	Vosper Thornycroft, Woolston	15 Dec 1997	6 Oct 1998
GRIMSBY	M 108	Vosper Thornycroft, Woolston	10 Aug 1998	25 Sep 1999
BANGOR	M 109	Vosper Thornycroft, Woolston	16 Apr 1999	26 July 2000
RAMSEY	M 110	Vosper Thornycroft, Woolston	25 Nov 1999	22 June 2001
BLYTH	M 111	Vosper Thornycroft, Woolston	4 July 2000	20 July 2001
SHOREHAM	M 112	Vosper Thornycroft, Woolston	9 Apr 2001	2 Sep 2002

Displacement, tons: 537 standard; 409 full load
 Dimensions, feet (metres): 172.2 x 34.4 x 7.5 (52.5 x 10.5 x 2.3)
 Main machinery: 2 Paxman Valenta 6RP200E/M diesels; 1,523 hp (1.14 MW) sustained;
 Voith-Schneider propulsion; 2 Schottel bow thrusters
 Speed, knots: 13 diesels; 6.5 electric drive Range, n miles: 2,500 at 12 kt
 Complement: 34 (5 officers) plus 6 spare berths

Guns: 1 DES/MSI DS 308 30 mm/75; 650 rds/min to 10 km (5.4 n miles) anti-surface; 3 km (1.6 n miles) anti-aircraft; weight of shell 0.36 kg
 Dillon Aero M 134 7.62 mm Minigun; 6 barrels; 3,000 rds/min.

Countermeasures: MCM: ECA mine disposal system, 2 PAP 104 Mk 5 (RCMDS 2) (being replaced by Seafox C) These craft can carry 2 mine wire cutters, a charge of 100 kg and a manipulator with TV/projector. Control cables are 2,000 m. To be replaced by Seafox C expendable mine-disposal system.

Combat data systems: BAE Insite Nautis 3.

Radars: Navigation: Kelvin Hughes Type 1007; I-band.

Sonars: Marconi Type 2093; VDS, VLF-VHF multifunction with 5 arrays; mine search and classification.

Programmes: A class designed for hunting and destroying mines and for operating in deep and exposed waters. Single role minehunter (SRMH) complements the Hunt class. On 9 January 1984 the Vosper Thornycroft design for this class was approved. First one ordered August 1985, four more on 23 July 1987. A contract was to have been placed for a second batch in 1990 but this was deferred twice, until an order for seven more (M 105-112) was placed in July 1994

Modernisation: RCMDS 2 being replaced by Seafox C. Drumgrange Precise Fixing System fitted in 2004. Nautis M combat system replaced by Nautis 3. M 134 Minigun CIWS fitted in 2006.

Structure: GRP hull. Combines vectored thrust units with bow thrusters and Remote-Control Mine Disposal System (RCMDS) The sonar is deployed from a well in the hull. Batch 2 have larger diameter (1.8 m) Voith-Schneider props and an improved two-men decompression chamber.

Operational: All based at Faslane from mid-2006.

Sales: Three to Saudi Arabia. *Bridport, Sandown and Inverness* to Estonia 2007-08

SHOREHAM 6/2007, Maritime Photographic / 1170269

WALNEY 8/2007, B Sullivan / 1170268

SURVEY SHIPS

1 GLEANER CLASS (YGS)

Name	No	Builders	Launched	Commissioned
GLEANER	H 86	Emsworth Shipyard	18 Oct 1983	6 Dec 1983

Displacement, tons: 26 full load
 Dimensions, feet (metres): 51.2 x 15.4 x 5.2 (15.6 x 4.7 x 1.6)
 Main machinery: 2 Volvo Penta TMD 112; 524 hp(m) (391 kW); 2 shafts
 Speed, knots: 19.5
 Complement: 8 (2 officers)
 Radars: Navigation: Raymarine Pathfinder; I-band.

Comment: This craft is prefixed HMSMLHM Survey Motor Launch. Primary task is conduct of high-resolution survey operations around UK ports and harbours. Fitted with integrated survey suite with C-Nav WADGPS positioning and Simrad EM 3002 MBES, EA 400 SBES, 2094 SSS and magnetometer towed sensors.

GLEANER 6/2005, Camil Busquets i Vilanova / 1153981

1 SCOTT CLASS (AGSH)

Name	No	Builders	Launched	Commissioned
SCOTT	H 131	Appledore Shipbuilders, Bideford	13 Oct 1996	30 June 1997

Displacement, tons: 13,500 full load
 Dimensions, feet (metres): 430.1 x 70.5 x 29.5 (131.1 x 21.5 x 9)
 Main machinery: 2 Krupp MaK 9M32 9-cyl diesels; 10,800 hp(m) (794 MW); 1 shaft; LIPS cp prop; retractable bow thruster
 Speed, knots: 17.5
 Complement: 62 (12 officers) (see Comment)
 Radars: Navigation, Kelvin Hughes ARPA 1626; I-band.
 Helicopters: Platform for 1 light.

Comment: Designed by BAeSEMA/YARD and ordered 20 January 1995 to replace *Hecla*. Ice-strengthened bow. Foredeck strengthened for helicopter operations. The centre of the OSV surveying operations consists of an Integrated navigation suite, the Sonar Array Sounding System (SASS) and data processing equipment. Additional sensors include gravimeters, a towed proton magnetometer a Moving Vessel Profiler (MVP) 800 and the Sonar 2090 ocean environment sensor. The SASS IV multibeam depth-sounder is capable of gathering 121 individual depth samples concurrently over a 120° swathe, producing a three-dimensional image of the seabed. 8,000 tons of seawater ballast can be used to achieve a sonar trim. The ship is at sea for 300 days a year with a crew of 42 embarked, rotating with the other 20 ashore. *Scott* undertook a survey of the Indian Ocean tsunami epicentre in early 2005. Based at Devonport.

SCOTT 8/2008*, Maritime Photographic / 1353526

2 ECHO CLASS (AGSH)

Name	No	Builders	Launched	Commissioned
ECHO	H 87	Appledore, Bideford	4 Mar 2002	7 Mar 2003
ENTERPRISE	H 88	Appledore, Bideford	2 May 2002	17 Oct 2003

Displacement, tons: 3,470 full load
 Dimensions, feet (metres): 295.3 x 55.1 x 18 (90 x 16.8 x 5.5)
 Main machinery: Diesel electric, 4.8 MW; 2 azimuth thrusters; 1 bow thruster
 Speed, knots: 15
 Range, n miles: 9,000 at 12 kt
 Complement: 72
 Guns: 2—20 mm. 4—7.62 mm MGs
 Radars: Navigation: 2 sets; I-band.
 Helicopters: Platform for VERTREP only.

Comment: The order for two multirole Hydrographic and Oceanographic Survey Vessels was placed with the prime contractor, Vosper Thornycroft Ltd, on 19 June 2000. The ships were built by Appledore Shipbuilders in Devon. The contract covers the design, build and through-life support of the ships over their 25 year service. In addition to specialist surveying tasks, the ships' operational roles include Rapid Environmental Assessment, Amphibious Warfare surveys and Mine Countermeasures Tasking Support. The survey suite consists of EM 1002 hull mounted multibeam sonar, EA 600 single beam echo-sounder, towed side scan sonar, towed undulating sensors, an adaptive survey planning system. Survey Motor Launches *Pathfinder* and *Pioneer* are embarked in *Echo* and *Enterprise* respectively. Both based at Devonport.

ENTERPRISE 7/2007, Guy Toremans / 1170266

1 ROEBUCK CLASS (AGS)

Name	No	Builders	Launched	Commissioned
ROEBUCK	H 130	Brooke Marine, Lowestoft	14 Nov 1985	3 Oct 1986

Displacement, tons: 1,477 full load
Dimensions, feet (metres): 210 × 42.6 × 13 (63.9 × 13 × 4)
Main machinery: 4 Mirreles Blackstone ESL8 Mk 1 diesels; 3,040 hp (2.27 MW); 2 shafts; cp props
Speed, knots: 14
Range, n miles: 4,000 at 10 kt
Complement: 46 (6 officers)
Guns: 1—20 mm
 2 M323 Mk 44 7.62 mm Min.guns (fitted for).

Radars: Navigation: Kelvin Hughes Nucleus 2-8000; I-band.

Comment: Designed for hydrographic surveys to full modern standards on UK continental shelf. Air conditioned. Carries Survey Motor Launch *Nesbitt* (fitted with EM 3002 MBES, EA 400 SBES and 2094 SSS) and one 4.5 m RIB. The decision to decommission in 2003 was cancelled and a Ship Life Extension Programme started in September 2004 and was completed in mid-2005. The upgrade included refurbishment and renewal of engineering systems and habitability improvements. A 20 mm gun system has been installed. Roles include Rapid Environmental Assessment and Amphibious Warfare survey. The new survey suite consists of EM 1002 hull-mounted multibeam sonar, EA 800 SBES and 2094 towed side-scan sonar and adaptive planning system, Moving Vessel Profiler (MVP) 200 and WECDIS.

ROEBUCK

5/2008*, Michael Nitz / 1353525

6 NESBITT CLASS (YGS)

NESBITT 9423	COOK 9425	PIONEER
PAT BARTON 9424	OWEN 9426	PATHFINDER

Displacement, tons: 11 full load
Dimensions, feet (metres): 34.8 × 9.4 × 3.3 (10.6 × 2.9 × 1)
Main machinery: 2 Perkins Sebre 185C diesels; 430 hp(m) (316 kW) sustained; 2 shafts
Speed, knots: 15
Range, n miles: 300 at 8 kt
Complement: 2 plus 10 spare

Comment: *Nesbitt, Pat Barton, Cook and Owen* delivered by Halmatic, Southampton by September 1996. *Pioneer* and *Pathfinder* built by Halmatic and delivered in 2003 as part of the contract to build *Echo* and *Enterprise*. *Nesbitt* embarked in *Roebuck*, *Pathfinder* in *Echo*, *Pioneer* in *Enterprise* and the other three based at the Hydrographic School, Devonport. Fitted with C-Nav WADGPS positioning system, EM 3000 MBES (*Pathfinder, Pioneer, Pat Barton*), EM 3002 MBES (*Nesbitt, Cook, Owen*), EA 400 SBES and 2094 SSS.

NESBITT

11/1998, John Brodie / 0053744

RESCUE VEHICLES

0 + 1 NATO SUBMARINE RESCUE SYSTEM (DSRV)

Displacement, tons: 30 full load
Dimensions, feet (metres): 28.5 × 11.1 × 11.5 (8.7 × 3.4 × 3.5)
Main machinery: 2 external ZEBRA rechargeable sodium nickel chloride battery pods
Speed, knots: 3.8
Complement: 3

Comment: The three participant nations for NSRS are UK, Norway and France with the UK Defence Procurement Agency acting as contracting authority and host nation for project management and in-service phases. Following invitations to Tender, a 10-year contract for the design and manufacture phase was awarded in June 2004 to a team led by Rolls-Royce Naval Marine. The core of the service is a new free-swimming Submarine Rescue Vehicle (SRV), built by Perry Slingsby, capable of accommodating 15 rescued personnel from a submarine at depths down to 600 m and at an angle of up to 60°. The SRV may be launched and recovered from suitable commercial or from military 'motherships', primarily offshore support vessels, capable of fitting the NSRS Portable Launch-And-Recovery (PLARS) installation. Battery endurance allows up to five rescue cycles without recharge but trickle charging during rescue transfer will enable almost continuous operation. The NSRS includes an unmanned Intervention Remotely-Operated Vehicle (IROV), the Perry Slingsby Super Spartan, which can operate down to depths of 1,000 m and may be used to locate a stricken submarine, to conduct survey and rescue preparations and to resupply Emergency Life Support Stores in pressure tight pods whilst awaiting rescue. Other assets include a Transfer under Pressure system with decompression chambers for up to 72 personnel; medical treatment facilities and support equipment. The system entered service in November 2008 and is expected to remain in service until 2033. It is permanently maintained at HM Naval Base Clyde, Scotland, at 12 hours notice to move worldwide.

NSRS SRV
 6/2008*, Richard Scott
 1353724

AUXILIARIES

General

The Royal Fleet Auxiliary Service is a civilian-manned fleet under the command of the Commander in Chief Fleet from 1 April 1993. Its main task is to supply warships at sea with fuel, food, stores and ammunition. It also provides aviation platforms, amphibious support for the Navy and Marines and sea transport for Army units. All ships take part in operational sea training. An order in council on 30 November 1989 changed the status of the RFA service to government-owned vessels on non-commercial service.

New Construction

(1) The Maritime Role 3 Medical Capability was formerly known as the Joint Casualty Treatment Ship (JCTS).

The requirement for such a vessel was identified in the 1998 Strategic Defence Review. The aviation support ship *Argus* was configured as a PCRFS during the 1990-91 Gulf War and the 2003 Iraq War. The contract for the Assessment Phase was awarded to BMT Ltd in February 2002 since when the key drivers have been identified as a need for eight operating tables and a 150-200 bed hospital. A two-spot flight deck and the ability to embark personnel by sea or land are also required. Development of the Systems Requirement Document (SRD) by Atkins Aviation and Defence Systems has been completed and potential solutions range from a bespoke vessel to conversion/modification of an existing military or merchant hull. The ship will be manned by RFA personnel but is unlikely to enter service before 2020. The requirement for a second ship at 12 months notice is to be met by chartering a commercial hull.

(2) The future afloat support capability is being taken forward through the Military Afloat Reach and Sustainability programme (MARS). The Concept Phase formally ended at Initial Gate in mid-2005 when the Assessment phase began. The competition to select a lead project integrator was abandoned in 2007. Under a revised procurement strategy, BVT, Fincantieri, Hyundai and Navantis were shortlisted in 2008 to build up to six tankers but a contract, expected to be in 2009, has been delayed by up to three years funding difficulties. Overall the requirement for six fleet tankers; two fleet support ships and three joint sea-based logistic vessels remains.

Personnel

1 January 2009: 2,295 (825 officers)

2 WAVE CLASS (LARGE FLEET TANKERS) (AORH)

Name	No	Builders	Laid down	Launched	Commissioned
WAVE KNIGHT	A 389	BAE Systems, Barrow	22 Oct 1998	29 Sep 2000	8 Apr 2003
WAVE RULER	A 390	BAE Systems, Govan	10 Feb 2000	9 Feb 2001	27 Apr 2003

Displacement, tons: 31,500 full load
Measurement, tons: 23,294 grt
Dimensions, feet (metres): 644.0 x 90.9 x 43.0
(196.3 x 27.7 x 13.1)

Main machinery: Diesel-electric; 4 Wärtsilä 12V 32E/GECLM diesel generators; 25,514 hp(m) (18.76 MW); 2 GECLM motors; 19,040 hp(m) (14 MW); 1 shaft, Kamowa bow and stern thrusters

Speed, knots: 18

Range, n miles: 10,000 at 15 kt

Complement: 80 plus 22 aircrew
Cargo capacity: 16,000 m³ total liquids including 3,000 m³ aviation fuel; 8-20 ft refrigerated containers plus 500 m³ solids

Guns: 2 Vulcan Phalanx CIWS, fitted for but not with 2-30 mm. 5-7.62 mm MGs. 2 Mk 44 7.62 mm Miniguns.
Countermeasures: Decoys: Outfit DLJ(2).
Radars: Navigation: KH 1007; E/F1-band.
IFF: Type 1017.

Helicopters: 1 Merlin HM Mk 1

Comment: Feasibility studies by BAeSEMA/YARD completed in early 1995. Draft invitation to tender issued 10 October 1995 followed by full tender on 26 June 1996. Contracts to build placed with VSEL (BAE Systems) on 12 March 1997. One spot flight deck with full hangar facilities for one Merlin. Enclosed bridge including bridge wings. Double hull construction. Inclined RAS gear with three rigs and two cranes.

WAVE KNIGHT

9/2008*, Shaun Jones / 1353521

2 APPLELEAF CLASS (SUPPORT TANKERS) (AOT)

Name	No	Builders	Launched	Commissioned
BAYLEAF	A 109	Cammell Laird, Birkenhead	27 Oct 1974	26 Mar 1982
ORANGELEAF (ex-Balder London, ex-Hudson Progress)	A 110	Cammell Laird, Birkenhead	1975	2 May 1984

Displacement, tons: 37,747 full load
Measurement, tons: 18,854 gross, 9,043 net
Dimensions, feet (metres): 560 x 85 x 36.1
(170.7 x 25.9 x 11)

Main machinery: 2 Pielstick 14 PC2.2 V 400 diesels, 14,000 hp(m) (10.29 MW) sustained; 1 shaft

Speed, knots: 15.5, 16.3 (A 109)
Complement: 56 (19 officers)
Cargo capacity: 22,000 m³ diesel; 3,800 m³ Avcat
Guns: 2 BMARC GAM 801 20 mm. 6-7.62 mm MGs.
2 Mk 44 7.62 mm Miniguns.
Radars: Navigation: Racal Decca 1226 and 1229, 1 band.

Comment: Part of a four-ship order cancelled by Hudson Fuel and Shipping Co, but completed by the shipbuilders, being the only mercantile order then in hand. *Bayleaf* built under commercial contract to be chartered by MoD and purchased in 2006. *Orangeleaf* major refit September 1985 to fit full RAS capability and extra accommodation. Single-hull construction. To be replaced from about 2015.

BAYLEAF

1/2008*, Shaun Jones / 1170762

2 ROVER CLASS (SMALL FLEETTANKERS) (AORLH)

Name	No	Builders	Launched	Commissioned
GOLD ROVER	A 271	Swan Hunter Shipbuilders, Wallsend-on-Tyne	7 Mar 1973	22 Mar 1974
BLACK ROVER	A 273	Swan Hunter Shipbuilders, Wallsend-on-Tyne	30 Oct 1973	23 Aug 1974

Displacement, tons: 4,700 light; 11,522 full load
Measurement, tons: 7,892 gross; 2,367 net
Dimensions, feet (metres): 461 × 63.3 × 24
 (140.6 × 19.3 × 7.3)
Main machinery: 2 SEMT-Pielstick 16 PA4 185 diesels, 15,360 hp(m) (11.46 MW); 1 shaft; Kamewa cp prop; bow thruster
Speed, knots: 19
Range, n miles: 15,000 at 15 kt
Complement: 48 (17 officers) (A 269); 55 (18 officers) (A 271, 273)
Cargo capacity: 3,000 m³ fuel
Guns: 2 BMARC GAM-BO1 20 mm. 4—7.62 mm MGs 2 Mk 44 7.62 mm Miniguns.
Radars: Navigation, Racal Decca 52690 ARPA, Racal Decca 1690; I-band
Helicopters: Platform for Westland Sea King HAS. Mk 5 or HC Mk 4.

Comment: Single-hull construction. Small fleet tankers designed to replenish HM ships at sea with fuel, fresh water, limited dry cargo and refrigerated stores under all conditions while under way. No hangar but helicopter landing platform is served by a stores lift, to enable stores to be transferred at sea by 'vertical lift'. Capable of HIFR. Siting of SATCOM aerial varies. *Green Rover* sold in September 1992 to Indonesia. *Blue Rover* to Portugal in March 1993. *Grey Rover* decommissioned in 2006. To be replaced from about 2015.

GOLD ROVER

5/2008, B Sullivan / 1353570

2 FORT VICTORIA CLASS (FLEET REPLENISHMENT SHIPS) (AORH)

Name	No	Builders	Laid down	Launched	Commissioned
FORT VICTORIA	A 387	Harland & Wolff/Cammell Laird	4 Apr 1988	12 June 1990	24 June 1994
FORT GEORGE	A 388	Swan Hunter Shipbuilders, Wallsend-on-Tyne	9 Mar 1989	1 Mar 1991	16 July 1993

Displacement, tons: 36,580 full load
Measurements, tons: 28,821 grt, 8,646 net
Dimensions, feet (metres): 667.7 oa, 607 wl × 99.7 × 32
 (203.5; 185 × 30.4 × 9.8)
Main machinery: 2 Crossley SEMT-Pielstick 16 PC2 6 V 400 diesels, 23,904 hp(m) (17.57 MW) sustained, 2 shafts
Speed, knots: 20
Complement: 134 (95 RFA plus 15 RN plus 24 civilian stores staff) plus 154 (28 officers) aircrew
Cargo capacity: 12,505 m³ liquids; 3,000 m³ solids
Guns: 2—20 mm GAM-BO
 2 Vulcan Phalanx 20 mm Mk 15. 2 Mk 44 7.62 mm Miniguns.
Countermeasures: Decoys DLH.
ESM: Marconi Racal Thorn UAT; intercept.
Combat data systems: SCOT 5 SATCOM
Radars: Navigation: Kelvin Hughes Type 1007; I-band
 Aircraft control: Kelvin Hughes NUCLEUS, E/F-band

Helicopters: 5 Westland Sea King/Merlin helicopters

Programmes: The requirement for these ships is to provide fuel and stores support to the Fleet at sea. *Fort Victoria* ordered 23 April 1986 and *Fort George* on 18 December 1987. *Fort Victoria* delayed by damage during building and entered Cammell Laird Shipyard for post sea trials completion in July 1992. The original plan for six of this class was progressively eroded and no more of this type will be built.

Structure: Single-hull construction. Four dual-purpose abeam replenishment rigs for simultaneous transfer of liquids and solids. Stern refuelling. Repair facilities

FORT VICTORIA

10/2006, B Sullivan / 1167588

for Merlin helicopters. The plan to fit Seewolf GWS 26 VLS was abandoned in favour of Phalanx CIWS fitted in 1998/99 to both ships.

Operational: Two helicopter spots. There is a requirement to provide an emergency landing facility for Harriers. To remain in service until 2019.

2 FORT GRANGE CLASS (FLEET REPLENISHMENT SHIPS) (AFSH)

Name	No	Builders	Laid down	Launched	Commissioned
FORT ROSALIE (ex-Fort Grange)	A 385	Scott-Lithgow, Greenock	9 Nov 1973	9 Dec 1976	6 Apr 1978
FORT AUSTIN	A 386	Scott-Lithgow, Greenock	9 Dec 1975	9 Mar 1978	11 May 1979

Displacement, tons: 23,384 full load
Measurement, tons: 20,043 grt
Dimensions, feet (metres): 607.4 × 78 × 28.2
 (185.1 × 24.1 × 8.6)
Main machinery: 1 Sulzer RND90 diesel; 23,200 hp(m) (17.05 MW); 1 shaft, 2 bow thrusters
Speed, knots: 22
Range, n miles: 10,000 at 20 kt

Complement: 114 (31 officers) plus 36 RNSTS (civilian supply staff) plus 45 RN aircrew
Cargo capacity: 3,500 tons armament, naval and victualling stores in 4 holds of 12,800 m³
Guns: 2 BMARC GAM-BO1 20 mm. 4 7.62 mm MGs 2 Mk 44 7.62 mm Miniguns.
Radars: Navigation: Kelvin Hughes Type 1007; I-band.
Helicopters: 4 Westland Sea King

Comment: Ordered in November 1971. Fitted for SCOT SATCOMs but carry Marisat. Normally only one helicopter is embarked. ASW stores for helicopters carried on board. Emergency flight deck on the hangar roof. There are six cranes, three of 10 tons lift and three of 5 tons. Decommissioning dates: *Fort Rosalie* 2016, *Fort Austin* 2017.

FORT ROSALIE

9/2007, Shaun Jones / 1170758

1 STENA TYPE (FORWARD REPAIR SHIP) (ARH)

Name	No	Builders	Commissioned	Recommissioned
DILIGENCE (ex-Stena Inspector)	A 132	Oresundsvarvet AB, Landskrona, Sweden	1981	12 Mar 1984

Displacement, tons: 10,765 full load
Measurement, tons: 6,048 grt
Dimensions, feet (metres): 367.5 x 67.3 x 22.3
 (112 x 20.5 x 6.8)
Flight deck, feet (metres): 83 x 83 (25.4 x 25.4)
Main machinery: Diesel electric; 5 V16 Nohab-Polar diesel generators, 2,650 kW; 4 NEBB motors; 6,000 hp(m) (4.41 MW); 1 shaft; Kamewa cp prop; 2 Kamewa bow tunnel thrusters; 3,000 hp(m) (2.2 MW); 2 azimuth thrusters (aft); 3,000 hp(m) (2.2 MW)
Speed, knots: 12
Range, n miles: 5,000 at 12 kt
Complement: 38 (15 officers) plus accommodation for 147 plus 55 temporary
Cargo capacity: Long-jib crane SWL 5 tons, maximum lift, 40 tons
Guns: 2 BMARC GAM-BO1 20 mm. 4—7.62 mm MGs. 2 Mk 44 7.62 mm Miniguns

DILIGENCE 11/2007, Shaun Jones / 1170757

Helicopters: Facilities for up to Boeing Chinook HC. Mk 1 (medium lift) size.

Programmes: Stena Inspector was designed originally as a Multipurpose Support Vessel for North Sea oil operations, and completed in January 1981. Chartered on 25 May 1982 for use as a fleet repair ship during the Falklands War. Purchased from Stena (UK) Line in October 1983, and converted for use as Forward Repair Ship in the South Atlantic (Falkland Islands) Conversion by Clyde Dock Engineering Ltd, Govan from 12 November 1983 to 29 February 1984.

Modernisation: Following items added during conversion: large workshop for hull and machinery repairs (in well-deck); accommodation for naval Junior Rates (new accommodation block); accommodation for crew of conventional submarine (in place of Saturation Diving System); extensive craneage facilities; overside supply of electrical power, water, fuel, steam, air, to ships alongside; large naval store (in place of cement tanks), armament and magazines; Naval Communications System; decompression chamber. Major refit conducted in Singapore 2005. Work included replacement/update of dynamic positioning system.

Structure: Four 5 ton anchors for four-point mooring system. Strengthened for operations in ice (Ice Class 1A). Kongsberg Albatross Positioning System has been retained in full. Uses bow and stern thrusters and main propeller to maintain a selected position to within a few metres, up to Beaufort Force 9. Controlled by Kongsberg KS 500 computers.
Operational: Principal role is operational maintenance and repair with Engineering Support Naval Party embarked. Has also been used as MCMV support ship in the Gulf and is capable of SSN support. To remain in service until 2014.

1 PRIMARY CASUALTY RECEIVING SHIP (APCR)

Name	No	Builders	Commissioned	Recommissioned
ARGUS (ex-Contender Bazant)	A 135	CNR Breda, Venice	1981	1 June 1988

Displacement, tons: 18,280 standard; 26,421 full load
Measurement, tons: 9,965 dwt
Dimensions, feet (metres): 574.5 x 99.7 x 27
 (175.1 x 30.4 x 8.2)
Main machinery: 2 Lindholm SEMT-Pielstick 18 PC2.5 V 400 diesels, 23,400 hp(m) (17.2 MW) sustained; 2 shafts
Speed, knots: 18
Range, n miles: 20,000 at 19 kt
Complement: 80 (22 officers) plus 35 permanent RN plus 137 RN aircrew
Military lift: 3,300 tons diesel, 1,100 tons aviation fuel, 138 4 ton vehicles in lieu of aircraft
Guns: 2—20 mm GAM-BO 6—7.62 mm MGs. 2 Mk 44 7.62 mm Miniguns.
Countermeasures: Decoys: DLJ. ESM THORN EMI Guardian; radar warning.
Combat data systems: Recal CANE DEB-1 data automation. Inmarsat SATCOM communications. Marisat.
Radars: Air search: Type 994 MTI; E/F-band. Air/surface search: Kelvin Hughes Type 1006; I-band
Navigation: Recal Decca Type 994; I-band.

ARGUS 11/2007, B Sullivan / 1170759

Fixed-wing aircraft: Provision to transport 12 Harriers.
Helicopters: 6 Westland Sea King HAS Mk 5/6 or similar.

Programmes: Ro-Ro container ship whose conversion to aviation training ship was begun by Harland and Wolff in March 1984 and completed on 3 March 1988. Work to convert her to PCRFS role completed in 2001 and upgraded in 2007.

Structure: Uses former Ro-Ro deck as hangar with four sliding WT doors able to operate at a speed of 10 m/min. Can replenish other ships underway. One lift abaft funnel. Domestic facilities are very limited if she is to be used in the Command support role. Flight deck is 372.4 ft (113.5 m) long and has a 5 ft thick concrete layer on its lower side. First RFA to be fitted with a command system PCRFS conversion work included modification

of three decks into permanent 100-bed hospital with three operating theatres. Improvements to safety and evacuation facilities for casualties and staff, along with upgraded medical equipment, are to be installed in 2009. The forward lift is to be adapted for evacuation and only the aft lift remains available for aircraft.
Operational: Based at Falmouth. Operational life extended to 2020. Can conduct subsidiary role as aviation training ship.

6 TRANSPORT SHIPS (AKR)

Name	No	Builders	Commissioned
HURST POINT	-	Flensburger Schiffbau	16 Aug 2002
HARTLAND POINT	-	Harland & Wolff, Belfast	11 Dec 2002
EDDYSTONE	-	Flensburger Schiffbau	28 Nov 2002
ANVIL POINT	-	Harland & Wolff, Belfast	17 Jan 2003
LONGSTONE	-	Flensburger Schiffbau	24 Apr 2003
BEACHY HEAD	-	Flensburger Schiffbau	17 Apr 2003

Displacement, tons: 20,000 full load
Measurement, tons: 14,200 dwt
Dimensions, feet (metres): 633.4 x 85.3 x 24.3
 (193.0 x 26.0 x 7.4)
Main machinery: 2 MaK 9M43 diesels; 21,700 hp (16.2 MW); 2 cp props; bow thruster
Speed, knots: 21.5
Range, n miles: 9,200 at 21.5 kt

Complement: 18
Military lift: 2,650 linear metres of space for vehicles equating to 130 armoured vehicles plus 60 trucks and ammunition
Radars: Navigation; I-band.

Comment: On 26 October 2000, it was announced that AWSR Ltd had been awarded the contract to provide

a strategic sealift service in support of the Joint Rapid Reaction Force (JRRF) until late 2024. A key feature of the contract is that four Ro-Ro are in constant MoD use while the remaining ships are available for use by AWSR for the generation of commercial revenue. These can be called upon to support major operations and exercises.

HURST POINT 4/2008, Maritime Photographic / 1353519

4 BAY CLASS LANDING SHIPS DOCK (AUXILIARY) (LSD)

Name	No	Builders	Laid down	Launched	Commissioned
LARGS BAY	L 3006	Swan Hunter (Tyneside) Ltd	28 Jan 2002	18 July 2003	28 Nov 2006
LYME BAY	L 3007	Swan Hunter (Tyneside) Ltd	22 Nov 2002	3 Sep 2005	26 Nov 2007
MOUNTS BAY	L 3008	BAE Systems Govan	25 Aug 2002	9 Apr 2004	13 July 2006
CARDIGAN BAY	L 3009	BAE Systems Govan	13 Oct 2003	8 Apr 2005	18 Dec 2006

Displacement, tons: 16,160 full load
 Dimensions, feet (metres): 579.4 × 86.6 × 19
 (176.6 × 26.4 × 5.8)

Main machinery: Diesel-electric, 2 Wärtsilä 8L26 generators; 6,000 hp (4.5 MW); 2 Wärtsilä 12V26 generators; 9,000 hp (6.7 MW); 2 steerable propulsors; bow thruster

Speed, knots: 18. Range, n miles: 10,000 at 15 kt

Complement: 69 plus up to 52 military augmentees (plus 356 troops or 600 in overload conditions)

Military lift: 1,130 linear metres of space for vehicles equating to 24 Challenger MBTs or 150 light trucks plus 200 tons ammunition or 24 × 24 TEU containers

Guns: 2–30 mm. 2 Mk 44 7.62 Miniguns. 6–7.62 mm MGs

Radars: Navigation: E/F/I-bands.

Helicopters: Platform capable of operating Chinook.

Programmes. Two ships ordered from Swan Hunter on 18 December 2000. Contract for two further ships of the class, placed on 19 November 2001 with BAE Systems (Marine) at Govan. The programme was badly affected by escalating costs and delays and the whole project was passed to BAE Systems on 13 July 2006.

Structure: Based on the Royal Scheide Enforcer design, the LSD(A)s are designed to transport troops, vehicles, ammunition and stores in support of amphibious operations. Offload is enabled by a flight deck capable of operating heavy helicopters, an amphibious dock capable of operating one LCU Mk 10 and mekaflores which can be hung on the ships' sides. There is no beaching capability. Davit-launched infantry landing craft (LCVPs) are not fitted but two can be carried in the dock or on deck. There are two 30 t cranes.

MARINE SERVICES AND GOVERNMENT AGENCY SERVICES

Notes: (1) A contract was awarded to SERCo. Denholm Marine Services Ltd in January 2008 for the provision of support to naval bases, mooring maintenance and support to military training and exercises. The contract expires in 2022
 (2) Longbow is a 12,000 ton trials barge whose conversion 2003–04 by FSL Portsmouth includes a mast, missile silo and firing system to facilitate PAAMS development trials.

1 SUPPORT SHIP (AG)

Name	No	Builders	Commissioned
SD NEWTON	-	Scott-Lithgow, Greenock	17 June 1976

Displacement, tons: 3,140 light; 4,652 full load
 Dimensions, feet (metres): 323.5 × 53 × 27.9 (98.6 × 16 × 8.5)
 Main machinery: Diesel-electric; 3 Ruston 8 RK-215 diesels; 5,520 hp (4.06 MW); 1 GEC motor; 2,650 hp (1.97 MW); Kort nozzle; bow thruster
 Speed, knots: 14. Range, n miles: 5,000 at 14 kt
 Complement: 14
 Radars: Navigation: Kelvin Hughes 1006; I-band.

Comment: Primarily used in support of RN training exercises. Limited support provided to trials. Mid-life refit and re-engining in 2001. To be decommissioned in August 2010 when she is replaced by *Victoria*.

LONGBOW

7/2007, Derek Fox / 1305724

894 UK (MS/GAS)

1 SAL CLASS (MOORING SHIP) (ARSD)

Name	No	Builders	Commissioned
SD SALMAID	-	Hall Russell, Aberdeen	28 Oct 1986

Displacement, tons: 1,605 light; 2,225 full load
 Dimensions, feet (metres): 253 x 48.9 x 21.6 (77 x 14.9 x 6.6)
 Main machinery: 2 Ruston 8RKCZ diesels; 4,000 hp (2.98 MW); 1 shaft; cp prop
 Speed, knots: 15
 Range, n miles: 5,000 at 14 kt
 Complement: 15 (6 officers) plus 27 spare billets
 Radars: Navigation: Racal Decca, I-band.

Comment: Ordered on 23 January 1984. *Salmoid* based at Devonport. Lift, 400 tons; 200 tons on horns. Can carry submarines including NSRS. To be decommissioned in March 2011.

SAL CLASS 3/2005, Derek Fox / 1153936

2 MOORHEN CLASS (MOORING SHIPS) (ARS)

Name	No	Builders	Commissioned
SD MOORHEN	-	McTay, Bromborough	26 Apr 1989
SD MOORFOWL	-	McTay, Bromborough	30 June 1989

Displacement, tons: 530 full load
 Dimensions, feet (metres): 106 x 37.7 x 12.5 (32.3 x 11.5 x 3.8)
 Main machinery: 2 Cummins KT19-M diesels; 786 hp (594 kW); 2 Aquamasters; bow thruster
 Speed, knots: 8
 Complement: 12 (2 officers)

Comment: Classified as powered mooring lighters. The whole ship can be worked from a 'flying bridge' which is constructed over a through deck. Day mess for five divers. *Moorhen* at Portsmouth, *Moorfowl* at Devonport. To remain in service until 2022.

MOORHEN 7/2008*, A A de Kruijf / 1335720

1 RESEARCH SHIP (AGOR)

Name	No	Builders	Commissioned
SD COLONEL TEMPLER (ex-Cristilla)	-	Hall Russell, Aberdeen	1966

Displacement, tons: 1,300 full load
 Dimensions, feet (metres): 185.4 x 36 x 23.0 (56.5 x 11 x 7.0)
 Main machinery: Diesel-electric; 2 Cummins KTA-38G3M diesels; 2,557 hp(m) (1.88 MW); 2 Newage HC M734E1 generators; 1 Ansaldo DH 560S motor; 1,775 hp(m) (1.3 MW); 1 Aquamaster azimuth thruster with contra rotating props
 Speed, knots: 13.5
 Range, n miles: 9,000 at 10 kt
 Complement: 12 plus 12 scientists
 Radars: Navigation: Racal Decca 2690 ARPA; I-band.

Comment: Built as a stern trawler. Converted in 1980 for use at RAE Farnborough as an acoustic research ship. Major rebuild in 1992. Re-engined in early 1997 with a raft mounted diesel-electric plant to reduce noise and vibration. Carries a 9 m workboat *Quest Q 26*. Well equipped laboratories. Capable of deploying and recovering up to 5 tons of equipment from deck winches and a 5 ton hydraulic A frame. The ship is also used to support diving operations. Based on the Clyde. To be decommissioned in June 2009.

COLONEL TEMPLER 7/2008*, Ian Harris / 1335722

2 TORNADO CLASS (TORPEDO RECOVERY VESSELS) (YDT/YPT)

Name	No	Builders	Commissioned
SD TORNADO	-	Hall Russell, Aberdeen	15 Nov 1979
SD TORMENTOR	-	Hall Russell, Aberdeen	29 Apr 1980

Displacement, tons: 698 full load
 Dimensions, feet (metres): 154.5 x 29.8 x 16.1 (47.1 x 9.1 x 4.9)
 Main machinery: 2 Mirreles-Blackstone ESLB MGR diesels; 2,170 hp (1.62 MW); 2 shafts
 Speed, knots: 14. Range, n miles: 3,000 at 14 kt
 Complement: 10
 Radars: Navigation: Kelvin Hughes 1006; I-band.

Comment: Ordered on 1 July 1977. Both ships converted to support diving operations and mine laying/recovery trials. Based on the Clyde. *Tormentor* to be replaced by *Tremendous* and decommissioned in December 2009 and *Tornado* to be replaced by *Triumphant* and decommissioned in February 2010.

TORNADO 12/1999, W Sartori / 0075841

1 WATERMAN CLASS (COASTAL TANKER) (AWT)

Name	No	Builders	Launched
SD WATERMAN	-	Dunston, Hesse	1978

Displacement, tons: 220 standard; 470 full load
 Dimensions, feet (metres): 131.2 x 23.9 x 11.1 (40.0 x 7.3 x 3.4)
 Main machinery: 1 Mirreles Blackstone ERS8 diesel; 650 hp (485 kW); 1 shaft
 Speed, knots: 11. Range, n miles: 1,500 at 10 kt
 Complement: 4
 Cargo capacity: 250 tons fresh water

Comment: Based on the Clyde. To be decommissioned in 2011.

WATERMAN 6/2005, John Mortimer / 1153976

1 RANGE SAFETY CRAFT (YFRT)

SIR WILLIAM ROE 8127

Displacement, tons: 20.2 full load
 Dimensions, feet (metres): 48.2 x 11.5 x 4.3 (14.7 x 3.5 x 1.3)
 Main machinery: 2 Volvo Penta TAMD 122D diesels; 820 hp (612 kW); 2 shafts
 Speed, knots: 22. Range, n miles: 300 at 20 kt
 Complement: 3
 Radars: Navigation: Furuno; I-band.

Comment: Built in the 1980s. Based in Cyprus and operated by the Royal Logistic Corps. New engines fitted since 1993.

RSC craft 10/2003, Maritime Photographic / 057713

9 ADEPT CLASS (COASTAL TUGS) (YTB)

SD FORCEFUL SD POWERFUL SD BUSTLER SD CAREFUL SD DEXTEROUS
SD NIMBLE SD ADEPT SD CAPABLE SD FAITHFUL

Displacement, tons: 441 standard, 540 full load
Dimensions, feet (metres): 127.3 x 29.9 x 13.1 (38.8 x 9.1 x 4.0)
Main machinery: 2 Ruston 6RKC diesels; 2,575 hp (1.92 MW); 2 Voith-Schneider props
Speed, knots: 12. Range, n miles: 1,500 at 10 kt
Complement: 5

Comment: 'Twin unit tractor tugs' (TUTT) First four ordered from Richard Dunston (Hessle) on 22 February 1979 and next five on 8 February 1984. Primarily for harbour work with coastal towing capability. Nominal bollard pull, 275 tons. *Adept* accepted 28 October 1980, *Bustler* 15 April 1981, *Capable* 11 September 1981, *Careful* 12 March 1982, *Forceful* 18 March 1985, *Nimble* 25 June 1985, *Powerful* 30 October 1985, *Faithful* 21 December 1985, *Dexterous* 23 April 1986. *Powerful* and *Bustler* at Portsmouth, *Forceful*, *Faithful*, *Adept* and *Careful* at Devonport, *Nimble* and *Dexterous* on the Clyde. *Capable* is operated by Commander British Forces Gibraltar. *Nimble*, *Bustler*, *Dexterous* and *Powerful* to be decommissioned in 2010 when replaced by *Dependable*, *Bountiful*, *Rosarioful* and *Reliable* respectively.

BUSTLER 8/2006*, Maritime Photographic / 1298812

1 ATLAS CLASS (YTM)

SD ATLAS

Measurement, tons: 88 grt
Dimensions, feet (metres): 72.2 x 26.7 x 10.8 (22.0 x 7.82 x 3.3)
Main machinery: 2 Caterpillar diesels; 2,100 hp (1.6 MW); 2 shafts
Speed, knots: To be announced
Complement: 3 plus 12 passengers

Comment: Brought into service by SERCo in 2005. Built in Istanbul in 1999 and on charter from a Turkish company. It is British registered. Based at Portsmouth. To remain in service until 2022.

ATLAS 6/2007*, Derek Fox / 1305225

3 DOG CLASS (YTM)

SD HUSKY SD SPANIEL SD SHEEPDOG

Displacement, tons: 248 full load
Dimensions, feet (metres): 94 x 23.9 x 12 (28.7 x 7.3 x 3.7)
Main machinery: 2 Lister-Blackstone ERSB MGR diesels; 1,320 hp (985 kW); 2 shafts
Speed, knots: 10. Range, n miles: 2,236 at 10 kt
Complement: 5

Comment: Harbour berthing tugs. Nominal bollard pull, 175 tons. Completed 1962-72. Serving at Portsmouth, Devonport and on the Clyde. Appearance varies considerably, some with mast, some with curved upper-bridge work, some with flat monkey-island. Decommissioning dates: *Spaniel* and *Husky* 2009; *Sheepdog* 2010. To be replaced by *Mars*, *Jupiter* and *Independent* respectively.

SHEEPDOG 8/2008*, Maritime Photographic / 1798803

2 TRITON CLASS (YTL)

SD KITTY SD LESLEY

Displacement, tons: 1075 standard
Dimensions, feet (metres): 67.7 x 18 x 9.2 (17.6 x 5.5 x 2.8)
Main machinery: 1 Lister Blackstone ARS4M diesel; 330 hp (264 kW); 1 shaft
Speed, knots: 7.5
Complement: 2

Comment: Both completed by August 1974 by Dunston. 'Water-tractors' with small wheelhouse and adjoining funnel. Voith-Schneider vertical axis propellers. Nominal bollard pull, 3 tons. Both to be decommissioned in 2009.

TRITON CLASS 6/2001*, A Sharma / 0131181

4 FELICITY CLASS (YTL)

SD FRANCES SD FLORENCE SD GENEVIEVE SD HELEN

Displacement, tons: 144 full load
Dimensions, feet (metres): 70 x 21 x 8.5 (21.5 x 6.4 x 2.6)
Main machinery: 1 Mirreles-Blackstone ESM8 diesel; 615 hp (459 kW); 1 Voith-Schneider cp prop
Speed, knots: 10
Range, n miles: 925 at 9 kt
Complement: 4
Raders: Navigation Raytheon; I-band.

Comment: *Frances*, *Florence* and *Genevieve* ordered early 1979 from Richard Dunston (Thorne) and completed by end 1980. Nominal bollard pull, 5.7 tons. Based at Devonport and Portsmouth. Decommissioning dates: *Florence* and *Helen* 2010, *Genevieve* and *Frances* 2011. To be replaced by *Eileen*, *Suzanne*, *Christina* and *Deborah* respectively.

GENEVIEVE 11/2008*, Maritime Photographic / 1353518

1 RANGE SUPPORT VESSEL (YFRT)

SD WARDEN

Displacement, tons: 900 full load
Dimensions, feet (metres): 159.4 x 34.4 x 16.4 (48.6 x 10.5 x 5.0)
Main machinery: 2 Ruston 8RKCZ diesels; 4,000 hp (2.98 MW); 2 shafts; cp props
Speed, knots: 15
Range, n miles: 2,000 at 10 kt
Complement: 7
Raders: Navigation: Racal Decca RM 1250; I-band.
Sonars: Dowty 2053; high frequency

Comment: Built by Richards, Lowestoft and completed 20 November 1989. Reverted in 1998 to being an RMAS ship at Kyle of Lochalsh in support of BUTEC. Modified in 1998 to act, at BUTEC, as a ROV host ship and weapons launch and recovery platform. To remain in service until 2022.

WARDEN 5/2008*, Alistair MacDonald / 1335771

2 SUBMARINE BERTHING TUGS (YTL)

Name	No	Builders	Commissioned
SD IMPULSE	-	Dunston, Hesse	11 Mar 1993
SD IMPETUS	-	Dunston, Hesse	28 May 1993

Displacement, tons: 530 full load
 Dimensions, feet (metres): 106.7 x 32.8 x 17.1 (32.5 x 10.0 x 5.2)
 Main machinery: 2 WH Allen 8S12 diesels; 3,400 hp (2.54 MW) sustained; 2 Aquamaster Azimuth thrusters; 1 Jaström bow thruster
 Speed, knots: 12
 Complement: 5

Comment: Ordered 28 January 1992 for submarine berthing duties. There are two 10 ton hydraulic winches forward and aft with break capacities of 110 tons. Boilard pull 38.6 tons ahead, 36 tons astern. Fitted with firefighting and oil pollution equipment. Designed for one-man control from the bridge with all round vision and a comprehensive Navaid's fit. *Impulse* launched 10 December 1992; *Impetus* 9 February 1993. Based on the Clyde. To remain in service until 2022

IMPETUS 10/2004, Maritime Photographic / 1043618

9 RANGE SAFETY CRAFT (YFRT)

Smit Stour	Smit Rother	Smit Romney	Smit Cerne	Smit Wey
Smit Frome	Smit Merrion	Smit Penally	Smit Neyland	

Displacement, tons: 6.1 full load
 Dimensions, feet (metres): 37.1 x 11.2 x 3.9 (11.3 x 3.4 x 1.2)
 Main machinery: 2 Volvo Penta KAD 42P diesels; 680 hp (507 kW); 2 x Hamilton waterjets
 Speed, knots: 35
 Range, n miles: 160 at 21 kt
 Complement: 2

Comment: MP-1111 class of vessels designed (based on a fast rescue boat) and built at Maritime Partners Ltd (Norway). Aluminium alloy hull and GRP superstructure. The order for the craft followed a contract awarded to Smit International (Scotland) Ltd for the provision of Range Clearance and Safety duties in and around the various sea danger areas of UK military ranges. Three based at Dover, Portland and Pembroke Dock.

SMIT STOUR 6/2004, Smit International / 1043617

8 AIRCREW TRAINING CRAFT (YXT)

Smit Dee	Smit Yare	Smit Spey	Smit Tamar
Smit Don	Smit Towy	Smit Dart	Smit Cymylan

Displacement, tons: 55 full load
 Dimensions, feet (metres): 90.5 x 21.6 x 4.9 (27.6 x 6.6 x 1.5)
 Main machinery: 2 Cummins KTA 19M4 diesels; 1,400 hp (1.04 MW); 2 shafts
 1 Ultrajet 305 centreline waterjet; 305 hp (227 kW)
 Speed, knots: 21
 Range, n miles: 650 at 21 kt
 Complement: 6
 Radars: Furuno FR-2115 EPA; I-band.

Comment: Vessels built at Babcock Engineering Services, Rosyth, and FBMA Babcock Marine, Cebu, Philippines (*Yare*, *Towy* and *Spey*). All delivered by 11 July 2003. Of aluminium alloy construction, the design is an adaptation of FBM Babcock Marine's Protector class patrol vessel. The order for the craft followed a contract awarded to MoD and to Smit International for provision of marine support to aircrew training, high speed marine target towing and recovery of air-sea rescue apparatus. The craft have an aft docking well for a daughter craft. Based at Buckie (*Dee*), Blyth (*Don*), Great Yarmouth (*Yare*), Pembroke Dock (*Towy*) and Plymouth (*Spey* and *Dart*). *Smit Dart* is employed as a passenger craft. *Tamar* (Plymouth) and *Cymylan* (Holyhead) are similar second-hand craft used for passengers.

SMIT DART 6/2005, Per Körnefeldt / 1153937

1 SUBMARINE TENDER (YFB)

Name	No	Builders	Commissioned
SD ADAMANT	-	FBM, Cowes	18 Jan 1993

Displacement, tons: 170 full load
 Dimensions, feet (metres): 101 x 25.6 x 9.8 (30.8 x 7.8 x 3.0)
 Main machinery: 2 Cummins KTA-19M2 diesels, 1,380 hp (1 MW); 2 water-jets
 Speed, knots: 23
 Range, n miles: 250 at 22 kt
 Complement: 4 plus 36 passengers plus 1 ton stores

Comment: Twin-hulled support ship ordered in 1991 and launched 8 October 1992. Used for personnel and stores transfers in the Firth of Clyde. In addition to the passengers, half a ton of cargo can be carried. Capable of top speed up to Sea State 3 and able to transit safely up to Sea State 6. To be withdrawn from service in late 2009 when replaced by *Eva*.

ADAMANT 10/1998, M Verschaevé / 0053268

2 STORM CLASS (YFB)

Name	No	Builders	Commissioned
SD CAWSAND	-	FBM Marine, Cowes	July 1997
SD BOVISAND	-	FBM Marine, Cowes	Sep 1997

Displacement, tons: 97
 Dimensions, feet (metres): 78.4 x 36.4 x 16.2 (23.9 x 11.1 x 4.95)
 Main machinery: 2 Caterpillar 3408TA diesels; 1,224 hp (m) (900 kW); 2 shafts
 Speed, knots: 15
 Range, n miles: 450 at 14 kt
 Complement: 5 plus 75 passengers

Comment: Both based at Devonport. Swath design with hydraulically operated telescopic gangways. To remain in service until 2022.

CAWSAND 5/2008, Peter Ford / 1353503

3 OBAN CLASS (YFL)

SD OBAN SD ORONSAY SD OMAGH

Displacement, tons: 297 full load
 Dimensions, feet (metres): 90.9 x 24 x 12.3 (27.7 x 7.3 x 3.8)
 Main machinery: 2 Cummins N14M diesels; 1,050 hp(m) (785 kW); 2 Kort-Nozzles
 Speed, knots: 10
 Range, n miles: 1,700 at 10 kt
 Complement: 4

Comment: Built by McTay Marine and completed January to July 2000. Capable of carrying 60 passengers. *Oban* based at Devonport and the other two on the Clyde. To remain in service until 2022.

OBAN 5/2008*, A A de Kruijf / 1335217

4 PADSTOW AND NEWHAVEN CLASSES (YFL)

SD PADSTOW SD NEWHAVEN SD NUTBOURNE SD NETLEY

Displacement, tons: 57 standard; 125 full load
 Dimensions, feet (metres): 60 x 21.3 x 8.9 (18.3 x 6.5 x 2.7)
 Main machinery: 2 Cummins 6 CTA diesels; 710 hp(m) (522 kW); 2 shafts
 Speed, knots: 10
 Range, n miles: 230 at 10 kt
 Complement: 3

Comment: Built by Aluminium Shipbuilders at Fishbourne, Isle of Wight and completed May to November 2000. Capable of carrying 60 passengers and based at Devonport (*Padstow*) and Portsmouth. Catamaran hulls. To remain in service until 2022.

PADSTOW 3/2008*, B Sullivan / 1335216

3 MANLY CLASS (YAG)

SD MELTON SD MENAI SD MEON

Displacement, tons: 143 full load
 Dimensions, feet (metres): 80 x 21 x 9.8 (24.4 x 6.4 x 3.0)
 Main machinery: 1 Lister-Blackstone ESR4 MGR diesel; 320 hp (239 kW); 1 shaft
 Speed, knots: 10
 Range, n miles: 700 at 10 kt
 Complement: 8 (2 officers)

Comment: All built by Richard Dunston, Thorne. All completed by early 1983. *Melton* is at Kyle of Lochalsh, the other two are at Devonport. To remain in service until 2022.

MEON 8/2008*, Marco Ghigino / 1353517

1 FBM CATAMARAN CLASS (YFL)

SD NORTON

Displacement, tons: 21 full load
 Dimensions, feet (metres): 51.8 x 18 x 4.9 (15.8 x 5.5 x 1.5)
 Main machinery: 2 Mermaid Turbo 4 diesels; 280 hp (209 kW); 2 shafts
 Speed, knots: 10
 Range, n miles: 400 at 10 kt
 Complement: 2

Comment: Built by FBM Marine in 1989. Catamaran design. Can carry 30 passengers or 2 tons stores. Based at Portsmouth

NORTON 7/2008*, A A de Kruijf / 1335218

0 + 1 SUPPORT SHIP (AG)

Notes: (1) Six Mk 4 LCVs are listed in the RN section. One is based in the Falklands.
 (2) One Range Safety Craft is listed in RMAS section.
 (3) 32 Combat Support Boats delivered by 2002. These are 8.2 m craft, road transportable and with a top speed of 30 kt.
 (4) Four new 14 m Army workboats were delivered in 2008. They are to be capable of fire fighting, pollution control, mexeflote operations, towed flexible barge duties, diving operations and general tug duties.
 (5) 17 Port and Maritime Regt, RLC is based at Marchwood, Southampton.

SCOTTISH FISHERIES PROTECTION AGENCY

Notes: (1) The Agency is responsible for the enforcement of sea fisheries regulations around the Scottish coast to a distance of 200 n miles. It has a complement of 275.
 (2) There are two Cessna F-406 Caravan II aircraft with Bendix 1500 radars.

2 JURA CLASS (PSO)

JURA HIRTA

Measurement, tons: 2,182 grt
 Dimensions, feet (metres): 275.6 x 42.6 x 14.7 (84.0 x 13.0 x 4.5)
 Main machinery: Diesel-electric; 3 Wärtsilä Gensets; 6,500 hp (4.8 MW); 1 shaft; cp prop;
 1 Brunvoll bow thruster (*Hirta*); 1 Brunvoll stern thruster (*Hirta*)
 Speed, knots: 18
 Complement: 16 (7 officers)
 Radars: Surface search/navigation: Sperry Marine Bridgemaster; E/F/I-bands.

Comment: *Jura* built by Ferguson Shipbuilders, Port Glasgow. Launched on 28 April 2005 and entered service in early 2006 to replace *Sulisker*. *Hirta* built by Stocznia Polnocna, Gdansk, launched on 17 August 2007 and entered service in late 2007. A third ship is no longer planned.

JURA

1/2006, SFPA / 1159412

1 SULISKER CLASS (PSO)

NORNA

Displacement, tons: 1,586 full load
 Dimensions, feet (metres): 234.3 x 38 x 17.6 (71.4 x 11.6 x 5.4)
 Main machinery: 2 Ruston 6AT350 diesels; 6,000 hp (4.48 MW) sustained; 2 shafts;
 cp props; bow thruster; 450 hp (336 kW)
 Speed, knots: 18
 Range, n miles: 7,000 at 13 kt
 Complement: 18 (7 officers) plus 6 spare bunks
 Radars: Navigation: 2 Racal Decca Bridgemaster; I-band.

Comment: Built by Richards, Lowestoft and completed in June 1988. *Sulisker* was decommissioned in early 2006 and *Vigilant* in 2008.

NORNA

6/2005, Maritime Photographic / 1153974

1 MINNA CLASS (PBO)

MINNA

Displacement, tons: 855 full load
 Dimensions, feet (metres): 156.5 x 32.8 x 14.8 (47.7 x 10.0 x 4.5)
 Main machinery: 2 Wärtsilä Gensets; 2,896 hp (2.16 MW); 2 Indar propulsion motors;
 2,145 hp (1.6 MW); 2 shafts, 1 Kamewa transverse thruster (150 kW)
 Speed, knots: 14
 Complement: 15 (6 officers)

Comment: Built by Ferguson Shipbuilders, Port Glasgow. Launched in February 2003 and accepted by SFPA on 31 July 2003 as replacement for *Westra*. Procurement of a second similar ship was cancelled following a review in 2006.

MINNA

6/2003, SFPA / 0561556

CUSTOMS

Notes: HM Revenue and Customs Maritime Branch operates five offshore patrol vessels. The fleet comprises four Damen 42 m craft (*Seeker, Searcher, Vigilant, Valiant*), one Vosper Thornycroft 36 m craft (*Sentinel*).

VALIANT 1/2009, *Maritime Photographic* / 1352516

SENTINEL 5/2001, *A Sharma* / 0131218

TRINITY HOUSE

Notes: The Corporation of Trinity House, with its HQ in London, has three responsibilities. It is the General Lighthouse Authority (GLA) for England, Wales and the Channel Islands, a Deep Sea Pilotage Authority for UK; and a major maritime charity, funded by its endowments, which supports the education, welfare and training of mariners and the promotion of safety at sea. In its GLA role, Trinity House provides nearly 600 aids to navigation including lighthouses, lightvessels, buoys, beacons, a differential global positioning service and an experimental radio navigation service e-LORAN. Funding for these operations is by light dues levied on commercial shipping calling at UK ports. Operations are controlled from its Harwich centre while a depot at Swansea serves the west coast.

PATRICIA

Displacement, tons: 3,139 full load
Dimensions, feet (metres): 284.0 x 46.0 x 14.0 (86.3 x 13.8 x 4.3)
Main machinery: 4 Ruston Oil diesels; 4,285 bhp (3.2 MW); connected via 4 generators to 2 motors; 3,452 hp (2.54 MW); 2 shafts
Speed, knots: 14
Range, n miles: 10,000 at 12 kt
Complement: 25 (8 officers)

Comment: Built by Henry Robb Ltd, Leith. Commissioned in May 1982

PATRICIA 7/2008, *Maritime Photographic* / 1353515

GALATEA

Displacement, tons: 3,960 full load
Dimensions, feet (metres): 275.5 x 54.1 x 14.8 (84.0 x 16.5 x 4.25)
Main machinery: 3 Wärtsilä 8L20 diesels; 2 shafts
Speed, knots: 13
Range, n miles: 5,250 at 12 kt
Complement: 18

Comment: New multifunction tender built by Stocznia Remontowa SA shipbuilders at Gdansk, Poland. Launched on 26 July 2006, she was named by The Queen on 17 October 2007. Design features include a large working deck area and a forward helicopter flight deck. She is equipped with a dynamic positioning system.

GALATEA 12/2008, *Maritime Photographic* / 1353514

ALERT

Displacement, tons: 325 full load
Dimensions, feet (metres): 128.9 x 26.2 x 7.8 (39.3 x 8.0 x 2.4)
Main machinery: 2 Caterpillar 3512 diesels; 4,023 hp (3 MW); 2 shafts; cp props; bow thruster
Speed, knots: 16
Range, n miles: 400 at 12 kt
Complement: 5

Comment: Rapid intervention vessel built by Stocznia Remontowa SA shipbuilders at Gdansk, Poland. Launched on 11 October 2006, she was delivered in 2006. In addition to maintaining aids to navigation, the vessel provides a fast response capability and the means to carry out emergency wreck marking and hydrographic survey services. Her primary areas of operation are the Dover Strait, English Channel and Southern North Sea. The ship is equipped with a dynamic positioning system.

ALERT 5/2006, *Mark Rayner* / 1167514

NORTHERN LIGHTHOUSE BOARD

Notes: The Northern Lighthouse Board (NLB) is the General Lighthouse Authority for Scotland and the Isle of Man. The Board provides Aids to Navigation (AtoN) including lighthouses, buoys and beacons and radio navigation aids. NLB is funded from the General Lighthouse Fund, which draws most of its income from the levy of light dues on commercial and fishing vessels calling at UK and Republic of Ireland ports. Operations are directed from its headquarters in Edinburgh.

PHAROS**Measurement, tons:** 3,672 grt**Dimensions, feet (metres):** 276.2 x 54.1 x 13.9 (84.2 x 16.5 x 4.25)**Main machinery:** Diesel-electric; 2 azimuth props; 2 bow thrusters**Speed, knots:** 13.5**Complement:** 18 (7 officers) plus accommodation for 12

Comment: The contract for the construction of a new multifunction tender was signed with Remontowa Shipyard, Gdansk, Poland on 11 November 2004. The ship was launched on 3 February 2006 and delivered in March 2007. *Pharos* the tenth NLB vessel to carry the name has replaced the former vessel now used as a fishery patrol vessel by the government of South Georgia. The new ship is fitted with dynamic positioning, a large aft working deck area, buoy and chain handling, towing, integrated bridge management system, full hydrographic survey suite and moon pool, helicopter deck and a 30-tonne crane.

MARITIME & COASTGUARD AGENCY

Notes: The Maritime & Coastguard Agency is responsible for the development, promotion and enforcement of high standards of marine safety, response to maritime emergencies 24 hours a day, reduction of the risk of pollution of the marine environment from ships and, where pollution occurs, minimisation of its impact on the United Kingdom.

Response to maritime emergencies within the UK SAR region is undertaken by HM Coastguard, the MCA's Counter-pollution Response Branch and firefighting teams from the Maritime Incident Response Group. SAR and counter pollution is co-ordinated through a network of 18 Maritime Rescue Co-ordination Centres (MRCCs). Each MRCC provides continuous emergency telephone, radio and satellite communications distress watch plus safety information and radio medical advice services. The counter-pollution branch provides response to marine pollution and provides scientific and technical advice on shoreline clean up.

The MCA provides four civilian SAR helicopters (Sikorsky S-92 and Agusta Westland 139) under contract from CHC Scotia. They are based at Sumburgh, Stornoway, Lee-on-Solent and Portland. Fixed-wing aircraft include a BN Islander which conducts surveillance patrols over the Dover Strait and forms part of the Channel Navigation Information Service while, for counter-pollution, a Cessna 404 and Cessna 406 are operated by the RVL Group of Coventry. Fitted with radar, IR and UV detection equipment. Additionally a Cessna 406 and two Lockheed Electra aircraft are available for dispersant spraying. Four emergency towing vessels for SAR, counter-pollution and salvage are under contract from Klyne Tugs Ltd: *Anglian Prince* (1,598 tons gwt), *Anglian Princess* and *Anglian Sovereign* (2,270 tons gwt) and *Anglian Monarch* (1,480 tons gwt). These are stationed in the Fair Isle, Minches, SW Approaches and Dover Strait areas.

HM Coastguard has its own corps of 3,500 volunteer Auxiliary Coastguards divided into 390 Coastguard Rescue Teams around the coast of UK. HM Coastguard also make significant use of Royal National Lifeboat Institution all-weather and inshore lifeboats and military SAR helicopters.

The MCA is also responsible for inspections and surveys of UK vessels, port state control inspections of non UK ships, the enforcement of merchant shipping legislation, the setting of ship and seafarer standards and maritime security.

United States

Country Overview

The United States of America is a federal republic which comprises 48 contiguous states (bounded to the north by Canada and to the south by Mexico) and the states of Alaska and Hawaii. External territories include Puerto Rico, American Samoa, Guam and the US Virgin Islands. With an area of 3,717,800 square miles, it occupies much of North America and has a coastline of 10,762 n miles with the Atlantic and Pacific Oceans and with the Gulf of Mexico. Washington, DC is the capital while New York, New York, is the largest city and a leading seaport. Other principal ports include New Orleans, Louisiana; Houston, Texas; Valdez, Alaska; Baton Rouge, Louisiana; Corpus Christi, Texas; Long Beach, California; Norfolk, Virginia; Tampa, Florida; Los Angeles, California; St Louis, Missouri; and Duluth, Wisconsin. There is an extensive inland waterway network, the three main components of which are the Mississippi river system (13,000 n miles long), the Great Lakes (ocean-going vessels can sail between the Great Lakes and the Atlantic Ocean via the St Lawrence Seaway (opened 1953)) and coastal waterways. Territorial seas (12 n miles) are claimed. A 200 n mile EEZ has been claimed but the limits have only been partly defined by boundary agreements.

Unified Combatant Commanders

Commander, US Strategic Command:
General Kevin P Chilton
Commander, US Pacific Command:
Admiral Timothy J Keating
Commander, US Joint Forces Command:
General James N Mattis
Commander, US European Command:
General Bentz J Craddock
Commander, US Northern Command:
General Gene Renuart
Commander, US Southern Command:
Admiral James G Stavridis
Commander, US Central Command:
General David H Petraeus
Commander, US Africa Command:
General William E Ward
Commander, US Special Operations Command:
Admiral Eric T Olson

Headquarters Appointments

Chief of Naval Operations:
Admiral Gary Roughead
Vice Chief of Naval Operations:
Admiral Patrick M Walsh
Director, Naval Nuclear Propulsion:
Admiral Kirkland J Donald
Chief of Naval Personnel:
Vice Admiral Mark E Ferguson III

Headquarters Appointments—continued

Commander, Naval Sea Systems Command:
Vice Admiral Kevin M McCoy
Commander, Naval Air Systems Command:
Vice Admiral David J Venlet
Commander, Space and Naval Warfare Systems Command:
Rear Admiral Michael C Bachman

Fleet Commanders

Commander, US Fleet Forces Command:
Admiral Jonathan W Greenert
Commander, US Pacific Fleet:
Admiral Robert F Willard
Commander, Allied Joint Forces Command, Naples, and US Naval Forces Europe:
Admiral Mark Fitzgerald
Commander, Military Sealift Command:
Rear Admiral Robert D Reilly, Jr

Flag Officers (Atlantic Area)

Commander, Second Fleet:
Vice Admiral Mel Williams Jr
Commander, Naval Surface Force, Atlantic Fleet:
Rear Admiral Kevin M Quinn
Commander, Sixth Fleet, Allied Joint Command Lisbon and Striking and Support Forces NATO:
Vice Admiral James A Winnefeld
Commander, Submarine Force Atlantic and Allied Submarine Command:
Vice Admiral John J Donnelly
Commander, Naval Air Force, Atlantic Fleet:
Rear Admiral Richard J O'Hanlon
Commander, Navy Region Europe and Maritime Air, Naples:
Rear Admiral David J Mercer
Commander, Naval Forces Southern Command and Fourth Fleet:
Rear Admiral Joseph D Kernan

Flag Officers (Pacific Area)

Commander, Seventh Fleet:
Vice Admiral John M Bird
Commander, Naval Surface Force, Pacific Fleet:
Vice Admiral Derwood C Curtis
Commander, Third Fleet:
Vice Admiral Samuel J Locklear III
Commander, Naval Air Forces and Naval Air Force, Pacific Fleet:
Vice Admiral Thomas J Kilcline
Commander, US Naval Forces, Japan:
Rear Admiral James D Kelly

Flag Officers (Pacific Area)—continued

Commander, Submarine Force, Pacific Fleet:
Rear Admiral Douglas J McAneeny
Commander, US Naval Forces, Korea:
Rear Admiral Thomas S Rowden
Commander, US Naval Forces, Marianas:
Rear Admiral William D French
Commander, Naval Mine and Anti-Submarine Warfare Command:
Rear Admiral Robert P Girner

Flag Officer (Central Area)

Commander, US Naval Forces, Central Command, and Fifth Fleet:
Vice Admiral William E Gortney

Marine Corps

Commandant:
General James T Conway
Assistant Commandant:
General James F Amos
Commander, US Marine Corps Forces Command:
Lieutenant General Richard F Natonski
Commander, US Marine Corps Forces Pacific:
Lieutenant General Keith J Stalder
Commander, Marine Forces Reserve and Commander Marine Forces North:
Lieutenant General Jack W Bergman
Commanding General I MEF and Commander US Marine Corps Forces Central Command:
Lieutenant General Samuel T Helland
Commanding General II MEF:
Lieutenant General Donnis Hejlik
Commanding General III MEF and Commander, Marine Corps Bases, Japan:
Lieutenant General Richard C Zilmer

CHAIN OF COMMAND

advised by the Chairman of the Joint Chiefs of Staff. The Unified Combatant Commanders are four-star officers who have broad geographic areas of functional responsibilities. Exercising Combatant Command (COCOM), they have authority to employ forces as necessary to accomplish assigned military missions and are as follows:

Commander US European Command (Stuttgart-Vaihingen, Germany)
 Commander US Africa Command (Stuttgart, Germany)
 Commander US Northern Command (Peterson AFB, Colorado)
 Commander US Pacific Command (Honolulu, Hawaii)
 Commander US Southern Command (Miami, Florida)
 Commander US Central Command (MacDill AFB, Florida)
 Commander US Joint Forces Command (Norfolk, Virginia)
 Commander US Special Operations Command (MacDill AFB, Florida)
 Commander US Transportation Command (Scott AFB, Illinois)
 Commander US Strategic Command (Offutt AFB, Nebraska)

The Unified Combatant Commanders may decide to exercise Operational (OPCON) command of naval forces directly. Alternatively, they may delegate such powers to another officer who might be a subordinate Unified Commander (for example Commander, US Forces Korea), a service component commander (Army, Navy, Air Force, Marine Corps and so on), a functional component commander (air, maritime, land, special forces), a joint task force commander or a single service force commander.

Africa Command (AFRICOM) was established in October 2007 as a sub-unified command subordinated to US European Command for a transition period of one year. It became a stand-alone unified command on 1 October 2008, with the commander reporting to the Secretary of Defense like other unified commanders. AFRICOM Headquarters is at Kelley Barracks in Stuttgart, Germany. Future arrangements will be considered in co-operation with partner nations and the African Union. Unlike traditional unified commands, AFRICOM focuses on war prevention rather than war-fighting. The aim is to work with African nations and organisations to build regional security and crisis-response capacity. AFRICOM has assumed control over existing US government programmes in Africa that had been administered by US Central, European and Pacific Commands. The US force presence in Africa includes 1,700 personnel at Camp Lemonnier in Djibouti. Military advisers assigned to US embassies and diplomatic missions help to co-ordinate peacekeeping training and other Defense Department programs in support of US foreign policy.

Navy force commanders have a dual chain of command. They report to the Chief of Naval Operations for administrative matters such as training and equipping of forces and are also responsible to the combatant commanders for providing forces to accomplish missions. They include the following:

Commander US Fleet Forces Command
 Commander US Pacific Fleet
 Commander US Naval Forces Europe
 Commander US Naval Forces Central Command
 Commander Navy Reserve Force
 Commander Military Sealift Command

Once deployed in theatre, naval forces are operationally assigned to three-star numbered fleet commanders:

Commander US Second Fleet (Atlantic)
 Commander US Third Fleet (Eastern Pacific)
 Commander US Fourth Fleet (Caribbean, Central and South America)
 Commander US Fifth Fleet (Arabian Gulf and Indian Ocean)
 Commander US Sixth Fleet (Mediterranean)
 Commander US Seventh Fleet (Western Pacific)

These arrangements are intended to provide a framework that provides a clear chain of command while retaining the flexibility to be adapted to the operational circumstances. For example, it is feasible for a multimission naval task group, such as a carrier strike group (CSG) (baseline composition: 1 CVN/CV, 2 CG/DDG, 1 DD/FFG, 1 SSN and 1 logistic support ship) or an expeditionary strike group (ESG) (baseline composition: 3 amphibious ships (LHD/LHA, LPD and LSD), 2 CG/DDG, 1 DD/FFG and 1 SSN) to support service, component, and other superior commanders simultaneously.

Tactical Command and Composite Warfare Commander

US naval task groups and forces operate under Composite Warfare Commander (CWC) doctrine. The officer in tactical command (OTC) is responsible for accomplishing the missions of his assigned forces. The CWC directs the force and controls warfare functions. The OTC may designate a subordinate commander as CWC but, in general practice, the roles are combined. The OTC/CWC is supported by Principal Warfare Commanders (PWC), Functional Warfare Commanders (FWC), Functional Warfare Commanders (PWC), Functional Warfare Commanders (FWC) and Coordinators.

PWCs include the Air Defense Commander (ADC), Strike Warfare Commander (STWC), Information Warfare Commander (IWC), Anti-submarine Warfare Commander (ASWC), and Surface Warfare Commander (SUWC). ASW and SLW areas can be combined under a Sea Combat Commander (SCC). PWCs collect and distribute information pertinent to their warfare areas and can be delegated authority to respond to threats with assigned assets.

FWCs perform duties of a scope or duration more limited than that of a PWC. Typical FWCs include Maritime Interception Operations Commander (MIOC), Mine Warfare Commander (MIWC), Operational Deception Group Commander, Screen Commander (SC) and Underway Replenishment Group (URG) Commander.

Coordinators are responsible to the OTC/CWC for managing assets and resources. Among assigned Coordinators are the Air Resource Element Coordinator (AREC), Air Control Authority (ACA), Cryptologic Resource Coordinator (CRC), Force Over-the-horizon Track Coordinator (FOTC), Force Track Coordinator (FTC), Helicopter Element Coordinator (HEC), Submarine Operations Coordinating Authority (SOCA), TLAM Launch Area Coordinator (LAC) and TLAM Strike Coordinator (TSC).

The OTC/CWC may activate any or all of these warfare commanders and coordinators as necessary. The guiding principle of CWC doctrine is flexibility to meet operational requirements.

Multinational Operations

US naval forces regularly participate in peacetime and wartime multinational operations. Although the President always retains command authority over US forces, he may place them under control of a foreign commander as required to achieve specific military objectives. Multinational operations may be conducted under the structure of a formal alliance (such as NATO) or of an ad hoc coalition (Operation Desert Shield/Desert Storm).

Complex Naval Task Forces

Complex Task Forces usually consist of multiple CSGs and/or ESGs and may also include naval assets of allied nations. Such forces may operate together under three generic command and control structures.

In Situation A, the forces integrate, the senior officer present becomes the overall OTC/CWC and a new single CWC organisation is established.

In Situation B, task groups do not integrate. The senior OTC/CWC coordinates the tactical operations of all naval forces and delegates responsibilities and TACON of specific forces to junior commanders as appropriate. The senior OTC/CWC may also designate junior commanders as sector OTC/CWCs.

In Situation C, each group retains its own OTC/CWC and its own set of warfare commanders and coordinators. The OTC/CWC of the supported force (or a common superior)

draws on the assets of the entire force to achieve joint and combined force objectives.

Amphibious Operations

'Commander Amphibious Task Force' (CATF) and 'Commander Landing Force' (CLF) are historic naval command terms whose functional responsibilities are recognised by Joint Doctrine. The common superior establishes command relationships between CATF and CLF who are considered coequal in planning. CATF is responsible for operations at sea while CLF dictates landing force objectives and landing and drop zones.

US Marine Corps Organisation

Marine Corps Structure

Title 10 directs that the Marine Corps is to consist of three divisions and three air wings with their necessary logistics support and that there is to be a similar organisation in the reserves consisting of one division, one air wing, and their respective logistical support groups. MEFs I (Camp Pendleton, CA), II (Camp Lejeune, NC) and III (Okinawa, Japan) are the three standing Marine Expeditionary Forces (MEFs).

The MEF is the USMC's principal war-fighting organisation. Commanded by a lieutenant general, it consists of 50-60,000 personnel and includes, typically, a division, air wing, Marine Logistics Group (MLG) and headquarters group. MEFs can conduct a broad scope of missions in any environment for 60 days and are supported by amphibious shipping and/or Maritime Prepositioning Squadrons (MPS). Because of its size, the MEF is normally committed sequentially, building on a smaller operational unit such as a Marine Expeditionary Brigade (MEB) or Marine Expeditionary Unit (MEU).

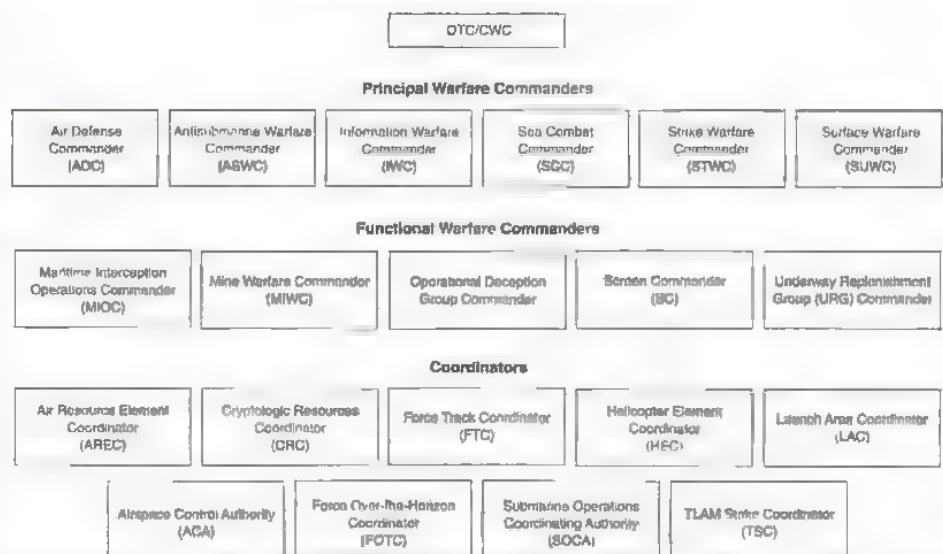

The MEB is designed as the lead element for a MEF or for small-scale contingencies. Command by a major general or brigadier, it consists of 14-18,000 Marine and Navy personnel and has thirty days sustainability. The ground combat element consists of an infantry regiment reinforced by artillery, some armour, light armoured vehicles, assault amphibian vehicles, and combat engineers. These assets can be divided into four battalion-size manoeuvre elements, supported by three to six fixed- and rotary-wing aircraft squadrons.

MEUs routinely forward deploy on Expeditionary Strike Groups (ESG). Commanded by a colonel, MEUs contain approximately 2,200 Marine and Navy personnel and can sustain operations for fifteen days. MEUs normally consist of a reinforced infantry Battalion Landing Team (BLT), a composite helicopter squadron (with air command and control and six Harriers), and a MEU Combat Logistics Battalion (CLB). Typically, such a force can act as the lead element for a larger force and/or provide shaping/engagement activities, deterrence, and limited power projection. It has the capability to conduct company to battalion-sized raids to the range limits of assigned helicopters, roughly 70-100 miles from the ESG. An ESG typically consists of 1 LHD/LHA, 1 LPD and 1 LSD.

Marine Corps Operations

Operations are conducted by Marine Air Ground Task Forces (MAGTFs) whose size and composition will be dictated by operational circumstances. A MAGTF can be established by drawing ground, aviation, and combat service support assets from divisions, air wings, and their support groups. At the lower end of the scale, MEUs are available as immediately responsive, sea-based MAGTFs while, on a much greater scale, a full MEF might be required. This might be based on one of the standing MEFs or, as in Operation Desert Shield/Desert Storm, drawn from all three standing MEFs. A MAGTF always consists of a Command Element (CE), Ground Combat Element (GCE), Aviation Combat Element (ACE) and a Combat Service Support Element (CSSE).

Composite Warfare Commander Structure

CWC STRUCTURE

0531963

Embarked MEU

Marine Corps amphibious forces embarked on ESGs come under the OPCON of the naval or maritime component commander. They remain under the naval or maritime component commander throughout an amphibious operation if they will re-embark. If they transition to sustained operations ashore, they chop to either the Marine component commander or the land component commander. A Marine Corps component commander may be designated as the joint force maritime, land, or air component commander.

Communications and Data Systems

Advanced Combat Direction System (ACDS)

ACDS is a centralized, automated command and control system. An upgrade from the Naval Tactical Data System (NTDS) for aircraft carriers and large-deck amphibious ships, it provides the capability to identify and classify targets, prioritize and conduct engagements, and exchange targeting information and engagement orders within the battle group and among different service components in the joint theatre of operations. ACDS is a core Sea Shield component of non-Aegis/non-SSDS combat systems.

ACDS consists of two variants. The ACDS Block 0 system replaces obsolete NTDS computers and display consoles and incorporates new software. ACDS Block 0 is deployed on five aircraft carriers, five Wasp (LHD-1) class amphibious assault ships, and all five Tarawa (LHA-1) class amphibious assault ships. ACDS Block 1 is installed in one ship: Wasp. Following the OPEVAL failure of ACDS Block 1, it is to be replaced by the Ship Self Defense System (SSDS).

AEGIS Combat System

The AEGIS system is designed as a total weapon system, from detection to kill in the air, surface and sub-surface domains.

The SPY-1 radar system is the primary air and surface radar for the Aegis Combat System installed in the *Ticonderoga* (CG-47) and Arleigh Burke (DDG-51) class warships. It is a multifunction, phased-array radar capable of search, automatic detection, transition to track, tracking of air and surface targets, and missile engagement support. The third variant of this radar, SPY-1D(V), the Littoral Warfare Radar, improves the radar's capability against low-altitude, reduced radar cross-section targets in heavy clutter environments, and in the presence of intense electronic countermeasures. The SPY-1 Series radars also demonstrated the capability to detect and track theatre ballistic missiles. AEGIS equipped platforms include Spanish F-100 and Japanese DDG ship classes.

Automated Digital Network System (ADNS)

The Automated Digital Network System is responsible for the transport of all Wide Area Network (WAN) Internet Protocol (IP) services which connect afloat units to various global shore sites. It provides ship and shore IP connectivity and promotes efficient use of available satellite and line of sight communications bandwidth. ADNS converges all voice, video, and data communications between ship and shore to an IP medium and takes advantage of all shipborne RF to transmit data efficiently. Specifically, it automates routing and switching of tactical and strategic C4I data via Transmission Control Protocol/Internet Protocol (TCP/IP) networks linking deployed battle group units with each other and with the Defense Information Systems Network (DISN) ashore. ADNS uses Commercial Off-the-Shelf (COTS) and Non-Developmental Item (NDI) Joint Tactical Architecture (JTA) - compliant hardware (routers, processors and switches), and commercial-compliant software in a standardised, scalable, shock-qualified rack design.

Challenge Athena (WSC-8)

Challenge Athena is part of the Navy commercial wideband satellite program (CWSP). It is a full-duplex, high data-rate communications link that operates in the C-band spectrum up to 2 048 Mbps. The Challenge Athena terminal (AN/WSC 8(V)1,2) with modifications by the developer/manufacturer is also capable of operating in the Ku-band spectrum. Because of open ocean limitations, there are currently no plans to enhance Navy's commercial satellite terminal to include Ku coverage. CWSP provides access to voice, video, data and imagery circuit requirements. It supports fleet commander flagships (LCC/AGF), aircraft carriers (CV/CVN), amphibious ships (LHA/LHD/LPD) and other selected ships, including hospital ships (T-AH) and submarine tenders (AS). Terminals are also installed at training locations in San Diego, California, and Norfolk, Virginia. Examples of communications circuits that are provided include, Joint Service Imagery Processing System-Navy/Concentrator Architecture (JSIPS-N/JCA), Naval and Joint Fires Network (JFN), Video Tele-Conferencing (VTC), Video Information Exchange system (VIXS), Video Tele-Medicine (VTM), Video Tele-Training (VTT), Afloat Personal Telephone Service (APTS), Automated Digital Network System (ADNS), Integrated Digital Switching Network (IDSN) for voice/telephone, Secret/Unclassified Internet Protocol Router Networks (SIPRNET/NIPRNET), and Joint Worldwide Intelligence Communications System (JWICS). The CWSP terminal uses commercial satellite connectivity and COTS/NDI equipment. In recent years, it has become an integral part of Navy's SATCOM architecture because of the overburdened military satellite communications systems.

Co-operative Engagement Capability (CEC)

Co-operative Engagement Capability (CEC) improves battle force air-defense capabilities by integrating the sensor data of each co-operating ship and aircraft into a single, real-time, fire-control-quality composite track picture. CEC also interfaces the weapons capabilities of each CEC equipped

ship in the battle group to integrate engagement capability. By simultaneously distributing sensor data on airborne threats to each ship within a battle group, CEC extends the range at which a ship can engage hostile missiles to well beyond the radar horizon, thereby improving area, local, and self-defense capabilities. Operating under the direction of a designated commander, CEC enables a strike group or joint task force to act as a single, geographically dispersed combat system to confront the evolving threat of anti-ship cruise missiles and theatre ballistic missiles. As of 2008, CEC is installed on seven aircraft carriers, *Nimitz*, *Eisenhower*, *John C Stennis*, *George Washington*, *Ronald Reagan*, *Carl Vinson* and *George H W Bush*; nine Aegis cruisers; 26 new construction destroyers; 10 amphibious ships and 21 E-2C Hawkeyes. CEC is planned for installation on CVN 68, CVN 21, CG 47, DDG 51, LHA 6 and DDG 1000 class ships, all E-2D Advanced Hawkeye aircraft, the US Army's Joint Land Attack Cruise Missile Defense Elevated Netted Sensor System (JLENS), and the US Marine Corps' Composite Tracking Network (CTN).

Distributed Common Ground System-Navy (DCGS-N)

DCGS-N Increment One is the Navy component of the Department of Defense (DoD) DCGS family of systems. DCGS-N provides integration of intelligence, surveillance, reconnaissance, and targeting (ISR&T) capabilities. Increment One will include: the Global Command and Control System-Joint Integrated Imagery and Intelligence (GCCS-I3) for intelligence analysis and processing tools and capabilities; GALE Lite (Generic Area Limitation Environment) for SIGINT analysis; Common Geopositioning Services (CGS) for imagery processing and exploitation, as well as aim-point measurement in support of precision guided and coordinate seeking weapons; implementation of the DCGS Integration Backbone (DIB) for sharing intelligence within the DCGS family of systems; use of Net Centric Enterprise Services (NCEs) standards to enhance interoperability and expose ISR data to the wider DoD audience; and exchange of ISR&T and Command and Control (C²) track information with the fielded GCCS family of systems. DCGS-N will migrate to a Common Computing Environment (CCE) construct in alignment with the Integrated Shipboard Network System (ISNS)/SC Networks/Consolidated Afloat Networks and Enterprise Services (CANES) concept starting in FY14 with DCGS-N Increment Two. DCGS-N Increment One (Block One) will undergo an afloat operational evaluation (OPEVAL) in late 2009, with Initial Operational Capability (IOC) in 2010. DCGS-N Increment One will replace the JSIPS-N systems and will be fielded to all aircraft carriers, amphibious assault ships (LHA/LHD), fleet command ships (LCC), and to select shore ISR&T reach back sites.

Global Broadcast Service (GBS)

The Global Broadcast Service augments and interfaces with other systems to provide virtual two-way Internet Protocol (IP) networked communications to deliver a continuous, high-speed, one-way flow of high-volume information broadcast to support: routine operations, training and military exercises, special activities, crisis, situational awareness, weapons targeting, intelligence, and the transition to and conduct of operations short of nuclear war. Homeland defensive operations are supported by a requirement for continental US coverage, which also provides exercise support, training and work-ups for deployment. GBS also supports military operations with US allies or coalition forces. GBS is an information technologies, mission-essential, national security system providing network-centric warfare communications, but does not incorporate nuclear survivability and hardening features. GBS provides a limited anti-jam capability and this may become a required capability in future. GBS will provide the capability to disseminate quickly large information products to various joint and small user platforms. With increased capacity, faster delivery of data, and near real-time receipt of imagery and data to the warfighter, it will reduce reliance on current MILSATCOM systems.

Global Command and Control System (GCCS)

GCCS is a comprehensive, worldwide network-centric system which provides the National Command Authority (NCA), Joint Chiefs of Staff, combatant and functional unified commands, Services, Defense Agencies, Joint Task Forces and their Service components, and others with information processing and dissemination capabilities necessary to conduct Command and Control (C²) of forces. GCCS is a means to implement the Command, Control, Communications, Computers, and Intelligence for the Warrior (C² IFTW) concept. GCCS provides the operational commanders with a near-realtime Common Operational Picture, intelligence information, collaborative joint operational planning and execution tools, and other information necessary for the execution of joint operations.

Global Command and Control System (Maritime) (GCCS-M) (ex-JMCCS)

GCCS-Maritime (GCCS-M) (formerly the Joint Maritime Command Information System (JMCCS)) is the designated command and control (C²) migration system for the Navy and is the naval implementation of the Global Command and Control System (GCCS). The evolutionary integration of previous C² and intelligence systems, GCCS-M supports multiple warfighting and intelligence missions for commanders at every echelon, in all afloat, ashore, and tactical naval environments, and for joint, coalition, and allied forces. GCCS-M meets the joint and service requirements for a single, integrated, scalable Command and Control (C²) system that receives, displays, correlates, fuses, and maintains geo-locational track information on friendly, hostile, and neutral land, sea, and air forces and integrates it with available intelligence and environmental information. GCCS-M supports evolving concepts for

Network-Centric Operations by receiving, displaying, correlating, fusing, and integrating all available track, intelligence and imagery information for the warfighter. More than 56 joint and Naval systems are interfaced with GCCS-M to exchange data and support warfighter capabilities in 14 mission areas. Key capabilities include:

- Multisource information management
- Display and dissemination through extensive communications interfaces
- Multisource data fusion and analysis/decision making tools
- Force co-ordination

GCCS-M is implemented afloat (capabilities formerly met by the Navy Tactical Command System-Afloat (NTCS-A) and Joint Maritime Command Information System (JMCCS) Afloat), at ashore fixed command centers (capabilities formerly met by the Operational Support System (OSS) and JMCCS Ashore), and as the command and control (C²) portion of mobile command centers (known as Tactical Support Center (TSC) and Tactical-Mobile).

GCCS-M Version 4.1 will begin fielding in 2010. By using GCCS-Joint as its baseline, it will bring enhanced levels of interoperability with other GCCS-Joint based applications such as the Distributed Common Ground System family of systems. In addition to various other new capabilities, GCCS-M 4.1 will increase track capacity to 100,000 and Ballistic Missile Defense planning.

Integrated Broadcast Service/Joint Tactical Terminal (IBS/JTT)

The Integrated Broadcast Service (IBS) is a system-of-systems that will migrate the Tactical Receive Equipment and Related Applications Data Dissemination System (TRDDS), Tactical Information Broadcast Service (TIBS), Tactical Reconnaissance Intelligence Exchange System (TRIXS), and Near Real-Time Dissemination (NRTD) system into an integrated service with a common format. The IBS will send data via communications paths, such as UHF, SHF, EHF, GBS, and via networks. This program supports Indications Warning (I&W), surveillance, and targeting data requirements of tactical and operational commanders and targeting staffs across all warfare areas. It comprises broadcast-generation and transceiver equipment that provides intelligence data to tactical users. The Joint Tactical Terminal (JTT) will receive, decrypt, process, format, distribute, and transmit tactical data according to preset user-defined criteria across open-architecture equipment. JTT will be modular and will have the capability to receive all current tactical intelligence broadcasts (TDDS, TADIXS B, TIBS, and TRIXS). JTT will also be interoperable with the follow-on IBS UHF broadcasts. However, the current JTT form factor does not meet space and weight constraints for a majority of the Navy and Air Force airborne platforms. Therefore, to ensure joint interoperability, the Navy and Air Force are pursuing a Special Operations Command designed Embedded National Tactical Receiver (ENTR) for airborne platforms.

Integrated Radar Optical Surveillance and Sighting System (IROSS)

IROSS is the Situational Awareness component of the Shipboard Protection System (SPS) Increment one. It employs COTS-based/Open Architecture products, and its key components include SPS-73 or equivalent surface search radar, electro-optical/infrared devices, an integrated surveillance system, spotlights, long range acoustic devices, and remotely operated stabilised small arms mounts. SPS Increment 1 is designed to detect, classify and engage real-time asymmetric threats at close-range to ships in port, at anchor and while transiting choke points or operating in restricted waters. The system provides 360° Situational Awareness (SA) and employs COTS integration to support incremental modifications as needed to tailor the system to the mission. The system has undergone extensive testing in the laboratory and a prototype is being tested at sea in *Ramage*. The system is scheduled to be installed in most ship classes including surface combatants, patrol boats, amphibious and auxiliary ships, and Coast Guard cutters.

Joint Service Imagery Processing System (JSIPS-N)

JSIPS-N provides a digital imagery processing and management system, with the capability to task, process, exploit, and disseminate imagery, imagery-derived products, and imagery intelligence (IMINT) based on National, theatre, and tactical sensors. As a primary mission, JSIPS-N assists strike planners, tactical aviators, and USMC amphibious planners in the delivery of precision ordnance. JSIPS-N is installed on aircraft carriers (CVN), amphibious assault ships (LHA/LHD), fleet command ships (LCC), and at selected shore sites. A Service Life Extension Program (SLEP) is underway (JSIPS-N 6.0). The JSIPS-N SLEP is comprised of four subsystems: Common Geopositioning Services (CGS); Image Product Library (IPL), Imagery Exploitation Support System (IESS) Client; and the VANTAGE Shared Airborne Reconnaissance Pod (SHARP) processing and exploitation capability. The JSIPS-N system will be replaced on a one-for-one basis by the Distributed Common Ground System-Navy (DCGS-N), Increment One, Block One starting in FY09.

Joint Surveillance Target Attack Radar System (JSTARS)

JSTARS is described as a 'bulletproof anti-jam datalink', utilizing omnidirectional broadcast on UHF SATCOM. It receives and transmits real time MT/FTI/SAR data via a secure uplink and downlink. It is used to demonstrate 'sensor to shooter' technology.

Joint Tactical Information Distribution System (JTIDS)

A joint program directed by the Office of the Secretary of Defense, JTIDS is a digital information-distribution

system which provides rapid, crypto-secure, jam-resistant (frequency-hopping), and low-probability-of-exploitation tactical data and voice communication at a high data rate to Navy tactical aircraft and ships and Marine Corps units. JTIDS also provides capabilities for common-grid navigation and automatic communications relay. It has been integrated into numerous platforms and systems, including US Navy aircraft carriers, cruisers, destroyers, amphibious assault ships, E-2C Hawkeye aircraft and EP-3 Aries aircraft; US Air Force Airborne Warning and Command System (AWACS) aircraft; and US Marine Corps Tactical Air Operations Centers (TAOCs) and Tactical Air Command Centers (TACCs). Foreign country participants include Australia, Canada, France, Germany, Japan, NATO, Saudi Arabia and the United Kingdom. Additionally, JTIDS has been identified as the preferred communications link for Theatre Ballistic Missile Defense programs. JTIDS is the first implementation of the Link-16 Joint Message Standard (J - aeries) and provides the single, near real-time, joint datalink network for information exchange among joint and combined forces for command and control of tactical operations.

Land Attack Warfare System (LAWS)

This prototype system networks all shooters (tactical air, shore artillery and seaborne fire support) into a Battle Local Area Network (Battle LAN) known as the 'Ring of Fire'. This automatically assigns fire missions to the most capable unit in the Battle LAN. LAWS controls preplanned missions, including Tomahawk, as well as time critical calls for fire from land forces. Fleet Battle Experiment ALFA was the initial test of this system.

Mark XIIA Identification Friend or Foe (IFF) Mode 5

IFF provides positive friendly identification to improve mission effectiveness, increase situational awareness, and minimise likelihood of fratricide. It supports Common Operational and Tactical Pictures. The Mark XIIA system adds Mode 5 to the existing modes included in the Mark XII system. Mode 5 is an ACAT II program that achieved Milestone 'C' in July 2006. It is being fielded as an Engineering Change Proposal to existing IFF digital interrogators and transponders aboard selected Navy USMC and Coast Guard aircraft, surface, and subsurface units. Other Services and some NATO nations are also fielding IFF Mode 5 capability.

Miniature Demand Assigned Multiple Access (Mini-DAMA)

Mini-DAMA is a communications system that supports the exchange of secure and non-secure Battle Group coordination data, tactical data and voice between base band processing equipment over UHF SATCOM, 25/5 kHz DAMA, 25/5 kHz Non-DAMA, and UHF LOS. The Navy has completed installations for submarines and Arleigh Burke destroyers AV(2), mine warfare ships V(2) and aircraft V(3). Aircraft installations V(2) continue. These Mini-DAMA radio installations provide the channel utilisation efficiency by employing Time Division Multiple Access (TDMA) methods that have been achieved for surface warfare ships and shore stations equipped with the larger version TD-1271 DAMA multiplexer.

Mission Data System (MDS)

This system allows planners to view Tomahawk Land Attack Missile information. MDS receives via TADIXS A or OTICXS I digital Mission Data Updates (MDUs) from the Cruise Missile Support Activity (CMSA) and stores preplanned TLAM strike plans. Initial TLAM mission data fill is distributed via magnetic tape media provided by the CMSA.

Multifunctional Information Distribution - Low Volume Terminal (MIDS-LVT)

MIDS-LVT is a multinational co-operative development program to design, develop, and produce a tactical information distribution system equivalent in capability to Joint Tactical Information Distribution System (JTIDS), but in a low-volume, lightweight, compact terminal designed for fighter aircraft with applications in helicopters, ships, and ground sites. The United States is the MIDS LVT program leader with France, Germany, Italy and Spain entering into a European partnership, called EUROMIDS. US Navy procurement is targeted for F/A-18 Hornet aircraft as the lead aviation platform and surface craft. MIDS-LVT is a pre-programmed product improvement (P3I) for JTIDS Class 2 Terminal and provides identical capabilities at a reduced size and weight. MIDS-LVT employs the Link-16 (TADIL-J) message standard of US Navy/NATO publications. MIDS-LVT is fully interoperable with JTIDS and was designed in response to current aircraft, surface ship, submarine, and ground-host volume and weight constraints. The solution variants-MIDS-LVT (1), MIDS-LVT (2), and MIDS-LVT (3) - support US Navy, US Marine Corps, and US Air Force aircraft; US Navy ships, US Army Patriot, THAAD, MEADS and ground-based defense systems; USAF and USMC ground-based Command and Control platforms; and potentially other tactical aircraft and ground-based systems. The MIDS-LVT (1) variant will be used in the MIDS on Ship (MOS) program providing the Link 16 capability to new-construction surface warships.

NATO Improved Link Eleven (NILE) Program

This program, known as either NILE or Link 22, fulfills a North Atlantic Treaty Organization (NATO) Operational Staff Requirement to develop a digital datalink with the aim of increasing the timeliness of the tactical information transfer over in a dense and hostile communications threat environment. The system is capable of using both fixed frequency and frequency hopping waveforms in both the Ultra High Frequency (UHF) and High Frequency (HF) bands. While designed to replace Link 11 on these media, and to provide a more robust Tactical Beyond Line of Sight capability, the Link 22 message set is designed to be more aligned with and to complement Link 16, easing multilink operations. Modern automated Network Management capabilities minimise the pre-planning requirements associated with Link 16 Networks. Link 22 has been developed to fulfil the operational requirement to exchange tactical data between tactical data systems (including operators) and to exchange necessary network management data. Link 22 incorporates F-series and J-series message standards (formats and protocols), a Time Division Multiple Access (TDMA) architecture, specific communications media and protocols, and specific procedures.

Ship Self-Defense System (SSDS) Mk 1 and 2

SSDS provides the integrated combat system for aircraft carriers and amphibious ships, enabling them to keep pace with the Anti-Ship Cruise Missile (ASCM) threat. Moving toward an open-architecture distributed-processing system, SSDS integrates the detection and engagement elements of the combat system. With automated weapons control doctrine, Cooperative Engagement Capability (CEC), and enhanced battlespace awareness, SSDS provides these ships with a robust self-defense capability in support of Sea Shield.

SSDS Mk 1 provides doctrine-based, Quick Reaction Combat Capability (QRCC), plus automated detect through multi-threat engagement capability. It enhances capabilities

for Force Protection using own-ship and remote data in support of AAW capstone requirements.

SSOS Mk 2 integrates with Co-operative Engagement Capability (CEC) and provides the QRCC of SSDS Mk 1 and selected features of the Advanced Combat Direction System (ACDS) to support multi-warfare area capability, improve joint interoperability and provide an integrated, coherent real-time command and control system for CVN, LPD and LHD class ships. SSDS Mk 1 has been installed in 12 LSDs; and SSDS Mk 2 in seven CVNs (CVN 68, 69, 70, 73, 74, 76, 77) and 10 LPDs (LPD 17, 18, 19, 20, 21, 22, 23, 24, 25, 26) and two LHDs (LHD 7, 8). An open-architecture version of Mk 2, similar to DDG 1000 OA, was installed on CVN 68.

Theatre Battle Management Core System (TBMCS)

TBMCS replaces the Contingency Theatre Automated Planning System (CTAPS) as the only command and control system authorised to produce the Air-Tasking Order (ATO). TBMCS has the capability to plan and execute air operations in any theatre of operations and is considered the core system for the Air Force's Air Operation Center (AOC). All services use TBMCS and, within the USN, it is installed in carriers, command ships and large-deck amphibious ships (LHA/LHD) and the Maritime Operations Centers.

Trusted Information Systems (TIS)

The Multi-Level Security (MLS) capabilities of the Navy's Ocean Surveillance Information System (OSIS) and Radiant Mercury are complementary systems which have been combined into a single TIS programme. The aim is to facilitate development and expansion of a Commander's capability automatically to exchange critical intelligence and operational information with all forces whether US, allied, or coalition.

The OSIS Evolutionary Development (OED) system is DoD's only PL-4 accredited C4I processing and dissemination system. It serves as the backbone automated information system supporting the Common Operational Picture (COP) at US and allied Joint Intelligence Centers (JICs). OED receives, processes, and disseminates timely all-source surveillance information on fixed and mobile targets of interest, both afloat and ashore, within an MLS environment. OED permits operators to collaborate in multiple domains, monitor, analyse, and support multiple views of the battle space corresponding to multiple security classification levels. Its robust correlation and communications subsystems ensure extremely rapid delivery of both record message traffic and intelligence broadcasts in support of the Unified Combatant Commanders, Joint Task Force commanders, individual units, and allies. The MLS capabilities in OED are certified and accredited to support compartmented multilevel networks at the SCI level and are envisioned to serve as the core technology upon which future Navy networks and databases running at multiple classification levels can be effectively combined to allow appropriately cleared operators access to information from a single workstation.

Radiant Mercury (RM) provides the accredited capability to automatically sanitise, transiterate, and downgrade classified, formatted information to users at lower classification levels. RM helps ensure critical indications and warning intelligence is provided quickly to operational decision makers at various security and releasability levels. RM is currently fielded on Force Level ships bridging data transfer between SCI GCCS-M and GENSER GCCS-M. RM also serves as a sanitiser within OED Radiant Mercury Imagery Guard (RMIG) combines a digital signature process with RM allowing the networked transfer of imagery between security domains.

Major commercial shipyards

Shipbuilders

Austal USA, Mobile, Alabama
General Dynamics Corporation, Bath Iron Works, Bath, Maine
General Dynamics Corporation, Electric Boat, Groton, Connecticut
General Dynamics Corporation, National Steel and Shipbuilding Company, San Diego, California
Marinette Marine Corporation, Marinette, Wisconsin
Northrop Grumman Shipbuilding, New Orleans, Louisiana
Northrop Grumman Shipbuilding, Pascagoula, Mississippi
Northrop Grumman Shipbuilding, Newport News, Virginia.

Ship Repairers

Al Larson Boat Shop, Terminal Island, California
Newport Shipyard Newport, Rhode Island

Atlantic Dry Dock Corp., Jacksonville, Florida
Atlantic Marine, Inc, Jacksonville, Florida
Atlantic Marine, Inc, Mobile, Alabama
BAE Systems San Francisco Ship Repair, San Francisco, California
BAE Systems Norfolk Ship Repair, Norfolk, Virginia
BAE Systems San Diego Ship Repair, San Diego, California
BAE Systems Hawaii Shipyards, Inc., Honolulu, Hawaii
Bay Ship & Yacht Co., Alameda, California
Bender Shipbuilding & Repair Co., Inc, Mobile, Alabama
Cascazo General Inc, Portland, Oregon
Colonna's Shipyard, Inc, Norfolk, Virginia
Detyens Shipyards, Inc, Charleston, South Carolina
Earl Industries, LLC, Portsmouth, Virginia
Intermarine USA, Savannah, Georgia
Lake Union Drydock Co., Seattle, Washington
Marine Hydraulics International Inc, Norfolk, Virginia
Metal Trades, Inc, Hollywood, South Carolina

Metro Machine Corp., Norfolk, Virginia
North Florida Shipyards, Inc, Jacksonville, Florida
Northrop Grumman Continental Maritime of San Diego, Inc., California
Pacific Ship Repair & Fabrication, San Diego, California.
Tampa Ship, LLC, Tampa, Florida
Technico Corporation, Chesapeake, Virginia
Todd Pacific Shipyards Corp., Seattle, Washington
VT Hatter Marine Inc, Gulfport, Mississippi.

Notes: All the yards mentioned have been involved in naval shipbuilding, overhaul, or modernisation. General Dynamics/Electric Boat yard is engaged only in submarine work and Newport News is the only US shipyard capable of building nuclear-powered aircraft carriers.

Major Warships Taken Out of Service 2006 to mid-2009

Submarines

2006 *Honolulu*
2007 *Hyman G Rickover, Minneapolis-Saint Paul*
2008 *Augusta*

Aircraft Carriers

2007 *John F Kennedy*
2009 *Kitty Hawk*

Command Ships

2006 *Coronado*

Amphibious Forces

2006 *Austin, Tranton* (to India)
2007 *Saipan, Shreveport, Ogden*
2008 *Tarawa, Juneau*

Mine Warfare Ships

2006 *Osprey, Robin, Oriola* (to Taiwan), *Falcon* (to Taiwan)
2007 *Heron and Pelican* (to Greece), *Cardinal* and *Raven* (to Egypt), *Cormorant, Black Hawk, Shrike, Kingfisher*

Auxiliaries

2006 *Camden*
2008 *Kilauea, Niagara Falls, Spica*

Special Mission Ships

2008 *Hayes*

SUBMARINES

Notes: (1) **Deep submergence vehicles:** The Deep Submergence Vehicles (DSV) are listed following the 'Research Ships' section.

(2) **Seal Delivery Vehicles (SDVs):** There are 10 Mk VIII Mod 1 six-man mini wet submersibles in service for naval commando units. These SDVs can be carried by suitably modified SSNs and SSGN. Range 35 n miles at up to

150 ft. All have undergone SLEP from 1995 to improve performance. Attempts to introduce a more capable design, ASDS, were abandoned in 2008 and a Request for Information for a new class of submarine-launched Joint Multi-Mission Submarine (JMMS) was issued on 30 December 2008. A class of three units is to enter service from 2016.

(3) **Unmanned Undersea Vehicles (UUVs):** Torpedo-sized and larger unmanned undersea vehicles are under development. Potential applications include underwater surveillance, mine-countermeasures and anti-submarine warfare. Early experience was gained with the Mine Search System (MSS), operational testing of which was completed in 1993. The 35 ft long vehicle had a titanium hull and demonstrated the performance of mine detection sonars and the ability of a UUV to survey designated areas with precise navigation. Further proof-of-concept experience was gained with the Long-Term Mine Reconnaissance System (LMRS) which was designed to be launched from the 21 in torpedo tubes of an SSN. An engineering development system was delivered in 2002 but the programme was discontinued in favour of development of a modular UUV in which payloads can be swapped. This concept is to be demonstrated in the experimental Advanced Development UUV (ADUUV). In late 2008, the Navy cancelled phase 1 of the Mission-Reconfigurable UUV (MRUUV) due to "technical and engineering limitations". The vehicle had been scheduled to enter service in 2016. Development of a large diameter UUV continued. In October 2007, the first successful end-to-end submerged operation of two UUVs was demonstrated in SSN 768 *Hartford*. Further ahead, MRUUVs of larger size and longer endurance might be developed for launch from submarines and surface ships. Surface ship near-term programmes include the Battlespace Preparation Autonomous Underwater Vehicle, to be deployed in the Littoral Combat Ship, and the Surface Mine Countermeasures UUV.

SDV Mk VIII

10/1997, A McKaskle, USN / 0053312

Strategic Missile Submarines (SSBN)

Notes. The Trident missile fitted SSBN force provides the principal US strategic deterrent under the control of US Strategic Command at Offutt Air Force Base, Nebraska. The Strategic Arms Reduction Treaty (START), implemented in December 2001, limits the combined number of SLBM and ICBM re-entry bodies (RBs) to 4,900. Although there

may be further bi-lateral agreements with Russia to update verification regimes, the Bush administration has decided to pursue long-term strategic nuclear force reductions without further detailed arms control negotiations. The START II treaty has thus been overtaken. As part of the reduction, the first four Ohio class submarines are no

longer required for strategic service. These boats have been converted into conventionally-armed guided missile SSGNs, capable also of deploying Special Forces. Although the missile tubes on SSGNs will not contain SLBMs, they will continue to count against START treaty limits.

14 OHIO CLASS (SSBN)

LOUISIANA	SSBN 743	General Dynamics (Electric Boat Div)	27 July 1996	6 Sep 1997	PA

Displacement, tons: 16,764 surfaced; 18,750 dived
Dimensions, feet (metres): 560 x 42 x 36.4
(170.7 x 12.8 x 11.1)

Main machinery: Nuclear; 1 GE PWR S8G; 2 turbines; 60,000 hp (44.8 MW); 1 shaft; 1 Magnetek auxiliary prop motor; 325 hp (242 kW)

Speed, knots: 24 dived
Complement: 155 (15 officers)

Missiles: SLBM: 24 Lockheed Trident II; stellar inertial guidance to 12,000 km (6,500 n miles); thermonuclear warheads of up to 12 MIRVs of either Mk 4 with W76 of 100 kT each, or Mk 5 with W88 of 300-475 kT each, CEP 90 m. A limit of 8 RVs was set in 1991 under the START counting rules.

Torpedoes: 4—21 in (533 mm) Mk 68 bow tubes. Raytheon Mk 48 ADCAP Mod 5/6/7; wire-guided (option); active/passive homing to 50 km (27 n miles)/38 km (21 n miles) at 40/55 kt; warhead 267 kg, depth to 800 m (2,950 ft).

Countermeasures: Decoys: External and internal (reloadable) anti-torpedo decoy.

ESM WLR-8(V)5; intercept. WLR-10; radar warning.

Combat data systems: DWS-118 and CCS Mk 2 Mod 3 with UYK 43/UYK 44 computers.

Weapons control: Mk 98 fire-control system.

Radars: Surface search/navigation/fire control. AN/BPS-15J and AN/BPS-16(V)2, I/J-band

Sonars: IBM BQQ-6; passive search.

Raytheon BQS 13; spherical array for BQQ-6. Ametek BQS-15; active/passive for close contacts; high frequency.

Western Electric BQR-15 (with BQQ-9 signal processor); TB-16 passive towed array, TB-23 thin line array.

Raytheon BQR-19; active for navigation; high frequency.

Programmes: The size of the SSBN forces has been reduced to 14 hulls. *Ohio* completed conversion to SSGN in 2005. *Florida* and *Michigan* in 2006 and *Georgia* in 2007

Modernisation: All Ohio class SSBNs have been converted to deploy Trident II missiles. Ohio class SSBNs are being upgraded with ARCI (Acoustic Rapid COTS Insertion) sonar and CCS Mk 2 Block 1C fire-control systems. Installation in *Alaska*, *Nevada*, *Pennsylvania*, *West*

Virginia, *Maryland*, *Kentucky*, *Alabama*, *Rhode Island*, *Henry M Jackson* and *Nebraska* is complete and is scheduled to be completed in *Tennessee* and *Maine* in 2009.

Structure: The size of the Trident submarine is dictated primarily by the 24 vertically launched Trident missiles and the reactor plant to drive the ship. The reactor has a nuclear core life of about 20 years between refuellings. Diving depth is 244 m (800 ft). Kollmorgen Type 152 and Type 82 periscopes. Mk 19 Air Turbine Pump for torpedo discharge.

Operational: The eight Pacific Fleet units are based at Bangor, Washington, while the six Atlantic Fleet units are based at King's Bay, Georgia. SSBNs 741 and 743 transferred to Bangor on 1 October 2005. In the current state of worldwide tensions, a modified alert status has been implemented. Single crews were considered but rejected. Hull life of the class has been extended.

Cruise Missile Submarines (SSGN)

4 OHIO CLASS (SSGN)

Name	No	Builders	Launched	Commissioned	F/S
OHIO	SSGN 726 (ex-SSBN 726)	General Dynamics (Electric Boat Div)	7 Apr 1979	11 Nov 1981	PA
MICHIGAN	SSGN 727 (ex-SSBN 727)	General Dynamics (Electric Boat Div)	26 Apr 1980	11 Sep 1982	PA
FLORIDA	SSGN 728 (ex-SSBN 728)	General Dynamics (Electric Boat Div)	14 Nov 1981	18 June 1983	AA
GEORGIA	SSGN 729 (ex-SSBN 729)	General Dynamics (Electric Boat Div)	6 Nov 1982	11 Feb 1984	AA

Displacement, tons: 16,764 surfaced; 18,750 dived
Dimensions, feet (metres): 580 × 42 × 36.4
 (170.7 × 12.8 × 11.1)

Main machinery: Nuclear; 1 GE PWR S8G; 2 turbines, 60,000 hp (44.8 MW); 1 shaft; 1 Magnetek auxiliary prop motor; 325 hp (242 kW)

Speed, knots: 25

Complement: 155 (15 officers)

Missiles: SLCM Up to 154 Raytheon Tomahawk Block III and Block IV; TERCOM and GPS aided inertial navigation system with DSMAC to 1,600+ km (865+ n miles) at 0.7 Mach; warhead (WDU 36B) 454 kg.

Torpedoes: 4–21 in (533 mm) Mk 68 bow tubes. Raytheon Mk 48 ADCAP Mod 5/6/7; wire-guided (option), active/passive homing to 50 km (27 n miles)/38 km (21 n miles) at 40/55 kt; warhead 267 kg, depth to 800 m (2,950 ft).

Countermeasures: Decoys: 8 launchers for Countermeasures Set Acoustic (CSA) and internal (reloadable) anti-torpedo decoy system.

ESM: BLC-10; radar and comms intercept and analysis

Combat data systems: AN/BYG-1 Combat Control System.

Weapons control: AN/BYG-1.

Radars: Surface search/navigation/fire control AN/BPS 15J; IJ-band

Sonars: Lockheed Martin AN/BQQ-10 suite. AN/BQQ-6; passive search (spherical array) TB-23; passive towed array (thin line). TB-16; passive towed array (fat line).

Programmes: The 1994 nuclear posture review recommended a 14-SSBN force and that the remaining four Ohio class be converted to SSGN role. The SSGN would include land attack, special forces insertion and support and ISR roles. Conversion contract with General Dynamics Electric Boat in October 2002. *Ohio* started mid-life refuelling on 15 November 2002 and conversion work (at Puget Sound Naval Shipyard) on 19 November 2003. She completed conversion in December 2005. *Florida* started mid-life refuelling in August 2003 and conversion work (at Norfolk Naval Shipyard) in April 2004. She completed conversion in April 2006. *Michigan* started refuelling in March 2004 and conversion work (at Puget Sound) in January 2005. She completed conversion in November 2006. *Georgia* started refuelling in March 2005 and started conversion (at Norfolk) in October 2005. She completed conversion in November 2007.

Modernisation: Conversion work allows SSGN to carry up to 154 Tomahawk or Tactical Tomahawk missiles by enabling seven cruise missiles to be fired from each of 22 of the

current 24 Trident missile tubes. Eight of these tubes are interchangeable with Special Forces stowage canisters. The remaining two tubes are permanently configured for wet/dry launch of up to 66 special operations forces. The combat system is also to be upgraded and future payloads are being developed to augment the baseline configuration. SSGNs have been upgraded with Acoustic Rapid COTS Insertion (ARCI) sonar system.

Structure: The size of the submarine was dictated primarily by the 24 missile tubes and the reactor plant to drive the ship. The reactor has a nuclear core life of about 20 years between refuellings. Diving depth is 244 m (800 ft). Type BJ periscope and Integrated Submarine Imaging System (ISIS), Mk 19 Air Turbine Pump for torpedo discharge.

Operational: *Georgia* played the part of an SSGN during Exercise 'Silent Hammer' in 2004. This tested procedures for strikes against time-critical targets and use of special operations forces. An onboard battle-centre tested communications and networking required to support them. All boats returned to the fleet by 2007. *Ohio* and *Michigan* are based at Bangor, WA, and *Florida* and *Georgia* are based at King's Bay, GA. During her year-long maiden deployment, which began in October 2007, *Ohio* swapped crew several times. *Ohio* based at Guam when forward deployed.

Torpedoes: 4-21 in (533 mm) bow tubes. Raytheon Mk 48 ADCAP Mod 5/6/7; wire-guided (option); active/passive homing to 50 km (27 n miles)/38 km (21 n miles) at 40/55 kt; warhead 267 kg; depth to 800 m (2,950 ft). Air turbine pump discharge. Total of 38 including SLCM and torpedoes.

Mines: Can lay Mk 67 Mobile and Mk 60 Captor mines (until new mines are available)

Countermeasures: Decoys. External and internal (reloadable); anti-torpedo decoy.

ESM: AN/BLQ-10; radar and comms intercept and analysis.

Combat data systems: AN/BYG-1.

Radars: Surface search/navigation/fire control: AN/BPS 16(V)4, I/J-band.

Sonars: Lockheed Martin BQQ-10 sonar suite including bow spherical active/passive array; BQG-5A wide aperture flank passive arrays, high-frequency active keel and fin arrays; TB-16 and TB-29(A) towed arrays; WLY-1 acoustic intercept

Programmes: In February 1997, a teaming agreement was reached between Electric Boat Division of General Dynamics Corporation and Newport News Shipbuilding (now Northrop Grumman Newport News) jointly to build and deliver the Virginia class. Electric Boat is the lead design yard and prime contractor and delivers the even numbered hulls. Newport News delivers the odd numbered hulls. Construction of sub-assemblies is undertaken at the Electric Boat facilities in Groton, CT, at Quonset Point RI and at Northrop Grumman Newport News. Components are then shipped either to the Groton shipyard or to Newport News for final assembly and delivery. This division of construction responsibility

VIRGINIA

7/2004, US Navy / 1043661

takes advantage of modular design and construction and provides the most affordable approach to submarine construction at the two shipyards. Advanced funding for first of class in FY96. Second of class funding in FY96, third in FY98 and fourth in FY00. The SSN 774-777 constitute Block I. A follow-on block buy procurement contract, signed in August 2003 for six submarines, maintained the Electric Boat and Northrop Grumman Newport News teaming arrangement. This contract was modified in January 2004 to a multi-year procurement contract. This modification includes provisions to provide early funding, allowing the bulk purchase of materials for more than one submarine at a significant overall cost saving. SSN 778-783 constitute Block II. Another multi-year contract for the procurement of eight Block III (SSN 784-791) was signed on 22 December 2008. It calls for one boat per year in FY09 and FY10 and two per year in FY11, 12 and 13. A program of 30 hulls is planned

Structure: Seawolf level quietening. Reactor core will last the life of the ship. Automated steering and diving control, using fly-by-wire technology, and automated

hovering system. Host ship for Advanced SEAL Delivery System (ASDS) mini-submarine or Dry Deck Shelter (DDS). Integral lockout trunk and reconfigurable torpedo room to accommodate approximately 40 Special Operations Forces and equipment. Block III boats are to be built with a modified bow to incorporate a new sonar design and two large-diameter payload tubes to replace 12 VLS tubes in Blocks I and II. Fibre-optic photonics masts replace conventional periscopes for imaging. High frequency sonar for mine and obstacle detection. Twelve Vertical Launch System (VLS) tubes. Test depth 488 m (1,600 ft).

Operational: Optimised for coastal operations without sacrificing traditional deep-water capabilities. Designed for flexibility to change missions and perform a variety of mission areas: anti-submarine warfare, anti-surface warfare, covert intelligence/surveillance and reconnaissance, clandestine mine warfare, battle group support, covert support of Special Operations Forces, and power projection/strike. SSN 775-777 to be homeported at Pearl Harbor from 2009.

VIRGINIA

7/2004, US Navy / 1043661

3 SEAWOLF CLASS (SSN)

Name	No	Builders	Start date	Launched	Commissioned	F/S
SEAWOLF	SSN 21	General Dynamics (Electric Boat)	25 Oct 1989	24 June 1995	19 July 1997	PA
CONNECTICUT	SSN 22	General Dynamics (Electric Boat)	14 Sep 1992	1 Sep 1997	11 Dec 1998	PA
JIMMY CARTER	SSN 23	General Dynamics (Electric Boat)	12 Dec 1995	5 June 2004	19 Feb 2005	PA

Displacement, tons: 8,060 surfaced; 9,138, 12,158 (SSN 23) dived
Dimensions, feet (metres): 353; 453.2 (SSN 23) x 42.3 x 35.8 (107.6; 138.1 x 12.9 x 10.9) (see *Modernisation*)
Main machinery: Nuclear; 1 Westinghouse PWR S6W, 2 turbines; 45,000 hp (33.57 MW); 1 shaft; pumpjet propulsor; 1 (4 in SSN 23) Westinghouse secondary propulsion submerged motor(s)
Speed, knots: 39 dived
Complement: 140 (14 officers)

Missiles: SLCM Raytheon Tomahawk Block III and Block IV; TERCOM and GPS aided navigation with DSMAC to 1,600+ km (865+ n miles) at 0.7 Mach; warhead (WDU 36B) 454 kg.

Torpedoes: 8–26 in (660 mm) tubes (external measurement is 30 in (762 mm)); Raytheon Mk 48 ADCAP Mod 5/6/7, wire-guided (option); active/passive homing to 50 km (27 n miles)/38 km (21 n miles) at 40/55 kt; warhead 257 kg, depth to 800 m (2,950 ft). Air turbine discharge. Total of 50 tube-launched missiles and torpedoes.

Mines: 100 in lieu of torpedoes.

Countermeasures. Decoys: External and internal (reloadable) anti-torpedo decoy.

ESM BLD-1, AM/BLQ-10 radar and comms intercept.

Combat data systems: General Electric BSY-2 system, USC-38 EHF JMCIS.

Weapons control: Raytheon Mk 2 FCS.

Radars: Navigation: AN/BPS-16(V)3; I/J-band.

Sonars: BSY-2 suite with bow spherical active/passive array and wide aperture passive flank arrays; TB-16 and TB-29(A) surveillance and tactical towed arrays; WLY-1 system

Programmes: First of class ordered on 9 January 1989; second of class on 3 May 1991 and third on 30 April 1996. Design changes to *Carter* contracted in late 1999 delayed the launch by four years.

Modernisation: The hull of SSN 23 is about 30 m longer to accommodate an hour-glass shaped Ocean Interface section with larger payload apertures to the sea. Modular architecture allows configuration for specific missions.

SEAWOLF

4/2004, *Ships of the World* / 1043702

Payloads could include standoff vehicles, distributed sensors and leave-behind weapons that would be activated after the submarine has left the area. It also supports Special Operations Forces including Dry Deck Shelter (DDS) and the Advanced SEAL Delivery System (ASDS). *Carter* retains all of the *Seawolf* class's original war-fighting capability. All three boats have or are converting to a common open architecture and COTS Submarine Warfare Federated Tactical System (SWFTS) to establish a common submarine baseline that can be easily upgraded.

Structure: The modular design has more weapons, a higher tactical speed, better sonar and an ASW mission effectiveness 'three times better than the improved Los Angeles class' according to the Navy. It is estimated that over a billion dollars was allocated for research and development including the S6W reactor system. Panels around wide aperture sonar array and torpedo tube doors were redesigned and refitted following sea-trials

of SSN 21. Mk 21 Air turbine torpedo discharge pump. There are no external weapons. Emphasis has been put on sub-ice capabilities including retractable bow planes. Test depth 1,950 ft (594 m).

Operational: A quoted 'silent' speed of 20 kt. Other operational advantages include greater manoeuvrability and space for subsequent weapon systems development. All three boats transferred to new home port at Bremerton, WA, in 2007.

Opinion: This submarine was intended to restore the level of acoustic advantage (in the one to one nuclear submarine engagement against the Russians) which the USN had enjoyed for three decades. At the same time the larger capacity of the magazine enhances overall effectiveness in a number of other roles. The decision to discontinue building this very expensive design was the result of falling defence budgets at the end of the Cold War and changing submarine mission requirements.

Displacement, tons: 6,900 standard; 7,011 dived

Dimensions, feet (metres): 360.0 × 33 × 32.3

(109.7 × 10.1 × 9.9)

Main machinery: Nuclear; 1 GE PWR S6G; 2 turbines, 35,000 hp (26 MW); 1 shaft; 1 Magnetek auxiliary prop motor; 325 hp (242 kW)

Speed, knots, 33 dived

Complement: 134 (13 officers)

Missiles: SLCM: Raytheon Tomahawk Block III and Block IV; TERCOM and GPS aided navigation with DSMAC to 1,600+ km (865+ n miles) at 0.7 Mach; warhead (WDU 36B) 454 kg.

SSN 719-722 and 751 onwards are equipped with the Vertical Launch System, which places 12 launch tubes external to the pressure hull behind the spherical array forward

Torpedoes: 4—21 in (533 mm) bow tubes. Raytheon Mk 48 ADCAP Mod 5/6/7; wire-guided (option); active/passive homing to 50 km (27 n miles)/38 km (21 n miles) at 40/55 kt; warhead 267 kg; depth to 900 m (2,950 ft). Total of 26 weapons can be tube-launched, for example—12 Tomahawk, 14 torpedoes.

Mines: Can lay Mk 67 Mobile and Mk 60 Captor mines.

Countermeasures: Decoys. External and internal (reloadable) anti-torpedo decoy.

ESM: BRD-7/BLD-1; direction finding. WLR-1H (in 771-773). WLR-8(V)2/6; intercept. WSQ-5 (periscope) and WLR-10; radar warning. BLQ-10 radar and comms intercept

Combat data systems: CCS Mk 2 (688-750) with UYK 7 computers; BSY-1 (751-773) with UYK 43/UYK 44 computers. JOTS, BGIXS and TADIX-A can be fitted. USC-38 EHF Link 11; Link 16 being fitted. AN/BYG-1 fire control being fitted.

Radars: Surface search/navigation/fire control; AN/BPS-75H, UJ-band.

Sonars: Lockheed Martin AN/BQQ-10; passive/active search and attack; low frequency. BSY-1 (SSN 751 onwards) TB-23/29(A) thin line array and TB-16; passive towed array

BQS-15; active close range including ice detection; high frequency.

MIDAS (mine and ice detection avoidance system) (SSN 772, 766) are fitted to operate ASDS

Programmes: Various major improvement programmes and updating design changes caused programme delays in the late 1980s. From SSN 751 onwards the class is prefixed by an 'I' for 'improved'. Programme concluded at 62 hulls. Eleven paid off by mid-1999 and a further six by late 2008.

Modernisation: Mk 117 TFCS backfitted in earlier submarines of the class. EHF communications and Link 16 are being fitted. HDR antenna fitted on the majority of the class. BQQ-10 and TB-29 fitted in most. An ARC (Acoustic Rapid COTS Insertion) AN/BQQ-10 programme from 1997 to 2006 to backfit BQQ-5 sonars with open system architecture. Five of the class (SSN 688, 690, 700, 701 and 715) are capable of operating with DDS. Two others (SSN 772, 766) are fitted to operate ASDS

Structure: Every effort has been made to improve sound quieting and from SSN 751 onwards the class has acoustic tile cladding to augment the 'mammalian' skin which up to then had been the standard USN outer casing coating. Also from SSN 751 onwards the forward hydro planes are fitted forward instead of on the fin. The forward hydro planes are retractable mainly for surfacing through ice. The S6G reactor is a modified version of the D2G type

BOISE

7/2008, B Prézelin / 1353576

DALLAS (with DDS)

9/2006, US Navy / 1167570

The towed sonar array is stowed in a buster on the side of the casing. Diving depth is 450 m (1,475 ft). Various stepped design improvements have added some 220 tons to the class displacement between 688 and 773.

Operational: The Los Angeles class is the mainstay of the attack submarine force. The land-attack mission has been a notable feature of operations in Iraq, Kosovo and Afghanistan. Under-ice operations are still a priority and several (SSN 751, 767) have surfaced at the North Pole. Special forces and intelligence gathering missions

are also conducted. Normally additional Tomahawk missiles are carried internally (in addition to those stored externally). Weapon types/numbers vary according to mission. Neither TASM nor Harpoon are now deployed. Nuclear weapons disembarked but still available. ASDS trials in SSN 772 during 2002. SSN 711 seriously damaged in collision with an undersea mountain south of Guam on 8 January 2005. SSN 711 was fitted with the bow section of SSN 718. SSN 767 changed home port to San Diego in 2007 and SSN 699 to Pearl Harbour in 2008.

1 ENTERPRISE CLASS (CVNM)

Name	No	Builders	Laid down	Launched	Commissioned	F/S
ENTERPRISE	CVN 65	Newport News Shipbuilding	4 Feb 1958	24 Sep 1960	25 Nov 1961	AA
<p>Displacement, tons: 73,502 light; 75,700 standard, 89,600 full load</p> <p>Dimensions, feet (metres): 1,123 × 133 × 39 (342.3 × 40.5 × 11.9)</p> <p>Flight deck, feet (metres): 1,088 × 252 (331.6 × 76.8)</p> <p>Main machinery: Nuclear; 8 Westinghouse PWR A2W; 4 Westinghouse turbines; 280,000 hp (209 MW); 4 emergency diesels, 10,720 hp (8 MW); 4 shafts</p> <p>Speed, knots: 33</p> <p>Complement: 3,350 (171 officers); 2,480 aircrew (225 officers); Flag staff 70 (25 officers)</p> <p>Missiles: SAM: 2 Raytheon GMLS Mk 29 octuple launchers; NATO Sea Sparrow RIM-7P; semi-active radar homing to 16 km (8.6 n miles) at 2.5 Mach; warhead 38 kg 2 GMLS Mk 49 RAM RIM-116; 21 rds/launcher; passive IR/anti-radiation homing to 9.6 km (5.2 n miles) at 2.5 Mach; warhead 9.1 kg.</p> <p>Guns: 2 General Electric/General Dynamics 20 mm Vulcan Phalanx 6-barrelled Mk 15; 3,000 rds/min (or 4,500 in Block 1) combined to 1.5 km.</p> <p>Countermeasures: Decoys: SLQ-25 Torpedo Countermeasures Transmitting Set (Nixie). ESM/ECM SLQ 32(V)4, intercept and jammers.</p> <p>Combat data systems: ACDS Block 0 naval tactical and advanced combat direction systems; Links 4A, 11, 14, 16 and Satellite Tadi J. GCCS(M) SATCOMS; SSR-1, WSC-3 (UHF DAMA), WSC-6 (SHF), WSC-8 (SHF), USC 38 (EHF), SSR-2A (GBS) (see Data Systems at front of section).</p> <p>Weapons control: 2 Mk 91 Mod 1 MFCS directors (part of NSSMS Mk 57 SAM system)</p> <p>Radars: Air search: ITT SPS-48E; 3D, E/F-band Raytheon SPS-49(V)5; C/D-band Hughes Mk 23TAS; D-band SPQ-9B in due course Surface search: Norden SPS-67, G-band. CCA: SPN-41, SPN 43C; 2 SPN 46; J/F/K-band Navigation: Raytheon SPS-64(V)9; Furuno 900; I/J-band. Fire control: 4 Mk 95; I/J-band (for SAM). Tacan: URN 25.</p> <p>Fixed-wing aircraft: Composition of air-wing depends on mission and typically includes: 44 F/A-18A/C/E/F Hornet, 4 EA-6B Prowler; 4 E-2C Hawkeye.</p> <p>Helicopters: 4 SH-60F; 2 HH-60H Seahawk. Up to 9 SH-60B Seahawk are dispersed among carrier strike group.</p> <p>Programmes: Authorised in FY58. Underwent a refit/overhaul at Puget Sound Naval SY, Bremerton, Washington from January 1979 to March 1982. Latest complex overhaul including refuelling started at Newport News in early 1991 and completed 27 September 1994. Minor refit in 1997 and again in 2002.</p> <p>Modernisation: Mk 25 Sea Sparrow was installed in late 1967 and this has been replaced by two Mk 29 and supplemented with three 20 mm Mk 15 CIWS. A reshaping of the island took place in her 1979-82 refit. This included a replacement mast similar to the Nimitz class with SPS-48C and 49 radars. Improvements during latest overhaul included SPS-48E and Mk 23 TAS air search radars, SPN-46 precision approach and landing radar and C² and EW systems. RAM was fitted in 2004.</p> <p>Structure: Built to a modified Forrestal class design. <i>Enterprise</i> was the world's second nuclear-powered surface warship (the cruiser <i>Long Beach</i> was completed a few months earlier). Aviation facilities include four deck edge lifts, two forward and one each side abaft the island. There are four 295 ft C 13 Mod 1 catapults. Hangars cover 216,000 sq ft with 25 ft deck head. Aviation fuel, 8,500 tons.</p> <p>Operational: 12 days' aviation fuel for intensive flying. Scheduled to be decommissioned in 2013 after 52 years service. She will be replaced in the force structure by CVN 78. Based at Norfolk, VA</p>

Speed, knots: 30

Complement: 3,200 (160 officers); 2,480 aircrew (320 officers); Flag 70 (25 officers)

Missiles: SAM: 2 (CVN 68, 69, 70, 73, 74, 76, 77) or 3 (CVN 71, 72, 75) Raytheon GMLS Mk 29 octuple launchers; NATO Sea Sparrow RIM-7P; semi-active radar homing to 16 km (8.5 n miles) at 2.5 Mach; warhead 38 kg. ESSM in due course.

2 GMLS Mk 49 RAM RIM-116 launchers; 21 rds/launcher; passive IR/anti-radiation homing to 9.6 km (5.2 n miles) at 2.5 Mach; warhead 9.1 kg

Guns: 2 (CVN 70, 71, 73) or 3 (CVN 72, 74, 75) General Electric/General Dynamics 20 mm Vulcan Phalanx 6-barrelled Mk 15; 4,500 rds/min combined to 1.5 km.

Countermeasures: Decoys: SLQ 25 Torpedo Countermeasures Transmitting Set (Nixie).

ESM/ECM: SLQ-32(V)4 intercept and jammers.

Combat data systems: ACDS Block 0 (CVN 71-72, 75) naval tactical and advanced combat direction systems; Links 4A, 11, 16 and Satellite Tadi J. GCCS (M) SATCOMS, SSR-1, WCS-3A (UHF DAMA), WSC-6 (SHF), WSC-8 (SHF), USC-38 (EHF), SSR 2A (GBS) (see Data Systems at front of section). SSDS Mk 2 (CVN 68, 69, 70, 73, 74, 76, 77) To be back-fitted in all as part of the CAPSTONE combat system upgrade.

Weapons control: 3 Mk 91 Mod 1 MFCS directors (part of the NSSMS Mk 57 SAM system).

Radars: Air search: ITT SPS-48E; 3D; E/F-band

Raytheon SPS-49(V)5 (CVN 71, 72, 75) or SPS-49A(V)1 (CVN 68, 69, 70, 73, 74, 76, 77); C/D-band.

Hughes Mk 23 TAS (CVN 71, 72, 75); D-band or SPQ-9B (CVN 68-70, 73, 74, 76, 77).

Surface search: Norden SPS-67(V)1; G-band.

CCA, SPN-41, SPN-43C, 2 SPN-46; J/F/J/K-band.

TPX-42A Direct Altitude and Identity Readout (DAIR)

Navigation: Raytheon SPS-64(V)9 (CVN 71, 72, 75) or SPS-73(V)12 (CVN 68, 70, 73, 74) or SPS-73(V)17 (CVN 69, 76, 77); Furuno 900; I/J-band.

Fire control: 4 Mk 95; I/J-band (2 per GMLS Mk 29 launcher).

Tacan: URN 25.

Fixed-wing aircraft: Composition of air-wing depends on mission and typically includes. 44 F/A-18A/C/E/F Hornet, 4 EA-6B Prowler; 4 E-2C Hawkeye.

Helicopters: 4 SH-60F and 2 HH-60H Seahawk and up to 9 SH-60B Seahawk.

Programmes: Nimitz was authorised in FY67, Dwight D Eisenhower in FY70, Carl Vinson in FY74, Theodore Roosevelt in FY80 and Abraham Lincoln and George Washington in FY83. Construction contracts for John C Stennis and Harry S Truman were awarded in June 1988 and for Ronald Reagan in December 1994. Authorised in FY99, construction contract for George H W Bush awarded in January 2001.

Modernisation: CVN 68 completed a three-year Refuelling and Complex Overhaul (RCOH) in 2001. RCOH of CVN 69 started in 2001 and completed in January 2005. RCOH of CVN 70 started in November 2005 and is scheduled to be completed in March 2009. RCOH of CVN 71 is to start in 2008. SSDS Mk 2 Mod 0 originally installed in CVN 68 (upgraded to Mk 2 Mod 1 in 2006). This includes fitting two RAM systems and SPQ-9B radar vice Mk 23 TAS. SSDS Mk 2 Mod 1 fitted to CVN 68, 69, 76 and 77 RAM systems replace one Mk 29 and all Phalanx launchers on CVN 68 and 69. CVN 74 similarly refitted during 2005 docking but retains upgraded CIWS (Phalanx) mounts as well. CVN 73 was similarly upgraded in 2007.

The SSDS upgrade package in CVN 73 and 74 is known as the CAPSTONE combat system upgrade. CAPSTONE is being installed in CVN 70 during RCOH and will be scheduled for CVN 71, 72 and 75 in due course.

Structure: Damage control measures include sides with system of full and empty compartments (full compartments can contain aviation fuel), approximately 2.5 in Kevlar plating over certain areas of side shell, box protection over magazine and machinery spaces. Aviation facilities include four lifts, two at the forward end of the flight deck, one to starboard abaft the island and one to port at the stern. There are four steam catapults (C13-1 (CVN 68-71), C13-2 (CVN 72-77)) and four (or three on CVN 76 and 77) Mk 7 Mod 3 arrester wires. Launch rate is one every 20 seconds. The hangar can hold less than half the full aircraft complement, deckhead is 25.6 ft. Aviation fuel, 8,500 tons. Tactical Flag Command Centre for Flagship role. During RCOH, CVN 68 and 69 fitted with reshaped island (the mainmast has three yardarms to support more antennas) Major structural differences in CVN 76 and 77 include: a three-wire arresting system (to replace the four-wire system), an enlarged island structure which incorporates a bigger bridge, a three yardarm mainmast and the after mast (separate in previous ships) and an internal ordnance elevator. Other changes include a bulbous bow to reduce drag and a modified flight deck (angled deck increased by 0.1°) to allow the use of two catapults while aircraft land.

Operational: Multimission role of 'strike/ASW'. From CVN 70 onwards ships have an A/S control centre and A/S facilities; CVN 68 and 69 are backfitted. Endurance of 16 days for aviation fuel (steady flying) with greater than 1 million miles before nuclear reactor refuelling is required. Only one refuelling is required in the life of the ship. Ships' complements and air wing can be changed depending on the operational task. CVNs 69, 75 and 77 based at Norfolk, VA. CVNs 68, 70 and 76 based at San Diego, CA, CVN 74 at Bremerton, WA, and CVN 72 at Everett, WA. CVN 73 replaced CV 63 at Yokosuka in late 2008. CVN 77 began initial sea trials on 13 February 2009.

0 + 1 (2) GERALD R FORD CLASS (CVN)

Name	No	Builders	Laid down	Launched	Commissioned
GERALD R FORD	CVN 78	Northrop Grumman Newport News	2009	2013	2015
-	CVN 79	Northrop Grumman Newport News	2013	2017	2019
-	CVN 80	Northrop Grumman Newport News	2017	2021	2023

Displacement, tons: 100,000 approx
Dimensions, feet (metres): 1,091.8 x 134.0 x 40.8 (332.8 x 40.8 x 12.4)
Flight deck, feet (metres): 109.8 x 256 (332.8 x 78.0)
Main machinery: Nuclear; 2 reactors; 4 shafts
Speed, knots: 30+
Complement: 4,660 ship and aircrew

Missiles: SAM: 2 Raytheon GMLS Mk 29 launchers for Raytheon Evolved Sea Sparrow RIM-7, 2 GMLS Mk 49 RAM RIM-116.
Guns: 3 General Electric/General Dynamics 20 mm Vulcan Phaenx Mk 15 6-barrelled.
Countermeasures: ESM/ECM, SEWIP Block 2/3
Torpedo defence: SLQ-25C
Combat data systems: CEC, USG-2A; Links 4, 11, 16.
Weapons control: SSDS Mk II.
Radars: Air search: Dual Band Radar (DBR); Raytheon SPY-3; 3D; I-band and Lockheed Martin Volume Search Radar (VSRI), 3D; E/F-band.

Navigation: SPS-73V(18)
Fire control: 4 Mk 95; I/J-band (2 per GMLS 29 launchers).
Tacan: URN-25

Fixed-wing aircraft: Composition will depend on mission but will comprise 75+ aircraft (JSF, F/A-18E/F, EA-18G, E-2D, MH-60R/S, J-UCAS)

Programmes: Northrop Grumman Newport News awarded a construction preparation contract in May 2004 for detailed design, component development, long-lead procurement and advanced construction of the lead ship CVN 78. First steel cut on 11 August 2005.

Structure: The Ford class flight deck and below deck have been optimised to increase sortie rates and improve weapons movement. This is to be accomplished with a new design and relocation of the island, three aircraft lifts and an advanced weapons elevators (AWE). Other features include four Electromagnetic Aircraft Launching

Systems (EMALS), Advanced Arresting Gear (AAG) system, new SSDS open architecture combat system, fully integrated warfare system, a new nuclear power plant, and a flexible ship architecture to support the rapid insertion of future warfighting technologies. Significant habitability improvements are to be incorporated.

Operational: CVN 78 class ships will require 500-900 fewer personnel than the Nimitz class complement. Increased sortie rates (by 25 per cent) and reduced depot maintenance requirements will increase operational availability. New command centre to combine force networking with flexible, open system architecture to support simultaneous multiple missions, including integrated strike planning, joint/coalition operations and special warfare missions. Planned service life 50 years

CVN 78 (artist's impression)

4/2006, US Navy / 1150240

CRUISERS

Notes: (1) **Integrated Ship Controls.** Formerly known as Smart Ship, Integrated Ship Controls (ISC) began as Naval Research Advisory Committee recommendation in 1996 to reduce manning through technology. *Yorktown* (CG 48) was selected as first Smart Ship with implementation of 47 workload-reduction initiatives tested and evaluated during a five-month deployment completed in June 1997. Fourteen more initiatives were installed in July 1997. Core systems included: Integrated Bridge System (IBS), Integrated Condition Assessment System (ICAS), Machinery Control

System (MCS), Damaged Control System (DCS), Fuel Control System (FCS), fibre optic Local Area Network (LAN) and Wireless Internal Communication System (WICS). *Yorktown's* experience validated these technologies, combined with changes in policies, procedures and new watch routines, to generate substantial reductions in workload. *Monterey* (CG 61) was fitted in 2000; *Valley Forge* (CG 50) and *Mobile Bay* (CG 53) in 2001; *Annetam* (CG 54) in 2002, *Hue City* (CG 66) in 2003; *Cape St George* (CG 71) in 2004; *San Jacinto* (CG 56) in 2006; *Leyte Gulf* (CG 65), *Philippine Sea* (CG 58)

and *Chancellorsville* (CG 62) in 2007. *Bunker Hill* (CG 52) and *Lake Champlain* (CG 57) in 2008. Remaining ships of class are to receive ISC either as a stand-alone upgrade or during the Cruiser Modernisation Programme.

(2) CG(X) is the proposed replacement for the *Ticonderoga* (CG 47) class cruisers. It is expected to be a follow-on variant of the DDG 1000, incorporating an integrated power system and using a similar hull-form, but with enhanced missile-defence and air warfare capability. Results of the CG(X) Analysis of Alternatives were being staffed in early 2009.

Displacement, tons: 9,957 full load
Dimensions, feet (metres): 567 × 55 × 31 (sonar)
(172.8 × 16.8 × 9.5)

Main machinery: 4 GE LM 2600 gas turbines, 86 000 hp (64.16 MW) sustained; 2 shafts; cp props

Speed, knots: 30

Range, n miles: 6,000 at 20 kt

Complement: 358 (24 officers); accommodation for 405 total

Missiles: SLCM: Raytheon Tomahawk Block III and Block IV; TERCOM and GPS aided navigation with DSMAC to 1,600+ km (865+ n miles) at 0.7 Mach; warhead (WDU 36B) 454 kg

SSM: 8 McDonnell Douglas Harpoon (2 quad, ● active radar homing to 240 km (130 n miles) at 0.9 Mach; warhead 227 kg. Extended range SLAM can be fired from modified Harpoon canisters.

SAM: 122 Raytheon Standard SM-2 Block III and IVA, command/inertial guidance; semi-active radar and IR homing to 167 km (90 n miles) at 2.5 Mach. SAM and ASROC missiles are fired from 2 Mk 41 Mod 0 vertical launchers ● (61 missiles per launcher), Standard SM-3 Block 1A (in designated ships); command/inertial/GPS guidance and IR homing to 650 n miles (1,200 km) at 3 Mach

A/S: Loral ASROC VLA which has a range of 16.6 km (9 n miles); inertial guidance of 1.6-10 km (1-5.4 n miles); payload Mk 46 Mod 5 Nearthip or Mk 50.

Guns: 2 FMC 5 in (127 mm)/54 Mk 45 Mod 1 ●; 20 rds/min to 23 km (12.6 n miles) anti-surface; weight of shell 32 kg

2 General Electric/General Dynamics 20 mm/76 Vulcan Phalanx 6-barrelled Mk 15 Mod 2 ●; 3,000 rds/min (4,500 in Block 1) combined to 1.5 km. To be fitted with high-definition thermal imagers (HDTI) for tracking small craft, 2 McDonnell Douglas 25 mm, 4—12.7 mm MGs.

Torpedoes: 6—324 mm Mk 32 (2 triple) Mod 14 tubes (fitted in the ship's side aft) ●; 36 Honeywell Mk 46 Mod 5; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg or Alliant/Westinghouse Mk 50; active/passive homing to 15 km (8.1 n miles) at 50 kt; warhead 45 kg shaped charge.

Countermasures: Decoys: Up to 8 Loral Hycor SRBOC 6-barrelled fixed Mk 36 Mod 2 ●; IR flares and chaff Nulka being acquired. SLQ-25 Nixie; towed torpedo decoy ESM/ECM: Raytheon SLQ-32(V3)/SLY-2 ●; intercept, jammers.

Combat data systems: CEC being fitted 1996-2007 starting with CG 66 and 69. NTDS with Links 4A, 11, 14. GCCS (M) and Link 16 being fitted. Link 22 in due course. SATCOM WRN-5, WSC-3 (UHF), USC-38 (EHF), UYK-7 computers (CG 52-58); UYK 43/44 (CG 59 onwards); SQQ-28 for LAMPS sonobuoy datalink ● (see Data Systems at front of section).

Weapons control: SWG-3 Tomahawk WCS. SWG-1A Harpoon LCS. Aegis Mk 7 Mod 4 multitarget tracking with Mk 99 MFCS (includes 4 Mk 80 illuminator directors); has at least 12 channels of fire, Singer Librascope Mk 116 Mod 6 (53B) or Mod 7 (53C) FCS for ASW Lockheed Mk 86 Mod 9 GFCs (to be replaced by Mk-160 Mod 11 from 2008).

Radars: Air search/fire control: RCA SPY-1A phased arrays ●; 3D; E/F-band (CG 52-58). Raytheon SPY-1B phased arrays, 3D; E/F-band (CG 59 on).

BUNKER HILL

(Scale 1 : 1,500), Ian Sturton / 0581793

Air search: Raytheon SPS-49(V)7 or 8 ●; C/D-band; range 457 km (250 n miles).

Surface search: ISC Cardion SPS-55 ●; I/J-band.

Navigation: Raytheon SPS-64(V)8; I-band.

Fire control: Lockheed SPQ-9A/B ●; I/J-band.

Four Raytheon SPG-62 ●; I/J-band.

Tacan URN 25. IFF Mk XII AIMS UPX-29

Sonars: Gould/Raytheon SQQ-89(V)3 (CG 52 onwards); combines hull-mounted active SQS-53B (CG 52-67) or SQS-53C (CG 68-73) and passive towed array SQR-19.

Helicopters: 2 SH-60B Seahawk LAMPS III ●. UAV in due course.

Modernisation: The Cruiser Modernisation (CG Mod) Programme is an extensive capability enhancement and service-life extension that is to be applied to all 22 ships. The principal feature of the programme is to be installation of Aegis Open Architecture (AOA) to upgrade the Aegis Weapon System (AWS), ACB 08/ACB 12 Computer Programme and associated displays and computing infrastructure. The new computer programme is to replace several existing computer programme baselines and provide improved tactical performance and functionality. The AOA upgrade is to provide capacity for future combat system growth over the life of the class as well as mission expansion, such as Ballistic Missile Defense (BMD). The Mk 34 Mod 4 Gun Weapon System upgrade includes the Mk 45 Mod 2 5 in/62 caliber guns, associated Mk 160 Mod 11 fire-control system and optical sights for improved land-attack capability. Additionally, several upgraded command, control, communications, computers and intelligence (C4I) systems and enhanced force-protection capabilities are to be installed. Layered defence is improved through installation of the Vulcan Phalanx Block 1B, modification of the Mk 41 VLS launchers to fire ESSM, installation of the Mk 53 Mod 5 Decoy Launch System (Nulka) and replacement of SPQ-9A with SPQ-9B radar to increase detection and engagement of surface and air threats. Modernised Baseline 3 (CG 59-64) and 4 (CG 65-73) cruisers will rejoin the fleet equipped with improved anti-submarine warfare capability through installation of the SQQ-89A(V)15 upgrade and the Multi-Function Towed Array, Baseline 2 (CG 52-58) are to retain SQQ-89(V)3. The programme will also include a significant Hull, Mechanical and Electrical (HM&E) package that features alterations in weight and movement correction, hull and deckhouse structural improvements, corrosion-control

enhancements, hangar deck strengthening, distributive system enhancements and many quality-of-service upgrades. The modernisation will install the Integrated Ship Controls (ISC), or Smartship, and all-electric modifications on ships that have not yet received the alterations. Cruisers with ISC previously installed will receive system upgrades.

Complete modernisation is to be accomplished in two primary phases. The first phase involves HM&E Centric Modernisation availabilities to include ISC and all-electric modifications, in addition to stand-alone combat systems ship changes. Duration of this phase is projected to be less than six months and is to occur in ship's homeport. The initial HM&E Centric Modernisation availability for *San Jacinto* began in July 2006 and was completed in January 2007. Three more cruisers completed their HM&E upgrades in 2007 and two more in 2008. The second phase involves the full Combat Systems Modernisation refits which include a fully integrated combat system upgrade and those HM&E ship changes not previously completed. *Bunker Hill* (CG 52) is the first ship to undergo the full upgrade and is scheduled to rejoin the fleet in 2009. She is to be followed by *Mobile Bay* and *Philippine Sea*. Modernisation for all ships is to be completed by 2017. CGs having previously received the HM&E upgrades will have integrated combat system upgrades installed during homeport upkeep periods.

Structure: The Ticonderoga class design is a modification of the Spruance class. The same basic hull is used, with the same gas-turbine propulsion plant although the overall length is slightly increased. The design includes Kevlar armour to protect vital spaces. No stabilisers. Later ships have a lighter tripod mainmast vice the square quadruped of the first two.

Operational: The sea-based element of the Ballistic Missile Defense Programme is known as Aegis BMD. *Lake Erie* has acted as the principal trials platform. Since the first intercept test in January 2002, a total of 20 tests had been conducted by late 2008. Of these, 16 have been successful. Tests involved both the Standard SM-3 (in the target's exo-atmospheric ballistic phase) and Standard SM-2 Block IV in the terminal phase. As of the end of 2006, three cruisers (*Lake Erie*, *Shiloh* and *Port Royal*) were capable of launching Standard Missile-3s (SM-3s) to intercept ballistic missiles. *Shiloh* was forward-deployed to Japan in 2006 to bolster missile defence in the region.

Displacement, tons: 8,950 (DDG 51-71), 8,946 (DDG 72-78)
 Dimensions, feet (metres): 504.5 oa; 466 wl x 66.6 x 22 0;
 32 1 (sonar)

(153.8; 142 x 20.3 x 6.7; 9.8)

Main machinery: 4 GE LM 2500 gas turbines; 105,000 hp
 (78.33 MW) sustained; 2 shafts, cp props

Speed, knots: 32

Range, n miles: 4,400 at 20 kt

Complement: 346 (DDG 51-71); 352 (DDG 72-78) (22 officers)

Missiles: SLCM. 66 Raytheon Tomahawk Block III and IV;
 TERCOM and GPS aided navigation with DSMAC to
 1,600+ km (865+ n miles) at 0.7 Mach; warhead (WDU
 368) 454 kg.

SSM: 8 McDonnell Douglas Harpoon (2 quad) ●; active
 radar homing to 240 km (130 n miles) at 0.9 Mach;
 warhead 227 kg

SAM: Raytheon Standard SM-2 Block III and IVA; command/
 inertial guidance; semi-active radar and IR homing to
 167 km (90 n miles) at 2.5 Mach. Standard SM-3 Block 1A
 (in designated ships); command/inertial/GPS guidance
 and IR homing to 650 n miles (1,200 km) at 3 Mach
 2 Martin Manette Mk 41 (Mod 0 forward, Mod 1 aft)
 Vertical Launch Systems (VLS) for Tomahawk, Standard
 and ASROC VLA ●; 2 magazines; 29 missiles forward,
 61 aft. Mod 2 from DDG 59 onwards.

A/S: Loral ASROC VLA; inertial guidance to 1.6-16.6 km
 (1-9 n miles); payload Mk 46 Mod 5 Nearthp.

Guns: 1 FMC/UDLP 5 in (127 mm)/54 Mk 45 Mod 1 or 2 ●;
 20 rds/min to 23 km (12.6 n miles); weight of shell 32 kg.
 2 General Electric/General Dynamics 20 mm Vulcan
 Phalanx 6-barrelled Mk 15 ●; 3,000 rds/min (4,500 in
 Block 1) combined to 1.5 km. Being fitted with IR detectors
 for tracking small craft.

Torpedoes. 6-324 mm Mk 32 Mod 14 (2 triple) tubes ●.
 Alliant Mk 46 Mod 5; anti-submarine; active/passive
 homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg
 or Alliant/Westinghouse Mk 50; active/passive homing
 to 15 km (8.1 n miles) at 50 kt; warhead 45 kg shaped
 charge

Countermeasures: Decoys: 2 Loral Hycor SRBOC
 6-barrelled fixed Mk 36 Mod 12 ●; IR flares and chaff to
 4 km (2.2 n miles). SLQ-25 Nixie; torpedo decoy. NATO
 Sea Gnat. SLQ-96 AEB. SLQ-39 chaff buoy. Nulka being
 acquired

ESM/ECM: Raytheon SLQ-32A(V)2 (DDG 51-67) ● or SLQ-
 32A(V)3/SLY-2 (DDG 68-78); radar warning. Sidekick
 modification adds jammer and deception system to (V)2.
 SRS-1 DF (from DDG 72).

CESM: AN/SRS-1A(V) Combat Direction Finding System
 (CDF)

Combat data systems: CEC being fitted. NTDS Mod 5 with
 Links 4A, 11, 14 and 16 (from DDG 72) and being back

ARLEIGH BURKE

(Scale 1 : 1,500, Ian Sturton / 0050371)

fitted. SATCOM SRR-1, WSC-3 (UHF), USC-38 (EHF)
 SQQ-28 for LAMPS processor datalink. TADIX B Tactical
 Information Exchange System (from DDG 72). Link 22 in
 due course (see Data Systems at front of section). Naval
 Fires Combat System (NFCS)

Weapons control: SWG-4 or SWG-5 Tomahawk WCS.
 SWG-1A Harpoon LCS. Aegis multitarget tracking with
 Mk 99 Mod 3 MFCS and three Mk 80 illuminators. Mk 34
 GWS (includes Mk 180 computing system and Kollmorgen
 Mk 46 Mod 0/1 optronic sight). Singer Librascope Mk 116
 Mod 7 FCS for ASW

Radars: Air search/fire control: RCA SPY-1D phased arrays
 ●; 3D; E/F-band

Surface search: Norden/DRS SPS-67(V)3 ●; G-band.

Navigation: Raytheon SPS-64(V)9; I-band

Fire control: Three Raytheon/RCA SPG-62 ●; I/J-band.

Tacan: URN 25 ● IFF Mk XII AIMS UFX-29.

Sonars: Gould/Raytheon/GE SQQ-89(V)4 (DDG 51), SQQ-
 89(V)6 (DDG 52-78); combines SQS-53C; bow-mounted;
 active search and attack with SQR-198 passive towed
 array (TACTAS) low frequency.

Helicopters: Platform and facilities to fuel and rearm
 LAMPS III SH-60B/F helicopters ●. UAV in due course.

Programmes: First ship authorised in FY85, last pair in FY94.
 The first 21 are Flight I and the next seven are Flight II.

Modernisation: A mid-life modernisation program is
 planned. The scope of the upgrade is to be included
 initially during the construction of Flight IIA DDGs 111
 and 112 and then retrofitted into DDG Flight I and II
 ships during two separate overhaul periods: the first for
 engineering control system upgrades and the second for
 combat system upgrades. Fifteen ships are modified
 to undertake the BMD mission. Aegis has been upgraded to
 BMD Version 3.6 in DDG 63. This is a tactical version
 which adds BMD capability to the other multimission
 capabilities of the Aegis system. DDGs 53, 54, 55, 56, 58,
 60, 61, 62, 65, 69, 70, 73, 76 and 77 are currently equipped

with Version 3.0 which is to be upgraded to Version 3.6
 by 2009. Designated ships are equipped with Standard
 SM 3 Block 1A. This is to be upgraded to Block 1B from
 2010. Following the identification of structural defects to
 the entire DDG 51 class, a bow-strengthening programme
 has been initiated. Repairs are to be carried out during
 planned docking periods.

Structure: The ship, except for the aluminium mast, is
 constructed of steel. 70 tons of armour provided to
 protect vital spaces. This is the first class of US Navy
 warship designed with a 'collective protection system'
 for defense against the fallout associated with NBC
 warfare. The ship's crew are protected by double air-
 locked hatches, fewer accesses to the weatherdecks
 and positive pressurisation of the interior of the ship
 to keep out contaminants. All incoming air is filtered
 and more reliance placed on recirculating air inside the
 ship. All accommodation compartments have sprinkler
 systems. Stealth technology includes angled surfaces
 and rounded edges to reduce radar signature and IR
 signature suppression plus Prairie Masker hull/blade
 rate suppression. The CIC room is below the waterline
 and electronics are EMP hardened. The original upright
 mast design has been changed to increase separation
 between electronic systems and the forward funnel.
 Differences in Flight II starting with DDG 72 include
 Link 16, SLQ-32(V)3 EW suite, extended-range SAM
 missiles and improved tactical information exchange
 systems. The topmast is vertical to take the SRS-1. There
 is also an increase in displacement caused by using
 more space to carry fuel

Operational: Two of the class are based at Yokosuka
 in Japan. Repairs to Cole, damaged by a terrorist
 attack at Aden on 12 October 2000, began in January
 2001 at Ingalls and completed on 19 April 2002 when
 she returned to the fleet. Curtis Wilbur began missile-
 defence patrols in the Sea of Japan in October 2004.
 Milius successfully fired a Tomahawk Block IV missile
 on 6 December 2006.

 (DDG 85-102)

Missiles: SLCM: Raytheon Tomahawk Block III and Block IV;
 TERCOM and GPS aided navigation with DSMAC to
 1,800+ km (865+ n miles) at 0.7 Mach; warhead (WDU
 36B) 454 kg.

SAM: Raytheon Standard SM-2 Block III and IVA; command/
 inertial guidance; semi-active radar and IR homing
 to 167 km (90 n miles) at 2 Mach, 2 Lockheed Martin
 Mk 41 Vertical Launch Systems (VLS) for Tomahawk,
 Standard and ASROC VLS; 2 magazines; 32 missile
 tubes forward, 64 aft. 32 Raytheon RIM-162 ESSM
 (4 quad forward, 4 quad aft); semi-active radar
 homing to 18.5 km (10 n miles) at 3.8 Mach,
 warhead 38 kg.

A/S: Loral ASROC VLA; inertial guidance to 1.6-16.6 km
 (1-9 n miles); payload Mk 46 Mod 5 Neartip.

Guns: 1 BAE Systems 5 in (127 mm)/54 Mk 45 Mod 2 (DDG
 79-80); 20 rds/min to 23 km (12.6 n miles); weight of
 shell 32 kg.

**BAE Systems 5 in (127 mm)/52 (DDG 81 onwards); 20
 or 10 rds/min; GPS guidance to 116.7 km (63 n miles);
 warhead 72 bomblets; cap 10 m.**

**2 General Electric/General Dynamics 20 mm/76
 Vulcan Phalanx Mk 15 6-barrelled; 4,500 rds/min
 combined to 1.5 km (DDG 79-84; to be fitted in all other
 units)**

Torpedoes: 6-324 mm Mk 32 Mod 14 (2 triple) tubes
 Alliant Mk 46 Mod 5; anti-submarine; active/passive
 homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg
 or Alliant/Westinghouse Mk 50; active/passive homing
 to 15 km (8.1 n miles) at 50 kt; warhead 45 kg shaped
 charge

Countermeasures: Decoys: 2 Loral Hyco SRBOC
 6-barrelled fixed Mk 36 Mod 12; Nulka decoy (DDG 91
 onwards); IR flares and chaff to 4 km (2.2 n miles) SLQ-
 25A Nixie; torpedo decoy, NATO Sea Gnat. SLQ-95 AEB.
 SLQ-39 chaff buoy.

ROOSEVELT

(Scale 1 : 1,500), Ian Sturton / 1167179

ESM/ECM: Raytheon SLO-32(V)3/SLY-2; intercept and
 jammer.

CESM: AN/SRS-1A(V) CDF (DDG 79-95), COBLU (DDG 96-
 104), SSEE Increment E (DDG 105).

Combat data systems: TADIX B and TADIL-J. CEC. Links 4A,
 11 and 16. (See Data Systems at front of section.) Link
 22 in due course. Command and Decision (upgrade for
 DDG 91 and following ships)

Weapons control: SWG-4 or SWG-5 Tomahawk WCS Aegis
 multitarget tracking with Mk 99 Mod 3 MFCS and three
 Mk 80 illuminators. Mk 34 GWS (consisting of Mk 160
 computing system and Kollmorgen Mk 46 optronic
 sight), AWCS Mk 116 Mod 7 NFCS.

Radars: Air search/fire control: Lockheed Martin SPY-1D
 (SPY-1D(V) DDG 91 onwards) phased arrays; 3D;
 E/F-band.

Surface search: DRS SPS-67(V)3 (DDG 79-102), SPS-67(V)5
 (DDG 103); G-band.

Navigation: Raytheon SPS-64(V)9 (DDG 79-86, 88), Sperry-
 Marine BME 740 (DDG 87, 89, 112); I-band

Fire control: Three Raytheon AN/SPG-62; I/J-band.

Tacan: AN/URN 25; IFF AIMS Mk XII with AN/LPX-29.

Sonars: Lockheed Martin SQQ-89(V)10 (DDG 79-84);
 SQQ-89(V)14 (DDG 85-90), SQQ-89(V)15 (DDG 91 and
 following); underwater combat system with SQS-53C,
 bow-mounted; active search and attack.

Remote Minehunting System (DDG 91-96).

Helicopters: 2 LAMPS III SH-60R helicopters

Programmes: DDG 79 was authorised in the FY94 budget
 Funding for DDG 80-82 provided in FY95 and DDG 83-84

in FY96 plus partial funding for a third. Balance for DDG
 85 plus DDG 86-88 in FY97 and DDG 89-101 in FY98. On
 6 March 1998, multi-year contract for six ships and one
 option (DDG 89) awarded to Ingalls Shipbuilding and
 contract for six ships awarded to Bath Iron Works. On
 1 August 2002, contract awarded to Bath Iron Works for
 the construction of DDG 102 and on 13 September 2002
 a fixed-price multi-year contract awarded to Bath Iron
 Works (DDGs 104, 106, 108, 109, 111 and 112) and Northrop
 Grumman Ship Systems (DDGs 103, 105, 107, 110) for the
 construction of ten ships. Following the curtailment of
 the DDG 1000 programme on 23 July 2008, an order for
 a further eight DDGs is under consideration.

Modernisation: A mid-life upgrade program is planned.
 The scope of the upgrade is to be included during the
 construction of DDGs 111 and 112 and then retrofitted into
 other DDG Flight IIA ships during two separate overhaul
 periods: the first for engineering control system and the
 second for combat system upgrades.

Structure: The upgrade from Flight II includes two
 hangars for embarked helicopters and an extended fitted
 flight deck at the expense of SQR-19 TACTAS. Vertical
 launchers are increased at each end by three cells. Other
 changes include the Kingfisher minehunting sonar; a
 reconfiguration of the SPY-1D arrays and the inclusion
 of a Track Initiation Processor in the Aegis radar system.
 Use of fibre optic technology should reduce weight and
 improve reliability.

Operational: The helicopter carries Penguin and Hellfire
 missiles. ESSM fired from DDG 86 on 24 July 2002, the
 first to be fired from a USN ship.

0 + 2 (1) ZUMWALT (DDG 1000) CLASS (DDGH)

Name	No	Builders	Laid down	Launched	Commissioned
ZUMWALT	DDG 1000	General Dynamics Bath Iron Works	Nov 2010	May 2012	Mar 2014
MICHAEL MANSOOR	DDG 1001	Northrop Grumman Ship Systems	Nov 2011	May 2013	Apr 2015
–	DDG 1002	–	Apr 2012	2013	2015

Displacement, tons: 14,564

Dimensions, feet (metres): 600.0 × 80.7 × 27.5
(182.8 × 24.6 × 8.4)

Main machinery: Integrated Power System (IPS); 2 Main Turbine Generators (MTG); 2 Auxiliary Turbine Generators (ATG); 2 propulsion motors; 104,000 hp (77.5 MW); 2 shafts

Speed, knots: 30

Range, n miles: To be announced

Complement: 142

Missiles: 80 peripheral VLS cells

SLCM: Raytheon Tomahawk Block IV; land attack, TERCOM and GPS aided inertial navigation system with DSMAC to 1,600+ km (865+ n miles) at 0.7 Mach; warhead (WDU-36B) 454 kg.

SAM: Standard SM-2 and Evolved Sea Sparrow.

A/S: Vertical launched ASROC.

Guns: 2–155 mm advanced gun systems capable of firing Long Range Land Attack Projectiles (LRLAP) at ranges over 66 n miles. 2–57 mm close-in guns.

Torpedoes: To be announced.

Countermeasures: ESM, ECM, Torpedo decoys.

Combat data systems: To be announced.

Weapons control: To be announced

Radars: Air/surface search: Dual Band Radar (DBR); Raytheon SPY-3; 3D; I-band; Lockheed Volume Search Radar (VSR); 3D; E/F-band.

Navigation: To be announced.

Sonars: Bow-mounted active search and attack. Passive towed array. In Stride Mine Avoidance Sonar (ISMA)

Helicopters: 2 MH-60R or 1 MH-60R and 3 UAVs.

Programmes. The DDG 1000 (formerly DD(X)) programme was initiated in November 2001. Principal roles are sustained operations in the littorals and land-attack. Ten Engineering Development Models (EDMs) have passed Critical Design Review (CDR). Ship design completed CDR in September 2005 and received approval to proceed with Milestone B on 23 November 2005. This authorised commencement of detailed design and construction of the DDG 1000 class. Under the Dual Lead Ships acquisition strategy, detailed design contracts were awarded in August 2006 to Northrop Grumman Ship Systems and General Dynamics Bath Iron Works. Raytheon is the Mission Systems Integrator and BAE Systems provides the gun systems. Construction contracts were awarded

ZUMWALT

(Scale 1 : 1,500), Ian Sturton / 13

ZUMWALT

12/2005, US Navy / 1154036

to the shipyards on 14 February 2008. It was announced on 23 July 2008 that the DDG1000 programme was to be curtailed and confirmed on 18 August 2008 that only three ships are to be built.

Structure: Features of the ship include a wave-piercing 'tumblehome' hull, optimised for stealth. Hull structure and missile cells spread impacts outward to increase survivability and reduce risk of single-hit ship loss. Integrated deckhouse and composite superstructure

encloses masts, sensors and antennas, bridge and exhaust silos. There are two shielded 155 mm Advanced Gun Systems (AGS) and an 80-cell peripheral (port and starboard) Vertical Launch System for both land attack and air defense missiles. An Integrated Power System (IPS), enables power to be distributed to any system as the tactical situation demands. IPS is designed to create sufficient reserve energy to power energy weapons in the future.

Radars: Air/surface search. EADS TRS-3D; C-band.

Navigation: I-band.

Fire control: FABADORNA; I-band.

Sonars: To be announced

Helicopters: 2 MH-60 R/S helicopters or 1 MH-60 R/S and 3 Fire Scout VTUAVs.

Programmes: Two industry teams, one led by Lockheed Martin and the other by General Dynamics, were contracted in 2004 to develop designs for a fast, agile and networked surface combatant. In the original procurement programme, it was planned to build a number of each design and left open the option that both designs could proceed into series production. The keys to this approach were a fast building time of two years per ship and a relatively inexpensive cost. A total of 55 ships was proposed. In April 2007, the Navy cancelled its contract with Lockheed Martin for the construction of LCS 3 after negotiations to control cost overruns failed. The second General Dynamics ship (LCS 4) was also cancelled, in November 2007, after similar cost overruns. The funding of three further ships has also been cancelled or re-allocated. In March 2009, the decision to proceed with the construction of one of each LCS variant, re-using previous hull numbers, was announced. Seven mission modules (three mine warfare, two ASW and two ASUW) are being designed/fabricated to be interchangeable on LCS ships.

FREEDOM

(Scale 1 : 1,200), Ian Sturton / 1335278

FREEDOM

7/2006, Lockheed Martin / 1335209

Structure: Semi-planing steel monohull design. Steel hull and aluminium superstructure. The design incorporates a large reconfigurable seaframe to allow rapidly interchangeable mission modules, a flight deck with integrated helicopter launch, recovery and handling system and the capability to launch and recover boats (manned and unmanned) from both the stern and side.

Operational: Concept of operations for LCS includes deployment of two or three-ship team to operate

near shore in support of surface strike groups. Role in homeland defense also likely. Principal capabilities to include shallow-water ASW, mine countermeasures and defence against attacking small boats. LCS ships are to be networked to share tactical information with other units. Freedom began sea trials on 28 July 2008. The trials of ship systems and weapons are to be conducted from Little Creek, VA, during 2009 before deploying to its homeport of San Diego in 2010.

Displacement, tons: 2,750 light; 3,638 (FFG 33), 4,100 full load
 Dimensions, feet (metres): 445 (FFG 33), 463 x 45 x 14.8;
 24.5 (sonar)
 (135.6; 138.1 x 13.7 x 4.5; 7.5)

Main machinery: 2 GE LM 2500 gas turbines; 41,000 hp
 (30.59 MW) sustained; 1 shaft; cp prop
 2 auxiliary retractable props; 650 hp (484 kW)
 Speed, knots: 29 Range, n miles, 4,500 at 20 kt
 Complement: 200 (15 officers) including 19 aircrew

Guns: 1 OTO Melara 3 in (76 mm)/62 Mk 75 ●; 85 rds/min to
 16 km (8.7 n miles) anti-surface; 12 km (6.6 n miles) anti-
 aircraft; weight of shell 6 kg

1 General Electric/General Dynamics 20 mm/76
 6-barrelled Mk 15 Block 1B Vulcan Phalanx ●; 4,500 rds/min
 combined to 15 km
 2 Boeing 25 mm Mk 38 guns can be fitted amidships.
 4-12 7 mm MGs.

Torpedoes: 6 324 mm Mk 32 (2 triple) tubes ●; 24 Honeywell
 Mk 46 Mod 5; anti-submarine; active/passive homing
 to 11 km (5.9 n miles); at 40 kt; warhead 44 kg or Allied/
 Westinghouse Mk 50; active/passive homing to 15 km
 (8.1 n miles) at 50 kt; warhead 45 kg shaped charge.

Countermeasures: Decoys: 2 Loral Hycor SRBOC 6-barrelled
 fixed Mk 36 ●; IR flares and chaff to 4 km (2.2 n miles).
 Mk 34 launcher for Mk 53 Nulka decoys.

T-Mk 6 Fanfare/SLQ-25 Nixie; torpedo decoy.
 ESM/ECM: SLQ-32(V)2 ●; radar warning. Sidekick
 modification adds jammer and deception system.

Combat data systems: NTDS with Link 11 and 14. Link
 14 only (NRF ships). SATCOM ● SRR-1, WSC-3 (UHF)
 SQO-28 for LAMPS III data link.

Weapons control: Mk 92 (Mod 4 or Mod 6 (FFG 61 and
 during modernisation in 11 others of the class)), WCS
 with CAS (Combined Antenna System). The Mk 92 is the
 US version of the Signaal WM28 system. SYS 2(V)2 IADT
 (FFG 61 and in 11 others of the class - see Modernisation).
 SRQ-4 for LAMPS III.

Radars: Air search: Raytheon SPS 49(V)4 or 5 (FFG 61 and
 during modernisation of others) ●; C/D-band; range
 457 km (250 n miles).

RENTZ

(Scale 1 : 1,200, Ian Sturton / Osprey)

Surface search: ISC Cardion SPS-55 ●; I-band.

Fire control: Sperry Mk 92 (Signaal WM28) ●; I/J-band.

Navigation: Furuno; I-band.

Tacan: URN 25. IFF Mk XII AIMS UPX-29.

Sonars: SQO 89(V)2 (Raytheon SQS 56 and Gould SQR 19),
 hull-mounted active search and attack; medium frequency
 and passive towed array; very low frequency.

Helicopters: 2 SH-60B LAMPS III ● in Flight III/IV and
 certified ships

Programmes: The lead ship was authorised in FY73.

Modernisation: To accommodate the helicopter landing
 system (RAST), the overall length of the ship was
 increased by 8 ft (2.4 m) by increasing the angle of the
 ship's transom, between the waterline and the fantail,
 from virtually straight up to a 45° angle outwards.
 LAMPS III support facilities and RAST were fitted in
 all ships authorised from FFG 36 onwards, during
 construction and have been backfitted to all. FFG 61
 has much improved Combat Data and Fire-Control
 equipment which has been retrofitted in FFG 36, 47,
 48, 50-56, 57 and 59 SQS-56 is modified for mine
 detection. Block 1B Phalanx fitted first in FFG 36 in
 October 1999 Engineering and platform improvements
 programme initiated in 2003. Upgrades include new

diesel generators, the addition of reverse osmosis
 plants, COTS slewing arm davits, and self-contained
 breathing apparatus. Mk 13 launchers for Standard SM 1
 and Harpoon missiles have been removed. Combat
 system improvements include the installation of Mk 53
 Nulka decoys and Mk 15 Block 1B gun with surface mode
 capability.

Structure: The original single hangar has been changed to
 two adjacent hangars. Provided with 19 mm Kevlar
 armour protection over vital spaces. 25 mm guns can be
 fitted for some operational deployments.

Operational: Ships of this class were the first Navy
 experience in implementing a design-to-cost acquisition
 concept. On 14 April 1988, Samuel B Roberts (FFG 58),
 was mined in the Gulf but was subsequently repaired.
 One of the class is based at Yokosuka. Nine ships are
 assigned to the Combatant Naval Reserve Force. FFGs
 28, 29 and 38 are commanded by full-time reserve
 officers. SAM and SSM systems removed by the end of
 FY04.

Sales: Australia bought four (FFG 17, 18, 35 and 44) of
 the class and has built two more. Spain has six and
 Taiwan eight. Transfers include eight to Turkey plus one
 for spares, four to Egypt, one to Bahrain and two to
 Poland.

SHIPBORNE AIRCRAFT

Notes: (1) Numbers given are for 1 January 2009.

(2) **Joint Strike Fighter:** The JSF F-35 Lightning II is a family of next-generation strike aircraft combining stealth and enhanced sensors. The F-35C Carrier Variant (CV) will replace F/A-18A/C and complement the F/A-18E/F fleet. Marine Corps F-35B Short Take Off and Vertical Landing (STOVL) variant are to replace USMC AV-8B and F/A-18A/C/D. F-35 variants will share a high level of commonality. Mission systems avionics suite designed for interoperability with coalition partners. The contract for the Systems Development and Demonstration (SDD) phase was awarded on 26 October 2001 to the industry team of Lockheed Martin, Northrop Grumman and BAE Systems. International participants in the SDD phase were Australia, Canada, Denmark, Italy, Netherlands, Norway, Turkey and the UK. All of these had, by early 2007, signed MOUs for the subsequent Production, Sustainment, and Follow-on Development (PSFD) phase. Security Cooperation Partnership MOUs have been established with Israel and Singapore. Engine development is being undertaken by Pratt and Whitney and General Electric/Rolls Royce.

(3) **Tacair Integration:** Navy/Marine Corps Tactical Aviation Integration (TAI) plan was approved in 2002 to optimize combat capability and efficiencies by relying on fewer but more capable aircraft. As part of the TAI, the Navy/Marine Corps began integrating Marine Corps squadrons into carrier air wings and Navy squadrons into the Marine Corps' Unit Deployment Plan (UDP).

(4) **Capabilities Based Scheduling (CBS):** This scheduling mechanism is designed to source tactical aviation (TACAIR) requirements while promoting goals of TAI. Under CBS, all Department of the Navy (DON) TACAIR squadrons are available to fill land or sea-based requirements. Objective is to fill all operational and training requirements with the most appropriate unit while balancing operational tempo across the force. CBS furthers integration to a fully interdependent DON TACAIR force in which VMFA and VFA squadrons routinely deploy as part of carrier wings and land-based expeditionary operations. CBS flexes TACAIR response to global sourcing requirements.

(5) **Global Force Management (GFM):** This scheduling management process is designed to fill tactical aviation (TACAIR) operational and training requirements with the most appropriate unit while balancing unit operational tempo across the force. This process furthers TACAIR integration, leading to a fully independent DON TACAIR force in which VMFA and VFA Squadrons routinely deploy as part of CVW and land-based expeditionary operations.

(6) **CH-53K:** A contract for the System Development and Demonstration of the CH-53K helicopter was awarded to Sikorsky on 3 January 2006. The aircraft is to replace the CH-53E helicopter, currently in service, and the USMC expects to buy 200 aircraft. The first test aircraft is scheduled to be delivered in 2012 with a view to achieving an initial operating capability in 2016.

Numbers/Type: 103/26/363/135 McDonnell Douglas F/A-18A/F/A-18B/F/A-18C/F/A-18D Hornet.
Operational speed: 1,032 kt (1,910 km/h).
Service ceiling: 50,000 ft (15,240 m).
Range: 1,000 n miles (1,850 km).

Role/Weapon systems: Single-seat (F/A-18A/C) and two-seat (F/A-18B/D) strike interdictor (VFA) for USN/USMC air groups. Some are used for EW support with ALQ-167 jammers. Sensors: ESM; Litton ALR 67(V)2, ALQ 165 ASPJ jammer (18C/D), ALQ-126B jammer, APG-65 or APG-73 radar, AAS-38 FLIR, ASQ 228 ATFLIR, AN/AAQ-28 Litening FLIR (USMC only), AAR-50 Nav FLIR, ASQ-173 tracker. Weapons: ASV: four Harpoon or SLAM (ER) or AGM-88 HARM missiles. AGM-65 Maverick. Strike; up to 7.7 tons of bombs (or LGM). AD; one 20 mm Vulcan cannon, nine AIM-120/AIM-7/AIM-9 missiles. Typical ASV load might include 20 mm gun, 7.7 ton bombs including AGM 154A JSOW, two AIM-9 missiles. Typical AAW load might include 20 mm gun, four AIM-7 or AIM-120, two AIM 9 missiles

F/A-18C

11/2008*, US Navy / 1353600

Numbers/Type: 159/196 Boeing F/A-18E/F/A-18F Super Hornet.

Operational speed: 930 kt (1,721 km/h).

Service ceiling: 50,000 ft (15,240 m).

Range: 1,320 n miles (2,376 km).

Role/Weapon systems: Single-seat (F/A-18E) and two-seat (F/A-18F) strike interdictor for USN. First one rolled out in September 1995. First 12 production aircraft ordered in FY97. First sea trials January 1997. Entered operational service November 1999. Initial deployment to CVN 72 in July 2002. 200th aircraft delivered in August 2004. The balance of 506 aircraft to be delivered by 2014. Sensors: APG-73 radar, APG-79 AESA radar, ALR-67(V)3 RWR. ECM: ALQ-165 ASPJ, ALQ-214 RFCM, towed decoys. Weapons: 11 wing stations for 8,680 kg of weapons (same armament as C/D) plus 20 mm guns.

F/A-18F

10/2007, Michael Nitz / 1353599

Numbers/Type: 41/89/16 Boeing/British Aerospace AV-8B Harrier II/AV-8B II Plus Harrier II/TAV 8B Harrier II.

Operational speed: 585 kt (1,083 km/h).

Service ceiling: 50,000 ft (15,240 m).

Range: 800 n miles (1,480 km).

Role/Weapon systems: Attack and destroy surface and air targets in support of USMC. Operational since 1985, a total of 91 AV-8B II Plus conversions completed in 2003. Sensors: Litening II targeting pod, Navigation FLIR, moving map, AN/AVS-9 night vision goggles, laser spot tracker and ECM, Litton ALR-67 ESM, APG 65 radar (AV-8B II Plus). Weapons: Strike; 500 and 1,000 lb general purpose bombs, Paveway II LGB, Joint Direct Attack Munition, Dual Mode Guide Bomb, AGM-65 Maverick, Cluster Bomb Units, 300—25 mm rounds, 2.75 in and 5.00 in rockets. Self-defence: one GAU-12/U 25 mm cannon and four AIM-9M Sidewinder

AV-8B

4/2005, US Navy / 1154041

Numbers/Type: 92 Grumman EA-6B Prowler

Operational speed: 566 kt (1,048 km/h).

Service ceiling: 41,200 ft (12,550 m).

Range: 955 n miles (1,769 km).

Role/Weapon systems: EW and jamming aircraft (VAQ) to provide electronic attack in support of strikes and armed reconnaissance. Block 89A avionics/computer upgrades first delivered 2001. ICAP III receiver system upgrade first delivered in 2005. Sensors: APS-130 radar, ALQ-99, ALQ-218 (ICAP III), USQ-113 communication jammer. Weapons: AGM-88 HARM anti-radiation missile capable.

EA-6B

12/2008*, US Navy / 1353598

Numbers/Type: 66 Grumman E-2C Hawkeye

Operational speed: 323 kt (598 km/h).

Service ceiling: 37,000 ft (11,278 m).

Range: 1,540 n miles (2,852 km).

Role/Weapon systems: Carrier-borne multimission aircraft with primary AEW role and additional strike control, area surveillance, SAR and battle-management roles. Current configurations include 14 Group II aircraft, 23 Group II NAV upgrades, five Group II MCS/ACIS and 24 HE2000. All variants have APS-145 radar and Link 16. Sensors: ESM. ALR-73 or ALQ-217 PDS; Airborne tactical data system with Links 4A, 11 or 16; CEC from 2000. APS-145 radar; Mk XII IFF. Weapons: Unarmed.

E-2C

9/2008*, Hachiro Nakai / 1353565

934 US/Shipborne aircraft

Numbers/Type: 84/9 Boeing MV-22/CV-22 Osprey.
Operational speed: 255 kt (472 km/h).
Service ceiling: 25,000 ft (7,620 m).
Range: 400 n miles (740 km).

Role/Weapon systems: Replacement for legacy assault/support helicopter (CH-46E) for Marines (MV), projected rescue and resupply for the Navy (Navy MV), and special operations for USAF SOCOM (CV). Three active MV-22 squadrons: VMM-263, 162 and 265. In addition, one squadron is used for testing and evaluation: VMX 22 and one FRS: VMMT-204. Final operational evaluation led to full rate production decision in September 2005. There were 16 aircraft procured in FY07. Annual production expected to increase to 36. MV-22 IOC was in July 2007. CV-22 IOC in 2009. Full fleet of 360 MV, 50 CV and 48 Navy MV projected. Sensors: AAR-47 ESM; AN/ALQ-211 Suite of Integrated RF CounterMeasures (SIRFC) (CV-22 only), AN/AAQ-24(V) Nemesis Directional Infra-Red CounterMeasures (DIRCM) (CV-22 only); AN/AAQ-27 FLIR; APR 39A(V)2 (MV-22 only) Weapons: M-240D 7.62 mm machine gun.

MV-22B

10/2006, US Navy / 116/811

Numbers/Type: 147 Sikorsky SH-60B Seahawk (LAMPS Mk III).
Operational speed: 145 kt (268 km/h).
Service ceiling: 10,000 ft (3,050 m).
Range: 450 n miles (833 km).

Role/Weapon systems: LAMPS Mk III is airborne platform for ASW and ASUW: operated from cruisers, destroyers and frigates. First deployed in 1984. To be replaced by MH-60R. Sensors: APS-124 search radar, AAS-44 FLIR with laser designator, ASQ-81(V) MAD, 25 sonobuoys, ALQ-142 ESM, AAR-47 MWR, ALQ-144 IRCM suppressor and ALE-39 CMDS. UYS-1 Acoustic processor. Weapons: ASW: three Mk 46 or Mk 50 torpedoes. ASUW: one 7.62 mm MG or 12.7 mm MG, four AGM-114B/K Hellfire missile.

SH-60B

9/2006, US Navy / 1353596

Numbers/Type: 23 Sikorsky MH-60R Seahawk.
Operational speed: 145 kt (268 km/h).
Service ceiling: 10,000 ft (3,050 m).
Range: 450 n miles (833 km).

Role/Weapon systems: The plan is to replace the SH-60B/F fleet with the MH-60R which is to be the future tactical helicopter operated from carriers, cruisers, destroyers and frigates. The first production aircraft was flown on 28 July 2005 and the MH-60R entered front-line service in 2006. Sensors: APS-147 long-range search radar with ISAR, ALQ-210 ESM, AQS-22 dipping sonar, acoustic processor, Raytheon AAS-44 FLIR with laser designator, Hawklark sensor datalink, AAR-47 MWR, ALE-47 CMDS, and ALQ-144 IRCM Weapons: ASW: three Mk 46/50 torpedoes. ASUW: four AGM-114B/K Hellfire missiles, one 7.62 mm MG or 12.7 mm MG. Pre-planned Product Improvements which are scheduled to be fielded incrementally from 2006 to 2009, will upgrade the aircraft with the AAS-44 3rd Gen multi-spectral FLIR, including Low Light Camera, CDL-N Ku-band sensor datalink, Link 16, fourth weapons station for eight AGM-114s or four torpedoes and ability to fire Mk 54 torpedoes.

MH-60R

10/2007, Michael Nitz / 1353595

Numbers/Type: 70 Sikorsky SH-60F Seahawk (CV).
Operational speed: 145 kt (268 km/h).
Service ceiling: 10,000 ft (3,050 m).
Range: 600 n miles (1,111 km).

Role/Weapon systems: Derivation of SH-60B that replaced SH-3H Sea King to provide close-in ASW protection to Carrier Battle Groups. First deployed in *Nimitz* 1991 To be replaced by MH-60R. Sonar: AQS-13F dipping sonar; ASQ-81 (V) MAD; UYS-2 acoustic processor; 14 sonobuoys. Weapons: ASW: three Mk 46/54 torpedoes. ASUW: One GAU 16 12.7 mm MG or one M 240 7.62 mm MG

SH-60F

10/2006, Michael Nitz / 130199

Numbers/Type: 36 Sikorsky HH-60H Seahawk.
Operational speed: 147 kt (272 km/h).
Service ceiling: 10,000 ft (3,050 m).
Range: 500 n miles (926 km).

Role/Weapon systems: Strike, special warfare support and SAR derivative (HCS) of the SH-60F To be replaced by MH-60S. Sensors: AAS-44 FLIR with laser designator, APR 39A RWR, AVR-2 LWR and AAR 47 MWR, ALE-47 CMDS, ALQ-144 IRCM Weapons: ASW: Hellfire AGM-114B/K; one GAU-16 12.7 mm MG or one M-240 7.62 mm MG. Can deploy eight SEAL to a range of 200 n miles.

HH-60H

7/2007, Mick Prandergast / 130199

Numbers/Type: 123 Sikorsky MH-60S Seahawk
Operational speed: 154 kt (284 km/h).
Service ceiling: 10,000 ft (3,050 m).
Range: 420 n miles (777 km).

Role/Weapon systems: The MH-60S replaced the CH-46D in the Combat Support (HC) mission. Mission areas include vertical replenishment, vertical onboard delivery, day-night amphibious search and rescue, and special warfare support. Sensors: AAS 44 FLIR with laser designator, AAR-47 MWR, APR-39 RWR, ALE-47 CMDS, and ALQ-144 IRCM Weapons: eight AGM-114B/K Hellfire missiles, two 7.62 mm or two 12.7 mm MGs Organic Airborne Mine Countermeasures capabilities are scheduled for introduction by September 2010. Sensors: AN/AQS-20A Sonar Mine Detection Set, AN/AES 1 Airborne Laser Mine Detection System, Mine Neutralization Systems: Airborne Mine Neutralization System, AN/ALQ-220 Organic & Surface Influence Sweep, and AN/AWS 2 Rapid Airborne Mine Clearance System.

MH-60S

10/2007, Michael Nitz / 135194

Numbers/Type: 200 Boeing CH-46F Sea Knight.
Operational speed: 137 kt (254 km/h).
Service ceiling: 8,500 ft (2,590 m).
Range: 180 n miles (338 km).

Role/Weapon systems: Support/assault (HMM) for 18 Marines. To be replaced by V-22 in due course. Can lift 1.3 or 4.5 tons in a cargo net or sling. Sensors: None. Weapons: Unarmed.

CH-46E

10/2006, US Navy / 135383

Numbers/Type: 34 Sikorsky CH-53D Sea Stallion.

Operational speed: 130 kt (240 km/h).

Service ceiling: 12,540 ft (3,822 m).

Range: 578 n miles (1,070 km).

Role/Weapon systems: Assault, support and transport helicopter; can carry 32 Marines, 24 litters or 8,000 lb (3,570 kg). Sensors: None. Weapons: Up to three 12.7 mm machine guns.

CH-53D

8/2008*, Michael Nitz / 135358/

Numbers/Type: 152 Sikorsky CH-53E Super Stallion

Operational speed: 150 kt (278 km/h).

Service ceiling: 18,500 ft (5,638 m).

Range: 480 n miles (888 km).

Role/Weapon systems: Upgraded, three-engined version of Sea Stallion for USMC heavy lift mission. Carries up to 32 Marines, 24 litters or 36,000 lb (16,329 kg). Sensors: AN/AAQ-29A FLIR. Weapons: Up to three 12.7 mm machine guns.

CH-53E

11/2008*, US Navy / 135359/

Numbers/Type: 28 Sikorsky MH-53E Sea Dragon

Operational speed: 150 kt (278 km/h).

Service ceiling: 10,000 ft (3,048 m).

Range: 1,000 n miles (1,850 km).

Role/Weapon systems: Three-engined AMCM helicopter (HM) similar to Super Stallion; tows ALQ-166 Mod 4 MCM sweep equipment; self-deployed if necessary. Sensors: Northrop Grumman 24A side-scan sonar. Weapons: Two 12.7 mm guns for self-defence.

MH-53E

5/2006, Guy Toremans / 1167614

Numbers/Type: 163/6 Bell AH-1W/AH-1Z Super Cobra

Operational speed: 135 kt (250 km/h).

Service ceiling: 10,000 ft (3,048 m).

Range: 260 n miles (AH-1W); 360 n miles (AH-1Z) (481; 666 km).

Role/Weapon systems: Close air support helicopter (HMLA) with own air-to-air capability. AH-1Z is four-bladed rotor upgrade to improve speed, range and lift. Remanufacture of AH-1W features glass cockpit, composite blades, new engines and gearboxes. To enter service in 2011. Sensors: Target Sight System (laser and FLIR targeting sensor). Weapons: Strike/assault; one triple 20 mm cannon, 16 Hellfire missiles and gun. AAW: two AIM-9M Sidewinder missiles.

AH-1W

8/2005, US Navy / 1154063

Numbers/Type: 12/86/15 Bell, HH-1N/UH-1N/UH-1Y Huey.

Operational speed: 107 kt (1N); 153 kt (1Y) (198, 283 km/h).

Service ceiling: 10,000 ft (3,048 m).

Range: 150 n miles (1N), 308 n miles (1Y) (278; 567 km).

Role/Weapon systems: HH-1N is SAR, training, support and logistics helicopter for USN/USMC operations ashore. Can carry eight Marines. UH-1N is USMC Light Utility platform for all-weather assault, transport, airborne command and control, armed reconnaissance and SAR. Can carry eight marines. Four-bladed upgrade being fitted from 2004 to improve speed, range and lift. UH-1Y features glass cockpit, composite blades and new engines gearboxes. Initial operating capability achieved in August 2008. Sensors: BRITE Star FLIR. Weapons: Can be armed with 12.7 mm or 7.62 mm machine guns and 2.75 in rockets.

UH-1N

5/1999, A Sharma / 0084120

Numbers/Type: 16 EA-18G Growler.

Operational speed: 930 kt (1,721 km/h).

Service ceiling: 50,000 ft (15,240 m)

Range: 1,320 n miles (2,376 km).

Role/Weapon systems: Electronic Attack (EA) and Suppression of Enemy Air Defences (SEAD) aircraft to start replacing the EA-6B Prowler from 2009. First production aircraft based on F/A-18E/F handed over on 24 September 2007. All 10 EA-6B Prowler squadrons to be converted to EA-18G by 2013. Sensors: APG-79 AESA radar; ALQ-99 jamming pods; ALQ-218 receivers; ALQ-227 communication countermeasures. Weapons: AGM-88 HARM, AIM-120C AMRAAM

EA-18G

10/2008*, US Navy / 135359/

Numbers/Type: 2 Northrop Grumman E-2D Advanced Hawkeye

Operational speed: 323 kt (598 km/h).

Service ceiling: 37,000 ft (11,278 m).

Range: 1,540 n miles (2,852 km).

Role/Weapon systems: Advanced Hawkeye uses E-2C 2000 configuration as a baseline but features a new radar and upgraded systems. Key objectives are to improve battle space target detection and situational awareness, support of Theatre Air and Missile Defense (TAMD) operations, and improved operational availability. Pilot production began in 2008 and low-rate initial production in 2009. Production deliveries are to begin in 2010 and a total of 75 aircraft is planned by 2022. Sensors: ADS-18 ESA radar. ESM ALQ-217 PDS; airborne tactical data system with Links 11 and 16 and CEC, IFF Mark XII. Weapons: unarmed.

E-2D

8/2007, Northrop Grumman / 1336041

Numbers/Type: 35 Northrop Grumman C-2A Greyhound

Operational speed: 300 kt (555 km/h).

Service ceiling: 31,000 ft (948 m).

Range: 1,400 n miles (2,592 km).

Role/Weapon systems: Twin turbo-prop COD (Carrier Onboard Delivery) transport for high-priority cargo and passengers to and from aircraft carriers. Mission includes airlift and airdrop of special operating forces and airdrops for search and rescue. Maximum weight for payload and route support equipment is 10,000 lb and 26 passengers. First of C-2A follow-on aircraft planned to be delivered in 2020 and the fleet to be replaced by 2030. Weapons: unarmed.

C-2A

9/2008*, Hachiro Nakai / 135356/

LAND-BASED MARITIME AIRCRAFT

Notes: (1) There are also 32/12 Lockheed KC-130F/R Hercules tankers. (2) Replacement of the EP-3Aries fleet is under consideration. The EPX programme is for a replacement capability to enter service in about 2019. Contract refinement contracts were awarded to Boeing, Lockheed Martin and Northrop Grumman on 6 February 2008. A contractor for the Development and Demonstration phase is expected to be selected in 2012.

Numbers/Type: 12 Lockheed EP-3E Aries.
Operational speed: 411 kt (761 km/h).
Service ceiling: 28,300 ft (8,625 m).
Range: 2,380 n miles (4,407 km).

Role/Weapon systems: Multi-intelligence, electronic warfare and signals intelligence gathering aircraft (VQ). A package of airframe and sensor upgrades is to be implemented from 2010 to extend life to about 2020. Sensors: EW equipment including AN/ALR-60, AN/ALQ-76, AN/A-Q-78, AN/ALQ-108, AN/ASQ-114 and AN/AAS-52. Weapons: Unarmed.

EP-3E 10/2003, Paul Jackson / 0110197

Numbers/Type: 161 Lockheed P-3C Orion.
Operational speed: 411 kt (761 km/h).
Service ceiling: 28,300 ft (8,625 m).
Range: 2,380 n miles (4,407 km).

Role/Weapon systems: Of 161 total aircraft, 39 grounded in 2007 due to structural fatigue problems. Repairs likely to take 2 years. Twelve active squadrons. Other variants include NP-3C and NP-3D research and development aircraft. Primary ASW/ASUW; mission aircraft include Update III, Block Mod Upgrade (BMUP) and ASuW Improvement Program (AIP) configurations. Sensors (Update III/BMUP): APS-115 radar, ASQ-81 MAD, USQ-78/USQ-78B acoustic suite, 84 sonobuoys, AAS-36 FLIR and ALR-66B ESM. ASUW Improvement Program (AIP) aircraft employ the APS-137DIV15 ISAR/SAR radar, ASQ-81 MAD, ASX-4 Electro-Optics, ALR-95 ESM, USQ-78/78A/78B acoustics suite, OASIS III/OTCIXS communications suite, SATCOM and AAR 47 and ALE 47 chaff/IR dispenser. Weapons: ASW; Mk 46/50 torpedoes or depth bombs, ASUW; AGM-84C Harpoon, AGM-65F Maverick, AGM-84E SLAM-ER, Mk 52/56/62/63/85 mines, Mk 82 series bombs, and Mk 20 Rockeyes. Counter-Drug Upgrade (CDU) aircraft employ APG-66 air-to-air radar and AVX-1 Electro-Optics.

P-3C 10/2007, Michael Nitz / 1353580

Numbers/Type: Boeing P-8A Poseidon.
Operational speed: 490 kt (907 km/h).
Service ceiling: 41,000 ft (12,500 m).
Range: 1,380 n miles (2,555 km).

Role/Weapon systems: Contract for MMA System Development and Demonstration (SDD) awarded 14 June 2004. To replace fleet of P-3C aircraft. Design based on Boeing 737-800ERX. Crew of nine. First delivery in April 2009. To enter operational service in 2013. A total of 117 aircraft is planned. Sensors: To be equipped with modern ASW, ASUW and intelligence, surveillance and reconnaissance (ISR) sensors. Weapons: To be announced.

BOEING P-8A Poseidon 6/2004, US Navy / 1043653

Numbers/Type: 16 Boeing E-6B Mercury.
Operational speed: 455 kt (842 km/h).
Service ceiling: 42,000 ft (12,800 m).
Range: 6,350 n miles (11,760 km/h).

Role/Weapon systems: Derived from Boeing's 707 aircraft, the E-6B provides Commander US Strategic Command with the command, control and communications capability to direct and employ strategic forces. Designed to support a flexible nuclear deterrent posture with VLF emergency communications and Airborne National Command Post (ABNCP) missions. Sensors: Radar Bendix APS-133; ALR-68(V)4 ESM, supports Trident Fleet radio communications with up to 28,000 ft of VLF trailing wire antenna. Weapons: Unarmed.

E-6B 6/2005, Paul Jackson / 1154051

UNMANNED AIR VEHICLES

Notes: (1) The US Navy continues to refine its path to the full integration of UAV systems into its concepts of operations and warfighting philosophy. The aim is to develop and employ a family of systems which includes both small, longer range tactical systems and large, high-altitude long-endurance systems. Interoperability, affordability and commonality are to be key parameters of all systems. Other important technology areas include miniaturised and low-cost payloads, vehicle survivability, shipboard operations, jam resistant links, reduced data redundancy, and autonomous and collaborative technologies.

(2) The UAV strategy was given increased impetus following Operation Desert Storm and operations in Afghanistan in 2001. The family of UAVs are seen meeting three principal capability requirements:

(a) Tactical Surveillance and Targeting: The USMC is transferring to the Shadow 200 UAV system. Pioneer has been retired. Fire Scout is to provide an organic UAV capability for the Littoral Combat Ship (LCS) in 2008. The US Navy also operates a Reaper system for US Joint Forces Command's Joint Operational Test Bed System (JOTBS) to examine UAV interoperability and to test war fighting concepts.

(b) Long Dwell/Stand-off Intelligence Surveillance and Reconnaissance (ISR): A Broad Area Maritime Surveillance (BAMS) UAV is sought for worldwide access and persistent maritime ISR. It is planned to achieve initial Operational Capability of one base unit with sufficient assets, technical data, training systems, and enough spares and support equipment to operationally support one persistent ISR orbit by FY14. Full operational capability is to be achieved with up to five simultaneous orbits worldwide. For maritime demonstration, the Navy completed source selection in April 2008 and chose the RQ-4N Global Hawk (navy variant).

(c) Penetrating Surveillance/Suppression of Enemy Air Defences: Navy Unmanned Combat Air Systems (UCAS) program is intended to develop and mature technologies for carrier operation. Northrop Grumman X-47B selected on 1 August 2007 as potential carrier-launched unmanned system. Two prototype aircraft are to be built, test flights are to begin in 2009 and carrier-deck landing in 2011. The demonstrator aircraft are a precursor to a complement of unmanned carrier-deployed aircraft planned for about 2020.

X-47B 8/2007, Northrop Grumman / 1167001

Numbers/Type: 2 Northrop Grumman RQ-4A Global Hawk.
Operational speed: 343 kt (635 km/h).
Service ceiling: 65,000 ft (19,810 m).
Range: 12,000 n miles (22,224 km).

Role/Weapon systems: Two RQ-4A acquired for evaluation in 2005. Early flights were made from Edwards AFB, California. One took part in Exercise Trident Warrior in 2005 and later deployed to NAS Patuxent River for operation by US Navy test squadron VX-20 for participation in the Joint Expeditionary Force Experiment 2006 and also to develop ISR tactics and operational techniques. An aircraft also took part in Exercise RIMPAC 2006. The aircraft is being used to develop tactics, techniques and procedures and to refine CONOPS for the BAMS programme.

RQ-4A 6/2005, Northrop Grumman / 1127583

PATROL FORCES

Numbers/Type: 6 Northrop Grumman MQ-8B Fire Scout UAV
Operational speed: 110 kt (203 km/h).
Service ceiling: 20,000 ft (6,094 m).
Range: 110 n miles (205 km).

Role/Weapon systems: Vertical Take Off and Landing Tactical Unmanned Air Vehicle (VTUAV). Design based on the Schweizer Aircraft model 330 helicopter. No systems currently operational. Five RQ-8A versions were first procured, before evaluation to multifunction role with MQ-8B in mid 2005. Improvements included increased power, fuel and payload capacity to achieve more than double mission radius and time on station than in previous version. MQ variant completed first flight in December 2006. EMD completion and low-rate initial production began in 2007 with five MQ-8Bs delivered by May 2008. Operational evaluation to start in early 2009 with fleet introduction later that year. It is planned to acquire 131 VTUAV aircraft to meet LCS requirements. A VTUAV system is composed of three air vehicles, three mission sensor package payloads, two Ground Control Stations, Tactical Common Data Link, one UAV Common Automatic Recovery System for automatic take-off and landing, and shipboard grid and harpoon capture. When operational, Fire Scout will provide critical situational awareness, intelligence, surveillance, reconnaissance, and targeting data to forward deployed war fighters. Arming of MQ-8B with an air-to-surface missile system is under consideration.

MQ-8B 7/2005, US Navy / 116/616

Numbers/Type: 16 AAI RQ-7 Shadow
Operational speed: 110 kt (195 km/h).
Service ceiling: 14,000 ft (4,267 m).
Range: 67 n miles (124 km).

Role/Weapon systems: The Shadow UAV system provides Reconnaissance, Surveillance and Target Acquisition (RSTA) as well as Battle Management and Battle Damage Assessment (BDA) capabilities. Three squadrons use the system. Each system is comprised of two Ground Control Stations and four Air Vehicles. Sensors: electro-optic/FLIR/infra-red imaging sensor.

SHADOW 200 10/2006, US Army / 112581

Numbers/Type: 5 Northrop Grumman MQ-9 Reaper.
Operational speed: 260 kt (481 km/h).
Service ceiling: 50,000 ft (15,240 m).
Range: 400 n miles (740 km).

Role/Weapon systems: The MQ-9 Reaper is a medium-to-high altitude, long-endurance unmanned aircraft system. These UAVs support a Navy requirement for test-bed sensor-suite integration, test and concept development for expeditionary ISR. Four Reapers were acquired 2005-07 and a fifth by 2008. A further three airframes have been ordered after which no further procurement of MQ-9 is planned.

MQ-9 11/2006, Empics / 1165386

Notes: 'Spartan' is a technology demonstrator programme to prove utility of unmanned surface craft. It is envisaged that such craft will be capable of conducting mine warfare, force protection (including surveillance and reconnaissance) and anti-surface warfare. A prototype, a 7 m RHIB installed with navigation, communications and remote control equipment, underwent sea trials in 2003 which included embarkation in USS *Gettysburg* as part of the *Enterprise* carrier strike group.

8 CYCLONE CLASS (PATROL COASTAL SHIPS) (PBFM)

Name	No	Builders	Commissioned	F/S
HURRICANE	PC 3	Bollinger, Lockport	15 Oct 1993	PA
TYPHOON	PC 5	Bollinger, Lockport	12 Feb 1994	AA
SIROCCO	PC 6	Bollinger, Lockport	11 June 1994	AA
SQUALL	PC 7	Bollinger, Lockport	4 July 1994	PA
CHINOOK	PC 9	Bollinger, Lockport	28 Jan 1995	AA
FIREBOLT	PC 10	Bollinger, Lockport	10 June 1995	AA
WHIRLWIND	PC 11	Bollinger, Lockport	1 July 1995	AA
THUNDERBOLT	PC 12	Bollinger, Lockport	7 Oct 1995	AA

Displacement, tons: 354 full load
Dimensions, feet (metres): 170.3 x 25.9 x 7.9 (51.9 x 7.9 x 2.4)
Main machinery: 4 Paxman Valenta 16RP200CM diesels; 13,400 hp (10 MW) sustained; 4 shafts
Speed, knots: 35
Range, n miles: 2,500 at 12 kt
Complement: 39 (4 officers) plus 9 SEALs or law enforcement detachment
Missiles: SAM: 1 Stinger MANPAD system (6 missiles)
Guns: 1 Bushmaster 25 mm Mk 38, 1 Bushmaster 25 mm Mk 96 (aft), 8—12.7 mm MGs (4 twin), 2—7.62 mm MGs, 2—40 mm Mk 19 grenade launchers (MGs and grenade launchers are interchangeable).
Countermeasures: Decoys: 2 Mk 52 sextuple.
ESM: Privateer APR-39; radar warning, Sensytech Bobcat.
Weapons control: FLIR systems AN/KAX-1 Merflir.
Radars: Surface search: 2 Sperry RASCAR; E/F/I/J-band.
Sonars: Wesmar; hull-mounted; active scanning sonar; high frequency.

Programmes: Contract awarded for eight in August 1990, five in July 1991 and one in August 1997.

Structure: Design based on Vosper Thornycroft Ramadan class modified for USN requirements including ballistic plating to protect electronics, communications and the pilot house. The craft have a slow speed loiter capability. Swimmers can be launched from a platform at the stern.

Modernisation: The ships have been modernised to incorporate advanced ESM, an integrated bridge system, a Mk 96 stabilised weapon platform and improved communications.

Operational: The ships perform maritime interdiction, homeland security, law enforcement and SAR missions. Can be operated in pairs with a maintenance team in two vans ashore. Operational control transferred from Special Operations Command to the Atlantic and Pacific Fleets on 1 October 2002. Five stern-ramp fitted ships (PC 2, PC 4, PC 8, PC 13 and PC 14) were transferred to the USCG 2004-05. Of the PCs on loan, two (PC 2, PC 4) are to return to the Navy in FY09 and the other three in FY12. Remaining ships are to be upgraded at one ship per year from FY09. Modernisation work includes communication and radar upgrades and the installation of new diesel generators and air-conditioning units.

Sales: PC 1 (*Cyclone*) transferred to the Philippines Navy for counter-terrorism duties.

CHINOOK 9/2008, Shaun Jones / 1353583

SQUALL 10/2002, M Mazumdar / 0529973

20 MK V CLASS (HSIC)

Displacement, tons: 54 full load
Dimensions, feet (metres): 81.2 x 17.5 x 4.3 (24.7 x 5.3 x 1.3)
Main machinery: 2 MTU 12V 396 TE94 diesels; 4,506 hp (3.36 MW) sustained; 2 Kamewa water-jets
Speed, knots: 45
Range, n miles: 515 at 35 kt
Complement: 5
Military lift: 16 fully equipped troops
Guns: 5 Mk 46 Mod 4 mountings for twin 12.7 mm or 7.6 mm MGs, 1 Mk 19 40 mm grenade launcher.
Countermeasures: ESM: Sensytach Bobcat; radar intercept
Radars: Navigation: Furuno, I-band.
 IFF- APX-100(V)

Comment: This was the winning design of a competition held in 1994 to find a high-speed craft to insert and extract Navy SEAL teams and other special operations forces personnel. Fourteen delivered by mid-1998 and six more by mid-1999. All built at the Halter Marine Equitable Shipyard in New Orleans. The craft has an aluminium hull and is transportable by C-5 aircraft. Stinger missiles may be carried and gun armaments can be varied. A variant with three engines is in service with the Mexican Navy

MK V 3/2007, Paul Daly / 1305198

20 SPECIAL OPERATIONS CRAFT RIVERINE (SOCR)

Displacement, tons: 9.1 full load
Dimensions, feet (metres): 33.0 x 9.0 x 2.0 (10.1 x 2.7 x 0.6)
Main machinery: 2 Yanmar 6LY2M-STE diesels, 440 hp (328 kW); 2 Hamilton HJ292 waterjets
Speed, knots: 40+
Range, n miles: 195
Complement: 4
Military lift: 8 fully equipped troops
Guns: Combination of Mk 19 40 mm, 12.7 mm MG, 762 mm/M60, M240, GAL17 at 5 stations.

Comment: Built by United States Marine, Inc. Aluminium hull.

SOCR 2/2005, US Navy / 1043677

72 NSW 11 METRE RIB (RIGID INFLATABLE BOATS) (PBF)

Displacement, tons: 9 full load
Dimensions, feet (metres): 36.1 x 10.6 x 3 (11 x 3.2 x 0.9)
Main machinery: 2 Caterpillar 3126 diesels, 940 hp (700 kW); 2 Kamewa FF 280 water-jets
Speed, knots: 35
Range, n miles: 200 at 33 kt
Complement: 4 plus 9 SEALs
Guns: 1-12.7 mm MG, 1-762 mm MG or Mk 19 Mod 3 grenade launcher.

Comment: Naval Special Warfare (NSW) RIB capable of carrying nine SEALs at 35 kt. Built by USMI, New Orleans. Entered service from 1998 to 2002.

NSW RIB 1/2002, M Declerck / 0579977

NSW RIB 1/1998, US Navy / 0016419

116 LIGHT PATROL BOATS (PBF)

Displacement, tons: 1.2 full load
Dimensions, feet (metres): 22.3 x 8.6 x 1.5 (6.8 x 2.6 x 0.5)
Main machinery: 2 OMC outboards, 300 hp (224 kW)
Speed, knots: 35
Complement: 3
Guns: 3-12.7 mm MGs, 1-762 mm MG
Radars: Surface search: Furuno 1731; I-band

Comment: Built by Boston Whaler in 1988 for US Special Operations Command. Air transportable. Glass fibre hulls. Replacement began in 2001

PBL-CD 1996, Boston Whaler / 0084191

89 SEA ARK PATROL CRAFT (PBF)

400 series

Displacement, tons: 9.3 full load
Dimensions, feet (metres): 34.0 x 12.0 x 2.7 (10.36 x 3.66 x 0.8)
Main machinery: 2 Cummins QSB5 9-420 GS diesels; 740 hp (550 kW); 2 Konrad 520 drives
Speed, knots: 36
Complement: 6
Guns: 4-12.7 mm MGs
Radars: Navigation: Furuno; I-band

Comment: SeaArk Marine Dauntless RAM design delivered from 2008. Aluminium construction transportable by aircraft. Employed on harbour and offshore installation protection tasks. First deployed with Naval Coastal Warfare Squadron-Five near San Diego

CUTTER 429 9/2008, Shaun Jones / 1353588

COMMAND SHIPS

Notes: Options for replacement of the two in-service command ships remain under consideration. They include new construction ships, service-life extensions of current ships and/or a mix of sea and land-based facilities.

2 BLUE RIDGE CLASS (COMMAND SHIPS) (LCCH/AGFH)

Name	No	Builders	Laid down	Launched	Commissioned	F/S
BLUE RIDGE	LCC 19	Philadelphia Naval Shipyard	27 Feb 1967	4 Jan 1969	14 Nov 1970	PA
MOUNT WHITNEY	LCC 20	Newport News Shipbuilding	8 Jan 1969	8 Jan 1970	16 Jan 1971	AA

Displacement, tons: 13,077 light; 19,648 full load (*Blue Ridge*)
12,435 light; 17,485 full load (*Mount Whitney*)

Dimensions, feet (metres): 634.0 × 107.9 × 24.8
(193.2 × 32.9 × 7.6)

Main machinery: 2 Foster-Wheeler boilers; 600 psi (42.3 kg/cm²); 870°F (467°C); 1 GE turbine; 22,000 hp (16.4 MW); 1 shaft

Speed, knots: 23

Range, n miles: 13,000 at 16 kt

Complement: 786: 637 Flag staff (LCC 19); 303 (157 military, 146 civilian); 582 Flag staff (LCC 20)

Military lift: 700 troops; 3 LCPs; 2 LCVPs; 2–7 m RHIBs

Guns: 2 General Electric/General Dynamics 20 mm/76 6-barrelled Vulcan Phalanx Mk 15; 3,000 rds/min (4,500 in Block 1) combined to 1.5 km
2–25 mm Mk 38
2–12.7 mm MGs.

Countermeasures: Decoys: 4 Loral Hycor SRBOC 6-barrelled fixed Mk 38; IR flares and chaff to 4 km (2.2 n miles).
SLQ-25 Nixie, torpedo decoy.

ESM/ECM: SLQ-32(V)3; combined radar intercept, jammer and deception system.

Combat data systems: GCCS (M) Link 4A, Link 11, Link 14 and JTIDS. Theatre Battle Management Core Systems (TBMCS). Wide band commercial SATCOM, USC-38 SATCOM, WSC-3 EHF SATCOM, WSC-6(V)1 and 6, and WSC-6A(V)4 SHF SATCOM. High Frequency Radio Group (HFRG). Mission Display System (MDS). Demand Assigned Multiple Access (DAMA QUAD). Area Air Defense Commander, Naval Fires Network, Joint Service Imagery Processing System (JSIPS-N), Common High Bandwidth Data Link, Shipboard Terminal (CHBDL-ST), Ring Laser Gyro Network (RLGN), NITES 2000, Joint Tactical Information Distribution System (JTIDS), Navigational Sensor System Interface (NAVSSI) (See Data Systems at front of section.)

Radars: Air search: Lockheed SPS-40E; B-band. Surface search: Lockheed SPS 10B; G-band.
Navigation: Marconi LN66, Raytheon SPS-64(V)9; I-band Tacan. URN 25. IFF Mk XII A/MS UPX-29.

Helicopters: Platform for 1 Sikorsky SH-3H Sea King.

Programmes: Authorised in FY65 and 1966. Originally designated Amphibious Force Flagships (AGCI); redesignated Command Ships (LCC) on 1 January 1969

Modernisation: Modernisation completed FY87. 3 in guns removed in 1996/97 and Sea Sparrow missile launchers have been disembarked. Mk 23 TAS and RAM are not now to be fitted.

Structure: General hull design and machinery arrangement are similar to the two Jims class assault ships. Accommodation for 250 officers and 1,300 enlisted men.

Operational: These are large force command ships of post-Second World War design. They can provide integrated command and control facilities for sea, air and land commanders in all types of operations. *Blue Ridge* is the Seventh Fleet flagship, based at Yokosuka, Japan. *Mount Whitney* served since January 1981 as flagship Second Fleet, based at Norfolk, Virginia except during the period June to November 1999 when she served as Sixth Fleet flagship. In March 2005, *Mount Whitney* became part of MSC Special Mission programme and replaced *La Sella* as flagship Sixth Fleet, based at Gaeta, Italy. *Mount Whitney* retains US Navy status but with a 'hybrid' military/civilian crew

MOUNT WHITNEY

AMPHIBIOUS FORCES

Notes: (1) Additional capacity is provided by the maritime pre-positioning ships (see listing under *Military Sealift Command* (MSC) section) which are either new construction or conversions of commercial ships. One squadron is maintained on station in the Mediterranean, a second at

Guam, and a third at Diego Garcia. Each squadron carries equipment to support a Marine Expeditionary Brigade.

(2) **Minesweeping:** Several of the larger amphibious ships have been used as operating bases for minesweeping helicopters.

(3) Five decommissioned LKAs and four LSTs are kept in Amphibious Lift Enhancement Program (ALEP) status. These are *Fresno* (LST 1182), *Tuscaloosa* (LST 1187), *Boulder* (LST 1190), *Racine* (LST 1191), *Charleston* (LKA113), *Durham* (LKA 114), *Mobile* (LKA 115), *St Louis* (LKA 116) and *El Paso* (LKA 117).

7 + 1 WASP CLASS (AMPHIBIOUS ASSAULT SHIPS) (LHDM)

Name	No	Builders	Laid down	Launched	Commissioned	F/S

Displacement, tons: 40,650 (LHD 1-4); 40,358 (LHD 5-7); 41,661 (LHD 8) full load

Dimensions, feet (metres): 847 oa; 788 wl x 140.1 oa; 106 wl x 26.6 (258.2, 240.2 x 42.7, 32.3 x 8.1)

Flight deck, feet (metres): 819 x 118 (249.6 x 36.0)

Main machinery: 2 Combustion Engineering boilers; 600 psi (42.3 kg/cm²); 900°F (482°C); 2 Westinghouse turbines; 70,000 hp (52.2 MW); 2 shafts (LHD 1-7)

2 GE LM 2500+ gas turbines; 70,000 hp (52.2 MW); 2 Alstom variable speed electric motors; 10,000 hp (7.5 MW) (LHD 8)

Speed, knots: 22

Range, n miles: 9,500 at 20 kt

Complement: 1,123 (85 officers)

Military lift: 1,687 (plus 184 surge) troops; 12 LCM 6s or 3 LCACs; 1,232 tons aviation fuel (LHD 1-4); 1,960 tons (LHD 5-8)

Missiles: SAM: 2 Raytheon GMLS Mk 29 octuple launchers ●; 16 Sea Sparrow RIM-7P; semi-active radar homing to 16 km (8.5 n miles) at 2.5 Mach; warhead 38kg. ESSM in due course

2 GDC Mk 49 RAM RIM-116 launchers; 21 rounds per launcher ●; passive IR/anti-radiation homing to 9.6 km (5.2 n miles) at 2.5 Mach; warhead 9.1 kg.

Guns: 2 General Electric/General Dynamics 20 mm 8-barrelled Vulcan Phalanx Mk 15 ●; 3,000 rds/min (4,500 in Batch 1) combined to 1.5 km.

3 Boeing Bushmaster 25 mm Mk 38. 4—12.7 mm MGs

Countermeasures: Decoys: 4 or 6 Loral Hycor SRBOC 6-barrelled fixed Mk 36; IR flares and chaff to 4 km (2.2 n miles).

SLQ-25 Nixie; acoustic torpedo decoy system. NATO Sea Gnat. SLQ-49 chaff buoys. AEB SSO-95

ESM/ECM SLQ-32(V)3/SLY-2; intercept and jammers. Raytheon ULQ-20

Combat data systems: ACDS Block 1 level 2 (LHD 1 and 7) and Block 0 (LHD 2-6). SSDS Mk 2 (LHD 8 on build and LHD 7 in 2007). Marine Tactical Amphibious C² System (MTACCS). Links 4A, 11 (modified), 14 and 16. SATCOMS ● SSR-1, WSC-3 (UHF), USC-38 (EHF), SMO-11 Metsat (see Data Systems at front of section). Advanced Field Artillery TDS (LHD 6-8).

Weapons control: 2 Mk 91 MFCS (LHD 1-6). 2 Mk 9 MFCS (LHD 7-8).

Radars: Air search: ITT SPS-48E ●; 3D, E/F-band.

Raytheon SPS-49(V)9 ●; C/D-band. Hughes Mk 23 TAS ●; D-band. SPQ-9B (LHD 8 on build and LHD 7 in 2007).

Surface search: Norden SPS-67 ●; G-band

Navigation SPS-73; I-band.

CCA: SPN-35B (LHD 1-7), SPN-35C (LHD 8) and SPN-43C.

Fire control: 2 Mk 95; I/J-band. SPQ-9B to be fitted.

Tacan. URN 25. IFF: CIS Mk XV UPX 29.

Fixed-wing aircraft: 6-8 AV-8B Harriers or up to 20 in secondary role. MV-22 Osprey and Joint Strike Fighter in due course.

Helicopters: Capacity for 42 CH-46E Sea Knight but has the capability to support: AH-1W Super Cobra, CH-53E Super Stallion, CH-53D Sea Stallion, UH-1N Twin Huey, AH-1T Sea Cobra, and SH-60B Seahawk helicopters. UAV in due course

Programmes: The Wasp class was a follow-on to the Tarawa class and shares the same basic hull and engineering plant. Contract awarded to Ingalls Shipbuilding in February 1984 to build the lead ship. The same shipyard was subsequently contracted to build the other ships of the class.

Modernisation: RAM launchers retrofitted in all. All ships to be modified to accommodate MV-22 Osprey and F-35B operations.

Structure: Two aircraft elevators, one to starboard and aft of the 'island' and one to port amidships. The well deck is 267 x 60 ft and can accommodate up to three LCACs. The flight deck has nine helicopter landing spots. Cargo capacity is 125,000 cu ft total with an additional 20,000 sq ft to accommodate vehicles. Vehicle storages available for five M1 tanks, 25 LAVs, eight M 198 guns, 68 trucks, 10 logistic vehicles and several service vehicles. The bridge is two decks lower than that of an LHA command, control and communication spaces having been moved inside the hull to avoid 'cheap kill' damage. Fitted with a 64 bed capacity hospital and six operating rooms. Three 32 ft monorail trains each carrying 6,000 lbs deliver material to the well deck at 6.8 mph. *Iwo Jima* is likely to be the last oil-fired steam turbine ship. The USN LHD 8 is fitted with gas turbine propulsion electric drive, watermist fire suppression system, fibre-optic machinery control system, SPQ-9B radar and CFC. LHD 3 upgraded in 2008 to accommodate/operate MV 22 Osprey

Operational: A typical complement of aircraft is a mix of 25 helicopters and six to eight Harriers (AV-8B). In the secondary role as a sea control ship the most likely mix is 20 AV-8B Harriers and four to six SH-60B Seahawk helicopters. LHD 3 modified to provide interim Mine Countermeasures Command (MCS) capability following decommissioning of *Inchon* in June 2002. LHD 6 first amphibious ship to deploy with MH 60S helicopter. LHDs 1, 3, 5 and 7 based at Norfolk, Virginia, and LHDs 4 and 6 at San Diego, California where LHD 8 is also to be based. LHD 2 is based at Sasebo, Japan. LHD 8 completed the second round of builders trials on 7 February 2009.

 Fire control: Lockheed SPO-9B; I-band.

Helicopters: 1 CH-53E Sea Stallion or 2 CH-46E Sea Knight or 1 MV-22 Osprey

Programmes: The LPD 17 (ex-LX) programme was first approved by the Defense Acquisition Board on 11 January 1993. It will replace four classes of amphibious ships: LPD 4s, LSTs, LKAs and LSD 36s. Contract for first ship, with an opt on on two more, awarded to Avondale on 17 December 1996. A protest about the award delayed the effective contract date to April 1997. The lead ship contract options for FY99 and FY00 on LPD 18 and

SAN ANTONIO

(Scale 1 : 1,800), Ian Sturton / 116/439

LPD 19 were exercised in December 1998 and February 2000 respectively. A negotiated modification added the second FY00 ship, LPD 20, to the lead ship contract in May 2000. Contract awarded for LPD 21 in November 2003 and for LPD 22 and 23 on 1 June 2006. Contract for long lead items for LPD 24 and 25 awarded on 5 November 2006. Under agreement reached in June 2002, NGSS is to build all ships. Difficulties in design phase led to two-year delay to delivery date of lead ship. Launch and commissioning dates for LPD 18-20 delayed due to shipyard damage caused by Hurricane Katrina in 2005. Delivery of ninth ship is planned for 2012. Procurement of a tenth ship is under consideration.

Structure: Panama Canal-capable ships able to control and support landing forces disembarking either via surface craft such as LCACs or by VTOL aircraft, principally helicopters. The design supports a lift capability of 24,000 sq ft of deck space for vehicles, 34,000 cu ft of cargo below decks and 720 embarked Marines with surge lift capacity to 800 troops. The well-deck and stern gate

arrangements are similar to those of the Wasp class, the well-deck can carry two LCACs or one LCU, or 14 Expeditionary Fighting Vehicles. The flight deck can land-launch four CH-46s or two CH-53s or two MV-22s. The hangar will accommodate two CH-46s or one CH-53 or one MV-22. There is a 24-bed medical facility. Although with similar capabilities as the classes they are to replace the ships are not equipped with the flag facilities of some Austin class LPDs, the heavy over-the-side lift capability of LKAs or the ability of LSTs to beach. There is a crane for support of boat operations and an Advanced Enclosed Mast System, trialled in DD 988, is being fitted in aft. On 9 September 2003, salvaged steel from the World Trade Centre was cast into the bow section of USS New York. Operational: The first two ships have experienced a variety of problems. The first of class, LPD 17, was late in starting its maiden deployment in August 2008 and subsequently required to undergo repairs in November 2008. LPD 18 was assessed 'degraded' in its InSurv report in August 2008. LPD 18 started her maiden deployment in January 2009.

Dimensions, feet (metres): 834 × 131.9 × 25.9
 (254.2 × 40.2 × 7.9)

Flight deck, feet (metres): 820 × 118.1 (250 × 36)

Main machinery: 2 Combustion Engineering boilers; 800 psi (42.3 kg/cm²); 900°F (482°C); 2 Westinghouse turbines, 70,000 hp (52.2 MW); 2 shafts; bow thruster; 900 hp (670 kW)

Speed, knots: 24 **Range, n miles:** 10,000 at 20 kt

Complement: 964 (56 officers)

Military lift: 1,703 troops; 4 LCU 1610 type or 2 LCU and 2 LCM 8 or 17 LCM 6 or 46 Assault Amphibian Vehicles; 1,200 tons aviation fuel. 1 LCAC may be embarked. 4 LCPL (replacement by RHIBs in progress)

Missiles: SAM: 2 GDC Mk 49 RAM RIM-116 ●; 21 rounds per launcher; passive IR/anti-radiation homing to 9.6 km (5.2 n miles) at 2.5 Mach, warhead 9.1 kg

Guns: 2 General Electric/General Dynamics 20 mm/76 6-barrelled Vulcan Phalanx Mk 15 ●; 3,000 rds/min (4,500 in Block 1) combined to 1.5 km.
 6 Mk 242 25 mm automatic cannons. 8—12.7 mm MGs.

Countermeasures: Decoys: 4 Loral Hycor SRBOC 6-barrelled fixed Mk 36; IR flares and chaff to 4 km (2.2 n miles).
 SLQ 25 Nixie; acoustic torpedo decoy system. NATO Sea Gnat. SLQ-49 chaff buoys. AEB SSQ 95

ESM/ECM: SLQ-32(V)3; intercept and jammers.

Combat data systems: ACDS Block 0. Advanced Combat Direction System to provide computerised support in control of helicopters and aircraft, shipboard weapons and sensors, navigation, landing craft control and electronic warfare. Links 4A, 11 and 16. SATCOM SRR 1, WSC-3 (UHF), USC-38 (EHF) SMQ-11 Metsat (see Data Systems at front of section).

Radars: Air search: ITT SPS-48E ●; E/F-band.

Lockhead SPS-40E ●; B-band

Hughes Mk 23TAS ●; D-band.

Surface search: Raytheon SPS-67(V)3 ●; G-band.

Navigation: Raytheon SPS-73; I-band

CCA: SPN 35A; SPN 43B

Tacan: URN 25 IFF: CIS Mk XV/JPX-36

Fixed-wing aircraft: Harrier AV-8B VSTOL aircraft in place of some helicopters as required. MV-22 Osprey in due course.

PELELIU

11/2008, Chris Sattler / 1333725

Helicopters: 19 CH 53D Sea Stallion or 26 CH 46D/E Sea Knight UAV in due course

Programmes: Originally intended to be a class of nine ships. LHA 4 and LHA 5 were authorised in FY71.

Modernisation: Two Vulcan Phalanx CIWS replaced the GMLS Mk 25 Sea Sparrow launchers. Programme completed in early 1991 RAM launchers fitted to all of the class 1993-95. One launcher is above the bridge offset to port, and the other on the starboard side at the after end of the flight deck. Mk 23TAS target acquisition radar fitted in LHA 5 in 1992 and LHA 4 in 1993. SPS-48E started replacing SPS-52D in 1994 to improve low altitude detection of missiles and aircraft. ACDS Block 0 in 1996. 5 in guns removed in 1997/98. Plans to fit SSDS have been shelved. Modifications to accommodate MV-22 Osprey operations and Collective Protection Systems upgrade in progress. Fuel oil compensation system has been installed to improve damaged stability

Structure: There are two lifts, one on the port side aft and one at the stern. Beneath the after elevator is a floodable

docking well measuring 268 ft in length and 78 ft in width which is capable of accommodating four LCU 1610 type landing craft. Also included is a large garage for trucks and AFVs and troop berthing for a reinforced battalion. 33,730 sq ft available for vehicles and 116,900 cu ft for palletted stores. Extensive medical facilities including operating rooms, X-ray room, hospital ward, isolation ward, laboratories, pharmacy, dental operating room and medical store rooms

Operational: The flight deck can operate a maximum of nine CH-53D Sea Stallion or 12 CH-46D/E Sea Knight helicopters or a mix of these and other helicopters at any one time. With some additional modifications, ships of this class can effectively operate AV-8B aircraft. The normal mix of aircraft allows for six AV-8Bs. The optimum aircraft configuration is dependent upon assigned missions. Unmanned Reconnaissance Vehicles (URVs) can be operated. LHA 3 decommissioned 28 October 2005 and LHA 2 in 2007. LHA 1 decommissioned in December 2008.

Helicopters: Up to 6 CH-46D/E Sea Knight can be carried. Hangar for only 1 light.

DENVER

(Scale 1 : 1,500), Ian Sturton / 0016471

Programmes: LPD 7-10 authorised in FY63, LPD 13 in FY64, LPD 15 in FY65
Modernisation: Modernisation carried out in normal maintenance periods from FY87. This included fitting two Phalanx, SPS-67 radar replacing SPS-10 and updating EW capability. 3 in guns have been removed. LPD 15 was the last LPD to receive machinery, electrical and habitability upgrades to extend life.
Structure: LPD 7-13 have an additional bridge and are fitted as flagships. One small telescopic hangar. There are structural variations in the positions of guns and electronic equipment in different ships of the class. Flight

deck is 168 ft (51.2 m) in length. Well-deck 394 x 50 ft (120.1 x 15.2 m). Communications domes are not uniformly fitted.
Operational: A typical operational load might include one Seahawk, two Sea Knight, two Twin Huey, four Sea Cobra helicopters and one Cyclone patrol craft. LPDs 7-9 based at San Diego and LPDs 13 and 15 at Norfolk. LPD 6 decommissioned in 2005, LPD 4 in 2006, LPDs 5 and 12 in 2007 and LPD 10 in 2008. LPD 14 transferred to the Indian Navy in January 2007, LPDs 9 and 13 to be decommissioned in 2009 and LPD 8 in 2010.

Displacement, tons: 11,125 light; 15,939 (LSD 41-48), 16,740 (LSD 49 onwards) full load

Dimensions, feet (metres): 609 5 × 84 × 20 5 (185 8 × 25 6 × 6 3)

Main machinery: 4 Colt SEMT-Pielstick 16 PC2.5 V 400 diesels; 33,000 hp(m) (24.6 MW) sustained; 2 shafts; cp props

Speed, knots: 22

Range, n miles: 8,000 at 18 kt

Complement: 413 (21 officers)

Military lift: 402 (+102 surge) troops, 2 (CV) or 4 LCACs, or 9 (CV) or 21 LCM 6, or 1 (CV) or 3 LCUs, or 64 LVTs, 2 LCP

Cargo capacity: 5,000 cu ft for marine cargo, 12,500 sq ft for vehicles (including four preloaded LCACs in the well-deck). The cargo version has 67,600 cu ft for marine cargo, 20,200 sq ft for vehicles but only two LCACs. Aviation fuel, 90 tons.

Missiles: 1 GDC/Hughes Mk 49 RAM RIM-116 21-cell launcher; passive IR/anti-radiation homing to 9.6 km (5.2 n miles) at 2.5 Mach; warhead 9.1 kg. Being fitted in all.

Guns: 2 General Electric/General Dynamics 20 mm/76 6-barrelled Vulcan Phalanx Mk 15; 3,000 rds/min (4,500 in Block 1) combined to 1.5 km. 2—25 mm Mk 38, 6—12.7 mm MGs.

Countermeasures: Decoys: 4 Loral Hycor SRBOC 6-barrelled Mk 36 and Mk 50, IR flares and chaff, SLQ-25 Nixie

ESM: SLQ-32(V)1, intercept, SLQ-49.

Combat data systems: SATCOM SRR-1, WSC 3 (UHF) (see Data Systems at front of section), SSDS Mk 1

Radars: Air search: Raytheon SPS-49(V)1; C-band Surface search: Norden SPS-67V; G-band

Navigation: Raytheon SPS-64(V)9 or SPS-73(V)12, U-band

Tacan: URN 25. IFF: Mk XII UPX-29/UPX-36.

Helicopters: Platform only for 2 CH-53 Sea Stallion.

Programmes: Originally it was planned to construct six ships of this class as replacements for the Thomaston class LSDs. Eventually, the level of Whidbey Island class ships was established at eight, with four additional cargo-carrying variants to provide extra cargo capability. LSD 49-52 are also known as the Harper's Ferry class.

Modernisation: A Quick Reaction Combat Capability (QRCC)/Ship Self-Defense System (SSDS) was installed and successfully demonstrated in LSD 41 in 1993. During the QRCC demonstrations, the ship's SPS-49, SLQ-32, RAM and Phalanx were successfully integrated via SSDS. All ships of the class fitted with SSDS Mk 1. A mid-life upgrade package, to extend service life to 40 years, is planned for all LSD 41/49 class starting with LSD 44 in FY08.

Structure: Based on the earlier Anchorage class. One 60 and one 20 ton crane. Well-deck measures 440 × 50 ft (134.1 × 15.2 m) in the LSD but is shorter in the Cargo Variant (CV). The cargo version is a minimum modification to the LSD 41 design. Changes in that design include additional troop magazines, air conditioning, piping

ASHLAND

and hull structure; the forward Phalanx is forward of the bridge, RAM is on the bridge roof, and there is only one crane. There is approximately 90 per cent commonality between the two classes.

Operations: LSDs 41, 43, 44, 48, 49, 50 and 51 are based at Little Creek, VA. LSDs 42, 45, 47 and 52 are based at San Diego, CA. LSDs 46 and 49 are based at Sasebo, Japan

COMSTOCK

7/2008, US Navy / 1353582

0 + 1 AMERICA CLASS (AMPHIBIOUS ASSAULT SHIP) (LHA)

Name	No	Builders	Laid down	Launched	Commissioned
AMERICA	LHA 6	Northrop Grumman Ship Systems, Pascagoula, MS	Apr 2009	2011	2012

Displacement, tons: 44,850 full load
Dimensions, feet (metres): 844 oa; 778 wl x 194 oa, 106 wl x 28.7 (257.3; 237.1 x 59.1; 32.3 x 8.7)
Flight deck, feet (metres): 819 x 118 (249.6 x 36.0)
Main machinery: COGES: 2 GE LM 2500+ gas turbines; 70,000 hp (52.2 MW); 2 auxiliary propulsion motors; 10,000 hp (7.46 MW); 2 shafts
Speed, knots: 22
Range, n miles: 9,000 at 12 kt
Complement: 1,059 (85 officers)
Military lift: 1,687 troops (plus 184 surge)

Missiles: SAM: 2 Raytheon GMLS Mk 29 octuple launchers; 16 Evolved Sea Sparrow RIM-162D, semi-active radar homing to 18 km (9.7 n miles) at 3.6 Mach; warhead 38 kg. 2 Raytheon RAM RIM-116 Mk 49 launchers, passive IR/anti-radiation homing to 9.6 km (5.2 n miles) at 2.5 Mach; warhead 9.1 kg.
Guns: 2 General Electric/General Dynamics 20 mm 6-barrelled Vulcan Phalanx Mk 15.
Countermeasures: Mk 53 Mod 3 NULKA DLS, SLQ 25 Nixie, acoustic torpedo decoy system.
ESM/ECM: SLQ-32B(V)2
Combat data systems: SDDS Mk 2 Mod 4B, CEC USG-2A, Links 4A, 11 (modified), 18 and 22. SATCOMS: SSR-1, SRC-XX (UHF), USC-38 (EHF), URC-131(H)(HF), URC-139 (VHF) and 2 WSC-6C(V)9 (SHF), SMO-11 Metsa, Advanced Field Artillery TDS.
Weapons control: NSSMS Mk 57 Mod 12 with 2 Mk 9 MFCS.
Radars: Air search: ITT SPS 48E(V)10; 3D; E/F-band, Raytheon SPS-49A(V)1; SPQ-9B
 Surface search/Navigation: 2 SPS-73; I-band.
 CCA: SPN-35C and SPN-43C.
 Tacan LRN 25. IFF: CIS UPX-29

Fixed-wing aircraft: Similar to Wasp class with improved facilities to operate and support MV-22 Osprey and up to 23 F-35B Joint Strike Fighter (JSF)

Programmes: It was announced on 6 April 2004 that the LHA Replacement design was to be a modified version of the LHD 8 design. The detailed design phase started in

LHA(R)

6/2005, Northrop Grumman / 115405f.

January 2006 following ship design approval to proceed with Milestone B. A contract for the detailed design and construction of the first of class was let on 1 June 2007.
Structure: LHA Replacement is optimised for aviation operations and is to have additional cargo/magazine capacity in lieu of a traditional well deck. The flight deck has nine helicopter landing spots and is to be equipped with two aircraft elevators, one to starboard and aft of the island and one to port amidships; the folding capability

has been removed. Cargo capacity is 160,000 cu ft total with an additional 12,000 sq ft to accommodate vehicle stowage. The ship is to be fitted with a 24 bed capacity hospital and two operating rooms. The bridge is two decks lower than that of an LHA 1; the command, control and communications spaces having been moved inside the hull. The ship has gas turbine propulsion and all electric auxiliaries.

Operational: Homeport is yet to be announced

80 LANDING CRAFT AIR CUSHION (LCAC)

Displacement, tons: 87.2 light; 170-182 full load
Dimensions, feet (metres): 88 oa (on-cushion) (81 between hard structures) x 47 beam (on-cushion) (43 beam hard structure) x 2.9 draught (off-cushion) (26.8 (24.7) x 14.3 (13.1) x 0.9)
Main machinery: 4 Allied-Signal TF40B marine gas turbines for propulsion and lift; 16,000 hp (11.9 MW) sustained; 2 shrouded reversible-pitch airscrews (propulsion); 4 double-entry fans, centrifugal or mixed-flow (lift). SLEP configuration; 4 Vericor Power Systems ETF40B marine gas turbines with Full Authority Digital Engine Control (FADEC) for propulsion and lift; 19,000 hp (14.1 MW) sustained; 2 shrouded reversible-pitch airscrews (propulsion); 4 double-entry fans, centrifugal or mixed-flow (lift)
Speed, knots: 40 (loaded)
Range, n miles: 300 at 35 kt; 200 at 40 kt
Complement: 5
Military lift: 23 troops; 1 Main Battle Tank or 60-75 tons
Radars: Navigation: Marconi LN86 or Decca Bridgmaster E; I-band.

Programmes: Built by Textron Marine and Land Systems and Avondale Gulfport. A total of 90 craft delivered 1984-1997. The final craft LCAC 91 delivered in 2001 in SLEP configuration.

Modernisation: 72 in-service craft to receive Service Life Extension Programme (SLEP) from 2002-2016. The programme includes the installation of more powerful engines to provide greater lift capacity, an improved deep skirt for better handling in heavier sea states and an integrated navigation suite for precise navigation,

LCAC 86

6/2005, J Cistak / 115405f.

and advanced Multimode Integrated Communications System in either normal, secure modes. Four craft were upgraded in FY04, five in FY05, five in FY06 and the remainder planned for subsequent years.

Structure: Incorporates the best attributes of the JEFF(A) and JEFF(B) learned from over five years of testing the two prototypes. Bow ramp 28.8 ft, stern ramp 15 ft. Cargo space capacity is 1,809 sq ft. Noise and dust levels are high and if disabled the craft is not easy to tow. 30 mm Gatling guns can be fitted

Operational: Ship classes capable of carrying the LCAC are Wasp (three), Tarawa (one), Austin (one), Whidbey Island (four), Harpers Ferry (two) and San Antonio (two). A portable transport module can be carried on the cargo deck to transport up to 180 troops. Some limitations in very rough seas. Shore bases on each coast at Little Creek, VA and Camp Pendleton, CA. Of 80 craft, 66 are operational and 14 undergoing SLEP.

Sales: Six to Japan. One of a similar type built by South Korea

LCAC 81

4/2008, Hachiro Nakai / 135356B

8 FRANK S BESSON CLASS (LOGISTIC SUPPORT VESSELS) (LSV-ARMY)

Name	No	Builders	Commissioned
GEN FRANK S BESSON JR	LSV 1	Moss Point Marine, MS	18 Dec 1987
CW 3 HAROLD C CLINGER	LSV 2	Moss Point Marine, MS	20 Feb 1988
GEN BREHON B SOMERVELL	LSV 3	Moss Point Marine, MS	2 Apr 1988
LTG WILLIAM B BUNKER	LSV 4	Moss Point Marine, MS	18 May 1988
MG CHARLES P GROSS	LSV 5	Moss Point Marine, MS	30 Apr 1991
SP/4 JAMES A LOUX	LSV 6	Moss Point Marine, MS	16 Dec 1994
SSGT ROBERT T KURODA	LSV 7	VT Halter Marine	26 Aug 2005
MG ROBERT SMALLS	LSV 8	VT Halter Marine	15 Sep 2007

Displacement, tons: 4,265 full load
Dimensions, feet (metres): 272.8 × 60 × 12 (83.1 × 18.3 × 3.7)
 314 (LSV 7) × 60.0 × 12.0 (95.7 × 18.3 × 3.6.6)
Main machinery: 2 GM EMD 16-645E2 diesels; 3,900 hp (2.9 MW) sustained; 2 shafts; Schottel bow thruster; 650 hp (485 kW)
Speed, knots: 11.6. **Range, n miles:** 8,300 at 11 kt
Complement: 31 (8 officers)
Military lift: 2,280 tons of vehicles including 26 M 1 tanks, containers or general cargo
Radars: Navigation: 2 Raytheon; E/F-band; I-band

Comment: First one approved in FY85, second in FY87, remainder from Army reserve funds. Army owned ro-ro design with 10,500 sq ft of deck space for cargo. Capable of beaching with 4 ft over the ramp on a 1.30 offshore gradient. Payload is 2,000 tons of cargo. LSV 1 is based at Fort Eustis, Virginia, LSVs 2, 5 and 7 are based at Pearl Harbour, HI. LSV 3 is with the Army Reserve and based at Tacoma, WA. LSVs 4 and 6 are based in Kuwait. LSV 8 is based at Baltimore, MD. Two modified ships of the class built for the Philippines Navy in 1993-94.

CW 3 HAROLD C CLINGER

7/2002, Chris Settler / 0529979

39 MECHANISED LANDING CRAFT (LCM 6 TYPE)

Displacement, tons: 64 full load
Dimensions, feet (metres): 56.2 × 14 × 3.9 (17.1 × 4.3 × 1.2)
Main machinery: 2 Detroit 6V-71 diesels; 348 hp (260 kW) sustained or 2 Detroit 8V-71 diesels, 460 hp (344 kW) sustained; 2 shafts
Speed, knots: 9. **Range, n miles:** 130 at 9 kt
Complement: 5
Military lift: 34 tons or 80 troops

Comment: Welded steel construction. All used for various utility tasks, none as landing craft.

LCM 6

6/1997, J W Currie / 0016487

35 MECHANISED LANDING CRAFT: LCM 8 TYPE

Displacement, tons: 65.6 light; 127 full load
Dimensions, feet (metres): 73.7 × 21 × 5.2 (22.5 × 6.4 × 1.6)
Main machinery: 2 Detroit 12V-71 diesels; 400 hp (298 kW) sustained; 2 shafts; Kort nozzles
Speed, knots: 12. **Range, n miles:** 190 at 9 kt full load
Complement: 4
Military lift: 675 tons or 1 M48/1 M60 tank or 110 fully equipped troops or 200 non-combat troops

Comment: Eleven craft are for use in amphibious ships. There are 24 similar craft used by the Army.

LCM 8

5/2003, A Sharma / 0577786

Displacement, tons: 1,102 full load
Dimensions, feet (metres): 173.8 × 42 × 8.5 (53 × 12.8 × 2.6)
Main machinery: 2 Cummins KTA50-M diesels; 2,500 hp (1.87 MW) sustained; 2 shafts; bow thruster
Speed, knots: 11.5
Range, n miles: 4,500 at 11.5 kt
Complement: 13 (2 officers)
Military lift: 350 tons
Radars: Navigation: 2 Raytheon; E/F-band; I-band.

Comment: Order placed with Lockheed by US Army 11 June 1986. First one completed 21 February 1990 by Moss Point Marine. The 2000 series have names, some of which duplicate naval ships. These are the first LCUs built to an Army specification. Seven are active, seven in reserve, 20 prepositioned and one used for training.

HOMIGUEROS

7/2003, A Sharma / 0572813

MOLINO DEL RAY

6/2003, A Sharma / 0572815

10 LANDING CRAFT (MPF TYPE)

Displacement, tons: 12.3
Dimensions, feet (metres): 44.1 × 14.5 × 7 (13.4 × 4.4 × 7)
Main machinery: 2 Cummins QSM11 diesels, 660 hp (492 kW); 2 Hamilton 364 waterjets
Speed, knots: 30 (light), 25 (full load)
Complement: 4
Guns: 2—12.7 mm MGs
Radars: Navigation: Furuno 1834, I-band.

Comment: Contract for the construction of 10 MPF utility craft awarded to Kvichak Marine Industries, Seattle, WA, in August 2006. First craft delivered in February 2006. The craft are to replace the LCM-8 craft as part of the lighterage system in support of prepositioned Marine amphibious assault missions. Aluminium construction with an articulated bow-door for beach deployment. Two are stationed at San Diego, CA, two at Norfolk, VA, and six onboard prepositioned MSC ships. Each craft can transport 30 troops and equipment.

MPF CRAFT

6/2007, Kvichak Marine / 1305174

75 LANDING CRAFT PERSONNEL (LCPL)

Displacement, tons: 11 full load
Dimensions, feet (metres): 35 x 12.1 x 3.8 (11 x 3.7 x 1.2)
Main machinery: 1 GM 8V-71TI diesel; 425 hp (317 kW) sustained; 1 shaft
Speed, knots: 20. **Range, n miles:** 150 at 20 kt
Complement: 3
Military lift: 17 troops
Radars: Navigation: Marconi LN66; I-band.

Comment: There are four variants of this craft: Mk 11, Mk 12, Mk 13 and 11 m LCPLs. Details given are for Mk 12 and 13. For use as control craft and carried aboard LHA, LPD and LSD classes.

LCPL Mk 13 4/1991, Bollinger / 0064143

34 LCU 1600 CLASS (UTILITY LANDING CRAFT) (LCU-ARMY (2) AND NAVY (32))

Displacement, tons: 200 light; 375 full load
Dimensions, feet (metres): 134.9 x 29 x 6.1 (41.1 x 8.9 x 1.9)
Main machinery: 2 Detroit 12V-71 diesels; 400 hp (298 kW) sustained; 2 shafts; Kort nozzles
Speed, knots: 11. **Range, n miles:** 1,200 at 8 kt
Complement: 14 (2 officers)
Military lift: 134 tons; 3 M103 (64 tons), 2 M1A1 tanks or 360 troops
Guns: 4—12.7 mm MGs
Radars: Navigation: Furuno; I-band.

Comment: Steel hulled construction. Versatile craft used for a variety of tasks. Most were built between the mid 1960s and mid-1980s. There are no plans for more of this type and a replacement craft is under consideration. Three converted to Diver Support Craft (ASDV). LCU 1667 and 1675 operated by the US Army. Two USN craft are in reserve. It is planned to reduce US Navy inventory to 28.

LCU 1600 class (Army) 2/2001, M Declerck 0521

LCU 1632 11/2008, US Navy / 1355646

MINE WARFARE FORCES

Notes: (1) There are no surface minelayers. Mining is done by carrier-based aircraft, land-based aircraft and submarines. The mine inventory includes Mk 56 moored influence mines, the Mk 67 submarine launched mobile mine (SLMM) and the Quickstrike series of bottom mines. Mk 56 is being phased out.

(2) NRF ships are manned by active and reserve crews
 (3) MH-53E Sea Stallion helicopters can be deployed in LHDs or transported by C-5 aircraft for mine countermasures
 (4) The Long-term Mine Reconnaissance System (LMRS) (AN/BLQ-11), developed by Boeing, is being used as a risk reduction vehicle for the US Navy's 21 in Mission Reconfigurable Unmanned Undersea Vehicle System (MRUUV). This programme is to develop and procure a modular UUV capable of supporting multiple payloads, reconfigurable for mine countermasures; intelligence, surveillance and reconnaissance; and other missions. The first submerged operation of two UUVs conducted from SSN 768 in October 2007. The UUVs form part of LMRS.

(5) Marine Mammal Systems (MMS) uses trained dolphins and sea lions for mine detection, detection of unauthorised swimmers, protection of fleet assets in port and critical infrastructure, and recovery of exercise mines and torpedoes. The dolphins can be transported by C-5 aircraft or amphibious ships. MMS is the only operational method of detecting and neutralising buried mines.

(6) The AN/WLD-1 Remote Minehunting System (RMS) is an off-board minehunting system that will reside with a forward deployed battle group. Approved for low-rate production, RMS is comprised of a 14,500 lb diesel powered semi-submersible (the Remote Minehunting Vehicle) combined with the towed AN/AQS-20A Sonar Mine Detecting Set. The vehicle tows variable depth sensor to detect, localise and classify bottom mines and moored mines. System includes line-of-sight and over-the horizon real-time data links, shipboard launch and recovery subsystem, and a software segment that integrates AN/WLD-1(V)1 into the ship's AN/SQQ-89(V)15 Undersea Warfare Combat System.

RMS can conduct real-time detection and processing when using line-of-sight communications. RMS will be deployed on Flight IIA Arleigh Burke-class DDGs as well as from the new Littoral Combat Ship (LCS) seaframes (where RMS forms part of the LCS Mine Warfare Mission Package) which was rolled out in September 2008. Installation of first system completed January 2007 aboard Bainbridge DDG 96.

(7) Rapid Airborne Mine Clearance System (RAMICS) is under development. RAMICS is to be operated from a MH-60S helicopter and consists of an electro-optic detection and ranging system and a 30 mm gun system to destroy near-surface and floating moored mines.

(8) Organic Airborne and Surface Influence Sweep (OASIS) is being developed for deployment from MH-60S helicopters, and selected surface craft. OASIS will provide organic, high-speed magnetic and acoustic influence minesweeping capability.

CHIEF	MCM 14	Peterson Builders Inc	19 Aug 1991	12 June 1993	5 Nov 1994	AA

Displacement, tons: 1,379 full load
Dimensions, feet (metres): 224.3 x 38.9 x 12.2 (68.4 x 11.9 x 3.7)
Main machinery: 4 Waukesha L-1616 diesels (MCM 1-2); 2,600 hp(m) (1.91 MW) or 4 Isotta Fraschini ID 36 SS 6V AM diesels (MCM 3 onwards); 2,280 hp(m) (1.68 MW) sustained; 2 Hansome Electric motors; 400 hp(m) (294 kW) for hovering; 2 shafts; cp props; 1 Omnitrustrer hydrojet; 350 hp (257 kW)
Speed, knots: 13.5. **Range, n miles:** 2,500 at 10 kt
Complement: 84 (8 officers)

Guns: 2—12.7 mm MGs.
Countermasures: MCM 2 SLQ-48; includes Honeywell/Hughes ROV mine neutralisation system, capable of 6 kt (1,500 m cable with cutter (MP1), and countermining charge) (MP 2). SLQ-37(V)3; magnetic/acoustic influence sweep equipment. Oropesa SLQ-38 Type 0 Size 1; mechanical sweep.
Combat data systems: SATCOM SRR-1; WSC-3 (UHF) GEC/Marconi Nautis M in last two ships includes SSN 2 PINS command system and control. USQ-119E(V), UHF Dama and OTCIXS provide JMCIS connectivity.

Radars: Surface search. ISC Cardion SPS-55, I/J-band.
Navigation: ARPA 2525 or LN66, I-band. Both to be replaced by SPS-73.
Sonars: Raytheon/Thomson Sintra SQQ-32(V)3, VDS; active minehunting; high frequency.

Programmes: The contract for the prototype MCM was awarded in June 1982. The last three were funded in FY90.

SCOUT 10/2008, Shaun Jones 1353635

Modernisation: Integrated Ship Control System (ISCS) installed in all hulls.

Structure: The hull is constructed of oak, Douglas fir and Alaskan cedar, with a thin coating of fibreglass on the outside, to permit taking advantage of wood's low magnetic signature. A problem of engine rotation on the Waukesha diesels in MCM 1-2 was resolved; however, those engines have been replaced in the rest of the class by low magnetic engines manufactured by Isotta-

Fraschini, of Milan, Italy fitted with SSN2(V) Precise Integrated Navigation System (PINS)

Operational: Avenger fitted with the SQQ-32 for Gulf operations in 1991 and all of the class have been retrofitted. Two transferred to NRF in 1995, two more in 1996 and a fifth in October 2000. Scout and Dextrous permanently stationed in Bahrain, and Guardian and Patriot are at Sasebo, Japan. The remainder are based at Ingleside, Texas. Ingleside-based ships are to be homeported at San Diego by 2009.

RESEARCH SHIPS

Notes: (1) There are many naval associated research vessels which are civilian manned and not carried on the US Naval Vessel Register. In addition civilian ships are leased for short periods to support a particular research project or trial. Some of those employed include *RSB-7* (m ssile booster recovery), *Acoustic Pioneer* and *Acoustic Explorer* (acoustic research). (2) The stealth ship prototype *Sea Shadow* was de-activated in 2006 and may be converted into a museum

ACOUSTIC EXPLORER

10/2007, Michael Nitz / 1353634

1 EXPERIMENTAL CATAMARAN (X-CRAFT) (AGE)

SEA FIGHTER FSF-1

Displacement, tons: 1,025 standard, 1,400 full load
Dimensions, feet (metres): 269 x 72.2 x 11.5 (82.0 x 22.0 x 3.5)
Main machinery: CODOG, 2 GE LM 2500 gas turbines, 60,000 hp (44.7 MW); 2 MTU 16V695 diesels; 11,585 hp (8.6 MW); four Rolls-Royce Kamewa 125 SH waterjets
Speed, knots: 50 **Range, n miles:** 4,000 at 20 kt
Complement: 17
Radars, Navigation: I-band
Helicopters: Platform for 1 SH-60R

Comment: In September 2002, the Office of Naval Research selected Titan Corporation of San Diego, California and Nigel Gee and Associates LTD of Southampton, UK to design an experimental vessel known as X-CRAFT. A contract for development and build of the vessel was awarded in February 2003. The keel was laid in June 2003 and the vessel was launched in February 2005 at Nichols Brothers Boat Builders in Whidbey Island, Washington. The vessel, an aluminium-hulled, wave-piercing catamaran, was delivered to the Navy in May 2005. Multipurpose stern ramp, with direct access to the mission bay, allows launch and recover of manned and unmanned surface and sub-surface vehicles. Flight deck has dual landing spots for two MH-60 helicopters or UAV. Between May 2005 and September 2006 the vessel was stationed in San Diego and manned by a combined Navy/Coast Guard crew to evaluate experimental manning an operational concepts. In October 2006 a civilian crew assumed operations and maintenance of the vessel. In March 2008 the homeport was changed from San Diego to Panama City, Florida where it is used as a test platform for at-sea science and technology experimentation and advanced concept demonstrations. Modifications to reduce ship signature as well as improvements to hull, mechanical and electrical capabilities were to be completed in April 2009.

SEAFIGHTER

10/2005, US Navy / 1123764

1 EXPERIMENTAL SWATH (AGE)

STILETTO

Displacement, tons: 60 full load
Dimensions, feet (metres): 87.9 x 40.0 x 2.5 (26.8 x 12.2 x 0.76)
Main machinery: 4 Caterpillar diesels; 6,600 hp (4.9 MW); 4 surface piercing propellers
Speed, knots: 50
Complement: 35
Radars, Navigation: To be announced.
Helicopters: Platform for 2 SH-60R

Programmes: Developed by the Office of Force Transformation to act as a testbed for new technologies and to evaluate the potential uses of innovative hullforms. The ship was designed by M Ship Company of San Diego, California and constructed in 15 months by Knight & Carver Yacht Center, National City, CA. The ship was delivered in 2006 and trials (including mine warfare and special operations) are expected to last several years.

Structure: Small Water Area Twin Hull (SWATH) design of lightweight all-carbon composite construction. Multiple hulls reduce drag and generate hydrodynamic lift. The ship is capable of launching/recovering an 11 m RIB via a stern ramp and can also act as a platform for UAVs. In addition, the craft includes an 'electronic keel' which enables mission planning modules to be installed and networked.

Operational: The craft took part in Exercise Trident Warrior in August 2006. The craft was shipped to Norfolk, VA, in late 2006 where it is now based.

STILETTO

5/2006, US Navy / 1157633

0 + 1 EXPERIMENTAL CATAMARAN (AGE)

SUSITNA

Displacement, tons: 987 full load
Dimensions, feet (metres): 195.0 x 60.0 x 12.1 (SWATH); 4.8 (barge) (59.7 x 18.3 x 3.7; 1.5)
Main machinery: 4 MTU 12V 4000 diesels; 4 Wärtsilä waterjets
Speed, knots: 22 **Range, n miles:** 200 at 20 kt

Programmes: Originally developed by Lockheed Martin as the Vancraft concept, it attracted Congressional interest as a transformational technology and later became known as Expeditionary Craft (E-Craft). Sponsored jointly by the Office of Naval Research and Alaska's Matanuska Susitna Borough, the keel was laid at Alaska Ship and Drydock Inc at Ketchikan, AK, on 24 August 2006. When completed in 2010, the E-craft is to be operated as a ferry between Anchorage and Port Mckenzie while also serving as a three-year technology demonstrator to support expeditionary logistic-support concepts.

Structure: The ship has a reconfigurable hull form that has three modes of operation. A catamaran mode is for high-speeds, a Small-Water-Area Twin Hull (SWATH) mode is for stability in high sea states and a shallow draft landing-craft (barge) mode is for manoeuvring in shallow water. In addition the ship is claimed to be the world's first ice-breaking twin-hulled vessel. The ship's centre deck can be raised and lowered hydraulically while the buoyancy of the catamaran hulls can be adjusted while underway. The ship is designed as half scale of a potential future military vessel and is to be capable of carrying up to 150 passengers and 20 cars.

SUSITNA

2/2007, US Navy / 1185948

1 ELECTRIC SHIP DEMONSTRATOR

SEA JET

Displacement, tons: 120 full load
Dimensions, feet (metres): 133 x 7 x 7 (40.5 x 7 x 7)
Main machinery: 720-cell lead-acid battery bank; 2,690 hp (2 MW); 2 motors; 2 AWJ-21 waterjets; 1 Caterpillar C9 diesel generator, 335 hp (250 kW)
Speed, knots: 16
Range, n miles: 200 at 8 kt
Complement: 3
Radars, Navigation: Furuno 1933C; I-band.

Comment: An Advanced Electric Ship Demonstrator (AESD) designed to test and develop electric ship and propulsor technologies. Funded by the Office of Naval Research, the craft is an approximately quarter-scale version of a destroyer-sized surface ship with tumblehome hullform. Its first task was to test Rolls Royce Naval Marine's AWJ-21 waterjet technology. Testing of the General Dynamics RIMJET podded propulsor began in March 2008. Other technologies, such as low signature superstructure, are also to be trialled. The vessel was built by Dakota Creek Industries, Anacortes, WA, and is located at the Naval Surface Warfare Center Carderock Division, Acoustic Research Detachment in Bayview, Idaho. The vessel started trials on Lake Pend Oreille on 30 November 2005.

SEA JET

6/2005, US Navy / 1118518

2 ASHEVILLE CLASS (YFR7)

ATHENA (ex-Chehalis)

ATHENA II (ex-Grand Rapids)

Displacement, tons: 235 full load
Dimensions, feet (metres): 164.5 x 23.8 x 9.5 (50.7 x 7.3 x 2.9)
Main machinery: CODOG; 1 GE LM 1500 gas-turbine; 12,500 hp (9.3 MW); 2 Cummins VT12-375 diesels; 1,450 hp (1.07 MW); 2 shafts; cp props
Speed, knots: 16 **Range, n miles:** 1,700 at 16 kt
Complement: 22

Comment: Both built 1969-71. Work for the Naval Surface Warfare Center, at Panama City, Florida. Disarmed. *Laurin* was decommissioned in 2007 and is to be sunk as a target.

ATHENA II

6/1993, Giorgio Arra / 0508179

RESEARCH OCEANOGRAPHIC SHIPS

2 MELVILLE CLASS (AGOR)

Name	No	Builders	Commissioned	F/S
MELVILLE	AGOR 14	Defoe SB Co, Bay City, MI	27 Aug 1969	Loan
KNORR	AGOR 15	Defoe SB Co, Bay City, MI	14 Jan 1970	Loan

Displacement, tons: 2,944 full load
Dimensions, feet (metres): 278.9 x 46.3 x 16.5 (85 x 14.7 x 5.0)
Main machinery: Diesel-electric; 3 Caterpillar 3516 diesel generators; 1 Caterpillar 3508 diesel generator; 2 motor-driven Z-drive azimuth thrusters; 3,000 hp (2.2 MW); 1 bow thruster; 900 hp (670 kW)
Speed, knots: 14. **Range, n miles:** 10,060 at 11.7 kt
Complement: 23 (9 officers) plus 38 scientists
Sonars: Deep-water multibeam; sub-bottom profiler; Acoustic Doppler Current Profiler

Comment: *Melville* operated by Scripps Institution of Oceanography and *Knorr* by Woods Hole Oceanography Institution for the Office of Naval Research, under technical control of the Oceanographer of the Navy. Fitted with internal wells for lowering equipment and observation ports. Problems with the propulsion system led to major modifications including electric drive (via the original mechanical) and the insertion of a 34 ft central section increasing the displacement from the original 1,915 tons and allowing better accommodation and improved laboratory spaces. The forward propeller is retractable. These ships are highly manoeuvrable for precise position keeping.

MELVILLE 3/2003, Robert Peabot / 0572738

1 AGOR-26 CLASS (AGOR)

Name	No	Builders	Commissioned
KILO MOANA	AGOR 26	Atlantic Marine, Jacksonville	3 Sep 2002

Displacement, tons: 2,542 full load
Dimensions, feet (metres): 186 x 88 x 25 (56.7 x 26.8 x 7.6)
Main machinery: Diesel-electric; 4 Caterpillar 3508B diesel generators, 2 Westinghouse motors; 4,025 hp (3 MW); 1 bow thruster 1,100 hp (820 kW)
Speed, knots: 15. **Range, n miles:** 10,000 at 11 kt
Complement: 48 (31 scientists)

Comment: Replacement for *R/V Moana Wave*. Designed to commercial standards and constructed by Atlantic Marine, Jacksonville. Launched on 17 November 2001. The ship is a small waterplane area, twin hull (SWATH) oceanographic vessel capable of performing general purpose oceanographic research in coastal and deep ocean areas. The University of Hawaii School of Ocean and Earth Science and Technology operates the ship under a charter agreement for the Office of Naval Research (ONR). The survey suite consists of a Kongsberg EM 120 multibeam echosounder (12 kHz), a Kongsberg EM 1002 shallow water echo sounder (95 kHz), a Workhorse Mariner 300 kHz current profiler and an Ocean Surveyor 38 kHz current profiler.

KILO MOANA 6/2004, University of Hawaii Marine Center / 1043533

3 THOMAS G THOMPSON CLASS (AGOR)

Name	No	Builders	Launched	Commissioned	F/S
THOMAS G THOMPSON	AGOR-23	Halter Marine	27 July 1990	8 July 1991	Loan
ROGER REVELLE	AGOR-24	Halter Marine	20 Apr 1995	11 June 1996	Loan
ATLANTIS	AGOR-25	Halter Marine	1 Feb 1996	3 Mar 1997	Loan

Displacement, tons: 3,400 full load
Dimensions, feet (metres): 274 oa; 246.8 wl x 52.5 x 19 (83.5; 75.2 x 16 x 5.6)
Main machinery: Diesel-electric; 6 Caterpillar diesel generators; 6.65 MW (3-1.5 MW and 3-715 kW); 2 motors; 6,000 hp (4.48 MW); 2 Z-drives; bow thruster; 1,140 hp (850 kW)
Speed, knots: 15. **Range, n miles:** 15,000 at 12 kt
Complement: 22 plus 37 scientists
Sonars: Various multibeam seafloor mapping sonars and sub-bottom and Acoustic Doppler Current Profiling systems.

Comment: *Thomas G Thompson* was the first of a class of oceanographic research vessels capable of operating worldwide in all seasons and suitable for use by navy laboratories, contractors and academic institutions. Dynamic positioning system enables precise station-keeping. 4,000 sq ft of laboratories. AGORs 23, 24 and 25 are operated by academic institutions for the Office of Naval Research through charter party agreements (AGOR 23-University of Washington; AGOR 24-Scripps Institution of Oceanography; AGOR 25-Woods Hole Oceanographic Institution). Ships in this series are able to meet changing oceanographic requirements for general-purpose, year-round, worldwide research. This includes launching, towing and recovering a variety of equipment. The ships are also involved in hydrographic data collection. *Atlantis* is the support vessel for human-occupied research submersibles operated by the National Deep Submergence Facility.

THOMAS G THOMPSON 6/2004, Mitsuhiro Kadota / 1045632

HIGH SPEED VESSELS

Notes: The T-Craft (Transformation Craft) program was launched by the Office of Naval Research in 2008 with the award of contracts to three shipbuilders: Umco Mandal, Alion Science and Technology, and Textron Marine and Land. The requirement is to design and build prototype vessels that combine surface-effect and hovercraft capabilities. The T-Craft would be an upgrade to US Navy's current inventory of air-cushioned LCACs which have limited range, relatively small cargo capacity and are not designed for open ocean deployment. The vessel is to be high-speed (up to 40 kt), wave-skimming vessel able to cross oceans, ferry supplies from ship to shore, and transform into hovercraft with capability to slide ashore. The vessel, up to about 85 m long, would have a range of 2,500 n miles at 20 kt in transit mode. Prototypes are to be ready for testing in 2010 and the competition winner may receive a contract to build the first of class.

1 HIGH SPEED VESSEL (HSV/MCS)

SWIFT HSV-2

Displacement, tons: 1,800
Dimensions, feet (metres): 318.9 x 88.6 x 11.3 (97.2 x 27.0 x 3.4)
Main machinery: 4 Caterpillar 3618 diesels; 38,620 hp (28.8 MW); 4 LIPS 1500 waterjets
Speed, knots: 42 (light); 38 (full load)
Range, n miles: 2,400 at 35 kt
Complement: 17 civilian, 20 military
Military lift: 500 tons cargo and 325 personnel
Helicopters: Platform for AH-1, MH/SH 60, UH-1 or CH-46.

Comment: Built as *Incat 61* (Incat Evolution 108) of aluminium construction. HSV-2 was under bareboat charter before being placed under long-term charter for up to five years from November 2008 to Military Sealift Command. The role of the ship is to conduct specialised missions worldwide. These have included deployment to the Horn of Africa, the Persian Gulf and Southeast Asia. *Swift* support relief operations in the US Gulf Coast region following hurricane Katrina. In 2007, the vessel served as the platform for an experiment for the Global Fleet Station concept, deploying to the Caribbean and South America.

SWIFT 2/2004, US Navy / 1043637

1 HIGH SPEED VESSEL (HSV)

WESTPAC EXPRESS HSV 4676

Displacement, tons: 1,464
Dimensions, feet (metres): 331.4 x 87.4 x 13.8 (101.0 x 26.65 x 4.2)
Main machinery: 4 Caterpillar 3618 diesels; 38,620 hp (28.8 MW); 4 Kamewa waterjets
Speed, knots: 40
Range, n miles: 1,100 at 35 kt
Military lift: 550 tonnes of equipment and 970 personnel

Comment: Following trials which started in July 2001, chartered by Military Sealift Command from Austal Ships, West Australia. The current charter was extended in February 2007 for up to 69 months. Aluminium construction. Employed by US Marine Corps Third Expeditionary Force (III MEF) to transport equipment and troops from Okinawa for training exercises in Yokohama, Guam and other regional destinations. The benefits include reduced dependence on and cost of airlift. The vessel will retain commercial livery and markings. Based at Okinawa.

WESTPAC EXPRESS 8/2001, Mitsuhiro Kadota / 0131282

0 + 1 (9) JOINT HIGH SPEED VESSELS (TSV)

Displacement, tons: To be announced
Dimensions, feet (metres): 337.9 x 93.5 x 12.6 (103.0 x 28.5 x 3.83)
Main machinery: 4 MTU 20V8000 M71L diesels; 48,800 hp (36.4 MW); 4 Wärtsilä WLD 1400 SR waterjets
Speed, knots: 43
Range, n miles: 1,200 at 35 kt
Military lift: 150 troops + 312 troops (seated) + 835 tonnes of equipment
Helicopters: Platform for one CH-53E

Comment: The Joint High Speed Vessel (JHSV) Program is for 10 high-speed intra-theatre connector vessels. This program was initiated following signature of a Memorandum of Agreement (MOA) with the US Army which married the Army's Theater Support Vessel (TSV) program with the Navy's High Speed Connector (HSC) program. Acquisition for JHSV is under the auspices of the Navy's Program Executive Office, Ships, but each service is to fund procurement and life-cycle costs of its own ships. Contracts for the preliminary design of JHSV were awarded to Austal USA, Bath Iron Works and Bollinger Shipyards (teamed with Incat) on 31 January 2008. On 13 November 2008, the Navy awarded Austal USA a fixed-price incentive contract for detailed design and construction of one vessel. The contract includes priced options for the construction of up to nine additional ships and associated shore-based spares. The semi-SWATH catamaran design ship is of aluminium construction and has an articulated slewing stern ramp. The first vessel, for the Army, is to be delivered in 2011.

JHSV (artist's impression) 11/2008*, Austal Ships / 1353633

DEEP SUBMERGENCE VEHICLES

(Included in US Naval Vessel Register)

Notes: (1) Deep submergence vehicles and other craft and support ships are operated by Submarine Development Squadron Five (CSDS-5) Deep Submergence Unit (DSU) in San Diego, California. The Squadron is a Major Command that includes advanced diving equipment, divers trained in 'saturation' techniques. DSV-2 is in an inactive lay-up condition. Two unmanned vessels CURV (Cable Controlled Underwater Remote Vehicle) Super Scorpis made test dives to 5,000 ft (1,524 m). (2) The Supervisor of Salvage and Diving operates four additional Navy ROVs. They are all air-transportable and can be operated from a variety of warships and commercial vessels.

1 CUTTHROAT CLASS (DSV)

Name	No	Builders	Commissioned
CUTTHROAT	LSV-2	Newport News Shipbuilding and General Dynamics Electric Boat Division	Apr 2001

Displacement, tons: 205
Dimensions, feet (metres): 111 x 10 x 9 (33.8 x 3.1 x 2.7)
Main machinery: Permanent Magnet electric motor; 3,000 hp(m) (2.23 MW)
Speed, knots: 34 dived

Comment: The contract was placed with Newport News and Electric Boat in January 1999 to build *Cutthroat* LSV-2. The largest autonomous unmanned submarine in the world, it is a 1:3.4 scaled-down model of the Virginia-class submarine used to test advanced submarine technologies, including hydro-acoustics, hydrodynamics and manoeuvring. Its diving depth matches that of the Virginia class. The forward compartment contains 1,680 lead acid batteries and the after compartment contains the propulsion and auxiliary systems together with data recording and control systems. All appendages, including control surfaces and simulated sonar fairing, can be removed or relocated. LSV-2 is operated by the Acoustic Research Detachment at the Instrumented Range at Lake Pend Oreille in Bayview, Idaho. It is named after a species of trout indigenous to the lake.

CUTTHROAT 2000, Newport News / 0105821

1 DEEP SUBMERGENCE VEHICLE: ALVIN TYPE (DSV)

Name	No	Builders	F/S
– (ex-Alvin)	DSV 2	General Mills Inc, Minneapolis	PSA

Displacement, tons: 18 full load
Dimensions, feet (metres): 26.5 x 8.5 (8.1 x 2.6)
Main machinery: 6 brushless DC motors; 6 thrusters; 2 vertical-motion thrusters (located near the centre of gravity); 2 horizontally (near stern) (1 directed athwartships, 1 directed longitudinally); 2 on rotatable shaft near stern for vertical or longitudinal motion
Speed, knots: 2
Range, n miles: 3 at 0.5 kt
Complement: 3 (1 pilot, 2 observers)

Comment: Ex-Alvin was built for operation by the Woods Hole Oceanographic Institution for the Office of Naval Research. Named for Allyn C Vine of Woods Hole Oceanographic Institution, the original configuration had an operating depth of 6,000 ft. Ex-Alvin accidentally sank in 5,051 ft of water on 16 October 1968, was subsequently raised in August 1969 and refurbished in 1970–71 to its original configuration. Placed in Naval service on 1 June 1971, she was subsequently refitted with a titanium pressure sphere to provide increased depth capability. Ex-Alvin has an operating depth of 4,500 m (14,764 ft) and is powered by two banks of lead-acid batteries providing a 120 V DC system with 47 kW/h of capacity. In October 2006, after conducting dive number 4,162, ex-Alvin was overhauled and provided with upgraded equipment. The National Science Foundation is funding a replacement, capable of depths of 8,500 m which is expected to become operational in 2010. Two other DSVs were placed out of service in 1997/98, one transferred to the Woods Hole Institute.

DSV 2 10/2003, Rod Catanach, Woods Hole Oceanographic Institution / 0009313

1 PRESSURIZED RESCUE MODULE

Displacement, tons: To be announced
Dimensions, feet (metres): To be announced
Main machinery: To be announced
Speed, knots: To be announced
Complement: To be announced

Comment: The Submarine Rescue, Diving and Recompression System (SRDRS) replaced DSRV on 1 October 2008. It consists of three principal components: a Pressurized Rescue Module (PRM), Submarine Decompression System (SDS) and an Atmospheric Diving Suit (ADS). The PRM is a tethered, remotely operated submersible launched and controlled from a vessel of opportunity in up to Sea State 4. It has a cylindrical hull on which navigation, video, propulsion, and life support systems are mounted externally. The vehicle is designed for submerged transit to a depth of 2,000 ft (610 m) of sea water, for docking and mating (up to a 45° angle) to a disabled submarine (DISSUB) and for evacuation and transfer of up to 18 rescued personnel directly to the Submarine Decompression Chambers (SDCs) into which rescued personnel can be transferred under pressure and safely decompressed to atmospheric pressure. ADS is a military adapted commercial diving suit that has been successfully tested to a depth of 2,000 ft (610 m). The system is designed to be transportable worldwide in a standard shipping container. Overall, the system is capable of rescuing up to 155 personnel from a pressurized DISSUB.

SDRS

6/2008, Richard Scott / 1353632

AUXILIARIES

Notes: As of January 2009, the US Navy had about 440 active and 10 inactive service craft, primarily small craft, on the US Naval Vessel Register. A majority of these vessels provide services to the fleet in various harbours and ports. Others are ocean-going ships that provide services to the fleet for research purposes. Most of the service craft are rated as 'active, in service', while others are rated as 'in commission' and some are accommodation ships.

2 CAPE FLATTERY CLASS (TORPEDOTRIALS CRAFT) (YTT)

BATTLE POINT YTT 10

DISCOVERY BAY YTT 11

Displacement, tons: 1,168 full load
Dimensions, feet (metres): 186.5 × 40 × 10.5 (56.9 × 12.2 × 3.2)
Main machinery: 1 Cummins KTA50-M diesel, 1,250 hp (932 kW) sustained; 1 shaft; 1 bow thruster; 400 hp (298 kW); 2 stern thrusters; 600 hp (448 kW)
Speed, knots: 11
Range, n miles: 1,000 at 10 kt
Complement: 31 plus 9 spare berths

Comment: Built by McDermott Shipyard, Morgan City, and delivered in 1991-92. Fitted with two 21 in Mk 59 and three (one triple) 12 75 in Mk 32 Mod 5 torpedo tubes. Used for torpedo trials and development at Keyport, Washington. A battery is fitted for limited duration operations with the diesel shutdown. Both based at Naval Underwater Warfare Centre, Keyport, WA.

YTT

9/1999, van Ginderen Collection / 0094162

2 DIVING TENDERS (YDT)

YDT 17-18

Displacement, tons: 275 full load
Dimensions, feet (metres): 132 × 27 × 6.0 (40.2 × 8.2 × 1.8)
Main machinery: 2 Caterpillar diesels; 2,800 hp (1.91 MW); 2 Hamilton waterjets
Speed, knots: 20
Complement: 8 plus 7 divers

Comment: Tenders used to support shallow-water diving operations and are based at Panama City, FL. Ordered from Swiftships in July 1997 and delivered in April 1999.

YDT 17

8/1999, US Navy / 0081000

23 PATROL CRAFT (YP)

YP 663

YP 665

YP 690-692

YP 694-698

YP 700-702

Displacement, tons: 167 full load
Dimensions, feet (metres): 108 × 24 × 8 (32.9 × 7.3 × 2.4)
Main machinery: 2 Detroit 12V-71 diesels, 680 hp (507 kW) sustained; 2 shafts
Speed, knots: 13.3
Range, n miles: 1,500 at 12 kt
Complement: 6 (2 officers) plus 24 midshipmen
Raders: Navigation, I-band

Comment: Built in the 1980s by Peterson Builders and Mannette Marine, both in Wisconsin. Twenty-one are based at the Naval Academy, Annapolis and two at Naval Underwater Warfare Centre, Keyport, WA.

YP 694

5/2006, James E Mathwick / 1167100

14 TORPEDO WEAPONS RETRIEVERS (YPT)

Comment: Four different types spread around the Fleet bases and at AUTC. There are 2 TRs × 65 ft (aluminium), 1 TRB × 72 ft (wood), 4 TWRs × 85 ft (aluminium), and 5 TWRs × 120 ft (steel).

TR 6

7/2000, Sattler/Steele / 0106813

FLOATING DRY DOCKS

Notes: The US Navy operates a limited number of floating dry docks to supplement dry dock facilities at major naval activities. The larger floating dry docks are made sectional to facilitate movement and to render them self-docking. Some of the ARD-type docks have the forward end of their docking well closed by a structure resembling the bow of a ship to facilitate towing. Berthing facilities, repair shops and machinery are housed in sides of larger docks. None is self-propelled.

SMALL AUXILIARY FLOATING DRY DOCKS (AFDL)

Name/No	Completed	Capacity (tons)	Construction	Status
DYNAMIC (AFDL 6)	1944	950	Steel	Active, Norfolk, VA
ADEPT (AFDL 23)	1944	1,770	Steel	Commercial lease, Ingleside, TX
RELANCE (AFDL 47)	1946	7,000	Steel	Commercial lease, Charleston, SC

Sales: AFDL 1 to Dominican Republic; 4, Brazil; 5, Taiwan; 11, Kampuchea; 20, Philippines; 22, Vietnam; 24, Philippines; 26, Paraguay; 28, Mexico; 33, Peru; 34 and 35, Taiwan; 39, Brazil; 40 and 44, Philippines. AFDL 23 to be sold to the current lessee.

DYNAMIC 11/2006, US Navy / 1306191

AUXILIARY REPAIR DRY DOCKS AND MEDIUM AUXILIARY REPAIR DRY DOCKS (ARDM)

Name/No	Commissioned	Capacity (tons)	Construction	Status
SHIPPINGPORT (ARDM 4)	1979	7,800	Steel	Active, New London, CT
ARCO (ARDM 5)	1986	7,800	Steel	Active, San Diego, CA

Sales: ARD 2 to Mexico; 5, Chile; 6, Pakistan; 8, Peru; 9, Taiwan; 11, Mexico; 12, Turkey; 13, Venezuela; 14, Brazil; 15, Mexico; 17, Ecuador; 22 (Windsor), Taiwan; 23, Argentina; 24, Ecuador; 25, Chile; 28, Colombia; 29, Iran; 32, Chile. ARDM 1 (ex-ARD 19) awaiting disposal decision

ARCO 9/2008, Julio Montes / 1353531

UNCLASSIFIED MISCELLANEOUS (IX)

- Notes: (1) In addition to the vessels listed below, one of the ex-Forrest Sherman class, *Decatur*, completed conversion on 21 October 1994 as a Self-Defence testing-ship, including high-energy laser trials. Tests with HFSWR (high-frequency surface wave radar) started mid-1997.
 (2) *Mercer APL 39* (ex-IX 502) and *Nueces APL 40* (ex-IX 503) are barrack ships of mid-1940s vintage
 (3) IX 516 is a decommissioned SSBN used for propulsion plant training.
 (4) IX 517 is a submarine sea trials escort vessel (*Gosport*)
 (5) IX 523 is used for security training, both at Norfolk, VA.
 (6) IX 310 is an accommodation barge at Naval Undersea Warfare Center, Dresden, NJ.
 (7) IX 521, IX 522 and IX 525 are individual drydock sections.
 (8) IX 527 and IX 528 are submarine test platforms, IX 529 is a surface ship test platform and IX 531 a test platform for HM&E
 (9) IX 530 (ex-YFND 5) is a berthing barge.

IX 517 7/2003, Declerck/Steeghers / 1043688

1 CONSTITUTION CLASS (AXS)

Name	Builders	Launched	Under Way	F/S
CONSTITUTION	Edmund Hart's Shipyard, Boston	21 Oct 1797	22 July 1798	AA

Displacement, tons: 2,250
 Dimensions, feet (metres): 204 oa; 175 w) x 43.5 x 22.5 (62.2; 53.3 x 13.2 x 6.8)
 Speed, knots: 13 under sail
 Complement: 75 (4 officers)

Comment: The oldest ship remaining on the Navy List. One of six frigates authorised 27 March 1794. Best remembered for her service in the war of 1812, in which she earned the nickname 'Old Ironsides'. Following extensive restoration (1927-30), went on a three year goodwill tour around the United States (1931-34), travelling over 22,000 miles and receiving over 4 million visitors. Open to the public in her homeport of Boston, the ship receives over 400,000 visitors a year. The most recent overhaul was conducted at the Charlestown Navy Yard, Boston from 1992-98. Under fighting sails (jibs, topsails and spanker) *Constitution* sailed for the first time in 116 years on 21 July 1997 as part of her bicentennial celebration. Armament is 32 x 24 pounder guns, 20 x 32 pounder carronades and 2 24 pounder bow-chasers. Sail area 42,710 sq ft (13,018 m²).

CONSTITUTION 7/1997, Todd Stevens, US Navy / 0016501

1 TRAINING SHIP (AXT)

Name	Builders	Commissioned
IX 514 (ex-YFU 79)	Pacific Coast Eng, Alameda	1968

Displacement, tons: 380 full load
 Dimensions, feet (metres): 125 x 36 x 8.0 (38.1 x 10.9 x 2.4)
 Main machinery: 4 GM 6-71 diesels; 696 hp (519 kW) sustained; 2 shafts
 Speed, knots: 8
 Radars: Navigation: Racal Decca; I-band.

Comment: Harbour utility craft converted in 1986 with a flight deck covering two thirds of the vessel and a new bridge and flight control position at the forward end. Used for basic helicopter flight training at Pensacola, Florida. Similar craft IX 501 deleted.

IX 514 12/1994, van Ginderen Collection / 0508217

1 RESEARCH SHIP (AGE)

SLICE

Displacement, tons: 180 full load
 Dimensions, feet (metres): 105 x 55.5 x 14 (32 x 16.9 x 4.3)
 Main machinery: 2 MTU 16V 396TB94 diesels; 13,700 hp(m) (10.07 MW); 2 shafts; LIPS cp props
 Speed, knots: 30
 Complement: 12

Comment: Technology demonstrator built by Pacific Marine and owned by Lockheed Martin. Participated as a littoral warfare combatant in Fleet Battle Experiment Juliet (FBE-J) (part of Millennium Challenge 2002). Modular capability packages, carried to simulate Littoral Combat Ship (LCS), included Mine Countermeasures (MCM), Antisubmarine Warfare (ASW), Force Protection and Time Critical Targeting. Weapons tested during FBE-J included the Lockheed Martin/Oerlikon Contraves 35 mm Millennium Gun and the NetFires System and launcher.

SLICE 10/2002, US Navy / 0572739

MILITARY SEALIFT COMMAND (MSC)

Notes: (1) The Military Sealift Command (MSC) operates in four mission areas: Naval Fleet Auxiliary Force, Special Mission, Strategic Sealift and Prepositioning
 (2) Headquarters are in the Washington Navy Yard, Washington DC. The organisation is commanded by a US Navy Rear Admiral and operates six subordinate commands worldwide. The Military Sealift Fleet Support Command (MSFSC) in Norfolk, VA, crews, trains, equips and maintains MSC's government-owned, government-operated ships across the globe. MSFSC is commanded by a civilian member of the US Senior Executive Service. In addition, MSC has five operational commands called Sealift Logistic Commands (SEALOGs) which operate in the Atlantic, Pacific, Europe, Central and Far East areas of operation. Each SEALOG is commanded by a US Navy Captain.
 (3) MSC ships are assigned standard hull designations with the added prefix 'T'. MSC ships carry no weapons systems. They are crewed by civilians who are either employed by the US federal government or private companies under contract to MSC. Many ships' funnels have black, grey, blue and gold horizontal bands.

NAVAL FLEET AUXILIARY FORCE

4 SUPPLY CLASS (FAST COMBAT SUPPORT SHIPS) (AOEH)

Name	No	Builders	Laid down	Launched	Commissioned	F/S
SUPPLY	T-AOE 6	National Steel & Shipbuilding Co	24 Feb 1989	6 Oct 1990	26 Feb 1994	AA
RAINIER	T-AOE 7	National Steel & Shipbuilding Co	31 May 1990	28 Sep 1991	21 Jan 1995	PA
ARCTIC	T-AOE 8	National Steel & Shipbuilding Co	2 Dec 1991	30 Oct 1993	16 Sep 1995	AA
BRIDGE	T-AOE 10	National Steel & Shipbuilding Co	16 Sep 1993	25 Aug 1996	5 Aug 1998	PA

Displacement, tons: 19,700 light; 48,500 full load
Dimensions, feet (metres): 753.7 × 107 × 38 (229.7 × 32.6 × 11.6)
Main machinery: 4 GE LM 2500 gas turbines; 105,000 hp (78.33 MW) sustained; 2 shafts
Speed, knots: 30
Range, n miles: 6,000 at 22 kt
Complement: 180 civilian; 28 naval
Cargo capacity: 156,000 barrels of fuel; 1,800 tons ammunition; 400 tons refrigerated cargo; 250 tons general cargo; 20,000 gallons water
Helicopters: 2 MH 60

Comment: Construction started in June 1988. Supply decommissioned and transferred to MSC in July 2001, Arctic in June 2002, Rainier in August 2003 and Bridge in June 2004

WASHINGTON CHAMBERS	T-AKE 11	National Steel & Shipbuilding Co	2011	2012
WILLIAM McLEAN	T-AKE 12	National Steel & Shipbuilding Co	2011	2012

Displacement, tons: 24,833 light; 42,000 full load
Dimensions, feet (metres): 689.0 × 105.6 × 29.9 (210.0 × 32.2 × 9.1)
Main machinery: Integrated electric propulsion; 4 FM/MAN 8&W 9L and 8L 48/60 diesel generators (35.7 MW); 2 Alstom motors, 1 shaft; fixed pitch prop, bow thruster
Speed, knots: 20
Range, n miles: 14,000 at 20 kt
Complement: 124 (11 naval)
Cargo capacity: 3,442 tons fuel; 200 tons potable water; 6,675 dry cargo; 1,716 tons refrigerated stores
Countermeasures: AN/SIQ-25 towed torpedo decoy.
Radars: Decca BridgeMaster; I-band
Helicopters: 2 UH 46D/MH-60.

Comment: Design and construction contract placed on 18 October 2001 for delivery of first and second vessels. Contract for construction of the third of class in July 2002 and for the fourth in July 2003. A further two were ordered in January 2004 and two more on 11 January 2005. A ninth ship was ordered on 30 January 2006 and a tenth on 1 February 2008. T-AKE 11 and 12 were ordered on 16 December 2008. The contract includes long-lead items for T-AKE 13 and 14 which are to be ordered in 2010. The ships are being built to commercial standards to replace existing AE and AFS. Three RAS stations are to be fitted each side.

LEWIS AND CLARK

11/2008*, Guy Toremans / 1353674

2 MARS CLASS (COMBAT STORES SHIPS) (AFSH)

Name	No	Builders	Commissioned	F/S
CONCORD	T-AFS 5	National Steel & Shipbuilding Co	27 Nov 1968	TPA
SAN JOSE	T-AFS 7	National Steel & Shipbuilding Co	23 Oct 1970	TPA

Displacement, tons: 9,200 light; 15,900-18,663 full load
Dimensions, feet (metres): 581 × 79 - 26 (177.1 × 24.1 × 7.9)
Main machinery: 3 Babcock & Wilcox boilers; 580 psi (40.8 kg/cm²); 825°F (440 C), 1 De Laval turbine (Westinghouse in AFS 6); 22,000 hp (16.4 MW); 1 shaft
Speed, knots: 20
Range, n miles: 10,000 at 18 kt
Complement: 127 civilians plus 22 naval
Cargo capacity: 2,625 tons dry stores; 1,300 tons refrigerated stores (varies with specific loadings)
Radars: Navigation: 2 Raytheon; I-band
Tacan: URN 25
Helicopters: 2 MH 60.

Comment: Concord transferred to MSC on 15 October 1992 after disarming and conversion to a civilian crew. San Jose followed on 2 November 1993 and Niagara Falls on 23 September 1994. All have accommodation improvements and stores lifts installed. These ships carry comprehensive inventories of aviation spare parts as well as the cargo listed above. Two others of the class de-activated in 1997 Niagara Falls deactivated in 2008 and Concord and San Jose to follow in 2009.

SAN JOSE

9/2008*, Shaun Jones / 1353674

4 KILAUEA CLASS (AMMUNITION SHIPS) (AEH)

Name	No	Builders	Commissioned	F/S
FLINT	T-AE 32	Ingalls Shipbuilding	20 Nov 1971	TPA
SHASTA	T-AE 33	Ingalls Shipbuilding	26 Feb 1972	TPA
MOUNT BAKER	T-AE 34	Ingalls Shipbuilding	22 July 1972	TAA
KISKA	T-AE 35	Ingalls Shipbuilding	16 Dec 1972	TPA

Displacement, tons: 9,340 light; 19,940 full load
Dimensions, feet (metres): 564 x 81 x 28 (171.9 x 24.7 x 8.5)
Main machinery: 3 Foster-Wheeler boilers; 600 psi (42.3 kg/cm²); 870°F (467°C); 1 GE turbine; 22,000 hp (16.4 MW); 1 shaft
Speed, knots: 20 **Range, n miles:** 10,000 at 18 kt
Complement: 133 civilians plus 4 naval plus 35 (the o aircrew)
Radars: Navigat on 2 Raytheon, I-band
Tacan: URN 25
Helicopters: 2 CH-46E Sea Knight (cargo normally embarked).

Comment: *Kilauea* transferred to MSC 1 October 1980, *Flint* in August 1995, *Kiska* in August 1996, *Mount Baker* in December 1996, *Shasta* in October 1997 and *Santa Barbara* in September 1998. An eighth of class was to have transferred in 1999, but has been decommissioned. *Butte* decommissioned in 2002 and *Santa Barbara* in 2005. Ships underwent a civilian modification overhaul during which accommodation was improved. Main armament taken out. Seven UNREP stations operational four port, three starboard. *Kilauea* was deactivated in 2008.

SHASTA 4/2008, Hachiro Nakai / 13535/0

1 SIRIUS (LYNESS) CLASS (COMBAT STORES SHIP) (AFSH)

Name	No	Builders	Commissioned	F/S
SATURN (ex-Stromness)	T-AFS 10	Swan Hunter & Wigham Richardson Ltd, Wallsend-on-Tyne	10 Aug 1967	TAA

Displacement, tons: 9,010 light; 16,792 full load
Measurement, tons: 7,782 dwt; 12,359 gross; 4,744 net
Dimensions, feet (metres): 524 x 72 x 22 (159.7 x 22 x 6.7)
Main machinery: 1 Wallsend-Sulzer 8RD76 diesel; 11,520 hp (8.59 MW); 1 shaft
Speed, knots: 18 **Range, n miles:** 12,000 at 16 kt
Complement: 118-127 civilians plus 24 naval
Cargo capacity: 8,313 m³ dry; 3,921 m³ frozen
Radars: Navigation: 2 Raytheon; I-band
Tacan: URN 25
Helicopters: 2 MH-60

Comment: Purchased from the UK on 1 October 1983. Refitted from August 1992-96 to improve communications, RAS facilities and cargo handling equipment. *Sirius* deactivated in 2005. *Spica* in 2008 and *Saturn* to follow in 2009.

SATURN 5/2006, Marco Ghigino / 1167536

2 MERCY CLASS (HOSPITAL SHIPS) (AHH)

Name	No	Builders	Commissioned	F/S
MERCY (ex-SS Worth)	T-AH 19	National Steel & Shipbuilding Co	1976	ROS/TPA
COMFORT (ex-SS Rose City)	T-AH 20	National Steel & Shipbuilding Co	1976	ROS/TAA

Displacement, tons: 89,380 full load
Measurement, tons: 54,367 gross; 35,958 net
Dimensions, feet (metres): 894 x 105.6 x 32.8 (272.6 x 32.2 x 10)
Main machinery: 2 boilers; 2 GE turbines; 24,500 hp (18.3 MW); 1 shaft
Speed, knots: 17 **Range, n miles:** 13,420 at 17 kt
Complement: 61 civilian crew; 820 military medical staff; 387 military support staff
Radars: Navigation: E/F/I-band
Tacan: URN 25
Helicopters: Platform only

Comment: Converted San Clemente class tankers. *Mercy* was commissioned 19 December 1986; *Comfort* on 30 November 1987. Each ship has 1,000 beds and 12 operating theatres. Normally, the ships are kept in a reduced operating status in Baltimore, MD, and San Diego, CA, by a small crew of civilian mariners and active duty Navy medical and support personnel. Each ship can be fully activated and crewed within five days. *Mercy* deployed to Southeast Asia after tsunami of 26 December 2004. She spent two months off the Indonesian province of Banda Aceh. In 2006, *Mercy* conducted a four-month humanitarian assistance mission and treated over 60,000 patients in the Philippines, Bangladesh, Indonesia and East Timor. A similar mission was conducted by *Comfort* in South America and the Caribbean during 2007 and again by *Mercy* in Southeast Asia and the Pacific in mid-2008.

MERCY 8/2008, Chris Sattler / 1353626

14 HENRY J KAISER CLASS (OILERS) (AOH)

Name	No	Builders	Laid down	Commissioned	F/S
HENRY J KAISER	T-AO 187	Avondale	22 Aug 1984	19 Dec 1986	TPA/ROS
JOHN LENTHALL	T-AO 189	Avondale	15 July 1985	2 June 1987	TAA
WALTER S DIEHL	T-AO 193	Avondale	8 July 1986	13 Sep 1988	TPA
JOHN ERICSSON	T-AO 194	Avondale	15 Mar 1989	18 Mar 1991	TPA
LEROY GRUMMAN	T-AO 195	Avondale	7 June 1987	2 Aug 1989	TAA
KANAWHA	T-AO 196	Avondale	13 July 1989	6 Dec 1991	TAA
PECOS	T-AO 197	Avondale	17 Feb 1988	8 July 1990	TPA
BIG HORN	T-AO 198	Avondale	9 Oct 1989	31 July 1992	TAA
TIPPECANOE	T-AO 199	Avondale	19 Nov 1990	26 Mar 1993	TPA
GUADALUPE	T-AO 200	Avondale	9 July 1990	26 Oct 1992	TPA
PATUXENT	T-AO 201	Avondale	16 Oct 1991	21 June 1995	TAA
YUKON	T-AO 202	Avondale	13 May 1991	11 Dec 1993	TPA
LARAMIE	T-AO 203	Avondale	1 Oct 1994	24 May 1996	TAA
RAPPAHANNOCK	T-AO 204	Avondale	29 June 1992	7 Nov 1995	TPA

Displacement, tons: 40,900; 41,225 (T-AO 201, 203-204) full load
Dimensions, feet (metres): 677.5 x 97.5 x 36 (206.5 x 29.7 x 10.9)
Main machinery: 2 Colt-Pielstick 10 PC4.2V 570 diesels; 34,422 hp (24.3 MW) sustained; 2 shafts; cp props
Speed, knots: 20 **Range, n miles:** 6,000 at 18 kt
Complement: 74-89 civilian plus 5 naval
Cargo capacity: 180,000; 159,500 (T-AO 201, 203-204) barrels of fuel oil or aviation fuel
Countermeasures: Decoys SLQ 25 Nixie, towed torpedo decoy
Radars: Navigation: 2 Raytheon; I-band
Helicopters: Platform only.

Comment: Construction was delayed initially by design difficulties, by excessive vibration at high speeds and other problems encountered in the first ship of the class. There are stations on both sides for underway replenishment of fuel and solids. Fitted with integrated electrical auxiliary propulsion. TAOs 201, 203 and 204 were delayed by the decision to fit double hulls to meet the requirements of the Oil Pollution Act of 1990. This modification increased construction time from 32 to 42 months and reduced cargo capacity by 17 per cent although this can be restored in an emergency. Hull separation is 1.83 m at the sides and 1.98 m on the bottom. TAOs 181 and 192 were transferred from Penn Ship (when the yard became bankrupt) to Tampa. Tampa's contract was also cancelled on 25 August 1993. Neither ship was completed. T-AO 187 is kept in reduced operating status on the west coast. T-AO 188 and 190 were laid up in mid-1996 and T-AO 189 in September 1997, but returned to service in January 1999. T-AO 188 returned to reduced operating status in April 2005 but was transferred to the inactive fleet in October 2006.

BIG HORN 3/2006, M Declerck / 1167536

HENRY KAISER 10/2007, Michael Nitz / 1353627

4 SAFEGUARD CLASS (SALVAGE SHIPS) (ARS)

Name	No	Builders	Commissioned	F/S
SAFEGUARD	T-ARS 50 (ex-ARS 50)	Peterson Builders	16 Aug 1985	PA
GRASP	T-ARS 51 (ex-ARS 51)	Peterson Builders	14 Dec 1985	AA
SALVOR	T-ARS 52 (ex-ARS 52)	Peterson Builders	14 June 1986	PA
GRAPPLE	T-ARS 53 (ex-ARS 53)	Peterson Builders	15 Nov 1986	AA

Displacement, tons: 3,283 full load
Dimensions, feet (metres): 256 x 51 x 17 (77.7 x 15.5 x 5.2)
Main machinery: 4 Caterpillar diesels; 4,200 hp (3.13 MW); 2 shafts; cp Kort nozzle props; bow thruster; 500 hp (373 kW)
Speed, knots: 14 **Range, n miles:** 8,000 at 12 kt
Complement: 26 civilians plus 4 naval comms plus up to 34 naval divers
Radars: Navigation: E/F/I-band.

Comment: Prototype approved in FY81, two in FY82 and one in FY83. The procurement of the fifth ARS was dropped on instructions from Congress. The design follows conventional commercial and Navy criteria. Can support surface-supplied diving operations to a depth of 58 m. Equipped with recompression chamber. Bollard pull, 65.5 tons. Using beach extraction equipment the pull increases to 360 tons. 150 ton deadlift. *Grasp* transferred from the US Navy on 19 January 2006 and *Grapple* on 13 July 2006. *Salvor* and *Safeguard* followed on 12 January 2007 and 28 September 2007 respectively.

GRAPPLE 9/2007, Michael Winter / 1305243

Main machinery: 2 GM EMD 20-645F7B diesels; 7,250 hp (m) (5.41 MW) sustained; 2 shafts; Kort nozzles, cp props, bow thruster; 300 hp (224 kW)
Speed, knots: 14.5. **Range, n miles:** 10,000 at 13 kt
Complement: 16 civilians plus 4 naval
Radars: Navigation: E/F/I-band.

Comment: Built at Marinette Marine Corp, Wisconsin patterned after commercial offshore supply ship design. Originally intended as successors to the Cherokees and Abnaki class ATFs. All transferred to MSC upon completion. 10 ton capacity crane and a bollard pull of at least 54 tons. A 'dock grid' is fitted aft which contains 1 in bolt receptacles spaced 24 in apart. This allows for the bolting down of a wide variety of portable equipment in support of salvage and training evolutions worldwide. There are two fire pumps supplying three fire monitors with up to 2,200 gallons of foam per minute. A deep module can be embarked to support naval salvage teams. Two of the class deactivated for commercial lease in 1999 and one other in 2005

APACHE 6/2008, Richard Scott / 1353625

SIoux 7/2004, Michael Nitz / 1043836

SPECIAL MISSION SHIPS

Notes: (1) Most special missions ships are operated by civilian mariners who work for private companies under contract to MSC. USNS *Zeus* is crewed by civil service mariners (CIVMARs) working for MSC. USS *Mount Whitney* and USS *Emory S Land* have hybrid crews of navy sailors and CIVMARs. Technical work and communication support conducted by embarked military personnel as well as civilian technicians from other commands and agencies
 (2) There is also a number of chartered vessels: *Dolores Chouest*, *C-Commando* and *C-Champion* support the Naval Special Warfare Command and are owned and operated by Edison Chouest. *MV Graystone*, *MV Bluewater*, *MV Silverstar* and *MV Gemstone* provide submarine support and are owned and operated by Hornbeck Offshore Services.
 (3) The Command Ship *Mount Whitney* LCC 20 transferred to MSC in 2004 and deployed to the Mediterranean Sea as the 6th Fleet command ship. *Mount Whitney* is one of the first ships to be operated jointly by uniformed personnel and CIVMARs from MSC.
 (4) Submarine tender USS *Emory S Land* transferred to MSC in 2008 and its sister ship JSS *Frank Cable* is scheduled to transfer to MSC in 2010. Sub tenders, like command ships, are unusual in that they have both uniformed Navy personnel and civil service mariners serving under the leadership of a US Navy Captain, which allows the ships to retain their commissioned status.

1 ZEUS CLASS (CABLE REPAIRING SHIP) (ARC)

Name	No	Builders	Commissioned	F/S
ZEUS	T-ARC 7	National Steel & Shipbuilding Co	19 Mar 1984	TAA

Displacement, tons: 8,370 light; 14,934 full load
Dimensions, feet (metres): 513 x 73 x 25 (156.4 x 22.3 x 7.6)
Main machinery: Diesel-electric; 5 GM EMD 20-645F7B diesel generators, 14.32 MW sustained; 2 motors, 10,200 hp (7.51 MW); 2 shafts; bow thrusters (forward and aft)
Speed, knots: 15.8. **Range, n miles:** 10,000 at 15 kt
Complement: 55 civilians plus 10 scientists

Comment: Ordered 7 August 1979. Remotely manned engineering room controlled from the bridge. The only active cable laying/repair ship in the US Navy, she can lay up to 1,000 miles of cable in depths of 9,000 ft. The ship is also equipped for bottom mapping surveys to support cable operations.

ZEUS 8/2006, Hachiro Nakai / 1167499

1 CONVERTED COMPASS ISLAND CLASS (MISSILE RANGE INSTRUMENTATION SHIP) (AGM)

Name	No	Builders	Commissioned	F/S
OBSERVATION ISLAND (ex-Empire State Manner)	T-AGM 23 (ex-AG 154, ex-YAG 57)	New York Shipbuilding	5 Dec 1958	TPA

Displacement, tons: 13,060 light; 17,015 full load
Dimensions, feet (metres): 564 x 76 x 25 (171.6 x 23.2 x 7.6)
Main machinery: 2 Foster-Wheeler boilers; 600 psi (42.3 kg/cm²); 875°F (467°C); 1 GE turbine; 19,250 hp (14.36 MW); 1 shaft
Speed, knots: 20
Range, n miles: 17,000 at 15 kt
Complement: 66 civilians plus 59 scientists
Radars: Raytheon 1650/9X and 1660/12S; I-band.
Tacan: URN 25.

Comment: Built as a Manner class merchant ship (C4-S-A1 type); launched on 15 August 1953, acquired by the Navy on 10 September 1956 for use as a Fleet Ballistic Missile (FBM) test ship. Converted at Norfolk Naval Shipyard. In reserve from September 1972. On 18 August 1977, *Observation Island* was reacquired by the US Navy from the Maritime Administration and transferred to the Military Sealift Command. Reclassified AGM 23 on 1 May 1979. Converted to Missile Range Instrumentation Ship from July 1979-April 1981 at Maryland SB and DD Co to carry an Air Force shipborne phased array radar system for collection of data on foreign and domestic ballistic missile tests. Operated by the Navy in the North Pacific for the US Air Force.

OBSERVATION ISLAND 4/2008, Hachiro Nakai / 1353571

1 IMPECCABLE CLASS (OCEAN SURVEILLANCE SHIP) (AGOS)

Name	No	Builders	Commissioned	F/S
IMPECCABLE	T-AGOS 23	Tampa Shipyard/Halter Marine	22 Mar 2001	TAA

Displacement, tons: 5,370 full load
Dimensions, feet (metres): 281.5 x 95.8 x 26 (85.8 x 29.2 x 7.9)
Main machinery: Diesel-electric; 3 GM EMD 12-645F7B diesel generators; 5.48 MW (60 Hz) sustained; 2 Westinghouse motors; 5,000 hp (3.73 MW); 2 shafts; 2 omni-thruster hydrojets, 1,800 hp (1.34 MW)
Speed, knots: 12; 3 when towing
Range, n miles: 3,000 at 12 kt
Complement: 21 civilian crew plus 5 sponsor agency civilians plus 16 military
Radars: Raytheon; I-band.
Sonars: SURTASS; LFA and passive surveillance towed array

Comment: Hull form based on that of *Victorious*. Acoustic systems include an active low frequency towed array (LFA), which has a series of modules each of which houses two high-powered active transducers. These can be used with either mono or bistatic receivers. The payload is lowered through a centre well. Laid down 2 February 1993. Ship was 60 per cent complete when shipyard encountered difficulties that led to termination in October 1993 of the contract for completion of two Kaiser class oilers. Work stopped on *Impeccable*, and the construction contract was also cancelled. The contract was assigned to Halter Marine on 20 April 1995 to complete the ship. Launched 25 April 1998. WSC-3(V)3 and WSC-6 communications fitted

IMPECCABLE 5/2006, Hachiro Nakai / 1167500

**1 CONVERTED STALWART CLASS
(MISSILE RANGE INSTRUMENTATION) (TAGM)**

Name	No	Laid down	Commissioned	F/S
INVINCIBLE	T-AGM 24	8 Nov 1985	3 Feb 1987	TPA

Displacement, tons: 2,285 full load
 Dimensions, feet (metres): 224 x 43 x 14.9 (68.3 x 13.1 x 4.5)
 Main machinery: Diesel-electric; 4 Caterpillar D 398B diesel generators; 3,200 hp (2.39 MW); 2 motors, 1,600 hp (1.2 MW); 2 shafts, bow thruster; 550 hp (410 kW)
 Speed, knots: 11
 Range, n miles: 4,000 at 11 kt
 Complement: 38 (18 civilian mariners, 11 sponsor personnel)
 Radars: US Air Force Cobra Gemini; dual-band; E/F/I-bands.
 Navigation: Furuno, E/F/I-bands.

Comment: Converted to a Missile Range Instrumentation ship (TAGM) in early 1989 and provides a seaborne radar platform for US Air Force data collection requirements on theatre ballistic missiles

INVINCIBLE 6/1989, Ships of the World / 0984177

1 WATERS CLASS (NAVIGATION TEST SUPPORT SHIP) (AGS)

Name	No	Builders	Commissioned	F/S
WATERS	T-AG 45	Avondale Industries	26 May 1993	TAA

Displacement, tons: 12,208 full load
 Dimensions, feet (metres): 455 x 68.9 x 21 (138.7 x 21 x 6.4)
 Main machinery: Diesel-electric; 5 GM EMD diesels; 7,400 hp (5.45 MW); 2 Westinghouse motors, 6,800 hp (15.07 MW); 2 shafts; 4 thrusters
 Speed, knots: 12
 Range, n miles: 6,500 at 12 kt
 Complement: 86 civilians plus 59 scientists
 Radars: 2 Raytheon; E/F- and I-bands.

Comment: Ordered 4 April 1990 Laid down 16 May 1991 and launched 6 June 1992 Carried out oceanographic and acoustic surveys in support of the Integrated Underwater Surveillance System. Converted in 1998 to support submarine navigation system testing and missile tracking. In 1999 has replaced *Vanguard* and *Range Sentinel*, both of which have been deactivated.

WATERS 4/1994, Giorgio Arca / 0508213

4 VICTORIOUS CLASS (OCEAN SURVEILLANCE SHIPS) (AGOS)

Name	No	Builders	Commissioned	F/S
VICTORIOUS	T-AGOS 19	McDermott Marine	5 Sep 1991	TPA
ABLE	T-AGOS 20	McDermott Marine	22 July 1992	TAA
EFFECTIVE	T-AGOS 21	McDermott Marine	27 Jan 1993	TPA
LOYAL	T-AGOS 22	McDermott Marine	1 July 1993	TAA

Displacement, tons: 3,396 full load
 Dimensions, feet (metres): 234.5 x 93.6 x 24.8 (71.5 x 28.5 x 7.6)
 Main machinery: Diesel-electric; 4 Caterpillar 3512TA diesels; 5,440 hp (4 MW) sustained; 2 GE motors; 3,200 hp (2.39 MW); 2 shafts; 2 bow thrusters; 2,400 hp (1.79 MW)
 Speed, knots: 16; 3 when towing
 Complement: 19 civilian plus 5 sponsor personnel and 7 military
 Radars: Navigation 2 Raytheon; I-band.
 Sonars: SURTASS and LFA; towed array; passive/active surveillance.

Comment: All of SWATH design because of its greater stability at slow speeds in high latitudes under adverse weather conditions. A contract for the first SWATH ship, T-AGOS 19, was awarded in November 1986, and options for a further three were exercised in October 1988 T-AGOS 20 deactivated in July 2003 and re-activated in 2007 and reconfigured to accommodate LFA.

ABLE 8/2008* / 1353624

1 JOHN MCDONNELL CLASS (SURVEYING SHIP) (AGS)

Name	No	Builders	Commissioned	F/S
JOHN MCDONNELL	T-AGS 51	Halter Marine	16 Dec 1991	TPA

Displacement, tons: 2,054 full load
 Dimensions, feet (metres): 208 x 45 x 14 (63.4 x 13.7 x 4.3)
 Main machinery: 1 GM EMD 12-645E6 diesel; 2,550 hp (1.9 MW) sustained; 1 auxiliary diesel, 230 hp (172 kW); 1 shaft
 Speed, knots: 12
 Range, n miles: 13,800 at 12 kt
 Complement: 22 civilians plus 11 scientists

Comment: Laid down on 3 August 1989 and launched on 15 August 1990. Carries 34 ft survey launches for data collection in coastal regions with depths between 10 and 600 m and in deep water to 4,000 m. A small diesel is used for propulsion at towing speeds of up to 6 kt. Simrad high-frequency active hull-mounted and side scan sonars are carried. *Littlehales* was deactivated in March 2003 and transferred to NOAA.

JOHN MCDONNELL 8/2004, Hachiro Nakai / 1043695

6 PATHFINDER CLASS (SURVEYING SHIPS) (AGS)

Name	No	Builders	Launched	Commissioned	F/S
PATHFINDER	T-AGS 60	Halter Marine	7 Oct 1993	5 Dec 1994	TAA
SUMNER	T-AGS 61	Halter Marine	19 May 1994	30 May 1995	TPA
BOWDITCH	T-AGS 62	Halter Marine	15 Oct 1994	30 Dec 1995	TPA
HENSON	T-AGS 63	Halter Marine	21 Oct 1996	20 Feb 1998	TAA
BRUCE C HEEZEN	T-AGS 64	Halter Marine	17 Dec 1998	13 Jan 2000	TAA
MARY SEARS	T-AGS 65	Halter Marine	19 Oct 2000	17 Dec 2001	TAA

Displacement, tons: 4,782 full load
 Dimensions, feet (metres): 328.5 x 58 x 19 (100.1 x 17.7 x 5.8)
 Main machinery: Diesel-electric; 4 EMD/Baylor diesel generators; 11,425 hp (8.52 MW); 2 GE CDF 1944 motors; 8,000 hp (5.97 MW) sustained; 6,000 hp (4.48 MW); 2 LIPS Z drives; bow thruster; 1,500 hp (1.19 MW)
 Speed, knots: 16
 Range, n miles: 12,000 at 12 kt
 Complement: 24 civilians plus 27 oceanographers

Comment: Contract awarded in January 1991 for two ships with an option for a third which was taken up on 29 May 1992. A fourth ship was ordered in October 1994 with an option for two more. Fifth ordered 15 January 1997 and sixth on 6 January 1999. There are three multipurpose cranes and five winches plus a variety of oceanographic equipment including multibeam echo-sounders, towed sonars and expendable sensors. ROVs may be carried. The aft deck and dry laboratory spaces are reconfigurable to support a variety of missions.

BOWDITCH 8/2006, Hachiro Nakai / 1167501

HENSON 6/2007, L-G Nilsson / 1305188

2 EMORY S LAND CLASS (SUBMARINE TENDERS) (ASH)

Name	No	Builders	Laid down	Launched	Commissioned	F/S
EMORY S LAND	AS 39	Lockheed SB & Construction Co, Seattle	2 Mar 1976	4 May 1977	7 July 1979	PA
FRANK CABLE	AS 40	Lockheed SB & Construction Co, Seattle	2 Mar 1976	14 Jan 1978	29 Oct 1979	PA

Displacement, tons: 13,911 standard; 22,978 full load
Dimensions, feet (metres): 643.8 x 85 x 28.5 (196.2 x 25.9 x 8.7)
Main machinery: 2 Combustion Engineering boilers; 320 psi (43.6 kg/cm²); 860°F (462°C); 1 De Laval turbine, 20,000 hp (14.9 MW); 1 shaft
Speed, knots: 20 **Range, n miles:** 10,000 at 12 kt
Complement: AS 39: 1,268 (83 officers); AS 40: 1,270 (81 officers)

Guns: 4 Oerlikon 20 mm Mk 57
Radars: Navigation, ISC Cardion SPS-55, I/J-band
Helicopters: Platform only

Comment: The first US submarine tenders designed specifically for servicing nuclear-propelled attack submarines. Each ship can simultaneously provide services to four submarines moored alongside. Equipped with one 30 ton crane and two 5 ton mobile cranes. There

is a 23 bed sick bay. *Frank Cable* is based at Guam and *Emory S Land* changed homeport to Bremerton, WA in October 2007. *Emory S Land* transferred to Military Sealift Command in February 2008 and *Frank Cable* is scheduled to transfer in 2010 but, while operated by a hybrid crew of naval and civilian personnel, both ships remain under naval command and in commissioned status.

EMORY S LAND

4/1999, Jürg Kürsener / 0084155

0 + 1 MISSILE RANGE INSTRUMENTATION SHIP (AGM)

Name	No	Builders	Laid down	Launched	Commissioned
HOWARD O LORENZEN	T-AGM 25	VT Halter Marine	13 Aug 2008	2008	2010

Displacement, tons: 12,575 standard
Dimensions, feet (metres): 534.1 x 88.6 x 21.3 (162.8 x 27.0 x 6.51)
Main machinery: Diesel-electric; 4 diesel generators; 2 motors; 20,115 hp (15 MW); 2 shafts
Speed, knots: 20
Range, n miles: 12,000 at 12 kt
Complement: 30 + 46 technicians + 12 spare
Radars: Navigation: To be announced

Comment: The Cobra Judy Replacement programme is for the replacement of the current missile range instrumentation ship *Observation Island* by 2012 and the development of a successor mission equipment system to conduct worldwide technical data collection against ballistic missiles in flight. Raytheon was awarded the contract in December 2003 for an integrated, computer-driven surveillance and data collection radar system that comprises a dual-band radar suite. This consists of I-band and E/F-band active phased array sensors and other related mission equipment.

STRATEGIC SEALIFT FORCE

Notes: These ships provide ocean transportation for Defense and other government agencies. As well as those listed below, MSC also contracts additional tankers and dry cargo ships as needed. As a result these numbers vary with the operational requirement.

2 SHUGHART CLASS (LARGE, MEDIUM SPEED, RO-RO (LMSR) SHIPS) (AKR)

Name	No	Commissioned	F/S
SHUGHART (ex-Laura Maersk)	T-AKR 295	7 May 1996	TWWR
YANO (ex-Leise Maersk)	T-AKR 297	8 Feb 1997	TWWR

Measurement, tons: 54,298 grt
Dimensions, feet (metres): 908.8 x 105.5 x 34.4 (276.4 x 32.2 x 10.5)
Main machinery: 1 Burmeister & Wain 12L90 GFCA diesel, 46,653 hp(m) (34.29 MW); 1 shaft; bow and stern thrusters
Speed, knots: 24
Range, n miles: 12,000 at 24 kt
Complement: 21-44 civilian; up to 50 military
Cargo capacity: 255,064 sq ft plus 47,023 sq ft deck cargo
Radars: Navigation: 2 Sperry ARPA; I-band.

Comment: Both were container ships built in Denmark in 1981 and lengthened by Hyundai in 1987. Conversion contract awarded to National Steel and Shipbuilding in July 1993. Both fitted with a stern slewing ramp, side accesses and cranes for both roll-on/roll-off and lift-on/lift-off capabilities. Two twin 57 ton cranes. Conversion for *Shughart* started in June 1994, *Yano* in May 1995. *Soderman* underwent conversion to merchant prepositioning ship and renamed *Stockham*.

YANO

12/2006, Adolfo Ortigueira GH / 1167838

2 GORDON CLASS (LARGE, MEDIUM-SPEED, RO-RO (LMSR) SHIPS) (AKR)

Name	No	Commissioned	F/S
GORDON (ex-Selandia)	T-AKR 296	23 Aug 1996	TWWR
GILLILAND (ex-Jutlandia)	T-AKR 298	24 May 1997	TWWR

Measurement, tons: 55,422 grt
Dimensions, feet (metres): 956 x 106.8 x 36.3 (291.4 x 32.2 x 11.9)
Main machinery: 1 Burmeister & Wain 12K84EF diesel; 26,000 hp(m) (19.11 MW); 2 Burmeister & Wain 9K84EF diesels; 39,000 hp(m) (28.66 MW); 3 shafts (centre cp prop); bow thruster
Speed, knots: 24, **Range, n miles:** 12,000 at 24 kt
Complement: 21-49 civilian; 50 military
Cargo capacity: 276,109 sq ft plus 45,722 sq ft deck cargo
Radars: Navigation: 2 Sperry ARPA, I-band.

Comment: Built in Denmark in 1972 and lengthened by Hyundai in 1984. Conversion contract given to Newport News Shipbuilding on 30 July 1993. Both fitted with a stern slewing ramp, side accesses and improved craneage. Conversion started for both ships on 15 October 1993.

GILLILAND

2/2000, A Sharma / 0083304

7 BOB HOPE CLASS (LARGE, MEDIUM-SPEED, RO-RO (LMSR) SHIPS) (AKR)

Name	No	Builders	Launched	Commissioned	F/S
BOB HOPE	T-AKR 300	Avondale	27 Mar 1997	18 Nov 1998	TWWR
FISHER	T-AKR 301	Avondale	21 Oct 1997	4 Aug 1999	TWWR
SEAY	T-AKR 302	Avondale	25 June 1998	30 Mar 2000	TWWR
MENDONCA	T-AKR 303	Avondale	25 May 1999	30 Jan 2001	TWWR

BRITTIN	T-AKR 305	Avondale	21 Oct 2000	11 July 2002	TWWR
BENAVIDEZ	T-AKR 306	Avondale	11 Aug 2001	10 Sep 2003	TWWR

Displacement, tons: 61,680 full load
Dimensions, feet (metres): 948.9 x 106 / 35 (289.1 x 32.3 x 11)
Main machinery: 4 Colt Pielstick 10 PC4.2 V diesels, 65,160 hp(m) (47.89 MW); 2 shafts, cp props
Speed, knots: 24, **Range, n miles:** 12,000 at 24 kt
Complement: 26-45 civilian; up to 60 military
Cargo capacity: 317,510 sq ft plus 70,152 sq ft deck cargo

Comment: Contract awarded in 1993, options for additional ships exercised in 1994, 1995, 1996 and 1997. All fitted with a stern slewing ramp, side accesses and cranes for both roll-on/roll-off and lift-on/lift-off capabilities. Ramps extend to 130 ft (40 m), and two twin 55 ton cranes are installed.

PILILAAU

1/2008, Shaun Jones / 1305187

4 CHAMPION CLASS (TANKERS) (AOT)

Name	No	Builders	Commissioned
PAUL BUCK	T-AOT 1122	American SB Co, Tampa, FL	7 June 1965
SAMUEL L GOBB	T-AOT 1123	American SB Co, Tampa, FL	15 Nov 1965
RICHARD G MATTHIENSEN	T-AOT 1124	American SB Co, Tampa, FL	18 Feb 1966
LAWRENCE H GIANELLA	T-AOT 1125	American SB Co, Tampa, FL	22 Apr 1966

Displacement, tons: 39,624 full load
 Dimensions, feet (metres): 615 x 90 x 36 (187.5 x 27.4 x 10.8)
 Main machinery: 1 Sulzer 5RTA76 diesel, 18,400 hp (13.52 MW) sustained; 1 shaft
 Speed, knots: 16. Range, n miles: 12,000 at 16 kt
 Complement: 23 (9 officers)
 Cargo capacity: 238,400 barrels of oil fuel

Comment: Built for Ocean Carriers Inc, Houston, Texas specifically for long-term time charter to the Military Sealift Command (20 years) as Point-to-Point fuel tankers. Purchased by the US Navy in 2003 and designated USNS. The last two are equipped with a modular fuel delivery system to allow them to rig underway replenishment gear

LAWRENCE H GIANELLA

1/2002, A Sharma / 0530036

PREPOSITIONING FORCE

Notes: (1) Military Sealift Command's Afloat Prepositioning Force (APF) improves US capabilities to deploy forces rapidly to any area of conflict. The force includes long-term chartered commercial vessels, activated Ready Reserve Force ships and government ships and includes vehicle/cargo carriers, container ships, aviation logistics ships and Large, Medium-Speed, Roll-on/roll-off (LMSR) ships. Together these ships preposition equipment and supplies for the Marine Corps, Navy, Army, Air Force and the Defense Logistics Agency. The APF comprises the Maritime Prepositioning Force (MPF), Navy, Defense Logistics Agency and Air Force ships (NDAF) and Army Prepositioned Stocks-3 ships (APS-3)

(2) The MPF operates in forward-deployed Maritime Prepositioning Squadrons (MPSRONs). MPSRON One is located in the Eastern Atlantic Ocean and Mediterranean Sea; MPSRON Two at Diego Garcia in the Indian Ocean and MPSRON Three in the western Pacific Ocean. There are 15 ships loaded with equipment and supplies for the US Marine Corps.

(3) Three NDAF ships are loaded with US Air Force and Navy ammunition. One ship serves as an at-sea pumping station to transfer fuel to shore from a tanker as far as 8 miles from the coast. Two T-AVB ships serve as USMC intermediate maintenance facilities for rotary wing aircraft. Two high-speed vessels are also part of NDAF - one transports marines and their cargo in the Far East and the other conducts specialised missions worldwide.

(4) Nine APS-3 ships support requirements for US Army brigade and combat support/ combat service support elements. In 2007, some of the LMSRs were put in reduced operating status. In 2008, one LMSR was assigned to the Maritime Prepositioning Force.

(5) Maritime Prepositioning Force (Future): the US Navy's Seabasing initiative, in which manoeuvre forces are supported by logistics and combat fire support in staging bases in or near the theatre of operations, is under development. This is likely to require a variety of platforms that can assemble offshore and either redeploy quickly or support continuing operations ashore. It is envisaged that a seabase would comprise an Expeditionary Strike Group (ESG), a Carrier Strike Group (CSG), and a Maritime Prepositioning Group (MPG) supported by a Combat Logistics Force. Various classes of Maritime Prepositioning Force (Future) ships are to be capable of selectively offloading standardised loads and other equipment. Large deck areas suitable for flight operations and ship-to-ship interface points supporting movement of cargo to smaller tactical watercraft are also necessary. MPF(F) might additionally assume some of the roles planned for the JCC(X) future command and control ship. Other potential applications of the MPF(F) include acting as intra theatre shuttles, afloat medical care and mine-countermeasures support. Some 14 vessels are required and construction of the first ship is to begin in FY11

(6) An integral vessel of the Maritime Prepositioning Force (Future) will be the Mobile Landing Platform (MLP) based on a Float On-Float Off (FLO-FLO) design. It is being developed primarily to provide a surface interface between other ships and connectors within a seabase. The MLP mission requirements and major functions include: projecting a Marine combat unit and its equipment via LCACs or EFVs; transporting six LCACs; accommodating a Marine combat unit of 728 personnel with ability to interface with MPF(F) LMSR, JHSV and other displacement type surface assault craft to facilitate equipment, cargo and personnel transfer in sea base. The MLP will support the critical mission requirement to launch and recover surface assault craft loaded with vehicles, cargo and combat personnel by providing two LCAC stowage lanes (two craft interface points), RO/RO cargo holds of sufficient size to accommodate one-third of the Marine Expeditionary Brigade (MEB), Surface Battalion Landing Team (BLT) vehicles and accommodations for the combat troops being transferred ashore on the assault craft. The MLP will be a US flagged new construction ship. Plans are to begin to buy 'pier in the ocean' MLP starting in FY10 with initial operational capability by FY17.

(7) Army Strategic Fleets (ASF): The US Army prepositioning plan calls for the deployment of four ASFs. Two ASFs would be composed of LMSRs, one carrying an intermediate brigade combat team, and the other carrying an intermediate brigade combat team. The other two ASFs would each contain LMSRs carrying sustainment supplies plus an ammunition ship and a warehouse ship. ASFs will be based around Guam and Saipan in the Pacific Ocean and Diego Garcia in the Indian Ocean.

1 OFFSHORE PETROLEUM DISTRIBUTION SHIP (AG)

Name	No	Builders	Commissioned	F/S
VADM K R WHEELER	T-AG 5001	Ed san Chouest Offshore, Louisiana	20 Sep 2007	Sqn 3

Displacement, tons: 10,404
 Measurement, tons: 5,565 grt
 Dimensions, feet (metres): 348.5 x 70.0 x 22.7 (106.22 x 21.33 x 6.9)
 Main machinery: 2 MAK V12M32C diesels; 16,314 hp (12.1 MW); 2 shafts
 Speed, knots: 15. Range, n miles: 20,220 at 13 kt
 Complement: 24 civilians

Comment: An offshore petroleum distribution system that works as an at-sea pumping system to transfer fuel ashore from commercial and military tankers from up to 8 miles off the coast. The delivery rate is 1.7 million gallons per 20 h day. Steel construction.

VADM K R WHEELER

9/2007, US Navy / 130518D

1 CONTAINER SHIP (AK)

Name	No	Builders	Commissioned	F/S
MAJ BERNARD F FISHER (ex-Sea Fox)	T-AK 4396	Odense	1985	PREPO

Displacement, tons: 48,012 full load
 Dimensions, feet (metres): 652.2 x 105.6 x 36.1 (198.7 x 32.2 x 11)
 Main machinery: 1 BMW diesel; 1 shaft
 Speed, knots: 19
 Complement: 19
 Cargo capacity: 993 TEU (on deck); 1,102 TEU (under deck)

Comment: Owned and operated by Sealift, Inc. under charter to MSC. When fully loaded the ship can carry 2,095 20 ft containers although current load of aviation munitions is less. Aviation munitions are to re-supply forward-deployed fighter and attack squadrons. The ship is fitted with an extensive cocoon system enabling it to store deck-loaded munitions in an environmentally controlled atmosphere. *Fisher* is an NDAF ship chartered in 2004.

Main machinery: 2 Stork-Wartsila Werkspoor 16TM410 diesels; 27,000 hp(m) (19.84 MW) sustained; 1 shaft; bow thruster; 1,000 hp (746 kW)
Speed, knots: 17.7
Range, n miles: 12,840 at 18 kt
Complement: 30 plus 10 technicians
Cargo capacity: Containers, 578; Ro-Ro, 156,153 sq ft; JP-5 bbls, 20,778; DF-2 bbls, 13,334; Mogas bbls, 4,880; stable water, 2,357; cranes, 1 single and 2 twin 39 ton
Helicopters: Platform only.

Comment: Built for MPS operations. T-AK 3008, 3009, 3010 and 3011 are government owned (purchased in 2006/07) and are operated by American Overseas Marine. T-AK 3012 is owned and operated by American Overseas Marine.

SGT WILLIAM R BUTTON 7/2007, Nipper McDonnell / 1305181

2 AVIATION LOGISTICS SHIPS (AVB)

Name	No	Builders	Commissioned
WRIGHT (ex-SS Young America)	T-AVB 3	Ingalls Shipbuilding	1970
CURTISS (ex-SS Great Republic)	T-AVB 4	Ingalls Shipbuilding	1959

Comment: To reinforce the capabilities of the Maritime Prepositioning Ship programme, conversion of two ro-ro ships into maintenance aviation support ships was approved in FY85 and FY86. Wright was completed 14 May 1986, Curtiss 18 August 1987. Both conversions took place at Todd Shipyards, Galveston, Texas. Each ship has side ports and three decks aft of the bridge superstructure and has the capability to load the vans and equipment of a Marine Aviation Intermediate Maintenance Activity. The ships' mission is to service aircraft from an afloat platform. They can then revert to a standard sealift role if required. Maritime Administration hull design is C5-S-78a. These NDAF ships are operated by American Overseas Marine and maintained in a reduced operating status although they remain permanently available to the Prepositioning Force.

CURTISS 10/2007, Michael Nitz / 1353623

READY RESERVE FORCE (RRF)

Notes: (1) The Ready Reserve Force was created in 1976, to support deployment and sustainment requirements and to respond to national emergencies. The RRF is designed to be made available quickly for military sealift operations. Its functions have been widened to include humanitarian and domestic security issues. (2) On 1 January 2009 the RRF consisted of 48 ships, including Ro-Ro, breakbulk, auxiliary crane, heavy lift barge carriers, special mission tankers and aviation logistic support ships. These are maintained in various stages of readiness and able to get underway in five, 10 or 20 days. They are located in various ports along the US East, West and Gulf Coasts. (3) The Department of Transportation's Maritime Administration (MARAD) is responsible for the maintenance and administration of the ships at all times. Military Sealift Command assumes operational control only once the ships are activated for military missions. (4) RRF ships have red, white and blue funnel stripes. (5) Eight Algal class Fast Sealift Ships transferred to MARAD control in October 2008.

Displacement, tons: 55,355 full load
Measurement, tons: 25,389 net; 27,051 28,095 dwt
Dimensions, feet (metres): 946.2 x 105.6 x 36.8 (288.4 x 32.2 x 11.2)
Main machinery: 2 Foster-Wheeler boilers; 875 psi (61.6 kg/cm²); 950°F (510°C); 2 GE MST-19 steam turbines; 120,000 hp (89.5 MW); 2 shafts
Speed, knots: 33. **Range, n miles:** 12,200 at 27 kt
Complement: 43 (as merchant ship); 28 (minimum); 15 (ROS)
Helicopters: Platform only

Comment: All were originally built as container ships for Sea-Land Services, Port Elizabeth, NJ, but used too much fuel to be cost-effective as merchant ships. Six ships of this class were approved for acquisition in FY81 and the remaining two in FY82. The purchase price included 4,000 containers and 800 container chassis for use in container ship configuration. All eight were converted to Fast Sealift Ships, which are vehicle cargo ships. Conversion included the addition of roll-on/roll-off features. The area between the forward and after superstructures allows for a helicopter flight deck. Capacities are as follows. (sq ft) 150,016 to 166,843 ro-ro; 43,407 lift-on/lift-off; and either 44 or 46 20 ft containers. In addition to one ro-ro ramp port and starboard, twin 35 ton pedestal cranes are installed between the deckhouses and twin 50 ton cranes are installed aft. Ninety-three per cent of a US Army mechanised division can be lifted using all eight ships. Seven of the class moved nearly 11 per cent of all the cargo transported between the US and Saudi Arabia during and after the Gulf War. Six were activated for the Somali operation in December 1992 and all have been used in various operations and exercises since then. All based in Atlantic and Gulf of Mexico ports. All transferred to US Maritime Administration (MARAD) on 1 October 2008 and maintained in the Ready Reserve Force.

DENEbola

2/2005, Robert Pabst / 1154010

COAST GUARD

Headquarters Appointments

Commandant:
 Admiral Thed W Allen
Vice Commandant:
 Vice Admiral Vivien Crea
Commander, Atlantic Area:
 Vice Admiral Robert J Papp
Commander, Pacific Area:
 Vice Admiral David P Pekoske

Establishment

The United States Coast Guard was established by an Act of Congress approved 28 January 1915, which consolidated the Revenue Cutter Service (founded in 1790) and the Life Saving Service (founded in 1848). The act of establishment stated the Coast Guard 'shall be a military service and a branch of the armed forces of the USA at all times. The Coast Guard shall be a service in the Treasury Department except when operating as a service in the Navy'.

Congress further legislated that in time of national emergency or when the President so directs, the Coast Guard operates as a part of the Navy. The Coast Guard did operate as a part of the Navy during the First and Second World Wars.

The Lighthouse Service (founded in 1789) was transferred to the Coast Guard on 1 July 1939 and the Bureau of Navigation and Steamboat Inspection on 28 February 1942.

The Coast Guard was transferred from the Department of Transportation to the Department of Homeland Security on 1 March 2003.

Missions

The Coast Guard has five strategic aims.

Safety: Prevent deaths, injuries, and property damage associated with maritime transportation, fishing and recreational boating.

National Defense: Defend the nation as one of the five US Armed Services. Enhance regional stability in support of the National Security Strategy specifically maritime homeland security.

Maritime Security: Protect maritime borders from all intrusions by (a) halting the flow of illegal drugs, aliens, and contraband into the United States through maritime routes, (b) preventing illegal fishing; and (c) suppressing violations of federal law in the maritime arena.

Mobility: Facilitate maritime commerce and eliminate interruptions and impediments to the economical movement of goods and people, while maximizing recreational access and enjoyment of the water.

Protection of Natural Resources: Prevent environmental damage and natural resource degradation associated with maritime transportation, fishing, and recreational boating.

Organisation

Headquarters: Buzzards Point, Washington DC

Atlantic area: Portsmouth, VA
 1st District: Boston, MA
 5th District: Portsmouth, VA
 7th District: Miami, FL
 8th District: New Orleans, LA
 9th District: Cleveland, OH
Pacific area: Alameda, CA
 11th District: Alameda, CA
 13th District: Seattle, WA
 14th District: Honolulu, HI
 17th District: Juneau, AK
 Each district is further sub-divided into sectors.

Personnel

2009: 6,487 officers, 1,551 warrant officers, 32,274 enlisted, 7,640 reserves

Integrated Deepwater System (IDS)

IDS is a progressive 25-year programme to modernise, convert and replace USCG ships and aircraft and to improve command and control and logistics systems. The first contract for the programme, was awarded in June 2002 to Integrated Coast Guard Systems (ICGS), a partnership of Lockheed Martin and Northrop Grumman. Northrop Grumman Ship Systems will conduct the design and build three classes of new cutters and associated small boats. Up to 91 vessels are planned. Lockheed Martin is responsible for the C4ISR and system integration aspects of the programme and for aircraft procurement. Following a 2005 assessment of post-11 September 2001 (9/11) operational requirements, the Deepwater programme has been revised to incorporate more robust capabilities.

Cutter Strength

All Coast Guard vessels over 65 ft in length and that have adequate crew accommodation are referred to as 'cutters'. All names are preceded by USCG. The first two digits of the hull number for all Coast Guard vessels under 100 ft in length indicates the approximate length overall. Approximately 2,000 standard and non-standard boats are in service ranging in size from 11 ft skiffs to 55 ft aids-to-navigation craft.

HIGH ENDURANCE CUTTERS

1 + 2 (5) LEGEND CLASS (NATIONAL SECURITY CUTTERS) (PSOH/WMSL)

Name	No	Builders	Laid down	Launched	Commissioned	Homeport
BERTHOLF	WMSL 750	Northrop Grumman Ingalls Shipbuilding	29 Mar 2005	11 Nov 2006	4 Aug 2008	Alameda, CA
WAESCHE	WMSL 751	Northrop Grumman Ingalls Shipbuilding	11 Sep 2006	12 July 2008	2010	Alameda, CA
STRATTON	WMSL 752	Northrop Grumman Ingalls Shipbuilding	2008	2010	2011	Alameda, CA
-	WMSL 753	Northrop Grumman Ingalls Shipbuilding	2010	2011	2012	-

Displacement, tons: 3,206 standard, 4,112 full load
Dimensions, feet (metres): 418 x 54.0 x 21.0
 (127.4 x 16.5 x 6.4)
Main machinery: CODAG; 1 GE LM2500 gas turbine, 29,500 hp (22.0 MW); 2 MTU20V 1163 diesels; 19,310 hp (14.4 MW); bow thruster; 2 shafts, cp props
Speed, knots: 28
Range, n miles: 12,000 at 9 kt
Complement: 108 (14 officers)

Guns: 1 Bofors 57 mm/70 Mk 3; 220 rds/min to 17 km (9.3 n miles); weight of shell 2.4 kg
 1 General Dynamics 20 mm Phalanx Mk 15. 4—12.7 mm MGs.

Countermeasures: Decoys: Mk 53 Mod 6 Decoy System with Nulka and SRBOC
 ESM/ECM: SLO 32.

Electro-optic systems: Kollmorgen Mk 46 optronic sight
Radars: Surface search: TRS 3D/18; E/F-band.
 Navigation: Hughes-Furuno SPS 73, I-band.
 Fire control: SPQ-9B, I/J-band
 Tacan: AN/URN 25

Helicopters: 1 HH-65C and two VUAV or 2 HH-65C.

Programmes: Contracts awarded to Northrop Grumman Ship Systems on 2 April 2003 for the design and long lead material procurement of the first of a class of eight Maritime (formerly National) Security Cutters to replace High Endurance Cutters. Lockheed Martin providing command/control/communications and intelligence integration and hardware. Contract for production and delivery of first ship on 28 June 2004 and for second on 18 January 2005

Structure: Can carry up to 11 m interceptor craft, stern ramps for rapid launch and recovery. Two helicopter hangars. The hull of the third of class is being redesigned to reflect concerns about structural fatigue in the first two vessels. Modifications are to be made to the first two ships early in their lives.

Operational: Designed to deploy 230 days per year, crew deployments will continue to be 185 days away from homeport per year through a crew rotation concept

Displacement, tons: 3,300 full load
Dimensions, feet (metres): 378 x 42.8 x 20
 (115.2 x 13.1 x 6.1)
Flight deck, feet (metres): 88 x 40 (26.8 x 12.2)
Main machinery: CODAG; 2 Pratt & Whitney FT4A-6 gas turbines; 36,000 hp (26.86 MW); 2 Fairbanks-Morse 38TD8-1/8-12 diesels; 7,000 hp (5.22 MW) sustained, 2 shafts; cp props; retractable bow propulsor; 350 hp (261 kW)
Speed, knots: 29
Range, n miles: 9,600 at 15 kt
Complement: 162 (19 officers)

Guns: 1 OTO Melara 3 in (76 mm)/62 Mk 75 Compact, 85 rds/min to 16 km (8.7 n miles) anti-surface; 12 km (6.6 n miles) anti-aircraft; weight of shell 6 kg.
 2 Boeing 25 mm/87 Mk 38 Bushmaster
 1 GE/GD 20 mm Vulcan Phalanx 6-barrelled Mk 15; 3,000 rds/min combined to 1.5 km. 4—12.7 mm MGs.

Countermeasures: Decoys: 2 Loral Hycor SRBOC 6-barrelled fixed Mk 36; IR flares and chaff
 ESM: WLR-1C, WLR-3; intercept
Combat data systems: SCCS 378 includes OTCIXS satellite link

Weapons control: Mk 92 Mod 1 GFCS
Radars: Air search: Lockheed SPS-40B, B-band
 Surface search: Hughes/Furuno SPS-73; E/F- and I-bands.
 Fire control: Sperry Mk 92; I/J-band
 Tacan: URN 25

Helicopters: 1 HH-65A or 1 HH-60J

Programmes: Twelve built of a total of 36 originally planned.

Modernisation: FRAM programme for all 12 ships in this class from October 1985 to October 1992. Work included

DALLAS

9/2008*, C D Yaylali 1353622

standardising the engineering plans, improving the clutching systems, replacing SPS-29 air search radar with SPS 40 radar and replacing the Mk 56 fire-control system and 5 in/38 gun mount with the Mk 92 system and a single 76 mm OTO Melara Compact gun. In addition Harpoon and Phalanx CIWS fitted to five of the class by 1992 and CIWS to all by late 1993. The flight deck and other aircraft facilities upgraded to handle a Jay Hawk helicopter including a telescopic hangar URN 25 Tacan added along with the SQR-4 and SQR 17 sonobuoy receiving set and passive acoustic analysis systems. SRBOC chaff launchers were also fitted but not improved ESM which has been shelved. All missiles, torpedo tubes, sonar and ASW equipment removed in 1993-94. 25 mm Mk 38 guns replaced the 20 mm Mk 67.

Shipboard Command and Control System (SCCS) fitted to all of the class by 1996. Surface search radar replaced 1997-99. First phase of C4ISR upgrades, including access to SIPRNET and classified networks, completed in 2004.
Structure: These ships have clipper bows, twin funnels enclosing a helicopter hangar, helicopter platform aft. All are fitted with elaborate communications equipment. Superstructure is largely of aluminium construction. Bridge control of manoeuvring is by aircraft-type joystick rather than wheel.
Operational: Ten of the class are based in the Pacific, leaving only two on the East Coast. The removal of SSMs and all ASW equipment refocuses on Coast Guard roles. Munro changed homeport to Kodiak, AK, in 2007. Decommissioning of the class is expected to begin in 2011.

MEDIUM ENDURANCE CUTTERS

Notes: The Offshore Patrol Cutter programme is for a class of approximately 25 ships to replace the Famous Cutter and Reliance classes. The broad requirement is for a 100 m ship, armed with a medium calibre gun and capable of

operating a helicopter and/or UAVs. Although a contract for an accelerated design was signed with Northrop Grumman Ship Systems on 10 June 2004, construction of the first of class, which was expected to start in 2007, has been

cancelled. The programme is to start anew with the concept design phase likely to begin in 2009 and construction of the ships, likely to follow the Legend class, projected to begin in about 2015.

13 FAMOUS CUTTER CLASS (PSOH/WMEC)

Name	No	Builders	Laid down	Launched	Commissioned	F/S	Home Port
BEAR	WMEC 901	Tacoma Boatbuilding Co	23 Aug 1979	25 Sep 1980	4 Feb 1983	AA	Portsmouth, VA

MOHAWK	WMEC 913	Robert E Derecktor Corp	15 Mar 1987	5 May 1988	20 Mar 1991	AA	Key West, FL

Displacement, tons: 1,820 full load
Dimensions, feet (metres): 270 x 38 x 13.9
(82.3 x 11.6 x 4.2)

Main machinery: 2 Alco 18V-251 diesels; 7,290 hp (5.44 MW) sustained; 2 shafts, cp props

Speed, knots: 19.5

Range, n miles: 9,900 at 12 kt

Complement: 100 (14 officers) plus 5 aircrew

Guns: 1 OTO Melara 3 in (76 mm)/62 Mk 75; 85 rds/min to 16 km (8.7 n miles) anti-surface; 12 km (6.6 n miles) anti-aircraft; weight of shell 6 kg
2-12.7 mm MGs or 2-40 mm Mk 19 grenade launchers

Countermeasures: Decoys: 2 Loral Hycor SRBOC 6-barrelled fixed Mk 36; IR flares and chaff

ESM/ECM: SLQ-32(V)2; radar intercept.

Combat data systems: SCCS-270; OTCIXS satellite link.

Radars: Surface search; Hughes/Furuno SPS-73, I-band
Fire control: Sperry Mk 92 Mod 1; I/J-band
Tacan. URN 25.

Helicopters: 1 HH-65A or HH-60J or MH-68A or SH-60B

Programmes: The contract for construction of WMEC 905-913 was originally awarded to Tacoma Boatbuilding Co on 29 August 1980. However, under lawsuit from the Robert E Derecktor Corp, Middletown, Rhode Island, the contract to Tacoma was determined by a US District Court to be invalid and was awarded to Robert E Derecktor Corp on 15 January 1981.

Modernisation: OTCIXS satellite link fitted from 1992. CAISR upgrades completed in 2004. Tampa refitted 2005-06 as part of the Mission Effectiveness Project to extend service lives. The work includes engineering and habitability measures. All of the class are to be similarly refitted.

NORTHLAND

5/2006, A A de Kruif / 115/486

Structure: They are the only medium endurance cutters with a helicopter hangar (which is telescopic) and the first cutters with automated command and control centre. Fin stabilisers fitted. Plans to fit SSM and/or CIWS have been abandoned as has towed array

sonar and sonobuoy datalinks. New radars fitted 1997-99.

Operational: Very lively in heavy seas because the length to beam ratio is unusually small for ships required to operate in Atlantic conditions.

14 RELIANCE CLASS (PSOH/WMEC)

Name	No	Builders	Commissioned	F/S	Home Port
RELIANCE	WMEC 615	Todd Shipyards	20 June 1964	AA	Kittery, ME
DILIGENCE	WMEC 616	Todd Shipyards	26 Aug 1964	AA	Wilmington, NC

DEPENDABLE	WMEC 626	American Shipbuilding Co	22 Nov 1968	AA	Cape May, NJ
VIGOROUS	WMEC 627	American Shipbuilding Co	2 May 1969	AA	Cape May, NJ
DECISIVE	WMEC 628	Coast Guard Yard, Baltimore	23 Aug 1968	AA	Pascagoula, MS
ALERT	WMEC 630	Coast Guard Yard, Baltimore	4 Aug 1969	PA	Warrenton, OR

Displacement, tons: 1,129 full load (WMEC 620-630)
1,110 full load (WMEC 618, 619)

Dimensions, feet (metres): 210.5 x 34 x 10.5
(64.2 x 10.4 x 3.2)

Main machinery: 2 Alco 16V-251 diesels; 6,480 hp (4.83 MW) sustained; 2 shafts; LIPS cp props

Speed, knots: 18. **Range, n miles:** 6,100 at 14 kt; 2,700 at 18 kt
Complement: 75 (12 officers)

Guns: 1 Boeing 25 mm/87 Mk 38 Bushmaster; 200 rds/min to 6.8 km (3.4 n miles). 2-12.7 mm MGs.

Combat data systems: SCCS 210.

Radars: Surface search; Hughes/Furuno SPS-73; I-band.

Helicopters: 1 HH-65A or MH-68A embarked as required

Modernisation: All 14 cutters underwent a Major Maintenance Availability (MMA) from 1987-94. The exhausts for main engines, ship service generators and boilers were run in a new vertical funnel which reduces flight deck size. 76 mm guns were replaced by 25 mm Mk 38. A Mission Effectiveness Project was initiated in 2005. Work, to extend service lives, includes engineering and habitability measures. Dependable is the first to be refitted and all of the class are to be similarly upgraded.

Structure: Designed for search and rescue duties. Design features include 360° visibility from bridge; helicopter flight deck (no hangar); and engine exhaust vent at stern which has been replaced by a funnel during MMA. Capable of towing ships up to 10,000 tons. Air conditioned throughout except engine room; high degree of habitability

Operational: Normally operate within 500 miles of the coast. Primary roles are SAR, law enforcement homeland security and defence operations

Sales: Courageous sold to Sri Lanka in 2004.

VENTUROUS

11/2008, Marco Ghiglino / 1353621

1 EDENTON CLASS (PSOH/WMEC)

Name	No	Builders	Commissioned	F/S	Home Port
ALEX HALEY (ex-Edenton)	WMEC 39 (ex-ATS 1)	Brooke Marine, Lowestoft	23 Jan 1971	PA	Kodiak, AK

Displacement, tons: 3,000 full load
Dimensions, feet (metres): 282.6 x 50 x 15.1 (86.1 x 15.2 x 4.6)
Main machinery: 4 Caterpillar 3516 DITAWJ diesels; 6,000 hp(m) (4.41 MW); 2 shafts; cp props; bow thruster
Speed, knots: 18. **Range, n miles:** 10,000 at 13 kt
Complement: 99 (9 officers)
Guns: 2 McDonnell Douglas 25 mm/87 Mk 38; 200 rds/min to 6.8 km (3.4 n miles) 2—12.7 mm MGs
Radars: Surface search: Hughes/Furuno SPS-73; I-band.
Combat data systems: SCCS-282.
Helicopters: Platform for 1 HH-65A or 1 HH-60J.

Comment: Former Navy salvage ship paid off in 1996 and taken on by the Coast Guard in November 1997 for conversion. All diving and salvage gear removed, flight deck installed, and upgraded navigation and communications. Armed with 25 mm guns. Used in the Bering Sea, Gulf of Alaska and North Pacific as a multimission cutter from 16 December 1999

ALEX HALEY 12/1999, USCG / 0084188

1 DIVER CLASS (PSO/WMEC)

Name	No	Builders	USN Comm	F/S	Home Port
ACUSHNET (ex-Shackle)	WMEC 167 (ex-WAGO 167, ex-WAT 167, ex-ARS 9)	Basalt Rock Co, Napa, CA	5 Feb 1944	PA	Ketchikan, AK

Displacement, tons: 1,557 standard; 1,746 full load
Dimensions, feet (metres): 213 x 41 x 15 (64.9 x 12.5 x 4.6)
Main machinery: 4 Fairbanks-Morse diesels; 3,000 hp (2.24 MW) sustained, 2 shafts
Speed, knots: 15.5. **Range, n miles:** 9,000 at 8 kt
Complement: 75 (9 officers)
Guns: 2—12.7 mm MGs.
Radars: Navigation: 2 Raytheon SPS-73; I-band.

Comment: Large, steel-hulled salvage ship transferred from the Navy to the Coast Guard and employed in tug and oceanographic duties. Modified for handling environmental data buoys and reclassified WAGO in 1968 and reclassified WMEC in 1980. Major renovation work completed in 1983 and now used for SAR homeland security and law enforcement operations.

ACUSHNET 8/2006, Globke Collection / 1167494

SHIPBORNE AIRCRAFT

Numbers/Type: 73/24 EADS HH-65C/MH-65C Dolphin.
Operational speed: 175 kt (324 km/h).
Service ceiling: 10,000 ft (3,048 m).
Range: 290 n miles (537 km).
Role/Weapon systems: Short-range rescue and recovery (SRR) helicopter. All A and B models converted to C configuration, with Turbomeca Arriel 2C2 engines by 2007. Conversion included extended heat shields, reconfigured cockpit and improved avionics to facilitate multimission cutter operations. MH version has airborne use-of-force upgrade, interoperable with homeland security and local response agencies. Also configured to allow installation and removal of special AUF mission weapons. Sensors: Bendix RDR 1300 radar and Collins mission management system. Equipped with CDU-900G control displays and MFD-255 multifunctional displays. Weapons: 1—762 mm MG

MH-65C 12/2006, US Navy / 1353643

Numbers/Type: 40/2 Sikorsky HH-60J/MH-60T Jayhawk.
Operational speed: 180 kt (333 km/h).
Service ceiling: 13,000 ft (3,961 m).
Range: 300 n miles (555 km).
Role/Weapon systems: Coast Guard version of Seahawk, first flew in 1988. A life-extension programme began in 2005 and is to upgrade the entire fleet by 2013 to MH-60T configuration. Sensors: Bendix RDR-1300C (or Primus 701 in MH-607) weather/search radar. AAQ-15 FLIR. Weapons: 1—7.62 mm MG

HH-60J 5/2006, Takatoshi Okano / 1167495

LAND-BASED MARITIME AIRCRAFT

Notes: (1) A High Altitude Endurance Unmanned Air Vehicle (HAE-UAV) is planned to enter service from 2016 although this date may be brought forward. Equipped with high-resolution sensors (EO/FLIR, SAR, ISAR, GMTI), the HAE-UAV is to provide long-range surveillance over large areas for extended periods of time. With a loiter altitude of up to 65,000 ft, they are to be capable of transmitting data and EO/IR imagery to shore-based command and control centres to contribute to the Common Operational Picture (COP). The programme is likely to be informed by the USN's BAMS (Broad Area Maritime Surveillance) programme, contenders for which include the Northrop Grumman RQ-4A Global Hawk. Four aircraft are planned.
 (2) Four P-3B Orions are used for AEW by US Customs.

Numbers/Type: 8 EADS/CASA HC-144A (CN-235) 200 Ocean Sentry.
Operational speed: 236 kt (437 km/h).
Service ceiling: 25,000 ft (7,620 m).
Range: 1,565 n miles (2,819 km).
Role/Weapon systems: First two aircraft ordered on 18 February 2004 and delivered in 2007. Roles include SAR, law enforcement, ice patrol and environmental protection. Airframe manufactured by EADS/CASA while Lockheed Martin completed integration and developmental testing of aircraft and C4ISR mission pallet. Aircraft made its first flight with the mission system pallet onboard in May 2007. Three of initial five HC-144A aircraft based at Coast Guard Aviation Training Center in Mobile, AL. Up to 36 aircraft may be acquired by 2020. Sensors: Surface search/weather radar; electro-optical/infrared sensors; advanced 406 MHz DF; C4ISR/SIPRNET/DOD COP interoperable.

CN-235 11/2008, EADS/CASA / 1353647

For details of the latest updates to *Jane's Fighting Ships* online and to discover the additional information available exclusively to online subscribers please visit jfs.janes.com

Numbers/Type: 1 Gulfstream VC-37A.
Operational speed: 459 kt (850 km/h).
Service ceiling: 51,000 ft (15,540 m).
Range: 5,600 n miles (10,370 km).

Role/Weapon: Military version of Gulfstream V which replaced a C-20B Gulfstream III in May 2002. Based at Air Station Washington DC. Serves as a long-range command and control aircraft for Department of Homeland Security and Coast Guard officials.

GULFSTREAM G 550

5/2003, Paul Jackson / 0568402

Numbers/Type: 4/7/6 AMD-BA HU-25 A/HU-25 C/HU-25 D Guardian Falcon
Operational speed: 420 kt (774 km/h).
Service ceiling: 42,000 ft (12,800 m).
Range: 1,500 n miles (2,777 km).

Role/Weapon systems: Medium-range maritime surveillance role. 17 are operational; 21 are in storage or support aircraft. Sensors: APS-127 weather/search radar, APG-66 air search radar, APS-143B surface search radar. Weapons: unarmed.

HU-25 FALCON

6/2001, Adolfo Ortigueira Gil / 0529903

Numbers/Type: 27/6 Lockheed HC-130H/C-130J.
Operational speed: 325 kt (602 km/h).
Service ceiling: 33,000 ft (10,060 m).
Range: 4,700 n miles (8,792 km); 5,500 n miles (1,018 km) (HC-130J).

Role/Weapon systems: Long-range maritime reconnaissance role. Sixteen HC-130Hs undergoing upgrade to deliver Deepwater requirement for Long Range Search (LRS) capability and provision of heavy air transport for Maritime Safety & Security Teams (MSSTs), Port Security Units (PSUs), and National Strike Force (NSF). When modernisation is complete, there will be 22 aircraft: 16 HC-130H with upgraded radar and avionics, and six HC-130J. Delivery of first of new C-130J started in 2003. All six were operational by late 2008. Three C-130Js have been equipped with EDO EL/M 2022A(V)3 maritime surface search radar, mounted beneath the plane's fuselage, a nose-mounted APN 241 weather radar, electro-optical/infrared-FLIR Systems Star Safire III, DF-430 UHF/VHF Direction Finder System, and SAAB Transponder Tech AB R4A Airborne Automatic Identification System (AIS). C-130Js will have 90 per cent C4ISR commonality with CASA CN235-300M. Sensors (HC-130H): APS-137 or APS-125 weather/search radar Wescam MX-20 EO/IR. Weapons: unarmed.

C-130J

3/2008*, USCG / 1295179

Numbers/Type: 1 Bombardier Challenger 604 C-143A.
Operational speed: 459 kt (850 km/h).
Service ceiling: 41,000 ft (12,496 m).
Range: 3,400 n miles (6,296 km).

Role/Weapon systems: Military version of Challenger 604 replaced a VC-4 Gulfstream I in December 2005. Based at Air Station Washington DC., it serves as a medium-range command and control aircraft for Department of Homeland Security and Coast Guard officials.

Displacement, tons: 168 (A series); 154 (B series); 134 (C series) full load

Dimensions, feet (metres): 110 x 21 x 7.3 (33.5 x 6.4 x 2.2)

Main machinery: 2 Paxman Valenta 16RP 200M diesels (A and B series); 6,246 hp (4.62 MW), sustained; 2 Caterpillar 3516 DITA diesels (C series); 5,596 hp (4.17 MW) sustained, 2 shafts

Speed, knots: 29

Range, n miles: 3,928 at 10 kt

Complement: 16 (2 officers)

Guns: 1 McDonnell Douglas 25 mm/87 Mk 38. 2 - 12.7 mm M60 MGs.

Combat data systems: SCCS-Lite

Radars: Navigation: Hughes/Furuno SPS-73; I-band.

Comment: All built by the Bollinger Machine Shop and Shipyard at Lockport, Louisiana.

The design is based upon the 110 ft patrol craft built by Vosper Thornycroft, UK, in service in Venezuela, UAE and UK Customs, but modified to meet Coast Guard needs. Vosper Thornycroft supplied design support, stabilisers, propellers, and steering gear. Batches: A 1301-1316, B 1317-1337, C 1338-1349. Radars replaced by 1999. As part of the Deepwater programme, eight hulls were modified to include stretching of the hull to 123 ft by insertion of a 13 ft plug to enable installation of upgraded C4ISR systems, a stern launch and recovery system and various platform improvements. WPB 1303 was first to undergo conversion at Bollinger Shipyard in February 2004. She was followed by WPBs 1317, 1325 and 1328 in 2004 and 1302, 1305, 1306 and 1308 by 2007. However, following experience of significant deck cracking, hull deformation and shaft alignment problems, the conversion planned was terminated in December 2006 and all eight vessels were taken out of operational service. The remaining 110 ft cutters are to continue in service until replaced by the Fast Response Cutter and/or a stop-gap solution can be found. Six cutters operate from Bahrain.

 Range, n miles: 900 at 8 kt
 Complement: 10 (1 officer)
 Guns: 2—12.7 mm MGs.
 Radars: Navigation; I-band.

Comment: Designed by David M Cannell based on the hull of the Damen Stan Patrol 2600 which is in service with the Hong Kong police. Steel hull built by Bollinger with GRP superstructure by Halmatic. A stern ramp is used for launching a 5.5 m RIB. Following delivery of 65 vessels to the USCG and a further two to the Maltese Armed Forces, an order for a further eight was made by the USCG on 25 June 2007. Four (87367, 87368, 87373, 87374) of those latter craft were funded by the US Navy but are operated by the Coast Guard

MORAY 10/2008, Marco Ghiglino / 1353540

3 CYCLONE CLASS (PATROL COASTAL SHIPS) (WPC/PB)

Name	No	Builders	Commissioned	Home Port
ZEPHYR	WPC 8 (ex-PC 8)	Bollinger, Lockport	15 Oct 1994	Pascagoula, MS
SHAMAL	WPC 13 (ex-PC 13)	Bollinger, Lockport	27 Jan 1996	Pascagoula, MS
TORNADO	WPC 14 (ex-PC 14)	Bollinger, Lockport	15 May 2000	Pascagoula, MS

Displacement, tons: 386 full load
 Dimensions, feet (metres): 179 x 25.9 x 7.9 (54.6 x 7.9 x 2.4)
 Main machinery: 4 Paxman Valenta 16RP 200M diesels; 14,400 hp (10.7 MW) sustained; 4 shafts
 Speed, knots: 35
 Range, n miles: 2,500 at 12 kt
 Complement: 27 (2 officers)
 Guns: 2 McDonnell Douglas 25 mm/87 Mk 38. 4—12.7 mm M60 MGs.
 Combat data systems: SCCS-Lite
 Radars: Navigation. Hughes/Furuno SPS-73; I-band.

Comment: Contract awarded by USN for eight in August 1990 and five more in July 1991. Design based on Vosper Thornycroft Ramadan class modified for USN requirements including 1 in armour on superstructure. The craft have a slow speed loiter capability. These five vessels were modified to incorporate a semi-dry well, boat ramp and stern gate to facilitate deployment and recovery of a fully loaded RIB while the ship is making way. Transferred to the USCG 2004-05. These are to fill a gap in Coast Guard resources. *Tempest* and *Monsoon* are to return to the Navy in 2008, the other three are to be transferred in FY12. Eight unconverted (without stern-ramps) vessels remain in USN service

SHAMAL 11/2004, USCG / 1187850

460 GUARDIAN CLASS (TPSB/YP)

Displacement, tons: 3 full load
 Dimensions, feet (metres): 24.6 x 8.2 x 0.4 (7.5 x 2.5 x 0.4)
 Main machinery: 2 Evinrude outboards, 350 hp (261 kW)
 Speed, knots: 40
 Complement: 4
 Guns: 1—12.7 mm MG. 2—7.62 mm MGs.
 Radars: Navigation. Raytheon; I-band.

Comment: Transportable Port Security Boats (TPSB) which serve with the six Port Security Units and a Training Detachment. Can be transported by aircraft.

GUARDIAN 7/2000, Hachiro Nakai / 0105777

0 + 34 SENTINEL CLASS (PBO/WPC)

Displacement, tons: 353 full load
Dimensions, feet (metres): 153.4 x 25.4 x 8.4 (46.7 x 7.7 x 2.6)
Main machinery: 2 diesels; 5,760 hp (4.3 MW); 2 shafts
Speed, knots: 28+
Range, n miles: To be announced
Complement: 22
Guns: 1—25 mm, 4 12.7 mm MGs
Radars: Surface search; To be announced.
Navigation: To be announced

Comment: The Fast-Response Cutter is part of the Integrated Deepwater modernisation programme for the Coast Guard to replace the Island class patrol boats. Its principal roles include fishery protection, barrier patrols, interdiction, SAR and disaster relief. Following evaluation of bids, a contract was awarded to Bollinger Shipyards of Lockport, LA, on 26 September 2008, there are options for 34 craft, the first of which is to be delivered in 2010 and based at Miami. Ultimately, a class of 58 is sought. The design is based on the Damen Stan Patrol 4708, modified to achieve 28+ kt; a stern-launch capability is incorporated; steel hull, aluminium superstructure. The first craft is to be based at Miami, FL.

SENTINEL CLASS

9/2008*, Bollinger Shipyards / 12331/55

ICEBREAKERS

Notes. Replacement of *Polar Star* and *Polar Sea* is under consideration in view of their age and of increasing economic, political and scientific interest in the polar regions.

1 ICEBREAKER (WLBB)

Name	No	Builders	Commissioned	Home Port
MACKINAW	WLBB 30	Manitowoc Marine, Wisconsin	10 June 2006	Cheboygan, MI

Displacement, tons: 3,500 full load
Dimensions, feet (metres): 240 x 58 x 16 (73.1 x 17.7 x 4.8)
Main machinery: Diesel-electric; 3 diesel generators; 12,600 hp (9.4 MW); 2 podded propulsors; 6,700 hp (5 MW)
Speed, knots: 15
Complement: 55 (8 officers)
Radars: Surface search; Kongsberg Data Bridge 10.
Navigation: Kongsberg Integrated Bridge System.

Comment: Contract to build new icebreaker/buoy tender awarded 15 October 2001. Keel laid 10 February 2004. Launched in April 2005 and delivered in November 2005. Icebreaker replaced WAGB 83 and assumed the same name. In addition to breaking ice (up to 32 in thick at 3 kt ahead, 2 kt astern) for the primary shipping lanes on the Great Lakes, the new ship will service aids to navigation, as well as performing search and rescue, pollution control, homeland security, and law enforcement duties from its homeport of Cheboygan, Michigan. Principal feature is 'podded' or protected propellers that can rotate 360° for greater manoeuvrability. Other features include fully integrated bridge system, robust communications suite and 3,200 sq ft of buoy deck space. A crane of 60 ft can recover buoys weighing up to 20 tons

MACKINAW

3/2006, Manitowoc Marine / 1154677

1 HEALY CLASS (WAGBH)

Name	No	Builders	Commissioned	F/S	Home Port
HEALY	WAGB 20	Avondale, New Orleans	29 Oct 1999	PA	Seattle, WA

Displacement, tons: 16,400 full load
Dimensions, feet (metres): 420 oa, 397.8 w l x 82 x 29 (128; 121.2 x 25 x 8.9)
Main machinery: Diesel-electric; 4 Westinghouse/Suizer 12ZA 40S diesels; 42,400 hp (31.16 MW); 4 Westinghouse alternators; 2 motors; 30,000 hp (22.38 MW); 2 shafts; bow thruster; 2,200 hp (1.64 MW)
Speed, knots: 17
Range, n miles: 16,000 at 12.5 kt
Complement: 75 (12 officers) plus 45 scientists
Helicopters: 2 HH-65A or 1 HH-60J

Comment: In response to the 1984 Interagency Polar Icebreaker Requirements Study and Congressional mandate, approval was given for the construction of a new icebreaker as a replacement for two Wind class which were then decommissioned in 1988. However, no action was taken to provide funds for the new ship until Congress included it in the Navy's FY91 ship construction budget and after further delays the ship was ordered 15 July 1993. Icebreaking capability of 4 ft at 3 kt. Reached North Pole in September 2005, the third by a US surface ship. In a six-month Arctic expedition, the ship embarked 47 scientists from nine countries to study climate change

HEALY

1/2003, Bob Flides / 0512759

2 POLAR CLASS (WAGBH)

Name	No	Builders	Launched	Commissioned	F/S	Home Port
POLAR STAR	WAGB 10	Lockheed SB	17 Nov 1973	19 Jan 1976	PA	Seattle, WA
POLAR SEA	WAGB 11	Lockheed SB	24 June 1976	23 Feb 1978	PA	Seattle, WA

Displacement, tons: 13,190 full load
Dimensions, feet (metres): 399 x 84 x 32 (121.6 x 25.6 x 9.8)
Main machinery: CODOG; diesel-electric (AC/DC); 6 Alco 16V-251F/Westinghouse AC diesel generators; 21,000 hp (15.66 MW) sustained; 3 Westinghouse DC motors; 18,000 hp (13.42 MW) sustained; 3 Pratt & Whitney FT4A-12 gas turbines; 60,000 hp (44.76 MW) sustained; 3 Philadelphia 75 VMGS gears; 60,000 hp (44.76 MW) sustained; 3 shafts; cp props
Speed, knots: 20
Range, n miles: 28,275 at 13 kt
Complement: 134 (15 officers) plus 33 scientists and 12 aircrew
Guns: 2—762 mm MGs.
Radars: Navigation, 2 Raytheon SPS-64, 1 band Tacan; SRN 15.
Helicopters: 2 HH-65A or 1 HH-60J

Comment: At a continuous speed of 3 kt, they can break ice 6 ft (1.8 m) thick, and by ramming can break 21 ft (6.4 m) pack. Conventional icebreaker hull form with 'White' cutaway bow configuration and well-rounded body sections to prevent being trapped in ice. The ice belt is 1.75 in (44.45 mm) thick supported by framing at 16 in (0.4 m) centres. Three heeling systems assist icebreaking and ship extraction. Two 15 ton capacity cranes fitted aft, one 3 ton capacity crane fitted forward. Two over-the-side oceanographic winches, one over-the-stern trawl/core winch. Deck fixtures for scientific research vans, and research laboratories provided for arctic and oceanographic research. Between 1986-92, science facilities were upgraded including habitability, lab spaces and winch capabilities. *Polar Sea* went to the North Pole in August 1994. *Polar Star* was placed in a 'special' status in 2006. The vessel is to undergo extensive upgrade and is to be reactivated in FY12.

POLAR STAR

2/2006, Chris Settler / 1167646

9 BAY CLASS (TUGS—WTGB)

Name	No	Launched	Commissioned	F/S	Home Port
KATMAI BAY	WTGB 101	7 Nov 1977	8 Jan 1979	GLA	Sault Sainte Marie, MI
BRISTOL BAY	WTGB 102	13 Feb 1978	5 Apr 1979	GLA	Detroit, MI
MOBILE BAY	WTGB 103	13 Feb 1978	2 Sep 1979	GLA	Sturgeon Bay, WI
BISCAYNE BAY	WTGB 104	29 Aug 1978	8 Dec 1979	GLA	St Ignace, MI
NEAH BAY	WTGB 105	6 Aug 1979	18 Aug 1980	GLA	Cleveland, OH
MORRO BAY	WTGB 106	6 Aug 1979	25 Jan 1981	AA	New London, CT
PENOBSCOT BAY	WTGB 107	24 July 1983	4 Sep 1984	AA	Bayonne, NJ
THUNDER BAY	WTGB 108	20 July 1984	29 Dec 1985	AA	Rockland, ME
STURGEON BAY	WTGB 109	9 July 1986	20 Aug 1988	AA	Bayonne, NJ

Displacement, tons: 662 full load
 Dimensions, feet (metres): 140 x 37.6 x 12.5 (42.7 x 11.4 x 3.8)
 Main machinery: Diesel-electric; 2 Fairbanks-Morse 38D8-1/8-10 diesels; generators; 2.4 MW sustained; Westinghouse electric drive; 2,500 hp (1.87 MW); 1 shaft
 Speed, knots: 14.7. Range, n miles: 4,000 at 12 kt
 Complement: 17 (3 officers)
 Radars. Navigation: Raytheon SPS-64(V)1; I-band.

Comment: The size, manoeuvrability and other operational characteristics of these vessels are tailored for operations in harbours and other restricted waters and for fulfilling present and anticipated multimission requirements. All units are ice strengthened for operation on the Great Lakes, coastal waters and in rivers and can break 20 in of ice continuously and up to 8 ft by ramming. A self-contained portable bubbler van and system reduces hull friction. First six built at Tacoma Boatbuilding, Tacoma. WTGB 107-109 built in Tacoma by Bay City Marine, San Diego. *Bristol Bay* and *Mobile Bay* have had their bows reinforced to push the two aids-to-navigation barges on the Great Lakes. WTGB 106 was decommissioned in 1998 and re-activated on 4 February 2002.

THUNDER BAY 7/2000, Hachiro Nakai / 0105776

 Complement: 40 (6 officers)
 Guns: 2—12.7 mm MGs, 2—7.62 mm MGs.
 Radars. Navigation: 2 Sperry/Litton BridgeMaster E340; I-band.

Comment: On 18 February 1993, the Coast Guard awarded Marinette Marine of Marinette, WI, a contract to construct the first of a new class of seagoing buoy tenders. Capable of breaking 14 in of ice at 3 kt or a minimum of 3 ft by ramming. Main hoist can lift 20 tons, secondary 5 tons. A dynamic positioning system can maintain the ship within a 10 m circle in up to 30 kt wind. The class is named after the first *Juniper*, which was built in 1940 and decommissioned in 1975

ASPEN 10/2006, Michael Nitz / 1305177

COASTAL TENDERS

14 KEEPER CLASS (BUOYTENDERS—WLM/ABU)

Name	No	Builders	Commissioned	Home Port
IDA LEWIS	WLM 551	Marinette Marine	1 Nov 1996	Newport, RI
KATHERINE WALKER	WLM 552	Marinette Marine	27 June 1997	Bayonne, NJ
ABIGAIL BURGESS	WLM 553	Marinette Marine	19 Sep 1997	Rockland, ME
MARCUS HANNA	WLM 554	Marinette Marine	26 Nov 1997	South Portland, ME
JAMES RANKIN	WLM 555	Marinette Marine	26 Aug 1998	Baltimore, MD
JOSHUA APPLEBY	WLM 556	Marinette Marine	20 Nov 1998	St Petersburg, FL
FRANK DREW	WLM 557	Marinette Marine	17 June 1999	Portsmouth, VA
ANTHONY PETIT	WLM 558	Marinette Marine	1 July 1999	Ketchikan, AK
BARBARA MABRITY	WLM 559	Marinette Marine	29 July 1999	Mobile, AL
WILLIAM TATE	WLM 560	Marinette Marine	16 Sep 1999	Philadelphia, PA
HARRY CLAIBORNE	WLM 561	Marinette Marine	28 Oct 1999	Galveston, TX

HENRY BLAKE	WLM 563	Marinette Marine	18 May 2000	Everett, WA
GEORGE COBB	WLM 564	Marinette Marine	22 June 2000	San Pedro, CA

Displacement, tons: 840 full load
 Dimensions, feet (metres): 175 x 36 x 7.9 (53.3 x 11 x 2.4)
 Main machinery: 2 Caterpillar 3508TA diesels; 1,920 hp (1.43 MW) sustained; 2 Ulstein Z-drives; bow thruster; 460 hp (343 kW)
 Speed, knots: 12. Range, n miles: 2,000 at 10 kt
 Complement: 18 (1 officer)
 Radars. Navigation: Raytheon SPS-64, I-band.

Comment: Contract awarded 22 June 1993 for first of class with an option for 13 more. Capable of breaking 9 in of ice at 3 kt or 18 in by ramming. Named after Lighthouse Keepers for the Lighthouse Service, one of the predecessors of the modern Coast Guard. The ship is a scaled down model of the *Juniper* class for coastal services. Main hoist to lift 10 tons, secondary 3.75 tons. Able to skim and recover surface oil pollution using a vessel of opportunity skimming system.

GEORGE COBB 10/2007, Michael Nitz / 1353639

BLUEBELL	WLI 313	Birchfield Shipyard, Tacoma	28 Sep 1944	Portland, OR
BUCKTHORN	WLI 642	Mobile Ship Repair, Mobile	18 Aug 1963	Sault Sainte Marie, MI

Displacement, tons: 226 (174 *Bluebell*) full load
 Dimensions, feet (metres): 100 x 24 x 5 (30.5 x 7.3 x 1.5) (*Buckthorn* draught 4 (1.2))
 Main machinery: 2 Caterpillar diesels; 600 hp (448 kW); 2 shafts
 Speed, knots: 11.9; 10.5 (*Bluebell*). Range, n miles: 2,700 at 10 kt
 Complement: 15 (1 officer)

Comment: Different vintage but similar in design

BUCKTHORN 3/2006, US Coast Guard / 0084213

970 US (COAST GUARD)/Buoy tenders – Construction tenders

2 BUOY TENDERS (WLI/ABU)

Name	No	Builders	Home port
BAYBERRY	WLI 65400	Reliable Shipyard, Olympia	Oak Island, NC
ELDERBERRY	WLI 85401	Reliable Shipyard, Olympia	Petersburg, AK

Displacement, tons: 70 full load
 Dimensions, feet (metres): 65 x 17 x 4 (19.8 x 5.2 x 1.2)
 Main machinery: 2 GM diesels: 1 or 2 shafts
 Speed, knots: 10
 Complement: 8

Comment: Both completed in June 1954. *Blackberry* decommissioned in 2008.

BAYBERRY 5/1999, Hartmut Ehlers / 0084211

BUOYTENDERS (RIVER) (WLR)

Notes: (1) All are based on rivers of USA especially the Mississippi, Missouri, Tennessee, Cumberland and their tributaries.
 (2) Two ATON (aids to navigation) barges completed in 1991–92 by Mannette Marine. For use on the Great Lakes in conjunction with icebreaker tugs *Bristol Bay* and *Mobila Bay*

6 RIVER TENDERS (WLR)

SANGAMON WLR 65506	SCIOTO WLR 65504	OSAGE WLR 65505
OUACHITA WLR 65501	CIMARRON WLR 66502	OBION WLR 65503

Displacement, tons: 146 full load
 Dimensions, feet (metres): 65 x 21 x 4.6 (19.8 x 6.4 x 0.4)
 Main machinery: 2 diesels; 750 hp (560 kW); 2 shafts
 Speed, knots: 10 Range, n miles: 3,500 at 8 kt
 Complement: 13

Comment: All commissioned 1960–62 WLR 65501 and 65502 built by Platzer Shipyard, Houston, TX, 65503–65506 by Gibbs Shipyard, Jacksonville, FL. WLR push crane-equipped barges to deploy aids-to-navigation buoys on the inland river system. Some of the class have 'jetting' devices used to set and anchor buoys in sandy or muddy river beds.

WYACONDA WLR 75403	KANAWHA WLR 75407	GREENBRIER WLR 75501

Displacement, tons: 150 full load
 Dimensions, feet (metres): 75 x 22 x 4 (22.9 x 6.7 x 1.2)
 Main machinery: 2 Caterpillar diesels, 660 hp (492 kW); 2 shafts
 Speed, knots: 9 Range, n miles: 3,100 at 8 kt
 Complement: 13

Comment: WLR 75401–75409 built 1964–70 by four different companies. WLR 75500 and 75501 were completed in early 1990. Details given are for the WLR 75401 series, but all are much the same size.

GASCONADE 2/2005, USCG / 1043673

TRAINING CUTTERS

1 EAGLE CLASS (WIX/AXS)

Name	No	Builders	Commissioned	Home Port
EAGLE (ex-Horst Wessel)	WIX 327	Blohm + Voss, Hamburg	15 May 1946	New London, CT

Displacement, tons: 1,816 full load
 Dimensions, feet (metres): 231 wl, 293.6 oa x 39.4 x 16.1 (70.4; 89.5 x 12 x 4.9)
 Main machinery: 1 Caterpillar D 399 auxiliary diesel; 1,125 hp (839 kW) sustained; 1 shaft
 Speed, knots: 10.5; 18 sail
 Range, n miles: 5,450 at 7.5 kt diesel only
 Complement: 185 (19 officers, 150 cadets)
 Radars: Navigation: SPS-73; I-band.

Comment: Former German training ship. Launched on 13 June 1936. Taken by the US as part of reparations after the Second World War for employment in US Coast Guard Practice Squadron. Taken over at Bremerhaven in January 1946; arrived at home port of New London, Connecticut, in July 1946. (Sister ship *Albat Leo Schiageter* was also taken by the USA in 1945 but was sold to Brazil in 1948 and re-sold to Portugal in 1962. Another ship of similar design, *Gorch Fock*, transferred to the USSR in 1946 and survives as *Tovarsch.*) *Eagle* was extensively overhauled 1981–82. When the Coast Guard added the orange-and-blue marking stripes to cutters in the 1960s *Eagle* was exempted because of their effect on her graceful lines; however, in early 1976 the stripes and words 'Coast Guard' were added in time for the July 1976 Operation Sail in New York harbour. During the Coast Guard's year long bicentennial celebration, which ended 4 August 1990, *Eagle* visited each of the 10 ports where the original revenue cutters were homeported. Baltimore, Maryland; New London, Connecticut; Washington, North Carolina; Savannah, Georgia; Philadelphia, Pennsylvania; Newburyport, Maryland; Portsmouth, New Hampshire; Charleston, South Carolina; New York, New York; and Hampton, Virginia. The cutter currently serves as a training ship for cadets and officer candidates. During 2005, *Eagle* visited Bremerhaven for the first time since leaving its original homeport in 1945.

Fore and main masts 150.3 ft (45.8 m); mizzen 132 ft (40.2 m); sail area, 25,351 sq ft.

EAGLE 8/2005, Martin Mokrus / 1154016

CONSTRUCTION TENDERS (INLAND) (WLIC)

Notes: Although all operate on inland waters, they are administered by the Atlantic Area.

4 PAMLICO CLASS (WLIC)

PAMLICO WLIC 800	HUDSON WLIC 801	KENNEBEC WLIC 802	SAGINAW WLIC 803
------------------	-----------------	-------------------	------------------

Displacement, tons: 459 full load
 Dimensions, feet (metres): 160.9 x 30 x 4 (49 x 9.1 x 1.2)
 Main machinery: 2 Caterpillar diesels; 1,000 hp (746 kW); 2 shafts
 Speed, knots: 11
 Complement: 14 (1 officer)
 Radars: Navigation: Raytheon SPS 69; I-band.

Comment: Completed in 1976 at the Coast Guard Yard, Curtis Bay, Maryland. These ships maintain structures and buoys in bay areas along the Atlantic and Gulf coasts.

HUDSON 12/1989, Giorgio Arra / 0506171

1 COSMOS CLASS (WLIC)

SMILAX WLIC 315

Displacement, tons: 218 full load
Dimensions, feet (metres): 100 x 24 x 5 (30.5 x 7.3 x 1.5)
Main machinery: 2 Caterpillar D 353 diesels; 660 hp (492 kW) sustained; 2 shafts
Speed, knots: 10.5
Complement: 14 (1 officer)
Radars: Navigation: Raytheon SPS-69, I-band.

Comment: Completed in 1944. Primary areas of operation are intercoastal waters from Virginia to Georgia. Pushes a 70 ft construction barge equipped with a crane and other aids-to-navigation equipment. Based at Atlantic Beach, NC

COSMOS CLASS 7/1990, van Ginderen Collection / 0906127

8 ANVIL/CLAMP CLASSES (WLIC)

ANVIL WLIC 75301	MALLET WLIC 75304	HATCHET WLIC 75309

Displacement, tons: 140 full load
Dimensions, feet (metres): 75 (76-WLIC 75306-75310) x 22 x 4 (22.9 (23.2) x 6.7 x 1.2)
Main machinery: 2 Caterpillar diesels; 750 hp (559 kW); 2 shafts
Speed, knots: 10
Complement: 13 (1 officer in Mallet, Sledge and Vise)

Comment: Completed 1962-65. Primary areas of operation are intercoastal waters from Texas to New Jersey. Push 68 ft and 84 ft construction barges equipped with cranes and other aids-to-navigation equipment

HATCHET 10/2008*, USCG / 1353709

HARBOUR TUGS

11 65 ft CLASS (WYTL)

Name	No	Home port
CAPSTAN	WYTL 65601	Philadelphia, PA
CHOCK	WYTL 65602	Portsmouth, VA
TACKLE	WYTL 65604	Rockland, ME
BRIDLE	WYTL 65607	Southwest Harbor, ME
PENDANT	WYTL 65608	Boston, MA
SHACKLE	WYTL 65609	South Portland, ME
HAWSER	WYTL 65610	Bayonne, NJ
LINE	WYTL 65611	Bayonne, NJ
WIRE	WYTL 65612	Saugerties, NY
BOLLARD	WYTL 65614	New Haven, CT
CLEAT	WYTL 65615	Philadelphia, PA

Displacement, tons: 72 full load
Dimensions, feet (metres): 65 x 19 x 7 (19.8 x 5.8 x 2.1)
Main machinery: 1 Caterpillar 3412TA diesel; 400 hp (298 kW) sustained; 1 shaft
Speed, knots: 10. Range, n miles: 2,700 at 10 kt
Complement: 6
Radars: Navigation: Raytheon SPS-69; I-band

Comment: Built between 1961 and 1967. The multimission tugs provide icebreaking, homeland security and aids-to-navigation services to several east coast areas. Re-engined 1993-96.

HAWSER 7/2000, Hachiro Nakai / 0105731

RESCUE AND UTILITY CRAFT

Notes: Craft of several different types. All carry five or six figure numbers of which the first two figures reflect the craft's length in feet.

132 UTILITY BOATS (YAG/UTB)

Displacement, tons: 13.4 full load
Dimensions, feet (metres): 41.3 x 14.1 x 4.1 (12.6 x 4.3 x 1.3)
Main machinery: 2 diesels; 680 hp (507 kW) sustained; 2 shafts
Speed, knots: 26. Range, n miles: 300 miles at 18 kt
Complement: 3

Comment: 205 built by Coast Guard Yard, Baltimore 1973-83. Aluminium hull with a towing capacity of 100 tons. Used for fast multimission response in weather conditions up to moderate

41416 9/2008*, Marco Ghigino / 1353638

117 MOTOR LIFEBOATS (MLB/SAR)

Displacement, tons: 20 full load
Dimensions, feet (metres): 47.9 x 14.5 x 4.5 (14.6 x 4.4 x 1.4)
Main machinery: 2 Detroit diesels; 850 hp (634 kW) sustained; 2 shafts
Speed, knots: 25. Range, n miles: 220 at 25 kt
Complement: 4

Comment: Built by Textron Marine, New Orleans. The prototype completed trials in mid-1991. Five production boats delivered in 1994. The final hull was delivered in June 2003. Replaced the fleet of 44 ft lifeboats. Aluminium hulls, self-righting with a 9,000 lb bollard pull and a towing capability of 150 tons. Primarily a lifeboat but it has a multimission capability.

MLB 47245 10/2008*, Frank Findler / 1353575

503 + 35 DEFENDER CLASS (RESPONSE BOATS) (PBF)

Displacement, tons: 2.7 full load
Dimensions, feet (metres): 25.0 x 8.5 x 8.8 (7.6 x 2.6 x 2.7)
Main machinery: 2 Honda outboard motors; 450 hp (335 kW)
Speed, knots: 46. Range, n miles: 175 at 35 kt
Complement: 4
Guns: 2-762 mm MGs
Radars: Furuno; I-band

Comment: High-speed inshore patrol craft of aluminum construction and foam collar built by SAFE Boats International, Port Orchard, Washington. First delivery in July 2003 to replace nearly 300 non-standard shore based boats and provide a standardised platform for the USCG's new Maritime Safety and Security Teams (MSST), established as a result of the 11 September 2001 terrorist attacks. Transportable in a C-130

DEFENDER 25579 10/2006, Michael Nitz / 1305175

1 + 0 (32) LONG RANGE INTERCEPTOR CRAFT (LRI)

Displacement, tons: 10.9
Dimensions, feet (metres): 30.0 x 10.6 x 3.0 (9.1 x 3.2 x 0.9)
Main machinery: 2 Cummins diesels; 2 Hamilton waterjets
Speed, knots: 45
Complement: 2 crew and 12 passengers

Comment: Built by Willard Marine. Aluminium construction. The first was delivered in October 2008. Interoperability trials successfully undertaken with *Bertholf* in early 2008. Launch and recovery is by a stern launch and recovery system.

LRI 10/2004, Jeff Murphy, USCG / 1121008

44 + 46 SPECIAL PURPOSE CRAFT (PBF)

Displacement, tons: 6.9 full load
Dimensions, feet (metres): 33.3 x 10.0 x 2.5 (10.1 x 3.0 x 0.7)
Main machinery: 3 Mercury outboard motors; 825 hp (615 kW)
Speed, knots: 50
Range, n miles: 250 at 30 kt
Complement: 4
Guns: 2 - 7.62 mm MGs.
Radars: Furuno, I-band.

Comment: Larger versions of the SAFE Boats International Defender class. Aluminium construction with foam collar. High-speed coastal craft procured for port security and law enforcement tasks, particularly the interception of suspicious vessels entering US territorial waters. First craft delivered in January 2006. A further 46 to be delivered by 2010.

SPECIAL PURPOSE CRAFT 10/2008, Marco Ghigino / 1353717

4 + 8 RESPONSE BOAT MEDIUM (YAG/UTB)

Displacement, tons: 16.3 full load
Dimensions, feet (metres): 44.9 x 14.6 x 3.3 (13.7 x 4.45 x 1.0)
Main machinery: 2 diesels; 2 waterjets
Speed, knots: 42
Range, n miles: 250 at 30 kt
Complement: 4
Guns: 2 - 7.62 mm MGs
Radars: Furuno, I-band.

Comment: Multimission self-righting response craft to replace 41 ft utility boat in inland waterways and offshore up to 50 n miles. Capable of towing 100 tons. First boat delivered April 2008. Built by Mannette Marine Corp., Manitowac, Wisconsin, with Kvichak Marine Industries, Seattle. Up to 180 are planned to be procured by 2013.

RESPONSE BOAT 1/2009, USCG / 1353710

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION (NOAA)

HENRY B BIGELOW

7/2007, Ships of the World / 1316256

Headquarters Appointments

Under Secretary of Commerce for Oceans and Atmosphere:

Jane Lubchenco

Director, Office of Marine and Aviation Operations and NOAA Commissioned Officer Corps:

Rear Admiral Jonathan W Bailey

Director, Marine and Aviation Operations Centers:

Rear Admiral Philip M Kenul

Establishment and Missions

NOAA is the largest bureau of the US Department of Commerce, with a diverse set of responsibilities in environmental sciences. NOAA components include the Office of Marine and Aviation Operations; National Ocean Service; National Weather Service; National Marine Fisheries Service; National Environmental Satellite, Data and Information Service; and the Office of Oceanic and Atmospheric Research. NOAA's research vessels conduct operations in hydrography, bathymetry, oceanography, atmospheric research, fisheries assessments and research, and related programmes in marine resources. Larger research vessels operate in international waters, and smaller ones primarily in Atlantic and Pacific coastal waters, and the Gulfs of Mexico and Alaska. NOAA conducts diving operations. It also operates fixed-wing aircraft for hurricane research and reconnaissance; oceanographic and atmospheric research; marine mammal observations; hydrologic forecasts, and aerial mapping and remote sensing.

NOAA's active fleet numbers 18 ships, and now includes eight former Navy ships. The T-AGOS ship *Capable*, renamed *Okeanos Explorer*, was converted to conduct ocean exploration and commissioned in 2008. It is the first US federal ship dedicated to ocean exploration. Of the remaining ex-naval ships, five are T-AGOS vessels: one has been converted for oceanographic research (*Ka'imimoana*), two for fisheries research (*Gordon Gunter*, *Oscar Elton Sette*), and two for coastal oceanographic research (*McArthur II* and *Hi'ialakai*). *Oscar Elton Sette* replaced *Townsend Cromwell* and *McArthur II* replaced *McArthur* in 2003. *Hi'ialakai* (formerly *Vindicator*), homeported in Hawaii, was commissioned in 2004. The former naval T-AGS hydrographic survey ship *Littlehales* was transferred to NOAA in 2003 and recommissioned *Thomas Jefferson*, replacing *Whiting*. A former naval Yard Torpedo Test (YTT) vessel was converted for coastal research and became operational in 2003 as *Nancy Foster*, replacing *Ferral*. A newly constructed oceanographic research ship, *Ronald H Brown* (AGOR 26), was commissioned in 1997. The hydrographic survey ship *Fairweather* was decommissioned in 1988, refurbished, and reactivated in 2004. A new class of Fisheries Survey Vessels (FSV) has been designed to NOAA specifications and standards set by the International Council for the Exploration of the Sea. *Oscar Dyson*, the first of four FSVs of the same design, was commissioned in May 2005 and operates in Alaskan waters. The second FSV, *Henry B Bigelow*, was commissioned in July 2007 and operates primarily in the northeast United States. FSV 3, *Pisces*, will be delivered in early 2009. FSV 4, *Bell M Shimada*, is expected to

be delivered in late 2009. The FSVs were built by VT Halter Marine, Moss Point, MS. A newly designed Small Waterplane Area Twin Hull (SWATH) coastal mapping vessel, *Ferdinand R Hassler*, is also under construction at VT Halter Marine. NOAA decommissioned three ships in 2008: *Rude*, a 41-year-old hydrographic survey vessel; *John N Cobb*, a 58-year-old fisheries research vessel, and *Albatross IV*, a 45-year-old fisheries research vessel.

Ships

The following ships may be met at sea.

Oceanographic Research Ships: *Ronald H Brown*, *Ka'imimoana*, *Okeanos Explorer*.

Multipurpose Oceanographic/Coastal Research Ships: *McArthur II*, *Nancy Foster*, *Hi'ialakai*.

Hydrographic Survey Ships: *Rainier*, *Thomas Jefferson*, *Fairweather*.

Fisheries Research Ships: *Miller Freeman*, *Oregon II*, *Dalawara II*, *David Starr Jordan*, *Gordon Gunter*, *Oscar Elton Sette*, *Oscar Dyson*, *Henry B Bigelow*, *Pisces*.

Personnel

2009: 300 officers plus 12,000 civilians

Bases

Major: Norfolk, VA and Seattle, WA

Minor: Woods Hole, MA; Pascagoula, MS, Honolulu, HI; Charleston, SC, San Diego, CA; Kotchikan, AK, Kodiak, AK.

Uruguay

Country Overview

The Oriental Republic of Uruguay is situated in south-eastern South America. With an area of 68,037 square miles it has borders to the north with Brazil and to the west with Argentina. It has a coastline of 356 n miles with the south Atlantic Ocean and River Plata. There are some 675 n miles of navigable internal waterways. The capital, largest city and principal port is Montevideo. Territorial Seas (12 n miles) and an EEZ (200 n miles) are claimed.

Headquarters Appointments

Commander-in-Chief of the Navy:
Vice Admiral Juan Heber Fernández Maggio
Fleet Commander:
Rear Admiral Hugo Vignietti di Mattia
Commander Coast Guard:
Rear Admiral Oscar P Debali de Paléja

Diplomatic Representation

Naval Attaché in London:
Captain Fernando Franzini

Personnel

- (a) 2009: 5,491 (730 officers) (including 450 naval infantry, 300 naval air and 1,950 Coast Guard)
(b) Voluntary service

Prefectura Nacional Naval (PNN)

Established in 1934 primarily for harbour security and coastline guard duties. In 1991 it was integrated with the Navy, although patrol craft retain Prefectura markings. There are three regions: Atlantic, Rio de la Plata, and Rio Uruguay.

Bases

Montevideo: Main naval base (*Lt Carlos Machetelli*) with two dry docks (A new naval base is under construction at Punta Lobos and will replace the current harbour facilities.)
La Paloma: Naval station (*Lt Cdr Ernesto Motto*)
Laguna del Sauce: Naval air station (*Lt Cdr Carlos Curbelo*)
Fray Bentos: River base (*Lt Luis Muselti*)

Marines

Cuerpo de Fusileros Navales consisting of 450 men in three rifleman companies and one combat support company plus a command company of 100.

Prefix to Ships' Names

ROL

DELETIONS

Frigates

2005 *General Artigas*
2007 *Uruguay*
2008 *Montevideo*

Patrol Forces

2008 *Comodoro Coé*

FRIGATES

Notes: Following the acquisition of two João Belo-class frigates from Portugal in early 2008, there is a programme to replace both these ships in about 2015. Options include Bremen-class frigates from Germany

2 COMMANDANT RIVIÈRE CLASS (FF)

LAND-BASED MARITIME AIRCRAFT

Notes: (1) Fixed-wing: There are five further aircraft: one Beech B 200T maritime patrol aircraft (fitted with APS 128 radar), two Beech T-34C and two Jetstream T2.
 (2) Helicopters: There are 10 helicopters: Two Westland Wessex HC Mk 2, one Bell 47G, one UH-13 AS 355 Esquilo (acquired from Brazil in October 2006 for operation from *General Artigas*) and six Bolkow BO-105 (acquired from Germany in August 2007)

JET STREAM T2

2/2008*, A E Galarce / 1335307

T-34C

6/2008*, Uruguay Navy / 1335312

AS 355

2/2008*, A E Galarce / 1335309

Numbers/Type: 1 Grumman S-2G Tracker

Operational speed: 140 kt (260 km/h).

Service ceiling: 25,000 ft (7,620 m)

Range: 1,350 n miles (2,500 km).

Role/Weapon systems: Ex-Israeli aircraft. ASW and surface search with improved systems. Sensors: Search radar, MAD, sonobuoys. Weapons: ASW; torpedoes, depth bombs or mines. ASV; rockets underwing

S-2G

2/2008*, A E Galarce / 1335306

PATROL FORCES

Notes: There is a plan to acquire one offshore patrol vessel, possibly to be built in Chile.

1 WANGEROOGE CLASS (PBO/AG)

Name	No	Builders	Commissioned
MALDONADO (ex <i>Norderney</i>)	23 (ex-A1455)	Schichau, Bremerhaven	15 Oct 1970

Displacement, tons: 854 standard; 1,024 full load

Dimensions, feet (metres): 170.6 × 39.4 × 12.8 (52 × 12.1 × 3.9)

Main machinery: Diesel-electric; 4 MWM 16-cyl diesel generators; 2 motors; 2,400 hp (m)

(1.76 MW); 2 shafts

Speed, knots: 14

Range, n miles: 5,000 at 10 kt

Complement: 24

Guns: 1 Bofors 40 mm/60

Comment: Built as a salvage tug with ice-strengthened hull. Transferred from the German Navy on 21 November 2002. Employed as a support ship and for offshore patrol duties.

MALDONADO

11/2007, A E Galarce / 1335308

2 VIGILANTE CLASS (LARGE PATROL CRAFT) (PBO)

Name	No	Builders	Commissioned
15 de NOVIEMBRE	5	CMN, Cherbourg	25 Mar 1981
25 de AGOSTO	6	CMN, Cherbourg	25 Mar 1981

Displacement, tons: 190 full load

Dimensions, feet (metres): 137 × 22.4 × 8.2 (41.8 × 6.8 × 2.4)

Main machinery: 2 MTU 12V 538 TB91 diesels; 4,600 hp (m) (3.4 MW) sustained; 2 shafts

Speed, knots: 28

Range, n miles: 2,400 at 15 kt

Complement: 28 (5 officers)

Guns: 1 Bofors 40 mm/70

Weapons control: CSEE Naja optronic director.

Radars: Surface search: Racal Decca TM 1226C; I-band

Comment: Ordered in 1979. Steel hull. First launched 16 October 1980 and second 11 December 1980. Based at La Paloma. *Comodoro Coe* decommissioned in 2008.

15 DE NOVIEMBRE

7/2001, A E Galarce / 0531452

2 CAPE CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
COLONIA (ex <i>Cape Higgon</i>)	10	Coast Guard Yard, Curtis Bay	14 Oct 1953
RIO NEGRO (ex <i>Cape Horn</i>)	11	Coast Guard Yard, Curtis Bay	3 Sep 1958

Displacement, tons: 98 standard, 148 full load

Dimensions, feet (metres): 95 × 20.2 × 6.6 (28.9 × 6.2 × 2)

Main machinery: 2 GM 16V-149TI diesels; 2,322 hp (1.73 MW) sustained; 2 shafts

Speed, knots: 20 **Range, n miles:** 2,500 at 10 kt

Complement: 14 (1 officer)

Guns: 2 – 12.7 mm MGs.

Radars: Surface search: Raytheon SPS-64; I-band.

Comment: Designed for port security and search and rescue. Steel hulled. During modernisation in 1974 received new engines, electronics and deck equipment. Superstructure modified or replaced, and habitability improved. Transferred from the US Coast Guard 25 January 1990. Both based at Fray Bentos.

COLONIA

1/2007, A E Galarce / 116/929

1 COASTAL PATROL CRAFT (PB)

Name	No	Builders	Commissioned
PAYSANDU	12 (ex-PR 12)	Sewart, USA	Nov 1968

Displacement, tons: 98 standard, 148 full load
 Dimensions, feet (metres): 94.8 x 20.3 x 6.6 (28.9 x 6.2 x 2.0)
 Main machinery: 2 GM 16V-71 diesels, 811 hp (605 kW) sustained; 2 shafts
 Speed, knots: 20
 Range, n miles: 2,500 at 10 kt
 Complement: 8
 Guns: 2 12.7 mm MGs
 Radars: Surface search. Raytheon SPS-34; I-band.

Comment: Based at Montevideo.

PAYSANDU 2/2004, A E Galarca / 1044206

2 COAST GUARD PATROL CRAFT (WPB)

70 72

Displacement, tons: 90 full load
 Dimensions, feet (metres): 72.2 x 16.4 x 5.9 (22 x 5 x 1.8)
 Main machinery: 2 GM diesels; 400 hp (298 kW); 2 shafts
 Speed, knots: 12
 Complement: 8

Comment: Built in 1957 at Montevideo.

PREFECTURA 70 11/2007, A E Galarca / 1335305

4 RIVER PATROL CRAFT (PBR)

URUGUAY 1-4

Displacement, tons: 5 full load
 Dimensions, feet (metres): 37.1 x 10.7 x 2.6 (11.3 x 3.25 x 0.8)
 Main machinery: 3 Volvo AD41P 220MOP diesels
 Speed, knots: 32
 Range, n miles: 1,500 at 24 kt
 Complement: 6
 Guns: 3—7.62 mm MGs

Comment: Built by Nuevos Ayres yacht builders. Deployed to Congo as part of UN force during 2001

URUGUAY 1 2001, Uruguay Navy / D121420

16 RIVER PATROL CRAFT (PBR)

URUGUAY 5-20

Displacement, tons: 4 full load
 Dimensions, feet (metres): 26.6 x 10.0 x 1.7 (8.1 x 3.04 x 0.53)
 Main machinery: 2 Mercury outboards, 450 hp (335 kW)
 Speed, knots: 50
 Complement: 3
 Guns: 1—7.62 mm MG

Comment: Boston Whaler craft ordered in May 2008 for deployment to Haiti as part of MINUSTAH. To be used as patrol craft on Uruguay River and lakes on return.

9 TYPE 44 CLASS (WPB)

441-449

Displacement, tons: 18 full load
 Dimensions, feet (metres): 44 x 12.8 x 3.6 (13.5 x 3.9 x 1.1)
 Main machinery: 2 Detroit 6V-38 diesels; 185 hp (136 kW); 2 shafts
 Speed, knots: 14 Range, n miles: 215 at 10 kt
 Complement: 3

Comment: Acquired from the US in 1999 and operated by the Coast Guard primarily as SAR craft

PREFECTURA 442 11/2007, A E Galarca / 1335304

MINE WARFARE FORCES

3 KONDOR II CLASS (MINESWEEPERS—COASTAL) (MSC)

Name	No	Builders	Launched	Commissioned
TEMERARIO (ex-Riosa)	31	Peenewerft, Wolgast	2 Oct 1972	11 Oct 1991
FORTUNA (ex-Bernau)	33	Peenewerft, Wolgast	3 Aug 1972	11 Oct 1991
AUDAZ (ex-Eisleben)	34	Peenewerft, Wolgast	2 Jan 1973	11 Oct 1991

Displacement, tons: 310 full load
 Dimensions, feet (metres): 186 x 24.6 x 7.9 (56.7 x 7.5 x 2.4)
 Main machinery: 2 Russk/Kolomna Type 40-DM diesels; 4,408 hp(m) (3.24 MW) sustained, 2 shafts; cp props
 Speed, knots: 17 Range, n miles: 2,000 at 15 kt
 Complement: 31 (6 officers)
 Guns: 1 Bofors 40 mm/70.
 Mines: 2 rails.
 Radars: Surface search. TSR 333 or Raytheon 1900; I-band.

Comment: Belonged to the former GDR Navy. Transferred without armament. Minesweeping gear retained including MSG-3 variable depth sweep device. A fourth of class sunk after a collision with a merchant ship on 5 August 2000

AUDAZ 2/2004, A E Galarca / 1044205

SURVEY AND RESEARCH SHIPS

1 HELGOLAND (TYPE 720B) CLASS (AGS)

Name	No	Builders	Commissioned
OYARVIDE (ex-Helgoland)	22 (ex-A 1457)	Untarweser, Bremerhaven	8 Mar 1966

Displacement, tons: 1,310 standard; 1,643 full load
 Dimensions, feet (metres): 223.1 x 41.7 x 14.4 (68 x 12.7 x 4.4)
 Main machinery: Diesel-electric; 4 MWM 12-cyl diesel generators; 2 motors; 3,300 hp(m) (2.43 MW); 2 shafts
 Speed, knots: 17 Range, n miles: 6,400 at 16 kt
 Complement: 34
 Radars: Navigation: Raytheon; I-band.
 Sonars: High definition, hull-mounted for wreck search.

Comment: Former German ocean-going tug launched on 25 November 1965. Paid off in 1997 and recommissioned on 21 September 1998 after being fitted out as a survey ship. Oceanographic equipment reported to have been fitted in 2002. Ice strengthened hull. Fitted for twin 40 mm guns.

OYARVIDE 6/2002, A E Galarca / 0529549

1 INSHORE SURVEY CRAFT (AGSC)

TRIESTE

Displacement, tons: 12 full load
Dimensions, feet (metres): 39.7 x 11.8 x 3.3 (12.1 x 3.6 x 1)
Main machinery: 2 Kamewa waterjets
Speed, knots: 16. **Range, n miles:** 500 at 16 kt
Complement: 4
Sonars: Elac Compact Mk II; 180 kHz, Elac LAZ 4721; 200 kHz

Comment: Formerly owned by the Academia Marítima Internacional de Trieste. Donated by Italian government in 2000.

TRIESTE 2001, Uruguay Navy / 0171418

2 LCVPs

LD 45-46

Displacement, tons: 15 full load
Dimensions, feet (metres): 46.5 x 11.6 x 2.7 (14.1 x 3.5 x 0.8)
Main machinery: 1 GM 4-71 diesel; 115 hp (86 kW) sustained; 1 shaft
Speed, knots: 9
Range, n miles: 680 at 9 kt
Military lift: 10 tons

Comment: Built at Naval Shipyard, Montevideo and completed 1980.

LD 46 6/2007, Uruguay Navy / 1167849

TRAINING SHIPS

Notes: *Bonanza* is a 13 ton sloop used as a sail training ship. The 15 m vessel was built in UK in 1984 and commissioned in July 1997.

1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Commissioned
CAPTÁN MIRANDA	20 (ex-GS 10)	SECN Matagorda, Cádiz	1930

Displacement, tons: 839 full load
Dimensions, feet (metres): 209.9 x 26.3 x 12.4 (64 x 8 x 3.8)
Main machinery: 1 GM diesel, 750 hp (552 kW); 1 shaft
Speed, knots: 10
Complement: 49
Radars: Navigation: Racal Decca TM 1226C; I-band.

Comment: Originally a diesel-driven survey ship with pronounced clipper bow. Converted for service as a three-masted schooner, commissioning as cadet training ship in 1978. Major refit by Bazán, Cadiz from June 1993 to March 1994, including a new diesel engine and a 5 m extension to the superstructure. Now has 853.4 m² of sail.

CAPTÁN MIRANDA 7/2007, Adolfo Ortigueira Gil / 1167887

1 PIAST CLASS (PROJECT 570) (SALVAGE SHIP) (ARS)

Name	No	Builders	Commissioned
VANGUARDIA (ex-Otto Von Guericke)	26 (ex-A 441)	Northern Shipyard, Gdansk	29 Dec 1976

Displacement, tons: 1,732 full load
Dimensions, feet (metres): 240 x 39.4 x 13.1 (73.2 x 12 x 4)
Main machinery: 2 Zgoda diesels; 3,800 hp (m) (2.79 MW); 2 shafts; cp props
Speed, knots: 16
Range, n miles: 3,000 at 12 kt
Complement: 61
Radars: Navigation, 2 TSR 333, I-band.

Comment: Acquired from Germany in October 1991 and sailed from Rostock in January 1992 after a refit at Neptun-Warnow Werft. Carries extensive towing and firefighting equipment plus a diving bell forward of the bridge. Armed with four 25 mm twin guns when in service with the former GDR Navy.

VANGUARDIA 9/2007, Mario R V Carneiro / 1335310

1 BUOY TENDER (ABU)

SIRIUS 21

Displacement, tons: 290 full load
Dimensions, feet (metres): 115.1 x 32.8 x 5.9 (35.1 x 10 x 1.8)
Main machinery: 2 Detroit 12V-71TA diesels; 840 hp (626 kW) sustained; 2 shafts
Speed, knots: 11
Complement: 15

Comment: Buoy tender built at Montevideo Naval Yard and completed on 5 February 1988. Endurance, five days.

SIRIUS 6/2007, Uruguay Navy / 1167848

AUXILIARIES

Notes: (1) *Comar II* is a motor yacht used by the Commander-in-Chief. (2) A small buoy tender is to be built at Astilleros y Talleres Navales de la Armada at Montevideo. The new vessel is to be operated on the Uruguay River.

COMAR II 2/2007, A E Galarce / 1167932

2 LCM CLASS (ABU)

LD 41-42

Displacement, tons: 24 light; 57 full load
Dimensions, feet (metres): 56.1 × 14.1 × 3.9 (17.1 × 4.3 × 1.2)
Main machinery: 2 Gray Marine 64 HN9 diesels, 330 hp (264 kW); 2 shafts
Speed, knots: 9
Range, n miles: 130 at 9 kt
Complement: 5
Military lift: 30 tons

Comment: First one transferred on lease from USA October 1972. Lease extended in October 1986. Second built in Uruguay.

LD 42

6/2007, Uruguay Navy / 1335311

1 LÜNEBURG CLASS (SUPPORT SHIP) (ARL)

Name	No	Builders	Commissioned
GENERAL ARTIGAS (ex-Freiburg)	4 (ex-A 1413)	Blohm + Voss	27 May 1968

Displacement, tons: 3,900 full load
Dimensions, feet (metres): 388.1 × 43.3 × 13.8 (118.3 × 13.2 × 4.2)
Main machinery: 2 MTU MD 16V 538 TB90 diesels; 6,000 hp(m) (4.1 MW) sustained; 2 shafts; cp props; bow thruster
Speed, knots: 17
Range, n miles: 6,000 at 14 kt
Complement: 95 (15 officers)
Cargo capacity: 1,100 tons
Guns: 4 Bofors 40 mm/70 (2 twin).
Countermeasures: Decoys; 2 Breda 105 mm SCLAR launchers.
Radars: Navigation Decca 1226/9; I-band.
Helicopters: AS 355 Esquilo.

Comment: Former auxiliary transferred to Uruguay on 12 April 2005. Used as a support ship for the Bremen class in German service, she was lengthened by 14.3 m in 1984 to accommodate a flight deck and a port-side crans. Her replenishment-at-sea capability will provide a much needed enhancement to Uruguayan operational capability. Other details are as for the ship in German service

Dimensions, feet (metres): 100 × 26.6 × 10.8 (30.5 × 8.1 × 3.3)
Main machinery: 1 R6 DV 148 diesel; 550 hp(m) (404 kW); 1 shaft
Speed, knots: 10
Complement: 12
Guns: 1–12 7 mm MG

Comment: Ex-GDR Type 270 tug acquired in October 1991 10 ton bollard pull

BANCO ORTIZ

10/2000, A E Galarce / 0105807

**Vanuatu****Country Overview**

The Republic of Vanuatu, formerly the New Hebrides, was jointly administered by Britain and France until it gained independence in 1980. Situated in the southwestern Pacific Ocean, some 1,100 n miles southeast of Papua New Guinea, the country comprises a group of about 80 islands, of which 67 are inhabited, which run generally north-south. The four main islands are Espiritu Santo

(the largest), Malekula, Efate and Tanna. Others include Epi, Pentecost, Aoba, Maewo, Erromanga and Ambrym. The capital, largest town and principal port is Port-Vila on Efate. An archipelagic state, territorial seas (12 n miles) are claimed. An Exclusive Economic Zone (EEZ) (200 n miles) is also claimed but limits have not been fully defined by boundary agreements. Disputed sovereignty of Matthew and Hunter Islands, both uninhabited, is one complication.

Headquarters Appointments

Commander, Maritime Wing:
Superintendent Tari Tamata

Bases

Port Vila, Efate Island

POLICE**1 PACIFIC CLASS (LARGE PATROL CRAFT) (PB)**

Name	No	Builders	Commissioned
TUKORO	02	Australian Shipbuilding Industries	13 June 1987

Displacement, tons: 165 full load
Dimensions, feet (metres): 103.3 × 26.6 × 6.9 (31.5 × 8.1 × 2.1)
Main machinery: 2 Caterpillar 3516TA diesels; 4,400 hp (3.28 MW) sustained; 2 shafts
Speed, knots: 18
Range, n miles: 2,500 at 12 kt
Complement: 18 (3 officers)
Guns: 1–12.7 mm MG. 1–762 mm MG.
Radars: Navigation: Furuno 1011; I-band.

Comment: Under the Defence Co-operation Programme Australia has provided one Patrol Craft to the Vanuatu government. Training and operational and technical assistance is also given by the Royal Australian Navy. Ordered 13 September 1985 and launched 20 May 1987. A half-life refit was carried out in 1995 and, following extension of the Pacific Patrol Boat programme by the Australian government, a life-extension refit was carried out at Townsville in 2004. The ship is employed on Exclusive Economic Zone (EEZ) fishery patrol and surveillance, including customs duties.

TUKORO

8/2005, Chris Sattler / 1129574

Venezuela

ARMADA DE VENEZUELA

Country Overview

The Republic of Venezuela is situated in northern South America. With an area of 352,144 square miles, it has borders to the east with Guyana, to the south with Brazil and to the west with Colombia. It has a 1,512 n mile coastline with the Caribbean Sea and Atlantic Ocean. Margarita is the principal offshore island, of which there are 70. The capital and largest city is Caracas which is served by the port of La Guaira. Other ports include Puerto Cabello, and Maracaibo. The chief port on the Orinoco River is Puerto Ordaz. Territorial Seas (12 n miles) are claimed. An EEZ (200 n miles) has also been claimed but the limits have not been fully defined by boundary agreements.

Headquarters Appointments

Commander General of the Navy:

Vice Admiral Zahim Ali Quintana Castro

Chief of Naval Staff and Inspector General:

Vice Admiral Pedro José González Díaz

Commander Operations:

Vice Admiral Luis Alberto Morales Márquez

Commander Naval Personnel:

Vice Admiral Jaime Enrique Toro Calderón

Commander Naval Logistics:

Vice Admiral Anstrides Yibirin Peluffo

Diplomatic Representation

Defence Attaché in London:

Rear Admiral Gerardo Casanas

Personnel

(a) 2009: 15,800

(b) 2 years' national service

Fleet Organisation

The fleet is split into 'Type' squadrons – frigates (except GC 11 and 12), submarines, light and amphibious forces.

Fleet Organisation – continued

Service Craft Squadron composed of RA 33, BO 11 and BE 11. The Fast Attack Squadron of the Constitución class is subordinate to the Fleet Command.

Marines

Following restructuring, the Marines are formed into a division, *General Simón Bolívar*, which consists of two amphibious brigades. The 1st Amphibious Brigade comprises four infantry battalions: *Rafael Urdaneta* (Puerto Cabello), *Francisco de Miranda* (Punto Fijo), *Renato Beluche* (Maracaibo) and *Manuel Ponce Lugo* (Puerto Cabello). The 2nd Amphibious Brigade comprises three battalions: *General Simón Bolívar* (Maiquetía), *Mariscal Antonio José de Sucre* (Cumana) and *General José Francisco Bermúdez* (Carupano). Additionally, there is an Engineer Brigade with three construction battalions; a Fluvial Brigade with the Fluvial Frontier Command at Puerto Ayacucho (Amazonas State) and several posts on border rivers.

Coast Guard

Formed in August 1982. It is part of the Navy. Its Headquarters are at La Guaira (Vargas State) and further bases at Maracaibo, Punta Fijo, Puerto Cabello, Guanta, Pampatar and Guiría. Its primary task is the surveillance of the 200 mile Exclusive Economic Zone and other jurisdictional areas of Venezuelan waters. Coast Guard Squadron includes the frigates GC 11 and GC 12 and several patrol craft.

Naval Aviation

Headquarters are at Puerto Cabello (Carabobo State). Under the command of a Rear Admiral, there are five Squadrons: Training, ASW, Surveillance, Patrol and Transport.

Naval Bases

Caracas: Navy Headquarters and *La Carlota* Naval Aviation Facility

Vargas State: Division de Infantería HQ and Naval Academy at Mamo; OCHINA (Hydrography) and OCAMAR (Marines Support) HQ. *Simón Bolívar* International Airport Naval Aviation Facility and Naval Police Training Centre at Maiquetía

Puerto Cabello (Carabobo State): Fleet Command HQ. Two battalions of 1st Amphibious Brigade at *Contralmirante Agustín Armas* Naval Base and Naval Aviation Command at *General Salom* Airport, Naval Schools and Dockyard.

Punto Fijo (Falcón State): Western Naval Zone HQ, Patrol Ships Squadron and Infantry Battalion 'Francisco de Miranda' at *Mariscal Juan Cnsóstomo Falcón* Naval Base. Carúpeno (Sucre State): Eastern Naval Zone HQ. Two battalions of the 2nd Amphibious Brigade and Marines Training Centre.

Ciudad Bolívar (Bolívar): Fluvial Brigade HQ at *Capitán de Fragata Tomás Machado* Naval Base, with several Naval Posts along the Orinoco River.

Turiamo (Aragua State): *Generalísimo Francisco de Miranda* Marines Special Operation Command at the *Capitán de Fragata Tomás Vega* Naval Station

Puerto Ayacucho (Amazonas State): Fluvial Frontier Command *General de Brigada Franz Riquéz Inbarrón* with several Naval Posts along Orinoco, Atabapo, Negro and Meta rivers.

El Amparo (Apure State): Fluvial Frontier Command HQ *Teniente de Navío Jacinto Muñoz*, with several Naval Posts along Arauca and Barinas rivers.

Puerto de Nutrias (Barinas State): River Post.

San José de Macuro (Delta Amacuro State): Atlantic naval post

La Orchila (Caribbean Sea): Minor Naval Base and Naval Aviation Station.

Puerto Hierro (Sucre State): Minor Naval Base

Maracaibo (Zulia State), Güiría (Sucre State), Guanta (Anzoátegui State) and Margarita Island (Nueva Esparta State): Main Coast Guard Stations

Los Monjes (Gulf of Venezuela), Los Testigos, Aves de Sotavento, La Tortuga and La Blanquilla Island (Caribbean Sea): Secondary Coast Guard Stations.

Prefix to Ships' Names

ARV (Armada de la República de Venezuela)

SUBMARINES

Notes. Acquisition of up to three new submarines, to replace the current force, is under negotiation. A contract for the procurement of three Project 636 Kilo-class submarines is expected in 2009. Two boats would be built at Admiralty Yard, St Petersburg, and the third in another Russian Shipyard. Deliveries are expected from 2014. The contract would also include a training package.

2 SÁBALO (TYPE 209/1300) CLASS (TYPE 1300) (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
SÁBALO	S 31 (ex-S 21)	Howaldtswerke, Kiel	2 May 1973	1 July 1975	6 Aug 1976
CARIBE	S 32 (ex-S 22)	Howaldtswerke, Kiel	1 Aug 1973	6 Nov 1975	11 Mar 1977

Displacement, tons: 1,285 surfaced; 1,600 dived
Dimensions, feet (metres): 200 1 × 20.3 × 18 (51.2 × 6.2 × 5.5)
Main machinery: Diesel-electric; 4 MTU 12V992 TB 90 diesels, 2,400 hp(m) (1.76 MW) sustained; 4 alternators; 1.7 MW; 1 Siemens motor; 4,600 hp(m) (3.38 MW) sustained; 1 shaft
Speed, knots: 10 surfaced, 22 dived
Range, n miles: 7,600 at 10 kt surfaced
Complement: 33 (5 officers)

Torpedoes: 8–21 in (533 mm) bow tubes. AEG SST 4; anti-surface; wire-guided; active/passive homing to 12 km (6.6 n miles) at 35 kt or 28 km (15.3 n miles) at 23 kt; warhead 260 kg. 14 torpedoes carried. Swim-out discharge

Countermeasures: ESM Thomson-CSF DR 2000; intercept.
Weapons control: Atlas Elektronik ISUS TPCS.
Radars: Navigation. Terma Scantier MI; I-band.
Sonars: Atlas Elektronik CSU 3-32; hull mounted; passive/active search and attack; medium frequency. Thomson Sintra DUUX 2; passive ranging

Programmes: Type 209, IK81 designed by Ingenieurkontor Lübeck for construction by Howaldtswerke, Kiel and sale by Ferrostaal, Essen, all acting as a consortium. Both refitted at Kiel in 1981 and 1984 respectively.
Modernisation: Carried out by HDW at Kiel. *Sábalo* started in April 1990 and left in November 1992 without fully completing the refit. *Caribe* docked in Kiel throughout 1993 but was back in the water in mid-1994, and completed in 1995. The hull was slightly lengthened and new engines, fire control, sonar and attack periscopes fitted. Refit of both boats at Dianca Shipyard began in December 2004 (*Caribe*) and March 2005 (*Sábalo*). The upgrade includes new batteries and weapon control systems and is expected to be completed in 2009.

Structure: A single-hull design with two main ballast tanks and forward and after trim tanks. The additional length is due to the new sonar dome similar to German Type 206 system. Fitted with snort and remote machinery control. Slow revolving single screw. Very high-capacity batteries with GRP lead-acid cells and battery-cooling. Diving depth 250 m (820 ft).

Operational: Endurance, 50 days patrol. Based at Puerto Cabello.

4 Jan 1980	5 Dec 1981
13 Jan 1980	3 Apr 1982
4 Oct 1980	30 July 1982

Displacement, tons: 2,208 standard; 2,520 full load
Dimensions, feet (metres): 371.3 x 37.1 x 12.1
 (113.2 x 11.3 x 3.7)

Main machinery: CODOG, 2 Fiat/GE LM 2500 gas turbines; 50,000 hp (37.3 MW) sustained; 2 GMT A230.20M or 2 MTU 20V 1163 (F 21 and F 22) diesels; 8,000 hp (m) (5.97 MW) sustained, 2 shafts; LIPS cp props

Speed, knots: 35; 21 on diesels

Range, n miles: 6,000 at 15 kt

Complement: 185

Missiles: SSM: 8 Otomat Tesco Mk 2 TG1 ●; active radar homing to 80 km (43.2 n miles) at 0.9 Mach; warhead 210 kg; sea-skimmer for last 4 km (2.2 n miles).

SAM: Selenia Elisag Albatros octuple launcher ●; 8 Aspide; semi-active radar homing to 13 km (7 n miles) at 2.5 Mach; height envelope 15-5,000 m (49.2-16,405 ft); warhead 30 kg.

Guns: 1 OTO Melara 5 in (127 mm)/54 ●; 45 rds/min to 16 km (8.7 n miles); weight of shell 32 kg.
 4 Otobreda 40 mm/70 (2 twin) ●; 300 rds/min to 12.5 km (6.8 n miles); weight of shell 0.96 kg.
 2-12.7 mm MGs.

Torpedoes: 6-324 mm (LAS 3 (2 triple) tubes ● Whitehead A244S; anti-submarine; active/passive homing to 7 km (3.8 n miles) at 33 kt; warhead 34 kg (shepod charge).

Countermeasures: Decoys: 2 Breda 105 mm SCLAR 20-barrelled trainable ●; chaff to 5 km (2.7 n miles); illuminants to 12 km (6.6 n miles). Can be used for HE bombardment.

ESM: Elisra NS 9003/9005; intercept.

Combat data systems: Selenia IPN 10. Elbit ENTCS 2000 (F 21 and F 22)

Weapons control: 2 Elisag NA 10 MFCS. 2 Dardo GFCS for 40 mm.

Radars: Air search: Selenia RAN 10S or Elta 2238 (F 21 and 22) ●; E/F-band.

Air/surface search: Selenia RAN 11X; I-band
Fire control: 2 Selenia Orion 10XP ●; I/J-band.
 2 Selenia RTN 20X ●; I/J-band.

Navigation: SMA 3RM20; I-band

Tacan: SRN 15A.

Sonars: EDO SQS-29 (Mod 610E) or Northrop Grumman 21 HS-7 (F 21 and F 22); hull-mounted; active search and attack; medium frequency.

Helicopters: 1 AB 212ASW ●.

Programmes: All ordered on 24 October 1975. Similar to ships in the Italian and Peruvian navies.

Modernisation: F 21 and F 22 were scheduled to start a refit by Ingalls Shipyard in September 1992 but contractual problems delayed start until January 1998. Refits included upgrading the gas turbines, replacing the diesels, improving the combat data system, updating sonar and ESM, and overhauling all weapon systems. The ships were redelivered in mid-2002 but further work was later required to re-install the Elta radar on a mast above the bridge. F 23 and F 24 have been upgraded by Dianca, Puerto Cabello, and returned to service in December and October 2003 respectively. Work included

GENERAL URDANETA

(Scale 1 : 900), Ian Sturton / 0529541

ALMIRANTE BRIÓN

6/2001, Northrop Grumman Ingalls / 0096360

modernisation of the main machinery, air-conditioning and weapon systems. F 25 and F 26 began similar refits at Dianca in 2004 but these had not been completed by early 2009.

Structure: Fixed hangar means no space for Aspide reloads. Fully stabilised
Operational: Based at Puerto Cabello.

ALMIRANTE BRIÓN

8/2007, Mario R V Carneiro / 1353890

SHIPBORNE AIRCRAFT

Notes. There are seven operational Bell 412EP helicopters, equipped with radar and FLIR. Four acquired in 1999 and three more delivered in 2003 of which one has been lost. This has been replaced by an Agusta Bel. 412EP. There is also one Bell 206B which is used for training. Six Mi-17 were acquired from Russia in 2007 for use by the Marines.

Numbers/Type: 8 Agusta AB 212ASW.
Operational speed: 106 kt (196 km/h).
Service ceiling: 14,200 ft (4,330 m).
Range: 230 n miles (426 km).
Role/Weapon systems: ASW helicopter with secondary ASV role. All eight have been upgraded in Italy. Sensors: APS-705 search radar, Bendix AQS-18A dipping sonar. Weapons: ASW; two Mk 46 or A244/S torpedoes or depth bombs. ASV; mid-course guidance to Tesec Mk 2 missiles.

AB 212 6/2005, Massimo Annati / 1167652

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Notes: (1) There are also two Beach King Air and three Cessnas used for training and transport. (2) Two CASA CN-235 maritime patrol aircraft were ordered in April 2005. The contract was signed on 29 November 2005 but cancelled in October 2006. (3) The contract for 24 Su-30 Mk 2 Flankers was signed with the Russian government on 21 July 2006. All had been delivered by mid-2008. The aircraft are capable of carrying a variety of air-to-surface weapons.

Numbers/Type: 3/2/3 CASA C-212 S 43/C-212 S 200/C-212 S 400 Aviocar.
Operational speed: 190 kt (353 km/h).
Service ceiling: 24,000 ft (7,315 m).
Range: 1,650 n miles (3,055 km).
Role/Weapon systems. Medium-range MR and coastal protection aircraft; limited armed action. Acquired in 1981-82 and 1985-86. Three modernised and augmented in 1998 by S 400 type. Previous numbers have reduced. Sensors: APS-128 radar. Weapons: ASW; depth bombs. ASV; gun and rocket pods.

C-212 6/2002, CASA/EADS / 067954R

VICTORIA	PC 16	Vosper Thornycroft	Mar 1974	3 Sep 1974	22 Sep 1975

Displacement, tons: 170 full load
Dimensions, feet (metres): 121 × 23.3 × 6 (36.9 × 7.1 × 1.8)
Main machinery: 2 MTU MD 16V 538 TB90 diesels; 6,000 hp(m) (4.4 MW) sustained; 2 shafts
Speed, knots: 31
Range, n miles: 1,350 at 16 kt
Complement: 20 (4 officers)

Missiles: SSM 2 OTO Melara/Matra Tesco Mk 2 TG1 (Federación, Libertad and Victoria); active radar homing to 80 km (43.2 n miles) at 0.9 Mach; sea-skimmer for last 4 km (2.2 n miles); warhead 210 kg.
Guns: 1 OTO Melara 3 in (76 mm)/62 compact (Constitucion, Independencia and Patria); 85 rds/min to 16 km (8.7 n miles); weight of shell 6 kg.
 1 Breda 30 mm/70 (Federación, Libertad and Victoria); 800 rds/min; weight of shell 0.37 kg.
 2—12.7 mm MGs.
Weapons control: Elsig NA 10 Mod 1 GFCS (Constitución, Independencia and Patria). Alenia Elsig Medusa optronic director (Federación, Libertad and Victoria).
Radars: Surface search: SMA SPO-2D; I-band
Fire control: Selenia RTN 10X (in 76 mm ships); I/J-band.
Navigation: Racal; I-band.

Programmes: Transferred from the Navy in 1983 to the Coast Guard but now back again with Fleet Command.
Modernisation: Single Breda 30 mm guns replaced the 40 mm guns in the missile craft in 1989. All were refitted at Puerto Cabello 1992 1995
Operational: It is planned to replace these ships with new offshore patrol vessels. Meanwhile it is reported that their propulsion systems have been refitted. Based at Punta Fijo.

VICTORIA (missile craft) 7/1999, Venezuelan Navy / 0089235

0 + 4 OFFSHORE PATROL VESSELS (PSOH)

Navigation: To be announced
Fire control: To be announced
Helicopters: Platform for one medium.

Programmes: Following agreement between the Spanish and Venezuelan governments signed on 28 November 2005, a contract for the construction of four patrol vessels (BVL) was signed with Navantia on 26 May 2006. Three ships are to be constructed at the San Fernando Shipyard at Cadiz and the programme is to be completed by 2012 and the fourth at Puerto Cabello (to be confirmed)

Operations: The vessels are to be employed on coastal patrol duties.

GUAICAMACUTO 10/2008, Carlos Pardo González / 1353654

4 CAPANA (ALLIGATOR) CLASS (LSTH)

Name	No	Builders	Commissioned
CAPANA	T 61	Korea Tacoma Marine	24 July 1984
ESEQUIBO	T 62	Korea Tacoma Marine	24 July 1984
GOAJIRA	T 63	Korea Tacoma Marine	20 Nov 1984
LOS LLANOS	T 64	Korea Tacoma Marine	20 Nov 1984

Displacement, tons: 4,070 full load
Dimensions, feet (metres): 343.8 x 50.5 x 9.8 (104.8 x 15.4 x 3)
Main machinery: 2 SEMT-Pielstick 16 PA6V 280 diesels; 12,800 hp(m) (9.41 MW); 2 shafts
Speed, knots: 14. **Range, n miles:** 5,600 at 11 kt
Complement: 117 (13 officers)
Military lift: 202 troops; 1,600 tons cargo; 4 LCVPs
Guns: 2 Breda 40 mm/70 (twin). 2 Oerlikon 20 mm GAM-BQ1.
Weapons control: Selenia NA 18/V; optronic director
Helicopters: Platform only.

Comment: Ordered in August 1982. Version III of Korea Tacoma Alligator type. Each has a 50 ton tank turntable and a lift between decks. *Goajira* was out of service from June 1987 to May 1993 after a serious fire. T 62 and T 63 reported to have been refitted in 2003 and T 61 2007-08. T 62 is likely to be similarly upgraded.

CAPANA 6/1998, Venezuelan Navy / 0084236

ESEQUIBO 3/1999, 0084237

AMPHIBIOUS FORCES

Notes: (1) It is reported that 39 Griffon 2000TD hovercraft are being assembled at Dianca. The first was delivered on 29 May 2007 and the remainder are to be built by 2013.
 (2) Procurement of one or more amphibious assault ships (LPD) is under consideration. The requirement is for a design to transport and deliver up to 750 troops with their equipment and vehicles in addition to civilian support and disaster relief roles.

2 AJEERA CLASS (LCU)

Name	No	Builders	Commissioned
MARGARITA	T 71	Swiftships Inc, Morgan City	20 Jan 1984
LA ORCHILA	T 72	Swiftships Inc, Morgan City	11 May 1984

Displacement, tons: 428 full load
Dimensions, feet (metres): 129.9 x 36.1 x 6.9 (39.6 x 11 x 1.8)
Main machinery: 2 Detroit 16V-149 diesels; 1,800 hp (1.34 MW) sustained, 2 shafts
Speed, knots: 13. **Range, n miles:** 1,500 at 10 kt
Complement: 26 (4 officers)
Military lift: 150 tons cargo, 100 tons fuel
Guns: 3—12.7 mm MGs.
Radars: Navigation: Raytheon 6410; I-band.

Comment: Both serve in Fluvial Command. Have a 15 ton crane.

MARGARITA 6/1999, Venezuelan Navy / 0084738

SURVEY AND RESEARCH SHIPS

Notes: The contract for the construction of five survey ships was signed with Astillero Vulcano, Vigo, on 5 August 2008. There are to be four vessels of 90 m and a fifth Antarctic survey ship of 113 m. The latter ship is to have a reinforced hull and to be equipped with a flight deck for helicopter operations. Some of these ships may be for civilian use.

1 SURVEY AND RESEARCH SHIP (AGOR)

Name	No	Builders	Launched	Commissioned
PUNTA BRAVA	BO 11	Bazan, La Cerraca	9 Mar 1990	14 Mar 1991

Displacement, tons: 1,170 full load
Dimensions, feet (metres): 202.4 x 39 x 12.1 (61.7 x 11.9 x 3.7)
Main machinery: 2 Bazán MAN 7L20/27 diesels; 2,500 hp(m) (1.84 MW); 2 shafts, bow thruster
Speed, knots: 13. **Range, n miles:** 8,000 at 13 kt
Complement: 49 (6 officers) plus 6 scientists
Radars: Navigation: ARPA; I-band.

Comment: Ordered in September 1988. Developed from the Spanish Malaspina class. A multipurpose ship for oceanography, marine resource evaluation, geophysical and biological research. Equipped with Qubit hydrographic system. Carries two survey launches. EW equipment is fitted. Assigned to the OCHINA (Hydrographic department).

PUNTA BRAVA 11/2008, A A de Kruif / 1353653

2 SURVEY CRAFT (AGSC)

Name	No	Builders	Commissioned
GABRIELA (ex-Peninsula de Araya)	LH 11	Abeking & Rasmussen	5 Feb 1974
LELY (ex-Peninsula de Paraguane)	LH 12	Abeking & Rasmussen	7 Feb 1974

Displacement, tons: 90 full load
 Dimensions, feet (metres): 88.6 × 18.4 × 4.9 (27 × 5.6 × 1.5)
 Main machinery: 2 MTU diesels, 2,300 hp (m) (1.69 MW); 2 shafts
 Speed, knots: 20
 Complement: 9 (1 officer)

Comment: LH 12 laid down 28 May 1973, launched 12 December 1973 and LH 11 laid down 10 March 1973, launched 29 November 1973. Acquired in September 1986 from the Instituto de Canalizaciones. Both assigned to the Fluvial Command.

GABRIELA (alongside Alcatraz PG 32) 1/1994, Maritime Photographic / 050618D

TRAINING SHIPS
1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Launched	Commissioned
SIMÓN BOLÍVAR	BE 11	AT Calaya, Bilbao	21 Nov 1979	6 Aug 1980

Displacement, tons: 1,260 full load
 Measurement, tons: 934 gross
 Dimensions, feet (metres): 270.6 × 34.8 × 14.4 (82.5 × 10.6 × 4.4)
 Main machinery: 1 Detroit 12V-149T diesel, 875 hp (652 kW) sustained; 1 shaft
 Speed, knots: 10
 Complement: 93 (17 officers) plus 102 trainees

Comment: Ordered in 1978. Three-masted barque; similar to Guayas (Ecuador), Cuauhtemoc (Mexico) and Gloria (Colombia). Sail area (23 sails), 1,650 m². Highest mast, 131.2 ft (40 m). Has won several international sail competitions including Cutty Sark '96. A refit is reported to have been completed in 2008.

SIMÓN BOLÍVAR 6/2001, A Campanera i Rovira / 053411/0

AUXILIARIES

Notes: There is one navigational aids tender Macuro BB-11.

1 LOGISTIC SUPPORT SHIP (AORH)

Name	No	Builders	Commissioned
CIUDAD BOLÍVAR	T 81	Hyundai, Ulsan	2001

Displacement, tons: 9,750 full load
 Dimensions, feet (metres): 451.8 × 59 × 21.7 (1377 × 18 × 6.6)
 Main machinery: 2 Caterpillar 3616 diesels; 2 shafts LIPS cp props
 Speed, knots: 18. Range, n miles: 4,500 at 15 kt
 Complement: 104
 Guns: 2 Bofors 40 mm/70. 2—12.7 mm MGs.

Comment: Ordered from Hyundai, South Korea, in February 1999. Delivered in October 2001. Capable of carrying 4,400 tons of fuel and 900 tons of cargo. Two replenishment stations on each beam. Hangar and deck for medium size helicopter. Replenishment operations reported conducted with both French and Netherlands units. Armament is not yet fitted.

1 + (1) OCEAN TUG (ATA)

Name	No	Builders	Laid down	Launched	Commissioned
GENERAL FRANCISCO DE MIRANDA (ex-Almirante Bruzuel)	RA 11	Damen, Gorinchem and DIANCA, Puerto Caballo, Venezuela	Apr 2004	2005	Mar 2007

Displacement, tons: 700 full load
 Dimensions, feet (metres): 213.2 × 39.3 × 19.7 (65.0 × 12.0 × 6.0)
 Main machinery: 2 CAT 3606TA diesels; 5,400 hp (4 MW); 2 shafts
 Speed, knots: 16. Range, n miles: 7,000 at 10 kt
 Complement: To be announced
 Radars: Navigation, I-band.

Comment: DIANCA, a shipyard owned and operated by the Venezuelan Navy, contracted in early 2004 to build an ocean-going tug with technical assistance from Damen Shipyards. Built of aluminium and steel, the ship is used for a variety of tasks including counter-drug, counter-piracy and counter-pollution operations as well as general sea-safety duties. It has a cargo capacity of 150 tons and was completed in 2006. A second ship is expected.

COAST GUARD
7 RIVER PATROL CRAFT (PBR)

MANAURE PF 21	GUAICAIPURO PF 23	TEREPAIMA PF 31	SOROCAIMA PF 34
MARA PF 22	TAMANACO PF 24	VARACUY PF 33	

Displacement, tons: 15 full load
 Dimensions, feet (metres): 64.1 × 14.1 × 4.3 (16.5 × 4.3 × 1.3)
 Main machinery: 2 diesels; 2 shafts
 Speed, knots: 10
 Complement: 8
 Guns: 1—12.7 mm MG
 Radars: Surface search: Raytheon 6410; I-band.

Comment: River craft used by the Marines. Details given are for four Manaure class. There are also three Terepaime class which are 10 m long and capable of 45 kt.

MANAURE 6/1998, Venezuelan Navy / 0050731

4 PETREL (POINT) CLASS (WPB)

Name	No	Builders	Commissioned
PETREL (ex-Point Knoll)	PG 31	US Coast Guard Yard, Curtis Bay	26 June 1967
ALCATRAZ (ex-Point Judith)	PG 32	US Coast Guard Yard, Curtis Bay	26 July 1966
ALBATROS (ex-Point Franklin)	PG 33	US Coast Guard Yard, Curtis Bay	14 Nov 1966
PELICANO (ex-Point Ledge)	PG 34	US Coast Guard Yard, Curtis Bay	18 July 1962

Displacement, tons: 68 full load
 Dimensions, feet (metres): 83 × 17.2 × 5.8 (25.3 × 5.2 × 1.8)
 Main machinery: 2 Caterpillar diesels, 1,600 hp (1.19 MW); 2 shafts
 Speed, knots: 23.5
 Range, n miles: 1,500 at 8 kt
 Complement: 10 (1 officer)
 Guns: 2—12.7 mm MGs.
 Radars: Surface search: Raytheon SPS-64, I-band

Comment: Petrel transferred from USCG on 18 November 1991 and Alcatraz on 15 January 1992, Albatros on 23 June 1998 and Pelicano on 3 August 1998. The transfer of four further craft is unlikely. Most of the class are believed to be operational.

ALCATRAZ 4/1999 009474

POLARIS LG 21	RIGEL LG 23	ANTARES LG 25	ALTAIR LG 27
SIRIUS LG 22	ALDEBARAN LG 24	CANOPUS LG 26	

Displacement, tons: 5 full load
Dimensions, feet (metres): 26 wl x 8.5 x 2.6 (7.9 x 2.6 x 0.8)
Main machinery: 1 diesel outdrive; 400 hp(m) (294 kW)
Speed, knots: 50
Complement: 4
Guns: 1—12.7 mm MG.
Radars: Surface search: Raytheon; I-band

Comment: Built by Cougar Marine and delivered in 1987. Used by the Coast Guard for drug interdiction. Two more reported operational

ALDEBARAN 4/1999, Venezuelan Navy / 008474

2 UTILITY CRAFT (YAG)

LOSTAQUES LG 11	LOS CAYOS LG 12
-----------------	-----------------

Displacement, tons: 350 full load
Dimensions, feet (metres): 87.3 x 23.3 x 4.9 (26.6 x 7.1 x 1.5)
Main machinery: 1 diesel; 850 hp(m) (625 kW); 1 shaft
Speed, knots: 8
Complement: 10
Guns: 1—12.7 mm MG

Comment: Former trawlers. Commissioned 15 May 1981 and 17 July 1984 respectively. Used for salvage and SAR tasks.

1 + (14) DIANCA PATROL CRAFT (PB)

Displacement, tons: To be announced
Dimensions, feet (metres): 75.5 × 18.4 × 7 (23.0 × 5.0 × 7)
Main machinery: To be announced
Speed, knots: 32
Complement: 10
Guns: To be announced.
Radars: To be announced

Comment: Dianca Project P 698. First of class entered service in 2004 and a class of 15 is projected. Aluminium construction

18 INSHORE PATROL BOATS (PBR)

CONSTANCIA LRG 001 HONESTIDAD LRG 003 INTEGRIDAD LRG 005 +12
PERSEVERANCIA LRG 002 TENACIDAD LRG 004 LEALTAD LRG 006

Displacement, tons: 11 full load
Dimensions, feet (metres): 39.4 × 9.2 × 5.6 (12 × 2.8 × 1.7)
Main machinery: 2 diesels; 840 hp(m) (470 kW); 2 shafts
Speed, knots: 38
Complement: 4
Guns: 2 – 7.62 mm MGs.
Radars: Surface search I-band

Comment: First three speed boat type with GRP hulls delivered from a local shipyard in December 1991. Fourth completed in August 1993. Details given are for *Integridad* which is the first of two built at Guatire, and delivered in 1997/98. GRP construction. The twelve un-named craft are Boston Whaler Guardian class capable of 25 kt, mounting 2 – 12.7 mm and 2 – 6.72 mm MGs, and with Raytheon radars. These were donated by the US. All of these craft are used by Marines.

Displacement, tons: 5 full load
Dimensions, feet (metres): 41.7 × 9.2 × 6.6 (12.7 × 2.8 × 2)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 30
Complement: 4
Guns: 1 – 12.7 mm MG
Radars: Surface search Raytheon, I-band.

Comment: Built in Venezuela by Intermarine. Used by OCHINA (Hydrographic department) and for SAR. First six delivered by 1997 and last two in 2000.

BAJO ARAYA 3/1999, Venezuelan Navy / 0084246

1 SUPPORT SHIP (AKSL)

Name	No	Builders	Commissioned
FERNANDO GÓMEZ (ex-José Félix Ribas, ex-Oswegatchia)	RP 21 (ex-R 13)	Commercial Iron Works, Portland	14 Dec 1945

Displacement, tons: 245 full load
Dimensions, feet (metres): 100.1 × 25.9 × 9.5 (30.5 × 7.9 × 2.9)
Main machinery: 2 diesels; 1,270 hp (947 kW); 1 shaft
Speed, knots: 10
Complement: 12
Guns: 2 – 12.7 mm MGs.
Radars: Navigation; Raytheon; I-band.

Comment: Former tug, originally acquired from the US in 1965. Out of service for some years but now employed as a logistic support ship and for occasional patrol and SAR.

FERNANDO GOMEZ 6/1998, Venezuelan Navy / 0050738

PROTECTOR 3612 CLASS (PB)

CHICHIRIVICHE LG 31 CARUANTA LG 32

Displacement, tons: 11 full load
Dimensions, feet (metres): 36.1 × 13.1 × 1.6 (11.1 × 4.0 × 0.5)

Comment: Built by SeaArk Marine, Monticello, and delivered in 1994.

2 RIVER TRANSPORT CRAFT (LCM)

CURIAPO LC 21 YOPITO LC 01

Displacement, tons: 115 full load
Dimensions, feet (metres): 73.7 × 21 × 5.2 (22.5 × 6.4 × 1.6)
Main machinery: 2 Detroit diesels; 850 hp (625 kW); 2 shafts
Speed, knots: 9
Complement: 5
Cargo capacity: 60 tons or 200 Marines
Guns: 2 – 12.7 mm MGs.

Comment: Details given are for *Cunapo* which is a former LCM. *Yopito* is a former LCU of 18 m. Both are used by the Marines. There are also 12 11 m LCVPs.

YOPITO 7/1999, Venezuelan Navy / 0084248

1 + 3 DAMEN STAN PATROL 2606 (PB)

Displacement, tons: To be announced
Dimensions, feet (metres): 38.9 × 21.1 × 7 (26.5 × 6.9 × 7)
Main machinery: 2 diesels; 2 cp props
Speed, knots: 25
Complement: To be announced
Guns: 3 – 12.7 mm MGs

Comment: Contract signed with Damen Shipyards for construction at UCOCAR, Puerto Cabello, of one Damen Stan Patrol 2606 patrol craft. Aluminium construction. Launched on 14 August 2008. Three further craft to be built by 2010.

STAN PATROL 2606 6/2008, Damen Shipyards / 1353713

NATIONAL GUARD (GUARDIA NACIONAL)

Notes: (1) There are also a large number of US and Canadian built river craft of between 6 and 9 m length, which are armed with MGs
 (2) Four intercept launches were delivered in 2003; two in July 2003 and two in October 2003
 (3) Some 60 Pirana class river patrol craft have been ordered. The first 15 were delivered in August 2003
 (4) It is reported that 66 patrol craft were ordered from Rodman in July 2007. The order includes 30 m Rodman 101, 20 m R 66 and 16 m Rodman 55. The deliveries are likely to be split between the Navy and the Coast Guard.

10 RIO ORINOCO II CLASS (PBF)

B 9801 series

Displacement, tons: 30 full load
Dimensions, feet (metres): 54 x 14 x 4.6 (16.5 x 4.3 x 1.4)
Main machinery: 2 MTU 12V 183TE93 diesels; 2,268 hp(m) (1.67 MW) sustained; 2 shafts
Speed, knots: 36
Range, n miles: 500 at 25 kt
Complement: 5
Guns: 2–12.7 mm MGs. 2–7.62 mm MGs.
Radars: Surface search: Raytheon R1210; I-band.

Comment: Ordered from Halter Marine 24 April 1998. All delivered by late 1999. Aluminium construction. Some of the similar speed Orinoco I craft built in the 1970s are still in limited use.

Speed, knots: 34. **Range, n miles:** 390 at 25 kt
Complement: 4
Guns: 2–12.7 mm MGs.
Radars: Navigation: Raytheon; I-band.

Comment: Built by Robert E Derektor, Mamaroneck, NY. Delivered July-December 1984

Vietnam

Country Overview

The Socialist Republic of Vietnam was established in 1976 when the Democratic Republic of Vietnam in the north and the Republic of Vietnam in the south became one nation. The country had been divided at the 17th parallel from the end of French colonial rule in 1954 and during the ensuing Vietnam War. Located on the east coast of the Indochina peninsula, it has an area of 127,844 square miles and is bordered to the north by China and to the west by Cambodia and Laos. It has a 1,858 n mile coastline with the South China Sea. Hanoi is the capital while Ho Chi Minh City (formerly Saigon) is the largest city and a major port. There are further ports at Haiphong and Da Nang. Territorial seas (12 n miles) are claimed. An EEZ (200 n miles) has also been claimed but the limits have not been defined.

Headquarters Appointments

Chief of Naval Forces:
 Vice Admiral Nguyen Van Hien
Deputy Chief of Naval Forces:
 Captain Tran Quang Khuc

Personnel

- (a) 2009: 13,000 regulars
- (b) Additional conscripts on three to four year term (about 3,000)
- (c) 27,000 naval infantry

Organisation and Bases

The Vietnamese Navy is part of the People's Army of Vietnam (PAVN) and is formally known as the PAVN Navy. The fleet is organised into four regions based on, from north to south, Haiphong (HQ), Da Nang, Nha Trang and Can Tho. There are other bases at Cam Ranh Bay, Hue and Ha Tou.

Coast Guard

A Coast Guard was formed on 1 September 1998. It is subordinate to the Navy and may take on Customs duties.

SUBMARINES

2YUGO CLASS (MIDGET SUBMARINES) (SSW)

Displacement, tons: 90 surfaced; 110 dived
Dimensions, feet (metres): 65.6 x 10.2 x 15.1 (20 x 3.1 x 4.6)
Main machinery: 2 diesels; 320 hp(m) (236 kW); 1 shaft
Speed, knots: 12 surfaced; 8 dived
Range, n miles: 550 at 10 kt surfaced; 50 at 4 kt dived
Complement: 4 plus 6/7 divers

Comment: Transferred from North Korea in 1997. May be fitted with two short torpedo tubes and a short mast, but used primarily for diver related operations. The conning tower acts as a wet/dry diver compartment. Operational status is doubtful.

YUGO (North Korean colours)
 6/1998, Ships of the World
 00875/5

FRIGATES

Notes: The Barnegat class frigate (ex-seaplane tender) *Pham Ngu Lao* HQ 01 has probably been decommissioned

0 + 2 (2) GEPARD (PROJECT 11661) CLASS (FFGM)

Name	No	Builders	Laid down	Launched	Commissioned
-	-	Zelenodolsk Shipyard	10 July 2007	2009	2010
-	-	Zelenodolsk Shipyard	28 Nov 2007	2010	2011

Displacement, tons: 1,550 standard, 2,100 full load

Dimensions, feet (metres): 335.3 × 43.0 × 17.4

(102.2 × 13.1 × 5.3)

Main machinery: CODOG; 2 gas turbines; 30,860 hp(m) (23.0 MW); 1 Type 61D diesel; 7,375 hp(m) (5.5 MW); 2 shafts, cp props

Speed, knots: 26 (18 on diesels)

Range, n miles: 5,000 at 10 kt

Complement: 103 (accommodation for 131)

Missiles: SSM: 8 Zvezda SS-N-25 (KH 35 Uran) (2 quad); IR or radar homing to 130 km (70.2 n miles) at 0.9 Mach; warhead 145 kg; sea skimmer.

SAM: 1 SA-N-4 Gecko twin launcher; semi-active radar homing to 15 km (8 n miles) at 2.5 Mach; warhead 50 kg, 20 weapons.

Guns: 1-3 in (76 mm)/59 AK-176; 120 rds/min to 15 km (8 n miles); weight of shell 5.9 kg.

2-30 mm/65 AK-630; 6 barrels per mounting; 3,000 rds/min combined to 2 km.

Torpedoes: 4-21 in (533 mm) (2 twin) tubes.

A/S mortars: 1 RBU 6000 12-tubed trainable

Mines: 2 rails, 48 mines.

Countermeasures: Decoys; 4 PK 16 chaff launchers.

ESM/ECM: 2 Bell Shroud. 2 Bell Squat. Intercept and jammers.

Weapons control: 2 Light Bulb datalink Hood Wink and Odd Box optronic systems. Band Stand datalink.

Radars: Air/surface search: Cross Dome; E/F-band.

Fire control: Bass Tilt; H/I-band (for guns). Pop Group; F/H/I-band (for SAM) Gerpun-B (for SSM); I/J-band.

Band Stand (Mineral ME); D-band (for SS-N-25).

Navigation: Nayada, I-band.

IFF: 2 Square Head, 1 Salt Pot B.

Sonars: Ox Yoke; hull mounted; active search and attack; medium frequency.

Ox Tail, VDS; active search and attack, medium frequency.

GEPARD CLASS

7/2002, Military Parade / 05/78304

Programmes: Contract signed with Rosoboronexport in late 2005 for the procurement of two Gepard-class frigates. The contract for construction was signed with Zelenodolsk Shipyard on 22 December 2006. Delivery is expected in 2010. Components may be supplied for

the construction of two further ships at Ho Chi Minh City.

Operational: Details of weapons and sensors are speculative and based on those originally designated for the ships in Russian naval service

HQ 13 (ex SKR 141)

HQ 15 (ex-SKR 130)

HQ 17 (ex SKR 135)

Displacement, tons: 950 standard; 1,180 full load

Dimensions, feet (metres): 268.3 × 29.9 × 9.5

(81.8 × 9.1 × 2.9)

Main machinery: CODAG; 2 gas turbines; 30,000 hp(m) (22 MW); 1 Type 61V-3 diesel; 5,400 hp(m) (3.97 MW) sustained; centre shaft; 3 shafts

Speed, knots: 32

Range, n miles: 4,870 at 10 kt, 450 at 29 kt

Complement: 98 (8 officers)

Guns: 4 USSR 3 in (76 mm)/59 AK 726 (2 twin); 90 rds/min to 15 km (8 n miles); weight of shell 5.9 kg

4-37 mm (2 twin) (HQ 11). 4-23 mm (2 twin) (HQ 11, 15).

Torpedoes: 3-21 in (533 mm) (triple) tubes (Petya III).

SAET-60; passive homing to 15 km (8.1 n miles) at 40 kt; warhead 400 kg

5-16 in (406 mm) (1 quin) tubes (Petya II). SAET-40; active/passive homing to 10 km (5.5 n miles) at 30 kt; warhead 100 kg

A/S mortars: 4 RBU 6000 12-tubed trainable (HQ 09, 13, 17); range 6,000 m; warhead 31 kg.

4 RBU 2500 16-tubed trainable (HQ 11); range 2,500 m; warhead 21 kg.

Depth charges: 2 racks.

Mines: Can carry 22.

Countermeasures: ESM: 2 Watch Dog; radar warning

Radars: Air/surface search: Strut Curve; F-band.

Navigation: Don 2; I-band

Fire control: Hawk Screech; I-band.

IFF: High Pole B. 2 Square Head

HQ 09

9/1995, G Toremans / 05/06761

Sonars: Vychada MG 311; hull-mounted; active attack, high frequency.

Programmes: All built at Khabarovsk. Two Petya III (HQ 09, 11) (export version) transferred from USSR in December 1978 and three Petya IIs, (HQ 13, 15, 17); HQ 13 transferred in December 1983; HQ 15 in May 1984 and HQ 17 in December 1984

Modernisation: Refitted and updated 1994 to 1999. The RBUs replaced by 25 mm guns and the torpedo tubes by 37 mm guns in some of the class. HQ 17 completed major overhaul at Ba Son Shipyard in 2001.

Structure: The Petya IIs have the same hulls as the Petya IIs but different armament.

Operational: Reported active between the coast and the Spratly Islands

HQ 17 (PETYA II)

11/2001 / 0131341

4 TARANTUL CLASS (PROJECT 1241RE) (FSGM)

HQ 371 HQ 372 HQ 374 HQ 378

Displacement, tons: 385 standard, 450 full load

Dimensions, feet (metres): 184.1 × 37.7 × 8.2 (56.1 × 11.5 × 2.5)

Main machinery: 2 Nikolayev Type DR 77 gas turbines; 16,016 hp(m) (11.77 MW) sustained,
2 Nikolayev Type DR 76 gas turbines with reversible gearboxes; 4,993 hp(m) (3.67 MW)
sustained, 2 shafts

Speed, knots: 36

Range, n miles: 2,000 at 20 kt, 400 at 36 kt

Complement: 41 (5 officers)

Missiles: SSM: 4 SS-N-2D Styx; IR homing to 83 km (45 n miles) at 0.9 Mach; warhead
513 kg; sea-skimmer at end of run.

SAM: SA-N-5 Grail quad launcher; manual aiming; IR homing to 6 km (3.2 n miles) at
1.5 Mach; warhead 1.5 kg.

Guns: 1-3 in (76 mm)/59 AK 176; 120 rds/min to 15 km (8 n miles); weight of shell
5.9 kg.

2-30 mm/65 AK 630; 6 barrels per mounting, 3,000 rds/min combined to 2 km

Countermeasures: Decoys: 2 PK 16 chaff launchers.

Weapons control: Hood Wink optronic director.

Radars: Air/surface search: Plank Shave, E-band.

Navigation: Pechora, I-band.

Fire control: BassTilt; H/I-band

IFF: Salt Pot, Square Head A.

Sonars: FoalTail; active; high frequency.

Programmes: First pair ordered in October 1994. These were new hulls exported
at a favourable price and completed by 1996. Some delay in delivery because
of late payments, but both were in service by April 1996. Two further vessels
were reported to have been ordered in 1999 for delivery in 2000. Imagery of
HQ 374 suggests that the contract has been completed although this may be
the result of a change in pennant numbers. Current numbers of vessels are thus
uncertain.

Operational: Based at Da Nang

PATROL FORCES

Notes: (1) At least one Shanghai II class PC may still be operational.
(2) Some of the craft listed may be transferred to the Coast Guard and Maritime Police.

4 + (6) SVETLYAK (PROJECT 1041.2) CLASS (PGM)

HQ 261-264

Displacement, tons: 366 full load

Dimensions, feet (metres): 162.4 × 30.2 × 7.9 (49.5 - 9.2 × 2.4)

Main machinery: 3 diesels; 15,900 hp(m) (11.85 MW) sustained; 3 shafts; cp props

Speed, knots: 30

Range, n miles: 2,200 at 13 kt

Complement: 28 (4 officers)

Missiles: SAM: SA-N-10; shoulder launched and (manual aiming); IR homing to 5 km (2.7 n miles) at 1.7 Mach; warhead 1.6 kg.

Guns: 1–3 in (76 mm) /59 AK 176; 120 rds/min to 15 km (8 n miles); weight of shell 5.9 kg.
1–30 mm/65 AK 630, 6 barrels, 3,000 rds/min combined to 2 km.

Countermeasures: Decoys: 2 chaff launchers.

Weapons control: Hood Wink optronic director

Radars: Air/surface search: Peel Cone; E-band.

Fire control: Bass Tilt; H/I-band.

Navigation: Palm Frond B; I-band

Comment: Contract for two craft signed with Almaz, St Petersburg in November 2001. First vessel launched on 17 July 2002 and second on 30 July 2002. Following acceptance on 17 October 2002, both vessels were shipped from St Petersburg on 14 December 2002. Two more are reported to have been delivered in 2007 and it is understood there is an option for a further six vessels.

(FAST ATTACK CRAFT—MISSILE) (PTFG)

HQ 154

HQ 357-360

HQ 384-386

Displacement, tons: 245 full load

Dimensions, feet (metres): 126.8 × 24.9 × 8.8 (38.6 × 7.6 × 2.7)

Main machinery: 3 Type M 504 diesels; 10,800 hp(m) (7.94 MW) sustained; 3 shafts

Speed, knots: 37. Range, n miles: 500 at 35 kt

Complement: 30

Missiles: SSM: 4 SS-N-2B Styx; active radar or IR homing to 48 km (25 n miles) at 0.9 Mach; warhead 513 kg.

Guns: 4 USSR 30 mm/65 (2 twin); 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg.

Radars: Surface search: Square Tie; I-band.

Fire control: Drum Tilt; H/I band.

IFF: High Pole. 2 Square Head.

Comment: Transferred from USSR: two in October 1979, two in September 1980, two in November 1980 and two in February 1981. All based at Da Nang. Operational status doubtful.

OSA II 354

5/2000, Bob Fildes / 0105/40

5 TURYA (PROJECT 206M) CLASS
(FAST ATTACK CRAFT—HYDROFOIL) (PCK)

HQ 321

HQ 331-332

HQ 334-335

Displacement, tons: 190 standard; 250 full load

Dimensions, feet (metres): 129.9 × 29.9 (41 over foils) × 5.9 (13.1 over foils) (39.6 × 7.6 (12.5) × 1.8 (4))

Main machinery: 3 Type M 504 diesels; 10,800 hp(m) (7.94 MW) sustained; 3 shafts

Speed, knots: 40

Range, n miles: 600 at 35 kt foilborne; 1,450 at 14 kt hullborne

Complement: 30

Guns: 2 USSR 57 mm/75 AK 725 (twin, aft); 120 rds/min to 12.7 km (6.8 n miles); weight of shell 2.8 kg.
2 USSR 25 mm/80 (twin, fwd); 270 rds/min to 3 km (1.6 n miles); weight of shell 0.34 kg.

Torpedoes: 4 21 in (533 mm) tubes (not in all).

Depth charges: 2 racks.

Radars: Surface search: Pot Drum; H/I-band

Fire control: Muff Cob; G/H-band.

IFF: High Pole B. Square Head.

Sonars: Foal/Tail (not in all); VDS; high frequency

Comment: Transferred from USSR: two in mid-1984, one in late 1984, two in January 1986. Two more acquired from Russia. Two of the five do not have torpedo tubes or sonar. Two scrapped so far, the remainder are probably non-operational.

+10

Displacement, tons: 39 full load

Dimensions, feet (metres): 78.7 × 16.4 × 3.9 (24 × 5 × 1.2)

Main machinery: 2 Type M 401B diesels; 2,200 hp(m) (1.6 MW) sustained; 2 shafts

Speed, knots: 30

Range, n miles: 1,100 at 15 kt

Complement: 11 (3 officers)

Guns: 4–14.5 mm (2 twin) MGs

Radars: Surface search: Spin Trough; I-band.

Comment: Transferred: three in 1978, three in November 1979, one in November 1981, one in May 1985, three in February 1986, two in December 1989, two in January 1990, three in January 1996, two in January 1998 and two in April 1998. So far seven have been deleted but operational numbers are uncertain. Some are allocated to the Coast Guard.

990 Vietnam/Patrol forces – Amphibious forces

4 + (12) STOLKRAFT CLASS (PBR)

HQ 56-59

Displacement, tons: 44 full load
Dimensions, feet (metres): 73.5 × 24.6 × 3.9 (22.4 × 7.5 × 1.2)
Main machinery: 2 MTU 12V 183 TE93 diesels; 2,301 hp(m) (1.69 MW) sustained; 2 Doorn waterjets
 1 Volvo Penta diesel, 360 hp(m) (265 kW); 1 shaft
Speed, knots: 30
Complement: 7
Guns: 1 Oerlikon 20 mm

Comment: Four built by Oceanfast Marine, Western Australia and delivered in early 1997. Trimaran construction forward, transforming into a catamaran at the stern. Shallow draft needed for inshore and river operations. The centreline single shaft is used for loitering. The craft show the colours of the Customs department. Up to 12 more may have been built in Vietnam but this has not been confirmed.

Speed, knots: 11 **Range, n miles:** 300 at 10 kt
Complement: 10
Guns: 2 USSR 25 mm/80 (twin).
Mines: 8.
Radars: Surface search, Spin Trough; I-band.
Sonars: MG 7; active; high frequency

Comment: First transferred from USSR in October 1979; two in December 1986. One deleted in 1990

YEVGENYA (Ukraine colours) 6/2003, Ships of the world 0572652

5 K 8 (PROJECT 361T) CLASS (MINESWEEPING BOATS) (PBR)

Displacement, tons: 26 full load
Dimensions, feet (metres): 55.4 × 10.5 × 2.6 (16.9 × 3.2 × 0.8)
Main machinery: 2 Type 3-D-5 diesels; 300 hp(m) (220 kW) sustained; 2 shafts
Speed, knots: 18
Complement: 6
Guns: 2 14.5 mm (twin) MGs.

Comment: Transferred from USSR in October 1980. Probably used as river patrol craft

SURVEY AND RESEARCH SHIPS

1 KAMENKA (PROJECT 870) CLASS (AGS)

Displacement, tons: 760 full load
Dimensions, feet (metres): 175.5 × 29.8 × 8.5 (53.5 × 9.1 × 2.6)
Main machinery: 2 Sulzer diesels; 1,800 hp(m) (1.32 MW); 2 shafts, cp props
Speed, knots: 14 **Range, n miles:** 4,000 at 10 kt
Complement: 25
Radars: Navigation: Don 2; I-band.

Comment: Transferred from USSR December 1979. Built at Northern Shipyard, Gdansk in the late 1960s. May be civilian manned

KAMENKA (Russian colours) 1984 / 0506/127

0 + 1 SURVEY SHIP (AGSH)

Name	No	Builders	Laid down	Launched	Commissioned
-	-	SongThu, Danang	26 July 2008	2010	2011

Displacement, tons: To be announced
Dimensions, feet (metres): 217.5 x 50.2 x 10.2 (66.3 x 13.2 x 3.1)
Main machinery: Diesel-electric; 3 diesel generators; 2,852 hp(m) (1.95 MW); 1 motor; 1,073 hp(m) (800 kW); 2 azimuth thrusters; 1 bow thruster
Speed, knots: 12 **Range, n miles:** 3,000 at 12 kt
Complement: 13 (accommodation for 71)
Radars: Navigation: E/F- and I-band.
Sonars: Multi and single beam; high frequency; active

Comment: Damen 6613 design multipurpose hydrographic and oceanographic survey, training and mine countermeasures vessel. The ship is to be a derivative of the Snellius-class vessels built for the RNLN and is similar to the ship that entered Thai service in 2008. This ship is being built by SongThu Company in Danang, Vietnam from a design and material package supplied by Damen Shipyards, Gorinchem. The hydrographical survey equipment is to be supplied by Atlas.

DAMEN 6613 12/2005, Damen Shipyards / 1159274

TRUONG HQ 966	HQ 601	HQ 618-619	HQ 651	HQ 673
BD 621-622	HQ 608	HQ 627	HQ 681	HQ 996
BD 630-632	HQ 614	HQ 643	HQ 669-671	

Measurement, tons: 1,000 dwt
Dimensions, feet (metres): 231.6 x 38.7 x 13.1 (70.5 x 11.8 x 4)
Main machinery: 1 diesel; 1 shaft
Speed, knots: 12
Complement: 30

Comment: Details are for HQ 966 launched at HaLong Shipyard in June 1994. This is one of a group of 20 freighters reported as used by the Navy for coastal transport, and to service the Spratleys garrison. BD pennant numbers have been assigned to Spratly Islands service. The ships are of various sizes and include fishing vessels adapted for supply tasks. All are likely to be armed with machine guns.

BD 621 (old number) 3/1997 / 0050747

AUXILIARIES

Notes: In addition to the vessels listed below there are two YOG 5 fuel lighters, two floating cranes, two ex-USSR unarmed Nyrpat 2 diving tenders and approximately 10 harbour tugs.

1 VODA (PROJECT 561) CLASS (WATER TANKER) (AWT)

BO 82 (ex-MVT 19)

Displacement, tons: 2,115 full load
Dimensions, feet (metres): 267.4 x 37.7 x 14.1 (81.5 x 11.5 x 4.3)
Main machinery: 2 diesels; 1,600 hp (1.2 MW); 2 shafts
Speed, knots: 12
Range, n miles: 3,000 at 10 kt
Complement: 38
Radars: Navigation: Don 2; I-band

Comment: Built by Yantar, Kaliningrad, in the 1950s. Probably an ex-Russian Pacific Fleet unit transferred in about 1996. Carries about 1,000 tons of water.

1 SORUM (PROJECT 745) CLASS (ATA)

III

Displacement, tons: 1,660 full load
Dimensions, feet (metres): 190.2 x 41.3 x 15.1 (58.0 x 12.6 x 4.6)
Main machinery: Diesel-electric; 2 Type 2-DW2 diesel generators; 2,900 hp (2.13 MW); 1 motor; 2,000 hp (1.47 MW); 1 shaft
Speed, knots: 14
Range, n miles: 3,500 at 13 kt
Complement: 35
Radars: Navigation: I-band

Comment: Ocean tug built at Yaroslavl. Transferred from Russia in 1995

2 FLOATING DOCKS

Comment: One has a lift capacity of 8,500 tons. Transferred from USSR August 1983. Second one (Kheresson) has a lift capacity of 4,500 tons and was supplied in 1988.

Virgin Islands (UK)

Country Overview

A British dependency, the British Virgin Islands are situated in the eastern Caribbean Sea at the northern end of the Leeward Islands in the Lesser Antilles chain. Puerto Rico lies some 52 n miles to the west. Comprising a group of 36 islands, 16 of them inhabited, and more than 20 islets and cays there are four main islands: Tortola (21 square miles); Anegada

(15 square miles); Virgin Gorda (8 square miles); and Jost Van Dyke (3.5 square miles). Other inhabited islands include Peter Island, Cooper Island, Beef Island, Salt Island, and Norman Island. The capital, only town and principal port is Road Town, Tortola. Territorial seas (3 n miles) and a Fishery Zone (200 n miles) are claimed. The remainder of the Virgin Islands form a separate external territory of the US.

Headquarters Appointments

Commissioner of Royal Virgin Islands Police Force: Reynell Frazer

Bases

Road Town, Tortola

POLICE

Notes: (1) There is also a 12 m Scarab, fitted with three 225 hp outboard motors, and a 10 m Mako with two 150 hp outboards. (2) Two Dauntless class 12 m patrol boats are operated by the US Virgin Islands whose waters are also patrolled by USCG craft.

1 DAUNTLESS CLASS (PATROL CRAFT) (PB)

ST URSULA

Displacement, tons: 17.4 full load
Dimensions, feet (metres): 55.0 x 16.0 x 5.0 (16.8 x 4.9 x 1.5)
Main machinery: 2 Caterpillar C-15 diesels; 1,600 hp (1.2 MW); 2 shafts
Speed, knots: 32
Range, n miles: 300 at 28 kt
Complement: 4
Radars: Navigation: Furuno; I-band.

Comment: Dauntless design craft constructed by SeaArk Marine, Monticello, AR, and delivered on 1 December 2006 to replace previous vessel of same name decommissioned in 2003. Aluminium construction. The craft is employed on drug interdiction, combating illegal immigration, search and rescue and border control duties.

ST URSULA 12/2006, SeaArk Marine / 1167566

Yemen

Country Overview

The Republic of Yemen was formed in 1990 through the union of the People's Democratic Republic of Yemen and the Yemen Arab Republic. The country includes the islands of Socotra, Kamaran and Perim. With an area of 207,285 square miles, it is situated on the south-west coast of the Arabian Peninsula and is bordered to the north by Saudi Arabia and to the east by Oman. It has a 1,030 n mile coastline with the Red Sea and the Gulf of Aden, which are linked by a strategic strait, the Bab el Mandeb.

The capital and largest city is Sanaa while the principal ports are Aden and Al Hudaydah. Territorial seas (12 n miles) are claimed. A 200 n mile EEZ has been claimed but the limits have only been partly defined by boundary agreements.

Personnel

2009: 1,700 naval plus 500 marines

Bases

Main Aden, Hodeida
Secondary: Mukalla, Perim, Socotra, Al Katib
Coast Defence regions: Al Ghaydah, Aden and Cameron Island

Coast Defence

Two mobile SS-C-3 Styx batteries. Some 100 mm guns installed in tank turrets at Perim Island

PATROL FORCES

Notes: (1) In addition there are two 'Osa IIs', 122 and 124. One is in a poor state of repair and may have been decommissioned. The other was sighted in a floating dock in mid-2002 and may be seaworthy, although the SSM system is probably not operational.
(2) Three 32 m Hatter Marine Broadsword patrol craft have been reported: 26th of September (141); Sanaa (200); Ghamdan (300).
(3) There are 13 11 m Sea Spirit patrol craft.

1 TARANTUL I CLASS (PROJECT 1241) (FSGM)

124 (ex-971)

Displacement, tons: 385 standard, 580 full load

Dimensions, feet (metres): 184.1 × 37.7 × 8.2 (56.1 × 11.5 × 2.5)

Main machinery: 2 Nikolayev Type DR 77 gas turbines; 16,016 hp(m) (11.77 MW) sustained, 2 Nikolayev Type DR 76 gas turbines with reversible gearboxes; 4,993 hp(m) (3.67 MW) sustained; 2 shafts

Speed, knots: 36

Range, n miles: 400 at 36 kt; 2,000 at 20 kt

Complement: 50

Missiles: SSM: 4 SS-N-2C Styx (2 twin) launchers; active radar or IR homing to 83 km (45 n miles) at 0.9 Mach; warhead 513 kg, sea-skimmer at end of run.

SAM: SA-N-5 Grail quad launcher; manual aiming; IR homing to 10 km (5.4 n miles) at 1.5 Mach; altitude to 2,500 m (8,000 ft); warhead 1.1 kg

Guns: 1—3 in (76 mm)/59 AK 176; 120 rds/min to 5.9 km (3.8 n miles); weight of shell 7 kg.

2—30 mm/65 AK 630; 6 barrels per mounting; 3,000 rds/min to 2 km.

Countermeasures: Decoys; 2 PK 16 chaff launchers.

Weapons control: Hood Wink optronic director.

Radars: Air/surface search: Plank Shave (also for missile control), E-band

Navigation: Spin Trough; I-band.

Fire control: Bass Tilt; H/I-band.

IFF: Square Head. High Pole.

Programmes: Two export versions of the ship originally delivered from the USSR. First one on 7 December 1990, second on 15 January 1991. One decommissioned by 2001.

Operational: Facilities for servicing missiles in Aden were destroyed in mid-1994. This remaining ship is still in a reasonable state of repair although probably without missiles.

TARANTUL 124

10/1995 / 0016617

3 HOUNAN (TYPE 021) CLASS (FAST ATTACK CRAFT—MISSILE) (PTG)

126–128

Displacement, tons: 171 standard; 205 full load

Dimensions, feet (metres): 126.6 × 24.9 × 8.9 (38.6 × 7.6 × 2.7)

Main machinery: 3 Type 42-160 diesels, 12,000 hp(m) (8.8 MW) sustained; 3 shafts

Speed, knots: 34

Range, n miles: 800 at 30 kt

Complement: 28

Missiles: SSM: 4 YJ-1 (Eagle Strike) (C-801); inertial cruise; active radar homing to 40 km (22 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer

Guns: 4 30 mm (2 twin AK 230), 500 rds/min to 5 km (2.7 n miles).

Radars: Surface search: Square Tie; I-band.

Fire control: Rice Lamp; H/I-band.

IFF: 2 Square Head. High Pole A.

Comment: A variation of the Chinese Huangfen (Osa 1 type) class design. Delivered on 6 June 1995 at Aden having been built by the China Shipbuilding Corporation and completed in 1993. Payment was delayed by the Yemeni civil war. Based at Al Katib. 128 ran aground in September 1997 but was salvaged and may be operational again. 126 is in a reasonable state of repair but is not armed with missiles.

HOUNAN 126

5/1995 / 0505339

6 BAKLAN (CMN 15-60) CLASS (HSIC)

BAKLAN 1201
SIYAN 1202

ZUHRAB 1203
AKISSAN 1204

HUNAISH 1205
ZAKR 1206

Displacement, tons: 12 full load

Dimensions, feet (metres): 50.9 × 9.8 × 2.6 (15.5 × 3 × 0.8)

Main machinery: 2 diesels; 2 surface drives

Speed, knots: 55

Range, n miles: 400 at 30 kt

Complement: 4

Guns: 2—12.7 mm MGs

Radars: Surface search: Furuno, I-band.

Comment: Ordered from CMN Cherbourg on 3 March 1996. First five were delivered 1 August 1996 and the last one in mid-1997. Top speed in Sea States up to 3. Composite hull construction.

BAKLAN CLASS

8/1996, C M N Cherbourg / 0084259

10 AUSTAL PATROL SHIPS (PB)

P 1022–1031

Displacement, tons: 90 full load

Dimensions, feet (metres): 123.0 × 23.6 × 7.2 (37.5 × 7.2 × 2.2)

Main machinery: 2 Caterpillar 3512 diesels; 3,500 hp (2.61 MW); 2 shafts

Speed, knots: 29

Range, n miles: 1,000 at 25 kt

Complement: 19 (3 officers)

Guns: 2—14.5 mm (twin), 2—12.7 mm MGs.

Comment: Contract with Austal Ships on 9 June 2003 for a total of 10 patrol craft. All were shipped to Yemen in February 2005. Of aluminium construction, the design is based on the Bay class Australian Customs vessels. The contract included engineering and practical training for 60 Yemeni crew.

P 1022

3/2007 / 11/00245

AMPHIBIOUS FORCES

Notes: Ropucha 139 is an alongside hulk

1 NS-722 CLASS (LSMM)**MSMs**

Displacement, tons: 1,383 full load
Dimensions, feet (metres): 295.4 × 31.8 × 7.9 (90 × 9.7 × 2.4)
Main machinery: 2 Caterpillar diesels; 5,670 hp (4.2 MW); 2 shafts
Speed, knots: 18
Complement: 49
Military lift: 6 T-72 tanks and 111 marines
Missiles: SAM SA-16 or ZM Mesko
Guns: 4 ZSU-23-2MR Wrobel 23 mm (2 twin)

Comment: Ordered in late 1999 for delivery in 2002, development of the Poinochny class built by Naval Shipyard Gdynia, Poland. Shipped from Poland to Yemen on 24 May 2002. Roles include disaster relief and cadet training as well as amphibious warfare

BILQIS

10/2001, J Ciślak / 0131343

3 DEBA CLASS (PROJECT NS-717) (LCU)

HIMYER (ex-Dhaffar) SAMBA ABDULKORI (ex-Thamoud)

Displacement, tons: 221 full load
Dimensions, feet (metres): 134.5 × 23.3 × 5.6 (41 × 7.1 × 1.7)
Main machinery: 2 Cummins diesels; 2 shafts
Speed, knots: 15. **Range, n miles:** 500 at 14.5 kt
Complement: 10
Military lift: 16 tons and 50 troops
Guns: 2 ZU-23-2MR Wrobel 23 mm/87 (1 twin)
 2—12 7 mm MGs
Radars: Navigation, I-band

Comment: Ordered from Poland in October 1999 and delivered in mid-2001. AK-630 CIWS may also be fitted at a later date

ABDULKORI (on transport ship)

5/2001, J Ciślak / 0131342

MINE WARFARE FORCES**1 NATYA CLASS (PROJECT 266ME) (MINESWEEPER—OCEAN) (MSO)**

201

Displacement, tons: 804 full load
Dimensions, feet (metres): 200.1 × 33.5 × 10.8 (61 × 10.2 × 3)
Main machinery: 2 Type M 504 diesels; 5,000 hp(m) (3.67 MW) sustained; 2 shafts; cp props
Speed, knots: 16. **Range, n miles:** 3,000 at 12 kt
Complement: 67
Guns: 4—30 mm/85 (2 twin); 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg.
 4—25 mm/80 (2 twin); 270 rds/min to 3 km (1.6 n miles); weight of shell 0.34 kg
A/S mortars: 2 RBU 1200 five-tubed fixed launchers; range 1,200 m; warhead 34 kg
Mines: 10
Countermeasures: MCM: Carries contact, acoustic and magnetic sweeps.
Radars: Surface search. Don 2; I-band.
Sonars: MG 69/79, hull-mounted; active minehunting, high frequency.

Comment: Transferred from USSR in February 1991. Operational status doubtful. A second of class was delivered to Ethiopia in October 1991 but sheltered in Aden for a time in 1992

NATYA 201

6/2002, Rahn/Globke / 0530089

5 YEYGENYA (PROJECT 1258) CLASS (MINEHUNTERS) (MHC)

11-12 15 20 +1

Displacement, tons: 90 full load
Dimensions, feet (metres): 80.7 × 18 × 4.9 (24.6 × 5.5 × 1.5)
Main machinery: 2 Type 3-D-12 diesels; 600 hp(m) (440 kW) sustained, 2 shafts
Speed, knots: 11
Range, n miles: 300 at 10 kt
Complement: 10
Guns: 2—25 mm/80 (twin).
Radars: Navigation. Spin Trough, I-band
Sonars: MG 7 small transducer lifted over stern on crane.

Comment: GRP hulls. Two transferred from USSR in May 1982, third in November 1987 and three more in March 1990. One deleted in 1994. Two based at Aden and three at Al Katib. Operational status doubtful

YEVGENYA 20

2/1997 0016615

AUXILIARIES

Notes: (1) A 4,500 ton Floating Dock acquired from the USSR
 (2) A 14 m Hydrographic craft acquired from Cougar Marine in 1988
 (3) An oil-pollution control craft acquired in 1999
 (4) Two Toplivo class tankers, 135 and 140, are reported to have been decommissioned.

COAST GUARD

Notes: (1) The Yemeni Coast Guard was established in 2002 and began operating in 2003. Its tasks include counter-smuggling and immigration control duties, SAR, fishery protections, environmental protection and pollution control. Its headquarters are at Sana'a with regional headquarters at Aden (Gulf of Aden), Hodeidah (Red Sea) and Mukalla (Arabian Sea). There are plans to establish a coastal radar system with Italian assistance.

(2) In addition to the craft listed, there are reported to be a Fairey Marine Tracker II (1034), four Plassco 15 m fast patrol craft (1501-1504) and three Geraldton 23 m patrol craft (2201-2203).

P 2202

3/2007 / 1170746

16 PATROL CRAFT (PC)

1301-1316

Displacement, tons: 177 full load
Dimensions, feet (metres): 44.0 × 12.5 × 3.9 (13.4 × 3.8 × 1.2)
Main machinery: 2 General Motors Detroit 6V53 diesels, 2 shafts
Speed, knots: 13
Range, n miles: 200 at 11 kt
Complement: 4

Comment: Former US Coast Guard lifeboats constructed in the 1960s. First eight transferred on 16 February 2004 and the remainder in 2006.

2 ARCHANGEL CLASS (RESPONSE BOATS) (PBF)

Displacement, tons: To be announced
Dimensions, feet (metres): 42.0 × 13.0 × 2.5 (12.8 × 4.0 × 0.8)
Main machinery: 2 Caterpillar diesels; 2 Hamilton 322 waterjets
Speed, knots: 40
Range, n miles: 300 at 25 kt
Complement: 4
Guns: 1 12.7 mm MG
Radars: To be announced.

Comment: High-speed inshore patrol craft of aluminium construction and foam collar built by SAFE Boats International, Port Orchard, Washington. Donated by the US government in October 2005.

ARCHANGEL CLASS

6/2006, SAFE BOATS / 1167667

4 DEFENDER CLASS (RESPONSE BOATS) (PBF)

0801-0804

Displacement, tons: 2.7 full load
Dimensions, feet (metres): 25.0 × 8.5 × 8.8 (7.6 × 2.6 × 2.7)
Main machinery: 2 Honda outboard motors; 450 hp (335 kW)
Speed, knots: 46 **Range, n miles:** 175 at 35 kt
Complement: 4
Guns: 1 12.7 mm MG
Radars: To be announced

Comment: High speed inshore patrol craft of aluminium construction and foam collar built by SAFE Boats International, Port Orchard, Washington. Donated by the US government in October 2005.

DEFENDER 0804

Zimbabwe

**Country Overview**

The Republic of Zimbabwe gained independence on 17 April 1980. Formerly the British colony of Southern Rhodesia and, between 1953 and 1963, part of the Federation of Rhodesia and Nyasaland (now Malawi), a unilateral declaration of independence on 11 November 1965 precipitated a turbulent period of guerrilla war. This eventually led

to a peace settlement in 1979 and elections in 1980. A landlocked country with an area of 150,873 square miles, it is situated in central southern Africa and is bordered to the north by Zambia, to the east by Mozambique, to the south by South Africa and to the west by Botswana and Namibia. It has a shoreline of approximately 350 n miles with Lake Kariba, artificially formed by the Kariba Dam, from which the country gets much of its electric power

The capital, largest city and commercial centre is Harare (formerly Salisbury). The railway system is linked to the port of Beira in Mozambique
